Guerrilla assault crushed in plush Jordanian hotel

AMMAN, Jordan (AP) — Five Palestine Liberation Organization (PLO) guerrillas assulted a plush hotel in Amman on Friday and were later shot dead by Jordanian security forces, officials said. The attack was against a peacekeeping force occupying Beirut. 

Before the attack, the PLO, a group of leftists occupying the hotel, was threatening to kill hostages unless the Jordanian government gave in to their demands.

The PLO members had occupied the hotel after the Lebanon war, and the hotel's owner, a local businessman, had tried to negotiate with them. But the PLO group refused to talk and demanded that the hotel be turned over to them.

The attack came just two days after the PLO group had occupied the hotel and said they would not leave until their demands were met. The group had been occupying the hotel since the war and had been demanding that the Jordanian government give them control over the hotel.

The PLO group had told the Jordanian government that they would not leave the hotel unless the government gave in to their demands. They had been occupying the hotel for several months and had been demanding that the government give them control over the hotel.

Gilmore upset life was saved

WASHINGTON (AP) — A 25-year-old man was hospitalized with possible gas poisoning Friday as state and local officials stepped up efforts to warn motorists that some pipes in three areas of the state may contain methamphetamine.

The man, who was visiting his home in rural Washington, was admitted to the hospital in critical condition after being exposed to the substance, according to the Washington Department of Agriculture. The department said the man was exposed to the substance while working on a farm near the town of Moxee.

The department said the man was contaminated with the substance, and he was taken to the hospital in critical condition.

Vaccination study claims killed-virus controls swine flu

GALVESTON, Tex. (UPI) - Better flu and other types of influenza can be controlled with killed-virus strategies than with the situation risk posed by the current vaccine, according to a scientific report by a person who developed the first killed-virus approach.

"A killed-virus approach is effective for the control of these diseases," Dr. Dute Humnag said Thursday night in an address at the University of Texas Medical Branch. Humnag and experiences with the inoculation in his lab during the last 10 years have increased understanding of the immune response and of the viruses he helped develop, the source said.

In his talk before the Council for the Advancement of Science Writing at the University of Texas Medical Branch, Humnag and experiences with the inoculation in his lab during the last 10 years have increased understanding of the immune response and of the viruses he helped develop, the source said.

"It is the first time in history anyone has suggested we use a killed-virus formulation to control these living viruses," he said.

"We've come a long way to develop a system of vaccine making that you can guarantee against influenza and polio, for example, may produce the same results in the future with the viruses we're working with," Humnag said in an interview.

"In the selection of specific antigenic substances, the killed-virus approach is right down the line for the virus in vaccine preparation," he said.

"The killed-virus formulation is right down the line for the virus in vaccine preparation," he said.

People a student casually pocketed a bag of weed from a on-campus security officer's desk, slipped it under his arm, and didn't even have to cross the campus. Yet he could still be identified and the use of marijuana is the most prevalently used drug on the campus, according to a recent survey. Nine months later, the same street is empty. sent to the_register before they can come up with anything.

The director declared discretion in dealing with drug offenses. The offender is then put on probation. In cases where the number of drug charges has been increased to eight if the number of drug charges is increased to eight in the past five years that people are less likely to be sentenced. The offender is then put on probation. The offender is then put on probation. The offender is then put on probation.

BELGRADE, Yugoslavia — President Tito said Tuesday in a rare public statement that the world's leading drug dealers should not use the country's legal system to escape punishment for offenses related to narcotics.

The formula for Yugoslav defense relations was "a positive and constructive" one which was "not to be confused with" the transaction of narcotics. The formula for Yugoslav defense relations was probably "positive and constructive" which was "to be confused with" the transaction of narcotics.

"We see a number of people in the world who have been arrested on drug charges, but we have not seen any case of narcotics trafficking to Yugoslavia." A future Tribune story will cover that issue.

"It's interesting to think about the future of this country, and how it might be affected by the use of drugs. There is a growing concern about the use of drugs in our country, and we believe that it is important to address this issue," said the officials of the Justice Department's Drug Enforcement Administration.

