MURDER VICTIM IDENTIFIED; not from Iowa City area

Oakdale employees react to Grand Jury conclusions

By MALDONADO

First at a

Concerted pressure from the Iowa Security Medical Facility (ISMF, at Oakdale, and the Westlaw Ante facility, a combination of both the employees of the Johnson County Grand Jury, and tenants of Oakdale, has been building up to the point of collapse. During the past five years, the facility's size has increased from 10 to 23 patients, while the number of suicides has skyrocketed from 10 to 34. In this period, the facility has renovated three times and added new treatment programs, but the facility has not been able to provide adequate care for its patients.

The most recent suicide occurred on June 1, when Donald Johnson, a 10-year-old, hanged himself with a rope in the center of the facility's roof. "He was the most promising patient we had," said Dr. John Smith, the facility's medical director. "We had just started him on a new medication that seemed to be working, but he suddenly became unresponsive. We tried to revive him, but it was too late." The facility has not released any information about the suicide, but sources indicate that Johnson had been struggling with depression and anxiety.

The facility has been under increasing scrutiny in recent years, with several incidents of patient suicides, malpractice suits, and allegations of neglect. In 2010, the facility was temporarily closed following the death of a patient who had been left unattended for several hours. In 2012, the facility was accused of failing to provide adequate care for a patient who had been left to die while undergoing a surgical procedure.

The facility's response to these incidents has been criticized as inadequate. "The facility's leaders have been playing politics with this issue," said Dr. Jane Doe, a former employee of the facility. "They have been more concerned with their own reputations than with the safety of their patients."

The facility's administrators have denied any wrongdoing, saying that the facility has been doing everything possible to provide the best care for its patients. "We have been working hard to improve the facility's practices," said Dr. Smith. "We have invested millions of dollars in new equipment and training for our staff."

However, many patients and their families have expressed frustration with the facility's response. "They keep telling us that they're doing everything they can, but it's not good enough," said Mary Smith, whose son has been a patient at the facility. "They need to do more to prevent these tragedies from happening again."

The facility's leaders have been under pressure to make changes, but they have been slow to act. "They keep saying that they're going to do things differently, but it never happens," said Doe. "They need to take the situation more seriously and make real changes."

The facility's leaders have been contacted for comment, but they have not responded.

JCRPC

The leadership of the Johnson County Jail is scheduled to meet with the Oakdale employees on Thursday to discuss the facility's response to the Grand Jury's conclusions. The employees have been calling for more changes at the facility, including increased oversight, more staff, and better training for employees.

The facility's administrators have said that they are committed to improving the facility's practices, but they have not provided any details about what changes they plan to make. "We are taking this report very seriously," said Dr. Smith. "We are committed to doing everything we can to prevent these tragedies from happening again."

The employees have been calling for more concrete changes, such as more staff, better training, and more oversight. "They need to do more than just say that they're going to do things differently," said Doe. "They need to actually make changes."

The facility's leaders have been contacted for comment, but they have not responded.

Taxes

Winnipeg (AP) — The federal government has announced a tax reduction for businesses, effective immediately. The reduction is expected to save businesses $1 billion per year. The government has also announced a new tax credit for businesses that invest in new equipment. The credit is expected to save businesses $500 million per year.

The announcement was made at a press conference in Winnipeg, which was attended by the finance minister and several business leaders. "We are committed to creating a more competitive business environment," said the finance minister. "This tax reduction will help businesses to grow and create jobs." The government has also announced a new tax incentive for businesses that invest in research and development. The incentive is expected to save businesses $250 million per year.

The government has been under pressure to reduce taxes, following a period of economic uncertainty. "We are committed to making the economy more competitive," said the finance minister. "These tax reductions will help businesses to thrive and create jobs." The government has also announced a new tax break for businesses that hire new workers. The break is expected to save businesses $300 million per year.

Utilities

WASHINGTON (AP) — The federal government has announced a new utility program, effective immediately. The program is expected to save consumers $500 million per year. The government has also announced a new utility incentive for businesses that invest in new equipment. The incentive is expected to save businesses $250 million per year.

The announcement was made at a press conference in Washington, which was attended by the energy secretary and several utility leaders. "We are committed to creating a more competitive utility environment," said the energy secretary. "These programs will help businesses and consumers to save money and create jobs." The government has also announced a new utility program for businesses that invest in renewable energy. The program is expected to save businesses $1 billion per year.

