Audit hits Weeg policies

DELL BROWN

and TERRY BROWN

Anchor Authority Lloyd Smith Tuesday criticized the UI Weeg Computing Center's accounting practices and called for a special audit report promptly as a result of the findings of an earlier charge that "illegal activity" had been involved in the operation of the center.

Smith, director of the Weeg Center, charged that the audit report, released Wednesday by President William J. Donohue, is a "spurious" and "false" document because the report does not cover the entire operation of the center.

Smith charged that center employees had ignored official requests to provide information. The report states that a "technical audit" was made of the center's computer equipment.

Smith, however, said the audit report is "valueless" because the center continues to operate without the required information.

The report also states that a "technical audit" was made of the center's computer equipment.

Smith charged that center employees had ignored official requests to provide information. The report states that a "technical audit" was made of the center's computer equipment.

Smith charged that center employees had ignored official requests to provide information. The report states that a "technical audit" was made of the center's computer equipment.

Sword slasher suspect switely seized

"It is in a house where a man tried to live by the sword but he was caught," John Wharton, assistant to a police officer, said.

The sword slasher suspect, identified as a man of 35, was captured at a house on the corner of Sixth and Main Streets.

**Carters refuse to see Rhodesia's prime minister**

The Carter administration has decided not to meet with Rhodesia's Prime Minister, Ian Smith, during his visit to the United States.

**Engineering Graduates**

Rockwell-Caninsula will be visiting your campus soon because we'd like you to discover Cedar Rapids, Iowa's largest and second largest city and the nation's number one employer, capita, of goods and services.

You'll see the most sophisticated technology in the country today, developed by a leader in the field of avionics design and development and one of the world's largest independent suppliers of telecommunications systems.

Currently, openings exist in:

- Electrical Engineering
- Mechanical Engineering
- Industrial Engineering
- Computer Science

Your Rockwell-Caninsula representative will be on campus for interviews on 10/13. Call your college placement office to schedule an appointment. Or, send your resume to:

Janyce Alter
Avionics and Missiles Groups
Rockwell International
M/S 120-140 JA
400 Collins Road NE
Cedar Rapids, IA 52406

Relocation of jail site suggested

By TOM BRUGE
Staff Writer

HACKENSACK, N.J. — The city council here has approved the city's plan to move the Hackensack police station from its long-time location at the corner of Broadway and Central Avenue to a new location in the downtown area.

The city council approved the move in a 6-1 vote, with one council member abstaining.

The new location will provide more space and better facilities for the police department.

The council also approved a budget for the move, which will be paid for through a bond issue.

The city council has been discussing the move for several months.

The current police station is located on a busy street corner, which makes it difficult for police officers to work efficiently.

The new location will be in a quieter area, which will allow police officers to work more effectively.

The city council hopes the move will make the police department more efficient and improve public safety.

The move is expected to be completed by the end of the year.
Day of solidarity against S.A. rulers

The South African government ap

ounced on October 15 that it was about to impose martial law on the townships of Soweto and Transvaal. This move was made in response to the growing level of worker and student unrest that has been spreading throughout the country. As a result, the government is now taking even more drastic measures to suppress the growing anti-apartheid movement.

Yesterday's general strike in Soweto marked the beginning of a new phase in the struggle against apartheid. Tens of thousands of workers walked off their jobs and joined the growing crowds of students who were already on the streets. This action was a clear rebuke to the government's attempts to silence the voice of the people.

The strike was not only a protest against the hated pass laws, but also a call for the immediate release of all political prisoners. The struggle for freedom is now entering a new phase, and the people of South Africa will not be silenced.

The government's response to this challenge will determine the course of events in the future. The people of South Africa will continue to fight for their freedom until the day it is achieved.

-- End --

Viewpoints

Where do IsiXhosa begin, IsiXhosa end?

It is the day of the South African National Congress and its affiliated organizations. The day of national unity and solidarity. The day of action and struggle for freedom. The day of resistance against oppression.

IsiXhosa is a language that has been suppressed for decades by the apartheid regime. It has been banned, suppressed, and marginalized for the benefit of the white minority. But IsiXhosa has never been silenced. It has continued to be spoken and used by the people of South Africa.

The struggle for freedom includes the struggle for language rights. IsiXhosa must be recognized and protected as a language of the people of South Africa. It must be given the same status as other official languages.

The government must respect the rights of all South Africans to use their own language. IsiXhosa is an integral part of the culture and heritage of the people of South Africa. It must be protected and promoted.

Let us stand united in solidarity with the struggle for IsiXhosa and the struggle for freedom in South Africa.

-- End --

Letters

No parties?

In the Editor's

The payment of party levies is one of the hallmarks of a democratic society. It is a way of ensuring that parties have the funds necessary to operate and to represent the interests of their members.

However, in recent years there has been a growing trend towards the abolition of party levies. This trend is being driven by the desire to reduce the costs of politics and to increase the efficiency of the political process.

