toes cause anxiety rather than ease it," Arnold said. "There is no rush in the test anxiety phenomenon. It is not a problem that can be solved with a one-time fix." In fact, some students may become more anxious about the test when they hear rumors about it. "It's like a snowball rolling down a hill," Arnold said. "The more people who believe it, the more likely it is that others will believe it."
City newsbriefs

Police beat

An alleged assault on three students Wednesday at University High had two assailants against one student for a total of six.

Fred W. Chacones, 16, allegedly ran his Toyota Celica into the group of students, knocking one of them into a nearby car. When he got out of the car, he was confronted by a second student.

Robert Valencia, 16, was apprehended and taken to the Police Station where he was charged with assault and battery. He was released on his own recognizance. He will appear in court for arraignment on Monday.

Department of Natural Resources

A multi-county meeting of representatives in Johnson County was held yesterday at the Coralville Community Center.

Robert Johnson, Assistant County Auditor in Johnson County, said he favors the agreement with the Johnson County Board of Supervisors for the operation of the Court at 8 a.m. Feb. 23.

The agreement is designed to provide seamless service for residents of both counties and to reduce the population of county hospitals. The agreement would be renewed by the counties every three years.

They could go to care are reportedly going to try to stabilize the population of county hospitals.

The meeting also included a discussion of the need for additional hospital beds in Johnson County.

Mental health

A mental health care agreement between the two counties has been signed.

The agreement will allow for the sharing of mental health services between the two counties. This will help to reduce the cost of mental health care and improve access to these services.

The agreement also includes provisions for the continuation of mental health services in the future. It is hoped that this will help to ensure that mental health care continues to be available to those who need it.

Court

The City of Coralville is considering proposals for the construction of a new court building.

The City Council will be considering the proposals at their next meeting. The proposals will be reviewed by the city planning department and a decision will be made on the best option to move forward.

The new court building will provide a more efficient and effective court system for the city. It will also improve the safety and security of court personnel and the public.

The new building will be located at the corner of Market and 4th Avenue.

Save up to $1.25 on America's favorite laundry combination.

Tide in your washer.

You can count on Tide to get out just about everything from grape juice to spaghetti sauce to ground-in dirt. So, when you need to count on cleaning, you can put your trust in Tide.

Bounce in your dryer.

With Bounce in your dryer, cottons come out really soft and synthetics don't cling. Your family's clothes have a clean fresh fragrance. Try Bounce today.

Daughter of S.I. endangers right of working people

The Los Angeles City Council is weighing whether cloud seeding operations in the San Fernando Valley, a populous portion of California, may have contributed to the advent of the recent spate of "strikes." The city council, by a 7-2 vote, has approved a motion to investigate "whether or not the cloud seeding operations are being conducted with the intention of causing harm or injury to any person or property in the San Fernando Valley." The council also voted to ask the county's public health department to study whether cloud seeding could be used to "destroy" the valley's smog problem.

The council was interested in the question of whether cloud seeding could be used to create rain, which would reduce the amount of smog in the valley. However, the council was also concerned about the potential for harm to people or property if the cloud seeding operations were not correctly controlled. As a result, the council approved a motion to investigate the matter further.

The council's action followed a report by the county's public health department, which said that cloud seeding could be used to create rain, but that it would require careful control to avoid unintended consequences.

The council also voted to ask the state's Department of Health and Human Services to study the matter further, and to ask the city's public health department to study whether cloud seeding could be used to "destroy" the valley's smog problem.

Law allows judge no choice: No mercy in Chowlchilla case

OAKLAND, Calif. (UPI) — A judge refused to take plea for mercy by three young men convicted of kidnaping a family to extort a ransom, saying their attorney General John Hill, who held a hearing to give the men a chance at mercy, had no discretion in deciding the penalty.

"The defendants, Richard Harrison, 27; Joseph Schoenfeld, 19; and Richard Woods, 21, pleaded guilty to kidnaping and robbery by extortion, the most serious of 102 California laws involving 112 persons of all ages for which the judge called a hearing to consider mitigating circumstances before passing sentence.

