Mayor Suggests U.S. Subsidies For UI Housing

Mayor Loren Hickerson proposed Tuesday a rent subsidy program, similar to Iowa City's Low Rent Housing Program, for students living in University housing.

Hickerson made his proposal at a monthly meeting of city and University officials. At the meeting, he asked whether it were possible if "the University or University related agents might, through Federal Housing Administration assistance, make it possible for the student to be able to afford University housing."

Hickerson said his question stemmed from his concern over an increasing rate of students living off campus.

Recent figures from enrollment profiles, provided by Don McQuillen, assistant director of the University Office of Public Information, indicate that of 19,616 students who provided the information, 45.8 per cent — or 8,989 students — live off campus.

Hickerson, who is also director of community relations for the University, said as the percentage of students living off campus increases, demand for additional community housing in all rent ranges increases.

Hickerson said his proposal would ease the housing strain by making it easier for students to pay the fees, with the help of federal money, for University housing, either in dormitories or in married student housing. In this way, according to Hickerson, students would not be forced to live in low-priced, off-campus housing.

Hickerson suggested that the University officials present — Elwin T. Jolliffe, vice-president of business and finance, and Ray B. Mossman, business manager and treasurer — investigate the feasibility of his rent-subsidy proposal and that they ask an FHA representative who will be in Iowa City Thursday for an Iowa City Housing Commission meeting about the proposal.

The Housing Commission administers Iowa City's Low Rent Housing Program, under which the city leases rental units from local landlords and, in turn, rents them to low income families at rents they can afford. The difference between the city's lease costs and its income from rent is compensated for with federal money.

Hickerson's proposal, like the Low Rent Housing Program, would make housing available at low cost by using federal funds. The proposal differs from the city's program because the mayor's proposal would apply only to existing University housing.

Jolliffe commented, "We have to be very careful about continued occupancy of existing dormitory facilities."

The University has been concerned about dormitory occupancy because the bonds which financed the construction of the dorms must be retired by using funds from dormitory fees.

The proposal apparently originated with Hickerson.

When questioned, he said he had not been asked either by local landlords or by the University to bring up the proposal. University officials contacted indicated no prior knowledge of Hickerson's question.

Semester's End

Students picked up grades in the Union New Ballroom Monday and Tuesday, finding out the results of their semester's work. This student, Bonnie Bennett, A3, Storm Lake, apparently found that her semester's work paid off.

Iowa High Court Throws Out Plan For Redistricting

DES MOINES (AP) — The reapportionment plan enacted by the 1969 Legislature was ruled unconstitutional by the Iowa Supreme Court Tuesday.

The court said the plan could be used for this year's elections because there isn't time to impose a constitutionally sound apportionment before the June 2 primary. It directed the 1971 Legislature to adopt a constitutional plan based on the 1970 census.

The ruling, however, triggered a Senate demand for immediate action to enact a valid plan based on a "good faith effort" to make legislative districts as nearly equal in population as possible.

The court's ruling was made in a suit filed last July 1 by a group of five Democrats to test the apportionment plan's legality.

They argued that the plan designed legislative districts which varied in population more than necessary, which were gerrymandered to favor Republicans and incumbents, and which deprived the voters in at least one district of a chance to vote for senator.

The Legislature undertook the reapportionment plan to comply with a new amendment to the Iowa Constitution requiring that the House be trimmed from 124 to 100 members and the Senate from 61 to 50.

It set up a 14-member bipartisan commission to propose a plan. The commission suggested senatorial districts ranging in population from 52,116 to 58,822

and House districts varying from 26,000 to 29,500.

The Republican-controlled legislature then worked over the plan, changing some districts in both houses. The population range of House districts remained unchanged, but the population range of Senate districts was larger—from 52,116 to 58,822.

In the 7-2 opinion written by Justice M. L. Mason, all nine justices of the Supreme Court agreed the plan does not meet the constitutional requirements of "one man, one vote" laid down by the U.S. Supreme Court.

Justice Francis Becker dissented. He disagreed with the majority that adoption of a constitutional plan could wait until next year. Justice Clay LeGrand agreed with parts of the majority decision, but joined Becker in that part of his dissent.

Becker contended the constitution requires the Supreme Court, when it finds an apportionment plan invalid, to "adopt or cause to be adopted" a valid plan within 90 days.

He argued that the court should do that and, if necessary, set back the March 29 filing date and the June 2 primary date, which he said "is not sacrosanct." Failing that, he said the Legislature should be directed to substitute the commission's plan for its own.

In the majority opinion, Becker wrote the Legislature's rules made it impossible for the bipartisan commission to come up with a constitutionally valid plan.

The Legislature ordered the commission to draw a plan with 100 representatives and 50 senators, with districts of "substantially equal" population and with each senatorial district containing two House districts.

It said district boundaries should follow county lines where possible and no voting precinct could be divided. It also said that wherever possible, senators should be permitted to complete the terms for which they were elected.

Mason said the U.S. Supreme Court in a Missouri congressional redistricting case has held unacceptable population disparities which were less than those in either the commissions or the Legislature's plan.

He said in the same case — Kirkpatrick vs. Preisler — the U.S. Supreme Court declared there must be a "good-faith effort to achieve precise mathematical equality" in population of districts and he said the Iowa Legislature clearly hadn't done this.

"The commission plan filed here," the opinion said, "had deviations of 12 per cent in the Senate and 14 per cent in the House."

"It is clear the Iowa Legislature started with these variances in creating legislative districts . . ."

—Wants New Power, Money—

Nixon Moves on Ecology

WASHINGTON (AP) — In his fifth major environmental action this year, President Nixon asked Congress Tuesday to give his administration new power, jurisdiction and money to improve the quality of U.S. life.

In a special message, Nixon proposed a \$4 billion program for municipal waste treatment and for water improvement, backed by stricter clean-up standards and enforcement powers. To fight air pollution, Nixon proposed authority for the Department of Health, Education and Welfare (HEW) to regulate the composition of vehicle fuels and ordered a 5-year research program on a pollution-free automobile.

At the same time, HEW proposed new standards to control vehicle pollution emissions, applying to 1973 and 1975 models. These are years when major model changes are due.

Nixon sought nationwide federal enforcement powers against both air and water pollution and the threat of court-imposed fines of \$10,000 a day against violators.

The President took no direct action

against solid wastes, such as trash, but ordered research to reclaim and re-use materials from discarded products, or at least to find ways of disposing of waste materials more easily.

He singled out junk automobiles as a major solid waste problem and directed his new Environmental Quality Council to find ways of promoting their prompt scrapping so they would not clutter up the landscape.

Nixon said the price of an automobile "should include not only the cost of producing it, but also the cost of disposing of it."

Nixon also proposed a movement to carve out new park and recreation lands.

