

## Regents okay parietal rule suspension

By TERRY IRWIN  
Staff Writer

The state Board of Regents Friday voted 7-1 to suspend the UI's parietal rule, which since 1971 has required nearly all freshmen and sophomores to live in the dormitories.

The rule will be lifted for next fall's sophomores and for freshmen the following year. During the two-year suspension period the effects of the removal will be studied to see if occupancy rates can be maintained and if improvements planned by the UI administration succeed in making dorm life more attractive to students.

But, as recommended by the regents' staff, the rule will be automatically reinstated at the end of two years unless action is taken to extend the suspension or eliminate the rule.

UI administrators and student government leaders had proposed a similar plan — dropping the rule for sophomores next fall and for freshmen in the 1980-81 academic year — that called for yearly reviews rather than automatic reinstatement two years later.

At last October's board meeting in Ames UI student leaders requested that the parietal rule be eliminated, maintaining that if the rule was changed occupancy rates would remain high enough to maintain the financial stability of the dormitory system.

And as part of the plan adopted by the regents Friday, the UI student government will pledge \$126,000 in mandatory student activity fees each year as a contingency fund in case dorm revenues decrease severely — more than already anticipated because of a projected enrollment drop.

Those activity fees currently are allocated to student groups and services.

Stanley told the regents he and the other students had received "a lot of feedback about 'trading' \$126,000 in student fees for the end of the rule."

He said, "I'd like to say we students still feel what we said earlier this fall is true. We don't expect the amount of people in the residence halls to go down as a result of this. According to all the surveys conducted of other schools and according to the attitude and climate of Iowa City, we think the population is stable in the residence halls."

"We don't expect an exodus. We don't encourage it. That's not why we did this. And we don't expect to give up one dime of our student fees. We want to make sure you know that we believed what we were saying and that's why we're willing to go into a proposal like that."

Under the regents' staff proposal, Stanley said, the "phasing-out" of the rule hardly would be completed before the rule is reinstated. He said the students preferred that there be some time for evaluation before the board takes action again.

"It takes a lot of work and a lot of timing in order to get this kind of resolution through and this kind of thing passed," he said. "And I'm not sure the whole institution would want to go through something of this magnitude every two years in order to perpetuate the suspension, and that's my reservation there."

Stanley also said suspending the rule subject to automatic reinstatement might be an "overly cautious" action. He noted that as part of their research, UI administrators had included plans for the worst possible conditions that could befall the UI, and he pointed out another regents institution, Iowa State University, as an example of a school that is not operating under a parietal rule but

## Witnesses dispute Hanoi's claim that it controls all of Cambodia

BANGKOK, Thailand (UPI) — Radio Hanoi claimed again Sunday that its forces control all of Cambodia, but eyewitnesses and intelligence specialists said it wasn't so.

UPI photographer Kraipit Phanvut crossed the border into Cambodia and interviewed a 36-year-old Pol Pot loyalist leader who said he and his 400 troops, their backs to the Thai border, were digging in to fight.

Loyalists also remained in uncontested control of a sacred Buddhist temple in northern Cambodia, and had two helicopters there, other witnesses said.

Intelligence reports from a variety of

sources, meanwhile, continued to speak of moderate-to-heavy fighting on isolated battlefields throughout Cambodia.

Analysts said the fighting was by main force Khmer Rouge battalions and

control of the country.

It said, however, that "a number of members of the reactionary administration (are) still in hiding."

Despite some news reports, there appeared to be no effort by the loyalists to recapture towns and cities overrun by the Vietnamese in the first three weeks of the Christmas invasion.

Rather, the uncoordinated attacks seemed aimed at cutting extended Vietnamese military supply lines, informed intelligence analysts said.

"We frankly can't tell anyway who's actually in control of any given place," said a highly informed analyst with access to the most sophisticated data.

Some members of the Iowa City Association of Professional Firefighters are questioning the qualifications of firefighter Linda Eaton, who is scheduled to return to work today after a nine-month absence from the fire department.

Union members are questioning Eaton's Civil Service status, the manner in which city officials have handled Eaton's maternity leave and the city's failure to fill the vacancy on the force that Eaton's leave created.

But city officials say that Eaton has been certified by the Civil Service

## Iran's air force on hunger strike

TEHRAN, Iran (UPI) — Nearly 4,000 elite Iranian air force officers and enlisted men went on a hunger strike, demanding withdrawal of all U.S. military advisers and said they would not support any armed forces coup, newspapers reported Sunday.

The revolt at two air force bases was the most serious unrest reported in the armed forces since Shah Mohammed Reza Pahlavi quit the country Tuesday.

It was a further setback for embattled Prime Minister Shahpour Bakhtiar, whose main support since the shah left has come from the armed forces.

Despite this new problem, however, diplomatic sources reported Bakhtiar had started to gain support among moderate elements, prompting his major political opponent, Ayatollah Ruhollah Khomeini, to schedule his return to Iran on Friday — sooner than expected — for a showdown battle for control of the country.

An estimated 2,000 demonstrators briefly rampaged through Tehran Sunday and tore up pictures of Khomeini, which replaced portraits of the shah only a few days ago. The demonstrators shouted slogans against Khomeini but there was no violence.

The scuffles followed clashes at Tehran's Technical University earlier Sunday between left-wing students and supporters of Khomeini. No serious injuries were reported in the clash.

The incidents indicated an increasing polarization of Iranian political groups which until the shah's departure last Tuesday were united against his regime.

Several hundred pro-Khomeini students staged sit-ins at the offices of Tehran newspapers Sunday to protest "undue coverage of leftist political activities." The editors rejected the charge, saying they were only exercising

press freedoms granted by Bakhtiar when he formed his civilian government Jan. 6.

The prime minister's office Sunday denied a report that two members of the nine-man regency council — Mohammed Ali Varasteh and Abdul Hussein Aliabadi — had resigned. UPI Correspondent Sajid Rizvi said friends of the two told him they were considering quitting.

The state-run radio reported eight of the council members met in Tehran and discussed "current national issues." The chief of the council, Jalal Tehrani, is in Paris trying to negotiate with Khomeini a possible reconciliation between the religious leader and Bakhtiar.

The regency council was established

Related story: Page 7

according to the constitution to help Bakhtiar govern in the absence of the shah.

The premier held an emergency meeting with parliament members Sunday to discuss the imminent return of Khomeini and the political showdown it is expected to precipitate.

Bakhtiar, in a TV address broadcast to the nation Sunday, criticized Iranian newspapers for spreading rumors of his imminent resignation and warned the country was faced with a real threat.

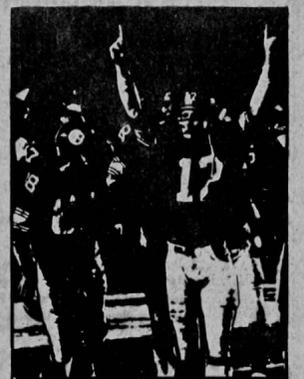

"If others realize we are weak, they would be tempted to intervene," Bakhtiar warned. He specifically denied he would resign when Khomeini returns to Iran.

In other political developments, the deputy war minister, Col. Mehdi Haj Moniri, resigned. Bakhtiar, in a continuing diplomatic shakeup, fired the country's ambassadors to the Soviet Union and Saudi Arabia and his consuls in New York, San Francisco and Karachi.

A bill also will be introduced in parliament calling for the trial of all people who held ministerial posts under the shah during the past 15 years. Deputies urged Bakhtiar to quickly approve another law dissolving the dreaded secret police, SAVAK, as quickly as possible.

The air force revolt began Friday at the sprawling west Iranian air base at Shasrokhi.

## Briefly

### Smog limit to rise

WASHINGTON (UPI) — The Environmental Protection Administration this week is expected to raise the allowable level of smog in cities by 50 per cent, the Washington Post reported Sunday.

The Post said that EPA Administrator Douglas Costle is expected to announce that the acceptable levels of smog will be raised from .08 to .12 micrograms per cubic meter of air — a compromise between industry which wants a .16 level or higher and environmentalists who want the level reduced.

EPA's chief spokesman Marlin Fitzwater said Costle would not confirm or deny the figures but he added, "the decision will be made in the next week. As we interpret it, Costle is not allowed to make this decision on economic balancing between the costs

and health effects," Fitzwater said.

During a six-month public comment period, he said, EPA had received data on the health effects of smog levels that suggested the standard should be set between .10 and .25.

If the smog standard is lowered — which appears very likely — "it will take effect immediately," Fitzwater said. This will mean savings to business of billions of dollars in clean-up equipment.

### Duel in Lebanon

BEIRUT, Lebanon (UPI) — Israeli gunners pounded Palestinian and Lebanese leftist militia concentrations Sunday and the guerrillas retaliated with similar attacks on Israeli settlements and a Lebanese right-wing Christian enclave, travelers from the border region reported.

They said in the southern town of Nabatiyeh alone six people were killed and 14 others wounded.

There were casualties in other sectors of the border region, but figures were not

immediately available.

Israeli artillery gunners opened fire on the guerrilla-controlled market town shortly after midnight, reporters in the south and Palestinian officials said, sparking an on-and-off swap of shellfire that continued through Sunday afternoon.

"All kinds of artillery weapons are being used," a Lebanese reporter near the southeast frontier reported at the height of the gun duel. He said that by about 1:30 p.m. "the scope of Israeli firing widened to include (the frontier town of) Rashaya al Wadi and surrounding areas."

Nabatiyeh is about eight miles inland from the southeastern border.

### West German TV to air 'Holocaust'

BONN, West Germany (UPI) — A West German TV network said Sunday it is going ahead with plans to show "Holocaust," the American series about the

Nazi extermination of Jews, despite neo-Nazi threats of violence to block the transmission.

"We bought 'Holocaust' to show people both at home and abroad that we are not afraid to deal with such a shocking theme," said Heinz Werner Huebner, director of the telecast.

A network official said police would guard the stations and transmitting masts to prevent a repetition of last Thursday's bomb attack during the showing of a documentary prelude to "Holocaust."

The first of the four-part "Holocaust" series, dubbed in German, will be telecast throughout the nation tonight. However, it is being shown on West Germany's third channel, regularly used for regional-interest programs, which attracts a much smaller audience than the two national channels.

The Cologne-based television station WDR paid \$543,000 for the nine-hour series, which drew wide audiences in the United States and other countries when it was shown last year.

### No-parking zones set in Iowa City

The Iowa City Police Department announced Friday that due to the heavy and increasing snowfall, temporary no-parking zones will be enforced on some Iowa City streets until the snow cover melts or is otherwise removed.

White signs with red lettering will mark the designated areas where parking presents passage problems for vehicles or impedes a generally normal flow of traffic. Violation of the temporary no-parking zones will result in the towing away of the illegally parked cars.

### Strikes maim London

LONDON (UPI) — A crippling wave of strikes brought misery and inconvenience to millions of Britons Sunday despite a series of weekend negotiations. There was much worse to come.

"Never in our history have we been so close to total anarchy," said opposition member of Parliament George Gardner of the wave of labor unrest triggered by the government's attempt to limit wage increases.

"You have not seen the half of it yet," said industrial expert Robert Taylor. It was bad enough that no break was in sight — despite one long meeting Sunday — in the two-week nationwide truck drivers' strike.

### Weather

And now for something completely different: It's going to snow tonight. Yes, we know we've said that before and delivered but four flakes (from Southern California) but this time for sure. First, we'll faint with clear skies and balmy highs in the 20s this morning, but the skies will be cloudy by 3, and the stuff will start falling by 7. Ah, Iowa, a winter wonderland. You stand out amongst the snow and cold and wonder why you're here.

**He wanted to get three wise men, but it happened in Philadelphia**

PHILADELPHIA (UPI) — Someday Harvey Rovinsky will tell his daughter the story of her birth, and how he took her home from the hospital in a Rolls Royce followed by a sound truck blaring John Philip Sousa marches.

She may not believe him, but it's true. On Sunday, the proud father literally rolled out the red carpet at Thomas Jefferson University Hospital to welcome the child he and his wife thought they would never have.

Harvey and Madalyn Rovinsky tried unsuccessfully for six years to have a baby. After a number of frustrating visits to doctors who offered little hope, they finally met Dr. Abraham Rakoff of Jefferson's fertility clinic who suggested that Madalyn take fertility drugs.

The drugs worked. Last Wednesday, Madalyn Rovinsky gave birth to a 6-pound, 3-ounce girl — Julia Ann Jakette.

"My feet haven't touched the ground," said Rovinsky, 32, a jewelry store employee who four weeks ago decided that Jakette's birth called for more than just handing out cigars.

In addition to renting the Rolls Royce, he distributed T-shirts which said, "I love Jake," had a billboard made which read, "Jakette, we love you," and gave a special gold spoon to the baby. Silver wasn't enough.

At the wheel of the Rolls sat Jakette's grandparents, waiting to lead a caravan of cars laden with bunting and balloons to the Rovinskys' apartment in Andalusia, Bucks County.

"I feel unbelievable," Rovinsky said. "What else can I say? It was a super thing for us. The baby is happy, healthy and great. For the first four months she was pregnant, we didn't tell anybody."

"What can I do to celebrate?" he said he had asked himself a few weeks ago. "I said to her (Madalyn) that I wanted to do something outrageous. I asked her, 'Do you mind?'"

Not a bit, she said. Madalyn celebrates her 31st birthday today and the festivities aren't over yet. "There's a party planned next week," Rovinsky said. "I'm going to have a big search light with mummies coming to entertain."

# Social programs to bear brunt of '80 budget cuts

WASHINGTON (UPI) — President Carter unveils his inflation-fighting 1980 budget today, touching off a national debate over who should bear the burden of the spending cuts needed to put America's ailing economy back on its feet.

The administration handed out embargoed copies of the voluminous budget Friday, giving reporters the weekend to translate the columns of numbers into political reality.

Advance word from administration sources left little doubt about how the budget will allocate the billions of dollars needed to keep the federal

government going during the fiscal year beginning Oct. 1.

The sources said the key to the new budget will be austerity, highlighted by a deficit of \$29 billion — the lowest red ink total in seven years.

With the controversial exception of defense, the sources said, new spending has been cut to the bone. That means less money for welfare, jobs and education.

The presentation of the budget to Congress at noon today marks the start of a national debate that will affect the lives of every American in one way or another.

The administration's budget will be poked, sliced, pinched and padded over the next eight months as Congress writes the final version of the government's blueprint for 1980.

In the process, the lawmakers will debate such tough political questions as how to balance defense needs against the needs of the poor and how to control inflation while avoiding a recession.

At stake will be the fate of thousands of government programs: missile silos to meat stamps, highway subsidies to health services, college stipends to crop supports.

## Gov't specialist speaks on behalf of snail darter

WASHINGTON (UPI) — An Interior Department specialist has recommended against completing a Tennessee dam threatening the snail darter, a two-inch fish made famous by a Supreme Court decision last year, it was revealed Sunday.

Department sources said David Hales, a fish and wildlife expert, has sent Interior Secretary Cecil Andrus a letter endorsing efforts to "provide for the long-term welfare of the endangered species."

The letter calls for removal of the earthen portion of the Tellico Dam on the Little Tennessee River to prevent the extinction of the tiny fish. Dam costs have been placed at \$196 million.

The government has moved some Little Tennessee River snail darters to a nearby river. Scientists said the relocated fish appear to be thriving, although it may be too early to tell.

# Commission: Redo airport study

By TOM DRURY  
Staff Writer

The Iowa City Airport Commission has unanimously rejected a Kansas City consulting firm's initial work on the Municipal Airport's master plan.

The five-member commission voted Thursday to tell L.R. Kimball and Associates that the rough draft of the master plan's "Phase One" will not be accepted unless more research is included in the report.

When the report was revealed at a Jan. 10 meeting of the Johnson County Land Use and Water Resources Commission, consultant Dave Byers of the Kimball firm said the report

was 90-95 per cent complete. After numerous complaints of inadequacies in the draft, however, Byers told *The Daily Iowan* the report was meant to be approximately 75 per cent complete.

At its Thursday night meeting, the Airport Commission told Byers, who prepared the draft, that research is needed in four areas to make the report satisfactory.

The resolution, made by commission member Caroline Embree, mandated a more inclusive survey of businesses than was included in the rough draft in which Byers drew an analysis of industrial interests from a questionnaire that was

mailed to 17 Iowa City businesses and returned by eight.

The commission also called for re-examination of the estimated service area population. In the rough draft, that population was set at 88,619 — the entire population of Johnson County (though residents of the northern part of the county would probably use the Cedar Rapids Airport) plus half the population of Iowa County.

Byers said Thursday that he included northern Johnson County and "traded off" (did not include) West Branch and West Liberty, whose residents would likely use the airport.

Byers did so, he said, to save "time and confusion."

Byers said he plans to revise the service area figure by excluding northern Johnson County. But he said the revision will not make "that much of a difference. We're dealing with a couple thousand people... It's not going to change the forecast much." In the rough draft, Byers estimates a service area population of over 101,000 by 1997.

The third point in the commission's resolution states the necessity of a more inclusive study of data on users of the airport, both in kinds and numbers of aircraft. Byers has based his preliminary

estimations on data from the Federal Aviation Agency, the Iowa Department of Transportation and Airport Manager E.K. Jones. The commission recommended that Byers incorporate information from records of the Cedar Rapids Airport Approach Control and Flight Service operations, and an on-site DOT study of Iowa City Airport traffic conducted last year.

Also called for was inclusion of public opinion in the study besides that of local businesspersons. Byers said an upcoming public hearing on the study will allow Iowa City residents to give input to the study. The meeting had been set for Jan. 25 but was rescheduled for Feb. 1 to avoid conflict with next Thursday's Iowa-Illinois basketball game.

Byers did not specifically agree to make all the changes called for in the resolution; he said a mailing of questionnaires to more businesses might be too costly. Asked his reaction to the resolution, Byers said he would be altering his "data inventory" but did not elaborate.

The commission also voted to allow Jones to initiate a jet fuel service. The service reportedly will supply fuel to the jet-powered helicopter that will be providing emergency transport service for the UI under a recent agreement between the UI and Aviation Medical Services of Houston.

At the meeting, Jones had requested that a two-cent-per-gallon flowage fee not be imposed on the jet fuel until he had regained the estimated \$17,000 it will cost to install the service. But he eventually agreed to pay the fee, after opposition to installation of the jet fuel service was raised.

Jan Redick of the commission argued that the service could lead to increased jet traffic, a prospect opposed by Redick and a number of citizens living under the flight path of planes landing at the airport.

The commission voted to allow installation of the service and impose the standard two-cent flowage fee.

## 'Up to fire chief to take action'

Continued from page 1.

circulating a petition in support of Eaton's right to nurse her child at her place of employment.

Iowa City officials said Friday the city's regulations regarding employee conduct prohibits women employees from nursing at the job site during working hours.

Eaton said last week she intends to go back to work this morning and to nurse her baby while she works her 24-hour shift.

Dale Helling, Iowa City assistant city manager, said, "We plan to wait and see what she does Monday. If she nurses the baby in the Fire Department, it's up to

the chief to take whatever action is necessary."

When asked if Eaton would be allowed to bring her baby into the visitation area of the fire station, Helling said, "I doubt that the chief would prohibit a visit."

Fire department officials say that visits from family members of firefighters are allowed during their "personal time" but that it does not happen on a routine basis.

Officials also say that "personal time" is not a structured activity at a specific time of the day but that it usually occurs between noon and 1 p.m. and after 6 p.m. If personal time is available, firefighters are free to do what they want within the fire station (watch television, play cards,

sleeping, etc.) but must always be ready to respond to a fire alarm.

Eaton said she plans to nurse the baby twice a day in her private locker area, which is equipped with a speaker system. She said her sister would be present to take the baby in case an alarm occurred while she is nursing him.

