Madison issue ‘up in air’

Editor’s Note: The following news story was originally published in the The Daily Iowan and reprinted in the University of Iowa University Gazette and the University of Iowa News.

By LEWIS D. WASHINGTON

Editor

The fate of Madison Street is drawing near. As University of Iowa and city officials are actively discussing the future of Madison Street, Madison Avenue, but did not offer enough support for the proposal’s feasibility. UI administrators decided to respond to requests for a proposal to close the street from 11th Street to just south of campus. However, officials stated that any proposal to close the street would need to be approved by the city council before it could be implemented.

One UI administrator said if the city were to adopt such a plan, the university would need to be involved in the discussion. The city council would then need to decide whether to approve the proposal. The council would also need to consider the impact of closing Madison Street on the university’s ability to conduct research and other activities.

Despite these concerns, city officials are reportedly considering the idea. The city is currently preparing a report on the potential impact of closing Madison Street on the university and other institutions. The report will be presented to the city council in the near future. The city council is expected to make a decision on whether to close Madison Street within the next few months.

The fate of Madison Street is a complex issue that involves both the university and the city. The city council is currently considering the potential impact of closing Madison Street on the university and other institutions. The city council will need to carefully consider the implications of closing the street before making a decision.

In the meantime, the university and the city are continuing to work together to find a solution to the issue. The university is committed to working with the city to find a solution that will benefit both institutions.

Cagan: elected senate president

By MAUREEN CONNORS

Staff Writer

Senators elected David Dally, College of Liberal Arts and Sciences, as the new University of Iowa student body president. Dally, a junior in English, succeeded John Davis, who was elected in 1972.

In a surprise move, Cagan was elected by the student body to represent the university in the bicameral Senate. The position was vacated after the death of像素（YAF）, an Independent.[1] Cagan was a member of the political party and participated in the delegation to the four-party Joint Committee on External Relations, which was held in Saigon in 1973.

In the meantime, the university and the city are continuing to work together to find a solution to the issue. The university is committed to working with the city to find a solution that will benefit both institutions.

BY CLYDE HAWKINS

Chairman
School Superintendent

Mr. Ludwing recommended Thursday that the Iowa City School Board close 10 of its 40 schools over the next school year. A finding of $280,000 deficit next year, he contended, would mean closing a number of schools, as the $900,000 school levy will be spent for construction and expansion.

The closing of the 10 schools would mean cutting back to the 24 schools that the school board recommended last year for the 1973-1974 school session. By comparison, the 1972-1973 school session was closed at the 36 schools that were open.

Ludwing said the closing of the 10 schools will provide $590,000 in savings to the school district. That amount will be spent for the construction and expansion of the remaining schools that will be kept open.

The closing of the 10 schools will mean the loss of 3,600 students in the district. The enrollment in the district is 13,600.

If the school board finds it necessary to keep only 24 schools, it must cut the enrollment to 9,600, 4,000 less than now.

Ludwing said that the 10 closing schools, if not closed, will mean a 1973-1974 school levy of $900,000, with $590,000 of that amount being spent for construction and expansion.

The school board will make a final decision on the 10 school closings at its next meeting on January 6. The school board meeting will be held at 8 p.m. in the Hancher Auditorium.

Ludwing said the closing of the 10 schools would mean a total savings of $590,000 in the district.

The 10 school closings will be as follows.

1. Lincoln Elementary
2. Washington Elementary
3. Johnson Early Childhood Center
4. Central Junior High School
5. Johnston High School
6. West High School
7. Senior High School
8. Central High School
9. Hancher Auditorium
10. Iowa City School

The Iowa City School Board voted Mayor Edgar Adams to sign a grant request involving $1 million for the mass transit system.

It was a surprise, however, when Commissioner Tim Brant voted against a proposal to sign the request and put it up to the city council for action. The proposal was defeated 4 to 1.

The city council also heard a request from the Board of Transportation to sign a proposal that would make the award of a contract for the $1 million mass transit service.

Kidnaping aftermath

Editor's Note: The following editorial is reprinted with the permission of the Native American magazine.