One approach would be to step up federal and state purchases of land for parks and recreation through full use of the Land and Water Conservation Fund.

Asian Girl Defies Quota, Gains Entry to Britain

LONDON (AP) — Ranjan Vaid finally came to Britain Tuesday, seven days, 19,000 miles and two continents after she began an aerial odyssey from Kenya to join her brother here.

Reluctantly bowing to public pressure, Home Secretary James Callaghan granted the 22-year-old Asian girl a three-month permit to live in Britain.

The sari-clad Indian girl left Kenya without a permit to enter Britain. Many other Kenyans have been doing the same thing.

She was refused entry into Britain last week. Since then she has been shuttled from Nairobi, Kenya, which refused to let her return, to Frankfurt, Zurich and Johannesburg.

Miss Vaid is a British citizen and carries a British passport, but was denied entrance to Britain under a rigid quota immigration system for British Asians and Africans.

But, where others have been refused entry, Miss Vaid in her role as an international table tennis star captured public sympathy and crashed through at least temporarily.

"I cannot promise to make it easy for those who want to jump the queue

(quota)," Callaghan told the House of Commons as Miss Vaid and her brother, Shantilal, were flying in from Frankfurt.

Callaghan's replies to questions in the House implied continued restrictions, primarily to keep Britain's race troubles from overheating.

"It would break down the whole system," Callaghan said. "That may be the desire of some people; but if they were to succeed, it would impede the growth of good race relations in this country."

The 50,000 East Africans carrying British passports — including Kenyans — have an annual immigration quota of 1,500. The quota has fostered some bitterness among the Africans.

The 5-foot Miss Vaid, object of heated questions and answers in Parliament, said nothing to reporters at London's Heathrow Airport. She speaks little English.

"My sister is very happy to be here," said her brother, a London accountant.

Miss Vaid, fatigue apparent in her face, appeared a bit bewildered by her role as a symbol of Britain's rave problem.

"It's all in the hands of our solicitor," her brother said. "Now we are going home."

Nixon Plans Educational Institute

WASHINGTON (AP) — President Nixon will call for the establishment of a National Institute of Education to coordinate research on educational improvement from pre-school to graduate school levels, sources said Tuesday.

The Nixon proposal is expected to be delivered to Congress following the current negotiations to replace the \$19.7 billion education and welfare measure vetoed by the President last month.

It will outline expenditures of \$300 million to \$500 million a year over a five-year period for the new institute.

Should Congress agree to start the institute, it will mark the first time that efforts to develop new thrusts for education have been brought under one roof.

Presently, efforts have been scattered among universities and supported by funds from the U.S. Office of Education budget.

Sources familiar with the proposal say it calls for establishing the institute as a separate, physical entity similar to the National Institute of Health.

The institute's purpose would be to bring in scholars for periods of directed, intense investigation and analysis about what succeeds in education and then to apply these programs directly to schools and colleges.

A sampling of educators, most of whom still are nettled by the Nixon veto of the education money bill, shows enthusiasm for the proposed institute.

The institute's director would report directly to James E. Allen Jr., U.S. commissioner of education and assistant secretary for HEW.

Regents-Employees Bargaining OK'd

DES MOINES (AP) — The State Board of Regents may enter into collective bargaining with employees, but it doesn't have to, the Iowa Supreme Court ruled Tuesday.

The opinion upheld a ruling by Black Hawk District Court Judge Peter Van Metre in a suit brought by the Regents against the United Packinghouse Workers of America (UPWA) in 1968.

Some non-academic physical plant employees at the University of Northern Iowa, Cedar Falls, joined the UPWA Feb. 20, 1968, then called a strike and established picket lines.

Judge Van Metre issued a permanent injunction against the strikers and forbade picketing on or near the campus.

He said, however, that the Regents have power to bargain collectively and enter into collective bargaining agreements with employees.

The Regents appealed his ruling on collective bargaining and the union appealed his injunction against picketing.

The Supreme Court opinion, written by Justice W. C. Stuart, said the law states that public employees have the right to organize and join labor organizations, but not to strike.

Regarding collective bargaining by the Regents, Stuart said:

"The power to hire employees, fix their salaries and wages, direct expenditures of money and perform all other acts necessary and proper for the execution of powers and duties conferred on the Regents carries with it the right to confer and consult with representatives of the employees in order to make judgments as to wages and working conditions."

"We hold that the Regents have authority to engage in collective bargaining in this context."

The opinion said, however, that collective bargaining in the full sense that it is used in private industry does not apply to public employees.

It said that if the Legislature desires to give public employees "the advant-

ages of collective bargaining in the full sense as it is used in private industry, it should do so by specific legislation to that effect."

Officer Denies Nixon Could Have Influenced Calley Trial Decision

FT. BENNING, Ga. (AP) — A junior legal officer testified Tuesday that he was prepared to recommend that Lt. William L. Calley Jr. be tried for murder in the alleged My Lai massacre regardless of what action President Nixon might have taken.

Calley's defense attorneys are contending that command influence from President Nixon down through the military figured in the decision to try Calley for murder in the slaying of 102 Vietnamese civilians at My Lai, South Vietnam, in 1968.

Good Game

The Wisconsin Badger Coach John Powless congratulates Iowa's Glenn Vidnovic for his role in the Hawks' 119-100 victory over the Badgers. Walking next to the coach is Al Henry of the Badgers and walking next to Vidnovic is Badger Lee Oler. The Hawks set a Field House record for most points by an Iowa team in Tuesday night's game. Agnew's blooper

(or)

Another in a continuing episode

Has the time finally come? Has Vice President Spiro T. Agnew decided to lay down his arms of verbal combat, to cease smashing people in the head figuratively?

Saturday was the debut of what many of us hope will not be Agnew's new technique. During the first tee-off at the Bob Hope Desert Classic golf tournament at Palm Springs, Calif., Agnew hooked, everybody ducked, but pro golfer Doug Sanders didn't duck low enough and was cold-cocked in the back of the head with the little white ball.

Now that he has drawn blood, I certainly hope that the Vice President decides smashing people in the head literally isn't all that much fun. I mean, you see it on TV.

If you happened to see the whole thing on television you probably found yourself feeling just a bit sorry for the 'ol V.P. There he was, two perfectly awful shots right in a row, one almost cracked skull, thousands of witnesses and newsmen and no place to go.

And if you didn't see it on TV, take my word for it, you can feel sorry for him if I can. Who after all has been picked on the most by Spiro. First he came down on "effete snobs" for peace - students. Then he had a few choice words about that dastardly "unelected elite" - journalists. Here I am a student journalist with two strikes against me.

- Lowell Forté

A healthy environment

John Doe sits in his comfortable new, push-button home where he has all of the consumer's latest conveniences. His air conditioner is a new one - he had to get a more powerful unit to clean out the increased impurities in the 'outside' air.