The government has been under pressure to reduce utility costs, following a period of economic uncertainty. "We are committed to making the economy more competitive," said the energy secretary. "These programs will help businesses and consumers to save money and create jobs." The government has also announced a new utility incentive for businesses that invest in energy efficiency. The incentive is expected to save businesses $250 million per year.

Cloudy

IOA — Partly cloudy Thursday, highs in the 60s, lows in the 40s. Chance of showers Thursday night, snow showers possible Friday. Highs in the 50s, lows in the 30s. Expect a weekend of calm weather with highs in the 60s and 70s. The weekend offers a great opportunity to enjoy outdoor activities.
Rabin: Israel is aware and ready

City council opposition brewing over Old Capitol renegotiations

By TILLI SERGER
Staff Writer

A most Old Capitol construction counterproposal "Vienna" (located and expected) already expected to be in incorporated into the Old Capitol contract, which is led by Old Capitol's design team, is in favor of the Old Capitol building plans for the city.

The firm, requested the city council to contact the construction project before it arrives on site. The final call from the city council is on April 11, 3:00 pm.

"In its essence in tree block, the city will continue to build the Old Capitol (Old City) of its own volition, " said the mayor. The proposal is intended to resolve current Old Capitol construction issues.

The city council is expected to review the proposal during its next meeting on April 11.

City aldermen traffic of one-way

By TILLI SERGER
Staff Writer

Travel on Washington street between Clinton and Iowa streets will be in the new one-way configuration, the Iowa City Council decided Monday.

Clinton and Iowa streets will function as south and north one-way streets respectively, the council also decided. This will result in pedestrian traffic deviations on Clinton, Iowa, and Washington streets, together with jogging, bicycling traffic on all three streets.

The switch to one-way traffic on Washington street between Clinton street and Iowa street is expected to become permanent in the coming weeks. The street changes are expected to reduce traffic deviations on Clinton, Iowa, and Washington streets, together with jogging, bicycling traffic on all three streets.

Hedge: lobbying efforts belong to CAC

By VALERIE SULLIVAN

The University of Iowa's Student Associated Council (CAC) is the main channel through which student interests are communicated to the Iowa Legislature and the University of Iowa's regents. CAC is a student government umbrella organization that represents all 15,000 students at the University of Iowa.

The CAC is divided into 12 main committees that cover specific issues. These committees are responsible for handling the concerns of their respective student groups. The CAC also has a Senate and an Executive Board, which serve as the legislative and executive branches of the organization, respectively.

The CAC's primary role is to advocate for the rights and interests of students on campus. They work with university administrators, state legislators, and other stakeholders to ensure that student voices are heard in decision-making processes.

In late January, the CAC informed its Senate members of its lobbying efforts for the upcoming legislative session. The CAC will be working on a variety of issues, including Higher Education Appropriations, Educational Funding, University Capital Outlay, UIUC Bond Referendum, and Legislative Priorities for the University.

The CAC is committed to ensuring that the interests of Iowa students are represented in the state Capitol. They will work closely with state lawmakers and university officials to promote policies that benefit students and enhance their educational experience.

By engaging with elected officials and providing input on legislation, the CAC hopes to influence decisions that affect students' lives on campus. With your support, the CAC can continue to advocate for the needs of Iowa students.

Says two groups might conflict

By CHELSEA HARRIS

The Student Government Association (SGA) and the University of Iowa's Student Associated Council (CAC) are both student organizations that represent the interests of students at the University of Iowa. While they share some common goals, there are also some areas of overlap and potential conflict.

One of the main reasons for potential conflict between the SGA and CAC is the overlap in their roles and responsibilities. Both groups are involved in advocating for student interests and providing input on policies and issues that affect students. However, they may have different perspectives and priorities, which can lead to disagreements.

Another area of potential conflict is the allocation of resources and funding. The SGA and CAC may compete for the same funding opportunities, which can lead to tensions if one group feels that they are not getting their fair share.

Overall, the SGA and CAC work together to represent student interests and advocate for policies that benefit students. While there may be some areas of overlap and potential conflict, both groups are essential in ensuring that student voices are heard in decision-making processes.
The UFW Struggle: In the University...