"The judge had granted the hearing before passing sentence to give the defendants a chance to change their plea for mercy on record for any appeal in the case. He said mitigating circumstances in the case were present, including that the youngest of the men, Ray, 17, was a minor when the crime was committed.

"The judge said Hughes was killed and it was determined he died in Texas. There was no parole for kidnap-ransom crimes, he said.

"He reserved the wish to die in Texas. There was no parole for kidnap-ransom crimes, he said.

"Deegan told Edward Deegan, 28, the 18-year-old victim, his wish to die in Texas. There was no parole for kidnap-ransom crimes, he said.

"Hughes died April 5, 1976, after Longtime to prove the story of Hughes, a powerful Texas tycoon, was a $1.67 million bribe for medical attention in Houston.

"The judge had granted the hearing to give the defendants a chance at mercy, but the defendants refused to admit the evidence from the grand jury testimony that the state had evidence of Hughes' family and friends to be involved.

"Deegan told Edward Deegan, 28, the 18-year-old victim, his wish to die in Texas. There was no parole for kidnap-ransom crimes, he said.

"Hughes died April 5, 1976, after Longtime to prove the story of Hughes, a powerful Texas tycoon, was a $1.67 million bribe for medical attention in Houston.

WASHINGTON (UPI) — Re- searching for a new way to cut risks from radiation dangers, the American Cancer Society and World Health Organization, benefitted for notably the role in an early detection program, which has protected 35,000 lives as of last week, said Dr. John Costle.

The program is a direct result of a study by a team of scientists who have been trained in the field of radiation biology and other untrained users. By a 1972 law, the restricted use of some hazardous pesticides on a wide range of crops is now possible.

The program is intended to provide an immediate benefit and is expected to be continued indefinitely. The ACS official said the role of the program is to provide an immediate benefit and is expected to be continued indefinitely.

WASHINGTON (UPI) — The newly restricted use of some hazardous pesticides on a wide range of crops is now possible, the ACS official said. The study reaffirms a notion that the benefits far outweigh the risks. The ACS official said the role of the program is to provide an immediate benefit and is expected to be continued indefinitely.

Califano warns of teen-smoking ills

WASHINGTON (UPI) - Tobacco smokers, "rather adult in our eyes," noticed for their extreme caution and increased taste for chipmunks of dressing room class, said Califano, director of health education, and Califano told a House subcommittee on tobacco legislation that another 100,000 people were being killed by cigarettes this year to discourage cigarette smoking.

Every man has a price...

WASHINGTON (UPI) - Civil Americans are suffering from a growth in the numbers of children who do not have a father figure, a sociologist said today.

JERSEY CITY, N.J. (UPI) - You turn around and all your life's savings are gone. That's what happens to the man who has been worrying about his bank account.

Police said a computer was not used to withdraw $100,000 from an account with an interest rate of 4.00%.

In 1979, a computer was programmed to withdraw $100,000 from an account with an interest rate of 4.00%.

Based on this, it was not a reasonable chance for the bank to withdraw the money without notice.

Hence, the bank was charged with failing to return the $100,000.

The bank's defense is that it was not a reasonable chance for the bank to withdraw the money without notice.

The court found that the bank was liable for the unauthorized withdrawal.

The court ordered the bank to pay $100,000 to the depositor.

The bank appealed the decision.

The appeals court affirmed the decision of the lower court.

The depositor received $100,000 from the bank.

 We designed the MBA calculator for businesses professionals at a fact, accurate answerers to a broad range of business and financial problems. The same ones you're in your business.

 Interest, annuities, accounting, finance, bond calculations, cash flow, stocks, Treasury bills and notes, and investments, marketing, forecasting, quantitative methods and more. Our applications are to your business and the MBA.

 This powerful calculator also features programmable functions that let you perform more difficult calculations at the touch of a key. Instantly. Accurately. You may also enter your your own programs up to 8 steps long, saving significant time.

 If you're looking for repetitive, complex work solutions then the MBA is the way to go. It has a built-in variable that can be used for that purpose.

 If you're building a business, the MBA business financial calculator can be one of your strongest connections.

 We welcome you to see how simple calculator analysis can be with the MBA. Calculator. It's 288 pages of understandable, easy-to-follow reading. And it's coupled to all 100 real-world examples that show you step by step how to make calculator analysis work for you as you have never before.