The year is 1980. In 1970, John Doe had become alarmed about pollution of his environment and his alarm has increased in the year 1980.

Here he is in Chicago; he has to drink imported water and has to walk through pollution-free air tunnels downtown. The last time he saw the sun clearly was in 1976 - but of course he still has his new, beautiful, push-button home and he can always go to northern Alaska for fresh air and sunshine.

If John Doe wanted to see sunshine in downtown Chicago, he would have to give up his push-button home and many of the other conveniences he cherishes - something he has not been willing to do.

Here in 1970 we are becoming alarmed about pollution and fear the great smog cloud and the spectre of undrinkable water. We all cry for clean air, clean water and a clean environment, but do we really want it?

The price for recovering our environment, for reversing the pollution we have already created, is very probably, according to scientists, a zero growth in the population and a cut-back in the manufacturing of many of the conveniences the affluent American believes he needs.

The birth rate needs to be lowered to a point where the deaths cancel the births to stop the increase in the number of consumers. When the country's population increases, its industry must produce more.

So how do we slow down the birth rate - the pill, intrauterine devices? Any of these things which work

should be used. These devices work without a significant danger to the individual.

But the pill provides a good example of the kind of problem our ecological protectors face: favoring the pill means challenging the Catholic Church and spurring the likes of Sen. Gaylord Nelson and his 'loaded' hearings on birth control pills.

And Americans will also have to give up some of the products they now can get.

Why? Because to effectively reduce pollution, our factories are going to have to reduce the amount of pollution they produce and this means reducing the number of factories. For, no matter what a factory does, it can't avoid some pollution.

It is a simple, scientific fact that when a factory uses coal, gas, or any other substance to fuel its fires, it can't avoid causing some pollution. Man has yet to invent a pure matter to energy change which is satisfactory from a pollution standpoint - even atomic reactors have problems with heat pollution.

But can these seemingly unpalatable objectives be achieved? They can if the public is educated about the dangers of pollution and sufficient governmental planning is done to direct the economy into more pollution-free pursuits.

The important thing is this: the public must be made to realize that it is going to be involved in the solution. It may have to give up some of the consumer items to preserve a healthy environment. If it is not willing to make the sacrifices, it will have its push-button homes, but it will wear aqua lung packs to breathe with and seeing the sun may require a flight to the north pole.

- Larry Chandler

They Had A Dream

FREDERICK M. JONES by Reasons and Patrick

Refrigerated trucks and railway cars daily crisscross the nation, hauling all manner of fresh foods for the American dinner table.

Few people know this was made possible by a black man named Frederick McKinley Jones.

Before Jones put his wizardry to work, perishable foods were shipped packed in ice or in vehicles cooled by ice. On long hauls, any delay was disastrous.

In 1935, Jones invented the first automatic refrigeration system for long-haul trucks. Later it was adapted to a variety of other carriers, including ships and railway cars.

The invention eliminated the problem of spoilage. It revolutionized the eating habits of America.

Born in Cincinnati in 1892, Jones was orphaned at the age of nine and never managed to get more than a sixth-grade education.

Taken in by a kindly priest in Covington, Ky., Jones remained with him until he was 16, earning his keep by cooking and doing odd jobs around the rectory.

In 1908, the youth took a job setting pins in a bowling alley and from that switched to a job as mechanic's helper in a Cincinnati garage.

He became garage foreman, then quit to work as chief mechanic on a 30,000-acre Minnesota farm.

Jones served in France in World War I and after the war returned to the farm. As a hobby he designed racing cars which he raced on the dirt track circuit.

In the late Twenties, his mechanical fame spread when he invented a series of devices to adapt silent movie projectors to talkies. His first device cost \$100 and was superior to the \$3,000 commercial model.

Jones was hired by a movie supply firm in Minneapolis. A boss by his employer during a golf game with some friends led to Jones' invention of the refrigeration system for trucks.

One of the men in the game was a trucker who had just had a truckload of poultry spoil. Jones' employer said his firm could develop a refrigeration system to avoid that kind of problem. His friend took him up on the offer.

Jones put together a refrigeration unit from junk parts and mounted it on the truck cab. It did the job. He and his employer then formed a company to manufacture the device. Jones became vice president.

The unit was later used in the transportation of rocket fuel and frozen foods. Later Jones developed an air-conditioning unit for military field hospitals, a portable X-ray machine and a refrigerator for military field kitchens.

When he died in 1961, a total of some 60 patents had been issued in his name.

The Egoist Papers

Diana Goldenberg

Women's Liberation in Iowa City is a farce.

Marlene Dixon said that the Women's Liberation Movement is loosely-structured. Women's Lib ideas in one area could be different from those in another, therefore it is not wise to indict (or praise) the whole Movement on the basis of one group. The ideas in this column are based on information gained from the Women's Liberation Front in the Iowa City area.

If you feel stifled by men, downcast, and oppressed, submerge yourself in a big political movement and everything will be rosy. Since people operate solely in a political context, political action can be used to overcome anxiety, inferiority, and dependency problems.

Or, at least, so Women's Liberation Front thinks.

The Front is attempting to get women to destroy their feelings of inferiority by political means. But an inferiority complex is a psychological problem, to be fought on an individual basis, in the mind of each woman.

WLF defines the problem: prejudice, the male myth, inferiority, and offers the solution: Women, Unite!

Something is wrong when the psychological problems of an individual are soothed by political action, instead of internal action. Politics is not a primary motivation in people. Something more basic makes a person what he is.

Since the Front has obviously ignored volition, blaming woman's woes on society and male exploitation, it should give up hopes of freeing woman, if woman is the product of her society, then she can do nothing to change herself or that society. Women's Lib, you should be more original.

Political maturity does not insure psychological freedom. Yet Women's Lib seems bent on turning out political activists, not self-confident people. The goal of this Movement evidently has shifted from helping a woman realize her individual potential to helping women see their role as members of a revolutionary collective.

It is no longer Woman, the One, who counts, but Women, the Power Group, who are important. Women no longer want to be thought of in terms of husband or family; but to be considered in terms of some political movement is okay. The principle behind both positions is the same: an individual is worthwhile only in some larger context, the one should be submissive to the group.

Now I don't care whether you define

that group as the "nuclear family" or "community cadre." The devastating effect to the individual woman is the same. The innocent woman wants to know what she can do to develop her own identity, and the Front tells her to lose it in the roar of a revolutionary collective.

Which is sad, since the Movement could have a very positive effect on the lives of women. The idea of making women aware of the psychological - and political - inferiority they have taken on is a good one. So are the concepts that women can be intellectual equals with men, that women should be dealt with on the basis of their ability, and should not be punished for their sex.

