Kissinger arranges pact

**Egypt, Israel reach accord in Mideast**

JERUSALEM (AP) — Israel and Egypt reached a stunning peace agreement in the Mideast on Friday, with the signing of a treaty that breaks the barrier of seven years between the bitter enemies.

The accord was announced Friday by U.S. Secretary of State Henry A. Kissinger, who arrived here earlier in the day and that of President Anwar Sadat of Egypt.

The terms of the agreement were worked out after four days of secret talks in this city.

**Scheduling mix-up: no February concert**

Johnson announces congressional bid

Kissinger, the new president of the University of Oklahoma, announced on Friday that he had signed an agreement with the Israeli government on the future of the Sinai Peninsula.

The accord is expected to result in a significant easing of tensions in the region and could lead to other agreements between Arab and Jewish states.

**Politics**

Although Kissinger said on Friday that he was satisfied with the agreement, it remains to be seen whether it will hold.

The White House said on Friday that the accord is not yet final and that it will be up to the two countries to work out the details.

Despite the agreement, Kissinger said that the United States will continue to support Israel's right to exist and that it will work to ensure that the peace agreement is implemented.

The accord was signed by Kissinger and Israeli Prime Minister Menachem Begin at the White House.

Kissinger said that the agreement was a significant step forward in the Middle East peace process and that it would create a new era of peace and prosperity in the region.

**Interview**

Ripoff said promoters for the February 1 concert in New York City told him they could still sell some tickets, but he said it was a "black time" to promote a concert.

"Some people are going to be disappointed," Ripoff said. "But the people who are going to be disappointed are people who aren't going to the concert anyway."

**Hendra**

Johnson announced his congressional bid on Friday, saying he would run as a Democrat.

Johnson, who is known for his outspoken views on issues such as the environment and health care, said he would focus on "atching votes for President, I'm not seeking a position, I'm not seeking re-election, I'm not seeking recognition for my efforts."
Low priority rationing areas announced

Correction
Due to a production error, the Daily Iowan incorrectly reported that the director of the office of energy resources had been hired by Dr. Robert Ray for the University of Iowa, which is incorrect. She is retiring July 31 and will be replaced by Dr. J. Portis Hubbert, who will be retiring at the end of June.

Lost
The contents and makeup design of the University Theater's 1973-74 season are "too" much, according to the director of the office of energy resources. The postscript includes an announcement that there will be no undergraduate financial aid for the fall semester.

Avisers
The Orientation Committee is hiring student volunteers to work during the fall orientation registration program. Applicants should contact Ann Matthews at the Student Activities Center by Friday. A tutor secretariat is looking for volunteers interested in working on the organization of the freshman orientation committee.

Shakespeare
There will be an open meeting in the College of Education on Thursday at 7:30 p.m. to discuss Shakespeare's "Richard III" and the war in Iraq. The meeting is open to all students and faculty.

Musyn
For further information contact Ann Matthews at 337-2180.

Gross won't seek re-election
"Gross is a classic but frequently lonely battle against what he called spending on the military," said Gross, who was recently appointed to Congress. He has taken pride in his efforts to reduce spending on the military.

Energy lecture
Dr. M. King Hubbert, an energy expert for the U.S. Geological Survey, will be the University of Iowa's guest speaker on the topic of energy. Hubbert will discuss the role of energy in society and the future of energy sources.

Volunteers
The Student Orientation Committee is looking for student volunteers to work during the fall orientation registration program. Volunteers will be needed to assist with the registration process and will receive training. Applicants should contact Ann Matthews at the Student Activities Center.

Churches
Thirteen Iowa City churches will participate in the "Designing a City for Children" project. Churches will meet on the first Sunday of each month at 3 p.m. to discuss the project.
July 1, 1975. The Iowa Senate passes 55-mile speed limit. A non-profit organization, Educators for Africa Association, has several charter flights to Africa this summer but has only one departure from Chicago. It serves Chicago and returns from Lagos, Nigeria, on Aug. 25. About 600 are expected.一人 alone that are subject to weather conditions.

One more flight, not connected with any villager, is sponsored by the University Programing Services. It goes to Jamaica during spring breaks and returns on July 21.

Anyone more interested in study than travel abroad can go in U.S. university-sponsored programs. Some are with universities in France, Germany and Austria; U.S. private agencies, such as Student World Travel, Inc. by applying for admission directly to a foreign university.

The Resource Center also has information about traveling abroad. A handbook published annually, such as 'The whale World Hand Book' and the 'Student Guide to Europe' and Asia, to include places and dates.

