Nixon formally subpoenaed in Ellsberg burglary case

By MARY WALBURN

University of Iowa residence halls will be closed for a two-week period starting Monday to reduce the operational costs of a fuel crunch.

This is the first time that the university has had to close residence halls in order to conserve energy.

Arthur Gillis, vice president of planning and financial services, said in a statement that the university was taking a "realistic approach" to the crisis.

"The only way to meet the needs of the national economy and to conserve energy is to cutback consumption of goods and services," Gillis said.

The university administration has already ordered the shutdown of non-essential operations and the temporary furloughs of some employees.

"The move is necessary to ensure that the university can continue to operate during this period of national crisis," Gillis said.

The president of the university, Gerald H. Fallon, has also issued a statement expressing his support for the decision.

"We believe that the action we are taking is necessary to protect the university's ability to continue its essential functions," Fallon said.

Fallon added that the university is working closely with local and state officials to ensure that the critical services continue to operate.

"We are committed to doing our part to help contain the energy crisis," Fallon said.

The university has also asked its employees to take voluntary leave without pay, and has cancelled all non-essential travel.

UI to close dorms this summer as energy conservation measure

Warmer 40s

London, Ont. (AP) — Britain's coal miners are again striking over a wage dispute, as the government faces growing pressure to reverse its policy of closing down coal mines.

The miners have already staged several work stoppages in recent weeks, but this is the first time they have threatened to shut down production completely.

"We are determined to protect our jobs and our livelihoods," saidunion leader John Daniels. "We will not accept any cuts in our wages or working conditions."

The government has yet to offer any alternative to the miners' demands, and it remains unclear how long the strike will last.

"We will not back down until we get a fair settlement," Daniels said.

Miners across the country have been protesting against the government's plans to close down all but a few of the country's coal mines.

"We are fighting for the survival of our communities," said one miner. "Coal mining has been an essential part of our lives for generations."

The government has argued that closing down the mines is necessary to reduce the country's dependence on foreign oil and gas.

"We are committed to making our energy supply more secure," said Environment Minister Libya. "But we cannot do that without cutting back on coal."

The dispute has reignited the debate over the future of the coal industry in Britain, with some calling for a moratorium on mine closures, while others believe that it is vital to move away from coal altogether.

"We must think long term about our energy future," said one expert. "Coal is a dirty, polluting fuel that is not sustainable in the long run."

But others argue that shutting down the mines will cost thousands of jobs and put communities at risk.

"We have a duty to our communities to keep these mines open," said one miner. "We cannot let the government rip out our future like this."

The dispute is set to continue for the foreseeable future, with both sides dug in and unwilling to make any concessions.

The government has so far refused to negotiate with the miners, but some observers believe that it may yet be forced to do so.

"They have a long way to go before they win this battle," said one评论员. "But they are not giving up."

The fate of the UK's coal industry remains in doubt, with the future of thousands of jobs hanging in the balance.
Renewal plans going full steam ahead

The Iowa City School District is going ahead full steam ahead with plans for the construction of a new high school building project, despite the project's dependence on funding from the state. The project is currently in the planning stage, and the school district has already begun the process of applying for state funding.

The school district has already begun the process of applying for state funding. The project is expected to be completed by the end of the school year. The new high school will be located on the site of the current high school, which is scheduled to be demolished.

The new high school will feature state-of-the-art educational facilities, including a state-of-the-art science lab, a new gymnasium, and a new auditorium. The school district is also planning to construct a new athletic field, which will be used by both the high school and the community.

The school district is hoping to complete the construction of the new high school in time for the start of the 2023-24 school year. The construction project is expected to cost $75 million, and the school district is receiving a $20 million state grant to help fund the project.

The school district is also planning to construct a new middle school, which will be located on the same site as the new high school. The middle school is expected to be completed by the end of the school year.

The new middle school will feature state-of-the-art educational facilities, including a state-of-the-art science lab, a new gymnasium, and a new auditorium. The school district is also planning to construct a new athletic field, which will be used by both the middle school and the community.

The school district is hoping to complete the construction of the new middle school in time for the start of the 2023-24 school year. The construction project is expected to cost $50 million, and the school district is receiving a $15 million state grant to help fund the project.

The school district is also planning to construct a new elementary school, which will be located on the same site as the new middle school. The elementary school is expected to be completed by the end of the school year.

The new elementary school will feature state-of-the-art educational facilities, including a state-of-the-art science lab, a new gymnasium, and a new auditorium. The school district is also planning to construct a new athletic field, which will be used by both the elementary school and the community.

The school district is hoping to complete the construction of the new elementary school in time for the start of the 2023-24 school year. The construction project is expected to cost $30 million, and the school district is receiving a $7.5 million state grant to help fund the project.

The school district is also planning to construct a new early childhood education center, which will be located on the same site as the new elementary school. The early childhood education center is expected to be completed by the end of the school year.

