### Regents give go-ahead to plan arena

By TERRY IRWIN  
and CATHY BREITENBUCHER  
Staff Writers

CEDAR FALLS — The state Board of Regents Thursday night gave UI officials the go-ahead for continued planning of a "Hawkeye Sports Arena" project.

In a special informational meeting held on the University of Northern Iowa campus, UI officials, including President Willard Boyd, made it clear to the regents that they were presenting "concepts," not final plans. But they offered some preliminary proposals, including how to finance the \$21.7 million project.

"We are floating a general idea. This is not necessarily the final idea," Boyd said.

Although the design of the arena has not yet been determined, Edward Jennings, UI vice president for finance, said it probably will be built across Woolf Avenue from the UI College of Dentistry parking lot, approximately 400 yards northwest of the Recreation Building.

The \$21.7 million price tag includes not only the design and construction of the arena, but also the cost of building adjacent parking lots, an access road and remodeling the Field House for recreation space.

Jennings said funding for the project will come from five sources:

- \$12 million (55 per cent of the total cost) in revenue bonds, supported equally by mandatory student fees and increased non-student ticket prices for football, basketball and wrestling events;

- \$7 million in private contributions;
- \$1.1 million in road funds from the Iowa Department of Transportation;
- \$1 million interest earned on short-term UI investments; and
- \$600,000 in UI parking fees.

Jennings said that within the next two months the UI Foundation will complete a fundraising feasibility study to determine the best method of raising the private funds.

Regents President Mary Louise Petersen said, "One of the things that I'm most enthusiastic about is that the students, through their fees, are participating with about one-third of the cost, and they're gaining recreation space as well as participation in intercollegiate athletics.

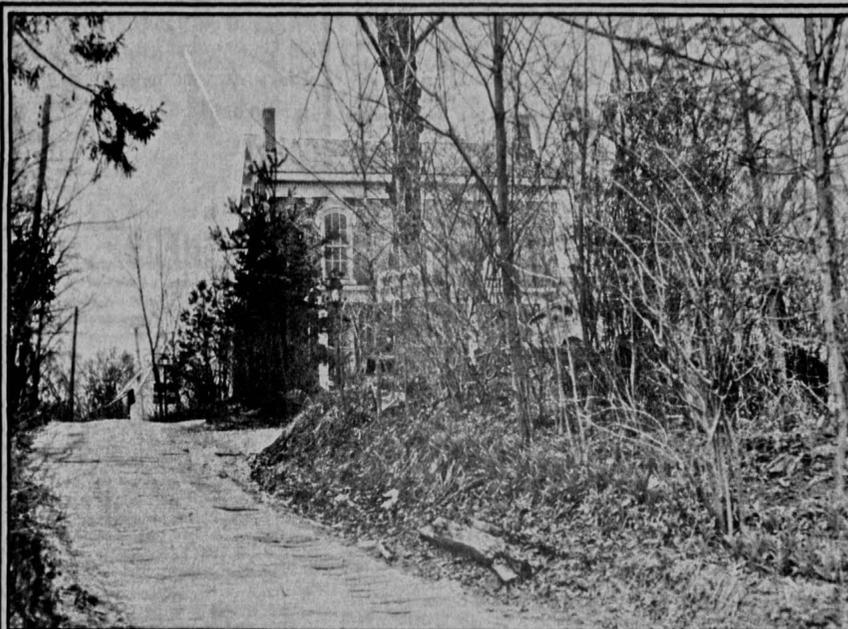

"The people who attend the events — faculty, staff and the public — are going to put in approximately one-third of it. And for the alumni who are proud of the institution and would like to improve its excellence, this is an important part of it, and they also have about one-third," Petersen said. "So we tried to hit all of the various aspects of participation in it, and everyone has an equal kind of share. And I think that it is an equal kind of dividend for the investment."

Jennings said Wednesday he hopes construction of the arena can begin this fall and that the facility will be completed in time for the 1980-81 winter sports season.

As part of the arena proposal the UI presented plans to expand recreation areas with an emphasis on outdoor playing space.

Jennings said the recreation fields now near the arena site will be rearranged to provide a new flag football field in addition to the seven football fields and one soccer field currently in that area which will be added to four of the football fields, Jennings said.

Other recreation fields, he said, including space for intercollegiate softball and field hockey, and club sports, will be constructed at the northwest end of the lower nine of old Finkbine.

### Is it 'lights out' for Gaslight?

By ROD BOSHAUT  
Staff Writer

The owner and tenants of Black's Gaslight Village have undertaken an all-out effort to bring it into compliance with the city's housing code, but they say they will need more than 30 days to make the necessary improvements.

At a hearing Wednesday, Frances Black and approximately 40 of the village's residents requested that the Iowa City Housing Appeals Board grant them an extension on a 30-day notice of intent to placard due to the complexity of the improvements and weather delays.

The notice to placard, tantamount to seeking condemnation, was issued by city inspectors on March 12.

W.H. Bartley, Black's attorney, asked the board to allow a period of at least 60 days to improve the 45 violations cited by the inspectors, 90 per cent of which have already been brought into compliance at a cost of \$27,115, he said.

"This is not a case where someone is attempting to circumvent the housing code or defy the city's authority," Bartley said.

However, Assistant City Attorney Robert Bowlin requested the extension be denied at the hearing's outset because of the serious nature of the violations.

The violations cited by the city in a series of inspections since February 1978 include the lack of a second exit from several of the apartments, insufficient floor and window space, inadequate ventilation, windows that do not open, plumbing and wiring deficiencies and other violations.

The board agreed to hear both sides first before considering a possible extension of the time period. After listening to more than four hours of testimony, the board decided to adjourn and resolve the issue at 7:30 p.m. April 26.

If the board rejects the appeal filed by Black and 61 tenants, the village, which has been a haven for artists, writers and regular students for more than 20 years, will face condemnation

and its tenants will face eviction. Bartley told the board that if such action is taken, the owner will seek to block the condemnation and to resolve the issue in court.

"It approaches absurdity to expect that the city could find mechanisms to evict or keep these tenants from occupying their quarters for the remainder of the school year. It's not

practical," Bartley said. But Bowlin, in asking that the request for a continuation be denied, said, "We feel a hearing before the board at this time would be appropriate so the board has information it needs in order to determine whether the notice of intent to placard will be upheld." Bowlin said the city has a responsibility to protect the safety and welfare

### Growth slows, inflation rises in 1st quarter

WASHINGTON (UPI) — The nation's rate of economic growth slowed abruptly while inflation increased during the first three months of this year, the Commerce Department reported Thursday.

The gross national product — the value of all goods and services produced in the country — grew at an annual rate of only 0.7 per cent during the January-March period after adjustment for inflation.

That compared with 6.9 per cent growth during the last three months of 1978. But throughout the entire economy, inflation rose at an annual rate of 8.7 per cent in the first three months of the year compared to 8.2 per cent for the previous three months and 7.4 per cent for all of 1978.

The administration was expecting a slowdown and even wanted one during 1979 because it considered the recent growth too rapid for the health of the economy. It did not expect such a sharp slowdown.

"This rate of growth is below most projections made for the early part of the year," said Commerce Secretary Juanita Kreps. "It is a slower pace than we expected. I think most people were projecting something around 2 per cent for the first quarter."

But she said it does not portend a recession — the administration expects a temporary pickup in the second three months of this year, and it forecasts economic growth a little over 2 per cent for 1979 as a whole, compared to last year's 4 per cent.

Federal Reserve Board Chairman G. William Miller said he believed the new statistics "are consistent with my feeling that the first quarter would show the slowdown that we need."

Miller said the economy may "bounce back" during the April-June quarter, but that he would be watching closely to make sure the recovery is not too strong.

"If that bounceback means a GNP growth of less than 2.5 per cent, then I think we're in good shape," he said. "If it should show more strength than that then we would have to seriously consider some further restrictive monetary action."

The administration believes a growth rate around 2 per cent offers the best chance of gradually reducing inflation without tipping the country into a recession which could throw millions of Americans out of work.

Kreps was more concerned about the inflation figures for the first three months of the year. She called that "our major concern."

Although inflation remains much too high, she said, "there are good reasons to think that the worst of it may be behind us." Much will depend, she said, on how well the public cooperates with President Carter's voluntary wage-price guidelines.

Kreps told a news conference she sees these economic trends ahead:

- Consumer spending will probably continue moderate growth, somewhat slower than the growth in incomes, which would allow for a further rise in the rate of personal saving.

- Home construction may rise further in coming months but will fall considerably short of last year's pace during most of 1979.

- Energy prices will continue to rise.
- Farm prices have begun to slow substantially, and this should show up in grocery stores in a month or two.

### Price of gas breaks \$1 barrier in Hawaii

By United Press International

Gasoline has broken through the \$1 barrier in Honolulu, where a full service station is charging \$1.02 a gallon for premium leaded — the highest pump price in the nation, UPI's weekly Gas Watch survey showed Thursday.

The H & C Texaco station in Honolulu is using a 90-page booklet issued by the state to compute the \$1.02 a gallon price since its pumps are calibrated to compute only up to a three-digit limit of 99.9 cents. A car wash comes with the \$1-plus gasoline.

At the other end of the price spectrum, a pump-it-yourself station in Dallas had the best bargain anywhere of 65.5 cents for regular leaded gasoline.

A spot check of service stations around the country found gasoline prices had jumped in the past week by 5 cents a gallon in northern Indiana, 4 cents in Florida's Miami area, 3 cents in Louisiana, 2.5 cents in Rhode Island, 2 cents in Utah and New York, and more than a penny in Iowa.

Consumer complaints of price gouging escalated, and the Energy Department slapped subpoenas on two Manhattan service stations suspected of overcharging at the pump.

"Since Christmas, prices have gone up 10 to 11 cents a gallon," said a spokesman for the Automobile Club of Rhode Island.

"The problem we're finding is that the

people least able to afford the product — the blue collar family with a three- or four-year-old car and the elderly — are hit the hardest."

In Nebraska, however, the price of regular unleaded dropped by four-tenths of a cent in the last week — the only state in the survey to report a let-up at the pump.

Full-service prices for regular leaded gasoline ranged this week from a low of 70.9 cents a gallon at a small grocery store in Des Moines, Iowa, to 95.9 cents in Honolulu.

Regular leaded could be found at self-service outlets for as little as 65.5 at the Dallas station with the cheapest price in the nation and as much as 83.9 cents a gallon in San Francisco.

Iowa also had the unbeatable buy of 74.9 cents a gallon for regular unleaded at several full-service stations around the state.

### Briefly

#### Anti-nukes to rally

Anti-nuclear activists are hoping up to 1,000 protesters will converge on Cedar Rapids and Palo for the anti-Duane Arnold nuclear plant rally scheduled for Saturday.

