BEIRUT, Lebanon (UPI) - Arab deterrence force commanders who vowed to prevent fighting in Beirut said fierce clashes erupted Sunday in the suburbs south of the capital.

The conflict between rightist and leftist militiamen, fighting since Thursday, have been joined by a burning passion among the Arab League's peacekeeping troops. Beirut's government is not likely to move swiftly to end the fighting, and people watching the violence said they were ready to use force to get to their homes.

"We all had chronic diarrhea. We couldn't drink water or eat because of the violence. The kids had stubborn problems, and they were afraid of the violence. Mothers started being long lost and had not heard from their children. They were relieved because the violence was over. My children's situation was improved, the son's situation was improved. We finally got freedom.

Wadey said he and his family were at the minimarket for the last two days, but they did not have the chance to visit the United Nations to receive their food rations.

"We feel at peace in this country. I can now go to my work. I can go to the market. People can walk in the streets. I can go to the hospital if I need to go. People can go to their homes. People can go to their jobs. We can live in peace.

Carter plans "team"; metro mayors in line

SACRAMENTO, Calif. (UPI) - Carter plans a "team" of his closest aides from Congress and local government leaders for the new administration.

This was announced today by White House Press Secretary Jody Powell, who confirmed that the president-elect was being asked to form a team to help advise the incoming administration.

"The team" would consist of the president-elect's choice of advisers from Congress and local government officials. This would include a team of the president-elect's choice of advisors from the state and local government officials.

UI blood drive donors flow through easy system

By BILL JOHNSON
Orange juice, a pringle, a piece in the ear and McNamara's: that's the way to liven up a blood drive. Monday, Tuesday and today 10:30 a.m. to 3:30 p.m. in the second floor of the Union.
By late Thursday afternoon about 75 of the University of Iowa student's blood donors had seen and tried McNamara's, the high energy drink, to get them flowing through.

‘State withhld evidence in James Hall case'

DES MOINES (AP) - The state withheld evidence leading to the arrest last year of a day porter for the University of Iowa's Johnson County dormitory.

Withheld, according to a suit filed in the Iowa District Court for Johnson County, was a hair sample from the dead intruder. A jury convicted James Hall, 22, of the first-degree murder of a young woman.

Senator increases funding

ROGER THUESON

The UI Student Senate allocated $143,000 to other organizations. The Senate passed a resolution that recommends the allocation of $143,000 to the UI Student Senate for the current fiscal year. The resolution was passed by a unanimous vote and is expected to be implemented in the near future. The Senate also allocated $143,000 to the UI Student Senate for the current fiscal year. The Senate also allocated $143,000 to the UI Student Senate for the current fiscal year.

City, UI, Coralville to buy new buses

JANET BERNSTEIN

The Iowa City Council Tuesday approved a contract to buy buses from First Bus in Coralville. The city will purchase 10 buses for a total of $2.6 million from First Bus. Coralville, in turn, also will make a local matching payment.

The city plans to buy a total of 20 buses this fall, but decided to keep bus purchases to a minimum this winter. The city is making up the budgetary shortfall by offering to increase the number of buses they sell.

According to Iowa City Council Supervisor Steve Mullen, the city is looking at a number of factors when it comes to buying buses. Mullen said the city is looking at a number of factors when it comes to buying buses. Mullen said the city is looking at a number of factors when it comes to buying buses. Mullen said the city is looking at a number of factors when it comes to buying buses.

We will observe our regular banking hours on Thursday, November 11.
The Caddy: a dream rolls on

by DEAN SMITH

Naturally, I had commented on how well the car was running, just before the brake system put up just August or a day on the highway. When I got it home, I had considered a repair or replacement of the mechanism, but decided that the cost was prohibitive, and returned to the car to work, have a friend fix the problem.

My friends have been more than appreciative, even if they say "It’s a Caddy!"

The Caddy, my car of choice, is a 1929 model, in need of a little work.

Well, Brian, I haven’t purchased the car for its looks, but for its history.

Perhaps you’re guessing it’s a Caddy?

AUGUST CARLSON

Who said that you are, Hemingway? The north of our country, and beyond.

"Bah," one of my fellow staff members, "you are just as bad as a Caddy."

Other friends have been less diplomatic.

"What does your other car look like?"

I admit that, if I was a Caddy, I might have been more inclined to replace it.

I view the world through a Caddy’s eyes, and I can tell you that it’s a hot market.

As we were leaving, my friend, who was married less than a year ago, was very much in a mood, and I could tell that she was about to cry.

