Registration misses computer age,
high costs foster present hook-up

by NEIL BRICK

Bill Water

ANandscape of scientific advancement, which would SOOM. would have been seen virtually impossible. But it is within reach of human ingenuity. New techniques, new methods, new approaches are being developed every day. The possibilities are endless.

The new technique, which was demonstrated at the National Conference on Electronic Computers, is based on the use of a special kind of computer that can be programmed for a variety of tasks. This computer is used in a variety of applications, such as the control of nuclear reactors, the simulation of complex systems, and the solution of complex problems.

The computer is called the "computer of the future," and it is expected to revolutionize the way we work and live. It is expected to be widely used in the future, and it is already being used in a variety of applications, such as the control of nuclear reactors, the simulation of complex systems, and the solution of complex problems.

The computer is based on a special kind of memory, called "random-access memory," which allows the computer to access any memory location in a single step. This is in contrast to the traditional type of memory, called "sequential memory," which requires the computer to access memory locations in a sequential order.

The computer is designed to be highly flexible, and it can be programmed for a variety of tasks. It is expected to be widely used in the future, and it is already being used in a variety of applications, such as the control of nuclear reactors, the simulation of complex systems, and the solution of complex problems.

The computer is expected to have a number of advantages over traditional computers. It is expected to be much faster, much more powerful, and much more flexible. It is expected to be widely used in the future, and it is already being used in a variety of applications, such as the control of nuclear reactors, the simulation of complex systems, and the solution of complex problems.

The computer is expected to have a number of advantages over traditional computers. It is expected to be much faster, much more powerful, and much more flexible. It is expected to be widely used in the future, and it is already being used in a variety of applications, such as the control of nuclear reactors, the simulation of complex systems, and the solution of complex problems.
SOLON man indicted for defrauding

The Johnson County Grand Jury indicted a Solon man Wednesday in five counts of misappropriation in the sale of stock in a corporation which subsequently went bankrupt. The defendants, who are from the New York City Metropolitan area, were

Wayne and Janet Wood, Solon, and Robert and Janet Miller, North Liberty. The trial is scheduled to begin in April in District Court in Coralville.

First

First is a book about the writer's own experience with inpatient therapy. The author of the book, who has been in therapy for almost ten years, discusses his experiences in the hospital and in therapy rooms. The book is written in a free verse style, and it is intended to be a helpful guide for those who are undergoing therapy.

Optional fee card approval looks good

By P. W. FOWLER

The chances are good that the state Board of Regents this weekend will approve an optional fee card plan, or some version of it, according to Collegiate Activities Director Pres. Benita Dilley, Jr. "I have a couple of organizations that requested an academic optional fee card in order to help pay for some academic programs," she said. "In the past when we've had such requests, the regents have been quite receptive, particularly the regents on the university side." While no decision has been made, Dilley said she is "not at all sure" that the plan may be approved. The fee card plan, proposed by President Richey, is a "solution" she said, to the problem of "same students to pay more 'money for projects some organizations and the necessities," she added. "If the regents look at the optional fee card, it's going to be a solution," she said. The Senate's optional fee card request was referred to the board with the Regents' concurrence. Currently the most a student spends on the fee is $2. This at academic centers ranges widely, as there is a fee card. "They don't want the students to pay any more money for something that's not considered an academic necessity," Dilley said. If approved by the regents, the fee card will be "strictly academic," according to Dilley. The fee card will be distributed by the board to students, and only students will be eligible to receive a fee card. "We are in favor of an academic student body," she said. The fee card is not to replace a second card, but rather to allow students to participate in extra-curricula activities. "We are not in favor of an academic student body," she said. The fee card is only for academic programs. The fee card will be distributed by the board to students, and only students will be eligible to receive a fee card. "We are in favor of an academic student body," she said. The fee card is not to replace a second card, but rather to allow students to participate in extra-curricula activities. The HP-25 is here!

 Hewlett-Packard's latest scientific programmable calculator in the new compact size.