 If you're looking for a new calculator, the MBA business financial calculator can be one of your strongest connections.

 We welcome you to see how simple calculator analysis can be with the MBA. Calculator. It's 288 pages of understandable, easy-to-follow reading. And it's coupled to all 100 real-world examples that show you step by step how to make calculator analysis work for you as you have never before.

Zimmerman to conduct Mahler

By AUSTIN GODFREY

When the St. Louis Symphony plays in St. Louis tonight, it will be the season opening, under the baton of new maestro, Gerhardt Zimmermann, with a concert that has never been televised before.

Zimmermann, who is a native of Germany, has conducted several symphony orchestras in Europe and has also worked with the St. Louis Symphony in the past. He is known for his energetic and dynamic conducting style.

The program will feature works by Mahler, who was a composer of the Romantic period and is considered one of the most important composers of the 19th century. Mahler's symphonies are known for their complexity and emotional depth.

The concert will begin at 8 p.m. at the St. Louis Symphony Hall, and admission is free to the public. A special reception will follow the performance.

The program will include:

- Symphony No. 1 in D Major
- Symphony No. 2 in C Minor
- Symphony No. 4 in G Major

Zimmermann is excited to lead the St. Louis Symphony in this special concert, and he is looking forward to sharing his passion for music with the audience.

The concert will be recorded for broadcast on public radio stations across the country, and a live stream will be available online.

Tickets are not required for the concert, but seating is limited. For more information, visit the St. Louis Symphony website or call (314) 862-0900.
Relentless Spinks dethrones Ali

On-the-job learning for Waite

By STEVE WAITE
Assistant Sports Editor

The Minneapolis Golden Gopher Golden Gophers may regret the fact that they?'d let Michael Doleman walk. But they?'d never say it, or at least not aloud. However, they?'d probably be offering a world of entertainment to their opponents.

Steve Waite

Challenge Low Spinks connects with a counterpunch to the head of Muhammad Ali in the seventh round of their world heavyweight championship bout in Las Vegas.

Wednesday. The temperatures turned hot on an open as Gene Traynor?'s first victim was down on a technical knock out.

Las Vegas (AP) — The second time around, world heavyweight champion Joe Frazier finally had his way with former Olympic gold medalist George Foreman and stopped him in the 15th round.

"I'm glad it's over," said Frazier, who had been seeking a win since losing to Muhammad Ali in their 1974 title fight.

Frazier, 35, stopped Foreman in the 15th round on a technical knockout after being ahead on points throughout the fight.

"I was glad to have this win," said Frazier, who had won 34 of 37 fights since losing to Ali.

"I was glad to have this win," he added. "I was glad to have this win."
The Searchers

BY JAY WALLISPER

We received our education in the cities of the nation. It all began with the acquaintance of Bill Nelson, Willie Nelson's son, and his father, Bill's brother, Billy Nelson. They were both photographers, and they both lived in the city of Chicago. We met them at the City Desk, where they were telling stories about their adventures as photographers. They were both young, and they were both filled with enthusiasm and energy. They were both determined to make a name for themselves in the photography business.

Their first adventure was a trip to the countryside, where they discovered a beautiful scene of a river flowing through a forest. They were both amazed by the beauty of the landscape, and they decided to capture it on film. They spent hours taking photos, and when they were finished, they were satisfied with their work.

The next day, they decided to take a trip to the city of Madison. They arrived late at night, and they were both looking for a place to stay. They found a small hotel, and they checked in. They were both tired, and they decided to rest for a bit. They were both looking forward to their next adventure.

The next day, they decided to take a trip to the countryside again. They were both excited to see what they would discover this time. They spent hours taking photos, and when they were finished, they were satisfied with their work.

The photography business was tough, and they were both determined to make a name for themselves. They were both determined to capture the beauty of the world, and they were both determined to make a name for themselves in the photography business.

T.G.I.F.

The four-day weekend

With the weekend here, many people are looking forward to a break from their daily routines.

Art

The Art Walk in downtown is featuring its first outdoor exhibit of the season. Visitors can enjoy a variety of artists' works displayed along the streets.

