Resident abuse at county care facility alleged

By JENNY ROBERTS

The underbudget rate at the UI low for Big Ten

The percentage of students entering college at the University of Iowa is the lowest of any Big Ten school, according to a recent survey of the nation's 10 universities.

The survey, conducted by the National Center for Education Statistics, showed that 51.5 percent of Iowa students entered college last fall, compared to 55.2 percent at the University of Wisconsin, 56.3 percent at the University of Minnesota, 57.0 percent at the University of Michigan, 57.2 percent at the University of Illinois, 57.4 percent at Northwestern University, 58.0 percent at Ohio State University, 58.1 percent at Penn State University, and 58.9 percent at Indiana University.

The percentage of students entering college in Iowa was the lowest in the Big Ten, according to the survey. The percentage of students entering college in the nation as a whole was 54.6 percent.

The survey also showed that the percentage of students entering college in Iowa has decreased from 55.5 percent in 1988 to 51.5 percent in 1997.

The survey findings were based on a sample of 2,500 students enrolled in Iowa colleges and universities.

Mental stress: a peculiar, incurable bogeyman

By LINDA ROBERTS

Mental stress: a peculiar, incurable bogeyman

Mental stress is a peculiar problem that has been described as "a peculiar, incurable bogeyman." This statement is often attributed to former President Gerald Ford, who said in a speech, "Mental stress is a peculiar problem that has been described as "a peculiar, incurable bogeyman." This statement is often attributed to former President Gerald Ford, who said in a speech, "Mental stress is a peculiar problem that has been described as "a peculiar, incurable bogeyman." South Africa silences blacks

JOHANNESBURG, South Africa - The纱Ffrican government Wednesday defended its refusal to allow a demonstration by black opposition in the city, saying the protest was being led by white students and that it threatened the peace of the nation.

The government said it was concerned about the possibility of violence and disruption, and that the demonstration could undermine the country's efforts to promote national unity and reconciliation.

The demonstration was organized by the South African Communist Party (SACP) and was expected to draw thousands of blacks, who have been protesting against the government's policies of racial segregation and economic inequality.

The SACP has been implicated in acts of violence, including the killing of police officers, and the government has been forced to take action to prevent further disruption.

The government also said it was concerned about the possibility of violence and disruption, and that the demonstration could undermine the country's efforts to promote national unity and reconciliation.

Concert

CONCERT

Concerts are a great way to enjoy music and socialize with friends. They offer a variety of genres and performers, allowing you to explore different types of music and discover new artists. Whether you prefer rock, classical, jazz, or anything in between, concerts provide an exciting and immersive experience.

When attending a concert, consider the following tips to ensure a great experience:

1. Choose the right venue: Research different venues to find one that suits your taste. Some concert halls are known for their acoustics, while others are more intimate for smaller acts.

2. Purchase tickets in advance: This helps avoid potential surprises, such as sold-out shows or high ticket prices.

3. Plan your outfit: Consider the performance type and venue when choosing your attire. For example, a rock concert might call for a casual or band T-shirt, while a classical concert might require something more formal.

4. Arrive early: Give yourself enough time to navigate the venue, find your seats, and familiarize yourself with the area.

5. Be respectful: Let the performers and other attendees enjoy the music without distractions. Turn off your phone, refrain from loud conversations, and stay seated during the performance.

6. Support the artists: If you enjoy the music, consider purchasing merchandise or leaving a tip for the performers.

Remember, concerts are meant to be enjoyable experiences. By following these tips, you can maximize your enjoyment and contribute to a positive atmosphere for everyone present.

Calls for K

Jaw

WASHINGTON (AP) - President Donald Trump is calling for a "no-off" zone in the U.S. to address drug trafficking.

The president made the remarks during a speech Wednesday afternoon in Chicago, where he said the law enforcement community has been "underfunded for far too long." He also praised the efforts of law enforcement agencies across the country.

"We must be strong against drug traffickers," Trump said. "We need to have a no-off zone where people will not be able to come into our country and sell illegal drugs."
A career in law— without law school.

What can you do with only a bachelor's degree?
Now there is a way to get even more out of that degree than you thought possible. Why not use it to get the training you need for a career in law?

Three months of intensive training can give you the background to take the LSAT, the first step toward law school admission.

Your choice—use the college credit toward a degree, or use the training for career advancement.

For information or to reserve a space in the next session call, 315-724-0374.

Contact your place of employment for more information.

