Plan to replace KRUI to be presented

Koreans

WASHINGTON (UPI) — South Korea has shipped a large campaign against espionage and direct investigations into illegal Korean groups in the United States, congressional and executive sources said.

The sources said the campaign has three major objectives:

1. To reveal the activities of the United States Korean Association, a group that has been suspected of engaging in espionage.
2. To investigate possible illegal activities of Korean groups in the United States, including those that have been suspected of engaging in espionage.
3. To prevent the establishment of any new Korean groups in the United States that could be involved in espionage.

The sources said the campaign also includes a public campaign to encourage the public to report any activities that could be involved in espionage.

According to the sources, the campaign is a direct result of the South Korean government's concerns about the potential for espionage by Korean groups in the United States.

The campaign is expected to include the following activities:

1. Public campaigns to encourage the public to report any activities that could be involved in espionage.
2. Increased surveillance of Korean groups in the United States.
3. Increased coordination with the United States government to prevent the establishment of any new Korean groups in the United States that could be involved in espionage.

The sources said the campaign is expected to be completed within the next few months.

3. Increased coordination with the United States government to prevent the establishment of any new Korean groups in the United States that could be involved in espionage.

The sources said the campaign is expected to be completed within the next few months.

Plan to replace KRUI to be presented

A prenaatal screening test available in the United States to determine if a child has Down's syndrome is undergoing clinical trials at several medical centers. The test, called amniocentesis, involves the insertion of a needle through the mother's abdomen and into the amniotic sac that surrounds the developing fetus. Fluid is drawn off and sent to a laboratory for analysis.

The test is designed to detect the presence of Down's syndrome, a genetic disorder that affects about 1 in 700 births. The disorder is characterized by a number of physical and mental abnormalities.

In the test, a needle is inserted through the mother's abdomen and into the amniotic sac. A small amount of liquid is drawn off and sent to a laboratory for analysis.

The test is performed between the 14th and 20th weeks of pregnancy, and results are available within a few days.

The test is considered a safe procedure, and complications are rare. However, there is a small risk of infection and miscarriage.

The test is not perfect, and some babies with Down's syndrome are not detected. However, it is the most accurate test available and is the best option for women who want to know if their baby might have Down's syndrome.

In recent years, the test has become increasingly popular, and the number of women undergoing the test has increased significantly. This has led to an increase in the number of children born with Down's syndrome, as well as an increase in the number of women who choose to terminate their pregnancies if the test results are positive.

October economy levels...

WASHINGTON (AP)—The government reported Friday that the future course of the economy probably will be for October, showing no change after September's slight dip in government spending and less

than expected.

The Index of Leading Indicators showed a

slight increase in October, which

indicates the economy may be

stabilizing.

The government also reported

the Index of the future of the

economy was unchanged.

The index is based on 10 leading indicators, which include retail sales, manufacturers' new orders, and

The index is a measure of the economy's strength and is used to predict future economic activity.

The government said the index showed a no change in October, which indicates the economy may be stabilizing.

The index is based on 10 leading indicators, which include retail sales, manufacturers' new orders, and

The index is a measure of the economy's strength and is used to predict future economic activity.

Bound for oblivion

The state of Iowa has filed a lawsuit to get a food stamp recipient to repay benefits she received while she was a recipient of the program. The state is seeking to recover thousands of dollars in benefits the recipient received while she was a recipient of the program. The state argues that the recipient received the benefits fraudulently, and that she is required to repay them. The recipient argues that she received the benefits legally, and that she is not required to repay them. The court is scheduled to hear arguments in the case on October 12th.

Court rules medical denial 'cruel' prisoner treatment

Washington (UPI) -- The Washington Supreme Court Tuesday ruled it unconstitutional to deny medical care, and said state medical officials were guilty of mistreatment.

The ruling, in a case of abusive use of state prison inmates, said that state medical authorities, in their handling of prisons, would be liable for federal civil wrongs.

Marshall, the attorney who shepherded the proposal in court, said he would seek the states' appeal in the case of J.W. Gamble, an inmate, against other prison officials.
Helmsman Trophy

Pitt’s Dorsett wins in landslide

By Staff Writers

Freshman center still improving

Improvement of her own skills

‘I was a bit of a third-wheel last year, but that’s not the case any longer. Dorsett’s improvement of her own skills also made her more noticeable on the field. The attitude is just one example of how much better the team is doing at being a whole team. In her second year, she has become much more comfortable with her teammates. ‘I could have made a better contribution to the team last year, but this year I’m really trying to improve my play and be a part of the team,’ Dorsett said.

Dorsett, a bruising 5-foot-11, 190-pound sophomore, was a finalist for the Heisman Trophy last year. In his senior year, he rushed for an NCAA season high 1,070 yards in a game only once. His four rushing touchdowns and 402 carries per game, along with his four rushing touchdowns and 11,328 career yards, make him a popular choice for the award.

Dorsett gained the front-runner when he finished fourth behind Archie Griffin, Bob Blaha and Justin Weise in the final game of the year. The multitalented Weise, a 6,082-pounder, was also the right distance from winning the Heisman Trophy. Dorsett gained the front-runner when he finished fourth behind Archie Griffin, Bob Blaha and Justin Weise in the final game of the year.

GYMNASTICS

Four members of Iowa's women's gymnastics team competed last weekend at the Midwest Open in Chicago, according to reports.

The Hawkeyes were led by Cindy Danner, who was third in the all-around competition. Othersdid equally well for Iowa, including Val Walker, 33rd, in the floor exercise and Laura Parks, 37th, in the balance beam.

"We had a lot of variables, which will get better later," said coach, "in a Gunn performance." What scores were kept only for those remaining there in the meet, which was the intent of the meet. The 33 gymnasts from both college teams and private schools. Only 11 teams were entered, including those college teams.

Iowa's women's gymnastics team competed, but did not have many less. Iowa's women's gymnastics team, where they're at on both Kent and Oklahoma State. The team will travel.
