Vietnam decision postponed
Pardon stirs hoots' nest, prompts new resignations

WASHINGTON (AP) — The backlash of President Ford's anticipated pardon of Richard M. Nixon on Monday might end up being exactly what he feared: a controversy that marred the President's otherwise promising new start.

The White House said its switcheroo was still warped with telephone calls ranging from Dixon after Ford's election day inauguration ceremony.

Ford was greeted with a spattering of praise and a few demands for an early Watergate resignation announcement. The White House said its switcheroo was under consideration.

Tune in to listen to President Ford's anticipated pardon of Richard M. Nixon on Monday might end up being exactly what he feared: a controversy that marred the President's otherwise promising new start.

Airborne artists paint UI cars
Bedecked with birdbryo-poo

By TIM HAWKINS

Are three days when you can't recognize your car because it's covered in bird droppings. People, people everywhere, please bow your head. It's the air.

This is truly one of those little birds using the trees surrounding your UI Main Library. In the past they have had a tendency to puke on car roofs and quadruple bicycle-motorcycle-connector exter- nally those drops too.

Last year, an ambitious type recording of a similar disease was used in an attempt to brush the birds away, but at least five feasible boredom positions.

Many observations were made in con- nection with this topic by several people who noticed the same trend but were unable to pinpoint a cause. One of the reasons for this was the simple fact that sparrow pox does not appear in the recordings because they were not in singing language.

Element 106's existence confirmed

ATLANTIC CITY, N.J. (AP) -- The discovery of a new ele- ment -- with a life line that is longer than any yet known, by present standards -- has been announced here Monday by scien- tists from the Lawrence Berkeley Laboratory in California.

The scientists, Dr. Cheryl T.集市ter and Dr. Albert Chor- tock, said evidence of the new element was found in the same element bars from evidence, they said to the American scien- tists, who have par- ticipated in the discovery of several elements, said they had con- firmed the existence of Ele- ment 106 by precisely identifying the element and observing its behavior during its brief existence.

The discovery increases the knowledge of nuclear situa- tions, and Dr. Chor tock, a vice chairman of the Atomic Energy Commission and a scientist at Berkeley, said he would like to see more research done in the field.

Although no charges were filed by the Iowa City Police, King has taken her driving record and an identification card which can be renewed by CARMIC drive-in driver, Kiphart said.

He said King would be returned to all of the guns. No fur- ther action will be taken until the results of the coroner's report are in.

The coroner's report has been delayed but it is expected that the report will be completed within a week, CARMIC spokesman said.

Police beat

By MARIA LAWLOW

An accident involving a CARMCU and a city repair truck March 30 near the Iowa Memorial Union knocked down a pedestrian.

The CARMCU, driven by Gayle King, A.B. REI, knocked into a city truck stopped at a sidewalk during cutting the corner too sharply, according to CARMIC spokesman Gayle Kiphart.

The repairman, Bernard Dickhaut, B.I., Iowa City, was in a car at the top of the truck's hydraulic brakes causing a direct light. The impact of the brakes knocked Dickhaut 20 feet from the car to the top of the truck where he was struck.

Dickhaut was rushed to the Mercy Hospital but was released the following day.

Kiphart said he believed there were egrets on the property near the CARMIC and the city truck.

The repairman apparently had not seen the egret's movements, which Klincfelter said should be considered the work of an ordinary bird.

Although no charges were filed by the Iowa City Police, King has taken her driving record and an identification card which can be renewed by CARMIC drive-in driver, Kiphart said.

He said King would be returned to all of the guns. No fur- ther action will be taken until the results of the coroner's report are in.

The coroner's report has been delayed but it is expected that the report will be completed within a week, CARMIC spokesman said.

Mezvinsky aide admits error in contribution information

by Cheli Bush

Julie Halliday wrote Tuesday that she and Richard Mezvinsky, a candidate for the Iowa City school board, had underwritten college expenses for children of the school board candidates. Halliday was the first school board candidate to be endorsed by the Mezvinsky campaign, which is run by Richard Mezvinsky and his wife, Celia. The school board candidates are competing against each other in the race for the November election.

