House okays billing from 'defective' phone

WASHINGTON (UPI) — The House Ways and Means Committee approved last week a bill that would allow phone companies to bill customers for defective phones after they were sold.

The bill, which was introduced by Rep. James Oberstar, D-Minn., would allow phone companies to charge customers for defective phones if the phones were sold to them by the manufacturer.

The bill passed the House on a vote of 30 to 17, with 28 Republicans and 2 Democrats voting in favor.

Briefly

Death

ALBANY, N.Y. (UPI) — Richard Deasy, a former executive of New York's $40 billion farm Credit Union, died last week.

Deasy was the president and chief executive officer of the Union National Bank in New York.

The cause of death was not released.

Work

WASHINGTON (UPI) — United States President Ronald Reagan today urged Congress to批准 a $36 billion budget for the Department of Housing and Urban Development.

Reagan said the budget was necessary to avoid a possible budgetary crisis that could lead to a shutdown of federal services.

The budget includes funding for programs such as housing assistance, economic development, and environmental protection.

In White House briefings, Reagan said the budget was necessary to avoid a possible budgetary crisis that could lead to a shutdown of federal services.
Public voices zoning concern

By ANNA DICKIE

Iowa City residents expressed concern over zoning and land-use issues at last week's hearing before the Iowa City Council.

"We don't want to get backed into a hole where our options are limited," said one resident.

Another Iowa City resident, William Boles, echoed this concern, saying, "I am concerned about the integrity of the neighborhood." The proposed regulations would affect future development in the area and would include restrictions on the height and size of buildings.

Boles also expressed his concern about the possible impact on his neighborhood, saying, "The proposed regulations would reduce the density of the neighborhood and make it less attractive for people to live there."

Boles also asked about the possibility of a public hearing on the proposed regulations, saying, "I don't think the public has been given enough opportunity to voice their concerns." He called for the city to hold a public hearing on the proposed regulations.

Another resident, Mary Smith, also spoke out against the proposed regulations, saying, "The regulations are too strict and would limit the options for future development." She called for the city to consider more flexible regulations that would allow for more development while still protecting the integrity of the neighborhood.

Smith also expressed her concern about the possible impact on the local economy, saying, "The proposed regulations would reduce the number of jobs available in the area and would limit the options for future development." She called for the city to consider more flexible regulations that would allow for more development while still protecting the integrity of the neighborhood.

The council members also heard from representatives from the Iowa City Chamber of Commerce, who expressed their support for the proposed regulations.

Councilor Dan Mitchell said, "I support the proposed regulations because they would protect the integrity of the neighborhood and would reduce the number of jobs available in the area." He called for the council to approve the proposed regulations.

Councilor Phil K_Long said, "I believe the proposed regulations are too strict and would limit the options for future development. I call for the council to consider more flexible regulations that would allow for more development while still protecting the integrity of the neighborhood." He called for the council to consider more flexible regulations that would allow for more development while still protecting the integrity of the neighborhood.

The council members voted 4-1 to approve the proposed regulations, with Councilor Dan Mitchell casting the only vote against the regulations.

The regulations will now be reviewed by the Iowa City Planning and Zoning Commission, and will be considered by the council again at a later date.

Bill Fink, an attorney for the Iowa City Chamber of Commerce, said, "I am pleased with the council's decision to approve the proposed regulations. They will protect the integrity of the neighborhood and reduce the number of jobs available in the area." He called for the council to consider more flexible regulations that would allow for more development while still protecting the integrity of the neighborhood.

"I support the proposed regulations because they would protect the integrity of the neighborhood and would reduce the number of jobs available in the area," said Councilor Dan Mitchell.

"I believe the proposed regulations are too strict and would limit the options for future development. I call for the council to consider more flexible regulations that would allow for more development while still protecting the integrity of the neighborhood," said Councilor Phil K_Long.

"I am pleased with the council's decision to approve the proposed regulations. They will protect the integrity of the neighborhood and reduce the number of jobs available in the area," said Bill Fink.

"I support the proposed regulations because they would protect the integrity of the neighborhood and would reduce the number of jobs available in the area," said Councilor Dan Mitchell.

A $1 million NASA project, aimed at improving our understanding of radio signals that transmit from the surface of the moon, will need the go-ahead of Congress to continue.

The project, known as the Plasma Diagnostics Experiment, has been underway for a year and is expected to determine if changes in the upper atmosphere of the moon affect the propagation of radio signals from the moon to the earth.

The project has been funded by NASA and is managed by the University of Colorado at Boulder.

Survey says 54% use Union bowling lanes

By PETER CHURCHILL, Special to the Daily News

Over half the students surveyed about one aspect of Union services and they have lowered the bowling lanes, mainly because of the lanes' accessibility, and this is 'a good deal for the students because we can Study more and do our homework,' said Students Union President Frank Mitchell Tuesday.

The survey was conducted in response to a plan under consideration by theStudent Senate to raise the lanes, which would require moving or abandoning the student-conducted computer-programmed bowling.

"There are either bowling lanes or word 'Em to save money. We must have both," Mitchell said Tuesday.

The survey also found that 76% of respondents would be willing to pay for additional parking to keep the lanes at their current height.

"It is an open question as to whether students are willing to pay for the lanes, but we would definitely keep the lanes at their current height," Mitchell said.

Treaty not meant for meddling
WASHINGTON (UPI) - Sen. Dennis DeConcini, D-Ariz., said Tuesday that the Panama Canal treaty is not meant to meddle in the internal affairs of Panama, but to provide an excuse for U.S. military action to keep the canal open.

DeConcini's amendment to the first pact is expected to vote in the Senate on Wednesday. That treaty would assert the Panama Canal's right to take unilateral military action if the United States needs to defend the canal.

The treaty is expected to pass by a narrow margin, and the Senate is expected to vote on the amendment to the treaty on Thursday. The Senate has already passed the treaty by a narrow margin.