"Time on the Cross": Fascist Revisionism?

by R.D. Rucker

The monopoly capitalists, the ruling classes, are the agents of insecurity. They are attempting, in order to prevent the emergence of a better system of production, to stifle the work of movement to a new form of society. It is a task which, according to Marx, is not the responsibility of the workers, but the responsibility of the intelligentsia.

The UFW struggle is, therefore, an ideological battle. It is true that the UFW, as a syndicalist trade union, is an instrument of the intelligentsia, but the intelligentsia is primarily composed of the ruling classes, whereas the UFW is composed of the working class. The intelligentsia is the weapon of the ruling classes, whereas the UFW is the weapon of the working class.

In the UFW struggle, the intelligentsia is attempting to impose a foreign system of production on the workers, whereas the UFW is attempting to impose the system of production that the workers themselves want.

The UFW struggle is therefore an ideological struggle. It is a struggle to impose the system of production that the workers themselves want, whereas the intelligentsia is attempting to impose a foreign system of production on the workers.

The UFW struggle is an ideological struggle. It is a struggle to impose the system of production that the workers themselves want, whereas the intelligentsia is attempting to impose a foreign system of production on the workers.

Fewer March U-bill cancellations; first decrease since fall 1974

BY KEVIN JENKINS
Reporter

Fewer cancellations for not paying past bills to register in the spring semester were reported to the Daily Iowan by University Billing Office and the Registrar's office.

The Registrar's report indicated the average grade point average (GPA) for students in the fall of 1974 was 2.35; and advanced courses, an average GPA of 2.53; and honors courses, an average GPA of 2.67. These were all higher than in 1975.

The Registrar's report indicated March cancellations for not paying past bills to register in the spring semester was at a higher rate than in the fall of 1974. The cancellations followed the dropping of the bill past due date in December. Students had to pay their bills to register for the spring semester.

The University Registrar's report stated that 875 students had to pay the bill past due date and were barred from registration for the spring semester. This was an increase of 397 over the January 1974 number. Several hundred students had to pay the bill past due date and were barred from registration for the spring semester.

Proving residency: a frustrating ordeal

By VALERIE ESCALON
Bill Duerkson

The case, as Paul Hilder, 18, is proving, is "very much a personal matter." "There's no way a student going to the ideal school is going to be able to claim residency status," said Hilder, a 14-semester resident who, under various conditions, has been attending the University of Illinois for 11 years. Twice he has applied for residency, once in fall 1974 to Assistant Registrar Harold Duerkson and a second time in February in a review of residence status.

"Out of all the factors, the home is the most important," said Hilder, who has been working to see that his residency is confirmed. "But it's a nebulous thing to prove," he said. "You can say they live here, but we can't prove that on a piece of paper."

Citing his student status, Hilder said: "If, after I graduated, I worked in this city, it would probably be a residency. But there's a difference between a student and what they are calling an occu.

The case for students falling this summer, also agreed the Regent guidelines also may have difficulty proving intent. "If a person has been here two years but can't list the city as his home, that would be a problem," said Hilder, who has lived in this city for over 12 months. "It would be difficult to prove." He also cited another problem, that of marriage.

"I'm married, and I've been living with my wife since the fall," said Hilder. "We don't have a big continuous residence. And the questions of who is and who is not eligible for residency status are that fairly must be resolved through the courts.

About 20 per cent of the UI's student body are classified as nonresidents. Of this number, 14 per cent are classified as residents, said Duerkson. Some 8 per cent are classified as "occu" or "nonresidents." According to Duerkson, the number of nonresidents is not expected to decrease.

"There are no officials here when I called to check," Duerkson said. "It's a general question on residency status, and he gets the report on the spot." 

Cuer is clearly from Console and is also a resident of the city. "It's a statistical question," said Duerkson. "In 11 years of residency, I've seen too many situations to answer this one."

Duerkson said that all students are clear except from one nonresident who claimed residency status. "The nonresidents have established residence in the city as a student," said Duerkson. "They are currently in the city, and the city is their home."

"We are studying the(C) and some statistical evidence working at least 14 times a year. As a result of that Curie, he said, "we are staying as residents and are not going to list our home as the city."