Prior to the San Francisco and Atlanta kidnapings, it seemed—thanks largely to the Watson dinner discussion—that substantial headway might be made in determining diplomatic policies. Now the Watson plan has been dropped because J. Edgar Hoover, the director of the FBI, had certain objections, for which I have no criticism, but had abandoned his own FBI anti terrorism program, through the same tactics the Defense Department was under pressure from the publicity attendant spot those various exploitations to curb its activities in the same field. It was unimportant and the "national security" tag used to rationalize such operations has fallen into disrepute because of the "exposure of the truth" story.

This salutary trend may now be reversed. It will have to be reversed if the United States is not to be engaged in political terrorism such as the Syn- hammer affair. It is worth noting that some outside intelligence imperatives, if only to prevent acts of violence by the outside agencies. By all accounts, the chief attention is now on the outback of thk SLA. Even before the recent kidnapings, the director of the FBI had asserted the need for a new domestic political terrorism program, but the demand will doubtless grow.

But neither the FBI nor local police need special authorization to engage in counterintelligence for the limited purpose of preventing crimes of violence.

EDITOR'S NOTE: Today's Equal Free Press, at a cost of $1.50 a year, publishes this city capitalist and capitalists who do not make a distinction between an Iowa Capital and the workers of the state. It is the official organ of the Association for the Advancement of Labor. It says that is done, surplusage may be used to Meadow Brook, and one of the many companies that will be paid to Meadow Brook, will be paid to the Association. It says that it is not as easy for a student just a little bit easier if improper regulations are used. Let's take the time to listen to one or two of your student senators and contact your student senator. It is easier enough to say that in the long run the students should work for democracy. The students should be able to have a say in any aspect of the campus.

Letters

To the Editor:

I would like to take this opportunity to thank those of you who voted for the president and the people who voted for the president. I feel that this is as it should be. I do not feel that it is right that the president should have been in a university campus. I do not feel that the president should have been in a university campus. I do not feel that the president should have been in a university campus. I do not feel that the president should have been in a university campus.

To the Editor:

It is easier enough to say that in the long run the students should work for democracy. The students should be able to have a say in any aspect of the campus.

Overall, Doug, this year's election has restored my faith in human society. Let democracy be made to work in Iowa and all other places.

Randi Levy

To the Editor:

Tom, in a recent letter, expressed some very disturbing ideas about the possibility of the creation of a new political party. I would like to express my disagreement with these ideas.

Tom's ideas seem to be based on the assumption that all political parties are equally desirable. However, I believe that the development of new political parties is not necessarily desirable. I believe that the development of new political parties could lead to the fragmentation of the political system and the weakening of democratic institutions.

I would like to suggest that Tom consider the following points:

1. The development of new political parties could lead to the fragmentation of the political system. When a new political party is formed, it is often able to attract a significant portion of the vote of a traditional political party. This can lead to a situation in which the political system is divided into several competing parties, each with its own agenda. This can make it difficult for the government to make decisions in a timely and effective manner.

2. The development of new political parties could weaken democratic institutions. If a new political party is able to attract a significant portion of the vote of a traditional political party, it may be able to pressure the government to make decisions that are not in the best interest of the country. This can undermine the democratic process and lead to a loss of faith in the political system.

3. The development of new political parties could lead to increased political polarization. When a new political party is formed, it is often able to attract a significant portion of the vote of a traditional party. This can lead to a situation in which the political system is divided into several competing parties, each with its own agenda. This can make it difficult for the government to make decisions in a timely and effective manner.

I believe that Tom's ideas are not based on a careful analysis of the potential consequences of the development of new political parties. I would like to encourage Tom to consider the points that I have raised and to carefully consider the potential consequences of any new political parties that may be formed.

The functions you need... at prices you can afford.

Texas Instruments

SR-10 and SR-11 slide-rule calculators.

SR-10. SR-11. Two proven performers. And now with crisp, new price tags.

At only $109.95, the SR-11 is priced so you can have one of your own. Yet, it delivers the computation power to handle a wide range of slide-rule functions.

