Presidential language of back-dating:

Nixon lawyer silent on deed

With no evidence to prove Dean lied

Freshman language skills shown to be dropping off

English, math, social science and natural science, according to Robert Leady, director of admissions, was 98 percent. The 21 Democrats and 16 Republicans scored 96 percent. There was a two-point drop from previous years. The English, social science and natural science scores dropped eight percentage points, Leady pointed out.

One of the factors that may be causing the drop is that comparatively fewer students are taking English courses in high school.

An apparently increasing number of freshmen are not displaying a wide range of linguistic ability. This trend has been evidenced by reading comprehension tests. Students are not reading at the sophomore-junior high school level.

There are times when accompanying mother and father arises to keep track of the day's events and start planning.

At supervisors request Planning Committee responds

by NORMAN WALTERS

The executive board of the Johnson County Regional Planning Commission (JCRPC) met Wednesday to support the JCRTC's plans to conduct a joint meeting of the Planning Commission and the Board of Supervisors on March 1st.

The commission was the subject of the supervisors' request to conduct a joint meeting of the planning commission and the board of supervisors on March 1st. The commission is expected to consider a number of issues related to land use and development in the area.

The executive board will present its position on the supervisors' request at the joint meeting on March 1st. The board is expected to vote on the request at that time.

Two Poetry readings postponed

A poetry reading scheduled for Wednesday evening has been postponed due to inclement weather. The reading, which was to take place at the Union Ballroom, will now be held on March 1st.

The reading will feature works by a number of local poets, including John Ashbery and Robert Hass. The event is free and open to the public.

Women's basketball team announces schedule

The women's basketball team will play the University of Wisconsin on Saturday afternoon. The game is expected to begin at 2:30 p.m.

The team will also play the University of Iowa on Friday at 8:00 p.m.

Energy summit pessimism grows

WASHINGTON (AP) — The Nixon administration is warning of a growing international consensus that major oil-consuming countries have already done all they can to cut back on oil consumption, which many say is a dangerous threat to world peace.

Robert E. O'Connor, undersecretary of state for political affairs, told a Senate committee Wednesday that a "growing international consensus" has emerged that "we're now in a period of quiet stability." What we need now, he said, is "to recognize the dangers of further increases in oil consumption and to take steps to deal with those dangers.

"For the first time, most of the major oil-producers are prepared to accept a reduction in oil consumption," he said. "This is not a situation for which we're prepared. We face a very serious problem of international security, and that problem is growing worse.

The administration has repeatedly warned that a new oil crisis is inevitable, and that the world is at a crossroads. "We must now recognize the reality of the situation and act accordingly," O'Connor said.

The administration has been under pressure from Congress to take action, and lawmakers have introduced a number of bills that would impose strict limits on oil consumption. But the White House has insisted that such measures would not work, and that the best solution is to deal with the problem through diplomacy and persuasion.

"We believe that the best way to deal with the oil crisis is not by imposing constraints on oil consumption," O'Connor said. "The best way is through cooperation and dialogue among the major oil-producing countries."
**Evaluation and residency rules**

An evaluation process at Indiana University originally established a residency system. The purpose of the system was to give the president the ability to take matters into his own hands.

A threshold for requirements for "residency" status for tuition purposes was set. The president was required to make a determination before a student could be charged.

Robert LaFollette and Robert Taft to the "Liberty Pole of Iowa City, Iowa—Fr".

Our campus representatives have recently employed to settle a matter of students.

...the use of a typewriter when you are composing your letters. It is essential to adequate communication.

...the performance of the university's administrative functions. Not only did the established and accepted committee make early negotiations on the matter operate smoother, it also provided a more constructive framework in which the question was approached. Many of these recommendations of vital importance have been lost in the shuffle of how they will be dealt with.

...the country brings Hal Emalfarb, president was recently employed to settle a matter of students. They directly threaten any advance in the direction of peace in the region.

...the opportunity to consider a state in which the opportunity to consider a state in which the opportunity to consider a state in which...
Chinese free captured Yank

CLAIRE AIR BASE, Philippines (AP) — A U.S. soldier captured in an overnight firefight near Vietnam on the first day of an agreement to withdraw South Vietnamese forces from the area will be flown to the United States on Thursday after nights in Cuban captivity.

He was flown here for a medical checkup.

Kub. It was “good physical condition although he appeared to be weak and fatigued,” said U.S. Capt. Milton Bailey, who flew with Kub from Hong Kong.

How long Kub stays in the hospital at Clark depends on his physical condition, Bailey added.

A South Vietnamese official said he was “not going to let” Kub to stay in the United States.

The United States welcomed the agreement to withdraw South Vietnamese forces from the area.

The agreement was signed on Tuesday in Washington, D.C., by U.S. Secretary of State Henry Kissinger and South Vietnamese Foreign Minister Nguyen Van Thieu.

Seize five hostages in attempt to blow up Shell Oil refinery

HONG KONG — Four men tried to blow up Shell Oil refinery here Thursday, then armed five hostages aboard a ferry and demanded the hostages unless they got what they wanted in a two-hour standoff, officials said.

The Hong Kong government said it would meet their demands.

Officials said the terrorists attempted to blow up five of it's storage tanks but managed to set off only one of them.

They identified the terrorists as three Japanese and one Chinese.

The ferry was laden with 30,000 tons of bunker oil.

“I’m not in a mood to negotiate,” a member of the group said in a relatively calm voice.

The Hong Kong government said it would meet their demands.

They said they set off the explosion “for the good of our revolution” and the Chinese economy.

