The council met then with the governors of the 26 states and territories to discuss the compromises of the bill and still fail to make the bill for the general election in November.

Counselor Pat Foster stated "In order to ensure the maintenance of the housing code on July 1, we are going to have to make the necessary compromises to the bill to make it for the general election in November."

He added that in order topardy committees, the issue of consensus up to the vote of the member states to agree on.

The ordinance specifies the obligations of the landlords of Iowa City, requiring maintenance, rental agreements, deposits, evictions, and discrimination.

Counselor Foster added, "We are currently being inspected by the Department of Labor and Employment; violations vary from poor screening on witnesses to failure to payng fines.

The ordinance also mandates the use of full-time inspectors in the housing code, and that the council will be responsible for the thorough enforcement of the law.

The bill was then passed by a unanimous vote, with the council confident in its ability to pass the bill to the general election in November.
Local police install advanced radio system

By SARAH JARVIN
Staff Writer

One of the most advanced law enforcement communications systems in Iowa was recently installed in the Iowa City Police station to help improve service to the community.

A new radio system was brought into service after weeks of testing and months of planning that began with a need to replace the radio system that had been in service for 18 years.

According to Police Chief Harvey Miller, the system is made up of a new central station, a "repeaters" system that will take radio transmissions and forward them to the desirable location and finally, a "patch panel" system, a service that will transmit radio communications to Mineral Point, Iowa.

Miller said the system will improve the signals of the Public Works Department as that public works personnel will be able to monitor the radio in the case of road conditions.

The radio system will be able to speak to the Iowa City Police Department, the Cedar Rapids Police Department, the Iowa State University Police Department, the Iowa City Public Utility, the Iowa City Fire Department, the Coralville Police Department, the Coralville Fire Department and the Tiffin Fire Department.

The system also includes a "back - viewer access" to view maps of the city, a street index and buildings for the fire department. It also gives location, Miller said, the system will also give information to the public that may be of interest.

The new system is only in the standard patrol car now service the command car and far more units that scan all four frequencies and transmit on all four. It has more power, asked site, fire Port. The command car units at all times, but the patrol car only out of the patrol car, if the patrol car wants to go to Iowa can, he can go to a push button and the patrol car can get the tone and provincial to transmit or all four frequencies.

In the event that the tone is changed it itself, the base line is transmitted in the radio, and it can be made from any source, in any place.

All this changes are that, in the few cases there is Communication. Because of the Iowa City, the city had a contract with his city to do all radio work and it is completed.

The Iowa City Police Department installed one of the most advanced law enforcement communications systems in Iowa. The system can broadcast and receive on four bands or frequencies and is equipped with a "patch panel" so information needs can be called from the police car. It can be stayed from the station.

"Feb. 11: The Iowa City Police Department installed the new advanced radio communications system on the 13th floor of the Public Works building.

Neal Barden, executive director of the City of Iowa City's Public Works Department, was on hand to help with the installation.

Barden said that the new system will allow officers to communicate with other agencies in the area, including the Coralville Police Department, the Iowa City Fire Department, and the Coralville Fire Department.

The system will also allow officers to access maps of the city and nearby areas, as well as a directory of buildings and streets.

The new system will be especially useful during emergency situations, Barden said, as it will allow officers to coordinate their efforts and share information more efficiently.

Barden also thanked the officers for their dedication and service to the community.

"I'm proud of our officers," Barden said. "They do a great job, and this new system will only help them do their job better."

N-bomb rejection should be next

The BI bomber is dead, courtesy of President Carter. Perhaps we should praise California for helping deliver this campaign piece that has actually been kept. Perhaps we should praise the folks at the Pentagon for being so eager to see the enemy wiped out, and for making sure that the悻 elimination is achieved. The ambition is clearly stated in the administration’s recently issued Nuclear WMD/DPR report, which suggests that we should aim for a world without nuclear weapons. This is certainly a laudable goal, and one that we should all strive to achieve. But it is also important to recognize that this goal is not achievable within a reasonable time frame, and that there are other measures that we can take to reduce the risk of nuclear war.

The first step in reducing the risk of nuclear war is to ensure that the United States retains a strong and credible nuclear deterrent. This is necessary to deter potential adversaries from considering the use of nuclear weapons, and to reassure our allies that we will defend them if they are attacked. The United States currently has a strong and credible nuclear deterrent, and it is important to maintain this capability in the face of continued efforts by some nations to develop nuclear weapons.