Mobilization for Survival spokesperson Jim Schwab said the rally will begin at 10 a.m. in Greene Square Park in Cedar Rapids and include a march to Iowa Electric Tower and a car and bike caravan to the Palo plant in the afternoon.

In a statement and in petitions, protesters will present four demands:

- close the Palo plant forever;
- do not charge shutdown costs to Iowa Electric ratepayers;
- no more nuclear plants in Iowa; and
- redirect energy policies away from reliance on nuclear power and toward greater support for alternative energy sources and conservation.

#### Airport Commission pays consulting bill

The Iowa City Municipal Airport Commission voted Thursday night to approve payment of \$8,699 to the L. Robert Kimball consulting firm for its work on the airport's master plan.

The bill, 90 per cent of which will be paid by the Federal Aviation Administration, will now be submitted to the FAA for review and approval.

The payment to the Kansas City firm for its work on the first phase of the master plan had generated a good deal of controversy because the Airport Commission was not satisfied with the consulting firm's report.

But Thursday night a majority of the commission agreed, on a 3-1 vote with one abstention, that "legally the firm should be paid" for the work completed to date, regardless of whether it is satisfactory.

Commissioner Jan Redick said that

she felt there had been a lack of responsiveness from the consulting firm's representative, Dave Byers, and that he had not made himself available to hear commission suggestions and had not supplied an adequate number of the firm's reports to the commission.

But Bob Baumgardner, the new Kimball representative, said Byers had been pulled off the job and that the firm hopes to be able to start working more closely with the commission.

#### Senate kills support of UI stock divestiture

The UI Student Senate Thursday night voted 13-4 to rescind a resolution passed last month supporting divestiture of all the UI's stock in corporations with interests in South Africa.

Proponents of rescission said the UI could exert more influence by keeping the stock and voicing opposition to South Africa's apartheid government at shareholders' meetings.

"We are attending meetings and voting in person," said Phillip Jones, associate dean for student services. "We do believe that is the most reasonable position for the university to take at this time."

Supporters of rescission also argued that anti-discrimination resolutions brought before those companies, have had some success in curtailing corporate operations in South Africa.

Sen. John Moeller disagreed, saying shareholders have little power in influencing management.

"The only shareholder resolution that passes is the one supported by management, and that's the only one that will ever pass," Moeller said.

The African Liberation Support Committee will hold a campus-wide referendum April 26, testing student support for divestiture.

#### Iranians reconcile

TEHRAN, Iran (UPI) — Ayatollah Ruhollah Khomeini Thursday won a new pledge of allegiance from Tehran's pow-

erful Moslem leader and met Prime Minister Mehdi Bazargan to resolve a rift within the government.

Bazargan took his entire Cabinet to the holy city of Qom, 80 miles south of Tehran, for discussions with Khomeini that one newspaper said would "form the future and immediate policies of the executive machinery."

Tehran Radio reported the meeting in a brief announcement Thursday night, but made no mention of the topics discussed.

#### Lebanese Christians secede, hit U.N. post

By United Press International

Hours after declaring a strip of southern Lebanon a "free state," Israeli-backed Christian militiamen Thursday poured rocket, mortar and machine gun fire on the headquarters of the United Nations peacekeeping force.

Six Irish troops and two Dutch captains

were wounded in the action, which the U.N. denounced as a "very heavy, unprovoked attack" by the militiamen.

Militia attacks Wednesday killed one Norwegian U.N. soldier and wounded another.

#### Weather

Several of you have taken the opportunity in the last week to call us up and commend us on bringing spring to the Paris of the Prairies. While we appreciate your sentiments, we are not allowed by the canons of weather journalism to accept your accolades. (Besides, what would Paris be without a spring? Just another prairie town, that's what.) But we do know how to show appreciation: We're going to end the spring showers today, hold the temperatures at 60 throughout the weekend, and give you clear skies by tomorrow. And, to show our appreciation further, we're going to leave you with this thought: What melts in the ground, not in your mouth? (Hershey, Pa.)

## Ginkgo gouging

TALLAHASSEE, Fla. (UPI) — Thirty-three years ago, Mary G. Council bought a small wood-frame duplex two blocks from the state Capitol, planted a rare ginkgo tree in the backyard and settled down for life.

Now she finds her property is part of a section on which the state plans to put a new district court building.

The 87-year-old widow has been given until June 30 to move.

But she'll be leaving with the satisfaction of knowing she made the state meet her asking price of \$67,045, which was about 10 per cent above the appraised value.

Secretary of State George Firestone termed her "a very tough bargaining woman," and Comptroller Gerald Lewis — who agreed to go over the appraised price only because a long court condemnation proceeding would cost even more — said "she's got us over a barrel."

"It's made me real nervous, real sick," she said Wednesday. "The state shouldn't be able to walk into someone's yard, order them to sell and tell them how much it's going to pay for the land."

Her home is the last privately-owned house on the block, and she loves it.

"I feel like I can almost reach out and touch the Capitol," she said. "I can walk to church, to the stores and the courthouse. Best of all, the (Florida State) students walk by here on their way to town and they stop and talk to me."

"I love the students," said Council, who lives alone and gets a small income from renting the other side of her house.

She's also sick at the thought of losing her rare Chinese tree, which has grown from a 24-inch sprout to a magnificent tree reaching 70 feet into the sky.

"It's one of the oldest kind of trees in the world and I've begged the state to save it, but it probably won't," she sighed.

## Off again

SALEM, Ore. (UPI) — John and Greta Rideout, whose conflicting tales of marital violence made international news, were granted a divorce Thursday.

The petition for divorce, submitted by Greta Rideout, cited "irreconcilable differences which have caused an irremediable breakdown in the marriage."

The Salem couple were adversaries in the nation's first trial of a husband accused of raping his wife while they were living together. John Rideout was found innocent.

Both Rideouts said they were relieved to get the divorce over with. In separate interviews, they both said they are on friendly terms and hold no hard feelings toward each other.

Marion County Circuit Judge Albin Norblad accepted the terms of a settlement presented by Rideouts' attorney and said he would sign a decree making the divorce final after ruling on who should pay \$18,000 in attorney's fees accrued during the couple's husband-wife rape trial last December.

The divorce and child custody hearing lasted five minutes and attracted fewer than two dozen spectators, including the coproducers and writer of a television movie being put together about the Rideouts and the rape trial.

According to terms of the settlement, Greta Rideout will have custody of Jenny Maria, the couple's 3-year-old daughter. John Rideout will pay child support of \$50 per month and receive liberal visitation privileges.

The couple's debts of \$800 are to be split. Greta Rideout originally filed for divorce in October 1978, three days after she claimed that her husband raped her. He was acquitted of the charge by a jury Dec. 27, 1978.

The couple reconciled Jan. 6, but broke up again March 29. Two days later, Greta Rideout's attorney asked the court to set the divorce date for trial.

# SALT verification doubts must be resolved: Culver

By ROGER THUROW  
City Editor

Sen. John Culver, D-Iowa, said Thursday it is imperative that doubts surrounding verification of Soviet compliance be resolved before a new Strategic Arms Limitation Treaty is submitted to the U.S. Senate for ratification.

The debate over SALT II has picked up recently with reports that the treaty contains a number of unverifiable provisions and because the turmoil in Iran has deprived the United States of its surveillance stations on Iran's Soviet border.

"There is no magic agent with which one can verify that the other side is complying, and this is made more difficult by Iran," Culver said at a colloquium sponsored by the UI History Department. "The problems of verification are staggering. We'll be hearing a lot more about it."

Culver said the United States "has a whole medley of methods to verify, and so does the Soviet Union. But it is extremely difficult to have a fool-proof system. We can have an adequate system, but adequate is like beauty — it is in the eye of the beholder."

Culver said that those people who criticize SALT II, which would limit U.S. and Soviet long-range bombers and intercontinental ballistic missiles until 1985, should first ask, "What would the world be like without SALT II?"

"SALT II from many idealistic vantage points is flawed, but compared to what? To no agreement?" Culver asked.

"Without SALT, you don't have any verification. If we didn't have any treaty, as far as verification, all bets are off. Then either side can do whatever they want, and the Soviet Union has a lot of room for that," he said.

"Both sides perceive SALT to be in their interest, or they wouldn't get in it," he continued. "We do not rely on trusting the Soviet Union in this agreement. You don't need an agreement

with those you trust. You do need a treaty for verification."

Culver said the climate that prevails concerning U.S.-Soviet relations at the time SALT II is presented to the Senate will "inevitably permeate" the Senate's consideration of ratification. And one aspect of that climate will be current Soviet behavior in other parts of the world.

"There will be efforts with varying degrees of rationality to link the ratification of SALT with Soviet policy in other areas," he said.

"But in my judgment, we accept or reject SALT on one standard: Is it in our national security interest to do that? If it is, then approve it; if it isn't, then reject it. It doesn't matter a hoot what the Soviets are doing in other areas," Culver said.

Culver said the United States should not get itself into a position where ratification of SALT is used as either reward or sanction for Soviet behavior.

"Two can play at that game," he said. "Their checklist of our naughty moves is just as long as our checklist of their naughty moves."

Culver, who is up for re-election in 1980, said he is concerned about the government's failure to link the U.S. defense program to the nation's foreign policy objectives, rather than military goals.

"We have an independently driven defense policy, based not on rational calculation of foreign policy goals but on military goals," he said.

"No one is under the illusion that SALT II will eliminate serious defense efforts by the United States," he added. "It's not a magic panacea. But it will discipline that effort and competition."

"It will maintain and stabilize the arms race and eliminate uncertainties and risks. Both the Soviet Union and the United States are soberly impressed with the capability to destroy each other — many times over."

# Carter attempts to placate liberal SALT treaty critics

WASHINGTON (UPI) — President Carter has assured three liberal senators in writing that the emerging SALT II accord will not spark a new strategic arms race with Russia.

But it appeared the three remain unconvinced — retaining prospects the treaty might be battered from both left and right in Senate ratification debates.

Disclosure of Carter's effort to placate liberal treaty critics came as Secretary of State Cyrus Vance and Soviet Ambassador Anatoly Dobrynin resumed SALT II negotiations with a one-hour meeting Thursday — their 18th meeting this year. Vance and Dobrynin will meet again at 1 p.m. CST today.

State Department spokesman Tom Reston said the two officials talked mostly about SALT but did not discuss when and where Carter and Soviet President Leonid Brezhnev would hold their first summit meeting. U.S. spokesmen suggested more than mere technical details remain to be cleared up before the second-stage Strategic Arms Limitation Treaty is ready for signing.

In his personal letter dated March 21 and released Thursday, Carter was trying to talk Sens. Mark Hatfield, R-Ore., William Proxmire, D-Wis., and George McGovern, D-S.D., out of their threat to vote against SALT II.