When asked if the city planned to monitor the women's locker area or prohibit Eaton from taking the baby into the locker area, Helling said it would be up to Keating to make that decision.

A spokesman at the Fire Department said Keating would not comment on the nursing situation and that he was referring the matter to Helling.

## Union challenges Eaton's status

Continued from page 1.

Commission and that her leave from the fire department has been handled properly.

Eaton said she has fought five fires while working as a firefighter and said some firefighters she has worked with have told her they would rather work with her at a fire than with other men on the force.

Eaton has become a target for criticism since she took a maternity leave from the department and requested that she be allowed to nurse her son when she returns to work today. Iowa City Fire Chief Robert Keating and city officials have denied her request, and the local firefighters union has supported the chief's position.

Richard Craig, secretary of the firefighters' association, said Eaton should have to requalify for a civil service position because she was trans-

ferred to a non-civil service custodial job during her pregnancy. He said Eaton's pregnancy also allegedly violated her one-year probationary period.

"Her coming back from a non-civil service job and being gone as long as she was, we don't feel she qualifies," Craig said. "We were short a person since May. If she was transferred out, she's no longer in our department and should have to requalify."

"Also, the state law says if you cannot fulfill your probationary period, you should be let go."

Craig said that in November 1976 a man who had served as a firefighter for five months broke his finger during his probationary period. Craig said the man's name was placed back on the civil service list and another firefighter filled his vacancy.

"We contend they should have done it the same way with her," he said. Eaton's

position has been held open since she was transferred to the city Park and Recreation Department. "We contend this is a form of reverse discrimination," Craig said.

Craig said Eaton also failed the chinups and the fireman's drag (dragging a person 100 feet) portion of the Civil Service physical examination. He said, under the rules of the exam, an applicant fails the exam if he or she is unable to complete any portion of the physical.

At an Oct. 9 Iowa City Council meeting when the questions of Eaton's vacancy and qualifications were discussed, Bill Nusser, chairman of the Civil Service Commission, verified that Eaton had failed the two portions of the exam.

"But it's happened many times that we passed a male applicant that did not complete all the tests," Nusser said.

## May hold classes in dorms, Boyd says

Continued from page 1.

manages to maintain high occupancy rates.

Donald Shaw, the only board member who voted against suspending the rule, said he felt the board lacked sufficient information on how suspending the rule might affect repayment of the bonds issued to finance construction of some dormitories.

"We have really nothing before us as to what undertakings we have made as the board on behalf of the state of Iowa with respect to the bondholdings," he said.

Shaw also said he did not have complete information on the legal implications "with respect to going on-again and off-again with the parietal rule," and he questioned the accuracy of estimates of the UI's projected drop in enrollment and how it might be affected by the suspension.

"If we are to say we are beefing up

some of the support services in the dormitories, educational and so on, and that we aren't going to require students to live in dormitories, then where are we going to be a year or two from now when we find that occupancy in the dormitories went off not 275 but 1,500?" Shaw said.

UI President Willard Boyd, a strong advocate of on-campus living, stressed the opportunities for educational development available in the dorms but stood behind the UI's request that the rule be suspended.

Boyd pointed out that as enrollment declines in the next 10-15 years, even a parietal rule could not guarantee full occupancy. He supported upgrading services in ways that might make dorm life more attractive to UI students.

"I do not think that the parietal rule alone is going to solve the occupancy issue," he said. "We're going to have to have the maximum number of students in there (in the dormitories) and then we

are going to have to use residence halls for other purposes."

The UI has proposed conducting some classes in some dormitories. "This university is greatly undercapitalized, in terms of buildings," Boyd said. "We don't have the facilities. I've said in the case of the business school, we may have to put some of your classes in the residence halls because we've got nowhere else to go."

But Boyd also stressed that removing the parietal rule will not automatically clear up all problems with dormitory living. "I can never come to you, and never have, with a panacea," he said. "This is no panacea. It's going to require a lot of blood, sweat and tears."

In other action, the regents approved a \$27,300 project for the construction of a helicopter landing pad near the entrance of UI Hospitals' emergency treatment center.

## Police beat

Two local men were apprehended by Iowa City Police early Sunday morning following a high-speed chase northbound on Dubuque Street.

Iowa City Police officers recognized John Seeman, wanted by Cedar Rapids Police on other charges, in a fast-moving vehicle around 12:45 a.m. Sunday. The police gave chase, but the vehicle refused to yield and began passing other cars. It then ran through a snowbank to avoid another

squad car.

The car finally stopped in a driveway and its three occupants fled on foot. Two of the men, Pat Mill of RR 6, Iowa City, and Seeman, were apprehended. According to the police record, the driver, identified by police as Michael Poots of Coralville, escaped. Poots faces charges of speeding, two counts of reckless driving, two counts of failure to yield to an emergency vehicle and running a stop sign.

## No reasonable objections offered to nursing firefighter

If Iowa City firefighter Linda Eaton has followed through with the plans she articulated last week, she is nursing her son at the fire station today in defiance of the orders of her superiors. Fire Chief Robert Keating has made it clear that if she insists on breast feeding her baby while on duty her job is in jeopardy, and city officials are apparently backing up the chief.

The reasons behind the fire departments and the city's opposition to Eaton breast feeding her son at the station are not clear. In a letter to Eaton, Asst. City Manager Dale Helling mentioned "functional and legal implications," but those vague terms don't explain very much. The Iowa City Association of Professional Firefighters is endorsing the nursing ban and its viewpoint (not to mention its allegiance) is puzzling. Union Secretary Richard Craig charged that Eaton is "making a mockery of our profession" by making her demand to be allowed to nurse her son. (And while it is obvious she is doing no such thing, it is doubtful she could ever hope to do so with the precision exhibited by her superior.)

Without further elaboration on these positions, Eaton's contentions appear to be sound and compelling. She is asking only that she be allowed to nurse her son during the personal time that is part of the on-duty routine of all firefighters, and in the privacy of her locker. It is customary that firefighters meet with their families during personal time; Eaton is asking only that she be allowed to interact with her son in a manner that will serve his needs and hers.

What reasonable objection can there be to that? Concern has been voiced that nursing might slow Eaton's response in case of alarm. But certainly, nursing should be no greater impediment to her than heeding certain other calls of nature would be to any other firefighter. Has the department considered the "functional implications" of the possible untimely coincidence of a fire alarm and bathroom use?

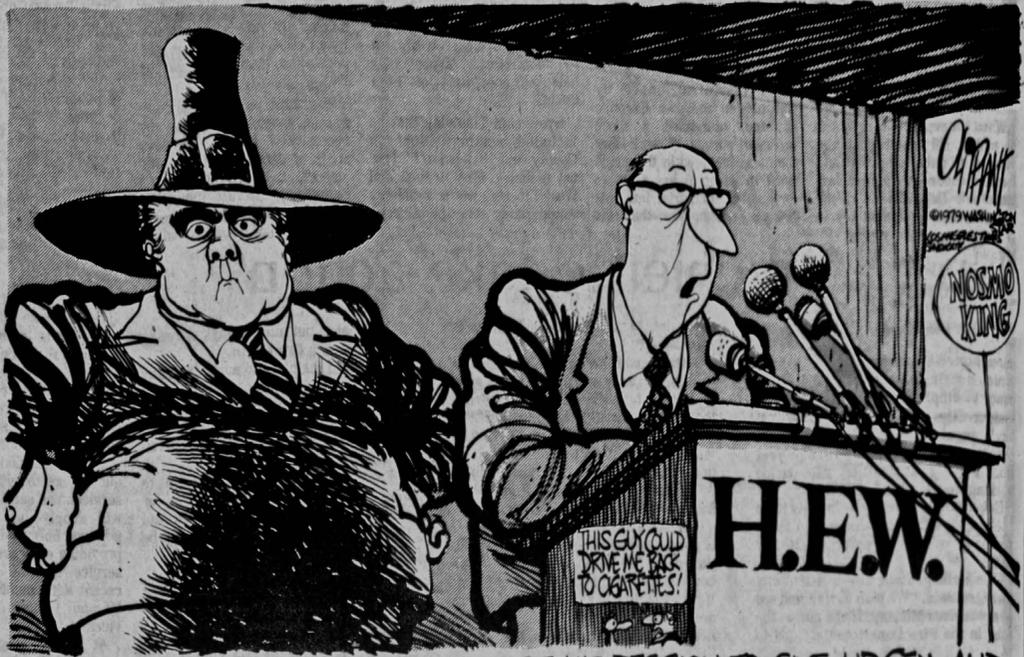

What may lie behind the department's adamant is an assumption that breast feeding is some radically unorthodox

activity. Why else would this even be an issue? It is true that breast-feeding has not been a typical activity of firefighters, since firefighters have been almost invariably men. But nursing is a natural function of women with infants. Why should a woman firefighter be any different? After all, Eaton is not asking that she be allowed to nurse her son while speeding through the streets on the way to a fire. Nor is she asking that she be relieved of ordinary duties in order to feed her son. One can only wonder of the fire chief, the city and the firefighters union would have raised any objection if, while with her son on personal time, Eaton had placed a bottle in the baby's mouth.

One objection the department might raise to Eaton nursing her son while on duty is that she is asking for special privileges. There is a certain misleading truth to that. She is asking to do something her fellow firefighters can't do, the laws of biology being the unyielding dicta they are. But one can only assume that the department has taken note of the fact that there are certain structural dissimilarities between men and women, minor though they may be. This assumption can be based on the fact all fire departments for years cited those slight differences as grounds for excluding women from their employ. And while the advent of equal hiring and affirmative action practices might have moved one to assume such exclusions were a thing of the past, the Eaton case would indicate they not only endure, but thrive.

The thinking behind the position of the fire department and the city has not been made public, but what with the information now available, it is difficult to avoid the conclusion the Eaton has been treated in an arbitrary and discriminatory fashion. Before action is taken against her, city and department officials would be wise to consider the "legal implications" of that.

... AND HERE, WITH HIS ANNOUNCEMENT OF HIS DECISION TO GIVE UP SEX, AND HOW IT WILL AFFECT ALL OF YOU, IS SECRETARY CALIFANO!

## Proxmire's turn to crankiness

WASHINGTON (KFS) — Among the 36 press releases received here in less than a month from one and the same politician was this which began: "Sen. William Proxmire (D-Wisc.) said Saturday, 'One is always honored by the retaliatory awards given by the recipients of the Golden Fleece of the Month. The most recent was the 'Golden Hypocrisy award' given by the mayor of Salt Lake City. This one was especially pleasing, for it indicates that the Fleece to the

Golden Fleece medal for his wasteful press releases, many of them duplicates because his staff hasn't culled his mailing lists in an efficient fashion, and all of them sent out postage free at a charge to the taxpayers. In the four weeks I collected the effluvia from the senator's office, the postage would have run to \$5.40. Presuming that his press list is very long (and it must be to reach the likes of me), Sen. Proxmire is spending hundreds of dollars of other people's money every month to distribute pompous sentiments attributed to him but not spoken by him.

At least we can hope that on Saturday, Dec. 9, this famous Wisconsin legislator didn't wake up and say to his wife, as he was sliding his feet into his slippers, "One is always honored by the retaliatory awards given by the recipients of the Golden Fleece of the Month."

It's hard to believe that a man with an ego less than pathologically large would allow this stream of self-important statements to go out under his name:

Dec. 5 — "Sen. Proxmire (D-Wisc.) called on all federal agencies to 'use the discipline of the market place to collect bed debts by referring to credit bureaus the names of citizens who refuse to repay government loans.'"

Nov. 30 — "Sen. William Proxmire (D-Wisc.) in a statement from his Washington office Thursday said, 'President Carter risks his political credibility in the fight on inflation if he fails to cut the military budget while pruning the civilian budget...'"

Nov. 17 — "Sen. William Proxmire (D-Wisc.) warned Friday that 'Unless the Democratic Party gets in tune with the anti-spending mood of the country, it is almost guaranteed that the yuk-yuk, yuk-yuk...'"

Dec. 6 — "Sen. William Proxmire (D-Wisc.)

Wednesday criticized 'the high rollers at the Environmental Protection Agency for scheduling a four-day symposium on flue gas desulfurization (FGD) technology amid the glitter and swank of a Las Vegas casino...'" And so forth and so on.

In my experience, there is no member of Congress like Sen. Proxmire. I get press releases from many of them, but ordinarily only when their subject matter is at least distantly germane to my work and interests. The result is that their's get read while Proxmire's — this little survey excepted — get chucked into the round file.

Maybe the senator is guilty of nothing more than misapplied zeal, but it is beginning to appear as though what started out years ago as genuine anger and true determination to change waste has now degenerated into a ceaseless and pointless campaign of self-advertisement. An office holder can choose to play many worthwhile roles, one of which is teacher. A senator can elect to instruct the public, to warn, to alert and one of the ways that can be done is to harp on the same subject, to go back to it again and again. But surely we don't need Sen. Proxmire to tell us there is waste in government — we need him to put a stop to it.

Federal employees aside, is there anyone left in the country who doesn't partake of the angry demoralization that comes from the conviction one's money is being stolen and frittered away by a faithless civil service? Sen. Proxmire isn't the first member of Congress to play watchdog of the treasury, but without affective action, that role can degenerate into one of an eccentric crank.

## nicholas von hoffman

Interior Department for granting Salt Lake City \$145,000 to buy a wave-making machine hit home. Further, we congratulate the mayor and welcome his support to hold down spending in Congress, etc., etc." (Note the use of the royal "we.")

Since March 1975, Sen. Proxmire and-or his staff has been giving out his Golden Fleece Awards each month to those responsible for the most idiotically wasteful expenditure of government money in the previous 30-day period. The awards have made the senator famous and have, as the same press release goes on to explain, earned him a number of sarcastic counter-awards of which the Golden Hypocrisy is but one. It is less clear that Mr. Proxmire's efforts have resulted in saner or more frugal government or even whether he really gives a damn about saving the taxpayers' money.

If he does, he might award himself a small

consider China their home. This minority emigrated to Taiwan no less than 30 years ago. They came in 1949 with the defeated Nationalist Chinese leader Chiang Kai-shek, seeking permanent refuge on Taiwan. Others came earlier as part of the Chinese military occupation force who took over Taiwan in 1945 after World War II. Chiang falsely appointed his no-constituency Nationalist Chinese (Kuomintang) regime as "Free China" on Taiwan.

But Taiwan is not a part of China, and certainly is not "free" under the Chiang government. The Chiangs, father and son, have controlled the government since moving into exile. The election of the president is by the members of the Nationalist Assembly who were elected in 1947 from the Chinese mainland (now controlled by the People's Republic of China). In the past 30 years, the "Free China" regime of Chiang Kai-shek, and now Chiang Ching Kuo, president and head of the secret police in Taiwan, has been enforcing martial law. Under this regime, the native Taiwanese are voiceless. The whole political structure and institution of the Nationalist Chinese regime is based upon hoaxes, myths and fantasies. Whoever dares challenge these fantasies is arrested, tortured, jailed or executed. The laws regarding political offenses on Taiwan are sarcastic, elusive and outrageous. As long as this regime continues to pass from generation to generation in the Chiang family in the name of "the Republic of China" or "Free China," there will be no democracy. The basic human rights of the Taiwanese people are at stake.

We, a group of concerned Taiwanese at the UI, are concerned about the future of our homeland. Therefore, we are calling on the Nationalist Chinese regime on Taiwan to carry out the following measures, which are necessary for Taiwan to survive:

1. Change the name of the country to "Republic

of Taiwan (or Formosa)." Declare the island a new, independent country. Immediately carry out an open and fair presidential election and institute a democratic government for the Taiwanese.

2. End the 30-year-old martial law; free all political prisoners and promise no more arrests or torture of political offenders.

3. Honor human rights on Taiwan; guarantee freedom of speech and assembly; abolish censorship of the press and the mails.

Unless the Nationalist Chinese regime fulfills these demands at once, the future of Taiwan will be on the razor's edge of a Chinese Communist takeover.

We thank you for your special attention to this forbidden issue for both nationalist and communist Chinese — independence for Taiwan, as Taiwan, which is necessary for diplomatic recognition, but seems not to be raised. It is time to dispel the pretense of a "Free China" on Taiwan.

Mike Do  
and a group of concerned Taiwanese at UI

## Readers: How many Chinas?

To the Editor:  
We would like to respond to the article written by Terry Irwin (DI, Dec. 19). It was reported that 40 Taiwanese demonstrators were protesting President Carter's recent decision to establish a bond between Washington and Peking. Irwin stated that a flag of Taiwan was

## letters

being carried and the national anthem of Taiwan was being sung.

These protestors were not representing the silent majority of Taiwanese. They were merely a handful of pro-Nationalist Chinese residing in Iowa City. They were not carrying the flag of Taiwan nor were they singing the national anthem of Taiwan, but rather the flag and the Kuomintang anthem of the Nationalist Chinese regime. These pro-Nationalist Chinese, masquerading as Taiwanese, left the native Taiwanese on this campus in a state of shock! Taiwan is currently inhabited by 17 million people. Of this population, less than 14 per cent

## UI Hospital birth-de

By KELLY ROBERTS  
Staff Writer

A computer data system tested at UI Hospitals may help in diagnosing patient defects, James Hanson, chief of the Department of Pediatrics Medical Genetics, said Friday. Hanson explained that the system, which is being implemented in the hospital, will allow for the dissemination of information on more than 1,000 specific birth defects.

The next phase, which will allow for a registry of "unknown" cases, will enable doctors to become fully functional in diagnosing patient defects. Hanson said that the system will allow doctors to obtain information about their patients into the computer, which will then provide a list of the possible birth defects and genetic disorders representing symptoms.

The computer's third function will be to allow for a registry of "unknown" cases. Hanson said that if a doctor has a patient with a defect that is not any of the known disorders, the doctor will be able to match that patient with a similar case in a New York, who has similar symptoms, Hanson said. "This will allow us to find out any similar cases from other countries. The doctor could then refer those doctors who have

## Fossil fi

Dr. Donald Johanson, anthropology at the University of California at Berkeley spoke Thursday.

CLEVELAND (UPI) — From the hot, dusty fields of Ethiopia to the quiet laboratories of the Cleveland Museum of Natural History, two American anthropologists have spent much of the past several years solving a complex scientific puzzle of enormous significance.

Sifting through a mass assortment of fossil fragments brought close to the surface by movements of the Earth's crust (tectonic activity), Drs. Donald C. Johanson and Tim White have found evidence that man substantially modify human evolutionary theory.

Johanson, curator of physical anthropology at the Cleveland Museum, and White of the University of California at Berkeley, announced late last week the discovery of the most ancient and primitive human species yet found — a new class of "ape-man" dated back 3-4 million years.

"It is one of the most provocative breakthroughs in the history of evolutionary study," Johanson proclaimed, saying the discovery expands existing knowledge of human ancestry by as much as 3 million years.

The work began in 1973 in Ethiopia, in an area known as the Afar triangle, near a town called Hadar. It was there that Johanson and later White found something unprecedented in archaeological research — "dig" in an area of ravines and gullies that produced the fragmented remains of at least 60 individuals, some of whom may have been related to each other.

"It (the site) turned out to be exceedingly rich — richer than any of us had ever dreamed of," Johanson said. It took four field expeditions from 1973 to 1977 to complete the initial phase of work at the site.

Other important material was found in a site at Laetoli, Tanzania. White is the anthropologist responsible for the scientific study of the "hominids" recovered by the renowned Dr. Mary Leakey's team at Laetoli.