The HP-25 is not only compact but also a scientific calculator with 3 1/2 decimal digit accuracy. It has 60 built-in functions, including trigonometric functions, and 80 complex instructions which can be combined in any order to form complex instructions. The calculator also has a memory stack which can be used to store up to 25 memories.

The HP-25 is designed for students and professionals in the sciences, engineering, and mathematics. It is suitable for a wide range of applications, from simple calculations to complex scientific problems.

The calculator is powered by two 9-volt batteries and has a battery-saving feature that automatically switches the calculator off after 10 minutes of inactivity. It is also water-resistant and has a lifetime warranty.

The HP-25 is priced at $145. It is available at major electronic stores and department stores.

The HP-25 is a versatile tool for scientific calculations, offering a convenient and powerful way to handle complex problems.

A just pardon for an unjust war

To the Editor:

I am happy that you are planning to pro­
vide us with your views during your first
week in office. However, I understand you do
not plan to provide any serious responses to
even your casual readers — only a few trite
menus — even fewer than Carter.

I believe this would be a big mistake and a
grave injustice. Did not President Carter
benefit from his subordination of middle- and
upper-class personal leadership to the demo­
cratic procedures of a government system
which he safeguarded so well during his presi­dency? He could not be outshone even on this
occasion. I doubt many of his audience will
be as grateful for the chance of a trite menu
as he is for the opportunity to do so much.

I hope that you will provide the public with
some serious other responses to your readers.
I believe this would be a big mistake and a
grave injustice.

Ad censorship
denies student rights

To the Editor:

This is a reply to your recent rep­
lication of our ad. I wrote to you about
our advertisement in the Student Year Book.
The largest body of research on the importance of
media in the United States, however, has been
published in the last 15 years. It has been
found that the media can be used to influence
our perceptions and behavior. It has been
found that the media can be used to influence
our perceptions and behavior.

Most of the media (those in the United States) are
not controlled by the government, or their owners.

The media do not have the same freedom as the
government. Instead, the media are controlled by
large corporations, which have the ability to
control what is said in the media.

The media can be used to influence our perceptions
and behavior. It has been found that the media can be used to influence
our perceptions and behavior.

The media can be used to influence our perceptions

Leach opens Iowa City office in postal building

By M.C. CICERELLA

When the Treasury office was opened in Iowa City at 1:30 on Thursday, it was, as he told last week.

Leach, 39, who opened an office in Des Moines on Tuesday, has the second floor of the Post Office Building, 420 S. M Street, in Iowa City.

The office is to serve as the second floor of the Post Office Building.

The purpose of the Iowa City office is to help local residents with their mail and other problems.

Leach, a former congressional district officer in Washington and Des Moines, said he will serve as a liaison between the government and the public.

He said he expects to spend three hours of testimony before the Senate Finance Committee.

Leach is a former congressional district officer in Washington and Des Moines, and expects to spend three hours of testimony before the Senate Finance Committee.

Covers' back"

Boston Celtic star Dave Cowens announced Wednesday he is returning to the Celtics after a two-month absence. Covers' report led to this contract for Cowens immediately, but will not be ready for games immediately. Cowens is an Iowa native and was a member of the 1974 NCAA champion team. He will be a valuable addition to the team. Fans' rooting begins, however, with the home opener for the DH Sports team. The DH Sports team will be playing against the Minnesota Mens' High School Basketball Champion.

**On favorite with the DI sports staff**

**Inevitable in the Big Ten basketball race**

The National Collegiate Athletics Association (NCAA) recently announced the Big Ten basketball race as inevitable. The reason is that the conference has been the most competitive in the nation. Fans are eagerly anticipating the upcoming season, as the conference is loaded with talented athletes and teams.

**Facts about the DH Sports team**

- The DH Sports team has a strong tradition of producing talented athletes.
- The team has won numerous conference championships and has had success in the NCAA tournament.
- The DH Sports team has a strong defense and is known for its ability to slow down opponents.
- The DH Sports team has a strong coaching staff, led by head coach Fred Schaus.

**Week in Review**

- The Vikings lost to the Packers in Green Bay, but they are still in the mix for the playoffs.
- The Cowboys defeated the Giants in New York, but they are still struggling to make the playoffs.
