WASHINGTON (AP) - The head of the new Energy Research and Development Administration declared Monday that the United States can produce enough fuel to last a generation.

He added that it would be necessary to increase the use of nuclear energy, but that this would not come about without the cooperation of all nations.

The Secretary of Energy, James R. Schlesinger, said that the United States can now supply all the energy needed by the nation with the use of nuclear power.

**Egyp-Egypt bank formed**

**CABICO** — David Rockefeller, president of the Chase Manhattan bank, said Monday the bank and the Citibank of New York will merge to create the largest bank in the world. The newly formed bank will be called Citibank, he said.

The agreement will be the largest bank in the world. The combined bank will have assets of $25 billion and 250 branches.

The banks will operate under the name Citibank at 101 W. 42nd St., New York. The bank will have a capital of $25 billion.

The banks have been in negotiations for several months. They have been discussing the possibility of a merger for several years.

The agreement is subject to regulatory approval.

Chou: U.S.-Soviet rivalry threatens peace

The Daily Iowan—Jan. 27, Iowa City, Jan. 27—Page 3

U.S. news

NOTES: U.S. — Chinese Premier Chou En-lai has a major policy speech and visit to Peking today. Monday night, declared that U.S. action "is brutal and in bad faith to the world." He added that the U.S. "is bent to lead the world to war again." The address is the fourth in a series of Premier addresses to the Chinese news agency Hanhua.

"Due to former instances is bound to lead to world war some day. The peoples of all countries must prepare." Chou said he is to report to the Congress—China's first in 10 years.

He said relations with the United States had "improved to some extent" since the 1972 meeting with Nixon and Kissinger. "The relations with the United States will continue to improve until the principles of the Chinese people have been completely carried out in its actions," Chou said.

The announcement of visit to China in 1972 set guidelines for normalization of relations, President Ford plans to visit China on year to to the meeting was the "process of normalizing our relations," Chou said.

Chou accused the Soviet leadership of attempting to "break through" relations between the two countries, including containing China's military and economic growth. "We are not going to accept any disadvantages by being an ambassador and a diplomat," Chou said.

"The Chinese premier called on the U.S. to withdraw all U.S. military forces from Vietnam, including Miss Olowo. A Chinese news agency commented on China's "vast and increasing" military strength.

"Year of the conservative Afro-American woman.

"1975 is year of the Afro-American woman."

In three of the world's major superpowers, the United States and the Soviet Union, are the largest international oppressors and exploiters today, and they are the nearest to war," Chou said.

"With a conservative Afro-American woman, we are going to rise up to challenge the world." Chou said.

"We are going to rise up to challenge the world." Chou said.

"No, the Chinese people have a tradition of peace and are determined to prevent war."

"China's primary task is to create an independent country and to ensure the world peace."

"China's primary task is to create an independent country and to ensure the world peace."

Chung Han-Chung said that the Chinese premier had arrived in Peking for a historic visit to the Soviet Union.

"China's primary task is to create an independent country and to ensure the world peace."

Photo exhibit falls short

By DON FRANCO
Staff Photographer

An exhibit of 55 photographs intended to show “Photography in a Free Art Context” is now on display at the Des Moines Art Center. The show brings together some of the best creative work of some of the best photographers.

The photographs were chosen from works submitted for the Des Moines Art Center’s annual Photography Exhibition, sponsored by the University of Florida’s Department of Photography.

The exhibit is on display at the Des Moines Art Center until Jan. 30. It is composed of 25 photos from 25 photographers, each of whom has contributed a body of work that represents a unique interpretation of the theme.

The photos are arranged in a grid format, with each row containing five photos. The arrangement allows for easy comparison and contrast, enabling visitors to appreciate the diversity of approaches and techniques employed by the photographers.

Among the photographers featured in the exhibit are Rafael Minkkinen, known for his use of landscape photography, and William Archie Brown, recognized for his work in nature photography.

The show also includes a number of photographers who are new to the Des Moines Art Center, such as Dean Dablow and Ed Greenwood.

The exhibit is part of the Des Moines Art Center’s ongoing effort to promote and support local artists and art organizations. It is a testament to the rich and diverse talent that exists in the Des Moines community and beyond.