The fossil fragments event

The Daily Iowan/D.R. Miller

## Who are those guys?

# UI Hospitals test computerized birth-defect information system

By KELLY ROBERTS  
Staff Writer

A computer data system currently being tested at UI Hospitals may soon aid doctors in diagnosing patients with birth defects, James Hanson, chairman of the Department of Pediatrics' Division of Medical Genetics, said Friday.

Hanson explained that the system is being implemented in three steps. Currently the system acts as a data bank for the dissemination of information about more than 1,000 specific birth defects.

The next phase, which will take about a year to become fully functional, will be a diagnostic service. Hanson said the service will enable doctors to feed information about their patients' symptoms into the computer, which will give doctors a list of the possible birth defects and genetic disorders represented by the symptoms.

The computer's third function will be as a registry of "unknown" cases.

"If a doctor has a patient who does not fit any of the known disorders, the computer will be able to match that patient with one in, say New York, who had the same symptoms," Hanson said. "It would print out any similar cases from around the country. The doctor could then contact those doctors who have treated those

cases. "Through this we have the possibility of assembling enough information to facilitate the recognition of previously unrecognizable problems," he said.

A year-long study of the system is being conducted at UI Hospitals under a \$3,000 grant from the Hawkeye Chapter of the National Foundation March of Dimes.

The computer was developed jointly by the March of Dimes, the Tufts New England Medical Center and the Massachusetts Institute of Technology, where the main computer is located.

The UI Hospitals gain access to the system through a telephone hook-up. Hanson said the portable terminal will be used at clinics at the 15 Regional Genetic Counseling Services located throughout the state.

An estimated 1,600 Iowans are born each year with birth defects, Hanson said. About 3 per cent of the defects are detected within the first year of life. By adulthood, an estimated 15 per cent of the population exhibits some kind of birth defect, but Hanson said the defects are significant in only about 3 to 5 per cent of the population.

Hanson said one of the benefits of the data bank is that a time-consuming search into existing literature is no longer necessary. The data bank contains information that would fill a large library.

Doctors requesting information about a birth defect receive data concerning the symptoms, causes and treatment of the defect. They also receive references to literature on the defect and names of doctors who have studied the problem.

Another benefit of the service is that it is constantly updated. Hanson said that because of rapid changes in medical knowledge, this factor is especially important. An average of 45 new facts and findings are added to the system each week.

The UI Hospitals will participate in testing the second phase of the system, diagnosing birth defects, Hanson said. But even when the system has "worked out all the bugs," he said, it will not replace doctors.

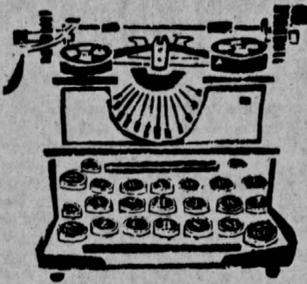

"The computer is acting as a diagnostic assistant, but does not replace human judgement," he said. "Its diagnosis gives the doctor a direction to turn, but the doctor is left to make the decisions. In the end, the doctor has to go by what he thinks is right."

Ultimately, Hanson said he expects to see computer terminals available in hospitals throughout the country. As computers become more common and less costly, he said, the system may even be available in doctors' offices.

# Opportunity

The Daily Iowan has several staff writer positions open. If you are interested, pick up an application this week in Room 201 of the Communications Center and return it to the same place by noon Friday, Jan. 25.

Note: If you applied in December, you need not apply again. Those applications are still being considered.

We are also seeking someone to fill the position of Riverrun Editor. The Riverrun Editor is responsible for editing and designing a features supplement that appears every other Thursday in the DI. The person hired must be able to begin work Feb. 1.

If you are interested, pick up an application this week in Room 201 of the Communications Center and return it to the same place by noon Friday, Jan. 25. Please indicate on the application that you are applying for Riverrun Editor.

# Fossil find extends hominid history

United Press International  
Dr. Donald Johanson, curator of physical anthropology at the Cleveland Museum, and Tim White of the University of California at Berkeley spoke Thursday in Cleveland at a news conference announcing the discovery of a fossil of the most ancient and primitive human species yet found. The fossil find, dated at between three and four million years old, moves hominid history back two million years.

CLEVELAND (UPI) — From the hot, dusty fields of Ethiopia to the quiet laboratories of the Cleveland Museum of Natural History, two American anthropologists have spent much of the past several years solving a complex scientific puzzle of enormous significance.

Sifting through a massive assortment of fossil fragments brought close to the surface by movements of the Earth's crust (tectonic activity), Drs. Donald C. Johanson and Tim White have found evidence that may substantially modify human evolutionary theory.

Johanson, curator of the physical anthropology at the Cleveland Museum, and White, of the University of California at Berkeley, announced late last week the discovery of the most ancient and primitive and human species yet found — a new class of "ape-man" dating back 3-4 million years.

"It is one of the most provocative breakthroughs in the history of evolutionary study," Johanson proclaimed, saying the discovery expands existing knowledge of human ancestry by as much as 2 million years.

The work began in 1973 in Ethiopia, in an area known as the Afar triangle, near a town called Hadar. It was there that Johanson and later White found something unprecedented in archeological research — a "dig" in an area of ravines and gullies that produced the fragmented remains of at least 60 individuals, some of whom may have been related to each other.

"It (the site) turned out to be exceedingly rich — richer than any of us had ever dreamed of," Johanson said. It took four field expeditions from 1973 to 1977 to complete the initial phase of work at the site.

Other important material was found in a site at Laetoli, Tanzania. White is the anthropologist responsible for the scientific study of the "hominids" recovered by the renowned Dr. Mary Leakey's team at Laetoli.

The fossil fragments eventu-

ally were taken from Africa to the United States for more detailed examination.

Two years of extensive analysis and detailed comparison with the Hamann-Todd Osteological (bone) collection of humans and apes at the Cleveland Museum demonstrated the unique nature of the fossils, the anthropologists determined.

"After considerable study, we finally came to the conclusion we had found a new species of humans," Johanson said.

What they found was a creature with a human-like body but a skull resembling that of an ape. "It was fully bipedal and walked erect like modern man," White said. "The ape-man was 3 1/4 feet tall. We're not sure whether it had hair on its body."

They called the new species *Australopithecus Afarensis* — the "Afar ape-man."

The ape-man discovered by Johanson and White was omnivorous, eating both plants and other animals. According to evolutionary theory, the omnivorous ape-man successfully adapted into humankind over a period of several million years, while the ape-man that "specialized" as a plant-eater became extinct.

White noted that the discovery also has major significance because it "destroyed the old notion that bipedalism (walking erect) is linked to the development of larger brains." Johanson and White's ape-man had a small brain, but walked erect.

"We now have a record that goes back 4 million years. Former scenarios of human evolution were based largely on fossils no older than about 2.5 million years," Johanson concluded. "Australopithecus Afarensis gives us a glimpse of a creature that was ancestral to all later forms of humankind."

Particularly significant in the mass of research done by Johanson and White was the discovery of a partial skeleton the scientists came to call "Lucy." It is the oldest, most complete skeleton known to anthropologists.

well on their way to world-wide recognition in their field.

Johanson, 35, has been associate curator at the Cleveland Museum and has taught at Case Western Reserve University since 1972. He studied at the University of Chicago under the distinguished paleoanthropologist F. Clark Howell.

White, 28, has participated in archaeological research in California and has visited major fossil "hominid" site in Africa and the island of Java, Indonesia.

# Northeast wades through storm

By United Press International

An unlikely winter arsenal of heavy rains deluged the middle Atlantic Coast, flooding many roads and bridges and knocking out commuter rail service in the New York City area.

Residents of southern Maine, still digging out from a record 27 inches of snow, were hit with another 6 inches that turned to freezing rain in the early morning.

Freezing rain extended from lower Michigan to New England. Ice storm warnings were issued in the face of dropping temperatures for parts of Pennsylvania, western New York and southern New England.

More than 3 inches of moisture — a sloppy combination of snow, sleet and finally rain — bombarded the New York City area where temperatures soared to 53 degrees. The slushfall heaped havoc upon travelers and was blamed for at least five deaths.

Three men died Sunday in a two car collision on an icy Connecticut road and one Connecticut woman who was stranded in her flooded car drowned as a powerful combination of snow, sleet and rain whipped New England causing heavy flooding.

Ida Remeleir, 52, drowned in Stratford, Conn., when she was trapped in her submerged car. The engine of a New Haven, Conn., to New York Conrail train derailed as it negotiated its way across flooded tracks five miles outside New Haven. No injuries were reported.

Earlier, train service in and out of Grand Central terminal was halted for more than an

Clogged drains in Hartford, Conn. prevented heavy rain and melting snow from running off Sunday, creating flood conditions there as well as in many other areas. A major storm system covered the East Coast over the weekend.

hour by a power blackout caused by the flooding of a feeder cable in the Bronx. Dozens of cars on New York City streets and in suburban Westchester County were stalled in floodwaters and many streets and highways were closed. Subway service on several lines was disrupted because of flooded tracks. The

upper level of the George Washington Bridge was closed briefly because of melting ice falling from the super structure.

Flooding caused problems on the mass transit system and Boston Edison Co. reported numerous blackouts in the Boston area. Suffolk Downs racetrack canceled its ten-race

program. The speed limit on the 100-mile Maine Turnpike was lowered to 45 mph because of the slippery surface and poor visibility.

To the relief of winter-weary residents and city officials, no new snow fell on Chicago, where 4 or more inches of snow had been predicted. Work crews

manning snowplows, bulldozers and dump trucks continued their cleanup efforts and traffic on many city streets moved with a semblance of normality. Rain fell in Washington state and turned to snow in the extreme northern Rockies. Five inches layered Stampede Pass, Wash., giving it a total accumulation of 61 inches.

# Particle-beam research urged

WASHINGTON (UPI) — Scientists are recommending that the Pentagon step up research on particle beams — streams of energy likened to lightning bolts or a Buck Rogers death ray — in a program that could cost \$1 billion over 10 years.

Dr. Ruth Davis, the Pentagon official in charge of research and advanced technology, said in an interview a panel of 53 scientists studying the matter soon will send its final report to Defense Secretary Harold Brown.

Pentagon officials said Brown

already has indicated willingness to spend more money on technology if it is as well justified as the particle beam research appears to be.

There were reports the Soviets already have tested a particle beam, or will shortly, and some people worry that the United States is falling behind on exotic technology.

Both the panel of scientists and U.S. intelligence forces, however, say that neither Russia nor the United States is likely to test the weapons before the 1990s.

Particle beams fired from the

ground or space at close to the speed of light — 186,000 miles a second — have been suggested as a means of stopping enemy nuclear missiles before they reach the United States.

The thinking is that beams could neutralize missiles by heat or by frazzling their electronics — the same thing lightning striking a house can do to an unplugged television set inside.

But there are big problems. So far beams have been created only inside laboratory devices called accelerators. Dr. Davis said controlling them would be

like leashing lightning, which "zigs and zags and doesn't strike twice" because of atmospheric disruptions its passage causes.

"We still have too much basic physics and hard engineering to be done" to judge whether they can be used as weapons, she said.

But she said the 53 private and government scientists assembled by Edward Chapin of the government's Los Alamos nuclear laboratory last fall mapped out proposals for five years of research to "put the

jigsaw puzzle together." The scientists recommended increases in five areas, including ways to control and point beams, and development of super-sophisticated radar to track and switch them from one target to another with great speed.

Dr. Davis said if engineering problems could be overcome "you could hit hundreds of targets in a single second."

The panel suggested spending increases ranging from tens to hundreds of millions of dollars, depending on how far the Pentagon wants to shoot a beam. That could range from half a mile to 600 miles.

Davis herself estimated the research could cost \$1 billion over 10 years, based on the cost of the Pentagon's high energy laser program, which still has not been demonstrated as a possible weapon.

# 'U.S. forces in Africa desirable'

WASHINGTON (UPI) — Retired Army Gen. Bruce Palmer Jr. has proposed that the United States establish a military presence in Africa, not only to counter Moscow but to improve American standing in strategically important nations.

Palmer, in a study published by the American Enterprise Institute, said Washington has no influence in many parts of the continent and the Soviet Union has moved into the void.

"Political, economic and military leverage should be sought in those states or areas in sub-Saharan Africa whose location is strategically important to the United States and the West," Palmer said.

"Where appropriate, it should include a military presence, however small ..."

Palmer was U.S. Army vice chief of staff and commanding officer of U.S. forces both in Vietnam and during the 1965 in-

tervention in the Dominican Republic.

He said it is not clear whether Moscow, in aiding and encouraging Cuban military interventions in Africa, is seeking to dominate the continent "or whether the Soviets are simply playing it by ear pursuing an aggressive opportunistic policy."

"In practical terms, it makes little difference which conclusion is correct because U.S. inaction or procrastination can give the Soviet Union a free ride in Africa — and if the Soviets do not have a grand design, they will invent one," he said.

Palmer said Washington has a general policy gap in Africa as well as a lack of military planning, and suggested a full American presence — diplomatic, political, economic, financial, commercial, social and military — be set up in African nations where the United States

has a significant interest.

He said military planning for Africa should be assigned to the U.S. Readiness Command — the joint Army-Air Force unit headquartered at MacDill Air Force Base, Fla., which led American operations in support of troops sent to Zaire last summer.

"To deny American policy objectives the significant and constructive contributions an appropriate U.S. military presence can provide, simply because it is military and, per se, 'undesirable,' is extremely shortsighted, if not irrational," he said.

Palmer argued that the American military would expose Africans to American values on civil-military relations and especially "the subordination of the military to civil control."

You Know What Technics Has Done For Direct-Drive. Now See What They've Done For Belt-Drive!

SL-220 Semi-Automatic F.G. Belt-Drive \$135.00

SL-230 Automatic F.G. Belt-Drive \$160.00

SL-220 and 230 Technics direct-drive turntables are respected throughout the world for their accuracy, reliability and great performance. But did you know that Technics also makes outstanding belt-drive turntables? Take for example the SL-220 and SL-230. They both perform remarkably close to their direct-drive models, yet are priced considerably less! The SL-220 gives you semi-automatic operation while the SL-230 is fully-automatic. Both include the same excellent specifications: wow and flutter: 0.045% WRMS, rumble: -70 dB DIN B. So why not stop by today and hear the difference that a Technics turntable can make?

The SL-220 and 230 each feature:

- Full-cycle integration-type (FG) frequency generator servo-controlled DC motor.
- Electronic speed switching for high reliability.
- All front-panel control, even with dust cover closed.
- Sensitive gimbal-suspension tonearm has a mere 7mg total bearing friction, measured vertically or laterally.
- Independent pitch controls for 33-1/3 and 45 rpm.
- Precision, illuminated stroboscope.
- Viscous-damped cueing for both directions.
- Anti-skating force control.
- Universal, detachable headshell.
- Hinged, removable dust cover.

## Telegram forged by Vietnamese

BANGKOK, Thailand (UPI) — A telegram supposedly by Cambodia's new president the United Nations clumsy forgery prepared by Vietnam's U.N. mission in New York, diplomatic sources Sunday.

Growing knowledge of fake telegram could hold acceptance of the Viet installed regime in Phnom Penh by nations outside the S Vietnam bloc, the sources said.

Among some western circles in fact, the telegram has brought the entire question of the legitimacy and loyalty of the new Phnom Penh regime into debate.

Bangkok-based diplomats said the telegram has proved by a number of intelligence agencies to have been faked, signed falsely with the name of Heng Samrin — pro-Vietnam Cambodian leader — and submitted to Security Council president Donald Mills.

In fact, the sources said specific typewriter on which telegram was written has traced to Hanoi's U.S. mission.

Officials of the U.S. over-telegraphic company RCA confirmed to a number of diplomatic missions at United Nations that the gram never passed through communications channels correct computer and codes were used, and numbers on the telegram did correspond to RCA style Bangkok sources said.

Dated Jan. 8 and purportedly originating in Phnom Penh, message protested the appearance by Prince Norodom Sihanouk, the former Cambodian head of state. It said Heng Samrin's pro-Vietnam government had the right to speak for Cambodia.

The Security Council reportedly ignored the telegram in any case, instead recognizing Sihanouk's sponsor, the Pol Pot regime, as the legal Cambodian government.

Since the Vietnamese overran Phnom Penh in a Soviet-Vietnam bloc nation.

# Cambodia protest to U.N. 'fake'

## Telegram forged by Vietnamese

BANGKOK, Thailand (UPI) — A telegram supposedly sent by Cambodia's new president to the United Nations was a clumsy forgery prepared at Vietnam's U.N. mission in New York, diplomatic sources said Sunday.

Growing knowledge of the fake telegram could hold back acceptance of the Vietnam-installed regime in Phnom Penh by nations outside the Soviet-Vietnam bloc, the sources said.

Among some western circles, in fact, the telegram incident has brought the entire question of the legitimacy and loyalty of the new Phnom Penh regime into debate.

Bangkok-based diplomats said the telegram has been proved by a number of intelligence agencies to have been faked, signed falsely with the name of Heng Samrin — the pro-Vietnam Cambodian leader — and submitted to U.N. Security Council president Donald Mills.

In fact, the sources said, the specific typewriter on which the telegram was written has been traced to Hanoi's U.N. mission.

Officials of the U.S. overseas telegraphic company RCA have confirmed to a number of diplomatic missions at the United Nations that the telegram never passed through its communications channels. Incorrect computer and company codes were used, and numbers on the telegram did not correspond to RCA style, the Bangkok sources said.

Dated Jan. 8 and purportedly originating in Phnom Penh, the message protested the U.N. appearance by Prince Norodom Sihanouk, the former Cambodian head of state. It said only Heng Samrin's pro-Vietnam government had the right to speak for Cambodia.

The Security Council effectively ignored the telegram, in any case, instead recognizing Sihanouk's sponsor, the Pol Pot regime, as the legal Cambodian government.

Since the Vietnamese army overran Phnom Penh Jan. 7, Soviet-Vietnam bloc nations

At Galaw Village, Cambodia, a young Khmer soldier smiles for the camera amidst a group of children, who are among some 2,000 non-combatants seeking asylum in nearby Thailand.

have quickly recognized the Hanoi-installed administration as the Cambodian government.

But there have so far been few or no moves by any other nations to recognize the new regime, which Hanoi has called "the only legitimate voice of the Cambodian people."

Little is known about the 18 publicly named Cambodian leaders so far, but available

information indicates all of them are heavily oriented toward Vietnam.

Heng Samrin, a 44-year-old former division commander — according to his official biography — defected to the Vietnamese Communist Party last year after the Pol Pot regime marked him for death in a purge of pro-Hanoi elements.

The vice-president, Pon

Sawan, is a Vietnam-trained military officer and communist who left the Khmer Rouge in 1973 when the Pol Pot forces began purging.

All 18 known Cambodians installed by the Vietnam invasion, according to official statements from Hanoi, are former Khmer Rouge who owe their lives to the Vietnamese Communists.

## A trip to Khmer Rouge

GALAW, Cambodia (UPI) — Freshly sharpened punji sticks — simple but deadly bamboo booby traps — mark the trail to a Cambodian holdout post of the supposedly defeated Pol Pot army.

The fierce-eyed commander, Noi Mon, said he had no intention of giving up to the Vietnamese invasion that has driven him back to the jungles for renewed guerrilla warfare. The 400 men, women and children who follow Noi Mon are a motley troop. But all are well-armed. Noi Mon is preparing to stand his ground.

The trip into Cambodia is no tourist expedition. Our guide told us to be careful to walk exactly in his footsteps so we wouldn't step on land mines.

And it took some tough bargaining — plus payment in advance — just to find a guide willing to take us to the Khmer Rouge.

Just across the Thailand-Cambodia border near the holdout village of Galaw we saw signs that Noi Mon and his battalion-sized force intend to retreat no further.

