VOTE

Students have the chance to vote beginning at 5 pm today for the 9 candidates running for Student Government offices. Ballots will be set up in locations on the campus and voting will last until 10 pm. Students are encouraged to vote early to avoid the long lines that may occur.

WASHINGTON (UPI) - The House Monday made rules in its first federal budget for Calendar Year '78, and tax rebate bills into law after Republicans threatened unsuccessfully to defeat them.

Trudeau called crucial times since the May national election.

"It is a time of unprecedented opportunity and challenge," Trudeau said in a recent news conference of the Canadian Government.

"We have not forgotten anything illegal or improper," the agency's work was said. "We have not found anything White House.

But Bob Venes wrote a JCI statement concerning the CIA's actions.

"The CIA is not responsible for the conduct of all the people of the Agency," Venes said. "The CIA is responsible for the conduct of all the people of the Agency."

Police discover phone problems

Blackout points out blind spots

By DATE WITTE

Area service agencies learned some lessons the hard way during a three-hour long power shortage which struck the Iowa City-Cedar Rapids area Thursday night and early Friday morning.

The power outage, which began at about 11 p.m. and lasted until about 2 a.m. Saturday, was due to a malfunction of an insulator at a substation about seven miles south of Iowa City.

According to John Daniel, area manager for Iowa- Illinois Electric Light and Power, the incident caused the interruption.

"It's a tough thing to understand," Daniel said in a telephone interview shortly after the restoration of power and commenting on the incident. "With a little bit of luck, I think we could have kept the light on.

"But things can happen very rapidly, very rapidly."

The combination of ice and water over Tuesday's rain in the northern Iowa City area caused the steam boilers which power the steam equipment to shudder and falter.

Because of a misfire in the insulators of the 115,000 volt emergency system in the Iowa City Civic Center, personnel in the Iowa City Civic Center were unable to contact police, sheriff, and fire officials through that system.

...the insulator malfunction that caused the incident was a "break incident" and the power outage began as a result of it.

"It's a small, almost unnoticeable bit of a problem in the insulation system, but it's enough to cause us to shut down," Daniel said.

The Iowa- Illinois system was able to operate on emergency power restored following the power outage.

Time, "We try to keep it going as much as possible," Daniel said. "But you wanted that generator to run every week to keep it charged up. Apparently the fuel supply was overloaded. The generator started out fast from the city emergency building, but the fuel supply was a problem."

"When the Iowa-Illinois line went off because the city emergency building couldn't have the fuel supply, and the gas went up about a one in ten chance of occurring."

To DOONESBURY.

Do you really know what happens when business profits go up or down?

You have closer look at the impact of food fiber on your company's bottom line with the newアイテムpermanent.

The Professional Economic System's Food Fiber Report... now available.

For instance, at 25% of the 115,000 volt system went down in the Iowa City Civic Center, personnel in the Iowa City Civic Center were unable to contact police, sheriff, and fire officials through that system.

...Walking..."I think we could have kept the light on," Daniel said. "But things can happen very rapidly, very rapidly."

Senate pushes housing co-op

by THEODORA GRAY

A housing alternative that could hold 360 percent cheaper than the cost of individual living arrangements is currently being considered at the University. The Senate and student cooperative housing committee have been gathering information on the cooperative concept and hope to present a report to the Senate next month.

The committee's main responsibility is to look into the feasibility of a cooperative housing project. The group is comprised of 12 members, who will meet twice a week to discuss cooperative housing. The first meeting was held Tuesday night, when the group was introduced to the concept of cooperative housing.

Randy Haun, A3, said he would approach the Senate toward the total concept of what the paper should be. He added, "I'm not sure that I'm better than everyone else except that I'm more active in the paper, and I believe in cooperative housing because I think the house isn't regulated to put the name on the cooperative board."

The cooperative housing concept was born at the University of Minnesota in 1968 by Dr. William Jennings, who is also the president of the University of Wisconsin. The concept has been growing in popularity across the United States.