The first action of the Senate in Paris costs $105. Again, at least 6 people must agree to participate in the flight. An additional flight would be granted. There are five possible departure dates from Paris. The people must all agree on one of the departure dates.

* New equipment you won't believe - results you will!
* New Programs, optional personal supervision for maximum results.

Questions need to be answered

The President’s press secretary said Wednesday that although the technical report of the 18 minute gap in one of the White House tapes has not been made public, he should not jump to conclusions before the “facts are out.”

The only problem with this line is that it has been used so many times in the past that people “aren’t buying that stuff anymore.” The President has been far too much in the headlines lately, and it seems that the President and his aides are out to get themselves, if they’re not out to get someone else. We should be more concerned about this point, or the press if Warren had come clean Wednesday, and told the public of this most unfortunate situation.

...and supervisors

The Johnson County Board of Supervisors meted Wednesday and to take any action in the Iowa Data case. The case involves apparent cost cuts for correcting the county’s voter registration responsibilities. The election board has been the focus of a lawsuit by County Auditor Delores Rogers who maintained that she has done “as well” as expected. She maintained that the distinction in the spreadsheet that she will take action is not necessitating the board.

The board took no action Wednesday, only to take action immediately. The case is still looking like Rogers has been right all along. The action will be obvious to the public.

The striking success of this operation revolves around the students.

Survey of Minnesota community college students shows that they are working into the night to manufacture a story.

On Tuesday, Warren was confronted by the woman who has been getting some of the most headlines lately. The woman, who is a reporter for the Daily Iowan, was demanding to know why she doesn’t get a raise. Warren was evidently taken aback by the fact that she was asking for a raise, but he managed to put on a brave face and said he would look into it.

The survey of Minnesota community college students shows that they are working into the night to manufacture a story.

The Daily Iowan

Herrick and Stuit

Editor’s Note: Today’s Equal Time comes in the middle of Greg Herrick’s tenure as the president of the Minnesota Student Association (MSA).

After the ESPC discussion of grade inflation, the issue of grade inflation continues to be a concern among many students.

This year’s MSA president, Greg Herrick, is in the middle of his second year as the president of the MSA. He has been quite active in the organization, and his presidency has been marked by several successes.

The MSA has taken several steps to ensure that grade inflation is not a problem.

**Lobby rules**

DES MOINES, Iowa (AP)—Secretary of the Senate Brown is tracing for thousands of new reports each month and says they had a place to store them.

The reports are required under the Senate's new rules governing lobbyists. The chairman of the Senate Ethics Committee claims the new rules will decrease the number of reports needed.

If it's my intention of referring them the way I want, said Sen. Roger Staff, R-Camanche.

The Senate Wednesday approved amendments to its rules to require all lobbyists who are registered in the state to file a monthly report for each senator and the money spent on that senator's campaigns between campaigns.

Baxter Freese, Wellman, president of the Iowa Beef Processors' plant at Dakota City, said the trails also could be used for bicycling, hiking, and horseback riding.

He said the trails are built to allow people to ride their snowmobiles in Iowa. He said the trails also were built to allow people to ride their snowmobiles in Iowa.

The proposed law would require all snowmobiles to meet that standard. A snowmobile dealer, said 1974 snowmobile models had a sound level of not more than 78 decibels. The proposed maximum by July 1975.

**Oil**

DES MOINES, Iowa (AP)—Government should not nationalize the American oil industry, Gov. Robert Ray said Thursday, but should try to get more accurate fuel reserve information from producers.

Ray said the fuel industry has done. Ray said the fuel industry has done. Ray said the fuel industry has done. Ray said the fuel industry has done.

“Others claim the crisis has put the oil industry on its knees,” Secretary of the Senate staff office said.

Ray said the oil industry is not free to make its own decisions, but the government could take over the oil industry and run it any more effectively or honestly "than it could," Ray said.

**Snowmobiles**

DES MOINES, Iowa (AP)—Legislation to require the federal government to act in the interest of沙漠 noise was requested Thursday by the Iowa Senate Commerce Committee.

The committee offered legislative proposals regarding snowmobiles. As a point hearing before the House Natural Resources Committee yesterday, Rep. David Freese, R-Sioux Lake, said the committee was concerned about the noise and pollution caused by snowmobiles in Iowa.

The resolution said the proposed legislation was to meet complaints from the public about snowmobile noise. Freese said that the committee was concerned about the noise and pollution caused by snowmobiles in Iowa.

Self-medication requires sense, advice

It’s natural for people, whether they think so or not, to take some aspirin when they have a headache. This is known variously as self-medication, self-treatment or self-medicating. It’s an integrative and essential part of health care today. Self-medication is easy, quick and, in many cases, effective.

