Greer: "fascist" birth control

BY STEVEN FRIEDLAND

The United States and Japan pledged themselves to

"a rational use of world resources," the Department of State said.

"We believe," said Secretary of State Henry Kissinger, "that

the United States should cooperate with Japan in this regard." The

Department of State added that the United States is willing to

consider "any proposal" for a "new era of cooperation".

The Department of State further stated that the United States

welcomes Japan's "constructive role" in international affairs.

A Department of State official said that Japan's "constructive role"

could be "facilitated" by the United States.

The Department of State also noted that Japan has made "positive contributions" to international affairs.

The Department of State concluded that "the United States looks forward to working closely with Japan in the future."
Planning Board votes to send delegation to DOT public hearing

By CONNIE JENNES

The Johnson County Regional Planning Commis-

sion (JCRPC) voted Wed-

nesday night to send a

delegation of five mem-

bers to the Department of Transportation (DOT)

public hearing in Des Moines Saturday to submit

JCRPC recommendations concerning proposed

DOT policies.

The DOT had submitted con-

sequently that there

A new openness in schools

Buckley law may change attitudes

By CHEC KARWINS

WASHINGTON (AP) - The Washington Post, which reported yesterday that an attorney for Robert B. Nixon has told his wife about the investigation, is reporting that the investigation of the break-in to the Democratic National Committee headquarters in November 1972 will be reopened.

James Buckley told his wife, said Nixon, that his press secretary, Nixon and Haldeman and Ehrlichman warned them from talking to the press.

A new openness in the mentality of such data collection has to be changed.

By the end of the student psychiatric files, and hence, be accessible to students. The release of such information, though, most psychiatrists would argue, is not always in the best interests of the student.

Another example is the Buckley amendment still pending in the Senate. Buckley amendment still pending in the Senate, Education and Welfare Office of Education is designed to help nearly all the student data they are aware of it, you were aware that was going on, you say that our purpose was to keep the student psychiatric files.

Nixon was interviewed and asked many In the near future.

Buckley amendment still pending in the Senate, Education and Welfare Office of Education is designed to help nearly all the student data they are aware of it, you were aware that was going on, you say that our purpose was to keep the student psychiatric files.

Majority of Students Favor
Incremental Federal Aid to the Arts

Art is making the best of the "artistic" qualifications in the Iowa City area. This week's work fulfills the need to make available to students, and to the enemy who was unable to provide, an increasing number of the most above-the-standard works of art. However, it is not to be supposed that the majority of students favor the current incremental federal aid to the arts.

According to a survey of 1,100 students, conducted by the Daily Iowan, 65% of the students favor incremental federal aid to the arts, while 35% are against it. The students were asked the following question: "Do you favor or oppose incremental federal aid to the arts?"

Survey Results:
- Favor: 65%
- Oppose: 35%

The survey was conducted among college students at the University of Iowa and the University of Iowa at Iowa City. The results indicate a significant favor among students for incremental federal aid to the arts, which is crucial for the development and preservation of the arts in the area.

Letters to the Editor

Ford Recalls GI Bill

To the Editor:

President Ford has threatened to veto any legislation that would reduce the benefits of the GI Bill for education. The GI Bill has been a lifeline to many veterans, providing them with the opportunity to continue their education and improve their future prospects.

The GI Bill was enacted in 1944, during the Second World War, to help veterans transition from military service to civilian life. It has been a critical tool for many veterans, allowing them to pursue higher education and careers.

The GI Bill has been a subject of controversy and debate over the years, with some arguing that it is too generous and others believe it is too inadequate.

In his veto threat, President Ford stated that the current GI Bill provisions are "unjustified" and that "the current system is increasingly expensive and less responsive to the needs of our veterans." Ford also criticized the GI Bill for "providing education benefits to a small percentage of the veteran population."

The GI Bill is a complex and multifaceted program, and any changes to it must be carefully considered to ensure that it continues to serve its intended purpose.

Brady Simmons

"Glitter Rock..."

To the Editor:

Mayhem and destruction are not what we expect as the result of "Glitter Rock...". The event was a celebration of music, art, and community. However, the "Glitter Rock..." event left a dark shadow over the community.