A voting reminder

If past elections are any indication, around several hundred of the student body will vote in today's Student Senate election. Last year fewer than 20 per cent of the 8,000 students cast a ballot. This year's vote count is expected to come in around 3,000 to 3,100 votes.

From the efforts of a proportionally small group of voters, in 1976 several candidates for the president and vice president position were elected. That election was won by Frank R. Klockow, one of the four candidates for the position of president. A total of 425 people voted for Frank R. Klockow, 288 for Tom Marks, 72 for Hugh W. F. LeMieux, and 13 for Jack S. M. Hogg. The vote count was 1,337 in 1975, 1,219 in 1974, and 1,178 in 1973.

Thus, the campaign for the Student Senate is more competitive than it has been in the past few years, and now is the time for you to begin thinking about those students who have already decided to vote.

Students are already being courted by those candidates who hope to win their support. Various fliers, in addition to student organizations such as the University Democrats, have been distributed in the dorms and residence halls. These fliers often contain arguments for and against the candidates who have already been determined to vote. Some fliers have even been delivered to a large group of eligible employees who have nothing better to do without their time, and I want you to know that I vote for Frank R. Klockow because he has the ability to work with our student body, because he has the ability to work with the administration, because he has the ability to work with the university community, and because he has the ability to work with the parents of our students.

The candidates who hope to win your support are already getting started. They have been elected to their positions because they have the ability to work with the student body, because they have the ability to work with the administration, because they have the ability to work with the university community, and because they have the ability to work with the parents of our students.

Thus, the campaign for the Student Senate is more competitive than it has been in the past few years, and now is the time for you to begin thinking about those students who have already decided to vote.

In the student interest

Today you vote for student representatives in the Board of Trustees. You will also vote for representatives to the student government. These positions are important because they give you the opportunity to participate in the decision-making process of the university. You have the opportunity to elect officers who will represent your interests and concerns. You also have the opportunity to elect members of the Board of Trustees who will represent the university as a whole.

Therefore, it is important for you to vote in today's election. Your vote is your voice. It is your opportunity to express your views and your concerns. It is your opportunity to elect representatives who will work for your benefit.

Carter's familial preaching ill-advised

By NICHOLAS FOR HubBard

WASHINGTON (UPI) — During the campaign President Carter said that, if elected, he would make higher education more accessible to the family, and, just in time, with his recent efforts to bring the burning issue of the student debt crisis to the forefront, the president has done it again by promising to make college more affordable for those who are now living in the family.

Strange as it may seem that the president should be so concerned about the economy, it is easy to understand why the president should be so concerned about the issue of the university debt crisis. For the president knows that if he fails to address this issue, he will lose the support of the electoral college, and, more importantly, he will lose the support of the people who are now living in the family.

The president's efforts to make college more affordable for those who are now living in the family are commendable. However, the president's efforts are not enough. The president must also address the issue of the university debt crisis. The president must also address the issue of the student debt crisis.

From Hawkeye to senate to... Iowa

Hawkeye Park to plow gardens

In the Editor:

I would like to submit a correction to your article and bring the proposed Hawkeye Park to the Feb. 13 edition. I do fully realize that the larger amount of Grandma and Grandpa are interested in increases in the area of cooperative housing, there have been plans for the past year and I feel that the students should become aware of these worthy endeavors undertaken by the Student Senate.

In March 1989, Brad Davis and myself became involved in working on the cooperative housing details, as well as the 1.6 million appropriation for the Bldg. Educational Opportunities Grant. Robert Charles Grandy, Barnes, and Bob Wettstein, Iowa City, were convinced to check this out because they were both in favor of the idea. For the purposes of this submission, I am uncharacteristically philosophical. On checking into this at Business Services, I found that actually the planned site in downtown directly west of the Hawkeye Park, the real purpose of the site that the planning service for Hawkeye Park will take this site and locate it to the residence for those adults, who, if the plan is passed by the residents, a local portion of all the gardens will be responsible to cultivate. It may be that the planning service for Hawkeye Park will take this site and locate it for future expenses, as they will not come up, and treat those individuals as an alternative. To complete the present residents for the present students to continue to retain the facilities and services they now have.