Pits have been hurriedly dug and filled with sharpened bamboo stakes — punji sticks that can pierce the toughest steel-plated combat boot, let alone the rubber-tired sandals most Southeast Asian soldiers still wear.

Outposts are manned even during the day. Our first contact with Khmer Rouge was at the business end of rifles carried by five pajama-clad, unsmiling women soldiers. They handled the weapons expertly.

The Thai soldiers we had to skirt to cross the frontier warned us not to go. "The Khmer Rouge are like wounded dogs," said one. "It's dangerous to go near them."

Noi Mon, his soldiers and 2,000 civilians whom his force is guarding have a desperate air about them, but they say they are just trying to retain a foothold in their homeland. They retreated earlier from a point near Sisophon, a district capital 30 miles inside Cambodia, because the attacking Vietnamese "had tanks and warplanes. If they just had soldiers, we could have fought them."

In addition to the camp's primitive outer defenses, Noi Mon has stockpiled more than 20 oxcarts full of rice, large piles of cloth and trucks and tractors.

I saw no ammunition, however, for the collection of Chinese and American-made rifles and grenade launchers that his troops carry.

Noi Mon said he is preparing for battle because "I just receive orders."

But he has not received many orders since Jan. 7, the day the Vietnamese invasion captured Phnom Penh.

"I have no idea where (Khmer Rouge leaders) Pol Pot and Ieng Sary are," he said. "But I'm not a big leader. I'm just on the fringes."

## BIJOU\*\*Monday & Tuesday\*\*BIJOU A FAREWELL TO ARMS (1932)

Hemingway's World War I tale receives a romantic treatment from Frank Borzage in this film adaptation. The war becomes secondary as the blooming love affair between an ambulance driver (Gary Cooper) and his attending nurse (Helen Hayes) develops. One of the early sound pictures.

## Iranian chaos, hardship continue

TEHRAN, Iran (UPI) — Power failures. Strikes. Shortages. Freezing temperatures. The shah has left his troubled nation, but life is still tough for Iran's 34 million people.

Some shops in downtown Tehran opened for the first time in weeks Saturday, but it still promises to be a long winter of mounting discontent.

Massive anti-government protest marches have attracted millions of demonstrators across Iran, and they vowed to continue nationwide strikes until a new Islamic republic under the spiritual guidance of Ayatollah Ruhollah Khomeini, Iran's exiled religious leader, is established.

An Islamic government seemed ultimately likely but only after further weeks of political and economic chaos and possible confrontation with a bewildered army seeking a role in the new order of things.

Meanwhile, in Tehran, the most familiar site remains the queues — double-parked, mile-long lines of vehicles stretch from each open gasoline station.

Many drivers have set up home in their autos. It can take

two days to reach a pump. Black-market gasoline prices have soared 1,000 percent to \$5.85 a gallon. Taxi prices went along, jumping to a minimum of \$10.15.

Side-by-side with the cars stand householders seeking precious heating oil and kerosene for cooking. They link their cans with rope to block anyone from sneaking into the lines.

Temperatures hover around zero degrees Celsius during daylight and plunge below the freezing point at night.

About 50 people have died in clashes between pro-shah and anti-government forces since the monarch left Tuesday. In retaliation for the deaths, oil workers threatened to cut off even domestic supplies of petroleum products.

In a severe winter such as this one, Iran needs at least 1 million barrels of oil a day for domestic consumption. Refineries have been producing half that amount, and in recent days the figure skidded again, to around 430,000 barrels.

A total oil shutdown would be catastrophic. With snow blanketing much of the country and harsh temperatures gripping all

the land, such a move could trigger hundreds and thousands of deaths from weather-related causes.

Even so, power strikes hit Tehran each evening, plunging the city into darkness. Only the rich and a few hotels have independent generators.

The international airport is officially closed and the nation's carrier, Iran Air, is also grounded. Its fleet of Boeing 747s, 707s and 727s lie unat-

tended on the approach runways.

Surprisingly, perhaps, food shops and bakeries have continued to function even during the darkest days. Prices remained stable. There were only the occasional shortages of lamb and mutton reported by housewives.

Because of the harsh temperatures that turned homes into iceboxes, many of Iran's older people and infirm stay in bed.

## 'Stays away' from Watergate

# Ron Ziegler still won't talk

WASHINGTON (UPI) — More than six years after the Watergate break-in, more than four years after Richard Nixon resigned the presidency, Ron Ziegler still doesn't want to talk about it.

Ziegler, the White House press secretary who called Watergate "a third-rate burglary" and was accused by the press of "stonewalling" inquiries into the scandal, refused in an interview to discuss the events that led to Nixon's undoing.

"I don't want to get into those historic events," he said. "They're far more complex than taking an isolated set of circumstances out of the whole Watergate period and its aftermath and commenting on one act that should or shouldn't have been taken."

"I've really tried to stay away from that period since I left the White House."

Ziegler, 39, spent a year in California as Nixon's press aide after the former president's Aug. 9, 1974 resignation.

He is now senior vice president of an engineering consulting firm with offices in a few blocks from the White House.

Ron Ziegler gestures in a recent interview, more than six years after the Watergate break-in and more than four years after Richard Nixon resigned the presidency. Ziegler refused to discuss Watergate, but said he may write a book about it someday.

Ziegler said he doesn't miss the White House — especially the White House of the Watergate cover-up period — but has considered joining the long list of former Nixon aides who have written books about their Watergate experiences.

But he has some misgivings about that, he said, especially in light of what some of his former colleagues have written.

"I've hesitated writing a book and getting on the book shelves with a lot of the other

(Watergate) stuff that's out — self confessions, true confessions, my life in power and how it led me astray — that type of book," he said.

Without naming any of the former associates he had in mind, Ziegler said, "It was very

disappointing to learn how a number of people dealt with the situation that led to Watergate and how they dealt with it after it happened.

"That was a big disappointment in many cases for me in terms of my feelings about individuals within the White House — what type of people they were."

He said he has not kept touch with many of those associates since leaving the White House but does see Nixon occasionally. They got together in New York after Nixon's trip to France and England in December.

The former president, he said, appeared to be in "good shape" and talked about his forthcoming book on foreign policy.

"I think he's going to continue to speak out on foreign policy," he said. "But from a standpoint of returning to political life, as such, I don't think he has that interest."

"He's highly respected in Europe and other parts of the world I've traveled (as a consultant)," Ziegler added. "It's amazing the respect he holds in a lot of parts of the world, and to some degree here, I guess."

## Brown calls for North American Common Market

SACRAMENTO, Calif. (UPI) — Gov. Edmund G. Brown Jr., sounding more and more like a presidential candidate, has unleashed a blistering attack on the "leadership of ruin" behind two decades of American foreign policy.

The 40-year-old Democrat delivered the speech Saturday only 13 days after calling for a constitutional amendment requiring a balanced federal budget.

Brown told 1,000 delegates at the state Democratic convention that America has been forced to "curry the favor" of the international oil cartel because of the increasing U.S. dependence on the Middle East for energy.

"If that's the kind of leadership you want, it's not the kind of leadership I want," he said. "That's the leadership of defeat, it's the leadership of ruin, it's not the leadership of

the Democratic Party." The governor, stung by criticism of his budget proposal, spoke over the weekend in a clear bid for the support of party activists — the backbone of a political election campaign.

"I say it's time to wake up, wake up California, wake up America," he said.

Brown, who was re-elected by a record margin in November, also called for setting up a Common Market in North America while stemming the tide of imported foreign goods that he said helped put Americans out of work.

He decried the fall of the dollar in foreign money markets. "This was once the currency that people were proud to have in their pocket," he declared.

Brown's reception included a few boos when he was introduced. But as he spoke, he was interrupted several times by applause. Overall, the delegates were polite.

There was little doubt among delegates that Brown will make another run for the White House as he did in 1976, when he defeated Jimmy Carter in several primaries, but fell far short of winning the nomination.

Brown directly attacked the Democratic Party for a "philosophy that kills 100,000 people in Vietnam while failing to take its case to the American people."

"Who are the timid souls in this party?" he asked. "Are they the ones who serve up the rhetoric of the '60s and ignore the realities of the '80s?'"

He defended his call for a constitutional amendment mandating a balanced budget and attacked as inflationary the printing of new money to meet federal deficits.

"I know that the best and the brightest, the experts who have their little computers, tell us that all we have to do is print more money and if that doesn't work, print more money," he scoffed.

Earlier in the day, Assembly Speaker Leo McCarthy bitterly attacked Brown's budget-cutting proposal and suggested the governor's fiscal conservatism was outside the boundaries of Democratic Party tradition.

# Steelers dethrone Dallas

MIAMI (UPI) — Terry Bradshaw climaxed the greatest season of his nine-year career with a record-shattering performance Sunday, passing for 318 yards and four touchdowns to lead the Pittsburgh Steelers to a 35-31 victory over the Dallas Cowboys and an unprecedented third Super Bowl triumph.

Bradshaw, a target of scorn and criticism in his early years at Pittsburgh, made Super Bowl XIII his personal showcase, rewriting the championship game record book.

The blond bomber from Louisiana threw touchdown passes of 28 and 75 yards to John Stallworth and 7 yards to Rocky Bleier as he broke the game passing record in the first half and then put the contest out of reach when he threw a 19-yard TD pass to Lynn Swann with 6:51 left for a 35-17 lead.

It was the first four-touchdown game of Bradshaw's career and the 318 yards were a career high as he walked off with MVP honors in the first Super Bowl rematch. Bradshaw completed 17-of-30 passes in compiling his first 300-yard plus game.

After a record scoring performance in the first half, the game turned into a defensive struggle. Dallas narrowed Pittsburgh's lead to 21-17 on Rafael Septien's 27-yard field goal in the third period. But Pittsburgh, with Bradshaw at the controls, put it away with a 14-point burst midway through the final period.

Septien's kick came after Jackie Smith, a 16-year veteran tight end playing in his first Super Bowl, dropped a sure touchdown pass which hit him in the chest in the end zone.

Taking over on his own 15 following a punt, Bradshaw took

the Steelers down field, helped by a pass interference call. He hit Randy Grossman for 9 yards on a third-and-eight from the 17, hit Swann for 13 yards and then had another 33-yard gain when cornerback Benny Barnes was called for tripping Swann.

Franco Harris, Pittsburgh's bread-and-butter back who was held in check most of the game, finally broke loose as he churned 22 yards up the middle behind a devastating block by tackle Ray Pinney for the touchdown and a 28-17 lead.

Defensive tackle Randy White fumbled the kickoff and Dennis Winston recovered for Pittsburgh on the Cowboy 19. Bradshaw then fired his fourth touchdown pass on the first play from scrimmage for the second touchdown in 11 seconds and a 35-17 lead.

Dallas made a valiant effort after the TD pass to Swann, but it was too late. Dallas quarterback Roger Staubach took the Cowboys downfield quickly against the loose-playing Steeler defense and hit Billy Joe DuPree on a 7-yard touchdown pass with 2:27 left. After recovering an onside kick, Staubach took Dallas to the 4 and hit Butch Johnson with a touchdown pass with 22 seconds remaining to cut the lead to 35-31. It was the record eighth touchdown of the game.

Dallas made one last-gasp attempt with another onside kick but Bleier fell on it at the Dallas 45 to end the Cowboys' hopes.

It was the third Super Bowl victory in three attempts for the Steelers, who also won the ninth and 10th games. Dallas, playing in its record fifth Super Bowl, is now 2-3 in championship play.

The victory was the 17th against two losses, the best

record in the NFL, for the Steelers, who won the AFC Central Division title and advanced to the Super Bowl by beating Denver and Houston in the playoffs. It was also the eighth consecutive victory for the Steelers.

Dallas, which won the NFC East title and made it to the Super Bowl by defeating Atlanta and Los Angeles in the playoffs, finished at 14-5.

Pittsburgh finished the most explosive first half in Super Bowl history with a 21-14 lead, thanks to Bradshaw's record-breaking show. His pass to Bleier with 26 seconds left in the first half broke a 14-14 tie.

Dallas marched to the Steelers' 34 on its first possession

but wide receiver Drew Pearson fumbled on an end around and John Banaszak recovered for Pittsburgh on its 47.

Bradshaw needed seven plays to cover the 53 yards, hitting Stallworth for 12 yards and Randy Grossman for 10 on third-down plays and finally finding Stallworth in the end zone for the score. Stallworth outmaneuvered cornerback Aaron Kyle and caught the ball on the left side of the end zone in front of safety Cliff Harris.

The victory is worth \$18,000 to each of the winning Steelers while each Cowboy player received \$9,000. A crowd of 78,656 attended the game, pushing the total Super Bowl attendance mark over 1 million.

## HELP WANTED

### PHYSICAL THERAPIST II

The University of Wisconsin, Center for Health Sciences, Madison, Wisconsin is looking for a full time and part time experienced Physical Therapist. Assignment to peripheral vascular lab and clinic. Duties include: evaluation, treatment, program development as well as research and educational activities in vascular lab. Requirements: minimum of 1 year experience and Wisconsin licensure. # The Daily Iowan Sports

Monday, January 22, 1979 Iowa City, Iowa

Iowa's Randy Lewis won a rematch of last season's Big Ten Championships with Wisconsin's Jim Hanson at 126, 18-5, in Iowa's 28-14 triumph over the Badgers Friday evening. The

Hawkeye sophomore achieved success again Saturday night when he pinned Minnesota's Gary LeFebvre in 6:08. The fall was Lewis' 12th of the year and the win boosted his record to 19-0.

## Wrestlers ring up two victories to keep season record perfect

By DOUG BEAN  
Staff Writer

The Iowa wrestling team made winning look so easy this weekend.

Victories over Wisconsin Friday night and Minnesota Saturday boosted the Hawkeyes' dual record to 11-0 and strengthened their hold on the top rating in collegiate wrestling.

Iowa Coach Dan Gable figured that Wisconsin was the best dual meet the Hawkeye wrestlers would face all season, but Iowa had little trouble in stopping the Badgers, 28-14.

The Hawkeyes spotted Wisconsin with a six-point lead before the match even began by forfeiting the 118-pound bout. Dan Glenn was sick the entire week and didn't practice at all, giving the Badgers' Tom Husted the victory.

Randy Lewis quickly closed the gap for the Hawkeyes with an 18-5 rout over Wisconsin's Jim Hanson at 126. Lewis beat Hanson by a 4-1 count at the Midlands tournament earlier in the season and had pinned the Wisconsin senior in the 1978 Big Ten Championships.

After Lenny Zalesky lost a hard-fought 11-8 decision to Wisconsin's Dave Goodspeed at 134, Scott Trizzino put Iowa ahead for good with a 22-10 victory over Rick Morris in a high scoring contest. Morris was filling in for the injured Andy Rein, the country's top-rated 142-pounder.

The Hawkeyes rolled on to an easy win after the 142-pound match and eventually doubled the score on the third-ranked Badgers.

Despite the big victory, Gable still wasn't totally pleased with his team's performance.

"I was looking for a real good showing, but didn't get it," Gable said. "I wanted to get two good weekends in a row to establish some consistency but we didn't look real sharp tonight."

Wisconsin Coach Duane Kleven was visibly displeased with the officiating and

was critical of the numerous stalling calls assessed his team throughout the match. But Gable said Wisconsin displayed a number of stalling tactics themselves.

Bruce Kinseth (150) followed Trizzino with a 22-13 superior decision over Wisconsin's Mike Terry. Kinseth looked like a takedown machine in the bout as he threw Terry to the mat nine times to help run up the 22 points.

Iowa continued its winning ways with decisions by Mark Stevenson and Mike DeAnna at 158 and 167. Stevenson beat Wisconsin's Steve Kruchoski, 8-2, and DeAnna won a 6-3 victory over Dave Evans in a rematch of last season's Big Ten final.

The Badgers added their final points when Jim Kleinhans handed Iowa's Dave Fitzgerald an 8-6 defeat and 190-pounder Mitch Hull wrestled the Hawkeyes' Bud Palmer to a 3-3 draw to end all hopes of a Wisconsin victory.

Heavyweight John Bowsby gave the Hawkeyes their final six points when Wisconsin's Scott Jerabek was disqualified for stalling with 10 seconds left in the match.

The Hawkeye wrestlers came back Saturday night to win a convincing 31-11 match from No. 9 Minnesota, but some of the sweetness was taken out of the victory when Bowsby was upset by Minnesota's Jim Becker.

Becker scored a takedown with 22 seconds remaining in the match and added one point of riding time to pull out a 10-7 win. The loss was Bowsby's second against 19 victories this season.

"We could have ended the match on a better note," Gable said after the senior Heavyweight was beaten. "The big thing that upset the night was John, because he shouldn't wrestle a dumb match like that."

Although Gable was critical of Bowsby's performance, he had praise for Becker's performance. "The kid wrestled hard and had some pretty good moves," Gable said of the Minnesota Heavyweight who is ranked fifth in the nation and

carries a 22-3 record.

But the Hawkeye coach was happy with the team's overall showing as Iowa lost only two matches and wrestled to a tie in another.

The match was all downhill for the Hawkeyes after the opening two battles of the evening. Glenn recovered from a bout with the flu to pick up a 7-1 decision over Vic Martinez at 118. Lewis (126) pushed Iowa to a 9-0 lead in the match when he pinned Minnesota's Gary LeFebvre in 6:08. The fall was Lewis' 12th of the year and the win raised his season record to 19-0.

Before the evening was over, Iowa got two more pins from Trizzino (142) and Kinseth (150). Trizzino stopped Minnesota's Ryan Kaufman in a quick 1:47 and Kinseth pinned previously-unbeaten Robert Schandle at the 5:36 mark. The Hawkeyes' 142-pounder upped his season mark to 18-1 and Kinseth remained unbeaten at 19-0, 13 of those wins coming by falls.

Minnesota's other two victories came at 134 and 158 where the Gophers' Jim Martinez came from behind to beat Zalesky at 134, 8-6. Dan Zilverberg, who is ranked second in the nation at 158, captured the Gophers' other victory and pushed his season mark to 31-2 by beating Jed Brown, 8-3.

DeAnna (167) dominated Minnesota's Ron Brown in a 26-10 decision and Fitzgerald turned in one of his best outings of the year in an 8-8 tie with Tom Press. Press brought a 25-5 record into the dual.

Palmer got back on the winning track after losing two of his last three matches with a 10-9 win over Minnesota's George Bowman. Palmer recovered from a first period deficit to pick up the victory and raise his record to 13-6-1.

The loss dropped Minnesota's dual record to 9-3 and Wisconsin, which had lost only to Iowa State, fell to 4-2.

## Spartans stop Hawkeye rally in overtime, 83-72

By STEVE NEMETH  
Sports Editor

Iowa came very close to accomplishing a feat many Big Ten basketball experts believed could not be achieved — beating Michigan State on the Spartans' homecourt.

Although it took an overtime to do it, Michigan State finally pulled out an 83-72

victory over a Hawkeye team which made a surprising and courageous second half rally. The Spartans were running away with the contest as the first half ended with Iowa trailing 36-21. But a rejuvenated Hawkeye defense brought Iowa back into the lead with over six minutes remaining in the contest.

Earvin "Magic" Johnson hit four straight free throws to re-tie the game at

59-all with 5:30 still to play. After some patient passing, Iowa's Tom Norman slipped in for a jump shot that put the Hawks up 61-59 and then the 6-foot-2 senior grabbed a key rebound as Iowa called a timeout with 4:07 remaining.

The Hawks came out in a four-corner offense but Ronnie Lester was whistled for an offensive foul and the Spartans' Greg Kelsler hit two free throws to tie the game

at 61. Iowa regained the lead as Lester hit both ends of a one and bonus, but the Spartans came back on a 22-footer from reserve Mike Brkovich.

