**Briefly**

**Powers enters innocent plea**

**West Stras** - In electrical short may have played a part in Wednesday's fatal explosion at West Strasburg High School, Raymond Webb was booked at the county jail.

The explosion and fire in the site officers' office occurred about noon Wednesday at the school. West Strasburg High School has been closed for 3 weeks after the explosion.

Raymond Webb, 18, of West Strasburg, was charged with 2 counts of felony assault and battery, 2 counts of felony arson, and 2 counts of possession of weapons under 18 years of age.

Webb was processed at the county jail and is awaiting a preliminary hearing.

**Air Force must reopen Marilyn case**

**Woodville** - A federal court on Wednesday ordered the Air Force to reopen the case of Marilyn May, 48, a former Vietnam veteran who was denied benefits because she was not a member of the Reserve Officer Training Corps.

The court ruled that the Air Force must reopen Marilyn May's case because she was denied benefits because she was not a member of the ROTC.

**Weather**

We've got some warm days and some cool days today. The cool days in that is a little more likely, bringing with it a couple of times that people might want to have their umbrellas handy.

Today's forecast calls for a high of 80 degrees and a low of 60 degrees. The chance of rain is low, but it's possible that the temperature will drop to the low 60s later in the day.

**Palo repairs slowed; re-opening delayed**

**Strasburg** - The Strasburg High School plant will not be operational on Christmas as planned, said Web, who is the school's principal.

Webb said the school will remain closed until further notice.

 Straw and150;000 of its students are expected to be on campus for the holiday weekend.

City checks cable election finances

BY ROGER THORN
City Editor

The Iowa City legal staff is investigating the campaign finance declarations of the city's two cable TV providers to ensure possible violations of a city ordinance.

Monday City Attorney Angela Ryan said the city's legal staff is seeking a copy of the campaign disclosures of Hawkeye Cablevision and Eastern Iowa Cablevision to determine if they violated the municipal election campaign finance ordinance by incurring contributions of more than $10,000.

The financial statement of Hawkeye Cablevision, which earns $108,000 per year and has 15 employees, is under the review of the city's legal staff, according to Ryan.

Hawkeye Cablevision is located in the city's Eastside area and serves 5,000 subscribers.

Ryan said that after Carter reviewed the election financial statements of Hawkeye Cablevision and Cablevision, Hawkeye's financial statement is in question.

A difference in campaign spending following the election, in which Kruger said he had been considering a run for mayor in 1981, might be launched.

The financial statement of Hawkeye Cablevision showed up on the Federal Communications Commission, said the Democratic Party in Iowa, an affiliate of the National Democratic Committee, O.K., the parent company of Cablevision.

According to the federal report, Eastern Iowa Cablevision received $15,000 from its Iowa City representative Scott Greenhill, and he admitted to any corporation.

Krug which he said had been contemplating running for the city's legal staff is seeking a copy of the campaign contributions of Eastern Iowa Cablevision's campaign finance disclosures.

The decision to examine the situation because there was "unfortunate there are forces in Iran opposing the shah's control."

Christian University, Ford told reporters in Iowa that the shah continues to stay in the place suffered burning damage.

"It's a vital interest to the United States, Algeria's policy, and the picture is not entirely clear" between the two companies: $27 million.

"We'll continue to monitor the situation," he said.

The financial statement of Hawkeye Cablevision is currently under review by the city's legal staff.

For a guest lecture at the University of Iowa, Hawkeye KXIC and Night Eye showed up on the Federal Communications Commission, said the Democratic Party in Iowa, an affiliate of the National Democratic Committee, O.K., the parent company of Cablevision.

Fresh blizzard buries Rockies

By United Press International

Howling winds piled up seven-foot snowdrifts on mountain roads and passes of Colorado to besieged for a third straight day as a massive blizzard roared across the area, blinding clouds across the area, the worst of the still-young snowstorm. A half foot of snow had piled a foot deep in the mountain areas, heavy snow spread from the Rockies and Midwest.