The solutions to these problems have been lost in the political arena. Instead of explaining to women why they should not consider themselves inferior because of their sex, WLF lectures on class struggle and revolutionary re-alignment. (How much does the class struggle mean to a woman suffering from acute inferiority?) Instead of identifying the points necessary for psychological independence and self-confidence, the Movement gives political jargon.

And how should a woman change her psychological state? What caused her to feel inferior? How can she cope with inferiority and anxiety problems? How should she regard men? What are the differences between men and women?

To which WLF answers: there are no differences between men and women; women's position can only be fulfilled by the revolution; down with imperialist employers, capitalist husbands, capitalist-imperialist street cleaners and abortionists, c-i etc., etc.

It's as though Women's Lib seized on contemporary political rhetoric, substituted "women" for "poor" or "black" or "oppressed" - and viola, Women's Problems are solved.

The Movement has slumped from an attempt to help women understand their potential, to a shoddy cashing-in on today's prevalent political climate.

And the playing in all this is woman's psyche.

You've come to Iowa City, baby. What happens to the individual woman who is lost in this blast of political jargon? Is she the one you're really interested in, WLF, or have your attentions focused on political expedience?

Check your premises, and quit introducing yourself as woman's liberator. All you've come to do is to provide another context for her to lose herself in.

From the people Support of causes should be 'determined by convictions'

To the Editor:

A few comments are necessary in relation to the "Alternative" column of Mr. Edismoe (Feb. 5). A valid point is made: those who out of boredom or because they become faddish, support a cause (any cause), are most certainly not objects of admiration. However, Mr. Edismoe uses the William Buckley technique of dressing one point in an array of impressive terms, in order to hide weak arguments.

Along with the Spiro Agnew school of social science, Mr. Edismoe seems to equate Eastern with liberal. He also assumes that liberal means white, and rich. Not only may one find Western, less-than-rich liberals, who may not be white, one will also find rich, white, Eastern conservatives, who also support "unusual causes," such as the John Birch Society and the Minutemen.

Further, Mr. Edismoe finds it hard to believe (despite the Kerner Report, et. al.) that whites should feel some guilt about the oppression of blacks—who should feel guilty—the Indians? The es-

pousal of any cause should be done out of conviction, without question, but this is not a function of social standing, nor should it be.

The fallacy that the rich should give away their money, is merely an expansion of the old: if you believe it, why don't you do something. Yet, whatever his own beliefs, Mr. Edismoe leaves them fend for themselves, while he is here at UI. Not everyone needs to man barricades or run for the legislature.

Lastly, bogged down in elementary psych terminology, Mr. Edismoe let slip, perhaps unnoticed, an interesting remark: "quasi-Marxist egalitarianism." Unfortunately Marx stole that idea from some earlier radicals... "all men are created equal... inalienable rights to life, liberty and the pursuit of happiness."

Here is an earlier quasi-Marxist society, I am sorry to say, right here in our own back yard.

... AND DESPITE HEAVY ENEMY RESISTANCE, WE PENETRATED HIS TERRITORY, INFLICTED HEAVY LOSSES IN AN EARLY DAWN RAID AND WITHDREW ACROSS THE CANAL!

Engineer: Water Pollution to Continue If Agricultural Wastes Unmanaged

Pollution of both ground and surface water will continue to increase in Iowa if more comprehensive programs are not undertaken to manage agricultural wastes, a University engineer said Tuesday.

Dr. Richard R. Dague, assistant professor of civil engineering, cited instances of well water contamination in Mitchell County as "examples of what we can expect to happen with increasing frequency if we fail to take adequate preventive measures."

He also cited University tests showing that Clear Creek, which flows into the Iowa River in Iowa City, had a pollution load equivalent to that of about 180,000 people at one time last spring. "This can be attributed almost entirely to agricultural sources," he said.

Dague noted that present cattle feedlot regulations require that farmers register lots of 1,000 cattle or more, if the density of the cattle on the lot is at least 73 per acre. Under some conditions, smaller lots must also be registered.

"This means that many feedlots are not under the regulatory system, and that actually less than 10 per cent of Iowa cattle are affected by the regulations.

"If regulations are to be effective in substantially reducing pollution, they will have to affect a major portion of the cattle feeding industry in Iowa," he said.

Noting Department of Agriculture figures showing that Iowa feedlot marketings increased about 10 per cent each year from 1962-67, Dague said that the state's present regu-

lations "do nothing to prevent more total pollution after any given year than at the beginning of it."

In addition to regulations controlling specific sources of agricultural pollution such as feedlots, "a great deal of cooperation on the part of individual farmers will be required to control agricultural wastes on a significant scale," Dague said.

An example is the practice of applying manure to frozen ground during the winter, so that it runs off into streams in the spring. A better practice, Dague said, would be to apply the manure in the fall or spring, and to plow it under immediately.

Dague also cited a University study indicating that feedlot pollution could be "significantly reduced with relatively simple and inexpensive runoff control facilities."

at a question and answer session at 3:30 p.m. today in Phillips Hall auditorium. WILPF is planning its demonstration for 3 p.m. in front of Phillips Hall here today.

According to Mrs. Osborne, President Nixon, on Jan. 30, stated that he would be prompting Congress to further expand the anti-ballistic missile system.

Mrs. Osborne said her organization hoped Miller would consider his support of the ABM system. Miller voted for the system when it was brought before Congress last summer.

Miller is scheduled to speak

Turner Urges Wiretap Law

DES MOINES (AP) — Iowa needs a proposed wiretap law in order to fight heroin pushers who are linked to organized crime, Atty. Gen. Richard Turner told Iowa senators Tuesday.

In a letter distributed to each of the 61 senators who will consider the House-passed bill on

Thursday, Turner said, "In my opinion there is no other legislative proposal which would assist law enforcement in Iowa more than this bill."

"Iowa faces new problems of organized criminal activity which was virtually unknown a few years ago," Turner wrote.

He followed that statement with comments outlining the danger of heroin and saying the drug "is appearing in Iowa with increasing frequency."

Turner said organized crime is also involved in thefts of property, and that top state crime investigators estimate the economic impact in Iowa at

approximately \$3.2 million per year.

He cited a statement by New York authorities who called wiretapping "our single most effective weapon against organized crime."

Turner said those who fear invasion of privacy have little legal arguments on their side.

City Council Asked To Deny Rezoning

The Planning and Zoning Commission Tuesday voted unanimously to recommend that the City Council deny the rezoning of two residential tracts of land.

Copetitioners — Advanced Drainage Systems, Inc. (ADS), leasee of a building at 1301 Sheridan Ave., and Georgia Tuttle, owner of the land, petitioned the Commission for the rezoning of a tract of land on the West side of the Sheridan avenue building from R2, residential area, to M1, industrial area.

