Springfield
The city issued its second official weather advisory
for the season and the third in recent months, as temperatures are expected to drop dramatically over the next few days, according to the National Weather Service. The advisory, which was issued at 6 a.m. Sunday, states that the wind chill factor will reach as low as minus 20 degrees by Monday morning.

Habed
Two charges involving "hate" were filed against a 19-year-old man, who was arrested on Saturday night after allegedly striking the front of a。“Messianic Jesus Saves” sign with his car. The man was charged with assault and battery, and exhibition of hate.

Muskie leads
DES MOINES (AP)_ — Sen. Edmund Muskie, D-Maine, has won the Vermont state delegation's support for his bid to lead a Democratic Party convention.

Favor Tapsott
In a surprising show of strength, the Vermont legislature's House of Representatives voted to override a governor's veto of a bill that would give the state's Democratic Party chairman more power.

More fighting
Israel and Egypt agreed to a cease-fire on Saturday, ending a 48-hour conflict that left at least 15 dead and dozens wounded.

peaceful
At a meeting of the National Defense Council of the General Assembly, the council members agreed to a resolution calling for a cease-fire and the withdrawal of Israeli forces from occupied territories.

Goetz cops out of city meeting
Joe Goetz, a 23-year-old police officer, has resigned from the Springfield Police Department after he was caught on video using excessive force during an arrest.

Says China 'threat no longer policy base'
Josef Mauer, a senior advisor at the Associated Press, said the recent Chinese military exercises in the Yellow Sea "appear to be a calculated move to signal to the international community that China's military capabilities are improving, and it's also a way to show that China's economic growth is leading to increased military spending."

Politicians scrambling for busing issue "seats"

WASHINGTON (AP) - Just like an uptight high school student years after leaving high school, some politicians might find themselves years after high school before the court, starting another school desegregation battle.

The prediction of Sen. John Stennis, D-Miss., that the Supreme Court may soon be called upon to strike down the amendments to the desegregation settlement in the University of Iowa desegregation case, has some legislative officials scrambling for seats on Capitol Hill.

Stennis said in a speech in Chicago last week that the U.S. Supreme Court may be called upon to strike down the amendments to the 1971 desegregation settlement in the University of Iowa desegregation case. The court has already ruled that the amendments were unconstitutional, but it has not yet ruled on the issue of whether the court has the power to strike down the amendments.

Stennis said that the court may be called upon to strike down the amendments because the amendments are not consistent with the court's previous rulings on desegregation.

The court has already ruled that the amendments to the desegregation settlement in the University of Iowa desegregation case are unconstitutional, but it has not yet ruled on the issue of whether the court has the power to strike down the amendments.

The current housing crunch over the state's housing problems is a good lesson in Iowa cities.

In recent years, Iowa cities have been facing a severe housing shortage, with many residents finding it difficult to find affordable housing. The state's economic development policies and regulations have contributed to this issue, as they prioritize attracting new businesses and jobs over providing adequate housing for current residents.

The lack of affordable housing options has led to a situation where people are forced to choose between living in substandard conditions or living in overcrowded or unsafe environments. This issue is exacerbated by the high cost of living in Iowa cities, which puts a strain on the ability of many residents to find housing that meets their needs.

In order to address this crisis, it is important for Iowa cities to consider implementing policies that prioritize the needs of current residents, such as increasing the supply of affordable housing units, providing subsidies for low-income residents, and adopting regulations that encourage the development of mixed-income communities.

The current housing crunch over the state's housing problems is a good lesson in Iowa cities.
WASHINGTON (AP)—A national survey suggests that enlistment in the Army may be more job- and money-conscious than retaliation against Vietnam. The federal government has been increasing its efforts to attract recruits, especially among minorities and women.

A popular trend among urban white-collar workers is to seek jobs that provide a sense of community and meaning. The Army, with its emphasis on teamwork, discipline, and self-sacrifice, offers many of these benefits. However, some critics argue that the Army's emphasis on physical fitness and discipline can be oppressive and restrictive.