Those three last month opened a breach in what had appeared to be solid liberal support for SALT II. They said U.S. negotiators were weakening prospective restrictions on nuclear arsenals too much in their efforts to please conser-

vative, defense-oriented senators and military men.

The emerging pact, they said, contains loopholes that will allow the nuclear arms race to continue unabated.

"I assure you," Carter said in his letter, "that, if the agreement is ratified — as I expect it will be — I will not permit the result to be a new strategic arms competition."

"Rather, I will move with increased energy to seek even more restrictive limitations in all those weapons areas in which we and other nations carry on needless and wasteful competition."

Despite Carter's assurances, Hatfield told the World Affairs Council in Portland, Ore., Wednesday he remains dissatisfied with the provisions of SALT II.

"The alternative is to move directly into SALT III negotiations and force the SALT process to meet head-on the enormous challenge that confronts us," he said.

It was understood Proxmire, too, remained dissatisfied even though he feels Carter is sincere in his dedication to arms limitations.

# Blevins claims 'expression' at pie-throwing hearing

By TOM DRURY  
Staff Writer

Barbie Blevins testified Thursday that she was making a statement against sex discrimination when she threw a pie at Iowa City Manager Neal Berlin on January 26.

The pie-throwing occurred at a press conference called so Berlin could give the city's reasons for not allowing firefighter Linda Eaton to nurse her son on duty.

"Only when I saw that Neal Berlin was going to brush off any questions pointing out that this was indeed sex discrimination did I decide to throw the pie," said Blevins, a third-year UI law student.

The incident resulted in Blevins' immediate arrest for alleged disorderly conduct; testimony in the case was heard Thursday by City Magistrate Emmet George.

Blevins' attorney, Nancy Baumgartner, a third-year law student with Student Legal Services, said Thursday that the city ordinance used to prosecute Blevins is "unconstitutional on its face, and as applied." She said the 25-year-old student is "being criminally charged for expressing her political views."

"Anyone who was present would agree there was a message intended in her actions," Baumgartner said.

The city statute in question reads, "Any person who willfully and knowingly acts in such a way as to disrupt any lawful assemblage or gathering of people is guilty of disorderly conduct."

Baumgartner said the law has "a chilling effect on First Amendment rights" and "does not put a reasonable person on notice as to what kind of action would break the law."

Using these arguments, and saying that a state disorderly conduct statute not mentioning "interruption" preempts the city ordinance, Baumgartner has filed a motion to dismiss the charge.

George took the motion under advisement and gave the parties until April 25 to submit briefs on the preemption question, which has not been previously addressed. After the briefs are filed, George will rule on whether to dismiss the charge, and, if necessary, rule on Blevins' guilt or innocence.

During opening remarks, Baumgartner stressed that "the acts of the defendant were expressions of dissatisfaction with the city's position and that right for her to express those views should not be criminal."

But Assistant City Atty. and prosecutor Angela Ryan said, "Any expression element in the throwing of missiles is incidental." And, she asserted, "A reasonable person should know that an attempt to prevent the city from communicating with its citizens through a press conference is a prohibited activity."

Ryan said, "It is tempting to view her conduct as a harmless prank. However, on January 26, Ms. Blevins was an angry stranger who came forward out of a crowd in a tense atmosphere and hurled a missile at a city official in an attempt to keep him from speaking."

"Mr. Berlin had no way of knowing what

violence she was capable of as she approached. From the point of view of the victim, it makes no difference if your assailant has lofty First Amendment motives or black motives; the danger and the possible injury would be the same," Ryan said.

Ryan told George that he was sitting in the spot where Berlin had stood — the press conference and trial were both in the Civic Center Council Chambers — and noted that there were persons in the audience.

"If they are armed with symbolic speech, do they have a right to throw it at you?" she asked.

Berlin testified that when he saw Blevins with the pie, "I immediately moved toward the exit. I ducked as quickly as possible as she heaved the pie."

He said he was out of the Council Chambers for several minutes and that after the pie was thrown "there was a great deal of confusion" due to the media members and equipment packed into the front of the chambers.

Todd Meyer, who in January was employed by KCCJ radio and now is employed by WMT, testified for the prosecution that "a couple pieces of (media) equipment got knocked over," and said that, with two police officers running up to Blevins through a crowd of media members, there was "a lot of confusion."

But Don Doumakes, former publisher and editor of the short-lived Iowa City *Life and Times*, testified for the defense that the disruption was "minor," no more than two minutes in length.

Doumakes was asked whether Blevins had tried to convey a message with her action. "The message that she related to me," he said, "was that the city's stance on the Linda Eaton case was ridiculous and called for a ridiculous response."

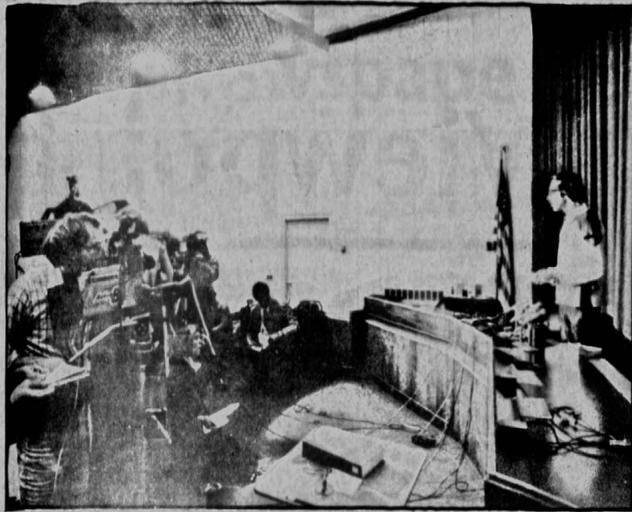

Blevins testified, "I had come to the press conference with the pie. My intentions were to sit there with the pie. As the conference was going on, I was upset because the city hadn't rescinded its position upholding sex discrimination, but in addition they had the audacity to say it wasn't even sex discrimination."

When a reporter suggested that discrimination was involved and Berlin avoided the question, Blevins said, "I decided the only way to express my view and other people's view of the ridiculousness of the situation of upholding sex discrimination was to throw a pie."

"I thought it was worth the risk," she said. Asked after the hearing whether she felt she had disrupted the press conference, Blevins said, "I don't think so. No more than what Neal Berlin disrupted it; no more than the police disrupted it."

Ryan said she was optimistic about the outcome of the trial. "I think we clearly established there was a disruption," she said. Baumgartner, upon completion of the prosecution testimony, moved that the case be dismissed because the city had failed to establish evidence of a substantial disruption. The motion was denied.

Sharon Mellon, the supervising attorney for Student Legal Services who advised Baumgartner during the trial, would not comment on the trial.

In Barbie Blevins' trial for alleged disorderly conduct Thursday, Iowa City Manager Neal Berlin described his version of the sequence of events leading to an unsuccessful attempt to hit

him with a pie: "There was some commotion in the room. I noticed that she was moving through the crowd. She had a pie in her hand, and she was moving up to the rostrum."

"I immediately moved toward the exit."

"I ducked as quickly as possible as she heaved the pie." The Daily Iowan/AP

"The pie landed outside of the doorway, and I returned shortly thereafter."

## Tenants appeal for more time

Continued from page 1.

of the tenants, to which an unidentified tenant responded, "Bullshit."

Leigh Gignilliat, one of three tenants who spoke before the board, said, "If the real purpose of the city ordinance is to protect the tenants, it seems to me the intent of the ordinance is undermined by not granting the extension. In this case, the code isn't working on what it's intended to do."

Brian Donovan, a resident of the village for more than a year, who said he wanted to convey an understanding to the board of what the village meant "in human terms," said, "Whatever the law may define as a family, we are a family and we take care of each other. We protect each other because we love each other."

"The reason we disagree and are so passionate in our disagreement is that we have found there is a community in a deeper sense and an opportunity for truly human living that surpasses what we have ever known before."

"The motion for a continuance must be accepted if Black's Gaslight Village and what it stands for is to survive," he said.

Jim Julifs, a tenant who has done many of the repairs, said the windows in the 130-year-old brick building at 414 Brown St. should not be replaced because the building has been nominated to the National Register of Historic Places.

The board also heard testimony from Eileen Holbrook, 430 Brown St., an owner of adjacent property. Holbrook berated the city officials for "closing down like a bunch of vultures on a widow," and said since Henry Black died in March 1978, Frances Black has made considerable improvement on the four-building complex.

The buildings the city has cited for placards due to code violations are located at 414, 418, 422 and 426 Brown St.

In his staff report, Senior Housing Inspector Bruce Burke also said the village is zoned for duplex and not high-density occupancies and he noted that at least 61 tenants are living in an area zoned for a maximum of 20.

Bartley objected to this reference because it is an unrelated zoning matter to be decided by zoning officials, not the Appeals Board.

Appeals Board Chairman Jerry Smitley agreed and in-

structed the board to consider only matters pertinent to the housing code inspection violations.

Burke said the city will inspect the improvements made since the last inspection and report the findings at next Thursday night's hearing.

# Marvin case points to need for reform in civil law

Lee and Michele Triola Marvin have had done with brandishing their dirty linen for the perusal of all and sundry, and the judge in the case has awarded the plaintiff \$104,000 with which to "rehabilitate" herself. So now that emotions have cooled — assuming they were ever really warmed to begin with — we can sit back and try to determine what effects the case and its results might have for the increasingly institutionalized practice of cohabitation.

It would only be stating the obvious to observe that the Marvin case will lead to a scud of similar cases: A number of similar suits involving entertainment figures are already on the dockets. The Marvin case, being the first such suit to reach an in-court conclusion, will probably act as a guideline to the resolution of other suits. As such, the judge's decision can't really be seen as a victory for either side: Lee Marvin is out a hundred grand, and Michele Marvin, while significantly wealthier than before, got much less than the \$1.8 million she wanted. If the monetary award also acts as a guideline in such cases, the plaintiffs might in fact be better off not suing at all — Michele Marvin's lawyer is going to get a nice little chunk of that award, and so is any other lawyer is this sort of suit.

Nevertheless, the decision to give Michele Marvin some sort of cash award is probably the right one. One might quibble with the way the money was awarded — the judge did not in the end decide whether a contract existed or not, although the small size of the award

would indicate that he thought none did — but that it was awarded at all was an example of justice being done. Michele Marvin entered into her living arrangement with Lee Marvin in good faith, and he just walked away from it after a number of years as if he had no obligations to her. But obligations, financial, personal and emotional, did exist; and while it is in a sense distasteful to assign monetary value to any sort of personal human relationship, Michele Marvin's emotional investment is certainly worth something more than a tip of the hat and a "See ya around, sweetie."