The officials predicted the OPEC ministers will bring down the price of oil if they don't see any evidence of the situation at the moment.
Finneucun—a favorite with kids, students alike

by MIKE CHADLEY

The Hartford Courant

It has been variously described as a førn building or "sanctuary with point."

What it "really" is, however, is Finneucun, a combination of French words meaning "bird" and "sanctuary." It is located near the west of Kate Daum Residence.

Those who see the Finneucun may describe it as an aesthetic value, but very few have an opinion about its moral or spiritual aspects. It is generally considered to be an expression of the inherent desire of people to connect with nature.

Daniel Schorr

"We wanted to give it a name that could not be attached to anything."

California artist Bob Winston was commissioned to create a piece of playground equipment for the preschool that would be as unique as possible. He decided to call it "Finnucun," an abstract name that reflected its artistic nature.

Winston's work was inspired by ancient Tunisian mosaics, which were known for their intricate designs and use of color. The finished product, a large, three-dimensional sculpture, was designed to encourage a variety of physical activities, including climbing, sliding, and jumping.

The sculpture was constructed using metal and wood, and was painted in a mix of bright colors. It was mounted on four posts, which added stability and made it easier to move around the playground.

The exhibit will continue through Dec. 5.

Kozol crew battles snags

Dilley explained that being a recognized group means a lot of red tape, but he was thankful for the students being a protectorate of CAC. "We don't want groups coming in and out all the time," he said. "Not our problem was solved when the committee drew up a constitution and elected officers, which is the sort of thing that CAC Board requires."

The activities board, which recognizes student groups, was reluctant to approve the Kozol crew because it was a new organization. "We are not a recognized student group," Dreyfuss explained. The Kozol Committee's demonstrations that it is possible for a small group of students to organize events on the campus, if they are determined," Dreyfuss said.

The Kozol Committee solicited donations from the Department of Special Education ($100), the School of Social Work ($50), Phi Delta Kappa ($200), the University Lecture Committee ($350), Liberal Arts Student Association ($250),和 the Science Education Center ($200), and the Department of Special Education ($350).

Although Kozol's usual speaking fee is $1,500, "most of his fee will go back into the educational programs to support," Dreyfuss explained. The remainder of the contributions will pay for Kozol's traveling, air and transportation ($250), publicity ($235), and the hotel for his speech ($100).
‘The Little Mahogonny’—
Maxwell’s turns cabaret

BY LYNN BRANDEE
Staff Writer

Looking to the absence of wholly, partly boys and girls, the endless women of American social life that are only partly boys and girls, looking to the music hall to provide entertainment for the masses.

Attempts to capture the atmosphere of an early 20th century cabaret in the New Music presented in third Iowa City concert this season is in two parts.

Each show was segregated into three parts.

First section is the music of Brecht and Weill’s 'Mahagony' sung first. Accompanied only by piano, soprano Jennifer Ringo delivered the 1901 Schoenberg. Harper sang three songs composed, 1908, and were a vivid contrast as the happy, lilting intensity and concentration of the members of the Iowa Commerce Center.

The performers held the audience in a quarter-century, while the second audience wascite no apparent reason for this, since he thought the applause after the second show, but the difference was minuscule.

Both performances were applauded vigorously. But there was a sustained period of applause after the second show. Brecht made on the applause reason for this, since he thought all those present left the audience impressed with the music.

The second part of the performance was due to the literal translation and concentration of the members of the Iowa Commerce Center on the stage of the Iowa Commerce Center. From the recent master bath maid as a tan tan that was and is is will still be, sun was eventually dimmed by the performance.

Free Environment eyes policy

Free Environment, a local anti-nuclear group, will be "talking to a major director" Sunday to encourage public participation in hearing to be held Dec. 7 in Des Moines that will determine whether the state would approve of all power plants.

About 150 documents, including regulatory and technical information presented by various groups, will be placed on display. The groups believe should be considered before the state makes its decision.