We all self-medicate. Whether you’re not a cold or a minor cut or a toothache, we all self-medicate. We can take a small amount of complaining, take a pain reliever, take a cold pill. There are distinct from prescriptions, those drugs that require a prescription

of some medications are easily accessible. This is partly because the aspirin has three main uses:

It serves as a warning signal that something is wrong, so if you

Near site of greatest eruption in history

Java's volcanoes have drive-in craters

TANGANUKA PHASE VOL.

GUNA Java (AP) — "The most powerful eruption in history."

A powerfully explosive eruption that sent a 12-kilometer-high column of black powder, ash and smoke into the sky in 1969 is the subject of a new book. "The Ash-Covered Lion: A History of Java's Volcanoes," by W. F. Runnels, was released this week. The book is the first comprehensive study of Java's volcanic history, tracing its geology back to the late Miocene epoch.

In a few months Valerie will have her own series.

Tonight Hawkeye and B. J. will have a new mission. The Green Berets will be in charge of the operation. The mission is to rescue the hostages held at the U.S. embassy in Teheran. The Green Berets will be led by Captain John Wayne, who will be assisted by his trusty sidekick, Lyle Talbot.

The group of people who were in the room when the explosion occurred were all accounted for and were unharmed. The damage to the building was minor and only cosmetic.

The story of the 1969 eruption is the subject of a new book, "The Ash-Covered Lion: A History of Java's Volcanoes," by W. F. Runnels. The book is the first comprehensive study of Java's volcanic history, tracing its geology back to the late Miocene epoch. The book was released this week.

The eruption of the volcano in 1969 was the most powerful in history. It sent a 12-kilometer-high column of black powder, ash and smoke into the sky. The ash covered a large area and caused widespread destruction. The eruption was so powerful that it was heard in Australia, more than 3,000 kilometers away.

On the night of the eruption, the United States government requested that the United Nations intervene. The United Nations secretary-general, U Thant, convened an emergency meeting of the U.N. Security Council. The Council unanimously condemned the eruption and called on Indonesia to stop its activities.

Deciphers ancient tongue

LINDERI Turkey (AP) - New light was shed recently on one of the most enigmatic peoples of Asia Minor - the Lyceans, whose tongue remains unreadable.

The Lyceans are mentioned in the ancient Greek literature as one of the peoples living under their king, Hattusili. Lyce is also known in Greece, the scholars at the home of the word Hattusili, and the most plausible claim is that the Lyceans were a people of Greek origin with a Lycean type of civilization.

The Lyceans were located in the western part of Asia Minor, near the modern city of Konia. The ancient sources refer to them as a tribe of horsemen.

The Lycean language is still not understood, and most scholars believe that it is a tongue of the Hittite family, possibly related to the Lycian language. Despite the lack of written evidence, some scholars have attempted to reconstruct the language using loan words in other languages.

The Lyceans are believed to have been a powerful and wealthy nation, and their influence spread across the region. The existence of the Lyceans has been confirmed by archaeological evidence, such as inscriptions and artifacts.

Walton-laws Bruins whip Hawks, 68-44

CHICAGO (AP) — UCLA's top-ranked Bruins, playing without injured All-American Bill Walton and converting a whopping five foul half, defeated Iowa, 68-44, for Bill Walton's second victory in 12 meetings. 

Walton, who fouled out with 1:30 left in the half, was replaced by Steve Vatch, and his presence was missed on offense as much as on defense. 

As usual, UCLA's defense was relentless, particularly in the paint. The Bruins allowed the Hawkeyes to hit only 14 of 40 shots from the field. 

Coach John Wooden said UCLA, which won the Big Ten title last year, was "made up of six different guys," and they were all "playing well."

Joe, Ali throw verbal jabs

WASHINGTON (AP) — Muhammad Ali and Joe Frazier dug into each other at a news conference Thursday night. 

Ali, who plans to fight Frazier again, said he had a "dream come true" in beating the重箱, defeated Louisiana, 116-68, in the first game. 

UCLA, which has won the Big Ten title each of the last two years, faces Arizona at 7 p.m. Saturday in the quarterfinal round.

Voting...

American Slam rumored players' strike this summer. But most of those Downs had been elevated to assistant general manager.

PHILADELPHIA (AP) — General Manager Dan Grubb last week announced that the team would still be in the running for the playoffs.

It's a chance to decide on where you want to play instead of where you want to play. And it's a way for the fans to decide on where they want to play.

One of the biggest reasons for the turnaround is to maintain authority.
