Regents okay faculty salary boost

By Chuck Hawkins

The president of the University of California system was on hand for the announcement Friday evening that faculty salaries at the nine-campus university system would be boosted by 3.5 percent.

The salary increase, which is the first in two years, is the largest increase since 1972, when the system had a 5 percent increase.

The increase, which was announced Friday, will affect more than 16,000 faculty members across the nine campuses.

The increase is the result of negotiations between the university and the California Faculty Association (CFA), the union representing the faculty.

The negotiations were held over a period of several months, and the final agreement was reached last week.

The raise, which will go into effect in July, will bring the total cost of the raise to around $600 million over three years, the university said.

The raise is intended to help retain and attract faculty members, who have been facing increased competition from other institutions.

The university said it had also agreed to fund a new program to support high-achieving students, who are often at risk of leaving college.

The program, which will be called the "Cal Promise," is expected to provide $200 million over four years to support students who are from low-income families.

The university said it was also working on a plan to increase the number of full-time faculty members, who are more likely to stay in their jobs long-term.

The university said it was also committed to increasing diversity and inclusion on its campuses, and it had agreed to spend $50 million over four years to support diversity initiatives.

The university said it was also working on a plan to increase the number of full-time faculty members, who are more likely to stay in their jobs long-term.

Regents approve $114,140 increase in financial aid for UI students

This year's $114,140 increase in financial aid for students at the University of Iowa was approved by the Board of Regents on Monday just prior to adjournment. The increase will not only provide additional funds for students already enrolled but also allow the university to provide financial aid to those who need it who did not previously qualify.

Compromised consumer bill

Law panel discusses credit code

By Linda Schuppens
Staff Writer

A group comprised mainly of lawyers and bankers met at the Iowa-Clinton Inn yesterday to hear a panel of lawyers explain the Iowa Consumer Credit Code, passed by the Iowa legislators last March. The code is designed to protect and regulate transactions defined as "consumer credit transactions." These are transactions involving the lending of money or credit for personal, family, or agricultural purposes. The bill was a compromise "tended to give everyone something and to take something away from everyone who didn't want it," according to an Iowa-Clinton Inn spokesman.

The code is designed to set up a process to be followed in case a creditor has a complaint against a debtor. It's all part of a package of consumer protection bills aimed to protect the public from being cheated or defrauded. The code was designed to prevent credit transactions from being "one way" deals and to make sure consumers are treated fairly.

Legislation for a consumer protection bill was introduced in the Iowa legislature last March. The code was adopted as part of a larger consumer protection bill which was aimed to prevent credit transactions from being one-way deals and to make sure consumers are treated fairly. The code was designed to prevent credit transactions from being "one way" deals and to make sure consumers are treated fairly.

Habit alteration through hypnosis depends on rapport, self-honesty

By Robert Moore
Staff Writer

A new technique of habit alteration using hypnosis is being developed by a group of psychologists at the University of Iowa. The technique, called "hypnotherapy," is designed to help people overcome bad habits such as smoking or overeating.

The technique involves the use of a special type of hypnosis known as "subliminal hypnosis." This type of hypnosis is used to suggest to the patient that they are in a relaxed state and can be more receptive to suggestions. The patient is then given a series of suggestions that are designed to change their behavior.

According to the psychologists, the effectiveness of the technique depends on the rapport between the patient and the hypnotist. If the patient does not feel comfortable with the hypnotist, the technique is unlikely to work.

The technique is being used to help people overcome a variety of bad habits, including smoking, overeating, and alcoholism. The psychologists believe that the technique has the potential to be a very powerful tool in the fight against bad habits.

The technique is currently being tested in a number of clinical settings, including hospitals and clinics. The psychologists are optimistic about the potential of the technique and believe that it has the potential to be a very powerful tool in the fight against bad habits.

New utility rate increase sought by Iowa-Illinois

By John Harper
Staff Writer

A new utility rate increase sought by Iowa-Illinois Gas and Electric Company, which supplies services in the Iowa City area, has been ruled by the Iowa State Commerce Commission as fair. The increase, which would amount to a rate increase of $10,000, would be passed on to customers as an increase in their monthly bills.

The increase would be used to help cover the costs of operating the company's facilities and to help pay for the company's future growth.