The new early childhood education center will feature state-of-the-art educational facilities, including a state-of-the-art science lab, a new gymnasium, and a new auditorium. The school district is also planning to construct a new athletic field, which will be used by both the early childhood education center and the community.

The school district is hoping to complete the construction of the new early childhood education center in time for the start of the 2023-24 school year. The construction project is expected to cost $15 million, and the school district is receiving a $3.75 million state grant to help fund the project.
Students organize legislative lobby

By MICHAEL MACCAGN

A number of University of Iowa students are attempting to bring about some change in the political system. In recent days, students in several states have taken to the streets in demonstrations against the nuclear power moratorium. Some of the Iowa students have attempted to bring about some change in the political system. In recent days, students in several states have taken to the streets in demonstrations against the nuclear power moratorium. Some of the Iowa students have attempted to bring about some change in the political system.

The Iowa Student Public Interest Research Group (ISPIRG), which is one of the several organizations that are working on this issue, is also involved in this movement. ISPIRG is a non-profit organization that works to promote social and economic justice through research, education, and grassroots organizing. ISPIRG is involved in a number of issues, including environmental protection, consumer rights, and social welfare. The organization works to educate the public about these issues and to influence policymakers to take action.

President Jimmy Carter's use of the DEATH rural terror troop to save a bill to end the secrecy involved with the public-but the more powerful committees such as Appropriations, Ways and Means, and Armed Services and Foreign Affairs have still shown a great reluctance to swing open the doors.

The Appropriations Committee, among the most secretive of all the House’s 10 stands opposed to the proposal. This committee, which deals with the important budget considerations, holds only open meetings (the one exception was an early meeting dealing in generalities) and closed its doors for the remaining 14 times.

The House Ways and Means Committee, the other major House committee, closed its doors 11 times to hold special meetings, but the practice of opening up the committee did not occur until after September. From June through September, the committee held numerous closed sessions, 13 trade reform. In the fall, only after pressure from such groups as Common Cause, did the committee open up the doors and hold open meetings on pension reform, social security, and the national debt limit. On November 28, the committee closed its doors to discuss and reject a Senate-passed proposal for the financing of federal elections.

The Services Committee and its subcommittee, which handles the military bills in the House, closed half of its meetings. The idea of an open meeting at the most important time, during committee action on the authorization bill for the Department of Defense.

The House Administration Committee has held open no meetings so far this year. It is not voting to hold closed meetings, as is required. The committee claims that it is not even considering closed-meeting rules because it exempts meetings dealing with internal budget or personnel matters from the secrecy rule. But this has been impossible to challenge the long string of secret meetings. Women's Liberation movement appears to be an equal opportunity act with this. It includes, as stated, the assistance of all the governmental bodies in order to stop the kinds of meetings that are already referred to, as they not only keep-go along away from a few personal meetings, but from the view of American women.

As for the House rule requiring members to vote in open session to close a meeting, but it allows one vote to cover a succession of doors a room.
Total Israeli withdrawal demanded

Oil ban lifted dashed by Syria

By ROB MAC-JOHNSON

The largest percentage of foreign students at the University of Iowa are from India and Japan, according to a recent survey by the Office of International Services. The percentage of foreign students from India is a relatively high number, particularly in the College of Liberal Arts and Sciences, as well as in the College of Business Administration.

The survey, conducted by the Office of International Services, found that foreign students account for 15 percent of the total student body. The largest percentage of foreign students are from India and Japan, with 40 percent and 20 percent respectively.

Threats lions up buzz

By KATE CHAPMAN

It was the worst terrorist attack in Britain since 1974. At least 25 were killed and 70 injured when a bomb ripped through a packed London underground train.

Police at the scene say they are investigating the blast, which took place on a train at around 8:30pm on Wednesday. They said it was the worst terrorist attack in Britain since 1974.

The blast occurred near the Northern Line station at Russell Square, and the tube service was suspended for the evening.

President Bush has condemned the attack, saying it was "a despicable act of terrorism that we will not tolerate."

He added: "We will pursue all leads, and we will bring those responsible to justice."

The London underground has been closed down until further notice.

Senator considers bill for male work release

By DAVE MONROE

A proposed bill would allow male prisoners to be released on work release programs to keep them in contact with family and friends.

The bill, sponsored by Senator John Smith, would allow male prisoners to be released on work release programs to keep them in contact with family and friends.

The bill would change regulations so that prisoners could be released on work release programs to keep them in contact with family and friends.

The bill would also allow for the release of prisoners who have served at least half of their sentence on work release programs.

Those who oppose the bill say it would be too lenient, and that it would free prisoners who are still a danger to society.

The bill was introduced in the Senate on January 1st, and is currently being debated in committee.

Total Israeli withdrawal demanded

By ROYAL HUGHES

The Syrian president, Hafez Assad, has demanded an immediate withdrawal of all Israeli forces from the occupied territories.

He said: "We will not negotiate with Israel until all of its forces are withdrawn from the occupied territories."

The Israeli government has rejected the demand, saying it would be a "pre-condition" for any peace talks.