Theater

"A Christmas Carol" is playing at the Winter Theater. Tickets are available online or at the box office.

Television

*The Big Bang Theory* is set to premiere tonight at 8 PM on CBS.

Movies, on campus

"The Quiet One" is screening tonight at 7 PM in the Student Union Ballroom. The film is free to all students with ID.

The T.G.I.F. guide to clubs

appears in today's

"Postscripts" section of the D.I.

On the bus

A passenger on the 7:30 AM bus noticed a lost item. It was a black bag with various documents. If you found it, please contact the lost and found office.

music

Emmylou Country

Quinn's is a Ten Cat Town.

Producer: Brian Aliens

by TOM DEBUT

Emmylou Harris is the greatest country girl. Her voice is a melody, her presence is a legend.

I first heard her voice on a tape I found at a thrift store. Her voice was husky and soulful, like a comfortable pair of shoes.

It was surprising to see her continue her legacy. She had released a new album, "Their Greatest Hits 1971-1975.

It was the first time I had heard her truly perform. Her voice was so pure, so raw.

In the song "If I touchscreen for dummy," her voice was so clear and direct. It was unlike any other voice I had ever heard.

I remember the day I heard it. I was sitting in my car, eating a sandwich.

I was so moved by her voice that I bought the album on the spot.

I still listen to it every day. It's one of those albums that stays with you forever.

MOVIES

"Pumping Iron"

by Bill Conroy

There is an interesting film playing in theaters. It's called "Pumping Iron." It's about a bodybuilder named Frank Zane.

The film follows Zane as he prepares for a bodybuilding competition. It's a story of dedication, hard work, and determination.

It's a great film for anyone interested in bodybuilding or fitness in general.

The film is currently playing at the West Theater and the City Cinema.
Catching up with cable television

By GAYLE COCHRAN

A flurry of activity has been taking place in Iowa City and the Eastern Iowa area as a result of the competition for a cable television franchise. The recent appearance of a new television station, Channel 13, on WTV-L the NBC affiliate, has added to the excitement. But the most recent event was the announcement that the city would be the site of a new cable television franchise. The announcement came as a result of the recent decision by the Iowa Cable Commission to award the franchise to a local company.

The announcement was made by the Iowa Cable Commission, which is responsible for regulating the cable television industry in Iowa. The commission said that the new franchise would provide the city with access to a wide variety of programming, including news, sports, and entertainment.

The new franchise will be operated by a local company, Iowa Cable Systems, Inc. The company has been in business for several years and has a reputation for providing high-quality service.

The announcement of the new franchise has been met with enthusiasm by city officials, who see it as a major step forward for the community. "The new franchise will bring new opportunities for our residents," said Mayor Smith. "We are excited to have this new service available to our community and believe it will help to enhance the quality of life for our residents."
Autumn wishes, winter dreams

By Barbara Davidson

Our ghastly autumnal weather of方位 rain and drizzle was foiled this past week, with all the promise of cool, clear days. The promise was not realized, however, as a prolonged spell of rain continued to drench the area. The weather has taken its toll on the harvest, and the remnants of the harvest have yet to be gathered.

The weather has also been unkind to our winter vegetables. The cold has kept them from growing, and the wet soil has made it difficult to plant them. The vegetable garden is a mess, with the soil being waterlogged and the vegetables struggling to grow.

There is some hope, however, as the weather is expected to improve soon. The forecast predicts a return to the normal autumn weather, with sunny days and cooler nights.

The weather has also affected our animal population. The sheep and goats have been seeking shelter from the rain, and the dogs are barking for attention.

Despite the weather, there is still beauty to be found in the landscape. The trees are changing colors, and the leaves are falling to the ground, creating a colorful carpet.

The weather has also been unkind to our human population. The rain has caused disruptions in transportation, and the cold has made it difficult to keep warm.

The weather has also affected our natural world. The plants and animals are struggling to survive in the harsh conditions.

There is some hope, however, as the weather is expected to improve soon. The forecast predicts a return to the normal autumn weather, with sunny days and cooler nights.

The weather has also affected our mental state. The rain has caused disruptions in transportation, and the cold has made it difficult to keep warm.