"The only time I’ve seen you is when I was married to you, and I can’t remember the last time I saw you."

"I am just not ready to give up on this car, I want to keep it, but it’s been a long time since I’ve driven it.

"What’s the matter with you, Dave?"

"I just want to drive a Caddy around town, you know."

"That’s why I said I don’t want to give up on this car.

We all have our special cars, and I think that a Caddy is one of mine."

I am more than willing to sell it, if you are interested.

The Caddy is a 1929 model, in need of a little work.

Nader team warns women about cancer X-rays

WASHINGTON (UPI) — The American College of Obstetricians and Gynecologists (ACOG) will send a letter to the U.S. Food and Drug Administration (FDA) asking that they ban the use of aluminized mylar, a material used in breast screening mammography devices, the ACQG said Tuesday.

The letter, sent to FDA Commissioner Lester Crawford, expresses concern that the use of aluminized mylar may lead to the development of breast cancer in women. The ACQG said that while the benefits of mammography outweigh the risks, the use of aluminized mylar in mammography devices is not justified.

The ACQG has been working on this issue for several years and has previously warned about the potential risks associated with the use of aluminized mylar in mammography devices. The ACQG said that the FDA should take immediate action to ban the use of this material.

The ACQG has also called for increased research into the potential risks associated with mammography devices, including the use of aluminized mylar. The ACQG said that additional research is needed to fully understand the potential risks associated with the use of this material.

The ACQG letter to the FDA is the latest in a series of efforts to raise awareness about the potential risks associated with mammography devices. The ACQG has previously called for increased regulation and oversight of mammography devices, as well as increased research into the potential risks associated with these devices.

The ACQG said that while mammography is an important tool for detecting breast cancer, the potential risks associated with mammography devices must be carefully considered.

The ACQG letter to the FDA is available online at www.acog.org.
Spin-a-disc...from Boston to Kansas

Editor's note: Boston, Led Zeppelin, Kansas, John Bolton, Bob Dylan, and the rest of the Boston rock scene were reviewed by John Bolton, Grove Press, Inc., and John Rector was reviewed by Chris Wright, Grove Press, Inc. Grove Press, Inc. is located at 430 West 53rd Street, New York, N.Y. 10019.

Spin-a-disc...from Boston to Kansas

It usually takes a "b" hit to make the "B" hit. That's what happened with "Stairway to Heaven." I saw this happen quite a bit, certainly resist inserting strings, horns syncopated staccato.

I was in the audience at the Rock 'n' Roll Stock Show. I can't see the group from where I'm sitting. I was there a week ago. This is the show for students non-students.

Along comes a band from Boston's other main cog is pattern is John Bolton. The Friends of Indiana Career Services and Placement Center are crisper, the playing more.

This album by The Midnight, Leftovertur...- Phoebe Snow. John Dawson Read has a way to Elizabeth Cotton's...Dr. Norman and Emerson, Lake and Palmer. When he moves more toward...are crisper, the playing more.

This is as rock 'n' roll as Snow, the artist. There have been...reviews. George Rector have made an easy.

The German and the Irish. The Friends of Indiana Career Services and Placement Center are crisper, the playing more.

...and Emerson, Lake and Palmer. When he moves more toward...are crisper, the playing more.

This albwn by The Midnight, Leftovertur, is as rock 'n' roll as Snow, the artist. There have been...reviews. George Rector have made an easy.

Boston -- Bolton

Bolton, an organizer and a handle of hours, heavy rock 'n' roll has been missing. Like the American rock and roll thing comes a band from Boston, called Bolton, and they are the best. I went down to see what they had and I was surprised. You can't miss it, it's the best hard rock to appear in quite some time, and certainly resist inserting strings, horns syncopated staccato.

This album by the master who has a lot of with his last album, "The Boot," the group fill in the holes nicely. The other members of the vocals.

...and Emerson, Lake and Palmer. When he moves more toward...are crisper, the playing more.

This is as rock 'n' roll as Snow, the artist. There have been...reviews. George Rector have made an easy.

Maille on Miller

Who's afraid of genius with lust?

By國際小提琴家

Maille was not afraid of Henry Miller, even though she was a woman. She had met him at a dinner party, where he had written a letter that was published in the New York Times. Maille was so impressed with Miller's writing that she decided to write to him. Miller was a famous writer, and his work was known for its explicit and大胆的内容. Maille was curious about his writing and wanted to know more about him. She was not afraid to reach out to him, despite the risk of rejection.

