A statewide landlord-tenant act, enacted by Iowa City last November, passed by the House of Representatives on Thursday and may be debated before the House in the near future. In general, the tenant-landlord relationship is in the same state of tension as when it last existed in Iowa City, and if passed, this bill is intended to provide some relief for both the landlord and the tenant.

The bill would place more restrictions on the landlord as were and a tenant might warrant use of the ordinance. The bill would not force the landlord to accept a tenant into the building, but would merely require the landlord to meet certain standards in the selection of tenants. The bill may be debated before the House in the near future. According to Ivie, if the tenant's health never reaches the level of a last resort, as we have said, however, this clause is dangerous. What we are saying, however, is that the tenant-landlord relationship is in the same state of tension as when it last existed in Iowa City, and if passed, this bill is intended to provide some relief for both the landlord and the tenant.

Forums to test opinion on skills, core courses

The current general skills and core course requirements for the University will be open for public comment from 2 p.m. to 4 p.m. Thursday through Sunday. The forum will be held in Gilmore Hall. The forum will seek input from faculty, students and the general public.

Senate to consult court on tenants' group issue

An effort to clear up whether or not a recognized group related to student government, the US Student Senate decided to consult the Iowa District Court for an advisory opinion. The senate will seek the court's determination whether Student United Action (SUA) violated the guidelines, and if so, what penalties are available in the courts.

WASHINGTON — The special interest groups opposing House legislation to tighten the tax treatment of political contributions and lobbyists were said today that the legislation is likely to be heavily debated in the House, but it was not clear whether they would agree to an agreement that would help pass the legislation through the Senate.

Under the proposed bill, current law would have to be changed so that the legislation could be passed.:

The Lindsey proposal would have to be approved by a majority of the Senate to pass the legislation through the Senate.

As an example, the new senators would not participate in the current or past campaign activities Thursday and Senate leaders will have the opportunity to avoid the controversy.

WASHINGTON — The Federal Election Commission (FEC) is scheduled to hold a hearing here Thursday to discuss the 1978 campaign finance act, and to adopt regulations implementing the act.

The FEC issued a notice of intent to hold the meeting in the Commission's hearing room here Thursday, after first announcing it was not likely to hold a public meeting as planned.

The FEC is responsible for enforcing the 1978 campaign finance act, which went into effect earlier this year.

The act places strict limits on the amount that political candidates and parties can spend, and requires candidates and parties to report their expenditures.

The FEC has been working on implementing the act since it was passed last year, and has been receiving many public comments on the issue.

The hearing Thursday will be held to review the rules and regulations the FEC has promulgated to implement the act.

WASHINGTON (UPI) — The Senate Intelligence Committee is scheduled to vote Thursday on new charters for the Central Intelligence Agency.

The committee is expected to vote on the charters, which are intended to establish new rules and procedures for the CIA, and to address concerns about the agency's role in political campaigns.

The move comes after the Senate Intelligence Committee released a report last year that found the CIA had engaged in illegal political activities.

The committee has been reviewing the CIA's role in political campaigns for several years, and has received testimony from former CIA officials and others.

The new charters are expected to be voted on Thursday, and are likely to be approved by the committee.

Harsh observations on American Indian roots

The Cape Cod Village of Harpers has been destroyed. Its buildings, constructed between 1649 and 1654 to house the village of the Wampanoag tribe, was hit by a fire, a war of attrition, and a new federal office of consumer protection. Rarely is the legislation that would have, with expected Senate concurrence, resulted in the protection of consumers' health and safety from the stranglehold of business and industry. There is a critical sense of security that would accompany the assurances of the small federal agency that they are being looked out for. The best defense of the consumers would be an agency within the federal government to give them that clout. But for the present, the expected Senate concurrence has been defeated to this end. A new federal office of consumer protection has been created to counteract the mechanisms of business and industry. The legislation that would have protected the consumers would not be expected in a normal population. There is something ludicrous about the United States trying to protect the wrong side of town, which is the critical sense of security that consumers would have.

nicholas von hoffman

Lessons learned from the Passamaquoddy

The Passamaquoddy are the American Indian tribe in the state of Washington. They have been lobbying for years to promote and build their own atomic power plant. They have been based on the proven source of that pressure is ERDA. But one should keep in mind that the Passamaquoddy tribe is merely a small tribe in them, never very strong in the first place, is wavering. The tribe is more interested in development than in research. The tribe is more interested in the economic development of the tribe than in the research of the atomic power plant. They have been based instead on the proven source of that pressure is ERDA. But one should keep in mind that the Passamaquoddy tribe is merely a small tribe in them, never very strong in the first place, is wavering. The tribe is more interested in development than in research.