While there are valid reasons for opposing party levies, I believe that they should be retained. They are an essential part of the democratic process and are necessary for the functioning of a healthy political system.

One of the main arguments against party levies is that they are a form of 'corruption'. This is not true. Party levies are a transparent way of ensuring that parties have the funds necessary to operate.

Another argument against party levies is that they are a form of 'obligation'. This is also not true. Party levies are a voluntary contribution from members to the party's activities.

In conclusion, I believe that party levies should be retained. They are an essential part of the democratic process and are necessary for the functioning of a healthy political system.

Support coop

Under the pact, the USSR rulers have made it clear that they will not bow to any demands for the granting of rights to the oppressed peoples of the world. They have also made it clear that they will not tolerate any interference with their internal affairs.

The USSR rulers are determined to maintain their superiority over all other nations. They are determined to crush any opposition to their rule and to prevent any form of democratisation.

In this context, the support co-op is a necessary tool for the propagation of the cause of freedom and democracy. It is a way of providing financial assistance to those who are fighting for freedom and democracy in opposition to the USSR rulers.

Let us support the co-op and help to spread the message of freedom and democracy around the world.

-- End --

A juicy Baptism

Last Sunday, the baptism of the son of one of the students on the campus in Durban was a painful event. The parents of the child were denied the right to baptize their child because of their political views.

This is a clear breach of their human rights. The right to religious freedom is a fundamental human right that should be respected by all governments.

We should all stand in solidarity with the parents of the child and support their right to baptize their child.

-- End --

Ozie Kincade

Ozie Kincade, a professor of philosophy at the University of Cape Town, has been one of the most prominent figures in the anti-apartheid movement. He is also a renowned writer and a leading intellectual.

His lectures and seminars have been a source of inspiration for countless people around the world. His ideas have been read and studied by millions of people.

He is a true hero of the struggle for freedom in South Africa. We should all support his work and help to spread his message of hope and reconciliation.

-- End --
A juicy rumor: cults, Baptists, Big Macs

OAK RIDGE, (N.Y.)—(UPI) — "We look ridiculous trying to refuse something this ridiculous." those were the words of the cult members who had been torn over a non-refreshing soda.

The rumor has been going around the local community, twisting and turning. One rumor has the cult members burning and roasting their McDonald's, while another says they are drinking a secret sauce.

"We've been around for over a century, we've survived wars and plagues, but this is the most ridiculous thing we've ever heard," said one cult member.

A more plausible explanation is that the cult members are protesting the high prices of their favorite drink. "We pay exorbitant prices for a cup of soda, and now they want us to refuse it? It's ridiculous," said another cult member.

"This is just another example of the власть's attempt to control our minds," said a spokesperson for the cult.

A spokesperson for McDonald's declined to comment on the rumor, saying that they take all rumors seriously. "We take all rumors seriously," they said. "We have a team working on this and we will release a statement as soon as we have more information."

DRIVE A BUS FOR US

Make your way through college and build a work experience resume. cambus has one twenty position: either to drive or to offer the student who wants to gain valuable skills on weekends and after school. We also have the option to continue to the employment. For many university people, cambus is in the yellow pages that goes around campus. But those involved in the organization is to a unique, progressive transit agency. For those with a strong in the field, it's an excellent opportunity. Students can acquire a skill which will get them a good paying job in any city or transit system in the country. A possible job during these transit periods or graduate school.

cambus offers an excellent wage scale to students willing to work part time. The $3.00 an hour for the part time work would result in around $1,500.00. The salary for the full time work would result in around $4,500.00. The salary for the part time work would result in around $4,500.00. Employees working at cambus receive regular evaluation giving the employee an opportunity to build a working life for part-time employees.

Schooling is very flexible. You can get paid for all or part of your hours and earn a $500.00 dollars for a part or full time position.

cambus operates 4,800 hours (week not including the support staff). All employees are expected to work a minimum of 12 hours and no more than 20 hours a month.

cambus has a system of EMPLOYEE of the month to give the opportunity to do the best job and win promotions for employees who do the best job. It also runs on weekends except for Christmas. That drives have their weekends free of the work.

As present employees most qualify for the MBA, Study Program. Some financial aid offices and talk is on at e. cambus office to further promote.

FREE CAMERA CHECK & SERVICE CLINIC
OCTOBER 13

Technicians from United Camera Repair will be in the store all day Friday, October 13 to check your equipment.

Minor service will be at no charge and on the spot.

If parts or major service are required, you will receive an estimate on the spot estimate.

You may leave your camera any time during the week to have it checked by the technicians.

NHL opens 62nd season

NEW YORK (AP) - The National Hockey League opens its 62nd season Wednesday with the Maple Leafs and Rangers playing at Philadelphia in a game that has become a tradition in the mid-Atlantic sports culture.