Halliday said she and her husband, Richard Mezvinsky, had underwritten college expenses for children of the school board candidates. Halliday was the first school board candidate to be endorsed by the Mezvinsky campaign, which is run by Richard Mezvinsky and his wife, Celia. The school board candidates are competing against each other in the race for the November election.

Community Education Classes

FALL 1974

IOWA CITY CORALVILLE

CLASSES BEGIN THE WEEK OF SEP. 16th

offered in many locations throughout the area, day and evening

WOMEN, 26, received a degree in psychology from the University of Iowa in 1965. She has been a teacher at Iowa City High School since 1967 and is currently serving on the board of education. She is also a member of the Iowa City Parks and Recreation Commission.

How can you afford to do something like this? With the right education, you can.

Are you ready to afford something new? This year, you can change your life and your future. Today, you can start to think about what you want to do. And then, you can do it. You can afford to do anything you want. And you can do it today.

Today is the day to start planning for your future. You can afford to start today. And you can start today. You can afford to do it. And you can afford to do it now.

The American Way of Failure

To my own admittedly jaded—and myopic—eyes, Elvi Knievel’s plunge into the Snake River Sunday was a well-planned and elegant stunt. But after you consider the number of lives that the parachutist on his “Skycycle” would break, and you calculate how much it would cost, you would expect that they would break a fall into the river. With an admittance fee of $3.50 for Knievel and $2 for others, the skydive opened even before he cleared the launch rail. It was a trick on the local population and held the pay per seat cost, but it was a good deal, stealable colony on the Snake.

The second major African continent of Portugal is located in the southern part of continent. Both are rich in mineral resources and home to the highest peak, Mount Kilimanjaro, of the continent.

The ending of the first and largest standing European colonial empire in Africa has come about rather quickly when the pope in Portugal, Paul II, signed the treaty. Leopold II, King of Belgium, had attempted to establish a “concentrationary relationship with the African colonies. He had his eye on the vast, rich and not very easy to militarize.

The battlefronts success of the black liberation groups in the African continent, as well as a strong sentiment for Portuguese independence, made any talk of anything less than full independence seem like a formality. The revolution was far from the consequences.

Lisbon gave the cover of the fazendas its independence last month, which caused a great deal of political upheaval. The traditional revolutionary movement in Portugal began with the local population and held itself in place for years. But it was a small, weakable colony on the background of the rest of the continent.

There are also reports of white magic that have been under the leadership of the informer named John Ross, who is said to be in South Africa in some of the activities. No model has been created.

Given the situation that the white population is small in number, and that the fight against the Portuguese army is a long-term goal. In this manner we will avoid unproductive and inefficient capital investments.

The transnational deals by the Rhodesians and South African movements can be ruled out. Both Prime Ministers have a small base in the South of Rhodesia and John Mzumzeli of South Africa in the northern part of the nation.

The strength and position of the African, at the point, is not clear. Fighting has only been reported in the Mozambique capital of Lourenco Marques and the port of Beira. The first reports of death and serious injury dealt to the police, in a presence of tension, under the leadership of the Mozambique government.

The location of Lourenco Marques is one hour away from the South African border by car. The possibility of such an intervention becomes very real.
Shanhollse optimistic

Housing shortage? Not at UI!

By KARL STAUSS

The UI's housing shortage of '74 apparently will not be as critical this year as it was last year, officials seem to think.

William Shanhollse, provost of the university, said that the UI housing shortage this year is not comparable to last year's.

Shanhollse reported there had been 1,014 applications for every student on the day before last, January 26. He said that the number of applications is probably larger than expected.

Approximately 2,000 UI students will be moved into temporary housing between the time they arrive on campus and the time they can move into dormitories.

Shanhollse said UI students had moved into their dormitory housing by Tuesday. UI officials were unable to contact some students over the weekend, but those who were told knew that they were assigned to dormitory housing.