However, there is growing pressure on Israel to withdraw, with the United Nations and the European Union calling for an immediate end to Israeli occupation.

Oil ban lifted dashed by Syria

By ROBERT BAYLIS

The Syrian government has lifted the oil embargo on Israel, but has maintained a boycott of all Israeli goods.

President Assad said: "We cannot allow Israel to continue to blackball our country."

The embargo was lifted after Israel agreed to withdraw its forces from the occupied territories and to pay compensation to the Palestinians.

However, the embargo on Israeli goods remains in place, and Syria will not trade with Israel until all Israeli forces are withdrawn.

The decision was met with mixed reactions, with some Palestinian leaders welcoming it as a step in the right direction, while others expressed concern over the impact on the civilian population.

College of Engineering programs attract foreign students

By BYRON BAKER

The College of Engineering at the University of Iowa has launched a new program to attract foreign students.

The program, called the "International Engineering Exchange Program," will allow international students to spend a semester at the University of Iowa, while American students will have the opportunity to study abroad.

Foreign students will live in on-campus dormitories and will have access to all the resources available to American students.

The program is designed to enhance international cooperation and to broaden the horizons of both American and international students.
Oster touches many folk music bases

By DAVID HILLARD

Iowa "Is"

Iowa "Is"

Contact local organization

My wife and I would like to sponsor a needy child. We've seen advertisements for the Christian Children's Fund, the Hebrew Children's Aid Society and Catholic Relief Services, among others. We've heard that the last two are rather expensive and that the first one is somewhat questionable. Can you explain the particulars of any of these groups (or others)?

We would like to consider working with the local chapter of Friends of the Children of Vietnam. This organization intends to sponsor an orphan in Vietnam. We need to locate a child who can be sponsored by us, for a period of time, and who is of appropriate age and size. We have already considered the boys, and have decided to sponsor a girl. She is 12 years old, and we would be willing to pay for her entire support while she is with us. We are looking for a child who is healthy, and who has a good chance of survival. We would like to know more about this child, and about the organization as a whole. Can you provide more information?

Another chapter of Friends has a letter program in which they correspond with children in Vietnam. This program would allow us to become acquainted with a child, and to learn more about their lives and their country. We would like to consider this option as well. Can you provide more information about this program, and about the organization as a whole? We would like to know more about the children, and about the country.

L是中国"

Hang-ups

University of Iowa English Professor Dr. Pete Oster, who has been studying folk music for the past ten years, has just received a large sum of money from the National Endowment for the Arts. Dr. Oster will use this money to continue his research on folk music in the Midwest.

Dr. Oster's research has focused on the collection of folk music and the preservation of traditional music. He has been collaborating with Dr. Albert Fine, a musicologist at the University of Iowa, to create a database of folk songs from the Midwest.

"The funding from the National Endowment for the Arts is a great opportunity to continue our work," Dr. Oster said.

Dean of the College of Fine Arts, Dr. Robert Park, said, "We are incredibly grateful for this support of Dr. Oster's work. It will allow him to continue his important research into the preservation of folk music in the Midwest."
Stuttgart brings sensitivity to classics

By PHILIP GREEN

In this day and age of inflation, specifically inflation on concert tickets, it is comforting to know there are some things which are strong enough to survive even the worst excesses of our time. One of these is the musical classic. From time immemorial, the concertgoer has been assured of being entertained with a program calculated to please and to amaze. This promise is always met. Stuttgart brought sensitivity to classics in a performance which was not only pleasing and inspiring, but also of the highest quality.

The program itself was a mixture of string chamber music and less familiar works. The first selection, Pachelbel's Canon, was an obvious choice. This piece is not only familiar and easy to identify, but it also serves to set the tone for the rest of the program. The performers had a great deal of respect for the piece, evident in the way they approached it.

Another piece that stood out was the performance of Mozart's early string quartet. This piece is not only beautiful, but it also serves as a reminder of the importance of balance and precision in performance. The performers had a great understanding of these elements, and their execution was flawless.

The program also contained Mozart's Serenade for Strings in C major. This piece is not only beautiful, but it also serves as a reminder of the importance of balance and precision in performance. The performers had a great understanding of these elements, and their execution was flawless.

In conclusion, the performance by the Stuttgart group was a triumph of sensitivity and musicianship. They demonstrated a deep understanding of the works they performed, and their execution was flawless. This is a rare and precious gift that should be treasured.
Badgers infect state with hockey fever

Today’s leading killers are heart disease, cancer, strokes, accidents and suicides. Sadly, so many needn’t die. Most of these causes of death can be prevented or at least minimized by such things as proper diet and exercise, control of blood pressure, moderation in smoking and drinking, counseling, and regular checkups. And common sense to prevent accidents. It’s just plain foolish to sit, eat, smoke, and drink your way to an early grave. It’s almost like taking your own life. If you’re thinking of that, talk it out with a professional. And about those accidents. Most of those are somebody’s own fault. Live carefully so you can live. We care.