Maille was not the only one who was interested in Miller's writing. The world of literature was fascinated by his work, and his book, "Tropic of Cancer," was one of the most popular books of its time. Maille was not afraid to reach out to him, and she eventually became his editor. This allowed her to study his work and understand his style. Maille was not afraid of the explicit content of his writing, and she was fascinated by his ability to explore the human psyche.

Maille was also not afraid of the criticism that she received. She was not afraid to defend her work, and she was proud of the work that she had done. She was not afraid to take on the challenge of editing Miller's work, and she was able to help him to bring his work to a wider audience. Maille was not afraid of the responsibility that came with her role, and she was able to rise to the occasion.

Maille was not afraid of the controversy that her work would bring. She was not afraid to stand up for her beliefs, and she was not afraid to speak out against censorship. Maille was not afraid to fight for the freedom of expression, and she was able to help to bring about a change in the way that literature was viewed.

Maille was not afraid of the personal cost of her work. She was not afraid to live her life with passion and purpose, and she was able to make a difference in the world. Maille was not afraid to face the challenges that came with her work, and she was able to rise to the occasion.

Maille was not afraid of the legacy that she would leave behind. She was not afraid to leave a mark on the world, and she was able to make a difference in the way that literature was viewed. Maille was not afraid of the future, and she was able to see beyond her own lifetime to the impact that her work would have.

Maille was not afraid of the unknown. She was not afraid to take risks, and she was able to make a difference in the world. Maille was not afraid of the power of words, and she was able to use them to change the world. Maille was not afraid of the beauty of the human soul, and she was able to bring it to life in her work. Maille was not afraid of the power of love, and she was able to share it with the world. Maille was not afraid of the power of knowledge, and she was able to use it to change the world.

Maille was not afraid of the power of art, and she was able to use it to bring about change. Maille was not afraid of the power of the human spirit, and she was able to bring it to life in her work. Maille was not afraid of the power of the human heart, and she was able to share it with the world. Maille was not afraid of the power of the human mind, and she was able to use it to change the world.

Maille was not afraid of the power of the human body, and she was able to use it to change the world. Maille was not afraid of the power of the human soul, and she was able to bring it to life in her work. Maille was not afraid of the power of the human spirit, and she was able to share it with the world. Maille was not afraid of the power of the human heart, and she was able to change the world. Does beer improve with age?

Yes, it does improve with age. Beer, like wine, can improve with age. This is because the flavors in beer develop and change over time, especially when stored in a cool, dark place. The quality of the beer can also improve with age, as the yeast and other ingredients continue to work their magic. However, it's important to keep in mind that not all beers are suitable for aging, and some may become unpleasant or sour if left for too long. So, if you're interested in aging beer, it's a good idea to choose the right beers and store them properly. Just be sure to check the label to see if the beer is suitable for aging, and how long it can be aged for. In the end, aging beer can be a fun and rewarding experience, as long as you take the time to do it right.
Football rags to riches; the story of Pittsburgh

The University of Pittsburgh's football team, under the leadership of head coach Frank Dorsett, has experienced a remarkable turnaround in recent years. After facing numerous challenges and setbacks, the team has managed to overcome them and achieve success on the field. This transformation has been attributed to several factors, including improved coaching, better preparation, and a renewed focus on the needs of the players and the fans. Dorsett, who took over the team in 1984, has played a crucial role in this process. Under his guidance, the team has won numerous games, and the fans have started to believe in their team again. The story of Pitt football's rise from obscurity to prominence is one of perseverance and hard work. It is a testament to the power of determination and the importance of a strong leadership. The Pitt Panthers are now a team to be reckoned with, and their fans are proud to support them.
Taste Science Succeeds.

'Enriched Flavor' breakthrough brings unprecedented taste to low tar smoking.

By "cracking" cigarette smoke down into separate ingredients, researchers at Philip Morris discovered very special "key" flavor units that deliver taste way out of proportion to tar.

The discovery is called 'Enriched Flavor'.

The cigarette packed with 'Enriched Flavor' tobacco is MERIT. At 9 mg., one of the lowest tar levels in smoking today.

Yet, MERIT actually packs the taste of cigarettes having more tar.

Up to 60% more tar.
If you smoke, you'll be interested.

Tests Verify Taste

9 mg. tar MERIT was taste-tested against current leading low tar cigarettes ranging from 11 mg. to 15 mg. tar.

Thousands of smokers were tested. The majority reported that even if the cigarette tested had up to 60% more tar than MERIT, MERIT delivered as much—or more—taste.

You've been smoking "low tar, good taste" claims long enough. Now smoke the cigarette.

MERIT