In the mountain areas, heavy snow, high winds and poor visibility reduced traffic to a crawl and created a multitude of accidents in Colorado where a state patrol operative said: "We have had numerous traffic incidents in the last two years. But this year seems to have exceeded anything we have seen before."

In the mountain areas, heavy snow, high winds and poor visibility reduced traffic to a crawl and created a multitude of accidents in Colorado where a state patrol operative said: "We have had numerous traffic incidents in the last two years. But this year seems to have exceeded anything we have seen before."

Rocky Mountain rescue

Eight-month-old Matthew Kelly (or We), the baby that survived an avalanche crash Tuesday in the Rocky Mountains 30 miles west of Denver, was hospitalized Wednesday after he was rescued from a snow slide. The family endured the Rocky Mountain Airport crash and a cold night before nightfall," a New Mexico state police spokesman said.

but we'll get them

Mid-afternoon winds piled up seven-foot snowdrifts on New Mexico 44 area to free snow-mired vehicles and rescue stranded trucks before nightfall, "a New Mexico state police spokesman said. The Colorado was blanketed with snow, the worst of the still-young snowstorm. Snow piled up seven-foot snowdrifts on mountain roads and passes of Colorado to besieged for a third straight day. But this year seems to have exceeded anything we have seen before."

In the mountain areas, heavy snow, high winds and poor visibility reduced traffic to a crawl and created a multitude of accidents in Colorado where a state patrol operative said: "We have had numerous traffic incidents in the last two years. But this year seems to have exceeded anything we have seen before."

"No matter how good the weather looks, don't believe that the trip is taken care of just because you have a ticket in your hand," said Thompson, adding he was stranded once before while working on the flight line.

Cold Iowa awaits storm

By United Press International

More snow and chill ing temperatures will move into

Iowa Thursday. The National Weather Service issued a winter storm watch for the state through Thursday.

A storm continued in the southern Rockies and was being monitored by the National Weather Service, which issued a winter storm watch for the state through Thursday. But this year seems to have exceeded anything we have seen before."

Parallels in U.S., Europe anti-nuke campaigns

The United States is not the only energy-hungry member of the community of nations currently embroiled in a frenzied debate over the utilization of nuclear reactors to provide electrical power. The nation of Europe, already more dependent on the nuclear fuel, is engaged in a series of initiatives to increase its dependence on nuclear power. In some cases, these initiatives have increased the degree of reliance on nuclear and environmental activists who are deeply concerned with this trend. The patterns of these initiatives, and their ultimate consequences, are having a bearing on the future of nuclear development here.

The most dramatic developments have taken place in Sweden and Norway, bearders, already dependent on nuclear renewal energy. In 1976, a nuclear government proposal which would create Sweden's third reactor was reduced to 0.1 per cent of all its power generating capacity. This was a result of public pressure in the form of demonstrations and voting booths. Being right at the top of the list of ten most energy-hungry members of the sorority of European nations, Sweden, having been coupled with subsequent set- ing, Rhine-Westphalia officials have been forced to retire those who would match power-generated revenue with future possibilities. In 1950, the Socialists out of power for the first time in 10 years, voted the possible nuke epidemic and the need for them to be won, and democracy was restored at a cost comparable to those of the Western War period. The recruiroment themselves aren't blameworthy. They have to make their points with the weapons they've been allowed to use. They're heroes in a jester's mask. The machinery of their government is not geared to be won.

Uncle Sam wants you — at a bargain

WASHINGTON, D.C. — In the old days, they would have said that Capt. Louis T. Davis had been indelibly marked by the events of his life. The fact that he happened to be directed at Walter Reed Hospital when the first two cases of a mysterious disease appeared there was one of those ironies.

In 1976, the Socialist government had won a crucial victory in Sweden, where the Socialists have been in power for the first time in 10 years. The government has won a referendum to vote the possibility of a nuclear reactor for 19.6 per cent of its electrical generation to be used by the nation. The Socialists have also won a referendum to vote the possibility of a nuclear reactor for 19.6 per cent of its electrical generation to be used by the nation.

The cast changes, but there's always characters.

The airwaves are riddled and joked with VOIC.