The "Glitter Rock..." event was a music festival that took place in the heart of the city. It was a celebration of music, art, and community. However, the event was marred by violence and destruction.

The event began with a peaceful rally, where people gathered to celebrate music and art. However, as the event progressed, violence and destruction became the norm.

People were seen vandalizing property, and there were reports of people carrying weapons. The event was a disaster, and it left a lasting impact on the community.

In conclusion, "Glitter Rock..." was a disaster, and it serves as a reminder of the importance of maintaining peaceful and respectful events.

Ken Blanchard

Dope

To the Editor:

The term "dope" is loaded with negative connotations. It often refers to illegal drugs and their use, and it can also be associated with ignorance and poverty.

However, the term is not without its positive associations. In some cultures, the use of certain plants and substances is considered to have medicinal or spiritual benefits. In these contexts, the term "dope" can refer to these positive associations.

In conclusion, the term "dope" has both negative and positive connotations, and it is important to consider the context in which it is used.

Jim W. Magnee

Stormy Response

To the Editor:

The "Stormy Response" event was a protest against the "Glitter Rock..." event. It was a peaceful protest, with people holding signs and expressing their grievances.

The protest was held in response to the violence and destruction that occurred during the "Glitter Rock..." event. People were calling for a return to peaceful and respectful events.

In conclusion, the "Stormy Response" event was a peaceful protest, and it serves as a reminder of the importance of maintaining peaceful and respectful events.

Hope to end monopoly
Suit filed against AT&T

WASHINGTON (AP) — The government filed a suit Wednesday to break up the American Telephone and Telegraph Co. as an allegedly illegal monopoly, seeking control of the company's voice and data communications industry.

The Justice Department said it filed a suit under antitrust laws to end what was called a "conglomerate" or AT&T's activities. The company was designed and developed at Bell Laboratories, owned partly by AT&T and Western Electric.

"We are not trying to put any company out of business. We are trying to divide the company into two parts," said Justice Department officials and the president of the Bell System.

The suit is the world's largest antitrust action and is the second time in a year that the company has been asked to divest itself of major parts of its business.

AT&T's representatives around the country deplored the move, saying it would cost them dearly.

The move was aimed at preserving the voice communications system, which is controlled by AT&T, with total assets exceeding $10 billion. The suits would make it a "double monopoly," they said.

The Justice Department's suit was filed in a federal court in New York, where the company's headquarters are located.

House votes to override Information Act veto

WASHINGTON (AP) — The House voted overwhelmingly Thursday to override President Ford's veto, thereby enacting the Freedom of Information Act and helping the handicapped.

The measure, which was backed by both houses of Congress, cleared the Senate on Wednesday evening. The president vetoed it, saying it would "compromise" the secrecy of the nation's telephone and communications networks.

The court also was asked to overturn Ford's veto of the "Big Idea" that seeks a court order requiring the nation's largest corporation to publish its telephone directory.

By a 398-7 vote, the House rejected Ford's veto of the "Big Idea" that seeks a court order requiring the nation's largest corporation to publish its telephone directory.

The seven White House supporters were either retiring at the end of the session or filing for reelection.

Ford refused to recognize the court order, saying it would "compromise" the secrecy of the nation's largest corporation.

In other major congressional action:

- The Senate Finance Committee approved a bill that would cut taxes on American companies doing business overseas.

- The Senate Government Operations Committee approved a bill that would make it easier for private individuals to sue the government.

- The Senate Armed Services Committee approved a bill that would make it easier for the government to sell surplus weapons to private individuals.

- The Senate Labor and Public Welfare Committee approved a bill that would make it easier for the government to provide public housing.

- The Senate Foreign Relations Committee approved a bill that would make it easier for the government to sell surplus arms to private individuals.

- The Senate Interior and Insular Affairs Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Agriculture Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Appropriations Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Veterans' Affairs Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Education and Labor Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Commerce Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Banking and Currency Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Armed Services Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Interior and Insular Affairs Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.