ADS makes a flexible drainage tubing for farm use. The corporation asked that the land be rezoned so it could store surplus tubing.

Charles and Doris Walden,

730 E. Bloomington St., asked that a tract of land of 2120 Riverside Dr. be rezoned from a R1A, residential area, to a C2, commercial area. Walden said he wanted to build a sporting goods store on the land.

The Commission voted to recommend to the City Council, the denial of both rezoning requests. In both cases, according to Chairman George Nagle, the areas in question were surrounded by residential property and a zoning change would be inappropriate at this time.

The Commission voted unanimously to recommend a study by the City Planning Staff of south Iowa City including areas on both sides of the river.

The study, which must be recommended officially by the City Council, will study the land south of Highway 6 Bypass on the east side of the Iowa River and the land south of the airport on the west.

The Commission also gave its approval to the University's long-range campus plan as related to the R-14 urban renewal plan.

Since the University will be acquiring land in the R-14 area, the city is required by law to approve University plans for the development of the area.

Women for Peace, Freedom Plan Demonstration Today

Demonstrations urging a negative vote on further expansion of the Anti-Ballistic Missile system are scheduled to greet Sen. Jack Miller R. — Ia. here today.

Iowa City chapter of the Women's International League for Peace and Freedom (WILPF) is sponsoring the demonstration as the first of several projects they have planned in the Iowa City area, according to the newly locally founded organization's chairman Mrs. Ron Osborne.

Miller is scheduled to speak

Johnson, Calabria Hit 29 Each as Team Scoring Marks Fall— Whew! Hawkeyes Outlast Badgers, 119-100

By MIKE SLUTSKY
Sports Editor

Defense was a forgotten word Tuesday night at the Field House as the Iowa Hawkeyes unleashed the biggest scoring barrage in the school's history in bombing Wisconsin 119-100.

The victory was the Hawks' ninth straight and enabled

them to maintain their perfect Big 10 slate at 7-0. Purdue beat Indiana at Lafayette Tuesday night 98-88 to remain in second place, a game - and - a - half behind the Hawks at 6-2.

The Hawks' 119 points Tuesday broke the old record of 116 set last year against another

Wisconsin school, the University of Wisconsin at Milwaukee. The 219 points by the two teams combined broke the old standard of 200 set in 1959 when the Hawks lost to Illinois 103-97.

Once again it was Iowa's balanced scoring attack that had a roaring, capacity crowd of 13,496 on its feet throughout the contest. Five Hawkeyes scored in double figures, and for the second time this season four players hit 20 or more points.

John Johnson and Chad Calabria led the bombardment with 29 points apiece. Glen Vidnovic popped in 24 and Ben McGilmer had 20 - 12 in the second half. Also in double figures for Iowa was guard Fred Brown - hampered with personal fouls much of the game - with

10, his Big 10 low. Calabria's 29 points left him only three shy of the coveted 1,000-point circle for career scoring. Chad now has 997 points for his 65-game Iowa career.

For the ninth consecutive time - all victories - Iowa shot better than 50 per cent from the field. This time the Hawks gunned in 45 of 80 shots from the court for 56.3 per cent.

The Badgers weren't exactly slouches in the shooting department either. Wisconsin had four players in double figures - headed by 6-0 guard Clarence Sherrod's 35 points (23 in the second half) - and shot 54.8 per cent from the field, hitting on 40 of 73 attempts.

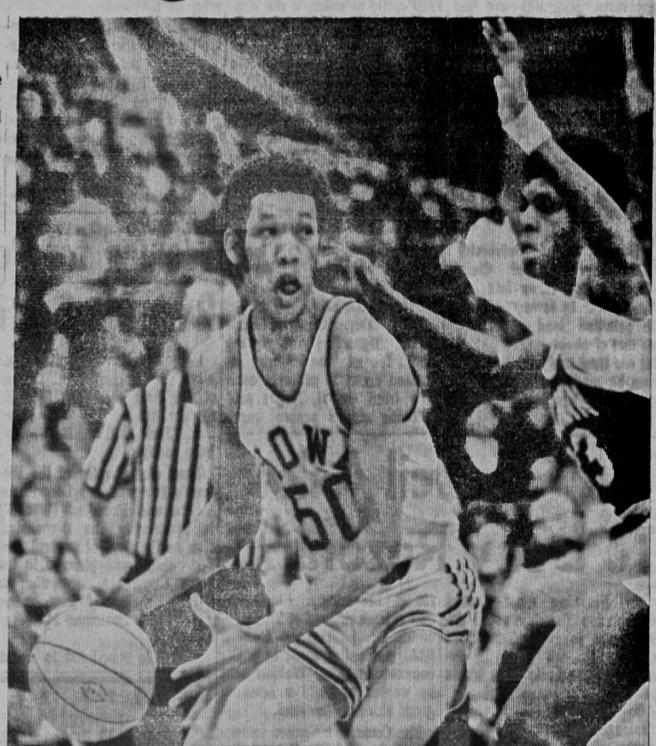

Helping Sherrod in the scoring parade for Wisconsin was 6-9 senior center Al Henry with 22 points and two sophomore forwards, Lloyd Adams with 20 and Lee Oler with 14.

The record-setting contest resembled the pro's run-and-gun style of play as both

teams raced up and down the court and seemingly dropped in shots at will.

Wisconsin stayed with the Hawks, now 12-4 overall, during most of the first half and was trailing only 40-38 with less than five minutes remaining in the opening stanza.

Iowa grabbed an early 12-8 lead behind Calabria, who scored Iowa's first seven points, but the Badgers passed the Hawks' at 13-12 on a jumper by Adams and expanded the margin to five at 20-15. The Hawks scored six straight

Johnson Badgers the Badgers—

Iowa's John Johnson drives with the basketball during the first half of the Hawkeyes' 119-100 win over the Wisconsin Badgers Tuesday night in the Field House. The play of Johnson was a major factor in the Hawk's record-setting performance as he dribbled and shot the Badgers ragged. Johnson hit 14 of 22 shots from the field and finished with 29 points.

At that point Calabria drove in for a score, was fouled by Bob Frason (his fifth personal) and converted the free throw for a three-point play upping the Hawks' advantage to 77-63.

Wisconsin bit into that lead and cut it to 78-66 with 12:24 left, but that was as close as the Badgers could come when McGilmer and Vidnovic each scored 10 points in the next eight minutes.

Calabria's drive took the Hawks over the 100-point barrier at 101-86, and Coach Ralph Miller began emptying his bench with 2:30 remaining.

When Gary Lusk dropped in

the first of two charity attempts, the Hawks, to the delight of the frenzied, partisan Iowa fans, had their 117th and record-breaking point.