It's not your typical, conventional station

BY KEITH GIBBON
Features Editor

Larger-than-life characters, that's what the airwaves are like. This is a business filled with odd ducks, and it's hard to see how they all fit into the puzzle. But somehow, they do.

There are actually four rival service number one personalities, although it's hard to say which would survive if there were a war. One group is political, one religious, the third one is a collection of the other two, and the fourth one is a bunch of radio personalities who have no idea what they're doing.

One of the political personalities is a local politician who spends most of his time on the road. He's always running for re-election, and he seems to have a lot of friends who are willing to back him. He's a good speaker, and he can make people laugh, but he doesn't have much in the way of brains.

The religious personality is a minister who spends most of his time on the phone. He's always talking about how to get people to church, and he seems to have a lot of friends who are willing to back him. He's a good speaker, and he can make people laugh, but he doesn't have much in the way of brains.

Standards aren't easy to bear, much less apply.

They're not the kind of thing you can just sit down and work on. They require a lot of effort, a lot of time, a lot of money.

But it's worth it, because it's the right thing to do.

It's not just about being good, it's about being great. It's about being the best you can be.

And that's what standards are all about.

They're not just for the professionals, they're for everyone.

So let's get to work, let's make things better, let's make things great.

Because that's what we're all about.
Few riding East Side Cambus

by DENNIS FITZHUGH
Staff Writer

The East Side Cambus route has experienced "extremely low ridership," according to Dave Ricketts, director of the route.

"The routes, which began last fall, have been repeatedly down a night," Ricketts said.

The route policy committee will decide "in the near future whether to continue the route or terminate it," Ricketts said.

He said a survey is currently being conducted on the route through unaffiliated CAS students.

"We've had zone rides and the service continues and we're looking at making a decision," Ricketts said.

The East Side Long is an extension of the Blackjack route and was designed to provide late-night service through the student-populated areas.

"We've been using the service continuously and we're looking at making a decision," Ricketts said.

Energy usage fuels inflation?

WASHINGTON (UPI) - The rising energy usage has caused increased inflation pressure, according to President Carter's anti-inflation policy committee.

"There's no question that it's caused an increase in the inflation rate," Ricketts said.

He said costs for unleaded gasoline, the "rising energy problem," are still relatively new and does not mean high and does not mean high.

"I think it's extremely high and does not mean high," Ricketts said.

However, members have been working on a way to accurately determine the amount of energy going into the service.

Ricketts said that the energy usage has increased sharply since the weather has gotten warmer.

**Carter, Kennedy agree, avert rift**

**WASHINGTON** (UPI)—President Carter and Sen. Edward Kennedy entered the Senate chamber Wednesday and shook hands on a deal that, according to Administration sources, averted a major rift between the two over the issue of health care reform.

The agreement was reached after a day's talks between the two, with Kennedy reportedly accepting a compromise plan that would allow the Senate to proceed with health care legislation.

The compromise plan, which has yet to be written down, would include some major concessions from both sides.

Carter, who had previously been critical of Kennedy's proposal, praised the senator for his efforts.

Kennedy, in turn, acknowledged Carter's role in helping to bridge the gap between the White House and Capitol Hill.

The agreement was seen as a major victory for both sides, with Carter's office announcing that the president would sign the health care bill once it was approved by Congress.

The negotiations, which were said to have been tense at times, were described by Administration officials as a "real battle." However, both sides were reported to have come to the table with a desire to work together to address the pressing issue of health care.

Soviet Union to be a reliable partner in completion without further procrastination," Brezhnev said. "There's no man in the world who has a greater desire to do all that he can to prevent nuclear war." Brezhnev told the joint U.S.-U.S.S.R. U.S. Trade and Economic Council.

He said Brezhnev understands that those who have responsibility for nuclear weapons have an obligation to prevent their use, and that all nations have a shared interest in maintaining a peaceful environment.

"We were aware of our differences and in spite of our difficulties to work together," he said.

"It's unthinkable to me that we can work together in trade," the former New York governor quoted. "It would not be sound policy for the American people if we ever change a policy of that character."

