Costly vandalism in schools—robbery, not just obscenities

By Don Hrabal

Brooked windows and other types of vandalism at Iowa City District 50 schools this year have nearly doubled, according to district officials. And as in previous years, the district has faced many questions from the school’s parents and students about the source of the vandalism.

In an effort to avert any suggestion of U.S. federal troops by Uon” research

Whether research comes from the Department of Defense or other sources to be damaging to the school’s reputation, teachers have been forced to change their behavior on and off the playground.

According to Iowa City District 50 Superintendent Dr. David Lahr, the research has been widely debated during the past few years, but has not been adequately addressed by the schools. Lahr said his research also has other potential applications for society.

"As long as we continue to have the question of military research, then we will continue to be faced with the issue of military research," said Lahr. "Until we can put an end to the debate, there will be no end to the public's problem.""Farrell, principal at City High School, said that the problem is not unique to City High School, but that the problem is widespread.

"Teachers and parents that express concern that an increase in vandalism would not pay for itself, and that a recommendation of $2,675 for the school’s safety and security program was not appropriated as asked in the City Council's recommendation.

"We believe that the problem of vandalism will not be solved until it hits the problem (of vandalism) until it hits the school's staff," said Farrell. "We are working with the general system. I'm not involved with the school's staff, and we are working with the general system. I'm not involved with the school's staff, and we are working with the general system.

"The wounded French commander ordered his troops by the hospital to go to "rest over for the Palestinian civilian and U.S. forces at the same time. The French commander, Jeanbad, said the shooting of the guerrilla killed "three of a group of four very few in the field." The guerrilla had been killed while trying to escape from the Palestinian forces near the Litani River.

"It was a well-equipped ambush," said the guerrilla leader, who was wounded in the shoulder. "I don't know the outcome of this for the Palestinian civilians, but the guerrilla killed three of a group of four very few in the field."

The guerrilla leader, who was wounded in the shoulder, added that the guerrilla had been killed while trying to escape from the Palestinian forces near the Litani River.

Cut in monkey export affects U.S. research

By JOHN GODDINE Des Moines

The availability of research monkeys exported from India is now expected to remain low, according to Charles Thayer, director of the Iowa Research Monkey Center in Johnston. A report last year by a government panel said the number of monkeys exported had dropped significantly.

"The current export numbers are much lower," Thayer said. "We have been working with that situation for about six months. It wasn't severe until the new year, when the numbers dropped to almost zero."

India has exported monkeys to the United States for more than 30 years, and the U.S. government has strict guidelines for the exportation of these animals.

Thayer said the current situation is not expected to improve in the near future. He said the Indian government is also facing supply issues and is currently reviewing its standards for exporting monkeys.

The exportation of monkeys has been a source of concern for researchers in recent years, as fewer animals are available and the costs of importing them have increased.

"The situation is not expected to improve in the short term," Thayer said. "We need to continue to work with the Indian government to improve the situation, and we are working closely with the U.S. government to ensure that the monkeys being exported meet our standards.

Clark against deregulation of oil

By Mike Krukow

Deregulation of petroleum operations was an issue in the Senate campaign of 1978, and the campaign has been marked by charges and countercharges. Sen. Bob Dole, a Republican, has charged that Sen. Bob Kerry, a Democrat, would deregulate oil companies if elected.

Dole said that if Kerry were elected, he would deregulate oil companies, which would lead to higher prices and less regulation. Kerry, a Democrat, has said that deregulation would allow oil companies to compete with each other, leading to lower prices and increased competition.

Dole's campaign has accused Kerry of being too soft on oil companies, while Kerry's campaign has accused Dole of being too hard on oil companies. The campaign has been marked by charges and countercharges, with both candidates trying to paint the other as soft on oil companies.

The campaign has also been marked by charges of campaign finances, with both candidates' campaigns accused of taking money from oil companies. The campaigns have been marked by charges of campaign finance violations, with both candidates' campaigns accused of taking money from oil companies.

of the Voices of Soul. I saw the forms that were to be a performance or an event. 

White tokens

The editor

I am writing this response in the article "The Future: A Comparison of the Past and the Present" by John Johnson in the May issue of the Trailsman. The article is a comparison of the past and the present, and I am writing this response to make a point in the future. Johnson, a member of the Voices of Soul, is an avid reader of the Trailsman and is known for his keen insights into the world of politics and society.

dear reader

The editor of the Trailsman, Mr. Johnson, I am writing this response to the article "The Future: A Comparison of the Past and the Present" by John Johnson in the May issue of the Trailsman. The article is a comparison of the past and the present, and I am writing this response to make a point in the future. Johnson, a member of the Voices of Soul, is an avid reader of the Trailsman and is known for his keen insights into the world of politics and society.

I would like to begin by expressing my gratitude for the opportunity to respond to Mr. Johnson's article. His article is a thoughtful and well-researched piece that offers a valuable perspective on the relationship between the past and the present. I found his insights on the role of history in shaping contemporary society to be particularly enlightening.

However, I would like to take issue with one of his main points. Mr. Johnson argues that the past is a mirror that reflects the present, and that understanding the past is essential for navigating the present. While I agree that the past has a profound influence on the present, I would like to suggest that the relationship between the past and the present is more complex than Mr. Johnson suggests.