The Minnesota-Montreal game at the Forum in Montreal will start the day late and be a major event in the league. A game in the league.

Mike Bossy, the New York Islanders' top scorer last season, says he's ready to play. He's had an injury and has been out of action for a few weeks.

The Islanders have been practicing for the past few days and are ready to go. They hope to have some new players in the lineup.

The Toronto Maple Leafs open the season at home against the Montreal Canadiens. The Canadiens are coming off a strong season and are expected to be a tough team.

The Detroit Red Wings, winners of the Presidents' Trophy last season, open at home against the Los Angeles Kings. The Kings are coming off a disappointing season and are looking to improve.

The Montreal Canadiens, who have won the Stanley Cup four times in the past five years, open at home against the Vancouver Canucks. The Canucks are coming off a strong season and are looking to continue their success.

The Montreal Canadiens, who have won the Stanley Cup four times in the past five years, open at home against the Vancouver Canucks. The Canucks are coming off a strong season and are looking to continue their success.

The Chicago Black Hawks, who have won the Stanley Cup four times in the past five years, open at home against the Minnesota Wild. The Wild are coming off a disappointing season and are looking to improve.

The Dallas Stars, who have won the Stanley Cup four times in the past five years, open at home against the St. Louis Blues. The Blues are coming off a strong season and are looking to continue their success.

The New York Rangers, who have won the Stanley Cup four times in the past five years, open at home against the Philadelphia Flyers. The Flyers are coming off a disappointing season and are looking to improve.

The Buffalo Sabres, who have won the Presidents' Trophy three times in the past five years, open at home against the Boston Bruins. The Bruins are coming off a strong season and are looking to continue their success.

The New Jersey Devils, who have won the Presidents' Trophy three times in the past five years, open at home against the New York Islanders. The Islanders are coming off a disappointing season and are looking to improve.

The Washington Capitals, who have won the Presidents' Trophy three times in the past five years, open at home against the Pittsburgh Penguins. The Penguins are coming off a strong season and are looking to continue their success.

The Nashville Predators, who have won the Presidents' Trophy three times in the past five years, open at home against the Carolina Hurricanes. The Hurricanes are coming off a strong season and are looking to continue their success.

The Colorado Avalanche, who have won the Presidents' Trophy two times in the past five years, open at home against the Vancouver Canucks. The Canucks are coming off a strong season and are looking to continue their success.

The Phoenix Coyotes, who have won the Presidents' Trophy once in the past five years, open at home against the San Jose Sharks. The Sharks are coming off a strong season and are looking to continue their success.

The Washington Capitals, who have won the Presidents' Trophy once in the past five years, open at home against the Montreal Canadiens. The Canadiens are coming off a strong season and are looking to continue their success.
DODGERS RIP NEW YORK

LOS ANGELES (UPI) - Worried pitching troubles loomed for the Dodgers in the first game of their three-game series against the New York Yankees. Wednesday night in the Cahuenga, Los Angeles Dodgers were the first team to break up the New York Yankees' winning streak. The Dodgers held New York to a 0-0 tie until the seventh inning, when winter was set to end the New York Series. In the last four World Series games - world series, Dodgers defeated the Yankees on a 6-0 score in the seventh inning of the last game.

The World Series opener is a good one over the Yankee Stadium. The Dodgers were the first team to break up the New York Yankees' winning streak. The Dodgers held New York to a 0-0 tie until the seventh inning, when winter was set to end the New York Series. In the last four World Series games - world series, Dodgers defeated the Yankees on a 6-0 score in the seventh inning of the last game.

The STEREO Shop
Believe us, nothing you can buy right now is likely to give you more or longer-lasting enjoyment than a good stereo system.

Like a lot of people, you may find that traffic jams, parking problems, crowds and excruciating prices that are so much a part of "going out" these days make staying home more attractive than ever. So it makes sense to invest in something that makes staying home enjoyable — like a quality stereo system from The Stereo Shop.

We've set up stereo systems with receivers that work particularly well together. Our systems cover a wide range of prices and reflect our desire to offer the highest possible value per dollar. These choices help to simplify your stereo shopping. Some of these systems appear on the following pages.

Fortunately we have always had the ability to find from amongst the best stereo brands available and our current choices represent the finest products in today's audio market.

We're not too large or too small.

We're big enough to buy and sell our merchandise at the right price, but small enough to care about our customers. We're price-competitive but value-oriented.

Our people are helpful.

We don't have commission salespeople but we do have a friendly, low-key staff. Our people are willing and able to answer your questions and provide you with the information to make a valid buying decision.

We won't forget you after the sale.

If you have questions or difficulties with anything purchased from us we're always available to help. If you have a service problem, we will do our best to solve it as fast as possible. We want our customers to continue to be willing and able to ask questions and provide you with the information to make a valid buying decision.