A career you can start tomorrow!
California court strikes blow for the gullible birds

WASHINGTON, D.C. — The California court has ruled that when two people living out of wedlock break up, one partner can compel the other to divide his or her property just as though they had been married. The ruling, which is expected to be overturned by state courts across the nation, is particularly striking since a "Breach of Promise" case. Or, as Richard Sisley, a judge on the bench of the Best Virginia Superior Court of Appeals, in the September

Proposed jail facility needs bond approval

By Don Israel

The Iowa City community school district and the Iowa City Community development agency have been negotiating for a new jail facility. The Iowa City school district has approved the plan, and the Iowa City council will vote on the proposal at its next meeting.

The proposed jail facility will be located on the corner of 1st Avenue and North Street, near the old Iowa City jail. The new facility will include a 20-bed inmate capacity, a 10-bailiff capacity, and a 20-car parking lot.

The council will vote on the proposal at its next meeting, and if approved, the Iowa City school district will issue a bond to finance the construction. The bond will be sold to the Iowa City community development agency, which will then issue a new bond to finance the construction.

The proposed jail facility will be designed to meet the standards of the American Correctional Association, and will include a security system, inmate treatment facilities, and a staff training program. The facility will also include a fitness center, a library, and a chapel.

The proposed jail facility will be built on a 10-acre site, and will include a 50,000-square-foot building. The facility will be constructed with materials that meet the standards of the American Correctional Association, and will include a security system, inmate treatment facilities, and a staff training program.

Council to repeal storm water rule

By ARTHUR DICK
Staff Writer

Failure to attend a hearing the Iowa City Council Tuesday night is likely to lead the Iowa City staff to prepare a repeal of the storm water management ordinance to exempt a local developer from compliance. The ordinance requires property developers to control flooding. Councilman John Nolle in the absence of Robert Vevera and Jory Berlin voted to repeal the ordinance. By a 3-2 vote, the council would remove the local developer from compliance. The council would be repealed long enough to enable the council to approve the ordinance as submitted by the Frantz Corporation. The ordinance would then be reappraised.

University Heights may lose city's municipal services

By ARTHUR DICK
Staff Writer

University Heights must now look elsewhere to purchase many of its municipal services, according to a letter Iowa City sent to University Heights earlier this week. University Heights was unable to agree to purchase a large portion of its storm water protection, refuse collection and other city services. University Heights now pays about $30,000 a year for municipal services and has been paying for a long time. University Heights officials have said the services are worth about $180,000 a year.

Joan Loewen, mayor of Iowa City, on Tuesday's City Council meeting that "the time has come for University Heights to decide what it wants from Iowa City. If University Heights would not give University Heights a special rate for university services. It really is up to them as to where they're going to go with these services." University Heights Mayor John Nolle said that the city's rates are too high for University Heights and "we need to do something about it."

Police Beat

M.D. mum on Elvis’ drugs

MEMPHIS, Tenn. (UPI) - Though medical examiner Dr. Jerry L. Fulscher, area representative for Fuji Chrome, said he can’t comment on that, said Fulscher, who displayed a three-color Fuji camera on Friday’s body Aug. 16.

Fulscher repeatedly denied seeing any evidence of drugs as a contributing factor in Presley’s death. He has insisted there was no evidence of either drugs or a regime of prescription drugs. "There wasn’t any evidence of me or anything else," said Fulscher.

Among the drugs found in Presley’s blood, the newspaper reported, were several tranquilizers and painkillers such as Valium, Demerol, and codeine and an antibiotic, Amoxicillin, which is a long-term antibiotic. The only long-term antibiotic Fulscher indicated was penicillin.

The medical examiner said he probably had a 20-months delay in the autopsies, but declined to explain why the examiner's report was delayed.

Fulscher had previously stated that Presley’s body was examined Aug. 16.

The examiner said he was not surprised to find the drugs in Presley’s blood. "It’s not unusual to find drugs in a person’s blood," said Fulscher.

In Washington, D.C., Pennsylvania Avenue runs from the White House to the Capitol on a wide boulevard – Iowa Ave. – which had as its centerpiece the United States Capitol and a neighborhood of homes in the wooded area beyond. Iowa Ave. runs the length from "Capitol Hill" to "Avenue of the States". The same idea was used at other locations as well. In Woodlawn, a number of other notable avenues were created. Once Iowa Ave., whither the legislature had moved its seat, became a large focus for the location of society and politics in the city and the national government. When the state capitol was relocated at Illinois Ave., the same approach was used to set the location of society to be a focal point for politics as well. The same idea was used in Woodlawn, a number of other notable avenues were created. Once Iowa Ave., whither the legislature had moved its seat, became a large focus for the location of society and politics in the city and the national government. When the state capitol was relocated at Illinois Ave., the same approach was used to set the location of society to be a focal point for politics as well.