Iowa took timeout once again with 1:52 still to play and returned with the four-corner offense that ran the clock down to 25 seconds before reserve Greg Lloyd fouled Lester. The Iowa junior, once again under pressure, hit both ends of a one and bonus to put the Hawkeyes up by two points.

After a timeout, Michigan State was apparently unable to work its strategy and a desperation shot by Brkovich missed, but Lester was charged with a foul on the play. More costly than the timing was the fact that it was the fifth personal on the Hawks' leading scorer, who finished the game with 21 points.

Brkovich stepped up to the free-throw line with three seconds remaining and two free throw opportunities. The sophomore guard, who had made all 12 of his previous free throw attempts this season, sank both charity tosses to send the game into overtime when the Hawks couldn't get a shot off in the last few seconds.

The Spartans grabbed the overtime tip-off and scored first behind Johnson, but Norman hit a jumper to tie the score at 67-

all. Brkovich returned to the free-throw line and once again hit two charity tosses to spark the Spartans who went on to outscore Iowa, 14-5, in the remainder of the overtime.

The win moved Michigan State into a tie for second with Iowa and Illinois, which also suffered its second conference defeat. Despite the final outcome of the game, which included five technical fouls, Iowa Coach Lute Olson wasn't very disappointed.

"I couldn't be any more pleased with our team. Obviously we'd like to have won, but it was an unbelievably courageous effort on the part of everybody that played," Olson said. "They really battled after being down by 15 against a great basketball team. We played Michigan State right off the court in the second half."

"They (the Spartans) came up with the key free throws to tie the ballgame up and then, with Lester fouling out, that made it particularly tough for us to win in overtime," Olson added.

It had looked as if it would be impossible for the Hawks to win after the first half, when Michigan State took off on a scoring spree that put them up by 15 as the half ended with Iowa ice-cold.

Iowa took the lead at the start of the game on a stuff by William Mayfield, but the Spartans tied the score at 2, 4 and 6 before two free throws by Kelsler gave the Spartans their first lead at 8-6. A baseline shot by Boyle evened the score after the first three minutes.

That sparked a Hawkeye rally that put Iowa in front 13-8, however, that margin was not as comfortable as it appeared. Kelsler drove in for two and Iowa's Kevin Boyle was called for a foul which brought Olson off the bench. That brought an immediate technical from the officials and put Kelsler at the free-throw line for three attempts. That five-point play tied the game and Michigan State, given the ball following the two-shot technical, came back with a Johnson free throw to take a 14-13 lead with 12:30 left.

After the lead changed hands twice (once after a technical on Kelsler for hanging on the rim) the Spartans took a three-point, 22-19 lead on a 20-footer by Brkovich. The Hawks went cold and the Spartans were just getting started as Michigan State outscored its guests 14-2 in the final seven minutes of the first half. At that point, an Iowa comeback seemed

Turn to page 3, please.

## Ohio State keeps Big Ten lead

CHICAGO (UPI) — The University of Illinois is finding out rather quickly that Big Ten basketball titles are often won from the free-throw line as well as on the road.

The second-ranked Illini were upset 69-57 at home against Purdue Saturday and, for the second straight week, Illinois lost the game at the free-throw line. The defeat, coupled with Iowa's loss, gave Ohio State a two-game lead in the Big Ten.

The Boilermakers outscored Illinois 29-7 from the foul line to hand Illinois only its second loss in 18 games. One week ago, Illinois dropped from the ranks of the unbeaten when Ohio State had a one-sided advantage from the charity stripe.

Coach Lou Henson attributed part of the problem to the way the Illinois defense, the major factor in the Illini's resurgence this season, played against Purdue.

"If we don't get some better defense, we are going to be in trouble," warned Henson, whose team is now 4-2.

Purdue, now 3-3 in the league and 12-5 overall, can boast about having defeated a No. 1 and No. 2-ranked team in the same week, after disposing of then-No. 1 Michigan State last Saturday. Coach Lee Rose attributes much of the success to 7-foot center Joe Barry Carroll, who scored 24 against Illinois.

"Joe Barry has played awfully well for

us," Rose said. "We think he's a fine player. He's played consistently for us all year."

Ohio State remained unbeaten in the conference and in the process may have

### BIG TEN STANDINGS

1. Ohio State	6	0	11	4
2. Iowa	4	2	11	4
Illinois	4	2	16	2
Mich. State	4	2	11	3
5. Purdue	3	3	13	5
Minnesota	3	3	8	7
7. Wisconsin	2	4	8	7
Michigan	2	4	8	6
Indiana	2	4	10	8
10. Northwestern	0	6	4	11

### Saturday's games

Ohio State 78, Michigan 69
Mich. State 83, Iowa 72 (ot)
Purdue 69, Illinois 57
Minnesota 82, Wisconsin 72
Indiana 74, Northwestern 45

dashed what little hope Michigan had of winning the league title when the Buckeyes prevailed 78-69 at Ann Arbor. The 11th-ranked Buckeyes' victory was their sixth in a row in the league and their third on the road.

Again it was the combination of Herb Williams and Kelvin Ransey, who combined for 44 points, that drew the praise of Coach Eldon Miller. He also cited the overall play of his team.

"We had pretty good control of the game for a 40-minute period," Miller said. "That helped us at the other end too. I enjoyed it."

Michigan, considered a preseason favorite for league honors, dropped to 2-4 in the league. Mike McGee, the Big Ten's leading scorer, scored 21 points for the Wolverines.

Kevin McHale scored a career-high 31 points to lead Minnesota to a 82-72 win over visiting Wisconsin. The Gophers, 3-3 in the league, used the scoring of McHale to break open the game in the final eight minutes after the Badgers, 2-4 in the conference, had closed to 59-58.

"Kevin's the one guy we can't play without," said Minnesota coach Jim Dutcher.

Northwestern remained winless in the league at 0-6 after being thrashed by Indiana 74-45 at Bloomington, in a game Wildcat coach Rich Falk labeled a "nightmare."

"We played horribly," Falk admitted, "but give credit to Indiana."

Mike Woodson scored 28 points for Indiana, 2-4 in the league and 10-8 overall.

## Gymnasts 'successful' in loss

By EILEEN DAVIS  
Staff Writer

The Iowa gymnasts finished last in Saturday's home opener, but the meet was a success in Assistant Coach Neil Schmitt's words.

"I was pleased with the outcome of the meet because we finished with a higher point total in our first dual than we did at the Big Ten Championships last year. I was really happy with our showing," Schmitt said.

Minnesota tallied 211.45 points to take overall honors in the conference meet, followed by Ohio State with 208.95 and Iowa with 198.0. The Hawkeyes' only individual winner was senior Jim Magee on the side horse. Magee scored a 9.25 to outdistance runner-up Mike Schanberger of Ohio State. Other placemen were Chuck Graham, who scored 8.95 to capture second place on

the parallel bars, and Mohamad Tavakoli, who finished fourth in all-around competition. Mark Lee of Ohio State took top all-around honors, followed by Minnesota's Dan Price and Rick Goldetsky.

"We kept up a pretty good pace throughout the meet but there's definitely room for improvement. Our individuals looked good but were shaky in some of the events, so that's what we'll be working on for the upcoming meets," Schmitt said.

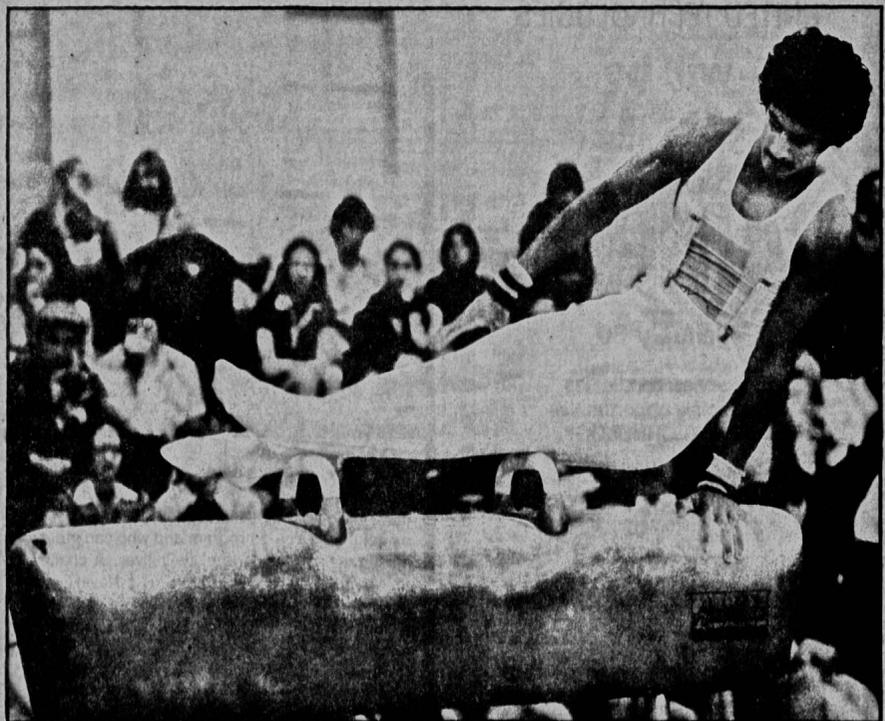

Schmitt said both he and Head Coach Dick Holzmaepfel expect the team to break the 200 point barrier in next weekend's home dual against Illinois and will work toward the 210 mark by the end of the season.

"We're going to work everyone hard to prepare for these upcoming duals. We are fortunate to have avoided any injuries so far and I hope we won't have anyone out the rest of the season."

Schmitt said the team's goals are focused on the Big Ten championship and the NCAA regional meet. The regional meet is the only meet in which gymnasts can qualify for national competition, a goal which Schmitt said he believes possible for the team as well as individual performers.

"We'll work at setting goals and try to improve individual scores, but I think the team has a good chance of challenging some of the stronger Big Ten and regional powers. We're in the process of developing the younger gymnasts, All Tavakoli, Chuck Graham and Mark Johnson, who haven't had very much competition on the college level," Schmitt said.

"These dual meets are good warm-ups for our big meets. We went into the season with a good start. I was worried we would be flatter in the routines than we were, but I was pleased with the team's overall performance."

Hawkeye all-around specialist All Tavakoli performed well for the Iowa gymnasts despite the team's third-place finish in a triangular meet at the Field House Saturday. Minnesota won top

honors in the event and Ohio State took second. But Iowa Assistant Coach Neil Schmitt said the Hawkeyes had a successful outing and wasn't discouraged with the final outcome.

The Daily Iowan/John Derrico Jr.

# Mistakes humble Hawks Women escape Illinois State, fall to Illini

By CATHY BREITENBUCHER  
Staff Writer

The Iowa women's basketball team had one of those weekends during its two-day trip into Illinois, and Coach Lark Birdsong may be going back to the drawing board before the Hawkeyes return to action Tuesday against Mount Mercy.

The Hawks opened the trip with a 91-82 win over Illinois State, but dropped a 60-53 decision to Big Ten rival Illinois on Saturday. The series sent Iowa to 11-6 on the year after the Hawk women went 2-2 over Christmas break. Iowa stands at 2-1 in the Big Ten with victories over Wisconsin and Minnesota.

Iowa, undefeated at home this season, hosts Mount Mercy on Tuesday and will seek a series sweep at Cedar

Falls on Friday against Northern Iowa. "Against Illinois State, we had a disappointing first half. We didn't play with as much effort as we could have," said Birdsong, whose Hawks were down 34-32 at intermission.

The Hawks got good performances out of Barb Mueller, Erin McGrane, Cyndi Gaule and Cindy Haugejorde, according to Birdsong. Haugejorde paced the team with 20 points, with Gaule adding 19, McGrane 17, Sue Beckwith 14 and Joni Rensvold 10.

Iowa shot 51.4 per cent from the field, 50 per cent from the free throw line and gave up the ball 26 times on turnovers.

Things weren't much better Saturday at the Assembly Hall, as the Hawks connected on a miserable 28.6 per cent of their shots from the field and again turned the ball over 23 times. Iowa,

down 28-18 at halftime, improved on its Friday free throw percentage by hitting 67 per cent against the Illini.

"The loss to Illinois was even more disappointing than the Central Missouri game (over semester break). Illinois had lost to some teams we had beaten rather easily, like Iowa State and Wisconsin, but we simply didn't play hard. The team didn't put their hearts out," Birdsong said, adding that problems with the officials added to the team's headaches.

"The problems with the officials put the game off to a bad start, but a team has to be able to play around any kind of officiating. Some of our fouls were unnecessary, and a team that wants to press has to learn to play without fouls," the Iowa coach said. "Illinois shot 78 per cent on free throws, and you

just cannot play Illinois at the line when you only shoot 67 per cent."

Birdsong said her team committed some fundamental errors, such as not reporting in properly. "We were called for two technicals on that, and we should know better. We've gone over our substitution procedures since October," she said. "I'm just not very pleased at all with the Illinois game."

Iowa was whistled for 31 fouls as Beckwith, Mueller, McGrane and Haugejorde fouled out. Haugejorde and Beckwith were the only Hawks in double figures with 21 and 10 points, respectively.

To make things even worse for the Hawks, freshman Rensvold suffered torn ligaments in her left hand early in the Illinois game and is expected to be out for two weeks.

The Daily Iowan/John Darrico Jr.

After a less than successful road trip in Illinois, the Iowa women's basketball squad hopes to get its fast break moving again Tuesday when the Hawks host Mount Mercy.

Cindy Haugejorde, shown in action against Wisconsin, scored 20 points in Iowa's win over Illinois State and 21 points in a losing cause at Illinois.

## IM popularity sizzles in spring semester

By HEIDI McNEIL  
Staff Writer

The semester has barely begun, but the intramural department is wasting no time in getting back into the swing of things.

After the pre-holiday tournament warm-up, second semester action will begin in earnest as league competition for IM basketball teams gets rolling Wednesday night. According to Warren Slebos, IM coordinator, 175 teams — 115 men's, 35 women's and 25 co-ed — have entered the league races so far. Late entries will be accepted until 5 p.m. Thursday.

"After late entries come in, we should have well over 200 entries, at least," Slebos added.

This year's participation may be slightly down as over 220 teams competed in the 1978 contests.

IM basketball will be conducted similar to flag football with regular season games, playoffs and then championships slated for mid-March, according to the IM coordinator.

Wrestling enthusiasts will have a chance to show off their abilities as preliminary competition begins Jan. 31. Weigh-in is scheduled for Jan. 29 from noon to 7 p.m. in the men's locker room of the Field House. The tourney will be a single elimination with the top two wrestlers in each weight class facing each other in a final

showdown, Slebos explained.

For those claiming strong arms, single elimination contests in the ancient sport of arm wrestling can also be found on this semester's IM roster of activities. The action begins Feb. 6 and will consist of four weight classes for men and a women's championship. The finalists will demonstrate their strength in front of a Purdue-Iowa basketball crowd during halftime on Feb. 15.

A couple other "swinging" sports coming up on the IM schedule include men's table tennis and men's, women's and co-ed racquetball doubles. The battles of the racquet and paddle begin in February with Jan. 31 as the deadline for entries.

Last semester's Turkey Trot provided equal time for the running world, so this semester's edition includes an indoor track meet for the fleet-footed on Feb. 21 at the Recreation Building. Preliminaries will be held one week prior, Feb. 14.

Right up many UI students' alleys will be an IM-hosted bowling tournament in late February for men's, women's and co-ed teams. Bowling rounds out the IM agenda before spring break.

After everyone is refreshed from the ten-day vacation at the end of March, the volleyball nets will go up with league play for men's, women's and co-ed squads. Action will continue into the playoffs with the final matches slated for the latter part of the semester.

Balls, bats and gloves will come out of the closets for softball games in late spring as the tennis racquets also go outside for men's, women's and co-ed doubles play.

Canoe races on the Iowa River will wind up the semester in fine fashion in early May.

Further details concerning specific deadline dates, entry and rules are available at the IM office (Room 111, Field House).

Dreams of going to the Olympics may be partially fulfilled through a new event sponsored by Schlitz for IM participants.

The men's and women's teams accumulating the most points through competition in basketball, track and field, wrestling, arm wrestling and racquetball doubles this semester will be named IM champs for the UI. Winning this honor will make these teams eligible to compete in regional action in the "Schlitz Intramural olympics" to be held at the University of Minnesota in March. According to Slebos, at least eight to 10 teams will form regional

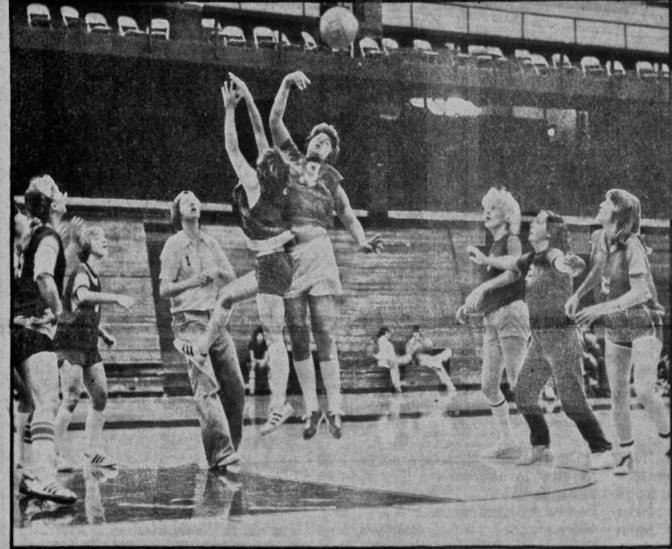

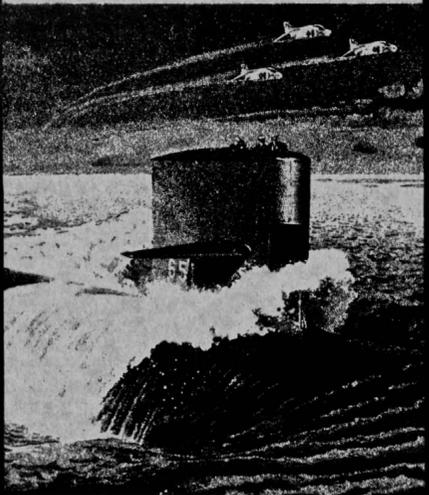

Photo by Vickie Lock

Frenzied competition, weird names and wild statistics will all be evident once again this semester under the name of UI Intramurals. Basketball will be the first sport to start off the

spring competition as over 200 teams are expected to ride the backboards of the Field House. Prospective teams can still enter the league as late entries will be taken until 5 p.m. Thursday.

## All-star lineup.

Slimline TI-50™

TI-55

Slimline TI-25™

Performance and price are the keys in choosing a calculator. One of these Texas Instruments slide-rules is right for you.

**Capability. Quality. Value.** The right combination can help you make short work of problems in fields like math, engineering, science and business statistics and give you more time for other important things. Choose the TI calculator that's right for you and get ahead of the game.

**TI-55. Advanced slide-rule functions with statistics, programmability and valuable problem-solving applications book.**

The versatile TI-55 calculating system is packed with the features and functions you need to handle almost any mathematical operation, from logarithms and trigonometry to advanced statistical problems. Thirty-two steps of programmability add new dimensions of accuracy, speed and ease to performing repetitive calculations and "what-if" analyses. You just teach the TI-55 a series of operations and it performs those steps for you.

For more help in making quantitative decisions, the TI-55 comes with the **Calculator Decision-Making Sourcebook** - *Making Sourcebook*, a \$5.00 value. The book, 140 pages of easy-to-understand, real-life applications,

shows you how to use the power of statistics, financial math and programmability in analyzing relationships in data, verifying quality and performance, measuring change, forecasting trends and projecting returns... in short, how to make better decisions, today and tomorrow. Calculator and book combination, only \$50.00.