- The Senate Agriculture Committee approved a bill that would make it easier for the government to sell surplus food to private individuals.
Buckeyes must win for Rose Bowl election time once again

By DAVE MCD 9

Sports Writer

Ohio State and Michigan could not have met under more dramatic circumstances. Buckeyes head coach Earle Elliot said that he and the Michigan coaches will meet in the game of the century. Ohio State will have to go to Columbus if it wants to win the Big Ten title. The Volunteers hold second place in the conference, but Ohio State has a head-to-head win over Tennessee.

The Buckeyes are favored in this game, but Michigan is not an easy team to beat. Michigan has won the last two meetings, and the Buckeyes lost to Ohio State in Columbus last year. Elliot said that although Ohio State won the first meeting, Michigan is a better team this year.

"We know that we have to play our best in this game," Elliot said. "Michigan is a tough team, and we have to be ready for anything."

The Buckeyes have 10-0 record and are ranked number one in the nation. Michigan is ranked number two.

"It's a big game, and we have to play our best," said Michigan coach Lloyd Carr. "We know that we have to win this game to have a chance of winning the conference championship."

The game is expected to be a high-scoring affair with both teams averaging more than 40 points per game. The Buckeyes are led by quarterback Tate Martell, who has thrown for 3,000 yards and 30 touchdowns. Michigan quarterback Shea Patterson has thrown for 2,800 yards and 27 touchdowns.

The Buckeyes have a strong running game with running back J.K. Dobbins, who has rushed for 1,200 yards and 12 touchdowns. Michigan has a solid running game with running back Hassan Haskins, who has rushed for 1,100 yards and 12 touchdowns.

The Ohio State defense is led by linebacker Nick Bosa, who has 11 sacks and 15 tackles for loss. Michigan's defense is led by linebacker Michael Barrett, who has 10 sacks and 13 tackles for loss.

The game is expected to be a close one, and it will be decided by which team can make the big plays. The Buckeyes have a slight edge in offense, but Michigan has the edge in defense.

"I think it's going to be a close game," Elliot said. "We have to play our best, and we have to make the big plays."
First time one travels to Jupiter, via Kubrick and HAL, the detectors aboard the spacecraft. as the central computer across a half-billion miles of space to Earth, where will fly to the west coast next week to monitor the atmosphere. Louis Frank is a co-investigator in this experiment. Professor James Van Allen was the first to propose using such missions to study physics, but only one of his experiments was successful. Dave has written a computer program which will instruct the computer prints out. To try to learn more about the way these sun's influences the motion of charged particles contained in the magnetosphere as deeply as spacecraft diffusing through Jupiter's moons, whose orbits lie inside 11 nears its December 2-3 rendezvous with the planet. It will be very interesting to see the way these phenomena are to be studied. The Pioneer 11 spacecraft, and with two scenes illustrated with the geiger tubes as the energy and-or intensity of the particles varied, then the computer would have to be programmed to tell the spacecraft what to do. By November 2, 1973, the experiment was completed. The probability of an energetic particle having survived the journey is very small, but the energy it would have to have is very high. The peak velocity of the spacecraft near Jupiter is 200 million miles per hour. It overwhelms the atmosphere. The velocity of some of the members of the Department of Physics, theoretical physicists, and one of the leading computer scientists in the world. Sailor by Mark Kramer is beautiful.

If playwrighting graduate Kinsey's greatest strength is a work of originality and poetry, "The Play is always musical" (reflects) its the mood of its people who have to make

ing a very funny.

It's a "laughing story of" Joseph Smith, a prophet of the Latter Days and founder of the Mormon Church. This may sound dull, but it isn't. He turns the story where he's born and

almost to be gods in the hereafter. "But the Mormons that survive want to: Harris starts howling and frothing at the mouth: Joseph Creeps up tentatively: Harris starts howling and frothing at

this. He finally says, "I'm going to be a prophet of the Latter Days and founder of the Mormon Church." This may sound dull, but it's fun. The humor is sharp, the acting is of a high order. The

Mormon Church is almost the right person at the moment. The city of New York, the kind of individual that people

is almost the right person at
