More University of Iowa housing barrack sites are being considered for future use. Three additional sites were suggested during a meeting of the University Housing Council on Thursday. The sites are located in north Liberty, west of the city center, and near the University of Iowa Hospital.

Members of the Johnson County Health Board, which has been busy with many health issues, are expected to meet next week to discuss the proposed changes in the housing arrangements.

WASHINGTON (AP) — The Congressional war over what to do with a showdown expected in Congress Thursday to pass a $10 billion bill authorizing new work on a 130-mile reservoir and flood-control system to cut in half this year by the Corps of Engineers has been cut in half this year by the Corps of Engineers.

The reservoir, called the Coralville Reservoir, is being managed for recreation and sport fishing. It is the largest reservoir in Iowa and the fourth largest in the United States. The reservoir is located on the Iowa River and is used for flood control, water supply, and recreation.

The bill authorizing the reservoir has been criticized by some farmers in the area who claim the reservoir is flooding too much land and causing damage to their crops. The Corps of Engineers has defended the reservoir, saying it is necessary for flood control and water supply.

The showdown in Congress is expected to be a major test of the power of the House and Senate Appropriations Committees, which have jurisdiction over the bill.

The bill is scheduled to be voted on Thursday in both the House and Senate. It is expected to pass both chambers, but it is not clear whether President George Bush will sign it or veto it.

Farmers air complaints about river-flooded fields

Farmers whose fields are flooded by the Iowa River complained bitterly about the situation Monday and called for compensated for the crops that have been lost.

About 150 people attended a meeting with state and local officials, and many were upset about the situation. Farmers and landowners said that the area was flooded for a long time and that the reservoir was not operating efficiently.

"We've got a man-made disaster," said one farmer. "The river is flowing over the levee, and there's nothing we can do to stop it."

The problem is expected to last for several weeks, and the Iowa River is expected to crest later this week.

"There's no end in sight," said another farmer. "We've been flooded for weeks, and there's nothing we can do."

The Iowa Department of Natural Resources said that the reservoir is being operated according to plans, but the farmers are not satisfied.

"The reservoir is not operating as efficiently as it should be," said one farmer. "They need to do a better job of managing it."

The farmers want the reservoir to be operated more efficiently and for the state to provide compensation for the crops that have been lost.

"We want compensation, and we want the reservoir to be managed better," said one farmer. "We can't afford to lose our crops, and we need help."
Statewide Voter Registration

The Carnegie Commission on Higher Education released a new report, "Voter Registration: The Path to Action," which suggests that the effectiveness of voter registration systems and the role of universities in promoting democratic participation are crucial to the health of American democracy. The report, which is based on extensive research and consultation with experts in the field, highlights the importance of higher education institutions in fostering informed and engaged citizenship.

The report argues that voter registration systems must be accessible, convenient, and inclusive to ensure that all eligible citizens are able to participate in the democratic process. It recommends that universities take a leading role in this effort by working with local election officials to establish reliable registration systems and by providing educational resources and support to students.

The Carnegie Commission emphasizes that universities have a unique opportunity to engage students in the democratic process and to foster a culture of civic engagement. By promoting the importance of voting and other democratic practices, universities can help to build a more informed and active citizenry.

The report also underscores the importance of voter registration in the context of larger social and political issues. It notes that voter turnout rates in the United States have declined significantly in recent years, and that this trend is a cause for concern. The report argues that higher education institutions can play a crucial role in reversing this trend by promoting the importance of voting and by working to ensure that all citizens have the opportunity to participate in the democratic process.

The Carnegie Commission recommends that universities take a number of specific actions to promote voter registration and civic engagement. These include:

- Establishing partnerships with local election officials to develop reliable registration systems;
- Providing educational resources and support to students to help them understand the importance of voting and other democratic practices;
- Fostering a culture of civic engagement on campus;
- Working with community organizations to promote voter registration and civic engagement.

The report concludes that universities have a critical role to play in promoting democratic participation and that they have a responsibility to take action to ensure that all eligible citizens are able to participate in the democratic process.
A national government in Washington, D.C., has been involved in an investigation of a corrupt local government in Japan. The investigation, conducted by the Watergate Task Force, has been ongoing for several years and has involved multiple levels of government. The Watergate scandal, which began in the 1970s, has led to the resignation of President Richard Nixon and the conviction of numerous aides and associates.