- "It's a very attractive place as you can see. It's full of trees, shrubs and flowers," explains I.M. U. senior Keith Eskin. "It used to be where all the political parties held their events.

- "Most of the houses," she says, "were built between 1899 and 1909." One such home was built in 1899 by a local lawyer and manager named Eichberger. The lawyer migrated to California around the turn of the century, he sold the house in 1909 and it remained vacant until the 1960s. The attorney who owned it has since died, although the house is still occupied.

- Katherine Webster is a candlemaker by trade and has a small workshop behind the house. However, in her spare time she has done a little research on Woodlawn's history.

- "Woodlawn," she says, "were built between 1899 and 1909." One such house was built in 1899 by a local lawyer and manager named Eichberger. The lawyer migrated to California around the turn of the century, he sold the house in 1909 and it remained vacant until the 1960s. The attorney who owned it has since died, although the house is still occupied.

- Two houses further down the street—away from the bustle of Iowa Ave. and traffic and the residents claimed the noise of the kids playing disturbed them.

- 

- "Woodlawn."

- "I own the alley in back. I own the street behind my house. I live in Woodlawn, a number of other notable avenues were created. Once Iowa Ave., whither the legislature had moved its seat, became a large focus for the location of society and politics in the city and the national government.

- 

- "Woodlawn."
**Concorde hits NY, quietly**

NEW YORK (UPI) — The supersonic Concorde's first stopover in the United States was not the site of a protest, but that didn't mean the jet was making little noise as it taxied into Newark Airport.

On Wednesday, the Concorde, the world's first supersonic passenger jet, made its second-ever scheduled stopover in the United States after taking off from Paris. The Concorde had taken off from Paris on Saturday and made a stop at Dulles International Airport in Virginia before heading to New York.

The Concorde, which is used by British Airways and Air France, has been controversial since its introduction in the 1970s due to its noise and environmental impact. But for this particular stopover, the Concorde's visitors were likely more interested in the jet's performance than in its noise level.

The Concorde is capable of traveling at speeds of up to 1,300 miles per hour, and it can cover the distance between New York and Paris in just over two hours. The jet is also capable of carrying up to 100 passengers on its two decks.

For the Concorde's passengers, the trip was a high-speed, luxurious experience, with comfort and convenience being the top priorities. But for the surrounding communities, the Concorde's sound levels could be a concern. The jet's noise has been known to disturb nearby residents, and efforts have been made to mitigate its impact.

The Concorde's arrival in New York was part of a larger tour of the United States, which included stops in Chicago, Los Angeles, and San Francisco. The tour was designed to showcase the jet's capabilities and to generate interest in its use.

Despite the Concorde's noise, the jet was welcomed with open arms in New York, and the city's airport authorities made it clear that they were committed to ensuring its success. The Concorde's arrival was a step forward in the jet's journey towards becoming a permanent fixture of the global aviation landscape.
Security at airports lax

By United Press International

Security is on the line at many airports around the world that hijackers can sit at any time they choose. The biggest exception is in New York and Los Angeles, where passengers are herded into buildings.

The military dictatorship in South America has been facing quite a few problems. There are some hijackers, ransom is not paid, and planes are likely to end up in the desert.

In Fiji, police officers are patrolled by the military, and the government is trying to pacify the rebels.

To avoid terrorist attacks, the passengers on a plane should be checked at the airport. The airline companies have agreed to this, but there are still some hijacks.

To get passengers to leave the plane, the terrorists have to make it clear that they are not taking any of the passengers.

The terrorists have been known to threaten the passengers with death or destruction.

To avoid such threats, the passengers should be encouraged to leave the plane.

The passengers should be given the option to leave the plane.

With more security measures,
The group started almost five years ago as a Polk Avenue act, popular with Polk students. From the stories they tell that the group started off with just a bass and guitar, then added on at guitar and bass, while the drummer who had become interested in playing drums, traded off and on between the bass player and the bass, while the bass player stood in a trance behind his kit yet he played with a rabid enthusiasm. The group started out to the Polk Avenue people playing a project of purely Polk Avenue jazz. "Our underlying concept was that we could do anything," said Balladino.

The group started off to the Polk Avenue people playing a project of purely Polk Avenue jazz. "Our underlying concept was that we could do anything," said Balladino.

They pledged to the University of Pennsylvania "that we would go on to be the leaders of the Polk Avenue people. From the stories they tell that the group died because political bias was involved. They then moved almost directly into a style of music that was more acceptable to their audience.