For example, Mr. Johnson's article focuses on the impact of historical events on contemporary society. While this is certainly true, I would like to point out that the present also shapes the past. The present is not simply a reflection of the past, but rather a dynamic and evolving force that shapes the course of history.

Moreover, I would like to emphasize the role of human agency in the relationship between the past and the present. While the past may have shaped the present in many ways, we also have the power to shape the future. The present is not a fixed entity, but rather a fluid and malleable construct that is shaped by our actions and decisions.

In conclusion, I would like to express my appreciation for Mr. Johnson's article and the opportunity to respond to it. While I disagree with some of his points, I found his article to be a valuable contribution to the ongoing discussion about the relationship between the past and the present. I look forward to continued dialogue on this important topic.

Sincerely,
[Your Name]

Secret papers evidence in spy trial

Ronald Humphrey, an officer of the U.S. Intelligence Squad, testified as a recognized expert that foreign intelligence documents seized from a well-known, recognized Vietnamese analyst in Paris had been declassified and passed on to the Vietnamese Embassy in Paris had no relevance in what they think is important so they seized.
NEW ORLEANS (UPI) — Two persons were killed and thousands were stranded in traffic jams Wednesday as flood waters swamped a city that during the 1812 War once was defended by U.S. Navy gunboats.

Rescue workers were struggling to cope with an unprecedented flood Wednesday, and at least four persons were missing.

"The message was giving last week that we had taken a major step toward protecting our city," said Louis Peresson, director of the New Orleans Department of Emergency Operations. "We are prepared to give emergency funds if necessary."

"The city is a bit below its normal level for the second day and the roads around our area of operation are flooded," said it. "We have not had any floods in the city."
Sun Day celebrations prompt Carter pledge

By United Press International.

Annapolis - Lashed with hot sun and gusting winds, 10 million Americans got a pledge from President Jimmy Carter that the solar energy budget will not get cut.

"Save energy. Two steps toward saving energy. The first step is developing such a budget, and the second step is making the budget what it will take," Carter said.

"And we will have launched a new age - the solar age. And don't forget that is as real and current as we are sitting here today."

Carter said solar energy offers a way for the United States to take back its economic independence, to halt the flow of money abroad, and to meet 40 percent of the nation's power needs.

"We will have launched a new age - the solar age. And don't forget that is as real and current as we are sitting here today."

Despite lukewarm hot dog, Ray pushes solar energy research

As the sunsets on the second day of the Iowa Solar Energy Conference, Students for Solar Energy (SSE) President Ray Hekker releases the Institute's second annual Greenhouse Report..."It's not that we're pushing for solar energy," Hekker said. "We believe it's more of an experimental thing, a way of making the world a little bit better."

The conference was held at the University of Iowa's Lied Commons on Friday and Saturday, attracting students, faculty, and community members alike. The event featured guest speakers, workshops, and exhibits showcasing the latest developments in solar energy technology.

Hekker, along with other SSE members, distributed pamphlets and answered questions about their projects, which range from solar-powered vehicles to Homemade Solar Ovens. "We're trying to make people aware of the benefits of solar energy," Hekker said. "It's a great way to reduce our dependency on fossil fuels and combat climate change." 

Although the event was well-attended, some attendees expressed disappointment with the lack of action on solar energy in the state. "It's frustrating that we're still talking about solar energy when we should be doing something," said one attendee. "We need the government to step up and create incentives for renewable energy," said another.

The conference concluded with a keynote speech by Dr. Pat Flanagan, who discussed the potential for solar energy in Iowa and the importance of continued research and development in the field. "Solar energy is the future," Flanagan said. "We need to invest in research and development to make it more accessible and affordable for everyone."
Friday and Saturday's Big Ten outdoor meet at Northwestern.

"I expect our team to peak at Big Ten," Hassard said. "Our training is the best we've had all at Big Ten Indoor," he race the meet, "and we're running our best team this time.

Hassard is top scorer at the Big Ten Indoor, with 57 points. He placed sixth at the Big Ten Indoor, the 10th fastest he's run this season. He's been training the past five months, which has been placed at this race.

The Wolverines were among strong teams in the conference meet last year at

Hassard is anticipate going performances from his other scorers and from his only other top scorer (Illinois' David Wilson, second at the Big Ten Indoor).

"With all the wonder we did sorry, we're not as well at the Big Ten Indoor," he focused on the Illini's 3,000-meter and 5,000-meter events.

"I'm going to be at the Big Ten Indoor," he added. "I'm going to be there with the Illini at the Big Ten Indoor." He's been training the past five months, which has been placed at this race.

Hawkeyes rout UNI for twin bill sweep

By ROBERT PAVLIN

The Iowa basebäll team won two of its three recent late-inning Big Ten contests as the
Hawkeyes knocked off Iowa State and won all over the University of Northern Iowa.

The Hawkeyes pounded out two runs in the sixth and seventh innings of their 10-0 win over UNI on Sunday afternoon.

The Hawkeyes eliminated a potent offense, but also

Hawkeye first baseman Mark Hargrave

UNI's third baseman, Doug Delahem, and center fielder, Roger Van Dervort.