**Slimline TI-50. A powerful, stylish slide-rule with new Constant Memory™ feature.**

The pocket-portable Slimline TI-50 is today's most powerful liquid crystal display (LCD) slide-rule calculator. It has 60 functions including common and natural logarithms and six trigonometric operations that can be performed in three angular modes (degrees, radians or grads).

Seven built-in statistical functions make it easy to "boil down" large amounts of data so you can perform accurate analyses and draw reliable conclusions.

Two constant memories retain their contents even when the calculator is turned off, so frequently used constants and other basic values are at your fingertips when you need them.

Two miniature batteries provide over 1000 hours of operation in normal use; TI's APD™ automatic power down

feature helps prevent accidental battery drain by turning off the calculator after approximately 10 minutes of non-use. With imitation leather wallet, \$40.00.

**Slimline TI-25. Slide-rule power at a small price.**

Economy and value go hand-in-hand with the Slimline TI-25, a pocket-portable LCD scientific calculator that has what it takes to handle advanced math. It provides the most-needed slide-rule functions. Trigonometry in degrees, radians or grads. Plus basic statistical power, too: Mean, Variance, Standard Deviation.

Three levels of parentheses can handle up to three pending operations to make your work easier. Four-key memory allows you to store and recall values, add-to memory contents and exchange stored and displayed numbers.

The TI-25 goes far on a pair of miniature batteries—includes APD™ circuitry. Vinyl wallet included, \$33.00.

See the complete lineup of Texas Instruments slide-rule calculators at your dealer today. There's one exactly right for the work you're doing.

Texas Instruments technology—bringing affordable electronics to your fingertips.

# Hawkeye wrestlers assert power in holiday meets

By DOUG BEAN  
Staff Writer

Dan Gable is a perfectionist. He strived for the highest degree of achievement as a wrestler, and now he wants to push the Hawkeye wrestling team to its ultimate plateau of success.

It appeared that Gable's grapplers did just that over the holiday break but if you listened to the Iowa coach, you'd come away with a different idea of the fortunes of Hawkeye wrestling.

After winning their fifth consecutive Midlands Open crown plus two dual meets with Iowa State and Oklahoma State, Gable was still not totally pleased with the team's performance. He kept repeating himself: "We wrestled well but there is still room for im-

provement," Gable commented after every victory.

But Gable did have good things to say, especially about the lower weights at the Midlands.

The state of Iowa dominated the Midlands tournament. Five individual titles were captured by Iowa and the Hawkeye Wrestling Club as the two teams finished one-two in the final point standings, 93 1/2-44 1/2.

At one point in the tournament, it looked like the Hawkeye WC would dethrone Iowa as Midlands champion, but the Hawkeyes showed superior strength in the consolation rounds to win an unprecedented fifth straight title. Wisconsin and Iowa State finished well behind the leaders in third and fourth. Randy Lewis and Bruce

Kinseth were two of the hottest wrestlers at the Midlands tournament. Lewis (126) manhandled every opponent he faced in the meet, pinning four en route to a 4-1 decision over Wisconsin's Jim Hanson in the finals. The four falls won Lewis the award for the most pins in the tournament.

Kinseth (150) was equally impressive for the Hawkeyes, pinning three opponents, including Sam Komar, unattached, in the finals. The senior co-captain ran his consecutive pinning mark to 11 on the season before recording a decision over Robert Schandle, unattached, in the quarterfinals.

The 150-pound class was dominated by Iowa in the Midlands with Kinseth placing first, Scott Trizzino third and King Mueller third. Trizzino had a problem making weight

at his normal 142-pound spot and had to move up a weight for the tournament.

The Hawkeye WC crowned three champions and had one second place finish. Tim Cysewski won his fifth Midlands title by stopping Lehigh freshman Darrell Burley in the finals.

Iowa Assistant Coach Chuck Yagla beat Iowa State's Kelly Ward in the finals to win his third consecutive Midlands crown and Chris Campbell accomplished the same feat at 177.

Gable was disappointed with the showing of his wrestlers at the upper weights. The biggest surprise came when Heavyweight John Bowsly lost a controversial referee's decision to Steve Day of the Mayor Daley Wrestling Club in the semifinals. Bowsly then came back to win third behind Olympic champion Ben Peterson and former NCAA champion Harold Smith.

Bud Palmer (190) and Mike DeAnna (167) didn't fair well in Midlands competition as both failed to place. Palmer was dumped in the semis by freshman Mike Mann of Iowa State and was unable to fight his way back through the consolation round.

Dan Glenn (118) placed fourth and Jed Brown was fifth at 158 to provide the rest of the Iowa scoring.

Iowa was expected to breeze past Iowa State when the dual came around Jan. 6 but a different story unfolded, one which Gable was not happy about at all.

Fortunately for Iowa, a big upset by Mark Stevenson over Dave Powell at 167, provided the fuel for the Hawkeyes to pull out the victory before 12,951 fans, the largest crowd ever to watch a dual meet at the Field House.

If Stevenson didn't score the upset, Iowa could have been

trailing the Cyclones going into the Heavyweight match, but when it was all over, the Hawkeyes had pulled away with a 24-14 decision.

Gable said his squad wrestled well overall, but was critical of the performance of his upper weights.

It looked like the meet would be a cakewalk for the Hawkeyes after Glenn routed Iowa State's Don Finnegan, 13-5, at 118. Lewis then followed with a fall over Jim Lord in 4:45 to give Iowa a quick 10-0 lead.

Iowa State's Mike Land tried unsuccessfully for over a period to gain a pin, but did put five points on the scoreboard for the Cyclones with an 18-2 manhandling of Mark Mysnyk at 134. Iowa State wrestlers threw scares into the next two matches.

Trizzino (142) used an escape and a stalling pin in the final period to whip Dave Brown in a tight contest, 5-4. Next, Kinseth (150) found himself on his back for the first time this year, but managed to rally in the final period to capture a come-from-behind 17-12 decision over freshman Tom Pickard.

Iowa's Jed Brown gave senior All-American Kelly Ward a scare before Ward recorded 10 third period points to win a 10-4 victory. Brown led 1-0 after the first two periods.

After Stevenson's upset win, Iowa State's Dave Allen took Fitzgerald, 8-4 while Mann beat Palmer for the second time this season, 9-3. The Cyclones needed a pin from Heavyweight Tom Waldon in the evening's final match to win, but Iowa's Bowsly rolled to an easy 20-7 decision to ice the Hawkeye victory.

Iowa won the fifth meeting between Gable and Iowa State coach Harold Nichols to run their dual record to 8-0 while the Cyclones dropped to 4-1 with the loss.

A week later, the Oklahoma

State Cowboys came to Iowa City figuring to give Iowa a tough battle, but the Hawkeyes dominated the meet.

Gable understandably showed more signs of happiness with the outcome after stopping Oklahoma State, 33-7.

"I was much more pleased tonight and I am happy with our progress. We didn't lay back as much and were more intense out there," Gable said after the victory.

The Cowboys came in with a perfect 9-0 season mark, but before the night was barely started, it was obvious that Oklahoma State would be sent down to defeat for the first time this year.

Glenn was expected to have a tough battle at 118 with Howard

Auffleger, but the Iowa junior rolled to a 16-1 superior decision. Mysnyk came back with an 11-5 decision over Jerry Kelly and Lewis recorded his 11th fall of the year by stopping Tom Landrum in 6:45.

The Hawkeye wrestlers coasted after building a 14-0 lead in the opening three matches.

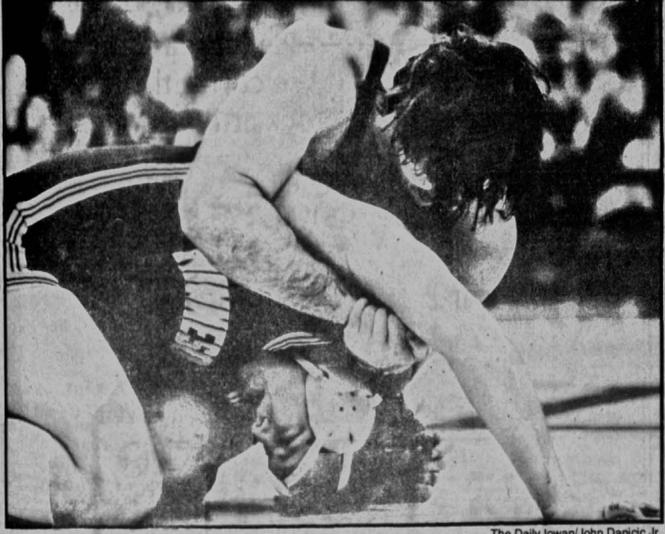

Lenny Zalesky, who had been out after undergoing knee surgery earlier in the season, wrestled in his first meet of the season and drew a tough assignment with the likes of Lee Roy Smith, an All American with a 16-2-1 record this season.

A head-to-head meeting was expected between Smith and Iowa's Trizzino, but the Iowa All-America was unable to

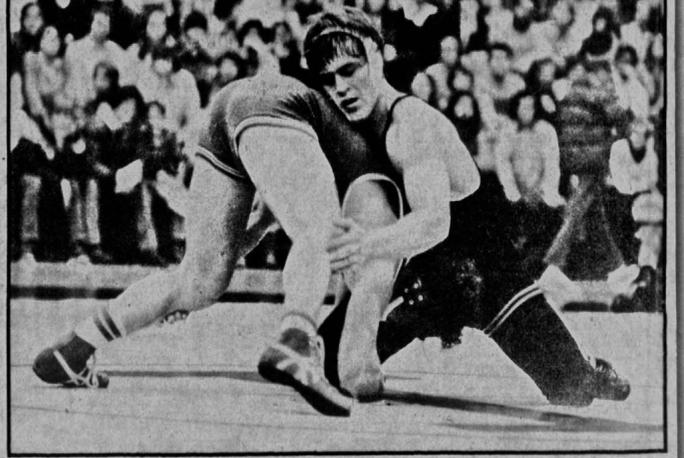

make weight again and Zalesky lost the match, 11-3. Kinseth (150), Brown (158), DeAnna (167), and Fitzgerald (177) all cruised to victories.

Oklahoma State did their final scoring when top-rated Eric Wais won a hard-fought 7-5 decision from Palmer. Coach Tommy Chesbro gave up hope after that 190-pound match and forfeited the Heavyweight contest to Iowa's Bowsly.

Iowa was set to carry their 9-0 record to Burlington on Jan. 15 to take on Hofstra, but the winter storm that paralyzed the Midwest forced the cancellation of the meet. The way Gable's troops have been storming, it may have been a blessing for the Flying Dutchmen from Hofstra.

The Daily Iowan/John Danicic Jr. Heavyweight John Bowsly found little riding time in his match with Minnesota's Jim Becker as the Gopher heavyweights handed Bowsly with his second loss of the season in Iowa's 31-11 victory Saturday night. The win raised the Hawkeyes dual meet record to 11-0 while Minnesota suffered its third setback in 12 outings.

The Daily Iowan/Cathy Breitenbuecher Iowa's Dave Fitzgerald lost a hard fought 8-6 decision to Wisconsin's Jim Kleinhaus in a dual meet between the nation's No. 1 and No. 3 teams Friday night. The Hawkeyes cruised to a 28-14 win in the meet. Fitzgerald came back Saturday night to battle Minnesota's Tom Press to an 8-8 draw.

## Illini learn defensive skills the hard way

By United Press International

The honeymoon is definitely over. And Illinois Coach Lou Henson kind of knew it was going to happen.

"If we don't get some better defense, we are going to be in

trouble," Henson predicted Saturday before the Illini, whose fairytale rise to the No. 2 spot in the national rankings this season had stunned college basketball fans everywhere, fell to unranked Purdue, 69-57.

"We need to keep the ball out of (center Joe Barry) Carroll's

possessive hands," said Henson, who was looking for his 300th college career victory.

But Illinois, which had the longest winning streak in the country — 15 — until a week ago, just couldn't do the job.

Carroll, a seven-foot-one junior, overpowered the Illini,

scoring 24 points and pulling down 10 rebounds as he became the 17th Boilermaker to top the 1,000 point career scoring mark and led the stunning upset that raised Purdue's Big Ten record to 3-3 and 13-5 overall.

Illinois' defensive efforts backfired as overanxious coverage gave Purdue 35 free throw opportunities for 29 points. The Illini scored only 7-10 from the line.

Arnette Hallman had 17 points and Jerry Sichting added 14 for Purdue. Eddie Johnson led the Illini with 15 points, followed by Rob Judson with 12 points and Levi Cobb with 10.

All the other top ten teams did pretty much what was expected of them Saturday — win — although some conference rivals mounted severe challenges.

In easy wins, top-rated Notre Dame downed South Carolina 82-73, fourth-ranked UCLA routed Arizona State 95-79, No. 5 Indiana State downed Creighton 90-80, and No. 10 Marquette beat Xavier 67-50.

But third-ranked North Carolina barely edged Maryland, 54-53, in the tough Atlantic Coast Conference, No. 6 Michigan State needed an

overtime to top Iowa, 83-72, in Big Ten action. No. 7 Louisville shaved Florida State, 67-65, in the Metro Conference and No. 8 Louisiana State nudged Mississippi, 70-69, in an overtime Southeastern Conference match.

Kelly Tripucka scored a game-high 22 points and Tracy Jackson, who came off the bench early in the first half, added 21 to spark Notre Dame, 11-1. South Carolina hit 67 per cent from the field but managed only 46 shots as the Irish full-court press and rotating offense dominated the game. Orlando Woolridge added 17 points for the Irish while South Carolina, 7-6, was led by Zam Fredrich with 20 points and Cedrick Hordges with 19.

UCLA exploded for an 18-4 spurt late in the first half and then coasted over Arizona State to raise its Pac-10 record to 5-2, a half game behind USC. David Greenwood tallied 22 points, Roy Hamilton picked up 20, and Kiki Vandeweghe added 17 for the Bruins. Topy Zeno led the Sun Devils with 20 points.

Larry Bird poured in 29 points, including 20 in the second half, to lead Indiana State, 16-0, over Creighton, 87-

## Next Iowa test: Illini, Gophers

Continued from page 1.

comeback seemed remote to most fans, but not to Olson.

"There's no question about it, I thought we'd be back. They're battlers and they may run into some tough periods of time, but they're not going to give up and give anybody anything," Olson insisted. "I told them at the half that we got them (Michigan State) dragging a little bit. If we get after them for the next 20 minutes, full court, make them work every time they get the ball, and just keep the heat on, we'll catch them."

The Hawks returned with intensity and cut the margin to seven, 38-31, after Peth made two free throws from a technical on Spartan Coach Jud Heathcote. Johnson put the Spartans ahead 41-31 after a technical on Boyle, but Iowa kept trimming the gap until Heathcote was slapped with another technical. Norman hit the two charity tosses to bring

the Hawks within two, 55-53, with nine minutes still to play. Baskets by Norman, Lester and Vince Brookins gave Iowa a 59-55 lead, but the four free throws by Johnson tied the score and set the stage for the frantic final minutes.

Besides Lester's 21, the Hawks were helped by a 16-point effort by Norman and a 10-point performance by Dick Peth. The Spartans were boosted by Johnson's 25 game-high effort. Keiser added 22 and led all rebounders with 11 while center Jay Vincent and Brkovich chipped in with 12 and 10 points, respectively.

Michigan State hit 55 per cent of its shots in the game (66 and 46 in the first and second halves) while the Hawks finished with 46 per cent (41 and 50). Both teams had 13 first half rebounds, but the Spartans finished with a 36-28 edge. Iowa turned the ball over 20 times

while getting 23 gifts from the hosts.

Iowa will return home for a tough battle against Illinois Thursday and a contest with Minnesota Saturday night. The Michigan State loss left Iowa with a 4-2 league mark after Iowa had opened its Big Ten campaign with a 65-57 win over Northwestern and then surprised Michigan, 85-79. The Hawks lost a discouraging 72-67 battle with Ohio State before bombing Indiana 90-61 and topping Purdue 56-46. The Hawks had begun building their present 11-4 season record with a 112-73 smashing of Drake following finals week, and then won the Cabrillo Classic by beating Pennsylvania 87-84 in two overtimes and downing Stanford 83-68 in the title match.

United Press International Michigan State's Earvin Johnson looks for some assistance with little help from Iowa's Ronnie Lester in the Spartans' 83-72 overtime triumph. Johnson led all scorers with 25 points while Lester paced the Hawkeyes attack with 21.

## Learning Adventures for Adults

OPEN ENROLLMENT • NO TESTS • CEU AWARDS

Center for Conferences and Institutes Room 311 IMU  
Call 353-5508

The University of Iowa

**SPRING 1979**

The University of Iowa, Iowa City, Iowa  
Classes run for five consecutive weeks, meeting each week from 7:00 to 9:00 p.m., at the Iowa Memorial Union, unless otherwise noted. Class size is limited, and all registrations will be accepted on a first-come, first-served basis. Fee for each class is \$20, if it is not stated. Please pre-register by using the attached form. For more information call 353-5508.

**SESSION I**  
Beginning Monday, January 29

**Medical Genetics**  
Presented in an easily understood manner, this course will give special emphasis to newer developments in genetics, including prenatal genetics and prevention of genetic diseases by screening. Chromosome anomalies (including Down Syndrome and sex chromosome anomalies), single-gene inherited diseases, and the principle of polygenic inheritance will be discussed. Don't miss this great opportunity to meet with an authority on this subject. Hans Zellewage, M.D., Clinical Director, Regional Genetics Consultation Service, University Hospitals.

**Traveling in France**  
Just returned from spending the holidays in France, the instructor will give you some added tips on the vocabulary needed in your travels in Paris and the provinces. How to find your way in the language of the Metro, the railway stations, airports, restaurants, and hotels will be covered. Ann Kimberley J. Smith, Department of French and Italian.

**Beginning Tuesday, January 30**

**Communication Training: Skills to Enhance Interpersonal Effectiveness**  
Participants will be taught specific verbal and nonverbal components of behavior to use during conversation, problem-solving, negotiation, and compromise. Professional application of communication skills will also be addressed if participants are interested. Candace Kinty, Psychiatric Hospital, and Catharine Siders, University Hospitals.

**A Layman's Introduction to Computing**  
A basic introduction to the use of computers and the impact they have on our everyday lives, now and in the future. Demonstrations and actual use of a computer will be included. A textbook will be used. Bill Decker, Instructor, Department of Computer Science.

**Successful Grant Writing**  
This course offers a thorough analysis of the major proposal sections: reviews federal agencies with regard to programs, specific application formats, and review procedures; illustrates different types of proposals for research, training, or curriculum projects; and leads participants to develop knowledge and critical evaluation skills in grant writing. Carl Phillips, Educational Research and Development.

**Ballroom Dancing**  
Designed to develop skill in a variety of ballroom styles of dance. Bring a partner. Fee will be \$30 per couple if there is sufficient enrollment. Class will meet in Small Gym, Halsey Gymnasium, Ann Savel, Department of Physical Education and Dance.

**Fundamentals of Pocket Billiards (Pool)**  
Fundamentals of pocket billiards will be covered in addition to the rules for eight other games, including carom, three cushion, and snooker. Class will meet for four consecutive Tuesdays in the Recreation Area, ground floor of the Iowa Memorial Union, from 7:00 to 8:30 p.m. Cost will be \$15. Robert Froeschle, Recreation Area Manager, IMU.

**Introduction to Electronic Music**  
Embark on an adventure into the unique field of electronic music! Investigations into the art music of the electronic medium will embrace techniques using tape recorder and synthesizer, electronic music literature, and discussions of history and aesthetics of this relatively new sphere in music. No special knowledge of electronics or music necessary. Class will meet in Room 205B, Music Building, Ted Haimaker, School of Music.