A single keystroke gives you square roots, squares, reciprocals, and multiplication and division by a constant or Pi. And using simple methods, you can quickly compute nth powers, nth roots, sines, cosines, tangents, arc sines, arc tangents, exponentials and logarithms.

Without writing down interim results, you'll be able to solve quadratic equations, the sum of products, the sum of quotients, the reciprocal of the sum of reciprocals, the square root of the sum of squares and more.

But all this scientific capability doesn't mean the SR-11 is hard to operate. An easy-to-use algebraic keyboard lets you key problems as you'd write them on paper.

Data may be entered in full floating decimal point, scientific notation, or any combination of the two. And the SR-11's bright, 8-digit display is clearly visible for everyday mind, much less the machinations of his inner psyche. But in regard to this proposal I suggest that he live at least 2-3 in the 7-12 scale of the intellect-related thinking man. I suggest that his mind has recognized that being a bring-a-someone-involved-in-a-situation-after-the-fact kind of man he could exist on an act which was his conscious mission in discovering the penalty of his moral blunder. Common sense, and having been a free man too long, can tell him the following meaningless, irrational offer of annihilating someone who had, is, or was ever his own interest. Better put, a lifer has the interest perhaps, but only with us. Even a man who has

TECHNICAL CAREER OPPORTUNITIES: Write H.K. Models 71, 114-128, P.O. Box 664, Dallas, Tex. 75202. An Equal Opportunity Employer.
The City Council has approved a new chapter of the building code that would allow the sale of beer in bars and restaurants in the city's downtown area. The new law was passed unanimously by the council, which cited the need to compete with similar legislation in other cities.

The new chapter, which is set to take effect next month, would allow bars and restaurants to sell up to six 12-oz. cans of beer or a pitcher of beer per person per day. The law also prohibits the sale of alcohol on Sundays.

The move comes as the city continues to work on revitalizing its downtown area and attracting more visitors. City officials hope that the new law will help attract more tourists and businesses to the area.

The new chapter is part of a larger effort to improve the city's downtown area. In recent years, the city has invested millions of dollars in infrastructure improvements, including new parks, sidewalks, and streetlights.

Despite the progress, the city has struggled to attract enough businesses and visitors to its downtown area. The new law is seen as a step in the right direction in trying to address this issue.

The city council is expected to review the new chapter again in six months to assess its impact on the downtown area.

Reactors foist taxes, hazards on public

Editor’s Note: This is the second of a series of articles about the U.S. Atomic Energy Commission (AEC) by Thomas F. Johnson, the Atomic Energy Commission’s special assistant to the chairman. These articles will examine the current state of the atomic industry, its history, and its potential future.

In the past few years, the AEC has become a target of public concern. The commission’s handling of the atomic bomb crisis has been criticized, and its role in regulating the nuclear power industry has been questioned. The AEC’s budget, which is currently about $2 billion, is slated to increase by about 10% next year, and some members of Congress are calling for a moratorium on new nuclear power plants.

In this article, Johnson discusses the AEC’s role in regulating the nuclear power industry and the challenges it faces in doing so. He also examines the AEC’s role in the development of new nuclear technologies and the potential for nuclear power to provide a significant portion of the nation’s energy needs.

The AEC’s role in regulating the nuclear power industry is complex and controversial. On the one hand, the AEC is responsible for ensuring that nuclear power plants are safe and that the health of the public is protected. On the other hand, the AEC is also responsible for promoting the development of new nuclear technologies and ensuring that nuclear power remains a competitive source of energy.

Johnson argues that the AEC has a significant role to play in the development of new nuclear technologies and that it should be given the resources it needs to do so. However, he also notes that the AEC’s role in regulating the nuclear power industry is complex and that it faces significant challenges in doing so.

The AEC’s role in the development of new nuclear technologies is also controversial. Some members of Congress are calling for a moratorium on new nuclear power plants, and some environmental groups are calling for a moratorium on the development of new nuclear technologies.

