ILO warns of cutbacks, fears Soviet domination

Reaction mixed over minimum wage hike

New York City's Sturgis bulletines will hinge on the outcome of the latest trial to which Harvey Oswald was linked.

The availability of a new blood test for the identification of cancer cells and the continuing success of laser therapy are helping to boost optimism among many physicians, but many questions remain about the long-term efficacy of these treatments.

Sworn testimony taken in care probe

Sworn testimony was taken by Johnson County Attorney Jack Dooley in an investigation of the possible malfeasance of upset care facility residents by a
administrative Richard Kelley. The investigation stems from a report received from the facility for residents to have been physically assaulted and treated cruelly. In his report, Dooley has noted that such incidents have occurred several times at the facility.

Berkowitz trial to get new judge

NEW YORK (AP) — The judge in the citizen's case that led to a mistrial in the trial of a state tax commissioner has been replaced.

Justice Department Tuesday announced that the judge in the case, Judge H. T. Stackhouse, had been replaced by Judge D. M. Bound, who will serve as the new judge.

The case involves a dispute between the state and a private company over the assessment of a piece of property.

Dodie Kelley, who was the lead defense attorney in the case, said the change in judges was necessary because of a conflict of interest.

Four former employees of the company have been charged with fraud in the case.

A woman who has been charged with the same crime is also scheduled to appear in court.

The court is expected to hear arguments from both sides on the matter.

Extension for ERA endorsed

WASHINGTON (AP) — The House decided Tuesday to extend the deadline for the ratification of the Equal Rights Amendment (ERA).

Debate continued on the floor, with debate on the House subcommittee on constitutional rights, which cannot reverse its decision.

Lawrence H. Silber, a professor of constitutional law at the University of Chicago, was quoted as saying, "If the ERA is not ratified, it will not be a legal amendment.

By failing to ratify the amendment, the House is preventing Congress from having the final say on the matter.

The present deadline for ratification is June 30, 1983, but the extension will be for three years.

"It is my view that the extension is necessary for the sake of the constitutional rights of all Americans," Silber said.

The extension will give Congress more time to consider the ERA and to reach a decision on whether to ratify it.

The vote in the House was 235-192, with 55 abstentions.

The extension will go into effect immediately, and the final deadline for ratification will be June 30, 1986.

In other national news:

Robert Kennedy, a lawyer representing the Vatican, was quoted as saying, "The Vatican is not a sovereign state, but it is a religious institution.

The extension will give Congress more time to consider the issues involved in the ERA.

The vote in the House was 235-192, with 55 abstentions.

The extension will go into effect immediately, and the final deadline for ratification will be June 30, 1986.

SS tax rise may hit workers
by HERMAN L. SMITH

Workers and consumers may rue the hour of dealing with a tax rise next year if the Senate's tax-cutting
bills are passed by the federal government.

The Senate version of the bill would increase taxes by $5 billion in 2018 and $20 billion in 2019.

If such a regulation were to be passed, workers and employers would have to pay more of their income into the federal treasury. Such an increase in taxes could prompt a slowdown in economic growth as companies and individuals cut back on spending and investment.

In addition, the expected increase in Social Security taxes by $30 billion per year could further contribute to a reduction in tax revenue for states and municipalities, putting additional financial burden on local governments.

In response to these potential challenges, Congress must work together to find solutions that balance the need for fiscal responsibility with the imperative to support a vibrant economy and ensure the well-being of all Americans.

This requires careful consideration of the effects of proposed tax increases on our workforce and individuals' financial health.

As the Senate moves forward on tax legislation, it is crucial to consider how these changes will impact workers and consumers alike.

We must ensure that any tax increases are implemented in a way that promotes economic growth, social equity, and the long-term prosperity of the nation.

In the meantime, individuals can take action to prepare for increased Social Security taxes by adjusting their budgeting practices and considering alternative income sources.

By working together and ensuring that tax policies are designed with the interests of all Americans in mind, we can create a more stable and equitable future for all.

Children’s minds soar at Willowwind

By L.A. Peaseon
Special to The Daily Iowan

From: After the nuclear explosion, Science Fair III, put together under the guidance of Gail Donnell, head of the academic department, is drawing near to its end. Among the events scheduled is a presentation and demonstration by a student of Willowwind High School. The presentation is titled "The Grandparent of Tomorrow" and is scheduled for 7:30 p.m. on Nov. 13 in the Hancher Auditorium.

Postscripts

Exhibition

Tickets are available at the ticket booth of the Union Station on Friday afternoon, Nov. 10. The exhibit, sponsored by the Union Station, will feature an exhibit of paintings by local artists. The exhibit will be open to the public from 10 a.m. to 5 p.m. daily until Nov. 17.

Army ROTC

Volunteers

The ROTC students will be on hand to answer questions and give advice to those interested in joining the military. The event will take place in the ROTC building on Nov. 11 from 12:30 to 2:30 p.m.

School of Music

The annual Christmas Concert will be held at 8 p.m. on Nov. 12 in the Hancher Auditorium. The concert will feature a variety of musical performances, including vocal and instrumental pieces.

Workshop

A workshop on the art of pottery will be held from 10 a.m. to noon on Nov. 13 in the Hancher Auditorium. The workshop is open to the public and will be led by a local potter.

Horseback Ride

A horseback ride through the Willowwind Center will be held on Nov. 14 at 10 a.m. The ride will be led by a local horseback riding instructor.

Field House

The Field House will be open for public use on Nov. 15 from 2 to 4 p.m.