The Marvin case is a good starting point for a general reform in the status of marriage and cohabitory relationships under civil law. The decision in the Marvin case is flawed in several aspects, especially since the basic questions of the existence of a contract and the scope of legal responsibility within such a relationship were left unanswered. But it should be remembered that this type of adjudication is still novel and lacks definite precedents. Until such

precedents are set, or until the law itself is reformed to be consistent with actual current social practices, those questions and more will be left up in the air. And there are enough extant relationships such as that between Lee and Michele Marvin that some answers should be given to those questions soon.

SOMETIMES I THINK THIS WHOLE THING IS GETTING AWAY FROM ME!

## Readers: nuclear debate reopened

To the Editor:

Within hours of the first report of a major accident at the Three Mile Island nuclear plant in Pennsylvania, the news media characterized the future of the nuclear industry as uncertain. The basis of this uncertainty is the acceptability — indeed, the believability — of the nuclear energy proponents' claim that nuclear energy is safe. For years, the debate over the nuclear option has been largely moot due to industry and government guarantees that nuclear energy presents no danger to the well being of the public. While a vocal minority has disputed this guarantee, the general public, mass media and our political leaders have not. As a result, America has committed itself to the nuclear option. Now, in light of the Three Mile Island incident, doubt has arisen. Hence, the debate has reopened.

Ultimately, the resolution of this debate, whether we continue to pursue the nuclear option or opt for alternative sources of energy, will be determined by our policy makers in Washington. The president, cabinet, bureaucracy and Congress will all play a hand in making the critical judgments and decisions concerning the nuclear question. They will ask many questions including: Is nuclear energy safe and economical? Is it the preferred energy option for the future? Are the transportation and waste problems involved in nuclear energy solvable?

While these questions are extremely important and need to be answered, one question which is in danger of going unanswered is: Do the American people want nuclear power? Are the people willing to be subjected to the "risks" involved in nuclear energy production and are they willing to subject future generations to the burden of safeguarding nuclear waste? Each of the technical questions involved in the up-coming re-evaluation of our nuclear policy will be answered by experts on the issue, both pro and con. However, in the end the policy decided on by our elected and appointed officials is a political decision; and as a political decision in our democratic system, it is the people who should hold the final vote. The question is, will they?

Since I feel it is safe to say that the nuclear question will never come up for a vote by the people, and few if any American voters will be called on by our representatives to give their opinion, it is our duty as citizens to let our representatives know how we stand on this issue. It is imperative, during this period of debate, that the voice of the American people be heard; because unless the people's voice is clearly sounded, we will have no choice in the final outcome of the debate.

On Saturday, you, the people of Iowa, will have an opportunity to let your voice be heard. In Cedar Rapids' Greene Square Park, the All-Iowa Safe Energy and Anti-Nuclear Rally will be held to: (1) urge the development of the alternative energy option (conservation, solar, wind and hydro power, etc.); (2) protest the operation of the Duane Arnold nuclear facility in Palo; (3) insure that no additional nuclear plants are constructed in Iowa; (4) call for the stockholders of IE to pay for the proposed rate hikes to compensate for repairs on the Duane Arnold plant.

Your participation in this rally is one way you can voice your choice in the nuclear debate. Each person present will be a vote against the nuclear option and a message to your representative clearly expressing your decision against nuclear power. If you are against taking the risks inherent in nuclear power, the time to act is now, while the debate is still open, not later when the far-off example of nuclear catastrophe represented by Three Mile Island occurs in our back yard at Palo.

## Nukes no panacea

To the Editor:

In response to Glenn Damato's letter of April 10, I must confess it was occasionally amusing; his portraits of anti-nuclear activists were refreshing. His arguments, on the other hand, were a different matter.

Damato's ad hominem attacks on nuclear opponents were unwarranted. When experts disagree on a moral-scientific issue, the discussion is necessarily open to the layman.

## Letters

Criticizing Marta Carson's nuclear knowledge doesn't affect her position on the acceptability of the present risk of nuclear accidents. This is precisely the point the experts disagree on. At the present level of nuclear technology, is society willing to accept the risk of contaminating the population near a nuclear reactor?

Damato's point on the safety of coal mines is well-taken, but is more relevant to a discussion of stricter mining regulations than the nuclear controversy. It is quite doubtful that nuclear power will take the place of fossil fuels as our main power source in the near future. As such, mining must continue for some years, and attempts to make it safer are necessary and commendable. Nuclear power, however, is not a panacea to reduce energy-related deaths. The thousands of deaths in mining accidents must be weighed against the unknown number of deaths in various nuclear emergencies. I stress the word *unknown* because Damato claims the number of fossil fuel-related deaths is greater than those incurred during the normal operation of a nuclear power plant, which may be true. Numerous officials, however, have stated that we have no hard figures concerning the amount of damage a nuclear accident could cause. Fossil fuel power production carries no comparable unknown risk.

Damato claims the number of deaths in nuclear and fossil fuel power production are more than offset by: "The lives they save by providing the electricity required for a technological society and its hospitals, clinics, research labs and industries..." Exactly what Damato means here is difficult to discern. Somehow, the argument leads from electricity to industrial society to its benefits. Electricity does not produce progress, but is merely associated with it.

Damato has confused sign with cause. Reducing nuclear power, or power in general, for that matter, will not result in an increase in the death rate. The industrial revolution cannot be reversed. The idea that developing countries have a higher death rate because they lack energy is unfounded at best. Electricity is not linked to medical technology; chemistry is.

Medical technology, progress in general, or intelligent writing, for that matter, is predicated on research, study and enlightened discussion. Would that all of these were more prevalent in the debate over nuclear power.

Peter Duncan  
514 S. Lucas, No. 11

## Con-fusion

To the Editor:

I have just finished reading a letter in *The Daily Iowan* (April 11) that states various arguments against the use of nuclear plants on Earth. Among the arguments included was the fact "its (nuclear fission) natural home is among the high temperature plasmas of the stars, not on the cool solid surface of the Earth." Well, somebody should inform this person that the sun's power is

from nuclear fusion, one of the cleanest energy sources known to man. Not only that, but the person writing the letter stated, "Nuclear energy is 'unnatural' when it is present on this planet." Maybe I do not know this person well enough, but it seems to me that he takes a grave responsibility when he starts deciding what is and is not natural for this planet.

I am one of the people who believes that not only is nuclear power desirable, but necessary. Everyone knows by now that the world's supply of oil will run out in the near future (a few decades). What needs to be learned is that we must find other sources of energy. According to the letter mentioned above, energy from the sun has no place on Earth. What he failed to realize is that all practical energy forms on this planet trace their origins to the sun's rays.

I will admit that present nuclear facilities are not perfectly safe. However, find one that is. In the meantime, don't hold your breath — you'll run out of air just a little while before the world runs out of energy.

Mark Pelzer  
910 Slater Hall

## Warning ignored?

To the Editor:

I am a student of life. I observe proponents of nuclear energy and their individuality and right of opinion. I am ready to take them in my arms, comfort them and assist them in their need. There ARE going to be many of them who need comfort and assistance, as well as many of my brothers and sisters who realize the deadly, destructive potential of plutonium 239. You see, as people on this Earth, it will take the actual broiling and contamination of flesh brought on by a major nuclear accident before we wise up and shut down atomic power facilities. A warning like Three Mile Island will be ignored.

I know a number of people who are uninformed and basically unconcerned about the energy situation confronting every human being on this planet. The popular American notion is to put off unpleasant problems until we get bit in the posterior. (No wonder other nations get upset with our example: We waste more than they even wish for.) Joe Citizen probably doesn't realize that we, as Americans, have the technology and natural sources of energy such as solar, wind and biomass. Our stumbling block is such a conversion in the rich oil lobby in Washington that would not profit by the good of human interests (they can't own the sun). The public utilities are still forcing nuclear power plants down our throats because they have invested huge amounts of capital — and only now are they starting to realize the astronomical amounts of capital which will have to be invested to maintain and expand atomic capabilities. In short, we will be bankrupt or burned — or both.

In the meantime, we can opt for the lesser of evils: nature and the bountiful energy naturally provided us. (After all, if the sun doesn't come up in the morning, we won't need any energy.)

The best course of action to be taken is to voice our opinion publicly — and what better opportunity than this weekend's rally for anti-nuclear consciousness in Cedar Rapids? If your heart beats, or your lungs breathe, please show up in support. This isn't any game I'm talking about. I'm talking about human lives — yours and mine. You know what you have to do.

# Freedoms voided by religious illogic

To the Editor:

What about national religious cults? To understand the validity of the national religious cult we must understand that national religious cults do have validity, if not universally, at least in their own eyes and in the eyes of their friends and allies. National religious cults are at this moment in several lands quite strong, in some cases ruling powers. The people, whether oppressed or no, form the basis of support political activity needs in order to proceed, and thus they must accept and even be proud of their own governance; they must give the national religious cult its validity by composing it. This they do.

Perhaps these people are making comparisons and choices based on the evidence they are presented, and have come to believe their inheritance into whatever national religious cult

## Commentary

they compose the basis of power for is morally right, the best and correct thing to do. We have evidence of strongly motivated national religious cultism from the United States itself, 900 of whose own removed last fall to Jonestown, Guyana, before declaring themselves independent — committing suicide. The more successful religious cults have nations to serve, and thus, for them the exigencies of actuality don't test loyalty and obedience so strictly.

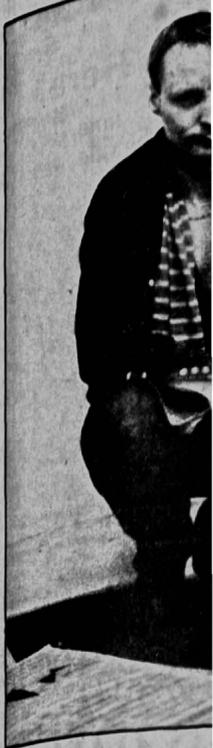

There must be underlying benefits conditioning the continued choice made by persons to be members or citizens of these cults, else why should they not choose against them? The complex of religion, life and understanding must so coincide that in their situations in life the people find national religious cultism to be a positive moral force, a definite good. That is, the goal, when considering national religious cultism, is nationhood, and nationhood's well-being.

One of my Algerian friends tried to talk about this individual manifestation of loyalty to me the other night, as we were sitting near a table at Joe's Place after viewing a film for our French class. He was not drinking a beer or smoking a cigarette. Placing his finger before his nose, he explained, patiently, that although the rules and suggestions put forth in the Koran look tedious and difficult to live by, especially when in confrontation with the cultural overabundance American college life thrust upon one, they are, in fact, all beneficial and amount to nothing in the enacting, for they are behavioral negotiations. Most people don't see beyond the tip of their noses, he said.