Johnson argues that the AEC should continue to support the development of new nuclear technologies, but he also notes that the AEC should be careful to ensure that new technologies are safe and that they do not pose a risk to the public.

In conclusion, Johnson argues that the AEC has a significant role to play in the development of new nuclear technologies and that it should be given the resources it needs to do so. However, he also notes that the AEC’s role in regulating the nuclear power industry is complex and that it faces significant challenges in doing so.

The AEC’s role in the development of new nuclear technologies is also controversial. Some members of Congress are calling for a moratorium on new nuclear power plants, and some environmental groups are calling for a moratorium on the development of new nuclear technologies.

Johnson argues that the AEC should continue to support the development of new nuclear technologies, but he also notes that the AEC should be careful to ensure that new technologies are safe and that they do not pose a risk to the public.
Women's Day celebrates liberating forces

By SYLVIA POZARNSKY

The University of Iowa choral society will present a program of music illustrating the efforts of women in the 19th and 20th centuries for rights and the liberation of the sexes. The program will include an evening of music to commemorate the struggles of progressive-minded people. The concerts will be held at 8 P.M., on Wednesday, March 8, in the Shattuck Auditorium. Admission is free.

The symphony will present Stravinsky, Brahms, and women's compositions. Because on this day, the symphony is dedicated to women, the performances include works by composers whose music is considered to be progressive or revolutionary. The program also includes music by women composers, including works by Florence Price and Joanne Mackintosh.

The symphony will begin with Petrouchka by Stravinsky, which was composed in 1911. The piece was commissioned by Sergei Diaghilev for the Ballets Russes and was first performed in 1911. The work is a three-part ballet suite, and the final part, Petrouchka, is particularly well-known for its use of the so-called “petrouchka” theme, which is a repetitive, syncopated motif that is used throughout the piece.

The second part of the program will feature Brahms' Symphony No. 1 in C minor, Opus 68, which was composed in 1876. The symphony is a powerful and dramatic work that is widely considered to be one of Brahms' greatest achievements.

The third part of the program will feature a selection of works by women composers, including pieces by Florence Price and Joanne Mackintosh. The works by these composers will be performed by the symphony's female members.

The concerts will be held at 8 P.M., on Wednesday, March 8, in the Shattuck Auditorium. Admission is free. The program will include an evening of music to commemorate the struggles of progressive-minded people.

Streakers blitz UI campus

By BILL ROEMERMAN

If you were not in the thick of the action last night you might have been in the streets protesting the war. But Tuesday night the street to be in was between Burge and Kirk dormitories, waiting to see your fellow students "streak" by in the nude.

A crowd estimated at between 400 and 500 students, mostly dormitory residents, was on the street last night to see if the streaks were coming down. Rumors that the streakers were coming down the good-natured crowd as well as a number of Iowa City policemen and Campus security officers who had been at the street at about 11 p.m. and by 1 a.m. the crowd swelled to nearly 1,000 after a fire alarm was pulled in Burge.

Although only a small number of streakers was reportedly sighted, with one apparently apprehended by the police, there were still coming in at Iowa City press time.

Many of the dorm residents in the rooms with windows near the street attempted to keep the expectant crowd entertained with loud music, fire crackers, flashing police lights, and many hoots and cheers. Although the crowd blocked the street for hours, bumped nearly cars and included a CAPRICE, police at the scene seemed to be in a jovial mood.

When asked if it wasn't just as illegal to block a street as it is in rain naked, the officer just smiled and shrugged his shoulders.

Besides the number of Iowa City policemen and Campus security officers at the scene, the Iowa City Fire Department also arrived at the University with their fire trucks ready to respond when the reports usually ended in disappointment for most of the people on the street when the reported streaker did not appear or in the dense crowd prevented them from viewing the daring individual.

Police and all concerned personnel were on the street trying to "resolve the situation" but they added that they didn't want to create a disturbance because there was a lot of fun too but it's illegal.

When asked if it wasn't just as illegal to block a street as it is in rain naked, the officer just smiled and shrugged his shoulders.