The Iowa State Commerce Commission is currently reviewing the request for the rate increase. The commission will hold a public hearing on the request and will consider the testimony of customers and the company before making a decision.

The company has been working to keep rates as low as possible for its customers and has been working to keep its costs as low as possible.

The company has been working to keep rates as low as possible for its customers and has been working to keep its costs as low as possible.

The company has been working to keep rates as low as possible for its customers and has been working to keep its costs as low as possible.

**On the Smoking of CAMBUS**

Because of recent incidents or should I say accidents and concerns related to smoking in CAMBUS, there is a notable change in the smoking policy within the CAMBUS building. Although individual utensils such as pipes and cigars are gradually becoming more popular among some students, they are not allowed within the CAMBUS premises. This policy is being implemented to ensure a smoke-free environment, reducing the risk of fire hazards and improving air quality.

It's important to note that students who smoke must find alternative locations to smoke. For those who require smoking-related services, CAMBUS can provide guidance on locating appropriate smoking areas outside the building. By following this new policy, we can maintain a clean and healthy environment for everyone.

**The Jewish New Year**

To the Editor:

I was interested in Mr. Simon's article, "The High Holidays," which appeared in the Sept. 18, 1901 issue of the Dally Iowan. Mr. Simon's exploration of the traditions and symbols associated with the first day of Rosh Hashanah, the Jewish New Year, provided a fascinating insight into the holiday's historical and cultural significance.

Mr. Simon's article highlighted the importance of cherished family traditions and the significance of temple rituals. It also underscored the deeper spiritual messages conveyed through the holiday's annual events. The holiday's themes of renewal and redemption resonate with people of diverse backgrounds, making it a universal experience.

I am grateful for Mr. Simon's thought-provoking analysis and would encourage other readers to appreciate the rich tapestry of Jewish culture and tradition.

Sincerely,

[Signature]

**Letters**

Mr. Simon's article "The High Holidays" was educational and informative. As a reader, I was drawn into the complexities and nuances of Jewish holidays. I particularly appreciated the integration of historical and cultural contexts.

It's fascinating to consider how the celebration of Rosh Hashanah has evolved over time, reflecting the diverse experiences and perspectives of Jewish communities worldwide. The holiday serves as a reminder of our shared heritage and the importance of maintaining our cultural traditions.

I look forward to further discussions and explorations of Jewish culture in future articles by Mr. Simon.
Kraft prepares to handle city demand problems.

Dear Mayor Wells,

I am writing to express my concern regarding the recent decision to approve the land development project in Iowa City. I understand that the city council has approved the preliminary study design on a residential development project. However, I believe the city council has not considered all the implications of this decision.

As a community member, I believe it is important to ensure that the development project aligns with the community's needs and values. I understand that the project is intended to provide new housing options, but I am concerned about the potential impact on the existing community.

I am particularly concerned about the potential displacement of existing residents. As an active member of the community, I have observed the positive impact of long-term residents on the community's character and vibrancy. I believe it is important to protect the interests of current residents and ensure that new residents are respectful of the community's culture and values.

I urge the city council to consider the following points:

1. Conduct a thorough environmental assessment to evaluate the potential impact of the project on the existing community.
2. Engage with community members to gather feedback on their concerns and preferences.
3. Ensure that the project aligns with the city's comprehensive plan and zoning regulations.
4. Consider alternative solutions that may address the housing needs of the community without necessitating the displacement of existing residents.

I appreciate the city's commitment to growth and development, but I believe it is important to balance these goals with the protection of the existing community. I urge the city council to carefully consider these points before making a final decision.

Sincerely,

[Your Name]

The blind can do anything you can do

By PAUL MEYER
Special to the Daily Iowan

The following article is intended to inform people that, while there are obstacles, the blind can do anything that a nonblind person can do.

Don’t Bolt, Don’t

Somebody once pulled me into a restaurant without my permission. I was seated, without a prior contact with him, and he was assigned a seat at the table where I was seating. I took the seat, which would be the normal thing to do, and he said, “I am not asking you to leave this seat because I am a blind person and I am capable of that position. I am asking you to leave this seat because you are a normal person and I am a blind person. I am telling you to leave this seat because I am a blind person and you are a normal person.”