For Iowa, ranked 14th by The Associated Press and 11th by United Press International in the latest cage polls, it was the seventh time this season the Hawks have reached the century mark.

More importantly, the victory kept the Hawks' record spotless in the Big 10 at the halfway point of their Big 10 schedule. The Hawks enter the second half of their Big 10 slate Saturday against Michigan State at the Field House.

The loss dropped Wisconsin's

Big 10 record to 3-4 and the Badgers, who upset previously unbeaten Illinois last week, are now 8-9 overall.

New career opportunities in aerospace/electronics

There are no walls around you, no ceiling above you when your career is aerospace/electronics. And Hughes Field Service & Support Division is an ideal place to start. You can capitalize now on your abilities and training. Get valuable and varied experience quickly. And keep progressing steadily toward your career goals.

Our Division objectives are to assure maximum utilization and operational efficiency of high-performance electronic equipment throughout its life span. Significant projects include: Communications Satellites; Automatic Test Equipment; Airborne Fire Control Systems; Airborne Communications Systems; and Training Simulators.

Areas of interest:
Field Engineering
Responsibilities include: providing maintenance, opera-

tional and technical assistance; on-the-job training; logistic assistance and solution of equipment problems in the field.

Engineering Writing
At Hughes, technical staff members prepare technical publications and instructional devices for the operation and maintenance of electronic systems. Assignments are varied and provide a wide range of systems-oriented experience.

Technical Training
Hughes Technical Training prepares both civilian and military personnel to operate and maintain advanced electronic systems. Instructors work directly with customers to evolve special training devices, plan field training programs and prepare courses for use at customer bases.

Design Engineering
Design Engineers develop sophisticated training simulators, automatic checkout and test equipment, inertial guidance,

infrared testing and Command/Control systems. Included are design of analog circuits, digital logic, switch/relay logic and electro-mechanical packaging. Responsibilities extend from concept to final fabrication and evaluation.

Requirements:
B.S. degree in Electrical Engineering or Physics.

Campus Interviews

Frosh Cage Team Records 5th Straight Win, 60-53

The Iowa freshman basketball team jumped to a seven-point halftime bulge and maintained that margin to clip Muscatine Junior College 60-53 Tuesday night at the Field House.

The contest was marked by the absence of seven Iowa players - four who were declared ineligible because of grades and three others who quit the team - but the Hawks could not be denied their fifth straight victory.

The most notable losses were those of Sam Williams, Iowa's leading scorer with a 14.8 average, and top reserve Mac Petty (8.2).

The other ineligible players are reserves John Hess and John Lamar. Reserves Robert Hughes, Rich Morton and Kim Eggleston recently quit the team.

Iowa scored first on Glenn Angelino's jumper and after Ken Griffin countered for Muscatine, the teams hit a four-minute cold spell. The Indians quickly recovered and took advantage of Iowa's slump to pull away 14-6.

The Hawks finally found the bucket and pulled even on four straight baskets. Muscatine slipped back in front 18-14, but Angersola, Kunnert,

Joe Gould and Tom Cabalka each hit baskets to let Iowa resume control 22-16.

The Hawkeyes outscored the Indians 7-3 in the next four minutes for a 29-22 halftime lead.

Kunnert and Angersola helped Iowa dominate the boards in the second half, but a series of turnovers cut a nine-point Iowa lead to two, 51-49, with five minutes remaining in the game.

Angelino then took charge and drove for two layups and added two free throws to pull the Hawks out of danger 57-49.

Kunnert, 4-10 center from Dubuque, led the Iowa frosh with 18 points. Angelino and Angersola followed with 16 and 10, respectively. Ken Griffin of Muscatine led all scorers with 21 points.

The victory raised Iowa's record to 6-1 while Muscatine fell to 13-9.

Drake Loses 93-81 In Double Overtime

DENTON, Tex. — North Texas State outscored Drake 18-6 in the second overtime to hand the Bulldogs their first defeat in 12 games 93-81 here Tuesday night.

The game was tied at halftime 35-35 and at the end of regulation time 69-69. Both teams scored six points in the first overtime.

The loss broke an 11-game Drake winning streak. Drake, ranked No. 11 nationally in The Associated Press poll, now stands 16-5 on the season. North Texas is 12-7.

The loss dropped Drake into a tie with Louisville, which defeated Wichita State 91-84 Tuesday night, for the Missouri Valley lead with a 9-1 conference

mark. North Texas is 6-4 in the league.

A Learning Environment

Warm weather means a chance to enjoy the environment while plugging away at those books for Becky Moershel, A3, Homestead. Benches on the riverbank west of the Union and last week's temperatures in the 50s combined to provide the opportunity for a nature-and-study jaunt.
— Photo by Hoyt Carrier

Fulton: State Government Falling Behind Its Services

Iowa's government is rapidly falling behind the rest of the state in its organization and delivery of services, according to Robert Fulton, candidate for the Democratic nomination for Governor.

In a speech to the Young Democrats in the Union Harvard room Monday night, Fulton, a former lieutenant governor of Iowa, declared, "We have a government that was set up in 1846, and if it doesn't meet the requirements of the 1970's, we've got to change it."

"An example of this," Fulton stated, "is the issue of 19-year old voting."

"The conservatives in the House of Representatives have decided there's a way they can be for the bill and still insure its defeat," he said.

By adding numerous amendments on drinking and other issues to the bill, the conservatives have made it so complicated and far-reaching that

voters would likely not approve it if it passes the House and Senate in the next legislative session.

Fulton explained, "If you get so confused that you can't remember whether you're really for it or against it, you're using political double-talk. The American public is now asking politicians, 'Can we trust you?' and the overwhelming answer is, 'Hell no, we can't.'"

Fulton continued, "Down through the years in state and local government the legislators have been governing a state that is rapidly disappearing. To make the government work for the new Iowa we need new national priorities and delivery of services at the state and local levels."

"I won't say I'm going to tell it like it is' because what I think that phrase really means is 'I'll tell it like I see it.' If it means I think I see it like it really is, I think it's a very arrogant statement," Fulton said.

According to Fulton, most politicians today are "telling it like they think people want to hear it."

Candidates Comment

EDITOR'S NOTE — The race for the 1st District Congressional seat is underway and The Daily Iowan will run Candidates Comment in which the editors will excerpt candidate's statements and opinions from their press releases and speeches.

ALBRECHT
William Albrecht told the Burlington Trades and Labor Council Monday that President Nixon's economic policy is fostering a recession which "is already here for most Americans."

Albrecht, candidate for the Democratic nomination for Congress, said Nixon's economic policy will intensify economic problems "because Nixon insists that inflation can be stopped only by increasing unemployment."

"It is all too easy for our economic decision-makers to accept the idea of increasing unemployment because they will not be among the unemployed," Albrecht said.