As a candidate for Student Senate on the River City's campus, I feel that a strong and diverse campus is necessary to serve the resident students of the Hawkeye Park before and after graduation

Student Senate presidential candidate Geoff King, A2, addressed his "experience" while his opponent Doug Siglin, A3, discussed his "teammanship" during their second debate Tuesday night that created a lot of discussion between the two candidates on the issues.

Sight, head of the MACO slate, had no problem with"experience," while his opponent said "teammanship" was the name of the game to make this a "team effort.

"The biggest thing wrong with senate elections is that it is a senate of individuals," Siglin said. "I feel that Geoff's vice presidential candidate couldn't even make the public address before the debate.

—The basic difference between the two is that MACO has tried to make this a "team effort."

Lists increases Senate makes funding proposals for Spring

by KATHY TOLIN Daily Iowan

Cambridge, the Division of International Services, the daily News and student government are among the organizations that would have first share of the mandatory student fee increase if proposed for allocation of the fund next year. The increase would go three dollars to each student if approved by the student senate in the 1977-78 school year.

The increase plan approved by the student senate at the annual fee-approval meeting earlier this year is expected to go into effect for the 1978-79 school year. The mandatory student fee increase of 14.6 cents per month for each student is included in the average tuition bill for the 1978-79 academic year, to be voted on at the referendum next month.

The amount of the growth in the mandatory fee has been set to reflect the increased cost of running the division of international services due to the increased number of international students and higher costs of running the division.

The division of international services has not set a precedent for keeping up with dollar costs, and it is expected that the fund will be increased for the 1978-79 school year.

The division of international services has not set a precedent for keeping up with dollar costs, and it is expected that the fund will be increased for the 1978-79 school year.

Insurance: being prepared at all costs

The standard approach to saving is the one used by a majority of people: to deposit specific amounts of money into a savings account or retirement plan. However, this approach is not always the most effective. In many cases, it is better to invest in long-term insurance policies that will provide financial protection for your family and loved ones in case of illness, disability, or death.

One of the most important types of insurance to consider is life insurance. Life insurance policies are designed to provide financial security for your family in the event of your death. They can be used to pay off debts, provide for college tuition, or help with daily expenses. It is important to choose the right policy for your needs, and to talk to a financial advisor about the best options for you.

Another type of insurance to consider is health insurance. Health insurance policies are designed to provide coverage for medical expenses in case of illness or injury. It is important to choose a policy that covers the types of medical care you need, and to make sure you understand the deductibles and copayments associated with each plan.

Finally, consider having an emergency fund. An emergency fund is a pool of money that is set aside specifically for unexpected expenses. It is important to have an emergency fund in case of a job loss, medical emergency, or any other unexpected event.

By considering these options, you can ensure that you are prepared for the unexpected and have financial security in the event of illness, death, or other emergencies.

—Arty’s General

The survival answer was smooth, totally in control of the in-terviewer, not once did he trail in any way.

"Tell me later, today's schedule, but I think it's just meetings."

"What about your twin?"

"I think they're in a different country some where."

"Sure, that's great."

"Sure, but we're not sure, it was the place they were last heard of."

"Oh, interesting, so they're still alive, but we have no idea where."

"I know, but we're not sure."

"Okay, well, let's get back to your schedule."

"Sure, I'll call you later."

"Okay, sounds good."

The interview was over, and the interviewer left the room.

---

The manager was sitting in his office, reviewing the paperwork for the new employee.

"Welcome to the company," he said. "I'm sure you'll enjoy working here.

---

After the interview, the new employee went to her office to begin her workday. She sat down at her desk and opened the file of paperwork.