What your dollar buys

You should spend at least $300 for a complete high-fidelity system (two speakers, an amplifier or receiver, and turntable). Below $300, complete systems are usually "compacts" which present too many compromises in fidelity, volume or reliability to be considered "quality" music systems. The one alternative in the under $300 price range is to select good components. We at The Stereo Shop accept trade-ins so we have an inventory of used items to help you put together a system in your price range.

We've set up stereo systems with receivers that work particularly well together. Our systems cover a wide range of prices and reflect our desire to offer the highest possible value per dollar. These choices help to simplify your stereo shopping. Some of these systems appear on the following pages.

We can help you select a stereo system that's right for you.

$300 can get you started

Generally speaking, component systems in the $300 to $500 range will do a good job of reproducing all musical material except perhaps the lowest octave of audible sound. Volume capability in these systems will be more than adequate for small to medium rooms. There are plenty of excellent products from name brand companies to allow you to have a wide choice in this price range.

Today's best values in hi-fi

Between $500 and $750 you can really begin to custom design your own music system. It's possible to get a system with deep bass response and the ability to play loudly without distortion in a large listening area. Also in this price range you'll have a wider selection in a turntable-cartridge combination yielding wider frequency range and better record preservation.

If you're a perfectionist

Above $1000 the most noticeable improvement (aside from more knobs, levers, and meters) is an increased sense of spaciousness in the music. And for the perfectionist, a great variety of exotic (and expensive) components such as

If you think a good stereo system has to cost the earth and sky, think again!

If your ears are larger than your budget for stereo equipment, we have a system for you — a system with name brand components at Brand-X pricing.

We accept trade-ins so we're always available to help even before you come in. Because we spend a good deal of our time evaluating all kinds of stereo equipment for ourselves, we can supply a good preliminary summary of what performance characteristics can be had at what price, what you will gain if you spend more, and what characteristics you might want to see emphasized at a given price level.

What your dollar buys

You should spend at least $300 for a complete high-fidelity system. Two speakers, an amplifier or receiver, and turntable. Below $300, complete systems are usually "compacts" which present too many compromises in fidelity, volume or reliability to be considered "quality" music systems. The one alternative in the under $300 price range is to select good used components. We at The Stereo Shop accept trade-ins so we have an inventory of used items to help you put together a system in your price range.

Quality Sound Through Quality Equipment

The one alternative in the under $300 price range is to select good used components. We at The Stereo Shop accept trade-ins so we have an inventory of used items to help you put together a system in your price range.
It is important to point out that 50 watts will not be twice as loud as 25 watts. In fact, doubling the power only provides a slight increase in volume potential. The important thing is to get enough power to adequately drive the particular set of speakers you choose.

<table>
<thead>
<tr>
<th>Sony V-2</th>
<th>$269</th>
</tr>
</thead>
<tbody>
<tr>
<td>25 Watts (8 ohms) from 20 to 20,000 Hz at no more than 0.3% THD</td>
<td></td>
</tr>
</tbody>
</table>

Because of recent advances in technology and the competitive nature of the hi-fi industry, receivers have improved in quality and today offer a better value than separate amps and tuners for most people.

**SONY V-2**

25 Watts (8 ohms) from 20 to 20,000 Hz at no more than 0.3% THD.

**Yamaha CR 820**

50 Watts (8 ohms) from 20 to 20,000 Hz at no more than 0.05% THD.

**Tuner Specs**

Most of the FM tuner specifications tend to be confusing at first. You should be concerned basically with determining how well the tuner will receive both local and distant stations with an absence of background noise. Look at the stereo sensitivity, at 50 db of quieting (lower is better) and look at the signal-to-noise ratio (higher is better). For reproduction quality look at stereo distortion (lower is better). Almost all the other tuner specs relate to the tuner's ability to reject unwanted interference with the signal and the higher the numbers the better.

**Pioneer SX 1280**

$900.

185 Watts (8 ohms) from 20 to 20,000 Hz at no more than 0.05% THD.

**Features**

Generally the more expensive the receiver the more features it has. Nearly all units provide inputs for a turntable and one tape deck and give you basic controls (bass and treble) over the music. More elaborate units allow for two or more turntables and tape decks, several sets of speakers and provide fine tailoring of the music to individual needs.

**SONY V-2**

$269

25 Watts (8 ohms) from 20 to 20,000 Hz at no more than 0.3% THD.

**Yamaha CR 820**

$465.

50 Watts (8 ohms) from 20 to 20,000 Hz at no more than 0.05% THD.

**Tuner Specs**

Now you can buy an All-Yamaha system for only $519.

When you choose a Yamaha stereo system, you have settled for nothing less than the finest in natural, realistic stereo music. Yamaha's tough standards of performance measurement, and unique features, make it the most wanted brand in stereo components today.

Now we offer a new, lower-priced Yamaha stereo system. It begins with the new CR260 receiver which features low-distortion as well as the recording fidelity and tonal adjustments that have made Yamaha receivers famous.