Implicit in this conversation, of course, was a wealth of criticism against my own culture and its extensions, but not really an indictment of me. Still, with my beer glowing before me and cigarette in hand, I wasn't insensitive. It is true, the culture I spring from has become too much. Capitalist government and free enterprise, the freest of national possibilities for anyone born,

Corroboree's last stand

# Dull newspaper inspires art, not yawns

By KITREDGE CHERRY  
Features Editor

Artist Joachim Friedrich examines his "visual diary" of altered pages from the New York Times.

When Joachim Friedrich reacts to a newspaper, he doesn't write a letter to the editor.

He is an artist and his reaction is visual. He cuts, tears, pastes and paints them — whatever the page dictates.

"I got so bored by reading the newspaper that I started to draw, to tear, to cut up — to make them more interesting," the German-born artist said. "You buy this newspaper daily and in a way you end up saying, 'I can't do anything with it,' so I started to manipulate it."

It is the "personal relationship" he feels with the page that is essential in making each of his altered newspaper pages unique.

"It's a pure relationship between the page and me, a found object and a manipulation," he said. "Each is different because daily I might be slightly different. You are never quite the same."

In 1977 Friedrich manipulated a page from the New York Times every day, forming the visual equivalent of a diary. A selection of these works (only the collages made from stock market reports and classified ads) is at the Corroboree Gallery of New Concepts in an exhibit which opens today at 8

p.m. and lasts through May 4.

He has endowed these ordinarily monotonous pages with fascinating variety. Some of the changes are Op-Artish and obvious, as when triangles cut from a contrasting page are arranged to form a syncopated checkerboard. Others are so subtle that one could start reading the want ads without noticing the circle that was cut from a similar sheet and glued to the middle of the page.

Friedrich's will be the last exhibit for the Corroboree in its present location, at the corner of Iowa Avenue and Gilbert Street, where such celebrated contemporary artists as Dennis Oppenheim and Nam June Paik have exhibited.

"We have to close this space because we need the space for students. It's unfortunate for the community, but I think the students have priority," explained Hans Breder, director of the gallery. "We may use city facilities for installations and performances, or we may rent space. The program in general will continue."

"Where nobody goofed on prices!"

## Kids' rights often trampled

By KATHY KENDALL  
Special to The Daily Iowan

A 13-year-old who runs away from home may face a night in jail with adult offenders, despite an Iowa law prohibiting it. For this reason, the UI Motion Picture Unit produced a series of service announcements to inform the public of juvenile rights.

The picture unit and the Iowa Juvenile Justice Advisory Council joined forces to develop the series of eight television and radio announcements for 1979, the International Year of the Child.

"We want to emphasize two points through the announcements: young people shouldn't be placed in jail for status offenses and if a young person commits a serious offense, he must be separated from adult offenders by sight and sound," Mark Shelton, writer and director of the announcement filming said.

Shelton explained status offenses include truancy and running away from home and

are illegal only when performed by juveniles, not adults.

Carol Warlon, a member of the Council, explained that for the past 15 years, the possibility has been high that juveniles arrested on status charges would be held in jail with adult criminals.

"Iowa law currently states juveniles must be separated from adults and can be held for any length of time. As of July 1, status offenders can only be held in lock-up facilities for a maximum 24 hours," Warlon said.

Warlon added some county jails don't have enough facilities to separate juveniles and adults.

"Admittance, dining, sleeping, and health facilities are all supposed to be separate for juveniles and adults. There are several small county jails that can't provide this. As a result, juveniles are exposed to daily interactions with adult offenders," Warlon said.

Last year in Iowa, 11,000 youths were held in jails, rather than separate lock-up facilities

and 3,500 status offenders were held by officials more than 24 hours, according to Warlon.

The service announcements developed by the motion picture unit emphasized the use of community-based juvenile programs, such as the Youth Emergency Center in Iowa City.

The Iowa City Center serves youths from the entire Eastern Iowa area. Last year, 133 youths under 18 years attended the Center.

The announcements were distributed to 20 television stations across Iowa and have been running since the beginning of April.

Lorin Maazel directs the Cleveland Orchestra with a flourish.

## Orchestra to romance UI audience

By JUDITH GREEN  
Staff Writer

The Cleveland Orchestra, one of the finest orchestras in the world, plays three performances at Hancher this weekend under the direction of its resident conductor Lorin Maazel. Its programs are strongly romantic, covering the full range of colors and nationalistic influences that go into this most appealing of musical styles.

The orchestra, which passed its 60th birthday last year, has been led by some legendary names: Nikolai Sokoloff, Artur Rodzinski, Erich Leinsdorf. But it was George Szell, who directed the group from 1946 to 1970, that built it from a good second-rank orchestra to a first-rate ensemble. Under Szell, Cleveland became the consummate classical orchestra — its lucidity, precision and in-

ternal sensitivity perfectly suited to the music of Mozart and Beethoven. Pierre Boulez, who held an interim directorship (1970-72), expanded the orchestra's contemporary vocabulary. And Maazel, the American who has led the Cleveland since 1972, has directed its energies into romantic expansiveness, following his own preference for the 19th century literature.

Friday's Russian program features the third of Tchaikovsky's orchestral suites, the "little symphonies" that are almost as extensive as his six "real" symphonies, but have more flexible and unusual content. The four sections of this suite, for example, are an elegy, a valse melancholique, a scherzo and a large-scale theme with 10 variations (used by Balanchine for his famous "Allegro brillante"). The other

half of the program, Prokofiev's neo-romantic 5th symphony, "exhibits the familiar fabric of Russian eclecticism, done by an expert weaver," as one critic wrote.

The 4th symphonies of Brahms and Sibelius appear on Saturday's concert. The Brahms is one of the masterpieces of the literature, and the Finnish composer's 4th is, next to his 2nd, the most frequently performed and justly popular of all

his symphonies.

An all-Richard Strauss program, mixing descriptive works of a lighter character with the self-conscious philosophical abstractions of *Death and Transfiguration*, is set for Sunday. The other works in this concert include the tone-poems *Don Juan* and *Till Eulenspiegel's Merry Pranks*, and the first waltz suite from his opera *Der Rosenkavalier*.

## Human error a probable cause

# Board hears crash report

WASHINGTON (UPI) — The failure of the crew of a Pacific Southwest jetliner to keep in view a light plane it collided with over San Diego last fall was cited Thursday as a probable cause of the worst U.S. air disaster.

Lax cabin procedures by the crew also were noted by the National Transportation Safety Board in its discussion of a staff report on the probable causes of the September 25 disaster.

The collision of PSA flight 181, a Boeing 727 traveling from

Sacramento and Los Angeles to San Diego, with a Cessna 172 cost the lives of 144 persons, including seven on the ground.

The NTSB discussed the staff report for 6½ hours, then decided to vote formally Friday on adoption of a report that outlines the probable cause of the crash.

"The single most important factor was the failure of the crew to comply with provisions of its visual separation clearance and inform the controller they lost sight of the smaller

aircraft," said NTSB Chairman James King.

Other board members agreed with that assessment in a straw poll King conducted.

"I think the Cessna was a victim," said King.

He said the PSA jetliner was "the burdened aircraft" with the complete obligation to avoid the smaller craft.

During the prolonged discussion, board member Francis McAdams said of the crew "perhaps no one was paying too much attention" to the Cessna. He criticized language used by the crew that included such words as "I guess and I hope," as revealed by the cockpit voice recorder.

McAdams said at least one member of the crew should have been assigned to watch for the small craft.

"One reason they lost contact was the lax atmosphere in the cockpit," McAdams said.

"Any competent pilot would not miss seeing traffic which has been pointed out to him not once, twice, but three times," said Lloyd LaGrange, an air traffic control specialist on the NTSB staff.

Members will decide on Friday some of the other factors that may have contributed to the accident and make recommendations.

Under discussion are air traffic control procedures that allow controllers to authorize a pilot to use visual flight rules in airport areas when the controller has the capability of requiring aircraft to be separated by assigning specific altitudes.

## Courts

William Runyon has been granted a delay in his trial for terrorism so he can receive psychiatric evaluation and treatment.

Runyon, a former judge from Indiana, was charged with terrorism after an incident at the Lakeside Apartments on December 19. His trial in Johnson County District Court was originally scheduled for April 30, but has now been delayed until June 18.

A UI student and his wife have filed a \$45,000 suit against Elvig Christensen and Barker Inc. for their involvement in an accident on Aug. 15, 1978.

The suit claims that Su-Hsin Tung was driving north on old Highway 1 in Cedar County when she became involved in an accident with Christensen. Christensen was negligent, the suit contends, in that he did not yield the right of way at a stop sign, failed to reduce speed and failed to exercise reasonable care to avoid the collision.

The suit asks for \$40,000 for Su-Hsin Tung and \$5,000 for Hainan Tung, who claims he suffered the loss of companionship and support of his wife.

Police said the burglar(s) gained entry by prying open the door to the music area and then broke a window in the office door, enabling them to steal the equipment.

The items were valued at \$825. Police are continuing the investigation.

The psychiatric examination has been requested because Runyon's attorney, John Cruise, said he intends to rely on the defense of diminished responsibility. In addition, Cruise believes that the present mental condition of Runyon regarding his competence to assist in his own defense must be ascertained prior to the trial.

Runyon also intends to obtain treatment from Iowa City-area psychiatrists "for the purpose of general therapy and trial preparation."

According to court records, Ralph Potter, assistant Johnson County attorney, told Cruise that the state wants to see the findings of the psychiatrists before the trial and may want an independent examination.

Runyon's trial on federal weapons charges in U.S. District Court in Des Moines has been continued indefinitely so he can undergo medical examinations and treatments.

Tracy Fitch of Iowa City pleaded guilty Thursday to conspiracy to deliver cocaine as an accommodation offense.

The "accommodation offense" classification means a substantial lessening of the potential punishment for Fitch, who had previously pled not guilty to a charge of conspiracy to deliver cocaine.

By terming it an accommodation offense, meaning that the delivery was not proven to be for Fitch's profit, the offense's category is changed from a Class C felony to a serious misdemeanor.

The felony's uniform penalty is up to 10 years in jail and a \$5,000 fine. A serious misdemeanor is punishable by up to one year in prison, a fine of up to \$1,000, or both.

Fitch's arrest stemmed from a two-month undercover investigation by the Johnson County Sheriff's office in early 1979. A total of 21 others were arrested after the investigation.

Fitch was accused of conspiring with Kelly Scott Banks to deliver cocaine to an undercover officer on January 22. Fitch is scheduled to be sentenced on April 27 at 9 a.m.

Young Singles will spend Friday night at the movies, meeting in the city library parking lot at 8:45 p.m. to decide on the movie. All singles, 22-35 invited. Young Singles will dance and drink at the Red Stallion from 8 p.m. Saturday on. Kite flying and a scavenger hunt are on the agenda Sunday from 2-6 p.m. at Mercer Park. (Skateland if it rains.)

UI Folk Dance Club meets at 7:30 p.m., Lucas-Dodge Room, Union, or on the Union Terrace if the weather permits.