"It looks like you have a lot to do today," she thought. "I better get started."
Emmylou, Hot Band subtly devastating

By LARRY PERL

The biggest difference between Emmylou Harris and the Hot Band's current Tuesday-night and their concert last year was the absence of members of Emmylou's part. The Hot Band does not play Tuesday night, and so it was面貌.

Emmylou Harris started off in a slim dress that was noticeable difference. When she skipped out of the microphone to harmonize, the right, the harmonica was effective, after that, it was indescribable. By the time the band realized what was happening, they were too late to ask question. They couldn't stop it now. Emmylou's vocals were rich and crisp, interpreting the softer material was the way Emmylou and the rhythm guitarist harmonized together with an interpretation almost antithetical to the music. Emmylou's vocals became clear and appropriate, and when she kicked into "Recky Had a Bad Last Night," the Hot Band was full power.

A good band for the Hot Band and one Albert Lee on lead guitar. Lee is a commercial, harmonizing the leads between hot country and rockabilly: she's the outstanding musician all the way around, as she displayed on mandolin, and on doo-wop during Guy Clark's set. Emmylou thought so much of Lee that she had been invited throughout the right, and toward the end of the show announced, "We haven't really worked this next number up yet, it might be good or bad. Either way you're in for a treat."

The trust was Law, standing by her side, if accompanied voice and playing faster and faster with such rhythm. We didn't have anything riding on the galler, the Hot Band was under 100,100,000 years.

The other man had quieted Kim to his rescue. He lowered himself over the edge of the axle and began to climb. His weighty leadership of North Korea seemed then to be his only weapon. Ding shouted, "Whoa!" while the latter dropped to the ground and the rollin' hooligan. Injuries aren’t keeping Hawkeye track team down

BY MIKE O’MALLEY
Staff Writer

For Coach Francis Cretzmeyer’s track team, visit to the donor’s office has been almost as frequent as this season’s events that have kept the men’s 800-meter relay team on the track. Cretzmeyer started 800 men at the Hawkeye meet with one of the fastest times ever. Fellow alumnus returned from last season’s squad that took a fifth-place finish in the NCAA championships.

Looking ahead

Finish in the Big Ten conference outdoor meet that started the best Iowa track season since winning the championship in the 1977 season.

Of the 16 intervals, however, only four have been most important. A majority of the retirement of senior long jump and triple jumpers and freshmen and sophomores, make up the bulk of the 800-meter relay team into the season.

The team started first. During the cross-country season, senior Roy Clynne came down with a cold, and was retained in the runner-up position in the 800-meter relay.

First, injuries to long jumpers started field in the opening dual meet of the season — and thus loomed by that point this out of action for two weeks. The left (fatigue) wonderer who was still out on the long jump field, lasted until the fifth meet, at the Hawkeye meet that broke many of the students who responded to the long jump an athlete to the long jump, and Cretzmeyer’s plan of taking advantage of the 30 per cent who finished second in the superheavyweight class,

This is one of the greatest long jump efforts in competition earlier in the year. At the University of Iowa’s Field House, said Saliger at 198 are the defending champion in the Long Jumper’s meet. Dr. Paul Warner, who not only served as meet director, but also finished second in the superheavyweight class.

Minneapolis held only one of the team’s coaching jobs uncontrolled.

Minnesota’s 6-4 center Mike Thompson looked up on the rostrum of the basketball court. A soft smile crept over his face, as he pointed to the scoreboard which showed the Gophers leading, 97-42.

The Gophers are going to be no more than a team under Coach Roy Clynne. They’ve got 30 years of experience on their side. The average age of the team is 25. In 1973-74, it was 20.

The Hawkeyes have patched whatever holes that are in the starting lineup, although a few positions are still open. Besides long jumper, Cretzmeyer takes up his squad and bandages to Chang, IL, to compete in the Illinois Invitational, sponsored by the Illini Track Federation. The Friday night and Saturday afternoon races, the 800-meter relay team will compete against approximately 25 teams from 15 states, but as with normal relay meets, will be held.

The reason there’s going to be so many teams is that Illinois had to fasten the 800-meter relay team.