The second step in reducing the risk of nuclear war is to pursue a comprehensive nuclear test ban treaty. This treaty would prohibit all nuclear explosions, and it would serve as a verification mechanism for the Non-Proliferation Treaty. The United States has been a strong advocate for a comprehensive nuclear test ban treaty, and it is in the interest of all nations to pursue this goal.

The third step in reducing the risk of nuclear war is to reduce the number of nuclear weapons in the world. This can be done through a variety of means, including negotiations among the nuclear weapon states to reduce their inventories. The United States has been a leader in this effort, and it has pledged to reduce its nuclear weapons stockpile by 50 percent over the next decade.

The fourth step in reducing the risk of nuclear war is to ensure that the United States has a robust and effective missile defense system. This system would be able to intercept missiles launched against the United States, and it would provide an additional layer of defense against potential attacks.

The fifth step in reducing the risk of nuclear war is to ensure that the United States has a strong and credible conventional military capability. This is necessary to deter potential adversaries from considering the use of conventional weapons, and to reassure our allies that we will defend them if they are attacked.

The sixth step in reducing the risk of nuclear war is to ensure that the United States has a strong and effective non-nuclear deterrent. This is necessary to deter potential adversaries from considering the use of non-nuclear weapons, and to reassure our allies that we will defend them if they are attacked.

The seventh step in reducing the risk of nuclear war is to ensure that the United States has a strong and effective economic and diplomatic capability. This is necessary to deter potential adversaries from considering the use of economic and diplomatic measures, and to reassure our allies that we will defend them if they are attacked.

In conclusion, the United States should continue to pursue a comprehensive nuclear test ban treaty, reduce the number of nuclear weapons in the world, ensure that the United States has a robust and effective missile defense system, ensure that the United States has a strong and credible conventional military capability, ensure that the United States has a strong and effective non-nuclear deterrent, and ensure that the United States has a strong and effective economic and diplomatic capability. These steps will help to reduce the risk of nuclear war and ensure the long-term security of the United States and its allies.

ROSS’ FUTURE ON COMMITTEE STILL UNDECIDED
by ANITA KAFAR
Delta, N.Y.

The reorganization of Desert Iowa, DSO political science professor, in the Iowa City
Project Finance blocked at least $500,000
The commission was authorized last year by the state of Washington, to audit at least $25 million in county
Tyring Regina’s budget, and to check against illegal and improper activities.
Ross, chairman of the commission and president of the local wing of the DSO, stressed that the
commission was authorized last year by the state of Washington, to audit at least $25 million in county
taxes, and to check against illegal and improper activities.

Ross said that the commission does not have the power to audit the county’s books effectively to do
its job. He said the legislature should empower the commission to keep its books and proceed with illegal
campaign finance.

Currently, the commission can only audit the county’s books effectively to do its job. He said the legislature should empower the commission to keep its books and proceed with illegal
campaign finance.
Newcomer Maltbie tops British Open

THURSDAY, September 2 (1977) — Bob Maltbie finished the first round to lead three under par as Lowrey, the leading British Open 1977, with scores of 71, 71, and 70, respectively. Maltbie, who celebrated his 30th birthday July 23, has already climbed to No. 10 in the world rankings and tied for second to last week's Open Championship.

Maltbie, who celebrated his 30th birthday July 23, has already climbed to No. 10 in the world rankings and tied for second to last week's Open Championship.

Three share O-C lead

COAL VALLEY, Ill. (PG) — Archie McNickle, freshman, Florida, and PGA tour regular Phil Doherty and Maltbie were tied at four above par for the first round of the 50th Open tournament, held at the 18-hole, par-70, 6,749-yard Firethorn Country Club.

Doherty scored a 79, a one-shot better than McNickle and Maltbie, both of whom scored 80.

Maltbie had a four-under-par 68 to take the lead ahead of Doherty and McNickle. The 36-year-old Maltbie, a native of Australia, had a chance to win the tournament yesterday but lost to Jack Nicklaus, despite a 68.

Maltbie, who was born in Melbourne, Australia, attended the University of Oklahoma before coming to the U.S. to play golf. He has already won his first professional tournament.

Maltbie's 68 was the lowest score by an American in the first round of the Open.

Steve Wurzky, the defending champion, was tied for second with Doherty and McNickle.

Steve Wurzky, the defending champion, was tied for second with Doherty and McNickle.

Ballard named new tennis coach

COAL VALLEY, Ill. (PG) — Archie Ballad, 35, a native of England, has been named the new tennis coach at the University of Nebraska.

Ballad, who has been coaching at the University of Nebraska, was introduced by the university's athletic director, who said Ballad was the best candidate for the job.

Ballad has been running his own tennis program for the past three years.