The Women On Film series scheduled for tonight at 10 S. Gilbert St. has been cancelled.

Japanese as an Altaic Language will be the topic of Roy Miller, University of Washington professor of Japanese. At 12:30 p.m. in the Cafeteria Dining Room, Union.

Flexibility and Uncertainty will be discussed by economics Prof. Robert Jones of UCLA at 3:30 p.m., Room 214 of PHBA.

The New York Times Series 1977-1978, a show by Joachim Friedrich, visiting New York artist, opens a show at 8 p.m. at Corroboree Gallery, Gilbert Street and Iowa Avenue.

## Panel: Press-court relations strained

By KELLY ROBERTS  
Staff Writer

Wednesday's Supreme Court decision that may compel defendants in libel suits to testify about their state of mind during the preparation of a story has further strained the relationship between the press and the courts, a panel from the Des Moines Register said Wednesday.

"Today (Wednesday) we lost a major decision in the courts," said Paul Kritzer, associate legal counsel for the Register. "As the court decisions go against the press, the ability to report the news gets cut back further and further."

Chuck Offenburger, Register staff writer, said the Supreme Court decision was a "great big dump" on reporters.

"The relationship between the press and the bar is strained," he said. "There seems to be a mutual lack of trust, maybe even contempt, on both sides."

Offenburger said he thinks that much of the distance between journalists and lawyers has evolved from each occupation's stereotypes of the other. "It was never ordained that the press and the bar had to be adversaries, it just evolved that way," he said.

It is vital that independent newspapers survive, some newspaper chains can also serve as a "countervailing force" against the excessive growth of government.

"If issues are going to be tested, we need an aggregation of resources," he said. "There is a role for a certain number of chains, but that doesn't mean I want all papers in chains. I'd like to see a good mix."

Gerlach said the Register has had more than 60 libel suits brought against it, but has never lost or settled out of court. But, a Tennessee newspaper owned by the Register and Tribune Co. did have a case in which it settled out of court, he said.

"We settled out of court because the newspaper was dead wrong," he explained. "We could have drawn out the case, but ethically, that would not have been right. When we're dead wrong, I see no reason not to settle up."

## Police beat

A stereo amplifier and a stereo tape deck were taken from West High School, 2901 Melrose Ave., Wednesday night, according to Iowa City police reports.

Police said the burglar(s) gained entry by prying open the door to the music area and then broke a window in the office door, enabling them to steal the equipment.

The items were valued at \$825. Police are continuing the investigation.

A UI student had approximately 50 8-track tapes taken from his vehicle between 12:45 p.m. and 1:15 p.m. while it was parked on Sand Road, according to Iowa City police reports.

Dan Swigle, S20 Hillcrest, told police that the car was unlocked and that the tapes were valued at approximately \$325.

## Symposium Africa

By JOHN OSBORN  
Staff Writer

The African art collection of the industrialist and international C. Maxwell Stanley will open the UI Museum of Art.

The exhibition, which will run September 9, includes more than 100 pieces from the Western Sudan Coast, Equatorial Forest and Savannah style regions of Africa. The collection will be the first presented in the remodeled galleries of the museum.

Christopher Roy, UI professor of art history who has written an illustrated catalog that will accompany the collection, said Stanley gathered art work over the past five years travels in Africa.

"The objects in the Stanley collection come from a broad range of geographical areas and represent a broad range of African art," Roy said. "This collection is of good quality and represents objects from the four major sculpture-producing regions of West and Central Africa, which for all intent and purposes all African sculpture comes from."

"The oldest pieces go back to the 10th century, and yet since African art is still being produced, some of the most recent pieces are also included. A significant number are late 19th century," Roy said.

"So fifty years in African sculpture long time because of the hot climate which eat away the pigments. It isn't the same as other paintings which may be more valuable because they are 1500 as opposed to 1580," he said.

Associated with the opening

By CYNDIE IVARSON  
Special to The Daily Iowan

Iowa City residents and UI students have a chance to clean up litter and trash accumulated over the winter. "Stash Trash Week," Sunday April 29.

Sponsored by the Iowa City Chamber of Commerce and Project Green, a volunteer beautification group, Stash Trash Week will officially begin at 10:00 a.m. when members of UI fraternities and sororities start cleaning up downtown business district, said Stash Trash committee member Michele Fisher of the Downtown Association and the Chamber of Commerce.

"The idea for Stash Trash Week came in January when the Chamber of Commerce recognized the problem of litter and trash covered up by the snow found all over the city," said Rubright, Stash Trash committee member from the Mall Merchants Association Project Green.

Fisher said that the committee coordinated cleanup campaign in public area schools, churches, and organizations, neighborhoods and businesses.

The city's cleanup week was scheduled earlier than the May 5 statewide cleanup, which involves all of Johnson County, because "UI students want their share but didn't want to part at that time as it's too close to the week," Fisher said.

The UI fraternities and sororities decided to make Stash Trash Week their Stash Week activities as a community service project, Rubright said.

"About 350 members from the fraternities and sororities are expected to participate with the downtown businessmen," said Phil Ducoffe, co-chairperson of the Greek Week Community Service Committee.

"It's our way of thanking the Downtown Association for supporting the Greek Week activities and events every year," he said.

## Spring clean

These figures are on loan from the Stanley Collection to the UI Museum of Art. On the left, a male figure (in wood from the Hemba culture in Zaire) is an ancestral statue that represents a local chief or the founder of a royal lineage; it was once kept in a hut to protect it from the elements. In the Sayi substyle, it is characterized by delicate, crescent-shaped eyebrows and

heavily lidded eyes. On the right, a female figure with child (in wood with pigment from the Yoruba culture in Nigeria) supports a visual pun: When the lid of the bowl on the figure's head is placed in a vertical position, the head of the bird becomes the head and long, pointed hairstyle of Eahu the trickster, the god of uncertainty, change, malicious mischief and sexual energy.

## Symposium attracts top scholars African art exhibit opens

By JOHN OSBORN  
 Staff Writer

The African art collection of Muscatine industrialist and international consultant C. Maxwell Stanley will open tonight at the UI Museum of Art.

The exhibition, which will run through September 9, includes more than 180 art pieces from the Western Sudan, Guinea Coast, Equatorial Forest and Southern Savannah style regions of Africa. The collection will be the first exhibit presented in the remodeled lower-level galleries of the museum.

Christopher Roy, UI professor of art history who has written a fully illustrated catalog that will accompany the collection, said Stanley gathered the art work over the past five years during travels in Africa.

"The objects in the Stanley Collection come from a broad range of groups and represent a broad range of functions," Roy said. "This collection is of a very good quality and represents objects from the four major sculpture-producing regions of West and Central Africa — which for all intent and purposes is where all African sculpture comes from."

"The oldest pieces go back to the 16th century, and yet since African sculpture is still being produced, some of the pieces represent the culture that is still alive today. A significant number are from the late 19th century," Roy said.

"So fifty years in African sculpture is a long time because of the hot climate and the bugs which eat away the pieces. So it isn't the same as other paintings which may be more valuable because it's from 1560 as opposed to 1580," he said.

Associated with the opening of the

collection, a symposium sponsored by the UI and the Department of Art and Art History will be held April 27 and 28 and will bring some of the leading African art historians in the world to the UI, Roy said.

"The symposium is already the most important event in African art history in the United States this year. A number of top scholars in the field from the U.S. and Europe will be attending," he said.

Roy said that many people feel the most interesting material in the field is just now being written by "younger, fresher scholars," and that the symposium will be unusual because newer historians will be presenting their work to some of the older authorities.

The symposium guests include Susan Vogel, director of African Art at the Metropolitan Museum of Art in New York; Monni Adams of Harvard University; Albert Maesen of the Musée Royale de l'Afrique in Belgium; Marilyn Houlberg of The Art Institute of Chicago; and William Fagg, a critic from London.

Roy said the emphasis of the conference will be that African art is not dead, that its "rich traditions" live on. "It is possible to go to Africa today and find out about the context in which these objects were used and their surroundings — the costumes, the music, dance, the heat, the dust, the noise — everything that goes into the making of the object."

Roy emphasized that the key to understanding African art is in realizing its functional importance in everyday life.

"We're exposed to art when we go to a museum, but in these cultures they are surrounded by it every day," Roy said. "We get information on these objects, who made them, what their purpose is,

how they relate to the people, and the cultural differences that they represent.

"For example, at African funerals it is believed that a soul of the deceased can only enter the ancestral kingdom after the ancestral masks are brought out. Art is also associated with politics, leadership and the initiation of youth," he said.

Art History Prof. Roy Sieber, of Indiana University and co-director of the symposium, is one of the best-known and most highly respected scholars in Africa art, Roy said.

"Sieber has always stressed the functional significance of African art, and he says that in our own culture we make art for art's sake, but in Africa they make art for life's sake," Roy said.

Large photographs of African tribal scenes greet the visitor at the entrance to the exhibit. Roy said the appreciation of the art object is greater when one can see the context in which it was used.

"The objects pictured in their functional use provides a contrast with a piece in a museum — segregated, on a pedestal with light shining on it," Roy said. "When an art object is completely isolated from the context in which it was made, it takes away from the object itself. It isn't just a piece of wood, it relates to everything around it."

The collection will be on loan until September, but the objects have been bequeathed to the UI and the entire collection will eventually be placed in the museum.

The exhibit and the symposium are open to the public, and the Iowa Public Broadcasting Network has filmed a special on the exhibit which will be aired this fall.

## Republican Grassley predicts 'Culver bid in trouble'

DES MOINES (UPI) — Rep. Charles Grassley, R-Iowa, said Thursday Democratic Senator John Culver is in serious trouble in his yet-unannounced bid for re-election and indicated he expected opposition from only one other Republican in his probable run to unseat Culver next year.

Grassley, who last week authorized the formation of an exploratory committee to begin laying the groundwork for a Senate campaign, told reporters the 1980 Republican primary was shaping up as a battle between him and Des Moines businessman Tom Stoner, adding he expected his personal background and legislative experience to lead him to victory and the chance to face Culver in the general election.

"I think I've got the economic

background and a broader political base and have built a better infra-structure over the years than anyone I might run against except Gov. (Robert D.) Ray," he said.

The 3rd District congressman is considered a virtually certain entrant into the race for the Senate, followed by a narrow field of possible contenders for the nomination. Topping that list is Stoner, a successful businessman and former GOP state chairman, viewed as more moderate than the conservative Grassley.

Although the chairman of Grassley's exploratory committee, Harry Rasdal, said last week the congressman would not formally announce his intentions for several months, Grassley said he was traveling the state Thursday to answer

questions that remained following last week's announcement of the committee's formation.