**Beginning Wednesday, January 31**

**Introduction to Movement-Dance Therapy**  
Course provides mental health professionals, students, and the general community with core theories of this modality's role in personality growth and expression. Lecture: experiential format. Class meets in Room E-103, Halsey Gymnasium, Judith Lipschutz, Adjunct Instructor, Department of Physical Education and Dance.

**Manual Communications I**  
Introduction to beginning sign language showing the two major systems used. Finger spelling and basic vocabulary will be covered. Sheila Bodicker, Department of Speech Pathology and Audiology.

**Genology**  
A lecture and laboratory course devoted to recognition of the physical and chemical properties of gems for the purpose of identification and general appraisal of their value. Origins of gems will also be discussed. Prof. George McCormick, Department of Geology, Rm. 135, Trowbridge Hall.

**Introduction to Astronomy**  
Studies of the moon, planets, stars, the universe, and cosmology. Class will use the University of Iowa telescopes and astronomy facilities. Prof. John Fix, Dept. of Physics and Astronomy. Class will meet in Rm. 618, Physics Building.

**The University of Iowa**  
Center for Conferences and Institutes  
Room 311 IMU  
Iowa City, Iowa 52242

Name: \_\_\_\_\_  
Social Security Number: \_\_\_\_\_  
Address: \_\_\_\_\_  
Phone: \_\_\_\_\_

Please send information on the following programs

**SESSION II**  
Beginning Monday, March 5

**Penny Pincher's European Travel**  
Expert tips on getting ready, getting set, and going on a European trip. Important information on how to enjoy yourself when you get there. Fritzen Dykstra, Overseas Travel and Study Abroad.

**Managing Stress**  
This course is designed to provide people with help in managing the stresses in their lives. Participants will examine the relationship of their life-style to stress and learn techniques to cope with their stresses. This class meets for three sessions only. Fee is \$12. Barbara Humbert, Institute of Public Affairs.

**Chinese Calligraphy**  
The art of Chinese calligraphy has remained unchanged for nearly two thousand years. Learn the basic techniques of handling the brush in executing the various scripts starting with the simplest Chinese characters as taught by a native of Japan. Brushes will be available for purchase at the first class meeting. Kyuchi Tsukamoto, Department of East Asian Languages and Literature.

**Beginning Tuesday, March 6**

**A Layman's Introduction to Computing**  
(Repeat of class beginning January 30.)

**Bird Watching**  
Covers techniques of bird identification and bird observation, bird books, binoculars and other equipment, as well as the ecological and seasonal distribution of Iowa birds. Michael Newison, Department of Zoology.

**Fundamentals of Grant and Contract Administration**  
The course covers a basic introductory proposal, a survey of the federal government from a funding viewpoint, budgeting, indirect costs, contracts, and regulations affecting grant and contract administration. Brian Harvey, Division of Sponsored Programs.

**Beginning Wednesday, March 7**

**Manual Communications II**  
A continuation of the previous introductory courses with an emphasis on practice in using this method of communication. New vocabulary will also be introduced. Maribeth Vogel, Department of Speech Pathology and Audiology.

**Cooking with Whole Grains and Legumes**  
The diet and philosophy of eating low on the food chain. Alternative sources of food consumption featuring traditional and nontraditional dishes, and health aspects of diets lowered in meat and animal fats. Joanne K. Walker, Research Nutritionist, Clinical Research Center.

**SPECIAL PROGRAMS — SPRING 1979**  
(Write or call for details.)

**Math Review for the Graduate Record Exam**  
Professor Michael Geraghty, Department of Mathematics  
February 12, 14, 16, 19, and 21, 7:00-9:00 p.m. Fee: \$25  
April 16, 18, 20, 23, and 25, 7:00-9:00 p.m. Fee: \$25

**Theater Weekend in Minneapolis**  
February 23 and 24, 1979  
Lecture  
Monday, February 12, 7:30 p.m., Indiana Room, IMU  
"The Beggar's Opera — Why It Was So Successful"  
Professor Judith Millhaus, Speech and Dramatic Art  
Trip  
Friday, February 23, 10:00 a.m., Leave IMU for Minneapolis  
Chambasson Dinner, Theater that evening for dinner and performance of Camelot  
Saturday, February 24, matinee performance, Guthrie Theater, "The Beggar's Opera" (18th-century ballad opera). Return to Iowa City following the performance.  
Fee  
\$50 includes bus, Friday evening dinner and theater, and performance at the Guthrie matinee on Saturday. Reservations for overnight lodging at the Curtis Hotel will be separate and should be made at the time of registration.  
Registration Deadline: February 9, 1979

**Fiction-Writing Workshop**  
An opportunity for beginning writers to obtain basic information and a critique of their own creative writing. Class will involve two informal lectures, a small-group discussion of students' fiction, individual conferences, and an opportunity to attend a Writers Workshop Fiction Reading. Deborah Hornbaker, Iowa Writers Workshop, will be the instructor.  
Lectures  
Saturday, March 10, 10:00 a.m.-12:00 noon  
Saturday, March 17, 10:00 a.m.-12:00 noon  
1:00-5:00 p.m., individual conferences and group discussions.  
Reading  
Friday, March 16, 8:00 p.m., Frederick Busch, Acting Director, The University of Iowa Writers Workshop.  
Fee: \$40

**Early Iowa Revisited VI: A Trip to Des Moines**  
April 7, A visit to points of historical interest. Lecture by Loren Horton, State Historical Society, preceding trip. June 12, repeat of A Trip to Southeast Iowa, the first trip of this series. Loren Horton.  
Fee \$20.00 for each trip, meals not included.

Enclosed please find my check made payable to the University of Iowa (enrollment confirmed by return mail) for the amount of \$\_\_\_\_\_.

# Iowa swimmers hope sunshine, training pays off

By HOWIE BEARDSLEY  
Assoc. Sports Editor

BLOOMINGTON, Ind. — When talk concerns pre-season training, one usually envisions a preparation period before the upcoming season. Baseball squads call it "spring training," while football teams give such a workout the name "two-a-day practice."

Coach Glen Patton and his Iowa swim team are certainly no exception to the rule. They did the same thing last fall, however, they just did it again — in the middle of the season.

"It may sound a little strange, but I guess you could call our annual training trip over the Christmas holiday a pre-season workout," Patton said. "In fact,

the only time we have a harder workout is in October, right before the start of the season."

Before you begin to pity the members of the Hawkeye squad, who were sent through two daily practice sessions consisting of some 15,000 meters of swimming per day, it should be pointed out that these middle-of-the-season-preseason workouts were not occurring in Iowa City but in Mayaguez, Puerto Rico — where January temperatures hover around the 80-degree mark and the word snow is spoken only in a foreign tongue.

"We usually take the team to Florida for training because it's a tremendous psychological lift for the swimmers to be able to train outdoors," Patton said. This year we decided to go to

Puerto Rico for a change of pace and for better pool time. In Florida, there's too many schools there and it's hard to get good pool time."

Patton also admits that the annual Christmas trips are used as a means of getting away from it all back on the UI campus and buckling down for the upcoming Big Ten Championships (Mar. 1-2 at Ohio State University).

"It's very important to have cardio-vascular training during break to keep the guys in shape and to get them ready for the rest of the schedule, and the Big Ten at the end of the year. We don't have any sprint workouts during these trainings because it's hard to sprint in a 50-meter pool. And we'd like to concentrate more on endurance

training because it's our last opportunity to have extensive training without distractions — no girlfriends, no class conflicts, papers, tests or family matters," Patton said.

"Everyone's concentration is on swimming and the most important thing that should be on each swimmer's mind is swimming and training. When we're back in school, schoolwork is most important."

The two-week trip to Puerto Rico was financed through swim lessons offered each year to some 500 pupils ranging from three years of age all the way to those adults who need a little help with their swimming techniques. The lessons are offered through the UI Recreational Services program and are organized and directed

by the Hawkeye team and coaching staff, along with students enrolled in teaching swimming and water safety instruction courses.

The Hawkeyes spent the holiday vacation at the University of Puerto Rico, were housed in university dormitories and had access to the school's weight facilities and Olympic-sized pool. The use of such facilities and workouts, according to Patton, should result in dividends to the Iowa team in the very near future.

"Our training in Puerto Rico will be a great boost to the team the rest of the year. Actually, we overtrained them so much, once they have rested up, it'll make them all better swimmers. And it will be a definite investment for our three-week tapering period, which comes at the end of the year for the conference championships," Patton admits.

Actually, the Hawkeyes almost found themselves shortchanged as a result of the holiday training period after returning to the United States for a dual meet encounter with Purdue on Jan. 13.

The meet in West Lafayette, initially considered a tune-up for the Jan. 15 confrontation with powerful Indiana, wound up being nerve-racking affair for Patton and his crews. It was also a classic of a swim meet for the handful of spectators who braved the cold and icy Indiana weather.

"We knew we'd have some problems with Purdue since we had to suspend Ian Bullock and Steve Harrison for the meet due to disciplinary actions," Patton explained after the Hawkeyes' nail-biting triumph. "Both of those guys are two of our top backstrokers and freestylers and, when you add that to the 16 points we had to give up due to diving, you can expect a close meet."

Charlie Kennedy, Mike Hurley, Bent Brask and Jim Marshall got the visiting Iowa squad off and running with a 3 minute, 35.52 second victory in the 400-yard medley race. Marshall and Brask surfaced as the meet's only triple-winners with Brask claiming top honors in the 50-yard freestyle (21.69) and a blue-ribbon finish in the 500 free with a time of 4:43.69. Marshall swam a 48.02 100 free and anchored the Iowa 400-yard freestyle relay team in the final and decisive event of the day.

teaming with Brett Naylor, Charlie Roberts and Hurley for a 3:11.50 finish with a new Lambert pool record.

"Fatigued from driving from Atlanta and getting used to being in a 25-yard pool again caught up with and forced us to the wire with Purdue," Patton said. "But hats off to Purdue for a very emotional meet and for giving us a heck of a scare."

The Hawkeyes were well-rested for Monday night's match-up with 18-time defending Big Ten champion Indiana, but Iowa still became the 140th straight dual meet victim of the Hoosiers in an 88-32 runaway.

Harrison and Bullock showed little effect from their one-meet suspension after claiming a 1-2

finish in the 200 backstroke with Harrison clocked in 1:56.21, and Bullock finishing 1:56.31. Iowa's only other first-place finisher was Brask who churned the water with a 46.81 in the 100 free.

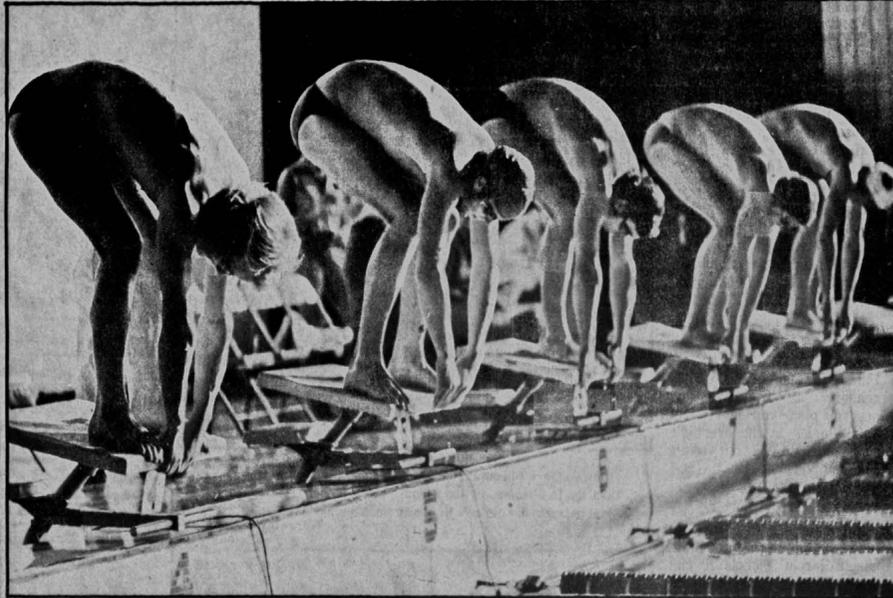

"Most of our times in the meet were our best times of the year," confessed Hoosier Coach James "Doc" Counsilman after running his dual meet record to 202 wins against a mere six defeats (3-0 this year) in a 22-year coaching career with Indiana. "We were really ready to swim against Iowa since this was our home opener and the guys really rose to the occasion."

The lopsided victory left the Hawks with a 2-2 dual meet

campaign, but did little to dent Patton's confidence.

"I was a little disappointed with some of our performances, but, truthfully, we're still not in the same league that Indiana's in. But it is good for us to swim against teams better than we are," Patton said. "If you can beat them, fine; if you don't, at least you have instilled some humility in the team. And one of the best ways to temper confidence is to go up against better competition and get your pants whipped."

"We may have lost by a wide margin," Patton admitted. "But we are still a good swimming team and confident team with high goals for the rest of the season."

The Daily Iowan/Jim Dodson

The Iowa swimmers hope to be the first off the blocks and first in their remaining contests this season leading up to the year-end conference championships. Coach Glen Patton got his tankers off to a good start with a vigorous mid-season training spree that took

place in Mayaguez, Puerto Rico over the semester break. Patton called the two-week trip a psychological lift that aided in Iowa's mid-January win over Purdue. However, the Hawks were unable to defeat defending Big Ten champ Indiana two days later.

## Counsilman: Success a problem

BLOOMINGTON, Ind. — Athletic coaches across the nation would have given anything to have the problem that (until Saturday's 60-53 loss to Southern Methodist) has confronted Coach James (Doc) Counsilman and his Indiana swim team for 13 years. A perplexing matter that consisted of 140 consecutive dual meet triumphs.

A problem? Counsilman thought so. "Sure it's nice to have all those wins, but it's really a little misleading," said the dean of college swim coaches who must backtrack to 1966 to find the last time a Hoosier squad dropped a dual meet decision. "In fact, we tried to have the streak broken last season because the whole thing has been blown out of proportion with constant publicity."

According to Counsilman, the streak was not as glamorous as it may seem due to a lack of finances to send Indiana teams up against other swim powers across the nation.

"We just don't have the money to be able to travel to places like Southern California and the likes for dual meet competition. Truthfully, if you were to look at the teams included in that streak, you'd find a lot of average and below average opponents," Counsilman said.

"I'd gladly give up the winning streak

for a national title."

"The way Indiana swim teams have been performing under Counsilman's 22-year reign, such a trade may not be necessary.

Counsilman, head mentor of the U.S. Olympic team at Tokyo and of the 1976 Olympians at Montreal, took over the Indiana program in 1958, recording a meager 5-2 dual campaign to go along with a sixth-place Big Ten finish and an 11th-

champion status on the line at this season's March 1-2 conference meet at Ohio State University.

"The answer as to why we've had the opportunity to claim 18 straight Big Ten championships is very simple — good swimmers. You can't take poor athletes and make champion swimmers out of them," Counsilman said. "You have to be blessed with a good bunch of athletes and go from there."

Counsilman admits that this year's bunch of Hoosiers should have no troubles at all in notching a 19th Big Ten title. But the former Hawkeye assistant, who received his Ph.D. from Iowa in 1951, remains realistic when it comes to talking about a seventh national crown.

"I know there are some schools in the Big Ten who think they can beat us," concedes Counsilman. "I'm glad to see that feeling developing because a more competitive league is good for the sport. But to be honest about it, I think we'll win it again."

"As for the national meet, don't count on us being at the top of the charts when it's all over. We're more or less a rebuilding team this year and, according to current rankings, we're eighth nationally," Counsilman added. "And I honestly think we belong in the second five of the nation."

With Counsilman's philosophy all but

Turn to page 6, please.

## Extra Point howie beardsley

place spot at the NCAA Nationals. From there it was a jump to No. 3 in the nation in 1959 and '60 after a pair of runner-up finishes at the conference meet.

And that was only the beginning.

To date, Counsilman-coached squads on the Indiana campus have amassed an amazing record of 202 wins in 209 outings, including a perfect slate of 93 victories at Royer Pool. And, if you think those credentials are impressive, then there's no need to inform you that the Hoosiers reigned as the national champions from 1968 to 1973 (before falling to Southern Cal in the 1974 championships, 339-338) and will put their 18-time defending Big Ten

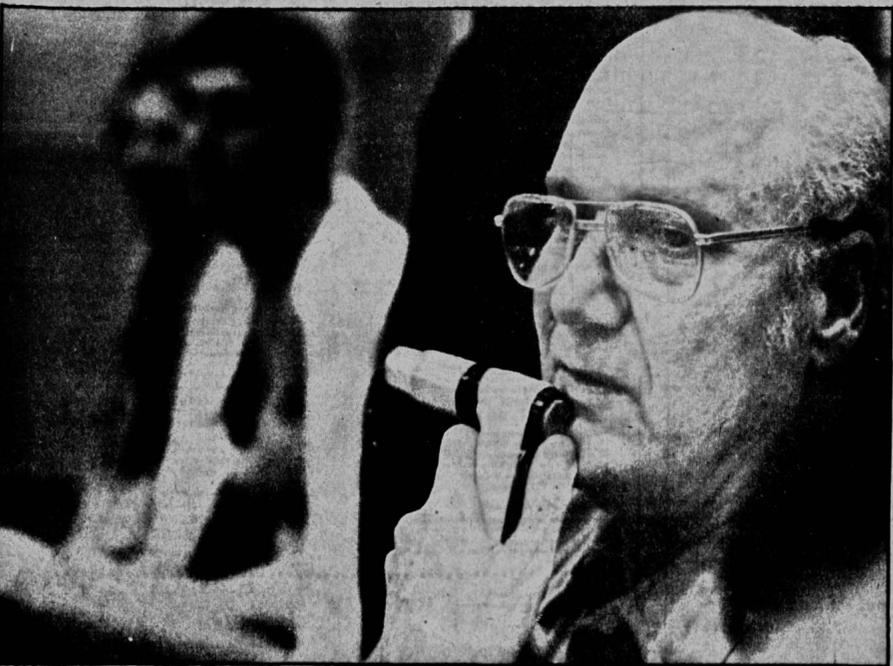

Photo by Scott Goldsmith, Indiana Daily Student

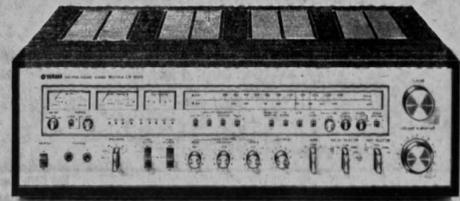

Indians swim Coach James (Doc) Counsilman muses on the pitfalls of coaching a team which owned the longest winning streak in the nation. The ultimate pitfall occurred Saturday as the

Hoosiers were upset by Southern Methodist, 60-53, breaking the school's record of 140 consecutive dual meet victories. The 22-year Hoosier coach claimed that "constant publicity" blew the winning streak out of proportion.

## WHAT'S AN NSA CAREER?

It's different things to different people.

Of course, all employees at the National Security Agency have certain things in common: they are civilian employees of the Department of Defense; they are engaged in technical projects vital to our nation's communications security or a foreign intelligence production mission; and they all enjoy the benefits that accompany Federal employment. However, the differences between our career opportunities are just as interesting as their similarities. For example...