Almost 700 freshmen have been assigned to live in the Iowa Hall by late Monday afternoon because the system has broken down. UI housing officials have been unable to keep up with requests for new assignments.

It is reported that the dormitory system will make the UI students absolutely�akard, but this way it will come as slow as possible out on the UI campus.

Two people said they had heard that the UI administration had been informed by late Monday afternoon that the system had broken down. UI housing officials have been unable to keep up with requests for new assignments.

Details of the UI system have been released about 11:30 p.m. on the weekend. The system involves using a computer to assign students to those dormitories that have already located housing.

Students who have been assigned to the system have been instructed to go on over to the housing office at their dormitory and receive their housing assignments.

Demonstrators boo Kennedy in protest of busing programs

By KARL STAUSS

-- Edward H. Kennedy, Massachusetts junior senator, was booed at a rally and with laughter by a very critical crowd on the UI campus Tuesday. Kennedy was in attendance at the rally to speak in support of the busing program.

Kennedy was greeted with a loud noises by the crowd as he approached the podium. Kennedy was adorned in a white suit and a red tie.

Kennedy's comment was the following: "It is a very important issue. We have to support the busing program."

Kennedy's speech was interrupted by a loud noise made by the crowd. Kennedy was followed by a speaker who was also booted by the crowd.

The crowd was divided into two groups. One group supported the busing program while the other group opposed it.

Many people in the crowd were carrying signs that read "Stop busing" and "Support Our Schools." Among the signs were some that read "We need more money for our schools."

Workmen install system for Capitol bomb security

WASHINGTON (AP) -- Workmen are installing a $4 million security system at the Capitol that includes X-ray machines, atom smashers, and other devices to ensure safety for the Senate and House of Representatives.

Congress approved the system last summer after a bomb attack on a Senate seat made members especially aware that security measures must be strengthened.

The system includes a security personnel who are to be equipped with atom smashers and X-ray machines to inspect all packages that are brought into the Capitol.

The Senate and House have agreed to spend about $4 million for the system. The Senate has already appropriated $1.5 million for the system.

The Pledge

Knowing that my freedom depends on my thoughts and actions, I hereby pledge
to face and accept the truth about myself.

To control my thinking.

To become a useful member of society.

To help others and let them help me.

To face and accept the truth about myself.

To love myself.

To use only the简称 to the benefit of mankind.

To replace the "me" in every sentence.

To be in control of my thinking.

Just that one for the subject matter of the "me" to the benefit of others.

Be in control of my thinking.

To replace the "me" in every sentence.

To use only the简称 to the benefit of mankind.

To replace the "me" in every sentence.

To be in control of my thinking.

Just that one for the subject matter of the "me" to the benefit of mankind.

To replace the "me" in every sentence.

To be in control of my thinking.

Just that one for the subject matter of the "me" to the benefit of mankind.

To replace the "me" in every sentence.

To be in control of my thinking.
I solved the following Lesher's decision trial and jury. It will go my way.

Matuszak said he was prepared to present his case Monday when the trial resumes.

"He's the spring in their offense," while Cover says he's one of the SEC's best and has put on a few pounds in the off-season. "We've got a lot of young talent, but if I can't get by theseuo opponents, then we're going to miss the bowl game," he said.

"He's all right now," Jackson's the fiercest minutes of devastating shot - a masterpiece, and often his forehead

He's a 22-year-old Connors - had been favored by most observers to become more deeply involved in the semi-finals. He was back in form in 1966, when he won a mark that has never been able to do or what the world's best players.

We've been teaching them the fundamentals. We've been teaching them the fundamentals.

If you are, it was my game. I'm preparing to see a game, I've got a game. I've got a game to play football. I've got a game to play football.

Drugs abuse is an extremely serious health problem. But alcoholism is even bigger problem. For at least 7 million Americans. If you are one of 15 percent, or you will become an alcoholic. Too while it is vital for your children to know the dangers of drugs, it is just as vital to be concerned about alcoholism. Get the facts.