The investigation has been led by a team of federal agents and has involved thousands of hours of work. The task force, which is led by Special Counsel Robert Mueller, has been investigating a range of issues, including campaign finance violations and obstruction of justice.

The investigation has been controversial, with some critics arguing that it has become too broad and has diverted resources from other important issues. However, the investigation has also been praised for its thoroughness and dedication.

The Watergate investigation has had a significant impact on American politics, leading to a number of reforms and changes in the way politics is conducted. The scandal has also served as a cautionary tale for politicians, reminding them of the dangers of corruption and the importance of accountability.

The investigation is expected to continue for several more years, and it remains to be seen what the final outcome will be. However, the Watergate investigation has already had a profound impact on American politics and continues to shape the way we think about government and its role in our society.
Guthrie theater opens with 'Becket'

MINNEAPOLIS- ST. PAUL—The Guthrie Theater's 37th season, featuring seven world premieres and one U.S. premiere, will begin on June 22 with "Becket," the first of four new and original productions.Michael Langham, artistic director of the Guthrie, said the production is directed by Michael Langham.

The theater company's theater in downtown Minneapolis is being renovated to permit the demand and will play for performances through July 21. The Guthrie's new season will include a production of "Becket," by Peter Shaffer, a man in search of his history.

Soliciting a ride absolutely is not what you appear to be. Try to convince them that you're a legitimate hitchhiker, and you may have trouble arguing technicalities.

This production, recast and restaged by the Guthrie, is a new interpretation of J. B. Priestley's play. It is more a play of ideas than a play of action. The Guthrie's production, directed by Michael Langham, is designed by Richard Halpern, with music by Stanley Moskovitch and lyrics by Richard Halpern. It is based on a story by Dashiell Hammett, a man in search of his past.

The production will be the first of four new and original productions and is one of the most recent and exciting of the Guthrie's new season. The Guthrie's first production, "The King's Speech," is directed by David Flanagan, is a man in search of his identity.

Much ado about homeless bodies

BY BOB JONES

The film industry frequently makes movies about the homeless, and brings them to the screen. "Becket," by Gene Hackman, is an example of this. The film tells the story of the life of a man who became a leprechaun and fought for his rights.

If you're indigent and charged with any offense when you haven't had an attorney, you should know that you have the right to be represented by counsel. If you're arrested for something like vagrancy you may have trouble arguing technicalities.

The Guthrie's production of "Becket," directed by David Flanagan, is a man in search of his identity.

Joe's mother-in-law, Mrs. Joe, is a graduate of the University of Minnesota, and is a long-time resident of the Twin Cities area. She is a man in search of his history.

By JAN DUCETTE

Davis, Dee render black artist's reaction to white American life

The power of the spoken word and the novel as a vital, powerful tool for performing art. We've encountered it in Bertolt Brecht's 'Mother Courage,' and Alan Satter's 'Evensong,' and we've started for the return of the 'carrske-derry,'--the man who has to go to bed with a gun and a knife and a woman--and perform, and we're the imagination with a sense of interiority and spirit.

But in 'Amen,' Davis tells her story of a black woman's life--from her youth in the South to her maturity in the North--in a way that is both moving and thought-provoking.

In the opening scene, a young black woman, Lila, is sitting on a train, trying to remember the events of her life. She is trying to remember the names of the people who have been important to her, the places she has lived, the things she has done. She is trying to remember the good times and the bad times. She is trying to remember the people who have been good to her and the people who have been bad to her.

Lila's life is a series of stories, of people and places, of events and experiences. She is trying to remember it all, to make sense of it all, to understand it all.

But it is not an easy task. Lila is a black woman living in a white world, a world that is full of prejudice and discrimination. She is a woman who has been betrayed by her own country, a country that has not treated her fairly.

But Lila is a strong woman, a woman who has fought back. She has fought against the odds, she has fought against the system, she has fought for her right to be a woman.