He indicated he would use the same approach against Culver that fellow Republican Roger Jepsen used last year to defeat Democratic Sen. Dick Clark, attacking Culver's liberal voting record and charging the congressman-turned-senator was "out of touch with moderate-thinking Iowans."

One issue Grassley said he would not push during the campaign was abortion — a topic Jepsen used successfully in his bid to upset Clark — but he said he had no qualms about

certain anti-abortion interest groups supporting him.

"If it is (an issue) it will be one those groups will make. I won't make it an issue," he said. "I'm campaigning for the United States Senate and I'm not carrying anyone's banner. If one-issue groups like my stand ... hopefully they will support my candidacy."

Grassley predicted the main issues in his anticipated campaign against Culver would revolve around fiscal policy, philosophy of government and issues of "freedom" such as right-to-work laws.

## Spring cleanup set for Iowa City

By CYNIDIE IVARSON  
 Special to The Daily Iowan

Iowa City residents and UI students have a chance to clean up litter and trash that accumulated over the winter during "Stash Trash Week," Sunday through April 29.

Sponsored by the Iowa City Chamber of Commerce and Project Green, a volunteer citizen's beautification group, Stash Trash Week will officially begin at 10:30 a.m. Sunday when members of UI fraternities and sororities start cleaning up Iowa City's central business district, said Stash Trash committee member Michele Fisher of the Downtown Association and the chamber.

"The idea for Stash Trash Week started in January when the Chamber of Commerce recognized the problem of excess litter and trash covered up by the snow and now found all over the city," said Emilie Rubright, Stash Trash committee member from the Mall Merchants Association and Project Green.

Fisher said that the committee has coordinated cleanup campaign plans by area schools, churches, service organizations, neighborhoods and businesses.

The city's cleanup week was scheduled earlier than the May 5 statewide campaign, which involves all of Johnson County, because "UI students wanted to do their share but didn't want to participate at that time as it's too close to their finals week," Fisher said.

The UI fraternities and sororities decided to make Stash Trash Week part of their Greek Week activities as a community service project, Rubright said.

"About 350 members from the fraternities and sororities are expected to work with the downtown businessmen Sunday," said Phil Ducoffe, co-chairperson of the Greek Week Community Service Committee.

"It's our way of thanking the Downtown Association for supporting the Greeks in their activities and events every year," he said.

Cleanup workers will meet at the Blackhawk Mini Park at 10:15 a.m. Sunday. They will be divided into 10 crews, then go to predetermined places and work toward the center of downtown Iowa City, he said.

The cleanup workers will be easy to recognize, Ducoffe said, because they will be wearing yellow construction hats supplied by the chamber.

The chamber is also donating \$100 to the community service committee to "do with how we see fit," Ducoffe said. The committee will award the money to the house with the highest percentage of members participating, he said. The winning house will then be able to present the money to its favorite philanthropy, he added.

Iowa City residents are also encouraged to pick up litter and debris on their property, Fisher said. The Iowa City Jaycees will provide the trash bags for the cleanup, she said. Those cleaning are encouraged to use their own rakes, shovels and brooms.

The city's garbage crews will work overtime next week only to pick up the extra litter, Fisher said. As long as the trash is bound or tied so nothing is loose, city workers will pick up any amount of trash set out on the front curb, she said.

Five trophies will be given to groups or organizations having the most effective cleanup campaigns, she said.

To tie Iowa City's Stash Trash Week to the statewide cleanup campaign, a ceremony will be conducted May 5 to present the check and trophies, Fisher said.

Jim Maynard, Stash Trash committee member from Project Green and an Iowa City landscape architect, has drawn a map that shows where trash accumulates in the city, Rubright said.

These "trash routes" are along Riverside Drive and the downtown business district in areas that include fast food places, she said.

The maps have helped the committee "decide what to focus on and where to send

specific groups for cleanup," she said.

Both Rubright and Fisher said that although the Iowa City cleanup project will take place next week, the real problem is to keep the city clean.

Project Green is applying to become a member of a national anti-litter organization called Clean Community Systems, sponsored by Keep America Beautiful, Rubright said.

In its 10 years of operation in Iowa City, Project Green has sponsored riverfront beautification programs, bikeways and other landscaping projects throughout the city, she added.

By joining Clean Community Systems, Fisher said, Project Green will provide Iowa City residents and organizations with educational and community service information on how to maintain a clean environment.

## Marvin award may be taxable

LOS ANGELES (UPI) — Michele Marvin will not get her \$104,000 award from actor Lee Marvin for at least three months and when she finally does her lawyer will take a one-third fee and she may have to pay income taxes on the remainder.

There was also the possibility that the ruling by Superior Court Judge Arthur K. Marshall might be appealed.

David Kagon, Marvin's attorney, said he would consult with the actor when Marvin returned from a brief visit to New York on whether he wishes to contest Marshall's ruling. Marvin's first reaction had been: "Sensational — we won on all counts."

Marvin Mitchelson, Michele's attorney, said he did not plan an appeal.

Kagon said he understood the court's ruling to mean that the \$104,000 should be handed over in one lump sum payment.

Whether that amount is subject to federal and state income taxes was obscure.

Probe urged in Nevada testing

# Fallout cover-up charged

SALT LAKE CITY (UPI) — Utah Gov. Scott Matheson charged Thursday that the government covered up the impact of fallout from Nevada open-air atomic testing and he urged a joint congressional hearing to compensate victims of the radiation.

The hearing was conducted by Sen. Edward Kennedy, D-Mass., chairman of the Senate health subcommittee, and Rep. Robert Eckhardt, D-Texas, chairman of the House subcommittee on oversight and investigations.

Kennedy said he would introduce legislation to move the responsibility for radiation research from the Department

of Energy to the Department of Health, Education and Welfare. He and Eckhardt said they would study the question of compensation and what safeguards must be taken in monitoring present nuclear activity to prevent any future problems.

Matheson said that when the atomic testing began in 1951 the Atomic Energy Commission assured southern Utah residents "there was no danger" and the people believed it.

"Today Utahans are not nearly so accepting," the governor said. "They now have doubts and questions about the harmful health effects of which they may have been the un-

witting recipients." Matheson said that when sheep died in southern Utah during the testing, the Atomic Energy Commission told the public that fallout was not the cause. He also said that the AEC cut off funding for thyroid cancer research before it could be completed and suppressed a 1965 study which showed that leukemia rates in the state were abnormally high.

"This is the most blatant example of instance upon instance of official evasion and manipulation of the facts about the health impact of fallout," he said. "On the whole, I am convinced that the sacrificial lamb in the years of govern-

mental inquiries has been the truth." Matheson compared the atomic testing with the recent nuclear accident at Three Mile Island in Pennsylvania, noting that pregnant women and young children were not evacuated from southern Utah 26 years ago.

"No one warned those of us in Utah and Nevada, who received 1,000 millirems per hour after a single test in 1953 — a dose 40 to 500 times higher than that which triggered the evacuation near Three Mile Island," said the 50-year-old governor, who was brought up in the southern Utah town of Parowan.

## Regulators reject Met-Ed \$49.2 million rate hike

HARRISBURG, Pa. (UPI) — Pennsylvania regulatory authorities Thursday barred Metropolitan Edison Co. from collecting a previously granted \$49.2 million annual rate increase, saying customers should not be "saddled with all of the costs" of the accident at the company's Three Mile Island nuclear power plant.

The Pennsylvania Public Utility Commission additionally said it would review a \$56.2 million annual rate boost awarded Jan. 27 to another of the power plant's owners, Pennsylvania Electric Co. Both companies are subsidiaries of General Public Utilities Corp.

The PUC also said it would investigate whether the firms would be permitted to make their customers pay the \$13.9 million a month cost of buying power from outside utilities while Three Mile Island is out of service.

The management practices of plant operator Met-Ed over the 10 years the plant was constructed and in operation will be investigated, the PUC said.

Soon after the PUC acted, the New York Stock Exchange halted trading of GPU stocks, which were the third most active issues at the time, at a \$12.50 level nearly five dollars off the pre-accident price.

Meanwhile, the U.S. Nuclear Regulatory

Commission said a six-day investigation has not explained releases of higher-than-normal levels of radioactive iodine into the countryside.

NRC spokesman Jan Strasma said the levels decreased Thursday and because of their low levels and sporadic nature, the radioactive iodine emissions have not posed a threat to the public's health since detected last weekend.

"The commission cannot and will not sit back and allow rate-payers, by default, to be saddled with all the costs of the incident," said W. Wilson Goode, chairman of the Public Utility Commission.

Goode said the \$49.2 million rate increase originally was approved March 22 with the understanding that Three Mile Island would be generating power for Met-Ed's 351,554 customers. The March 28 nuclear accident rendered the plant inoperable indefinitely.

Strasma said a safe, cold shutdown of the disabled nuclear plant was "certainly days, perhaps weeks" away. He said the cooldown process was still in its first stage, drawing heat off the reactor core with a steam generator.

"The fuel elements are cooling as expected and the situation remains stable. We're moving into a fairly low-key mode," said Strasma.

## Hairdryer recall requested

WASHINGTON (UPI) — The Consumer Product Safety Commission staff, citing public concern about the possible health hazards of hairdryers containing asbestos, Thursday asked the industry to voluntarily recall millions of dryers.

The panel's staff also asked major hairdryer makers to issue warnings about the situation, prompted by the disclosure that the dryers contain asbestos, which has been identified as a cause of cancer when inhaled in sufficient quantities.

The request will also contain notice the Federal Trade Commission staff has decided future advertising for hairdryers with asbestos may be unfair

and deceptive unless it explains there is a controversy over their use.

The CPSC is sending out letters to about 10 manufacturers asking them to take voluntary action, including public notice to consumers and recall where necessary.

The panel has not determined to what extent such dryers are health hazards. But it has listed more than 100 hand-held dryers that used asbestos as part of their construction and which might be hazardous if the mineral is blown into the user's face.

"The people are alarmed," the staff told the CPSC. It said more than 3,000 calls a day asking for information about

the problem are flooding its offices. Because of the calls the entire government telephone network broke down five times in one day.

The letters to the manufacturers will ask if any of the dryers are still being sold and if the firms have been in contact with their merchandisers.

The staff will also ask the CPSC to launch an investigation of 50 companies that make commercial hairdryers.

**SLAVE OF LOVE**  
The importance of new Soviet cinema has only recently been grasped by Western critics and audiences. The most successful of these films has been *Slave of Love*. Unlike the weighty adaptations of Kozintsev (King Lear, Don Quixote), the director of *Slave of Love*, Nikita Mikhalkov, produces the purely filmic classic.

It is 1918 and the Bolshevik Revolution has just taken place. In the south of Russia a film crew is attempting to finish a romantic melodrama, oblivious to the tide of change about to engulf them. Their film supply runs out, government troops invade their set and the turmoil of revolution draws closer. Only the beautiful leading lady is able to recognize the political realities, as falling in love with a Bolshevik cameraman she finds herself caught up in the forces of transformation.