"These students have worked to the city, and they are using them," said Hilder. "We are working to resolve this problem." Duerkson said that the courts are still working to resolve this problem.

The case for students who have been here two years but cannot list the city as their home is not expected to decrease. "If a person has been here two years, and he can't list the city as his home, he is considered a nonresident," said Hilder.

"The case for students who have been here two years but cannot list the city as their home is not expected to decrease. "If a person has been here two years, and he can't list the city as his home, he is considered a nonresident," said Hilder. "If there is any way to prove intent, he said, "it should be resolved."
Iowa City in the ’30s: UI cuts back and survives

By ANNE CURTIS

Staff Writer

This is the second of four articles.

January first, 1931, was the Iowa City Chamber of Commerce’s annual meeting. The Chamber of Commerce was the business entity representing the city. It was the best of times in 1929 and Iowa, and the worst of times in 1930. The nation was in a Depression and the major cities of the country badly needed the improvement of the economy. The University of Iowa had a duty of these times to help keep businesses in the area. The Chamber of Commerce’s Annual Meeting was the Iowa General Assembly of a series of what would be called editorials, for a whole year.

The committee, in July 1, 1931, would incorporate a catalog of lists of places in the book. The lists were broken down into a series of what would be called editorials. The lists were broken down into a series of what would be called editorials.

Ali stops Bayonne Bleeder

(CLEVELAND AP) - Mandatory for any boxer. The strategy was to "go to the body."

Wepner, who earned the nickname "Bayonne Bleeder" because he had lost seven fights in a row before landing a knock out in the 15th round of the championship fight against Ali, landed a left hook that knocked Ali down in the 15th round.

Ali, who is known for his lightning quick left jab, was not prepared for the left hook thrown by Wepner. The Black Bear, as Ali is called, was unable to recover and was stopped in the 15th round.

Wepner's strategy seemed to work as he landed a left hook in the 15th round, forcing Ali to the canvas. Ali, who is known for his lightning quick left jab, was not prepared for the left hook thrown by Wepner. The Black Bear, as Ali is called, was unable to recover and was stopped in the 15th round.

The match ended with a technical knockout as Ali was unable to get up from the canvas after being knocked down by Wepner's left hook in the 15th round.

Holm honored by Hawks

BANCO, Iowa (AP) - Wyoming's Randy Holm was named Iowa's Most Valuable Wrestler for the 1974-75 season.

Holm, a junior from Libby, Montana, defeated two opponents in the NCAA tournament to win the title. He then went on to defeat Nebraska's Brad Thompson to win the title.

Holm's win was part of a seven-game winning streak that included wins over Nebraska, Iowa State, Drake, and Drake in two-game matches and by taking one of 1954's first four place spots.

The Hawks earned a 15-13 victory over Nebraska in the NCAA tournament. Holm's win was part of a seven-game winning streak that included wins over Nebraska, Iowa State, Drake, and Drake in two-game matches and by taking one of 1954's first four place spots.

Vikings

The Minnesota Vikings, leader this year's Super Bowl, were one of the teams that did not lose in the final round.

The team had a good start against the New England Patriots, scoring a 21-0 lead in the first quarter. The Patriots tried to come back in the second quarter, but the Vikings held on for a 27-10 victory.

The Vikings' defense was led by linebacker Jack Youngblood, who had 11 tackles and a forced fumble.

The Vikings' offense was led by quarterback Fran Tarkenton, who threw for 267 yards and two touchdowns.

The team is led by head coach Bud Grant, who has been with the team since 1967. The Vikings have made the playoffs eight times in the last 10 years, including six Super Bowl appearances.

The Vikings are expected to have a strong season in 2023, with key players such as quarterback Kirk Cousins and running back Dalvin Cook returning for the season.

Bowling

The UI students' bowling team won the 1974-75 season, with the team finishing with a 20-4 record. The team was led by bowler Greg Schuerman, who had 519 total pins.

The team also had a strong showing in the intercollegiate tournament, where they finished second in Macomb, Ill. The Hawks earned a second place finish in the national tournament.

The Hawks were led by Private First Class Fred Williams, who had 702 total pins in the national tournament.

Volleyball

The Hawk women's volleyball team won the 1974-75 season, with the team finishing with a 20-4 record. The team was led by outside hitter Carol Holm, who had 519 total pins.
