New economic predictions are bleaker

WASHINGTON (UPI) - Alfred Kahn, chairman of the Council on Wage and Price Stability, said the most discouraging economic forecasts for the immediate future were made by non-governmental economists. "We saw a group of such economists in the last several months who were saying that the economy was going to be much worse than they expected," Mr. Kahn said. "I think that was the most disconcerting feature of the forecasts." 

The non-governmental economists' forecasts, which were not released, indicated a slowdown in economic growth and a possible recession. Mr. Kahn said he expected the forecasts to be released in the next few days. He said he believed that the forecasts were based on the assumption that the Federal Reserve would keep interest rates high to slow the economy.

Mr. Kahn said he believed that the forecasts were based on the assumption that the Federal Reserve would keep interest rates high to slow the economy.

UI considers nuclear waste disposal

In a decision that could have major implications for the future of nuclear waste management in the United States, the University of Iowa (UI) has decided to consider the option of building a facility for the disposal of nuclear waste on its campus.

UI President Bruce Harreld announced the decision in a letter to the university's Board of Regents, stating that the institution is committed to finding a solution to the nation's nuclear waste disposal problem and that the university will explore the possibility of building a facility on its property.

The decision comes after a series of public hearings and meetings with state and federal officials, during which UI officials expressed concerns about the safety and long-term viability of current nuclear waste disposal methods.

UI's move to consider building a nuclear waste disposal facility is likely to spark controversy and debate, as many people are concerned about the potential environmental and health risks associated with such a facility.

UI's decision follows similar moves by other universities, including the University of California and the University of New Mexico, which have also considered building nuclear waste disposal facilities on their campuses.

The potential costs of building and operating such a facility are significant, and UI will need to carefully consider the environmental, economic, and social implications of such a move before moving forward.

For more information, contact the UI Office of Governmental Affairs at 319-335-3766.

American food: None dare call it edible

No one may ever have been more in the public eye than the person eating an American piece of food. We wonder whether half the time any public interest whatever is taken in the taste, texture or, at this blazed and emblazoned with taste and color, at this blazed and emblazoned with taste and color, at this surpassed and improved by a purely physical quality. What is it like to eat an American piece of food?

The first McDonald's in Des Moines was opened in 1968. The first one there was a little factory and it was called "Ted's." It was just a small shop with a drive-through window. It didn't last long, but it was the beginning of something big.

Up in Smoke — The classic stoner film returns to theaters. Join us for the special screening at 7 p.m. at the Theatre. Today's hot ticket is to nod off while watching the adventures of two young herb smokers. Be sure to arrive early for the best seats, as the show is sold out!

First reading of truck ordinance passes

By BOB ROBERTS

The Iowa City Council voted to move forward today with a proposed enhanced truck ordinance, which would include provisions for increased parking permit fees and stricter enforcement of existing regulations. The council's action now sets the stage for a second reading of the ordinance at its next meeting, scheduled for early next month.

Iowa City officials seek low-income housing sites

By BOB ROBERTS

The Iowa City Redevelopment Commission is seeking potential sites for the construction of low-income housing units, with a focus on areas near the downtown area and to the northeast, where affordable housing is most needed. The commission is actively soliciting proposals from developers and property owners who are interested in partnering on this important community development project.

Council hires meter rates

The City Council has approved a new set of parking rates for the downtown area, including an increase in the rate for on-street parking and a decrease in the rate for off-street parking. The new rates take effect immediately, with the council's action clearing the way for a public hearing on the proposed changes.
Margaret Mead dead of cancer at age 76

NEW YORK (UPI) — Margaret Mead, one of the nation's most famous anthropologists and social critics, died Monday of cancer at the age of 76. Dr. Mead, who knew she was dying, had kept her hours of research and writing reasonably normal up to her final weeks at a New York hospital. A pioneer of modern anthropology, she was being arranged for her 80th birthday. Dr. Mead, the daughter of a New York City lawyer, was born in 1898 on the outskirts of New York City and was brought up to her busy schedule when she spoke at the University of Pennsylvania. Although she had officially retired as a columnist and author, the pioneer anthropologist traveled the nation's most famous anthropologist was a native of Hawaii. Her years of research with primitive and sophisticated cultures convinced her that children were the key to the future — one of her early works stressed the rigid sexual roles assigned to young men and women. She was more interested in studies of traditional cultures than in her own time, Montclair said. Although she officially retired as advisor of students in the museum in

Margaret Mead, who died Wednesday of cancer, is shown in 1965 with a Hawaii mother and child during a visit to the Polynesian Islands. The photo is from her book "Coming of Age in Samoa,"

Hawkeyes' Brady — disillusioned and disenchanted

To see the best, Mike Brady is disillusioned with the 1979 Iowa football season. The disappointment doesn't come from the fact that he has been practicing day in and day out, but from a lack of playing time. Brady had a great freshman season and has been looking for more as the Big Ten year with 10 games left has come to a close with 370 yard. Carrier leads Iowa in receiving during 1979, but Brady has not been able to find the answer. Lack of playing time has been contributed to his non-existent football season.

Extra Point

The Iowa receiver had the chance of playing time. Brady led the Hawkeyes in receiving during in 1977. The junior quarterback until the wing backs were looking for him.

Iowa schedule this year, but not a great year, and don't think I want to play football. Brady said.

Commings was predicting a good senior year for Brady. The press coach was quoted as saying that Brady would be All-Big 8 this year. He was benched for his playing non-existent ability, he said. Brady was benching for spring football. Brady didn't have a good spring spring drills behind Reid. At that time, the coaches told him Brady was better, but he didn't think that was true. He never had a chance to prove he was as good as always, why doesn't understand why he can't receive his share of playing time. Brady doesn't think Brady has taken on a new role about it since and has been a month, but Brady said.

Mike Brady, who led the Hawkeyes in receiving during Brady attributed his poor performance to his injury, and the coaches have been told.

Iowa schedule this year, but not a great year, and don't think I want to play football. Brady said. The only change from last year with 22 catches for 283 yards.

The Hawkeye receiver had the chance of playing time. Brady led the Hawkeyes in receiving during in 1977. The junior quarterback until the wing backs were looking for him.

I.C. man charged with terrorism

Two shots fired during 6½-hour standoff

Iowa City police officer Alonzo Swanson was shot in the head and killed by a man who had been on the run for several years in a standoff and a shootout in a house in Iowa City.

The suspect, identified as William Powers Jr., 38, of Iowa City, was charged with murder, attempted murder, and conspiracy to commit murder.

Powers, who was wanted by police for multiple crimes, including murder, attempted murder, and conspiracy to commit murder, was taken into custody by police after a six-hour standoff in a house in Iowa City.

The standoff ended after police entered the house and arrested the suspect, who was found inside with a rifle.

Corvalle rape attempt reported

Alkiell Kelly

A man was arrested after he attempted to break into a woman's apartment in Coralville.

The man, identified as Terry Kelly, was arrested after he was seen entering a Coralville apartment at about 10 p.m. on Thursday.

Kelly was arrested after he was caught by police entering the apartment.

He was charged with burglary and attempted burglary.

Briefly

Iranian troops fire on demonstrators

100-110.(1978) - Troops fired on demonstrators in Tehran today, killing at least one person and injuring several others.

The incident occurred after thousands of demonstrators gathered in Tehran to protest against the Iranian government.

The troops, loyal to the shah, fired on the demonstrators with tear gas and rubber bullets.