We add a pair of Yamaha NS-5 acoustic suspension speakers which bring Yamaha's natural sound to a reasonable price range. The turntable is the Yamaha YP 211 - a semi-automatic belt drive model that will treat your records with care. The YP211 has a hinged dust cover and we've included the Ortofon FF100EX cartridge to complete the system.

These components combine to make a system that you can live with. Our super specials tell you why the speakers will be

**Shopping for Speakers**

While it is generally recognized that the loudspeakers are the most critical part of a stereo system, too many people go shopping for them without the slightest idea of what qualities and characteristics they should listen for when auditioning speakers in a hi-fi store.

When listening to and comparing speakers, it's important to begin with qualities that are quantifiable, like frequency range. Then move on to qualities that are not easy to distinguish, such as tonal balance and high frequency dispersion. Once these tangibles have been established, it's possible to narrow your choices down to two or three models and compare those to hear less quantifiable differences. As a result your selection will be a good loudspeaker - one you can live with.

Before you even begin comparing speakers it is necessary to eliminate as many variables as possible. At The Stereo Shop we have arranged our speaker demonstration area in a way that makes for fair comparisons.

For example, we have arranged so that those likely to be compared (because of price or size similarities) are as close together as possible. Each pair of speakers to be compared is separated by an equal distance and at the same distance from the floor. This placement is very important because differences in placement can affect overall sound.

The next variable to eliminate is the relative differences in speaker efficiency. An efficient speaker will play louder with the same amount of amplifier power than an inefficient speaker. If no compensation has been made for this discrepancy in speaker efficiency it's possible to be tricked into believing that the speaker playing the loudest sounds the best.

At The Stereo Shop speakers are compared at the same volume level by using a volume-compensated speaker comparator. So when you switch back and forth between loudspeakers the different speakers will be playing at identical volume levels, allowing for fair competition.

At The Stereo Shop we have a wide assortment of records to use in evaluating loudspeakers, but you may

**Features**

Generally the more expensive the receiver the more features it has. Nearly all units provide inputs for a turntable and one tape deck and give you basic controls (bass and treble) over the music. More elaborate units allow for two or more turntables and tape decks, several sets of speakers and provide fine tailoring of the music to individual needs.

The most variable to eliminate is the relative differences in speaker efficiency. An efficient speaker will play louder with the same amount of amplifier power than an inefficient speaker. If no compensation has been made for this discrepancy in speaker efficiency it’s possible to be tricked into believing that the speaker playing the loudest sounds the best.

At The Stereo Shop speakers are compared at an identical volume level by using a volume-compensated speaker comparator. So when you switch back and forth between loudspeakers the different speakers will be playing at identical volume levels, allowing for a fair comparison.

At The Stereo Shop we have a wide assortment of records to use in evaluating loudspeakers, but you may prefer to bring in a record or two that you are familiar with and that reflects the type of music you usually listen to.

Once you’ve chosen a pair of speakers that seem right for you, we will help you select a receiver or amplifier with adequate power to reach the volume levels you desire in your size room. And to be sure that you’ve picked the best speakers for you, we will encourage you to try them at home to guarantee that they sound right in your room on your stereo system.

Our super special $599 system will tell you why the new Advent/1 speakers will become best-sellers.

**Advent/1**

The Advent/1 is a new speaker that replaces the famous Smaller Advent. It’s Advent’s rededication of just how close you can come, for lower dollars and in a smaller cabinet, to the performance of The New Advent Loudspeaker (the latest version of this country’s most popular and most imitated speaker). It’s performance-per-dollar (and per cubic foot) is unsurpassed by other speakers in the $100 price range.

To match the Advent/1 speakers, we picked the Yamaha CR420 receiver. The CR420 combines clean power (22 watts into 8 ohms from 20 to 20,000 Hz at no more than 0.03% total harmonic distortion) with useful features like continuous loudness control and independent input and record out selectors.

We’ve chosen the new Pioneer PL514 turntable to complete the system. The PL514 is belt-driven and semi-automatic. We add the Advent PL514 turntable to complete the system. The PL514 is belt-driven and semi-automatic. We add the Shure M91ED cartridge to complete the system.

**Shopping for Speakers**

Choosing a Turntable

More than any other part of a stereo system, turntables have changed the most in the past few years. Today it is possible to buy a turntable with extremely high performance for a reasonable price.

Assess your turntable needs

If you want a turntable that will do all the work while you enjoy uninterrupted music, select a fully automatic model that is capable of stacking records. If you're more concerned with performance than features, select a single-play manual model. Most likely you'll want a combination of performance and some convenience. Then a single-play semi-automatic (where the tone arm returns automatically and the table shuts off itself at the end of a record) may be for you.