MEZVINSKY
State Rep. Edward Mezvinsky (D-Iowa City) criticized the lack of job safety precautions Tuesday night and said, "Con-

gress should pass an industrial safety act before any further, needless industrial accidents take the lives of our citizens."

Speaking before Des Moines County labor leaders, Mezvinsky said, "An estimated 14,000 workers will die from industrial accidents in 1970. The number of deaths resulting from the indifference toward industrial safety precautions in the last four years exceeded the total deaths in Vietnam."

"There are bills in congressional committees that would require uniform safety standards across the nation. We have ignored this careless waste of life and needless crippling injury far to long. It is time that government took positive action."

Rogers Visit Draws Protests in Tunisia

TUNIS (AP) — A student protest against U.S. aid to Israel marred the Tunisian visit of Secretary of State William P. Rogers Tuesday.

The students, estimated by police at more than 1,000, surrounded the American cultural center, battled briefly with police and firemen and forced Rogers to cancel a scheduled visit to Tunis University.

Rogers arrived from Morocco Monday night on the second leg of his 10-nation fact-finding and goodwill tour of Africa.

Morocco and Tunisia, both pro-Western, are the only Arab countries on his itinerary. There were no demonstrations in Morocco, but both governments warned Rogers about any further American aid to Israel.

Both the Moroccan and the Tunisian leaders warned the secretary that any solution of the Middle East problem which fails to consider the Palestine Arabs is inconceivable.

At a dinner party for Rogers, Tunisian Foreign Minister Habib Bourguiba Jr. denounced what he termed "the deplorable process which has robbed a people of its soil and its country and installed in Palestine a form of colonialism which consists of replacing one people by another in a spirit of religious and racial fanaticism."

Bourguiba avoided any criticism of the United States or of U.S. aid to Israel. But his 2,000-word speech was addressed directly to Rogers and took the form of an impassioned plea for the Arab cause in Palestine.

As he spoke, the students were demonstrating in scattered groups in many parts of downtown Tunis. Hundreds of police, troops and firemen with steel helmets, riot sticks and fire hoses were deployed throughout the city.

They succeeded in preventing the students from reaching Rogers' residence, the American Embassy or any part of Rogers' routes through the city on visits to Bourguiba, Premier Bahi Ladgham and the embassy.

It was a noticeably nonviolent demonstration compared with the bitter violence and arson attributed to Tunis University students following the six-day Middle East war in 1967.

House Revises Divorce Laws

DES MOINES (AP) — The Iowa House passed 87-23 Tuesday a bill revising state divorce and marriage annulment laws, and opponents labeled it "an attorney's bill."

The measure, sponsored by the House Judiciary Committee, now goes to the Senate.

Rep. Elizabeth Shaw (R-Davenport), who guided the bill to House passage said, "This bill removes terms that make divorce difficult. It closes proceedings until a decree is provided. I think we still have a

bill that provides for reconciliation when available."

Under the bill, the term "divorce" would no longer be used and it would be replaced by "dissolution of marriage."

The bill provides a decree of dissolving the marriage when "the court is satisfied there has been a breakdown of the marriage relationship to the extent that the legitimate objects of matrimony have been destroyed and there remains no reasonable likelihood the marriage can be preserved."

Ski Camp Hit By Avalanche; 42 People Die

VAL D'ISERE, France (AP) — Tons of fresh snow broke like a white tidal wave over a ski camp here Tuesday, killing 42 persons, injuring more than 60, and leaving 26 missing. It was Europe's worst avalanche of the century.

Loosened by 60-mile an hour winds of a blizzard, the snow covered a highway and a river, crushed two garages and ripped the roof off a hotel before crashing through doors and bay windows of the hotel's dining room at breakfast.

The dining room was buried, and few of the 30 persons eating there escaped alive. The walls were splattered with blood from bodies that the pressure of the snow slide crushed against a wall.

Most of the dead and injured were young people enjoying a low-cost vacation at the Union des Centres de Plein Air-Union of Fresh Air Centers. Of the 194 guests, many were French postal and railway workers.

Some bodies, including those of ski trail workers going to their jobs, were hurled high in the air. The slide's 100-yard front caught several cars and carried them 100 yards away.

4 Medals Given Former UI Student For Viet Service

A University graduate, now an Army officer stationed at Fort Ord, Calif., has been awarded four medals for service in Vietnam last year.

First Lt. Richard Allen Williams was presented an Air Medal for making at least 25 support flights over enemy territory, the Bronze Star for outstanding meritorious service, the Purple Heart for wounds received in action and the Silver Star for gallantry in action.

20th Century Movies Proudly Presents
Man Hunt
by Fritz Lang
with George Sanders, Walter Pigeon, John Carradine, and Roddy McDowell.
Fritz Lang's bleak determinism finds an ideal vehicle in this story of a bored big game hunter (Walter Pigeon) who sights his rifle on Adolf Hitler, as a sporting gesture. Increasingly, he realizes he must kill the Fuehrer, however, but by this time he has become the pursued, in a man hunt.
"This is one of the rare times when Lang counsels complete obedience to the social order. . ."

City School Board Offers Higher Pay

Members of the Iowa City School Board's negotiating committee Monday offered local teachers a compromise on their requested pay raises.

The board offered to raise teachers' base salary from \$6,600 to \$6,900 in the 1970-71 school year. The raise represents an increase of approximately 4.5 per cent, not including regular raises given experienced teachers with tenure.

The teachers, represented by the Iowa City Educators Association, had asked a base salary of \$8,000. The association indicated it would make a counter offer. The next meeting between the association and school board negotiators is scheduled for Thursday.

Base salary refers to annual pay of teachers without experience and holding only a bachelor's degree.

The teachers had also requested that a pay schedule be established to provide higher salaries for teachers with additional academic training who had not yet attained an advanced degree. The categories called for on the schedule would have provided pay increases for those with a bachelor's degree plus 15 graduate hours, master's degree plus 15 hours, and master's degree plus 45 hours.

The board replied that such a schedule was not feasible because the money in the incentive system could be put to better use to help raise base pay, and that it would not make the

UI Symphony Slates Concert

The University Symphony Orchestra and the University Symphony Band have scheduled concerts this week.

At 8 this evening in the Union Main Lounge, the symphony, under the direction of conductor James Dixon, will give its fourth concert of the season. Pianist Kenneth Amada, associate professor of music, will be the featured performer.

The program will include "Symphony No. 6 in B-Minor (Pathetic)" by Peter Ilyich Tchaikovsky, "Variations for Orchestra, Opus 30" by Anton Webern and "Concerto No. 16 in D Minor for Piano and Orchestra" by Wolfgang Amadeus Mozart. Amada will perform in the final work.