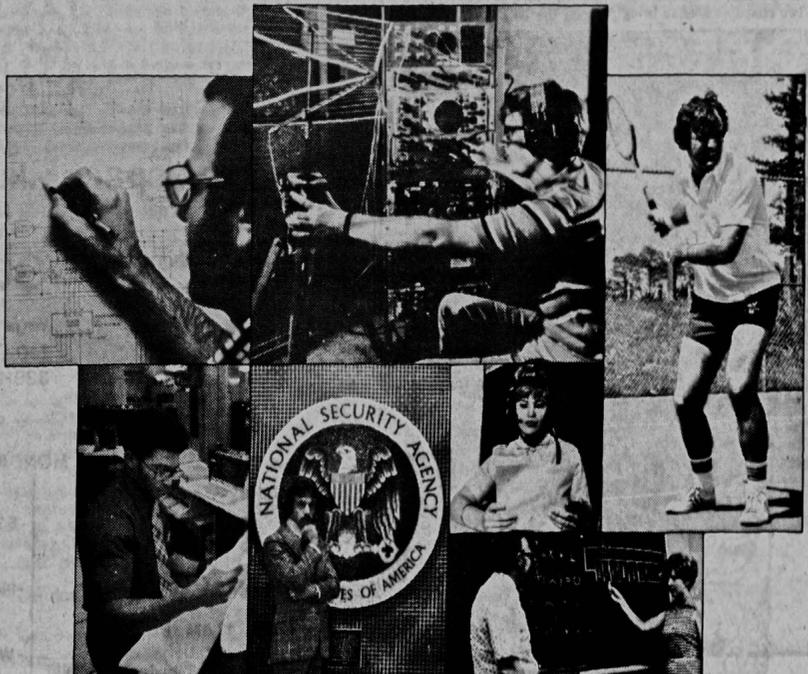

**TO THE ELECTRONIC ENGINEER (BS/MS):** An NSA career means delving into unique projects which can span every phase of the R&D cycle. An engineer may design, develop, test and manage contracts on communications, recording, and information storage devices and systems whose capacities and speeds are still considered futuristic in most quarters.

**TO THE COMPUTER SCIENTIST (BS/MS):** It means applying his or her knowledge in a wide range of sub-disciplines such as systems design, systems programming, operating systems, computer applications analysis, and retrieval systems.

**TO THE MATHEMATICIAN (MS):** A career means defining, formulating, and solving complex communications-related problems. Statistical mathematics, matrix algebra and combinatorial analysis are just a few of the tools applied by the NSA mathematician.

Interested in learning more about the difference in an NSA career? Schedule an interview with us through your Student Placement Office today. If we do not recruit on your campus, send a resume to the address given below.

U.S. citizenship is required.

# Golf ruling irks Burch

While refugees will be receiving Iowa hospitality in the months ahead, at least one foreigner never achieved such a welcome while attending and competing for the University of Iowa.

Nigel Burch, a 24-year-old native of Essex, England and one of the top golfers to play for the Hawkeyes in recent years, is still simmering after being denied the opportunity to play in last summer's Iowa State Amateur in Dubuque. Burch, who was 11th in the Big Ten Championships and graduated in December, claimed his being booted from the tournament was "uncalled for and was under no written rules."

that's enough time to be granted in-state tuition," he added. "Except for that incident, I really enjoyed being at Iowa."

Burch alternated with Boros the past two years for the No. 1 spot for the Hawkeyes. He was second in the Lake Creek Amateur last summer and was on his way to earning valuable points for Amateur of the Year honors before his run-in with Turner. "The Iowa rules are not defined," Burch said. "Did you

scholarship and arrived in the summer before his freshman year. He stepped off the plane, drove to Des Moines and promptly carded a hole-in-one in the opening round of the Herman Sani Open.

The past two years, he's maintained a 74.5 stroke average for the Hawkeyes. Now, attempting to make a career out of his favorite sport, Burch has listened closely to former Iowa standout and PGA

as it is in America. Many British golfers don't start competitively in golf until they're 20 or 21 years old."

A broadcasting and television graduate, Burch yearns for a sports commentator role. "I'd love to be a part of a major sports telecast," he said. "That would be my goal after I give professional golf a good go of it."

Burch felt his years in Iowa, except for last summer, "were wonderful."

"The people in Iowa are helpful and the most hospitable I've met," he said. "And, I still enjoy Iowa football games. I wish the new coach (Hayden Fry) was here last year. I'd guarantee you football would catch on in England, if given a chance. A lot of my friends inquire about it."

Burch, meanwhile, is seeking the support of some English businessmen and friends for his tour plans.

"This game is so much mental that it's imperative that you remain in a good frame of mind all the time when you're on the course," Burch explained. "The name of the game is consistency. That's what pays the bills."

Before he starts the Florida circuit, Burch says he will pay a visit to the Boros' home in Ft. Lauderdale. He spent the past two Christmas vacations at the home of the PGA veteran and teammate.

College golf was a good training ground for me, and provided the needed experience any golfer needs to try for the professional tour," Burch said. "Yes, I've learned a lot."

Everything, that is, except the definition of permanent residency.

## Extra Point bob denney

"I was told I couldn't play because I'm not a permanent resident of Iowa," said Burch, who will declare himself a professional later this month before trying the Florida mini-tour in February. "Two years ago, Julius Boros Jr., a native of Florida, was allowed to play in the state meet. George Turner (an official of the Iowa Golf Association from Des Moines) turned me down. When I asked him about Julius, he (Turner) didn't answer."

know that I could have played in the Illinois State Amateur if I wanted to? How's that for consistency?"

Burch, who began playing golf at age 13, developed his game rapidly. A year later, his handicap dropped to 10. He was a scratch player at 17, and went on to win the Dutch Amateur in 1974 and finish second the same season in the British Stroke Play Championship. An Oelwein native, John Strang, met Burch in the French Amateur that year and convinced him to give Iowa a query. Burch was given a

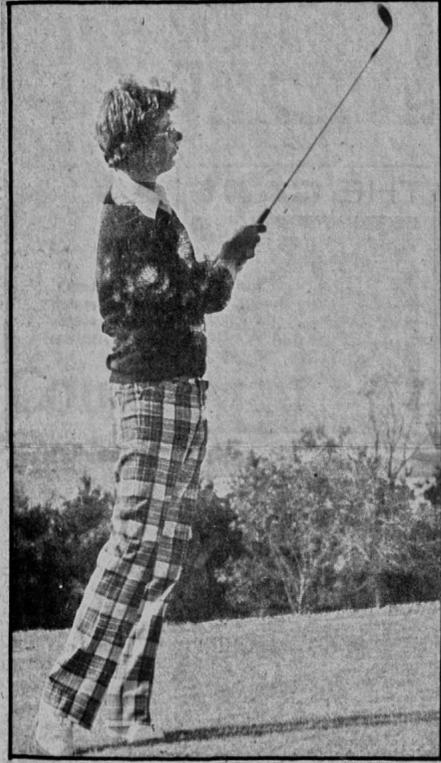

tour member, Lon Nielsen of Belle Plaine.

"Lon told me things I should avoid," Burch said. "I'm going to enter the Florida mini-tour and hope to make expenses. Then, it's back to Europe for the summer circuit. Once I've had some time there, I'll make a bid for the American tour."

There are marked differences in Nielsen and Burch's games. Iowa Coach Chuck Zweiner says Nielsen is the longer driver of the two and a better player around the green. But, Burch is just as consistent, Zweiner adds.

"Nigel is a good striker of the ball and straight off the tee," the Iowa coach said. "He has to gain the experience, but his consistency should begin to pay off."

Burch said he believes American golfers are better due to youth programs. "In England, we start playing soccer and rugby at an early age, and golf isn't as widespread in the high schools

Former Iowa golf standout Nigel Burch, a native of Essex, England, graduated from the UI in December and says his memories of golf in Iowa are good with the exception of his being denied entry in last summer's State Amateur tourney.

## Stern test awaits Counsilman

Continued from page 4.

deciding an early end to this year's conference race, the only question left is who will claim runner-up honors?

"Michigan should give us a real battle in this year's meet, and I think you'll see a real fight for third place between Ohio State, Wisconsin and an improving Iowa team."

And the national crown?

"I'll have to put my money on USC, because they're loaded with talent again this year," Counsilman said. "In fact, the Trojans should have walked away with the title last year (which was won by Tennessee). They more or less defaulted due

to illnesses and injuries."

For a guy who already has a picture of the immediate future, not to mention an abundance of records and championships, the only challenge that remains for the 58-year-old architect of Indiana's success is a September engagement with the English Channel.

"I enjoy swimming, but unless I have a target to shoot for, it's hard to train everyday. So I've decided to try and be the oldest person to swim the channel," Counsilman said. "I've been swimming 6,000 yards a day since last summer in preparation and I've received a lot of advice from people who have already swum the chan-

nel.

"The biggest problem will be the cold and the weather. My doctor said I should get up to 220 pounds (from his current 200 pound frame) to guard against the cold. And I'm scheduled to do an eight-hour swim in February in the pool," Counsilman added.

"They say only one in 40 is successful in swimming it. If I'm successful, great; if not, I'll have a good time trying."

And with all of Counsilman's past records and achievements, there seems little doubt that he'll succeed with yet another victory with his September opponent.

## On the Line with the DI sports staff

It's time to hang up the old On the Line logo for the final time this season but before we do, the Daily Iowan Sports Staff must reward Dan Anderson of 4190 Burge for a great effort in the final contest.

Anderson did quite a job picking the winners of 15 bowl games, rolling up a 13-2 record. His only real miss was the Pittsburgh-North Carolina State battle while everyone missed the 10-10 tie between UCLA and Arkansas in the Fiesta Bowl. For his efforts, Anderson can present an ID and pick up a six-pack of his favorite brew from Ted McLaughlin's First Avenue Annex.

Right behind Anderson came Dan Esbjornson, Richard Hall, Jerry Wilske, Mark Hildebrand, Andy Piro and Bill Molis with 12-3 records. The second-place finishers can pick up an Animal House poster at the DI sports

desk any time after 2 p.m. Tuesday.

For all you losers out there, don't feel bad because the bowl season was costly for another man we all know and love in Iowa City, Woody Hayes. Woody thought he'd take matters into his own hands by trying to force a Clemson player to fumble the ball with a swing, but it didn't work out too well and Earle Bruce has since moved on to Columbus.

And finally, in the personal battle between Sports Editor Steve Nemeth and Assoc. Sports Editor Howie Beardsley, it looks like Nemeth will have to come up with a six-pack for Beardsley, who edged his boss in the fight for DI prognosticating ability.

Well, so long until next year. We hope you all had as much fun as we did with On the Line. For all you losers, maybe next year, as the saying goes.

## Trackmen place at Wisconsin

Iowa's contingent in the Wisconsin Track Classic failed to bring back any titles, but the meet provided a warm-up for the Hawkeyes a week before their official season opener with Western Illinois.

The Hawks were led by the second-place performances of tri-captains Joe Paul in the three-mile and Curt Broek in

the pole vault. Paul ran 14 minutes, 22 seconds, with teammate Rich Fuller fifth in 14:38.

Broek cleared 15 feet, three inches, as did teammate Randy Clabaugh, who took third.

Also capturing a third place spot was Randy Elliott in the 60-yard high hurdles. He was clocked in 7.6 seconds in a

photo-finish.

In other field events, Jim Cahalan and Pat O'Connor were fifth and sixth, respectively, in the shot put. Charles Jones failed to make the final of the long jump, while high jumpers Pete Hlavin and Andy Knoedel cleared 2.00 meters (6-6 $\frac{3}{4}$ ) and 1.90 meters (6-2 $\frac{3}{4}$ ), respectively.

Three former Hawkeye standouts placed high in the open mile, with John Clark claiming a 4:06.1 victory. Asst. Coach Jim Docherty was third (4:06.9) and Gregg Newell was fourth (4:07.5). The Iowa women run Friday at Columbia, Mo., while the men host Western Illinois at 1 p.m. Saturday at the Rec Building.

### WANT INSTANT RESPONSIBILITY?

Being a missile launch officer in the Air Force is an awesome responsibility. But it's an exciting job with leadership opportunity from the word "go."

Air Force ROTC can help you prepare for this exciting field by granting two, three or four-year scholarships. These will pay for tuition, books, and lab fees, and give you \$100 a month for some of your other college expenses.

Then, if you can qualify for the missile field, you can work on an advanced degree through special graduate education programs, and the Air Force will help with the expenses.

If you're the type who's looking for an exciting future, a future of commitment and pride, look into this one. See if you qualify to be an Air Force missile launch officer, and help perpetuate the traditions that have made our country great.

Get the details right away. You'll be glad you did.

A 2-year AFROTC scholarship is immediately available to qualified science or engineering major with two years of undergrad or graduate study remaining and a cumulative GPA of 2.5 or higher.

Contact us today at Rm 3, Fieldhouse Armory or call 351-3937 for details.

# Dispute continues over six-player rule

By CATHY BREITENBUCHER  
Staff Writer

Despite the ruling last month by the Department of Health, Education and Welfare (HEW) that six-player girls basketball is not discriminatory, Peg Burke is continuing to battle the powers that be for a change in the traditional Iowa sport.

Burke, head of the UI department of women's physical education and dance, called six-player basketball "a game based on old men's assumptions of young women's athletic abilities."

HEW Secretary Joseph Califano announced that the government was dropping the threat of action against states using the six-player rule (Iowa, Tennessee, Oklahoma and Arkansas) to avoid detracting from HEW's other efforts to end sex discrimination in athletics and other educational programs. The department is responsible for implementing Title IX of the Educational Amendments Act of 1972.

"I found the HEW announcement to be both good news and bad news. If it had banned six-player basketball, there would have been an

uproar over federal intervention. I would hope the decision to change to five-player basketball would be an educational decision. The issue now rests with the educators and the Department of Public Instruction — they must take a look at the game and determine whether it is discriminatory," Burke said.

Burke, who has served on panel discussions with E. Wayne Cooley, executive secretary of the Iowa Girls High School Athletic Union (IGHSAU), and top high school coaches from around the state, has statistics which she thinks prove that the game disadvantages Iowa girls.

Scholarships awarded to Iowa basketball players have steadily declined over the past several years. The number of women signing national letters of intent increased 29 per cent in 1977-78 from the 1976-77 school year. Scholarships to basketball players increased by 33 per cent.

While nearly the same number of Iowa high school girls in all sports signed letters of intent both years (84 in 1977 and 85 in 1978), basketball signees decreased from 44 to 27. Texas and Tennessee, other six-

player states, showed similar declines while the other two six-player states (Oklahoma and Arkansas) show great fluctuations over the past few years. Among the five-player states Burke surveyed, Michigan, Indiana and California showed sizable increases in the number of basketball signees for that period.

Of the 28 Iowa preps who signed scholarship letters, 23 were forwards. Women's college coaches around the state, including Iowa's Lark Birdsong, have said they won't recruit Iowa girls, particularly guards, in the future. "You just

don't recruit defensive players. It takes some of them three years to adjust to five-player basketball," Birdsong said.

Many supporters of the six-player game cite the strong fan interest in the game and high attendance figures at state tournaments. But, Burke noted, the Iowa program is well-established and many other states have held tournaments for only a few years. Indiana, for example, drew a capacity crowd of 9,617 fans to the title game of the 1977 tournament — only the second-ever state meet. Minnesota, also in its second year, attracted 9,406 fans to the championship game. Illinois

and Nebraska, both in their initial year of state playoffs, drew about 6,000 ticket-buyers to the final game.

But the IGHSAU contends the basketball tournament is successful enough to finance all the "minor" sports. "Let's assume that is true. Then the Iowa girl is being exploited in basketball and is providing opportunities for girls in other sports. This is especially true of the Iowa guard, because she has practically no opportunity to proceed in her sport," Burke countered.

Burke sees several keys to getting the Iowa rules changed: grass roots support for five-

player basketball, more female influence on the IGHSAU, and a change in the attitudes of coaches and administrators. "If the women's pro league succeeds, Iowa people will see the skills in five-player basketball. And, some parents of girls who aren't getting college scholarships are going to become agitated. College is getting more expensive, and many parents need scholarships for their children," she said.

"Wayne Cooley is the real key," Burke continued. "He's got the influence throughout the state. The whole structure of the Union is so male-dominated

that it's almost impossible for women to get any influence. Those on the Union are school superintendents or his designee, and there aren't many women superintendents. Even coaching is dominated by men (83 per cent of the girls basketball coaches in the state are men)."

Burke disagrees with the attitude of some who put female athletes on a pedestal. "The book *Only in Iowa* was practically commissioned by the Union and it emphasized the Iowa player as a queen. Well, a queen is someone who acquires her position by birth and the Iowa girl is anything but a

queen — she gets to the top by having distinct abilities in athletics and through hard work."

She said the HEW decision not to pursue the issue places the responsibility for studying the pros and cons of six-player basketball with the Iowa Department of Public Instruction. "The schools are being inequitably used by gender," Burke said. "The HEW says girls can gain the same benefits as boys (scholarships, advanced competition, etc.) through athletics, but the Iowa school systems are teaching outdated skills."

## Road meets off due to weather

The weather proved to be the dominating foe of the women's gymnastic and swim squads this weekend as limited travel across the Midwest forced the cancellation of each team's meets.

Neither team departed from Iowa City Friday due to forewarnings that travel was limited. The Hawkeye swimmers were unable to make their destination for a bout with Ohio State Friday evening because of the difficulty in obtaining a flight out of Chicago's O'Hare Airport to Ohio. In addition, the tankers were also forced to cancel a

Saturday evening dual meet with Miami of Ohio.

Coach Tapa Haronoja's gymnasts found travel to the west no less troublesome as the team was forced to withdraw from Saturday's triangular meet with South Dakota State and Manitoba in Brookings, S.D.

The meets were the first on schedule for both teams since mid-December. Each squad will make another attempt at a road trip Saturday with the gymnasts scheduled at the Windy City Invitational in Chicago while the swim team will try to travel to Southern Illinois.

## Sportscripts

### Outdoor program deadlines set

The UI Rec Department has announced deadlines for the first activities in this semester's outdoor program.

Anyone interested in a Sundown ski trip scheduled for Feb. 1 must sign up in Room 111 of the Field House by 9 a.m. Jan. 22. Cost will be \$12 for individuals with their own skis or \$18 for those without equipment.

The ice climbing, dog-sledding and timber wolf expeditions, slated for Feb. 23-25, also have a Jan. 22 sign-up deadline. Total cost for each trip is \$58.50. The Rec Department advises everyone interested to sign up as soon as possible since there is limited registration.

Introductory meetings for the white water kayaking trip are scheduled for Jan. 30 and 31 at 7 p.m. in Room 125 Trowbridge Hall. General information and a slide show will be presented.

### Rec Services offers lesson programs

Jan. 22 is the sign up deadline for Hatha Yoga, Shorin-Ryu Karate, Tae Kwon Do and UI Tae Kwon Do Club lesson programs. Final sign up for youth-adult gymnastics and pre-school gymnastics is set at Jan. 23. Information on costs and class times is available at the Recreation Office (Room 111, Field House), where registration is also taking place.

A Tae Kwon Do demonstration is slated for Jan. 24 in the UI Field House at 7:30 p.m. The public is welcome and there is no admission fee.

### Tennis league sign-up begins

Tennis tournament entry blanks are available at the Recreation Building with Jan. 31 set as the tentative deadline. Men's singles, women's singles and doubles, plus mixed doubles competition will begin after Feb. 1.

The Rec Services department will once again offer a babysitting service. For more information, contact the Rec Services office (Room 111, Field House) or call 353-3357.

### Intramural leagues being formed

Entry blanks are available at the Intramural Office (Room 111, Field House) for IM wrestling, track and field meet, arm wrestling, racquetball doubles and men's table tennis singles.

All IM wrestlers will weigh in from noon to 7 p.m. on Jan. 29 with competition beginning Jan. 31.

The IM department will accept entries until Jan. 25 for basketball league competition.

## Officiating Jobs

Intramural Basketball Officials  
no previous experience necessary  
All students are welcomed