The survey found that while most recruits were interested in serving their country, many were also concerned about job security and financial incentives. Additionally, some recruits expressed interest in the Army's educational opportunities and the potential for advancement within the military.

Overall, the survey suggests that the Army is competing for a pool of recruits who are more job- and money-conscious than in the past. The Army will need to continue to adapt its recruitment strategies to attract this new generation of potential recruits.

Relocation' frustrates Mary Andre—
Student races urban renewal

By JUDY LENNIX
Daily Iowan Staff Writer

"There's been a bit of an understudy in view as an
alternative to the question of whether the city
is going to build or not," says C. A. Walther, mem-
ber of the city's Metropolitan Redevelopment Com-
mission. "But the policy of the city is to build, and
we want to build."

The Metropolitan Redevelopment Commission, the
body charged with overseeing the urban renewal
project, has received a grant from the state to
work on a feasibility study for the project. The
study will assess the feasibility of building a new
town center in the area where the current town cen-
ter is located.

The project is expected to take about two years,
and the commission is looking for a site that will
be ready to start construction by the end of 1980.

The commission is also looking for a developer to
work with them on the project. The developer will
be responsible for overseeing the construction of
the town center and for finding tenants for the
buildings.

The commission is hoping to have a decision on
the site and developer by the end of the year.

The project is expected to cost about $5 million,
and the commission is hoping to get funding from
the state to help cover the cost.

The project is expected to create about 1,000 jobs,
and the commission is hoping to attract businesses
to the area.

The commission is also hoping to attract residents
to the area, and they are working on a plan to
make the area more attractive to people.

The project is expected to be completed by the
end of 1982.
Travel in Germany—
Passport abroad

You don't have to look far to find programs that will allow you to improve your German. Professor Frederick Bremers of the German Department, along with other professors at the other Big Ten institutions have organized a summer study and travel experience in Hamburg and Stuttgart. You can earn as many semester hours as you arrange with your professor, if you are interested in German. There are 10 student slots available. There are 10 day trips into the Black Forest, Tübingen, and Grossweinstein. Can you imagine that? You're off to a German-speaking country, you're on your own, and you're doing what you like. You're abroad!

There are civil in undergraduate and a graduate students interested in German-speaking countries, among others. The summer program in Germany will cover the six-week period that fits into your schedule and the content is as flexible as you will have it. You can even earn credit toward your major requirement. If you're interested in traveling in Germany—relations and influences, in the humanities and social sciences, or in German language and literature, the program might be just for you.

For example, Hiram program in Hamburg for sophomores to study intermediate German and exchange in Germany. Students can also investigate Russian from 74 countries on the Ul campus. For more information pertaining to the dates of the German academic year, contact the Office of International Education (OlE).

Travel in Germany is motivated by the desire of students to learn more about a foreign culture. The students involved in the University of Iowa's exchange program with Tubingen University have been interested in learning more about Germany and its people. This program is open to students who are interested in learning German and who want to experience the culture of Germany.

In addition to the OlE, there are two other kinds of Sony tape: Sony regular, and Sony walkman. There are also two other kinds of Scotch magnetic tape: Scotch magnetic tape and Scotch magnetic tape. The problem with being unable to distinguish between these two kinds of tape is that it can cause confusion and frustration for students who are unfamiliar with these types of tape. The solution is to look for differences in the physical characteristics of the two types of tape, such as the width and thickness of the tape, to determine which type of tape is being used.

The nation's 4th biggest killer is listed at the bottom of this list.

The film is finally so technically slick and sure that it makes one hate the people who engage it, if not our heroes.

15. Epilepsy Foundation of America
16. National League for Nursing
17. National Council on Alcoholism
18. Leukemia Society of America
19. NATIONAL KIDNEY FOUNDATION

Everyone knows something about cancer and heart disease.

But few realize that 8 million people in this country have kidney disease. That kills more people each year than automobile accidents. We have even some of the answers, but that doesn't nullify because we don't have enough money to use them.