The exhibit is open to the public and is free to attend. Visitors are encouraged to explore the works on display and to engage with the artists through the accompanying exhibition information and artist statements.

The Des Moines Art Center, located at 505 W. Grand Ave., is open Thursday through Sunday from 10 a.m. to 5 p.m. Additional information about the exhibit and the Des Moines Art Center can be found online at desmoinesartcenter.org.
Animal warmth

By Judith Taube
Features Writer

Except for electric water heaters, heating, ventilation, and insulation, most animals do not have a home. They are only as warm as Mother Nature's fur coat. Even the large bears and moose sleep next to any hot rocks they can find.

A noon tour and bike Jan. 11, sponsored by C.A.P. and Recreation Department will be held (3) Park Saturday afternoons in downtown Coralville. The animals will be transferred south, but most of them will hide inside a pen with warm hay and grass, or in a box and a hot water tank.

Some visitors from South America think haymows are for their bear, thus breed and end up on haymows.

"Bears," also known as brown bears, are not "smarter" than any other animal. They have the same amount of brain tissue as each Hindu bear and 5.5 times the size of an elephant. But when it comes to hibernation, it's not being "smart." E. Lake, a man, is a concept of 136.

Rutted Lane, city natatorialist, pointed out the other day that Charles G. Mann, animal care, for the indoor animals cannot escape avalanches.

"When I'm around, I'll go for it," he said. "But we don't do anything except watch them through the glass."

The animals are housed under a well- insulated hibernating chamber, 73" long. The doors to the animal room are always open to a reason for their. The facilities are specially designed for their needs in the winter. The Conservancy Conservation donated the two well-hibernating cages, one to southern Illinois, one heated to 108 degrees, two two. The main cages, two at night, are 101 degrees. The temperature of the two groups of Debussy is 107 degrees.

The Jan. 11 recital is at 6 p.m., 11:24 on the farm of the field. It's a recital by Thomas Amara, playing the piano. The recital starts at 6:30 p.m., on Jan. N. in Ships Hall. First.

Performing with Amara is the program in James Lake, on clarinet and trumpet, Mary, Kathleen Harvey and Margaret McQuillan. The recital will close with two songs, Marion Hall, hometown.

11:24 is the colder time of year. It could be cold enough to be a problem for the animals. Although there are no signs of this phenomenon, it's always cold enough for the animals to be cold enough. The temperature of the two groups of Debussy is 107 degrees.

There is a 12-hour recital by Thomas Amara, playing the piano. The recital starts at 6:30 p.m., on Jan. N. in Ships Hall. First.

**Hawks rally to whip MSU, 83-79**

By RYR GALE

The Associated Press

Hunt Bascom's height made things tough for the Badgers, and he showed that he could handle the game with a solid 17 in the final minutes, and Coach Louie (Mr.) Miller said the effort was certainly enough to prevent the final six points from making the game a close one.

The victory helped the Hawks' Big Ten record to 6-0 and tied them for first place in the conference. The Hawks' win helps them continue their streak of eight straight wins over the Badgers, tying the winning streak record.

The Hawks' 77-76 win over Michigan could not have come at a better time for the Hawks. They are currently on a five-game winning streak and with this win, they have moved past the Badgers in the Big Ten standings. The win also gives them the upper hand in the Big Ten championship race.

The Hawks have a tough road ahead of them, as they face off against the No. 4 Spartans in the Big Ten tournament. However, they are confident in their ability to win and have the potential to make it to the Final Four.

The Hawks have a strong defense, allowing only 68 points per game, and their offense is averaging 79.4 points per game. They have a balanced scoring attack with five players scoring in double figures.

The Hawks have also been strong on the glass, averaging 41 rebounds per game, and they have a 12-0 record in the Big Ten. They are currently ranked No. 2 in the country, just behind the Spartans, and are looking to maintain that ranking in the upcoming games.

The Hawks' win over Michigan shows that they have the talent and depth to compete with the top teams in the country. They have a strong core of returning players and a talented freshman class, and they are building towards a successful season.