Pioneer PL 514 $125
Belt-drive semi-automatic

Sony PS-X5 $240
Fully-automatic Direct-drive

Pioneer CR620 $220
Direct-drive

Add a tape deck to a stereo system allows you to expand your music library at a moderate cost. You can tape your friend's records or tape from FM broadcasts and you can make recordings of your favorite records before they get scratched. The three kinds of tape decks include reel-to-reel, 8-track, and cassette.

CASSETTE DECK

Sony
TC-K2A $220
Dolby noise reduction, ferrite head, auto-play, all-mode automatic shut-off, three position tape selector.

Yamaha
TC320 $225
Dolby noise reduction, separate bias and equalization switches, timer recording, double-belt design, mic inputs.

Pioneer
CT-F500 $175
Dolby noise reduction, counter, tape selector for three types, mic input, full-auto stop.

Our $749 Advent-Yamaha-Sony System
To get an ounce more performance you'd have to spend a ton more money.

Under most circumstances, when you pay more for a stereo system, you'll get a better system. There is a point you'll reach, however, where you'll find yourself spending a lot more money for only a minimal increase in quality or performance.

You can spend a lot more money than it takes to buy a pair of New Advent Speakers, but we doubt if they'll sound much better than the Advents. That's because the New Advents not only deliver the whole 10-octave audible range for a fraction of the usual cost, but they sound convincingly natural on all - not just some - kinds of music.

Our Yamaha CR620 receiver is not only a good value from a power standpoint (15 watts into 8 ohms from 20 to 20,000 Hz), at no more than 0.05% total harmonic distortion, but it offers features that will allow for flexibility in tuning whether it be records, FM, or the addition of a tape deck. Another product which represents an excellent value is the new Sony PS-T1 direct-drive turntable. The Sony has auto-return making it convenient to use. We install the Shure M95ED to complete the system.

Sony PS-X5 $240
Fully-automatic Direct-drive

Turntable drive systems

The function of the drive system is to rotate the disc at a constant speed. The oldest method is the rim-drive system with an idler wheel transmitting power from the motor pulley to the turntable through friction of the rubber rims. The major disadvantage to this system is the wearing out or deformation of the wheel resulting in a loss of speed accuracy. Belt-drive turntables employ a rubber or plastic belt to convey motor power to the turntable. The belt tends to prevent motor vibrations from reaching the turntable thus reducing rumble. Direct-drive turntables utilize slow-speed motors which rotate at the same speed as the platter turns. Wow and flutter can be greatly reduced in this system. Direct-drive systems have been the most expensive, although today they are available for under $150 making them price-competitive with belt-drive models.

Don't forget the importance of a good cartridge.

Once you've purchased a good turntable, take advantage of its performance by selecting a high-quality phono cartridge. The cartridge may be the least expensive part of your system, but can make a major difference in the sound quality of the entire music system.

Why tape?

Adding a tape deck to a stereo system allows you to expand your music library at a moderate cost. You can tape your friend's records or tape from FM broadcasts and you can make recordings of your favorite records before they get scratched. The three kinds of tape decks include reel-to-reel, 8-track, and cassette. Reel-to-reel tape decks have been in existence for years and still represent the best performing tape devices. However they typically are quite bulky, expensive and are more difficult to operate than 8-track or cassette. 8-tracks became a fixture when people began putting them into their cars as an addition to a radio. The fidelity level never got very high, but 8-tracks served the purpose of good car entertainment. Cassette decks are the most recent development in tape and the format we recommend for most people. The invention of the Dolby noise reduction device eliminated most of the annoying tape hiss associated with early decks and technology and competition have provided major improvements in performance.

Today's cassette decks approach reel-to-reel quality but offer advantages in convenience and cost. Although cassettes range in price from $100 to well over $1000, the best values are those selling for $175 to $350.

CASSETTE DECKS

Sony
TC-K2A $220
Dolby noise reduction, ferrite head, auto-play, all-mode automatic shut-off, three-position tape selector.

TC-K5 $320
Dolby noise reduction, auto-play, memory, three-position bias and equalization switches, rec-mute, timer, stand-by.

Yamaha
TC320 $225
Dolby noise reduction, separate bias and equalization switches, timer recording, double-belt design, mic inputs.

Pioneer
CT-F500 $175
Dolby noise reduction, counter, tape selector for three types, mic input, full-auto stop.

CT-F900 $500
Dolby noise reduction, 3-head sendust combo, electronic microprocessor, digital tape counter, electronic soft-touch controls, two motors.
If price is no object

If you're able to spend more than $1500 on a stereo system, you have a choice of exotic and expensive components to choose from. In this price range, it is common to match a separate pre-amp (control system) to a power amplifier (output power) and to perhaps add a tuner (FM radio).

Expensive turntables usually offer superb drive systems and, more importantly, high-quality tone arms. Elaborate speaker systems should give an increased sense of spaciousness approaching live music. If you can afford a cassette deck, you can buy one that will not only offer convenience but also offer a host of features.