Six months ago Musica Orbis put out the first album entitled "Longhady Records. The sound of the album is softer and more refined than the music of the band that plays in concert and was made primarily for reading late and people who were in one of the groups and they sold out at 1,400 copies. Surprisingly enough, the record sold out to be more "on the scene" and play was actually increased," said Balladino. It was reviewed by Billboard's "ering All Jazz, Pop."

The record is now being distributed nationally and will be distributed in the United States. The record is in the process of being mixed and is a number of original recorded recordings made at Southwestern University. Although it's happy with several acceptance, Musica Orbis is also a hit on most of the concert tours. They pledged to the University of Pennsylvania "that we would go on to be the leaders of the Polk Avenue people. From the stories they tell that the group died because political bias was involved. They then moved almost directly into a style of music that was more acceptable to their audience.

The group is from the left: Dave Clark on bass, Bob LoulseDe on organ, Tom Braselton on drums, Kitty Braselton on vibes, Janey Kanister on guitar and vocal, and Stewart Keitel on bass. "Our underlying concept was that we could do anything," said Balladino. The group started off to the Polk Avenue people playing a project of purely Polk Avenue jazz. "Our underlying concept was that we could do anything," said Balladino.

Alum confirms NY stage woes

BY JAY WALLACE
Alicia Finlay Editor

An informal email by a professor from the department of theater arts at New York University has led to a discussion of the difficulties facing the theater program.

The professor expressed concern about the financial situation of the program and the need for better support. The discussion was initiated by a professor from the department of theater arts at New York University and has since been shared among the department faculty.

The professor noted that the program has faced financial difficulties in recent years, with a decline in funding and a decrease in enrollment.

The professor also expressed concern about the lack of opportunities for students to gain practical experience and the need for better resources and support for the program.

The professor suggested that the university could provide more support for the program, including additional funding, to help address these challenges.

The discussion has raised awareness among the department faculty about the need to address these issues and has sparked interest in exploring potential solutions.

The professor encouraged the faculty to continue the discussion and to consider taking action to support the program.

Woody: TV replays and dishonest fans

Woody Hayes is considering college football. It was really only a matter of time, because Woody Hayes, the master of hypocrisies, double standards and foot-and-mouth disease, couldn't wait to be on the coaching cusp of 20 years, when he will have a career record of 227 wins and no defeats.

There's something rotten in Hayes' behavior that he wants to change. He wants to change the rules, so his team can catch up. Even though he'll still be under indictment for leading a group of ten thousand people in a pre-game chant that ended with the phrase "we can get away with murder," he wants to change the rules.

And in truth Woody's latest crusade to clean up his game stems from developments during his most recent gauntlet. Hayes witnessed some facets of the game that never before have been seen. In the case of instant replay machines, the concept of what else the Hayeys could defend on four consecutive attempts to get in the end zone from the one-yard line. There is positive Paydirt creating the goal line at least one of those plays, and he's sure an instant replay machine could have made the right call.

Hayes talked the off-field press after the victory over Purdue as he walked his left leg in the yellow brushes. "The Burkey officials," he bawled to a football writers' meeting on the field. "If the Burkey officials had gotten the play right, there should be a five-year instant replay on the request of the coaches, especially the replay." Hayes told a football writers' meeting on the field. "The Burkey officials had gotten the play wrong, there should be nothing."

Hayes cut short the statement as a fuller of the Iowa fans in the stands walked past him.

Hayes admitted that Iowa fans were "usually uncooperative and dishonest," but they are always above reproach when it comes to their own teams. Woody's instant replay machine would have picked them up.

This was not the only recent chapter in this season of instant replay. A few days after the Purdue game, Iowa fans crossed the goal line on at least one of those plays, but didn't have their instant replay machines. Woody's instant replay machine would have caught that too.

And inside the Kinnick Stadium, a fan who wanted to catch a glimpse of Hayeys in the stands was detained by the police for two days. Woody's instant replay machine would have caught the incident.

NBER 132/13 - NO. 1 in IM poll

The second round of the bowl season was held last Sunday and Wednesday as the West Dennis Whitehorses, the Cato-Crane and the Iowa Hawkeyes were advanced to the Playoffs.

The only bowl games played last Sunday: WOCIU against Iowa, and the two teams were advanced.

The second round of the bowl season was held last Sunday and Wednesday. The Hawkeyes were advanced to the Playoff as the No. 1 team.

Sleazy world of John Waters

By BILL CONLEY

 Nobody makes movies like the movies John Waters makes.

Waters says he is just trying to make American film comedies, but the comedies he makes are a long leap past the films he made while still a student at John Hopkins University.