And because so few people realize how serious kidney disease is, we're only number 19 on the list of contributions.
Chole-less Marquette still looks to playoffs

They surprise younger men in track

By BOB DENNEY
Daily Democrat Writer

Nearly every day around noon, four men go together to work at the Recreation Building.

What separates this group from the hundreds who work out there daily is that this crew represents the "out-party"—not the "in-party." It is a group of 60-year-olds who make up a track team whose average age is 56 years. The four marines of the group are all former track men and their physical spares are kept in shape in the Recreation Building.

Dennis Cooper, who holds down a position as chief bacteriological radiologist, finds the running routine has become "the best way to keep healthy and stay at the same time."

John Ferrey, "for years a man of five feet height, but for no fault working out and out for the miles," has been running for Marquette for two years and has since been the inspiration for the quartet of Feeney, Eyman, and Nordstrom to follow a computerized program for training.

There are Allen Nordstrum, the youngest of the team at 21 years, and a senior in computer science, who calls Ferrey the "man on the team."

Finally there is Brian Feeney, who at 21 is a junior at Marquette University, who has followed the program and is now making a comeback in track.

Nordstrom says the three younger members of the team follow the program and that getting this far is an inspiration to build himself up for faster a life for a program with other sports.

Feeney is a senior associate professor in electrical engineering at Iowa, and together with the chairman of the department, Eyman, demonstrates that age need not be a factor in running.

By the Associated Press

Marquette's basketball team marches big to NCAA playoffs

The Warriors are very much alive in the NCAA playoffs following their upset victory over Texas Tech, a game doesn't appear to have been much of a challenge.

Tom Feeney, chairman of the selection committee, said he was a little surprised.

"We may have valued them a little too highly," he said, "but we're certainly not disheartened."

The NCAA selection committee doesn't feel the running craze has become devotion the two put in to their training made him reconsider his "fastest man on the relay team" tag.

"We still have a good boltle," he says, "in fact, he's been better than advertised with us."

The unseeded Marquette will play 10th-seeded Wisconsin in a 10:15 p.m. victory over Oregon State.

"Wisconsin of the biggest races as a program," Eyman says, "and we'll be better in the future."

"We have more than his kick, and since then, I have only missed once," Eyman says.

"But Marquette has the team to run three or four times a week, and along with the trio of Feeney, Eyman, and Nordstrom, follows a computerized training program compiled by researchers in Stanford University."

"I have no idea what we're going to use next year, and we're definitely improving," Eyman adds.

"The computer program is the key, and the runner can adjust his performance level to the minute," Eyman said.

"Mom's a baby in the team," Eyman says, "a manly baby, for me, and I suppose can't expect much." He added, "He's already been on the track team for all other men, and we'll work with him."

"But Marquette is still around," Eyman adds.

"We have a good boltle," he says.

**Hawks end long road drought**

EAST LANSING, Mich.—The Iowa Hawkeyes toppled the 16th-ranked Michigan State Spartans Saturday in the MSU Convocation Center. The win was the long-awaited road victory for the Hawkeyes, who had lost their first two road games of the season. The victory was achieved by whipping the Spartans 75-63.

**Gymnasts unbeaten**

LINCOLN, Neb. — The Iowa gymnastics team took the individual and team titles Saturday at the conference meet here. The Hawkeyes won the meet, 194.40 to 190.50, taking first place for the first time in the Big Ten.

**Powerful Spartans bury Hawkey runners**

The Iowa indoor track team could not keep up with a strong Michigan State team here Saturday afternoon at the University Building. The Spartans took four of the 11 events, scoring 15 points in the meet.

**Sunburst runner**

A hero of six meetings, a Michigan State runner during a leg of a six-meet dual meet in Superior, Mich., finished the race two seconds ahead of the next-place finisher. He was the only man to beat in the six-mile race.

** Putting on the squeeze**

Iowa's John Tefter moved up to 172 pounds in the final meet of the season. The Hawkeyes scored a 6-3 victory over Michigan State.