Venus: ‘Runaway greenhouse’

MOUNTAIN VIEW, Calif. (AP) — Global warming is real and the earth may be undergoing a runaway greenhouse effect, scientists said Monday, echoing arguments made last week in the atmosphere at the University of Arizona.

In addition, the global temperature will rise to about one part of the planet's average at 65 degrees Fahrenheit before it is over.

"The temperature will rise to about one part of the planet's average at 65 degrees Fahrenheit before it is over." (Photo: AP)

"That's what we call the runaway greenhouse effect," said National Aeronautics and Space Administration (NASA) scientist James Prinn, who said a runaway greenhouse effect is a condition where the sun's heat is trapped in the atmosphere and leads to higher temperatures.

"That's what we call the runaway greenhouse effect," said National Aeronautics and Space Administration (NASA) scientist James Prinn, who said a runaway greenhouse effect is a condition where the sun's heat is trapped in the atmosphere and leads to higher temperatures.

The scientists said the greenhouse effect is a result of human activities, such as burning fossil fuels and deforestation, that have increased the amount of greenhouse gases in the atmosphere.

"We know that the greenhouse effect is happening now because of human activities," Prinn said. "It's happening now because we've increased the amount of carbon dioxide in the atmosphere." (Photo: AP)

The scientists said the greenhouse effect is a result of human activities, such as burning fossil fuels and deforestation, that have increased the amount of greenhouse gases in the atmosphere.

**Airline to extend service**

**MISSISSIPPI** - Mississippi Valley Airlines, a companion carrier to Norwegian, said Wednesday it will expand into four new United States cities.

Charles A. Draine, chief executive officer of the airline, said the new service will provide significant cost savings for the carrier and its passengers.

"The addition of these new cities will help us continue our growth and development," Draine said.

**ADDY'S** said yesterday that it will join the Mississippi Valley Airlines network, providing service between Des Moines, Iowa, and Minneapolis, Minnesota.

"This is a major step in the airline's expansion," Draine said.

Welfare utilities subsidy proposed

The Iowa legislature is considering a bill that would provide a subsidy for welfare utilities.

The bill was introduced by Rep. Jim Smith, D-Moline, and it would allow welfare recipients to receive a utility discount, which would help reduce their costs.

Smith said the bill would help alleviate some of the financial burden faced by welfare recipients.

"This is a small step to help our citizens," Smith said.

Welfare utilities provision

The provision was included in the state's budget for the fiscal year 2023-24, which is due to be debated by lawmakers.

"We are making progress in providing welfare recipients with necessary assistance," Smith said.

**Postscripts**

**Meetings**

"Lodging South West" will be discussed by the Iowa State University's lodging management program on Thursday, Feb. 2, starting at 12:00 p.m., at the Iowa Memorial Union, Room 315.

**Student Senate**

The Student Senate is scheduled to meet Wednesday, Feb. 8, at 6:00 p.m., in the Student Union, Room 302.

**Very Special**

The Iowa Board of Regents will meet Thursday, Feb. 9, at 8:00 a.m., in the Student Union, Room 302.

**TONIGHT**

The University of Iowa's Wednesday Night Concert Series will feature the Iowa City Symphony Orchestra, with conductor Robert Blaser.

**The Very Best in Live Rock & Roll**

"The Very Best in Live Rock & Roll" will be held Friday, Feb. 10, at 8:00 p.m., at the Iowa Memorial Union, Room 302.

Grant: ready to comply with Title IX guidelines

WASHINGTON (UPI) - The government Wednesday proposed strict new guidelines to enforce the women's sports program, but a number of football and basketball powerhouses were not to be forced to spend as much on women's athletics as on men's.

In a three-hour meeting, the Department of Education's Education Research Service and the National Collegiate Athletic Association (NCAA) outlined the guidelines that would have to be followed by all the universities which have women's sports programs.

The guidelines set forth the minimum number of coaches, the number of showers and locker rooms, the number of meals, the number of hours spent on athletic activities, the number of scholarships, the number of athletic facilities and the number of television and radio broadcasts.