Life at stake in drunk driving

The writer is a personal friend of my life was killed the other evening a little boy who died a
drunk driving accident. We are all aware of the consequences of drunk driving, whether it is caused by alcohol or other intoxicants. The consequences of drunk driving are far-reaching and can affect not only the individual who is driving drunk, but also the innocent bystanders who are affected by the actions of the drunk driver. It is important to always be aware of the consequences of drunk driving and to make the responsible decision to never drive drunk.

An ego trip for intelligent?

Once again, the small white college-graduate is encouraged to engage in a debate over the political correctness of the word "intelligent." I wonder whether these people really comprehend the meaning of the word "intelligent." The word "intelligent" refers to a person who is able to think critically and communicate effectively. It is not about ego trips for the intelligent or the politically correct.

Letters

"едакtor:..." we are killing our own society. We must decide what this society is to be. This society is to be made to reflect our values, our beliefs, and our desires. We must take responsibility for our actions and make choices that are in line with our values. We must be willing to face the consequences of our actions and make the right choices.

"Another word for..."...". We must make the right choices for the society that we want to create. We must be willing to face the consequences of our actions and make choices that are in line with our values. We must be willing to face the consequences of our actions and make choices that are in line with our values.

Gout drug may halve heart risk

WASHINGTON (UPI) — A drug long used to treat gout halved the risk of sudden death in patients with heart disease, a University of Texas Medical Branch study reported Thursday.

To similar results over the past century, the researchers said the drug could save the lives of as many as one of every three Americans who would die during the next 15 years after a heart attack — perhaps 13,000 Americans annually.

The drug is called sodium benzoate and has been used for 100 years to help cure the disease known as gout, a condition that causes severe pain.

Doctors noted over the years that sodium benzoate seems to have a slight degree with the risk of death from heart disease in patients. When the drug was used as a treatment leading years before the attack, a heart attack was less likely to occur.

A total of 7,380 patients in the United States and five Canadian medical centers were followed for an average of 4.6 months. The results were published in Thursday's issue of the New England Journal of Medicine.

All patients in the study were given two doses of the trilaurin, which is about 50 percent of the result of the sodium benzoate and of all patients in the control group. It is the drug's first trial in a group of 118 patients in the sodium benzoate group showed a protective effect on the death rate.

The study was designed to determine if the drug would protect the results that showed trilaurin to be protective in the first trial in the study of 7,380 patients in the United States and five Canadian medical centers were followed for an average of 4.6 months. The results were published in Thursday's issue of the New England Journal of Medicine.

Begins defends settlements

GADSDEN, Alabama (AP) - Israeli Prime Minister Menachem Begin has rejected the U.S. position that Jewish settlements in the occupied West Bank and Gaza Strip are illegal, and he deplored the United Nations' decision to recommend that the United States condone the settlements as "dangerous to peace." Begin said Wednesday in an interview with the New York Times that the settlements are legitimate, and he charged that the United Nations resolution was "a threat to peace in the Middle East...nothing but an attempt to prevent Israel from accomplishing one of its most noble objectives." He added that the resolution was "not only a threat to peace, but to Jewish survival in the region." Begin said that the U.N. resolution would only encourage the Arabs to continue their illegal activities in the West Bank and Gaza Strip. He warned that the resolution would only escalate the conflict and make it more difficult to reach a peaceful solution. Begin said that he would continue to work towards a peaceful solution, but that the U.N. resolution would only make that task more difficult.
Altman won't segregate good, bad

By ROY GRAVES
Hall Writer

The world Robert Altman presented in his film isn't very nice. It's black and white, cut and dried. But the honesty and truth he revealed in his films have made him one of American cinema's most significant voices.

In the Low-budget Altman's brilliance is evident, a quintessential Los Angeles director. Throughout the genre, Altman employs a continually inventive style, using even lighting to contrast to parallel Marlowe's inability to parallel Altman's range. He said the business had been a ways about making money, and that this was the case. At the bakery, said part of the movie's problem was that the bakery was open to accommodate the restaurant operated sometimes when the business of those Soup ran out. If the store was open, then it could still be all their work.

Braun said and have defies have been an effort to fix the main one. Each month has been a little better than the last, but we lost a lot of money. The bakery opened from 3 p.m. to 12:30 a.m. Some days, no Soup was open. "The bakery got behind and after all they were doing here," Braun said. "And the money was gone. So, it couldn't be all their work.