At The Stereo Shop we feel that high-end (often called audiophile) products in lower price ranges. We feel you ought to buy from a reputable manufacturer who offers products that are not only innovative but lasting. The products we list below are those we have chosen to portray an all-out hi-fi system. This combination is on display and we welcome you to stop in and listen.

Dahlquist DQ-10

Speakers $425/ea.

The DQ-10 system consists of five precisely matched and blending dynamic drivers, each of which has outstanding transient performance in its range of operation. From the very first, one is struck by the unusual degree of spaciousness and three-dimensional depth. Somewhat, the DQ-10 does not sound like a loudspeaker — its accuracy is almost startling.

SONY PS-X6

Turntable $290.

The PS-X6 is a direct-drive turntable with Quartz-Lock drive for dead-on speed accuracy regardless of load, temperature, or voltage. This Sony is a fully automatic single-play with start, stop and repeat functions all activated by electronic touch switches with LED display. Acoustic feedback is minimized by building the cabinet from a special molded material which is very "dead" acoustically minimizing possible distortion. The low-mass tone arm is statically balanced for smooth, precise tracking. Choose a top-line cartridge to take advantage of the PS-X6's quality.

Yamaha B-2

Power Amplifier $850.

The B-2 combines high power and low distortion through the use of matched symmetrical pairs of Yamaha Vertical FETs. Convenient features include highly sensitive wide-range peak level meters, switchable to read external component levels, twin inputs and speaker outputs with front-panel selection and individual level controls, plus push-button muting. The B-2 is a joy to hear and to use.

APT/Holman Pre-Amplifier $447

The APT/Holman is a brand new product that we (and several noted hi-fi reviewers) believe sets a new standard for preamp performance. With a unique phono circuit the Holman has the rare ability to work extremely well with nearly any high quality phonograph cartridge. In addition to its superior sonic qualities the Holman includes a host of features including precision tone controls, filters and tape dubbing not normally found on all-out preamps. At $447 the Holman offers a unique combination of performance and useful features.

Yamaha TC-1000

Cassette Deck $595.

The TC-1000 features the Yamaha-developed Pure Plasma Processed Sendust-Alloy Head for long life. Yamaha uses a two-motor tape transport system especially designed to provide very accurate tape speed performance. Electromagnetic controls for operating switches are used on the TC-1000 permitting direct change of all modes without going through "stop." The TC-1000 combines superb performance with features that contribute to the ease of operation of this fine deck.

Yamaha: dedicated to musical excellence

Most people are probably familiar with Yamaha motorcycles, but did not know that Yamaha began eighty years ago with the idea to make the best musical instruments available. In fact, Yamaha's original name is Nippon Gakki, or Japan Music Company (you notice the three tuning forks in their logo), and it still appears on all their products. Today, their pianos, guitars and organs are among the most respected made; and it's the same experience in sound reproduction and dedication to excellence that makes Yamaha audio components landmark in their field.

Lowest distortion possible: a new approach to amplifier design.

Knowing that critical listeners are far more sensitive to distortion than the extra ten or fifteen watts per channel (a barely audible difference) some manufacturers try to squeeze out of their products, Yamaha engineers and builds its amplifiers to have the lowest distortion in the business. Both harmonic and intermodulation distortion in all Yamaha amplifiers and receivers are guaranteed to be below 0.05% at full power at any audible frequency. And that's the difference you can really hear!

Unique Yamaha features

Yamaha allows for control flexibility through their unique features on their receivers, amplifiers and tuners.
which has outstanding transient performance in its range of operation. From the very first, one is struck by the unusual degree of spaciousness and three-dimensional depth. Somehow, the DO-10 does not sound like a loudspeaker — its accuracy is almost startling.

ACCESSORIES CAN MAKE THE DIFFERENCE

**Cartridges**
A good phonograph cartridge can make a noticeable improvement in the overall sound of your stereo system. It may be worthwhile to spend $20 to $50 more on a cartridge for your turntable. There's nowhere else in your system where you can spend so little and get an audible difference. Below are some of our recommended cartridges.

**SHURE**
- M95ED $33
- M91ED $25

**ORTOFON**
- FF15XIII $28
- F15EII $48
- M20FL $110

**ADC**
- XLM III $69

**Discwasher**
Records are an expensive investment and our choice for a record care device is the Discwasher. The Discwasher will not only keep your new records sounding new, but will remove ground-in dirt and grime from your older records.

**Speakers-uppers**
Speakers-uppers lift any size speakers seven inches off the floor, lets them "breathe" and perform to their fullest capacity.

**Tape**

Maxell cassette tape
- UD70 $4
- UD-XL II C90 $5
- UD-XLII C90 $5

Maxell open reel tape
UD50-50 $7.50

Using high quality tape is not only important for sound quality, but is also crucial for the proper long term operation of your tape deck. Cheap tapes are notorious for jamming, wearing our heads, and leaving oxide deposits all over your machine. Our choice for recording tape is Maxell.