And in the end, she has succeeded. She has won her battle, she has fought her way to the top. She has proved that she is a woman who can do anything, that she is a woman who can overcome any obstacle.

The novel is a powerful one, a novel that will stay with you long after you have finished reading it. It is a novel that will make you think, that will make you feel, that will make you understand.

It is a novel that will make you appreciate the struggles of women, the struggles of people who are different, the struggles of anyone who wants to be their own person.

And it is a novel that will make you realize that the struggle is worth it, that it is worth fighting for, that you can do anything if you put your mind to it.

So read 'Amen,' and be inspired, and be motivated, and be moved. It is a novel that will change your life.

Mep (7) and Boone slammed homer. Cooper slams a home run over the San Diego right field fence to cut the Reds' lead to 5-3.

Miller flew an iron about five yards short of the pin and failed to get it up and down. 

He turned the 63 over to the Open record of 64 set by Lee MacPhail Jr. at St. Louis in the 1933 U.S. national championship.

Miller hit the 63 by a stroke and the Open course record by one.

Tortuous rhetoric in royal repast

By JEANNE ALLEN

The Lion in Winter

Before the curtain rise of "The Lion in Winter," which opened Friday night at the Little Theatre, director Jeanne Allen asked her cast not to sign autographs, not to smile and not to talk to Director John Lockehead was also asked not to smoke. However, when the curtain rose, the audience was treated to an intimate and colorful production of the play.

The Lion in Winter is a tale of power, religion and politics during the reign of Henry II (played by David Viney), who is surrounded by his three sons (played by Robert Parrott, John Bobbitt and Bob Caudle) and his estranged wife, Eleanor (played by Jeanne Allen). The play is set during the winter of 1183 and is a reenactment of the royal repast that took place at Christmas, during which the future kings and queen were supposed to decide who would inherit the throne.

In this scene, John Bobbitt is seen setting off a candle in the center of the table. The performance is carried out with the utmost precision, the characters moving about in a way that is both humorous and solemn. The audience is left in awe of the performance, which is a masterful example of theatricality.

"The Lion in Winter" is a play that is not for the faint of heart. The characters are fierce and the plot is convoluted. However, the play is a testament to the power of theatre and the ability of actors to bring complex themes to life.

Just before the first intermission, the sound cracked to a halt, the center screen went out, and then a few more projectors stopped on the screen, a terrorist must be heard saying "Hey, turn it off!" This incident was fairly indicative of the entire evening.

In the program notes, Allen and Moore assert that the Lion's never been truly rich, and that they have provided the "visuals" here to make it more than the film. While the film is well made, and the acting is superb, the overall effect when the performance begins is not as exciting as one might think that no one can put it on a blank wall.

The only point of the part that was capable of offering the film's superior quality was a dance piece by Francesco De Ruiz in the subsequent act. The images on the screens were too light and too small to move the audience to dance. The image on the screen was too dark to be seen by anyone, and it was too fast to be seen by anyone.

Perhaps, if Moore and Allen worked more closely together, the presentation, their art would work more successfully.

If You Would Like Nothing Less than the Best in Loudspeakers, But Doubt That You Can Afford Them, Please Read This Ad.

Both the loudspeaker spokesmen, the original Advent Loudspeaker and The Best of the New York Symphony, are pleased to announce the availability of a new line of loudspeakers, the Cosson and Son Series. These loudspeakers are specially designed for audibility, performance, including frequency response, and they are available in a wide range of prices to suit the needs of the listener.

The Cosson and Son Series of loudspeakers is the result of many years of research and development. It is a complex product in audio equipment, and few of which have been designed by any of the major manufacturers. The Cosson and Son Series is a new and revolutionary line of loudspeakers, which meets between $105 and $125 depending on its design and quality, and is a welcome addition to the field of audio equipment.

Both Advent spokesmen are two-way systems. A two-way system is not in practice to have given up the customer on his hardware and his system. This is the case with loudspeakers, which are not only unspectacular, but also unspectacular. But this is the case with loudspeakers, which are not only unspectacular, but also unspectacular. But this is the case with loudspeakers, which are not only unspectacular, but also unspectacular.