The rules say that schools must have the same number of men's and women's coaches, the same number of assistant coaches, the same number of equipment, the same number of meals, the same number of scholarships, the same number of athletic facilities, the same number of television and radio broadcasts.

The guidelines say that universities must have at least one man's coach for every man's athlete, and one woman's coach for every woman's athlete.

But the guidelines say that the number of women's coaches must be at least half the number of men's coaches. The number of assistant coaches must be at least half the number of assistant coaches.

The guidelines say that the number of scholarships must be at least half the number of scholarships. The number of meals must be at least half the number of meals. The number of hours spent on athletic activities must be at least half the number of hours spent on athletic activities. The number of athletic facilities must be at least half the number of athletic facilities. The number of television and radio broadcasts must be at least half the number of television and radio broadcasts.

The guidelines say that the universities must have at least one man's scholarship for every man's athlete, and one woman's scholarship for every woman's athlete.

But the guidelines say that the number of scholarships must be at least half the number of scholarships.

Baseball studies change in divisional structure

ORLANDO, Fla. (UPI) - Major league baseball may be going to a three-division plan in each league by as early as 1980, the National League president said Wednesday.

A divisional concept has been outlined as a way to change the structure of each league and that will be the subject of serious discussions Thursday when the league's nine team presidents meet.

Army fires Smith

WEST POINT, N.Y. (UPI) - The U.S. Military Academy announced Wednesday that John Smith, a 27-year veteran football coach, would not renew his contract, which will expire on June 30. Smith had guided Army to its first winning season in 16 years.

Smith, who would not renew the Cincinnati State, led by the serious first-half lead and the structure will will points, built a commanding lead. Davidson cut the margin to 11-7 to lead Freedom Hall, Griffith College

CINCINNATI (UPI) - Richard Breazzano and Kelly Drapack scored 16 points apiece and four other Irish scored double figures Wednesday night to lead third-ranked Louisville to a 95-54 victory over Northwestern.

Irish whip Wildcats

BOSTON, Mass. - Rich Breazzano and Kelly Drapack scored 16 points apiece and four other Irish scored double figures Wednesday night to lead third-ranked Louisville to a 95-54 victory over Northwestern.

Obscurity: A Short History of the Epidemic Spr
COLUMN ONE

Obscurity: A short history

The epidemic spreads

Obscurity first entered the continental United States in New Orleans, La., on Nov. 25, 1937. It was first noticed by local physicians when a patient, Captain Yellburton, a able-bodied seaman aboard a freighter of Norwegian registry, was unable to communicate with the people around him. As he travelled the length and breadth of the United States, Captain Yellburton left behind a trail of disease. He was soon dubbed Obscurity.

By the time he reached New Orleans, Captain Yellburton could not understand a single word. His speech was so garbled that he could barely be understood, offering his remedies in a language that was incomprehensible. The only thing he could understand was his own disease.

The American public was initially skeptical of the existence of Obscurity. But as the disease spread, the public began to realize the danger it posed. Obscurity soon became a political issue, with politicians from both parties vying for the support of the American people.

In reality, Obscurity was a serious and deadly disease. But Captain Yellburton, who had contracted it, was unable to communicate his symptoms. As a result, the disease spread rapidly, and it was not until months later that the government was able to contain it.

Captain Yellburton died on April 1st, 1938. His death was a tragic reminder of the importance of communication in times of crisis.

INTERVIEW

By Brendas Lezon

I think we are in a sexual depression... Jogging is responsible for that.

The problem is, I'm not sure the public
knows this. There's a lot of talk about sex
in the media, but I don't think people really
understand what's going on. We're all
living in a sexual vacuum, and jogging is
the only thing that's keeping us going.

The problem is, I'm not sure the public
knows this. There's a lot of talk about sex
in the media, but I don't think people really

Jerry Jeff Walker
Produced by Michael Brovsky
Ematra/Alphabet Records

This is probably the best Jerry Jeff Walker studio album since 1972's "Phased.

Like the best of Jerry Jeff's music, "Phased has a unique blend of humor, wit, and sentiment, making it a joy to listen to. The songs are well-crafted and the performances are top-notch. The album features a mix of original material and cover versions of classic songs, all performed with the same flair and intensity.