They said they would demand the release of a Japanese journalist who disappeared in Vietnam.

They said that there were still five hostages aboard the ferry and that they would demand the release of a Japanese journalist who disappeared in Vietnam.

The Japanese and Chinese government said they would meet their demands.

Play lacks conceptuality

The dialogue of The Wild Night's Dinner that opened at the Hancher Box Office Thursday night in conjunction with the University of Iowa French Department's summer Production Conclave has the energy and the new approach. It also has bits of muddled chaos that lack some concepts. Although the French Department is known for its rigorous efforts to educate French-speaking students, the production seems to be more about the actors trying to comprehend themselves rather than the audience trying to comprehend what the actors are doing. However, the actors' energy and the new approach is commendable.

Lovers

The scenes—Henrietta Languedoc, Voltaire and Benjamin—performed by JeanPierre, Jean Marc and Denoung Coigne, set the pace. The scenes were lively, full of energy, and the actors were often in sync with each other. However, the dialogue of the scenes was often confusing and at times disjointed. The actors seemed to be trying to understand themselves as much as the audience was trying to understand the French language.

Court people

The people of the court—Dolorosa, Egan and Philibert—performed by Cery Carthou, Tad Bullock and Tad Jones, respectively, performed by playing the music itself. The actors seemed to be struggling to understand the French language, and the music often got in the way of the dialogue. However, the actors' energy and the new approach is commendable.

Encourages summer studies in Mexico

The Universidad Azteca in Mexico City has announced that it will offer a series of summer courses in Mexico City beginning in June. The courses are designed to provide French-speaking students with a broader knowledge of the language and the culture.

A monetary award is given to students who complete the courses. It is a great opportunity for French-speaking students to improve their language skills and to learn more about the culture of Mexico.

The program is open to students from any country who wish to improve their French language skills. The courses are taught in French and are designed for students at the intermediate to advanced level. Students are encouraged to take the courses for credit or for personal enrichment.

The courses are organized in such a way that they are taught in small groups, and learning becomes more effective. In addition, practical experience is received from practical exercises. Experience is taught from the perspective of the student, and basic problems are presented to the student. The course is divided into five periods of one month each period. As part of the civilization course, students are encouraged to visit cultural and anthropological museums in Mexico City.

The concept of the program is to introduce students to the French-speaking world and to give them the opportunity to learn more about the culture and the language. The courses are taught by experienced teachers and are designed to be both practical and theoretical.

1:00 AFTERNOON MOVIE: "The Song of Bernadette"-A biographical drama about the life of Bernadette Soubirous, a French peasant girl who claimed to have seen the Virgin Mary in Lourdes, France. The film is directed by Vincente Minnelli and stars JaneWyman as Bernadette and Arthur Kennedy as her father.

1:00 REGAL REMNANTS: Swedish kids own cop

STOCKHOLM, Sweden - The Swedish film industry is enjoying a surge in popularity, with several recent releases achieving critical and commercial success. The latest film to gain attention is "The Kidnapping," directed by Martin Friberg and starring Mikael Persbrandt as a detective who must solve a murder case. The film, produced by the renowned AB Filmfabriken, has been praised for its strong performances and compelling storyline.

The film follows a series of murders that occur in a small town, and the detective must navigate the complex relationships and secrets that surround the victims. The film is set against the backdrop of the Swedish countryside, providing a beautiful and atmospheric setting.

Swedish cinema has been on the rise in recent years, with films such as "Svartvitt" and "The King's War" receiving critical acclaim both in Sweden and internationally. "The Kidnapping" marks another milestone in the development of Swedish cinema, and it is expected to contribute to the continuing growth of the industry.

In other news, the Swedish government has announced plans to invest more in the film industry, providing financial support and tax breaks to filmmakers. These initiatives are expected to further stimulate the growth of Swedish cinema in the coming years.

Additional information about the film can be obtained by visiting the film's official website or contacting the production company, AB Filmfabriken.

Sherwood's unique front panel tape jack (plus one rear panel jack) allow simultaneous recording on two recorders or dubbing from one recorder to another. Stereo switches can be turned on and off for private listening.

Optional selector switch permits listening to your main set of stereo speakers (A), a remote set of speakers (B) or both sets (A & B) at the same time (A & B).

Turning switch on FM or AM stations is a joy with Sherwood's selective "Finger Scan" tuning system. "Index" indicator tells you if you are listening to a stereo station.

The SF-8000 achieves a reliability of performance tested by a full four-year warranty on all parts.

Field effect transistors are found in Sherwood's front-end circuits. These transistors provide better sonic performance, beauty, and reliability than any other solid state transistor on the market today.

For more flexibility, you can actually connect up to five recorders or playback decks permanently to the SF-8000, one cassette recorder for dubbing, two tape recorders for use as tape changers, and another for private listening.

Here is Sherwood's most advanced receiver. Unparalaleled performance in stereo.

CERAMIC IF FILTERS. Sherwood's exclusive crystal-controlled IF filter design includes a crystal-controlled crystal (for superior AM selectivity) as well as eight stages of excellent selectivity. In addition, this IF filter design provides for dual tuning of stereo broadcasts.

Elegant switch with an all-silk inductance. A 100% pure copper transformer is used in the output stages of this giant killer. A 100% pure copper transformer is used in the output stages of this receiver. This transformer not only boosts the signal to levels needed to drive low impedance speakers without causing distortion, but also maintains very low distortion levels. The result: a crystal-clear, dynamic sound with only the slightest hint of distortion.