On Friday evening Frederick Fennell, conductor in residence at the University of Miami, Fla., School of Music, and Robert Nagel, trumpet soloist and a faculty member of the Yale University School of Music, New Haven, Conn., will appear in concert with the University Symphony Band.

The concert, a feature of the 13th annual Iowa Band Clinic which will be held Friday and Saturday, will begin at 8 p.m. in the Union Main Lounge.

Frank Piersol, head of University Bands and director of the Symphony Band, and Fennell, former associate music director of the Minneapolis Symphony Orchestra, will conduct the 80-piece University band.

Tickets for the concerts are available at the Union Box Office.

Youth Transferred In Robbery Case

Charles Ulibarri, 18, of Commerce City, Colo., transferred to the custody of Colorado parole officials a f t e r pleading guilty to robbery.

Ulibarri was sentenced in Johnson County District Court to a suspended 10-year prison term for his part in the Nov. 5 armed robbery of an Iowa City couple.

district so much more attractive to teachers as to make hiring and keeping them easier.

The teachers also asked that medical benefits be improved, however the board answered that the district now offers medical coverage as good or better than most other school districts and any additional funds should be spent in raising base pay.

The board did agree to the teachers' request that a shared cost annuity retirement plan be investigated.

The teachers received more negative answers when they asked that the district hire 72 teacher-aides at a cost of \$200,000 and extra teachers at a cost of \$300,000, in order to give regular teachers more time to plan their lessons.

The board said it believed both suggestions were valid, however the cost of putting such plans into action would be prohibitive.

Laird Gives Viets 'Push'

SAIGON (P) — Secretary of Defense Melvin R. Laird said Tuesday night he had come to South Vietnam "looking for ways to improve the Vietnamization program and push it forward to completion."

Laird and Gen. Earle G. Wheeler, chairman of the U.S. Joint Chiefs of Staff, arrived for a three-day visit. They are expected to return to Washington with recommendations for further U.S. troop withdrawals.

Laird, who first visited South Vietnam last March, told reporters at Saigon's Tan Son Nhut Airport: "We feel that progress in Vietnamization since March has been adequate."

He and Wheeler will discuss with U.S. and South Vietnamese officials the progress in the program to transfer combat duty to South Vietnamese forces.

Laird reported that President Nixon had instructed him to make a "consolidated review" of this Vietnamization program since Nixon met at Midway Island last June 8 with President Nguyen Van Thieu of South Vietnam. It was there that the two presidents first announced the gradual American withdrawal from the war.

Apollo Manager Joins UI Center

Arthur H. Wulfsberg, project manager for the Apollo command module's communications system, has joined the University Center for Labor and Management (CLM) as a visiting professor.

Wulfsberg was granted a five-month leave of absence by Collins Radio Corp., where he is assistant vice president of the Spacecraft Systems Division.

During his term at the University, Wulfsberg will teach in CLM programs and participate in seminars with faculty members and students in the University College of Business Administration. He will also act as a consultant for the study being done by CLM for the U.S. Justice Department on changes in industry operations of Midwestern correctional institutions.

Jude P. West, CLM director, said Wulfsberg is the first business executive to participate in the center's visiting professorship program. It is designed to stimulate exchange of ideas between the college faculty and businessmen, to encourage discussion of current management problems between students and executives, and to promote labor and management understanding through appearances in the center's continuing education programs, said West.

Donald Stefanson, English Grad. (beginning scores: 462 words per minute at 65% comprehension; ending scores: 1410 wpm at 90% comprehension) "The course teaches an efficient, unified approach to any given type of reading material."

Peter Umbaugh, Freshman (236 at 65%; 1246 at 75%) "If you put in the required time it will help tremendously."

John Clemons, Senior (485 at 55%; 1629 at 90%) "The course does not merely concentrate on 'speed' reading."

Brian Adam, Senior Math student (339 at 90%; 1629 at 80%) "Time is money. The price of the course is paid for in time saved."

James Searls, Assistant Professor of Anatomy (318 at 65%; 1059 at 75%) "I feel my students might benefit from the emphasis on concentration, looking for key ideas in any given sentence."

Judith Carman, Music Grad. (424 at 85%; 1115 at 90%) "This course, if pursued with the proper enthusiasm, can revolutionize not only one's reading ability, but also one's entire orientation to the learning process."

Jerry Van Scoy, Grad Law Student (316 at 65%; 830 at 80%) "The course benefits of improved speed and comprehension are important to any reader."

Edward Keefe, Student Chaplain (318 at 85%; 1180 at 85%) "The course has brought back some of the enjoyment I used to get from reading so that now I even enjoy reading non-fiction."

Peter Naze, Grad. Law Student (255 at 70%; 883 at 80%) "The course is helpful in effectively using study time."

Steven McCoy, Junior (200 at 65%; 756 at 85%) "The course works. Benefits are evident in improved speed and comprehension."

Fred Woodard, English Grad. (275 at 60%; 756 at 75%) "The course has helped me change my attitude towards reading. Also, the concern of the instructors was a great encouragement."

Terry Morgan, Freshman Liberal Arts (212 at 50%; 1925 at 75%) "The course improved my ability to organize a work to get maximum comprehension."

Roger Guettfing, English Grad. (339 at 80%; 1245 at 90%) "The course has definitely benefited me and made my reading much easier."

Roger Williams, Business Education (231 at 55%; 785 at 85%) "The course taught me to read all over again and get better grades."

Bill Smith, University High School Senior (275 at 55%; 963 at 70%) "The course makes homework a lot easier."

Reading Dynamics is not only speed reading...it is better reading

Improved comprehension. Increased retention.

Greater enjoyment. We guarantee it.

Every semester, the average college student spends about 400 hours on reading assignments. Unless he has taken the world-famous Evelyn Wood Reading Dynamics Course. Then, reading time can be reduced to 200 hours or less. Thousands of college students throughout the United States are among the 463,000 Reading Dynamics graduates from all walks of life. Last year, 158 University of Iowa students and faculty became dynamic readers. Their average beginning rate was 297 words per minute at 65% comprehension. At the end of the 8 lesson course, their reading rate

had improved to over 1,000 words per minute at 75%. They can now prepare for exams and read all of their assignments at faster rates, and with better understanding and recall. Many report an improvement in their grade point average, as well.

When you come to our FREE 59 minute Mini-Lesson, you'll learn how to increase your reading rate from 3 to 10 times, with improved comprehension and recall. You'll see an actual demonstration of Reading Dynamics and actually improve your reading on the spot. All your questions will be answered, such as our Lifetime Membership and positive Guarantee of Tuition Refund. You'll see a short film featuring students who have benefited from the course. The students above are typical. You could be among them. Come to a Mini-Lesson today. We can help make your life more interesting and more fun!