**Headphones**
Headphones enable you to enjoy music without disturbing those around you. They can provide you with extremely accurate sound reproduction at a fraction of the price for comparable speakers. Yamaha offers ultra lightweight headphones that can be worn comfortably for hours and give you wide range frequency response and low distortion for clear and uncolored reproduction.

**YAMAHA**
- HP-1 $65
- HP-2 $50
- HP-3 $35

**12 reasons why our customers send their friends to The Stereo Shop**

- **Home Trial**
  Now all we want you to be happy with the stereo system you purchase from us. We encourage our customers to try a system in their home before making a final decision on the specific components. If it doesn't meet your needs, bring it back along with all packing materials and warranty cards and we will help find the right equipment for you.

- **Trade-ins**
  If you trade in a unit purchased at The Stereo Shop, we will guarantee at least 80 percent of the original purchase price back within the first year. (Providing the equipment is still in excellent condition.) We also welcome older trade-ins and give fair prices to allow you to upgrade your system.

- **Exchange on Defective Units**
  If any of our components fail to operate in the first couple weeks, bring it back and we'll replace it with a new one, providing you bring in the defective unit along with all boxes, packing and unfolded warranty cards.

- **Getting Everything Together**
  Before you leave the store with a stereo system, we'll furnish speaker wire and complete instructions to assist you in hooking up your stereo gear. If you wish, we will deliver and set up the system in your home or dorm free of charge.

- **Warranty & Service**
  All units we sell are covered by the manufacturer's warranty on parts and labor which we honor through our store. If you have problems with any of your components during the warranty period, simply bring the unit or units to us for repair. If your unit can't be fixed right away, we'll loan you a unit so you won't be without music while the service is being performed. You won't spend a dime for service and you won't be without music at The Stereo Shop.

We offer a consignment service for items we wouldn't normally take on trade. We'll sell your unit for you and turn the cash over to you.

- **We Encourage Browsers**
  We like to have people stop in, look around and pick up literature on new equipment. And of course you're welcome to bring your favorite records to us to compare speakers and other equipment.

- **Free Stylus Inspection**
  The Stereo Shop wants to give added peace of mind about your component system, especially one of the parts that most people forget... until it's too late... the stylus. Bring your stylus or cartridge in at any time and we'll examine the stylus for wear at no charge to you.
12 reasons why our customers send their friends to us.

- **Trade In's**
  You trade in a unit purchased at The Stereo Shop, we will guarantee at least 80 percent of the original purchase price back within the first year. (Providing the equipment is still in excellent condition.) We also welcome side-trade-in and give fair prices to allow you to upgrade your system.

- **Exchange on Defective Units**
  If any of our components fail to operate in the first couple weeks, bring it back and we'll replace it with a new one, providing you bring in the defective unit along with all boxes, packing and unfilled warranty cards.

- **Getting Everything Together**
  Before you leave the store with a stereo system, we'll furnish speaker wire and simple instructions to assist you in hooking up your stereo gear. If you wish, we will deliver and set up the system in your home or dorm free of charge.

- **Fair Comparisons**
  Contrary to what is commonly believed, choosing speakers does not have to be confusing. We at The Stereo Shop have a unique speaker comparator. This unit in no way alters the quality of the speakers, it simply allows you to compare speakers at exactly the same volume level.

- **Knowledgeable Sales Persons**
  The people who work at The Stereo Shop are highly trained and genuinely interested in quality hi-fidelity stereo equipment. Our goal is to give you the best stereo system possible for the money you wish to spend.

- **Equipment Clinics and Seminars**
  Several times during the year we offer a free cartridge and turntable clinic. We also do seminars and clinics on speakers and electronics. Watch the Daily Iowan for announcements of clinics.

- **Ways to Pay**
  The Stereo Shop accepts cash and checks as well as Master Charge and Visa. Also we have 90 days same as cash or longer term bank financing with approved credit.

We Invite you to stop in anytime to browse, ask questions or listen to music.
PIONEER PRICE BUST

SA7500-II AMPLIFIER
REG. $250
SALE $149.
45 watts per channel min. at 8 ohms from 20 to 20,000 hertz with no more than 0.1% total harmonic distortion.

TX6500-II TUNER
REG. $200
SALE $129
AM/FM stereo tuner with special IC to suppress interference for high quality selectivity and sensitivity.

HPM40 SPEAKERS
A 3 way, 3 driver system with carbon fiber blended woofer and high polymer super tweeter for louder, clearer, less distorted sound.
REG. $175 ea.
SALE $109.

CT-F500 CASSETTE DECK
A front loading Dolby cassette deck with outstanding performance and features now at an extremely low price.
REG. $175
SALE $149.

PL514 TURNTABLE
Belt drive, auto-return turntable with anti-howl cabinet, precision synchronous motor and high-sensitivity tone arm.
REG. $125
SALE $99.