Filmography

In 1976, two of the films from his second film, Pink Flamingos, a 1970 epic that made

Waters a cult figure, was released in theaters and supported in Japan in 1970. The same year, his first film, Ed Wood, was released, and it

Waters has been described as a "sleazy world of John Waters." He is known for his unique style of filmmaking, often characterized by...

Randall Newman's

Little Freshmen

Randy Newman's

twisted visions

By J. CHRISTENSEN

Randy Newman's

has always puzzled me. I can just never figure what he means to say. And if I try to figure it out, it just makes no sense at all. But now that I've heard his latest album, I'm beginning to see the light...

From the first notes of the title track, I knew this was going to be something special. The music was so catchy, I couldn't help but sing along. And when he started singing, I was completely sold.

Newman's music is a perfect blend of comedy, pathos, and social commentary. He takes on issues like race, class, and gender in a way that's both humorous and profound.

The second side of the album is even better. Newman's songs are so powerful, they make you think about the world in a whole new way. I can't wait to see this album live. It's going to be a total showstopper.

**Hooker likes to boogie**

John Lee Hooker got a welcome in Iowa City that fills him with the king of boogie, and at the end of a round of interviews, he said, "The people were hungry for music, and I think they got it." At the information desk of the show at Gabe’s in Winterset, he had his usual happy fans waiting for him to arrive. John Lee Hooker — who was already planning to record a new album for his next album, "Blues Deluxe," and had just been named in the recent issue of Rolling Stone — was cordial to the members of the Walter Scott high school band, who had been sent to his gig by a friend of theirs.

The band also protected their ticket seats, but Hooker managed to sneak back in his direction.

I’d been noticing that for a man who had been touring for so long, Hooker didn’t seem to be lacking fans. His fans were so enthusiastic, they’d be waiting long hours for him to sign autographs.

But the biggest surprise came when Hooker was asked about his next album. "I think I’m thinking about it," he said. "But I got my own body back on the line." he added with a smile.

The rock music scene in Iowa City is dominated by the group "The Fiddlers," associated with — he moved to

*A woman can make anything sing the blues*

When the 24-year-old blues singer arrived in Chicago in 1977, it was as if the right opportunity had come along. The blues veteran had just been featured in a book, "Blues Deluxe," and was looking for new material to play.

But enough: it is clear that Hooker has promised his fans a new album, and it is a good one. His next album is due out later this year.

The blues tradition, with its rich history and vibrant personalities, is still alive and well in Chicago. Hooker is one of the few blues pioneers who have lived long enough to reap the profits of the blues boom in these times, and to help shape the current sound of the blues. His story is a testament to the power of the blues to connect people, to bring them together, and to inspire them to create new music.
The autumn river runs shallow and slow

BY JOHN PETERSON

While the Mississippi River has long been the setting for stories of Mother Nature's front-page antics, the Maquoketa, a small river that runs through the backcountry of eastern Iowa, has its own unique charm. The river is a narrow, winding stream that flows through a landscape of rolling hills and fields, offering a glimpse of the region's natural beauty.

In order to preserve and protect this natural treasure, the federal government has declared the Maquoketa River a National Scenic River. The river is about 120 miles long and flows through three counties: Jackson, Marion, and Clayton. It begins in the south-central part of the state and ends in the north-central part.

As we drove down Highway 17, past the town of Maquoketa, the river seemed to stretch out before us, its banks lined with trees and shrubs. The air was crisp, and the leaves on the trees were changing color, indicating the arrival of fall. We saw several birds, including blue jays and robins, darting here and there, adding to the serenity of the scene.

John put the new Plymouth up to speed, and I marveled at the smoothness of the ride. The engine was powerful, and the car handled well on the winding river road. We had planned to spend the day on the river, and now we were preparing to set out.

The Maquoketa River is one of the last remaining free-flowing rivers in the state, and it is home to a variety of fish species, including walleye, smallmouth bass, and northern pike. We were looking forward to fishing, but we were also concerned about the state of the river. The water levels had been low, and we were worried that the river might not be as good as we had hoped.

Finally, we reached the dam where the river empties into the Maquoketa State Park. The dam was quite large, and we could see the pools of water that formed behind it. We decided to fish from the shore, and we found a good spot on the riverbank. We set up our fishing gear, and we were ready to go.

We caught a few fish, but they were small. We were disappointed, but we were not discouraged. We spent the rest of the afternoon fishing, and we enjoyed the beauty of the river.

As the sun began to set, we decided to head back to town. We were tired, but we had had a good day. We looked forward to our next adventure on the river.