But the blind can do anything you can do.

Don’t Bolt, Don’t

Hawks upset mighty Bruins 21-10!

QB Dan Dalziel threw four touchdown passes, all to wide receivers, and ran for one as Iowa rolled to a 21-10 victory over the Bruins.

The Bruins, who entered the game as the top-ranked team in the country, were upset by the Hawkeyes, who had been struggling all season. The game was close early on, but Iowa took control in the second half and never looked back.

Iowa finished the season 7-5, while the Bruins finished 9-3.

It was a huge day for Iowa receiver James Jensen, who caught three passes for 100 yards and a touchdown.

In the locker room afterward, Iowa coach Jim Boeheim said, "This is a huge win for our program. We've been working hard all season, and this is the payoff."

The Hawkeyes will now prepare for the Big Ten Conference Championship, where they will face either Michigan or Ohio State.

"We need to focus on our preparation for the conference championship," Boeheim said. "We have a lot of work to do, but we're ready for the challenge."
Field Hockey

Iowa's field hockey team has had to adjust to the loss of Illa Janke, who graduated and will compete abroad next year. "It's been a couple of weeks since she left and I'm already feeling the loss of her leadership," head coach Mary Foster said.

The Hawkeyes played Michigan on Saturday in their first home game of the year. They won 4-2.

The point finally came on an offensive player passing the ball to another offensive player from the opponent's end-line when one remained a sharp pass and slipped the ball by the Michigan goalie. That goal on the 11th followed a slight breakdown in the second half of the game, putting Iowa in the lead with a score of 2-0 as early as the second half. Wood and Mary Foster scored in the first 20 minutes of the game.

The Iowa defense was solid as taking the 15 team, eight state event. totaling 939 strokes among their 185 this year; a 32 stroke improvement from last year's squad, who had scored 1,321.

Sophomore Jayla Haney, a freshman from Knoxville, scored in the first 11 minutes of the game by passing the ball from the left wing. Wood and Mary Foster scored in the first 20 minutes of the game.

For the past 12 matches, Iowa improved its defense, allowing a total of 44 goals in 12 games. Iowa improved considerably since last year when the Hawkeyes allowed 52 strokes.

Part of Iowa's problem with the championship flight is its ability to score goals. Iowa has scored only 11 goals in 12 games, which is not enough to win.

The Hawkeyes had been on a winning streak in the Midwestern Conference before last weekend's loss to Ohio State.

Iowa's Jay Sheldon was the runner-up in the Midwest and No. 2 on the team, said, comes from hard work. "I'm happy with the progress we made over the past few weeks," Sheldon said. "We're looking forward to the next game against Michigan." Sheldon has scored 11 goals in 12 matches this season.

Iowa's cross-country team has also been improving. "We're getting there," said head coach Kris Clark. "We have a couple of weeks left to work on our fitness and technique." Clark pointed out that the team has been working hard on their pacing and stride.

The team is currently ranked 7th in the Midwest Conference and 27th in the nation.

Iowa's track and field team has also been making progress. "We're seeing some improvement," said head coach Gary Bumstead. "We have a few more weeks left to work on our form and technique." Bumstead pointed out that the team has been working hard on their pacing and stride.

The team is currently ranked 18th in the Midwest Conference and 50th in the nation.

Iowa's soccer team has also been making progress. "We're seeing some improvement," said head coach John O'Reilly. "We have a few more weeks left to work on our form and technique." O'Reilly pointed out that the team has been working hard on their pacing and stride.

The team is currently ranked 10th in the Midwest Conference and 100th in the nation.

Iowa's volleyball team has also been making progress. "We're seeing some improvement," said head coach Gary Bumstead. "We have a few more weeks left to work on our form and technique." Bumstead pointed out that the team has been working hard on their pacing and stride.

The team is currently ranked 18th in the Midwest Conference and 50th in the nation.

Iowa's tennis team has also been making progress. "We're seeing some improvement," said head coach Gary Bumstead. "We have a few more weeks left to work on our form and technique." Bumstead pointed out that the team has been working hard on their pacing and stride.

The team is currently ranked 10th in the Midwest Conference and 100th in the nation.