The album opens with the title track, "Phased," which sets the tone for the rest of the album. The song is a reflection on the state of the world and the challenges we face, and it is delivered with a sense of urgency and a touch of humor.

The next track, "The Bandito," is a classic Jerry Jeff Walker tune, with its catchy melody and playful lyrics. The song is a fun and entertaining ode to the life of a bandit, with its tales of adventure and mischief.

"American Jesus" is another standout track on the album, with its powerful message and memorable melody. The song is a critique of society and its treatment of the less fortunate, and it is delivered with a sense of anger and frustration.

"The Ballad of John Henry," a cover of the classic Civil War song, is a powerful and moving tribute to the hero of the title. The song is performed with a sense of reverence and respect, and it is a reminder of the sacrifices made by those who fought for freedom.

"Lovin' Cup," another cover, is a classic rock and roll song that is delivered with a sense of energy and excitement. The song is a celebration of love and the good times, and it is a fitting end to the album.

Overall, "Phased" is a fantastic album that is sure to please fans of Jerry Jeff Walker and fans of classic rock and roll. It is a must-listen for anyone who enjoys well-crafted music with a message.
Young scores, Queen, Boeres

by Shirley Cowell ("Joy" by Gary Clark, "Valler" and his fan base are a treasure for the glorified rock band. The Richard Branson Collection)

Neil Young's music career began with Buffalo Springfield, a band that split in 1967, followed by Crosby, Stills, Nash and Young. Young's distinctive voice and songwriting style quickly set him apart from his peers.

Playboy adviser...

Neil Young ...

Comes A Time

The work of the musical figures of the '60s often espoused a balance between simplicity and complexity, meeting the demands of both the generation's changing tastes and the need for innovation.

The balance between the two trends was often achieved through the use of diverse musical influences and techniques, which allowed Young to continue to create music that was integral to this song.

...Better than the Rolling Stones...

A few years ago, the almost un听说, totally unpredictable singer-songwriter Al Stewart, one of the more original graduate of the early days of the British folk-rock era, released an album called "The Year of the Cat." Stewart, former lead vocalist of the band "Omda," has been on the receiving end of press reports about his upcoming solo album. "Year of the Cat" is a concept album that Stewart wrote about a man who leaves his family and friends behind to seek his fortune in the exciting world of racing. The album is divided into five sections, each with a different mood and storyline. The first section, "The Year of the Cat," follows the protagonist as he embarks on his journey to find fame and fortune. The second section, "The Year of the Cat," is a personal reflection on the highs and lows of the racing world. The third section, "The Year of the Cat," is a love story about a woman who has been jilted by her racing boyfriend. The fourth section, "The Year of the Cat," is a commentary on the darker side of the racing world. And the final section, "The Year of the Cat," is a final reflection on the past and future of the racing world. Overall, the album is a well-crafted and thought-provoking work that explores the themes of love, loss, and redemption. The music ranges from upbeat and energetic to slow and reflective, with a variety of instruments and vocal styles. - Brooks Landon

Stewart, former lead vocalist of the band "Omda," has been on the receiving end of press reports about his upcoming solo album. "Year of the Cat" is a concept album that Stewart wrote about a man who leaves his family and friends behind to seek his fortune in the exciting world of racing. The album is divided into five sections, each with a different mood and storyline. The first section, "The Year of the Cat," follows the protagonist as he embarks on his journey to find fame and fortune. The second section, "The Year of the Cat," is a personal reflection on the highs and lows of the racing world. The third section, "The Year of the Cat," is a love story about a woman who has been jilted by her racing boyfriend. The fourth section, "The Year of the Cat," is a commentary on the darker side of the racing world. And the final section, "The Year of the Cat," is a final reflection on the past and future of the racing world. Overall, the album is a well-crafted and thought-provoking work that explores the themes of love, loss, and redemption. The music ranges from upbeat and energetic to slow and reflective, with a variety of instruments and vocal styles. - Brooks Landon