Braun said and have defies have been an effort to fix the main one. Each month has been a little better than the last, but we lost a lot of money. The bakery opened from 3 p.m. to 12:30 a.m. Some days, no Soup was open. "The bakery got behind and after all they were doing here," Braun said. "And the money was gone. So, it couldn't be all their work."

"The story I've told will be," said David. "It will be a history, a history of the city and the people. It will be a whole story of the city and the people."

Baker and the team was getting to know the city. They said they couldn't not put out a story, but we lose some money. We also underestimated the price and didn't want printing, but we can't get enough money coming. "Braun said we didn't think we'd be able to publish a decline in interest in our operation," said David. "People are becoming more interested in the city, too," she said. "It's alarmingly frustrating. And there's a desire in the community for the low budget restaurant. There's a definite need for a good, solid food restaurant that offers a solid menu."

THEY'RE A MEAL

Bull Market Restaurant
Washington & Gilman
the 300th anniversary of a wealthy regime in Dubuque, the city's downtown is lined with streets of extravagant mansions. The scores of them tend to cluster around the 1850s-1860s architecture, which is both Victorian and Gothic Revival. The city's grandest house, the Dimiceli house, was built in 1861 and is now a museum. The house has been restored to its original condition and is open to the public.

Bartok, Rakhmaninoff synthesized Works, but differ of a chord

The University Theatre is proud to present a new play by Paulette Lauper entitled Windows. This new and exciting play will be presented in the Old Armory Theatre on February 16, 17, 18 at 8:00 pm and February 19 at 3:00 pm. Tickets are free but are also required. For further information call the Hancher Box Office at 353-6255. Don’t miss this exciting start to the University Theatre’s “second season.”

Iowa hosts Big Ten meet

By NICKY DAVIS

Iowa head coach Dale Brown has been playing excellent for the Iowa men's gymnastics team, and he is expected to win the conference title this year. Brown is ranked 12th in the nation and has also competed in regional competition during the first half of the season. He is expected to be one of the top three performers in the Big Ten meet this weekend.

Fielding Dana Strobel is just one of the Iowa gymnasts Coach Fran Baranojca is counting on to make the difference in the team's performance.

Iowa hosts Illini, Gophers; aim for perfect Big Ten slate

Opportunity to play Catalina has increased Iowa's chances to be in the first division of the Big Ten.

The Hawkeyes, at one time considered a power and potential 1980 conference champion, have struggled in conference play. Now, they have a chance to make a statement in the Big Ten in the last weekend of the regular season.

Saturday's match against the Illini will show if Iowa's record of 10-2-2 is a true reflection of its potential. The Hawkeye men's team has one conference game remaining, and a win over the Illini would solidify their position in the Big Ten.

Joe Willie denies Met purchase

NEW YORK (UPI) - Joe Willie, the owner of the old Met in New York City, has denied reports that he plans to purchase the building.

Willie, who previously owned the Old Met, has been rumored to be interested in purchasing the building for a new sports franchise. However, Willie has denied these reports, stating that he has no plans to purchase the building.

Intramurals

The championship match of the intramural tennis tournament will take place tomorrow at 3:00 p.m. The match will be between the two best players in the tournament, with the winner taking home the championship trophy.

**Claim No. 1 ranking Iowa stuns Oklahoma State**

**By ROGER THUROW**

Iowa stuns Oklahoma State with 23-15 victory.

The Hawkeye Coach Dan Gable broke a tie on baskets by Bob Klaas and Tony Allen in the final 23 seconds with a pair of free throws to give the Hawkeyes the win and to clinch the Iowa Valley Conference title. The Hawkeyes are now 12-6 in Big Ten play and 7-13 overall, while the Cowboys are 3-3 in Big Ten play and 7-13 overall. The Hawkeyes' win is their second in a row and their fifth in the last six games. The Cowboys' loss is their third in a row and their seventh in the last nine games.

In other key matches leading to the Iowa Valley Conference title, the Hawkeyes outscored the Ohio State Buckeyes 81-70, the Michigan State Spartans 81-57, and the Minnesota Golden Gophers 81-55. The Hawkeyes are now 12-6 in Big Ten play and 7-13 overall, while the Buckeyes are 12-6 in Big Ten play and 7-13 overall, and the Golden Gophers are 12-6 in Big Ten play and 7-13 overall.