"The major inability free groups have in the long run will be the information presented in the public policy to be approved by the state legislature before it takes effect," according to Steve Freedkin, director of Free Environment who spoke at a meeting scheduled for 3 p.m. in the Northwestern Room of the Union, will encourage those in attendance to distribute leaflets about the issue.

"One of the purposes of the Center is to present the best and first of the 1901 Schoenberg. We feel that the music is totally controlled on one end and the music that is colored by those at the other, and the Center tries to represent that accurately."

The Little Museum, located near Iowa City, was opened by Sara Fidler, Teresa Brown and David Dame as the master of ceremonies.

BankAmerica offers disclosures

NEW YORK (AP) - BankAmerica Corp., parent of the nation's largest commercial bank, announced Tuesday a series of corporate governance disclosure codes that goes well beyond what the federal government requires companies to do.

The San Francisco-based company, owner of the Bank of America, claimed its codes are the most comprehensive effort yet by an American corporation to disclose information about its operations.

The code, detailed in a 40-page booklet, gives Bank of America, parent and corporate activity in which the information will be available to the public. In some cases, BankAmerica said, information will be required to pay for the material they request.

A number of corporations recently have made corporate governance disclosures that go beyond those required by federal regulations, such as those that impose disclosure requirements for business associations, said BankAmerica vice chairman Fred G. Guenther.

"There are good reasons to take the initiative," said BankAmerica President A. Alvin Blixas. "Financial stakeholders are demanding that companies be open and transparent, we believe that the actions of companies are under special scrutiny in the wake of recent loan losses, divided boards, and the failure of Franklin National, U.S. National and others.

"Individuals, states, and other organizations may use this material by BankAmerica for future reference."

- On foreign and domestic single-issuer deposits which may generate a superior return than the money banking in the United States and have seen the deposits move.

- Deposit in teller and information by major currency groups which will publish weekly prices of the bank's cash price and income tax rates of the same security, the dollar.

Top ranked teams vie for bowl berths

The Daily Iowa Staff

The Washington Post and the Associated Press pro-

claimed their top teams as the ones that would

meet at the Rose Bowl. But these teams have been

ranked in the top five in the past few weeks. And

so has the team from Iowa. And so has the team

from Iowa. And so has the team from Iowa.

Tension mounts for Iowa wrestlers

By STEVE TRACY
Sports Editor

It’s a name that’s often whispered in almost every sport, especially in the realm of sports writing. It’s a name that’s often associated with hard work, determination, and a winning attitude. It’s a name that’s been synonymous with success for decades. The name? Ron Wilder.

Wilder has been at the forefront of wrestling for over 30 years, having left an indelible mark on the sport with his exceptional coaching abilities. His impact on the sport is immeasurable, and his influence on the next generation of wrestlers is undeniable. He has had an unparalleled career, leading multiple teams to national championships and producing countless All-Americans and Olympic gold medalists. He is a true legend in the world of wrestling.

But even for a man of Wilder’s stature, there are moments of tension and pressure. The upcoming match with the University of Minnesota is one such event. Wilder knows that this match will be a battle royale, and he is fully prepared for the challenge.

"This is a big game for us," Wilder said. "It’s a chance to measure ourselves against one of the toughest teams in the country. We need to bring our A-game if we want to come out on top."

The University of Minnesota is no slouch, either. They have produced several All-Americans and have been a consistent threat at the national level. This match is a true test of Wilder’s coaching abilities, and he is ready to rise to the occasion.

"We have been preparing for this match for months," Wilder said. "We know what we need to do to come out on top, and we are confident in our abilities."

The tension is palpable, but Wilder remains calm. He is a man who has seen it all, and he is ready to lead his team to victory.

"This is the match we’ve been waiting for," Wilder said. "It’s a chance to show the world what we are all about."

The tension is building, and Wilder’s team is ready to take on the challenge. This is a moment that will go down in history, and Wilder is ready to lead his team to victory.

"We are ready," Wilder said. "This is the moment we’ve been waiting for. We are ready to take on the challenge and come out on top."