VITAL

We wish to inform our local community of a problem which has been brought to our attention. In recent months, there have been reports of break-ins at several local businesses. We urge all business owners to take precautions and ensure the safety of their establishments.

A Child at Willowwind School, a private, alternative-grade school, takes a chance on pressure which held him down at the school and performed almost exclusively by the students.

"For many years, Willowwind has been a center of controversy. The school was established in 1969 and has been characterized by its non-hierarchical structure and its emphasis on personal growth and self-discovery. The school's approach to education is based on the belief that each student is unique and has the right to explore their own learning style.

In recent years, Willowwind has faced challenges such as financial difficulties and legal battles over its educational methods. However, the school remains committed to its core values and continues to provide a supportive environment for its students.
At the mention of ballet, they all began to dance

By JOHN PETERSON
Staff Writer

"From now on you will listen carefully to what I say," Tom DeLuca said. "Keep your eyes open and your mind clear. Keep your hands apart and eyes wide open. You will become very sensitive to hypnosis."

But he was talking to Bar volunteers. Only 14,400 Bar volunteers however, he warned, that there were four kinds of Bar volunteers. There were those who felt their life's work was "to bring happiness to all the people in the world." There were those who were "just up tight people." There were those who said, "I really want to be hypnotized." And there were those who said, "I'm a doctor who used it to help people." All responded no, or that they weren't certain what had happened. Then, the hypnotist, practice what they preach.

These Bar volunteers were very susceptible to hypnosis. That there were four types of Bar volunteers. One felt they might not be hypnotized. The one who appeared to be hypnotized was Tom Deluca. The one who said they weren't certain what had happened. Then, the hypnotist, practice what they preach.

After having them open their eyes, DeLuca said, "I suppose no one is very good at stopping anything."

DeLuca learned hypnosis from a doctor in New York City who used it to help people lose weight. He said, "I was very good at stopping anything."

Hypnotist Tom DeLuca told in a radio interview on the Bar floor that was crowded. Walking seated facing the audience. One member of the audience appeared to be very good at stopping anything. The one member DeLuca later reported had "touched down before the man's feet." DeLuca learned hypnosis from a doctor in New York City who used it to help people lose weight. He said, "I was very good at stopping anything."
Committee studies television sports

WASHINGTON (UPI) - The executive committee of the American Cable Assn. opens two days of meetings here Tuesday to discuss relationships between the television networks and the sports community.

The committee, meeting on the campus of George Washington University here, will be the "Budweiser" of the cable industry, a spokesman for CBS and the one repeatedly referred to as "steel." Under its leadership, cable operators have joined networks in the struggle to buy more sports events.

The warm weather has stirred up interest in sports, and with the college football season now in full swing, the interest is expected to continue.

The committee, headed by Robert F. Bennett, president of ABC Sports, Inc.; and Edward Cloud and Alan Wallace, both of ABC Sports, Inc.; and Barry Frank, senior v-p for special events, who is attending on behalf of ABC News, will meet Tuesday and Wednesday.

This committee is the only group in the industry with enough power to call the shots on sports events to both networks. It was assembled in 1957 to prevent a repeat of the situation that occurred in 1956 when the networks were not able to agree on a rate for the right to broadcast the college football season.

The meetings this week will take place as the networks are preparing for the broadcast of the next college football season, which begins in September.

The committee's agenda includes discussions on the rights of the networks and cable operators and the rights of the college football conferences and the universities that make up those conferences.

In other news, the committee agreed to study the possibility of having a national cable network, or a network of regional networks, to broadcast college football games.

This would be similar to the plan that was worked out between the networks and the American Cable Assn. in 1957, when the networks agreed to split the rights to broadcast the college football season.

The committee also agreed to look into the possibility of having a national cable network, or a network of regional networks, to broadcast college football games.

On The Line with the Di Sports Staff

The week's game feature: University of Iowa vs. University of Pennsylvania. The game will be played at 2:30 pm on Saturday at Kinnick Stadium in Iowa City. The Hawkeyes are favored by 10 points in the game.

This week's feature: "The Game Plan." This feature will be a look at the game plan of each team, including the strengths and weaknesses of each team.

The game will be a battle of two teams that have had a lot of experience in the Big Ten Conference. The Hawkeyes have won three straight games and are currently ranked 10th in the nation.

The Penn Quakers have won four straight games and are currently ranked 11th in the nation.

Injury sidelines Juice

Simpson's career may be over

Simpson's season reached a turning point when he underwent surgery on his knee in early 1978. The surgery was done on February 1, 1978, and Simpson was expected to return to the lineup in a few weeks. However, a complication developed during the surgery, and Simpson was unable to bear weight on his knee. Doctors diagnosed a cartilage tear, and Simpson was placed on the injured list.

The injury was a severe setback for Simpson, who was considered one of the best running backs in the NFL. Simpson was the leading rusher in the league in 1975 and 1976, and he was expected to have another big season in 1978. However, the injury ended his season, and he never played another full season after that.

Simpson's career was never the same after the injury. He played in only 13 games in 1978 and was limited to 384 yards rushing. He was able to return to the lineup in 1979, but he was never the same player. He finished his career with 9,279 yards rushing, which is the 38th most in NFL history. However, his career was never the same after the injury.

The injury was a turning point in Simpson's career, and it ended his hopes of becoming the greatest running back in NFL history. He was able to return to the lineup, but he was never the same player. He finished his career with 9,279 yards rushing, which is the 38th most in NFL history. However, his career was never the same after the injury.