Color, 94 minutes. Russian with English subtitles. 1978.  
Fri. 9, Sat. 7

## Netmen S over Boile

By EILEEN DAVIS Staff Writer

The Iowa men's tennis team will be Big Ten today and Saturday when Purdue and Illinois.

The Hawks will take on the Boilermakers today and will face Illinois at 11:30 p.m. today and will face Illinois at 11:30 p.m. Saturday. Both contests are scheduled at Kinetic Stadium Courts, however, poor weather would move them to the Rec Building.

Coach John Winnie will be counting on a regular lineup led by Tom Holtmann. Holtmann owns a perfect 5-0 record in regular season play. The Hawks own a 4-1 record following last weekend's 5-1 Michigan State and 6-1 loss to Michigan. Holtmann's surprising suprising win over Big Ten champion Jeff Etterbeck was really pleasing with his win over Etterbeck looking forward to some good matches this weekend," Winnie said.

Joining Holtmann in singles competition are Greg Anderson, 2-9 on the season; Hodgman, 3-8; Matt Smith, 6-5; Eric

## Nau duo cap

The men's Intramural racquetball doubles final showdown was rather a family affair as a brother twosome captured the 1979 crown.

Alpha Kappa Kappa's Scott and Brad Nau swept the championship match with decisive 21-4, 21-13 victories over Bill Riker and Jay Reinema (Bucaneros). The Nau duo gained a final berth after dominating Wally Miller and Greg Parkes (Pi Kappa Alpha), 21-2, 21-3. The Riker-Reinema team earned their championship spot with a two-game win over Dave Rettenmaier and Randy Willman of Phase II.

The winning pair are not newcomers to Intramural racquetball as Scott has claimed the individual title four times besides taking part in last year's men's doubles championship with Caesar Farrell.

The IM action takes to the diamond today with the three-day softball tournament. Winners in the single elimination play will advance to the championship contests slated to begin at 3 p.m. Sunday in Mercer Park with the co-ed division. The men's and women's battles will follow at 4 p.m.

Ten members will be required to make up a team with at least eight members present in order to begin a game. The missing two will be recorded as automatic outs each time their turn at bat comes up, but can be inserted into the lineup on arrival. Preliminary contests will be five innings in length with the finals extended to seven innings of play. In case of rain, participating teams should contact the IM office (Room 111, Field House or 353-3941) for rescheduling.

Tennis enthusiasts will have an opportunity to show off their

## Washington needs hustle, more desire

By United Press International

More desire and hustle is what Washington Coach Dick Motta wants from his National Basketball Association defending champions. The lack of both has deadlocked the Bullets with the Atlanta Hawks at 1-1 in their quarterfinal playoff series.

"We've got to start moving better and get the ball up court," adds Bob Dandridge, the only player who seemed to be exhibiting desire and hustle in Washington's 107-99 second game loss. Dandridge scored a game high 36 points.

The series switching to Atlanta doesn't mean too much to Coach Hubie Brown, who thinks a home court advantage represents just the barest of edges in a game. However, two straight wins in Atlanta would push the Bullets to the brink of defeat in this best-of-seven series.

"We have to respect the Hawks," comments Bullets guard Kevin Grevey. "They're hungry and they're coming after us."

Kansas City hasn't had much luck on home court and now Philadelphia and Los Angeles try the hardwood in their favorite arenas. The Kings lost their opener to visiting Phoenix, 101-99, while the Sixers and Lakers lost a pair on the road. Philadelphia dropped 119-106 and 121-120 decisions in San Antonio and Seattle took a pair at home from Los Angeles, 112-101 and 108-103 in overtime.

All clubs resume action Friday night.

# Netmen seek league wins over Boilermakers, Illini

By EILEEN DAVIS  
Staff Writer

The Iowa men's tennis team will be after two Big Ten wins today and Saturday when it hosts Purdue and Illinois.

The Hawks will take on the Boilermakers at 2:30 p.m. today and will face Illinois at 1 p.m. on Saturday. Both contests are scheduled for the Kinnick Stadium Courts, however, poor weather would move them to the Rec Building.

Coach John Winnie will be counting on his regular lineup led by Tom Holtmann. The Iowa sophomore owns a perfect 5-0 record in Big Ten competition. The Hawkkeys own a 4-7 season record following last weekend's 5-1 win over Michigan State and 8-1 loss to Michigan, which was highlighted by Holtmann's surprising victory over Big Ten champion Jeff Etterbeck.

"Holtmann is playing exceptional tennis. I was really pleased with his win over Etterbeck. We'll be looking forward to some good matches this weekend," Winnie said.

Joining Holtmann in singles competition will be Greg Anderson, 2-9 on the season; Greg Hodgman, 3-8; Matt Smith, 6-5; Eric Pepping,

4-7; and Tim Jacobson, 8-3. The top-ranked doubles duo of Holtmann-Anderson takes a 3-6 slate into the meets and is backed up by Pepping-Smith, 4-6, and Hodgman-Dan Rustin, 5-5.

Winnie predicts the Hawks will be challenged by Purdue's Bro Ballantine and John Cochran, the Boilermakers' top singles players. Ballantine is 7-2 while Cochran is 2-13 this year. Purdue will also count on Steve Pruster, 4-13; Paul Cantrell, 5-12; Ben Huddle, 9-8; and Dan O'Connell, 6-4.

Ballantine and Cochran boast a 6-3 doubles record while O'Connell-Cantrell are 5-5 with the Huddle-Phil Dull duo owning a 7-8 slate.

"We have a rough weekend coming up. Although I haven't seen any results from Iowa, I know they are pretty good," said Purdue Coach Ed Eicholtz. "Our biggest problem has been winning the close set. We seem to play even with our opponent, and then lose 7-6. We need confidence to win the close match. We need to believe we can do it."

Winnie says the Hawks also believe they can do it. "The players are in good shape and their attitudes are good. They're excited about the outdoor matches, and we're looking forward to the competition," he said.

## Nau duo captures racquet title

The men's Intramural racquetball doubles final showdown was rather a family affair as a brother twosome captured the 1979 crown.

Alpha Kappa Kappa's Scott and Brad Nau swept the championship match with decisive 21-8, 21-13 victories over Bill Riker and Jay Reinsma (Bucaneros). The Nau duo gained a final berth after dominating Wally Miller and Greg Parkes (Pi Kappa Alpha), 21-2, 21-3. The Riker-Reinsma team earned their championship spot with a two-game win over Dave Rettenmaier and Randy Willman of Phase II.

The winning pair are not newcomers to Intramural racquetball as Scott has claimed the individual title four times besides taking part in last year's men's doubles championship with Ceasar Farrell.

The IM action takes to the diamond today with the three-day softball tournament. Winners in the single elimination play will advance to the championship contests slated to begin at 3 p.m. Sunday in Mercer Park with the co-ed division. The men's and women's battles will follow at 4 p.m.

Ten members will be required to make up a team with at least eight members present in order to begin a game. The missing two will be recorded as automatic outs each time their turn at bat comes up, but can be inserted into the lineup on arrival. Preliminary contests will be five innings in length with the finals extended to seven innings of play. In case of rain, participating teams should contact the IM office (Room 111, Field House or 353-3494) for rescheduling.

Tennis enthusiasts will have an opportunity to show off their Washington needs hustle, more desire

By United Press International

More desire and hustle is what Washington Coach Dick Motta wants from his National Basketball Association defending champions. The lack of both has deadlocked the Bullets with the Atlanta Hawks at 1-1 in their quarterfinal playoff series.

"We've got to start moving better and get the ball up court," adds Bob Dandridge, the only player who seemed to be exhibiting desire and hustle in Washington's 107-99 second game loss. Dandridge scored a game high 36 points.

# P.E. canoe policies inconsistent

Serious discrepancies exist between the Field House and Halsey Gymnasium in determining if a student is a competent enough swimmer to participate in UI canoeing classes.

Compounding these discrepancies, several Field House classes have been canoeing on the river while Recreational Services refused to open the canoe house to the public due to the river's swollen conditions. While Rec Services sets standards for determining the river's safety, P.E. classes operate under no defined policy.

Why should there be so many differences in policies when all three programs are dealing with the same river conditions? The situation should certainly be examined and the inconsistencies should be resolved.

Recreational Services will not rent canoes until the water reaches a temperature of 50 degrees and is not flowing over the sidewalk leading from the canoe house to the dock, according to Del Gehrke, assistant director of Rec Services.

The P.E. departments at Halsey and the Field House do not, however, have any set standards, but leave the

decision of determining the river's safety up to the individual instructor.

"Many times I think it is unsafe when P.E. classes go down to the river," Gehrke said, adding that when the water covers the sidewalk to the dock, the water is too swift to

However, canoeing was voluntary for students at that time, according to Southard.

A possible argument could be made for a different policy between Rec Services and the P.E. classes in that Rec Services must deal with individuals who may have varying degrees

that students be required to swim without support for 15 minutes with clothing, according to department head Dr. Donald Casady.

Instructors at the Field House, however, also vary in the standards they use. Linda Cooper asks her students to swim four lengths of the pool, tread water for five minutes fully clothed, and then strip down to their swim suits in the water. Southard asks his students to swim 100 yards fully clothed and to stay afloat in the water by any means for five minutes fully clothed.

Doug Goar asks his students to tread water five minutes and swim four widths of the pool, neither of which must be fully clothed. Good canoeing practice is to remain with the canoe if it should swamp, according to Goar, and he regards the swim test as insurance that a student would be able to get to shore if the current should carry the canoe away from him.

Inconsistencies between Halsey and the Field House requirements may be due to differing priorities. "In my experiences, women's P.E. has always tended to stress learning in the classroom more than the men's P.E. where the throw-in-the-ball-and-let-them-play attitude seems to prevail," said one instructor who has taught classes at both Halsey and the Field House.

Whatever the basis may be for the discrepancies, the fact remains that the conditions in the pool do not parallel those of the swollen Iowa River. Pool conditions certainly do not compare to present temperatures of the Iowa River, or

## Extra Point

### wendy barr

of canoeing and swimming skills. Although all canoeists must wear life vests by Coast Guard order, the P.E. classes are also supervised and do provide instruction in how to handle a capsized canoe. The P.E. classes also test for swimming ability, however, there are discrepancies in the tests used by Halsey and Field House instructor.

At Halsey, students must swim continuously for 15 minutes, 50 per cent of which must be the crawl stroke or a comparable stroke in which the students remain on their stomachs. They must also tread water for five minutes fully clothed, then take off the outer clothing in the water.

Instructor Linda Hackett calls this a "very rigid" test that requires a strong swimmer. Some students apparently agree since many have indicated they took canoeing through the Field House because they believed the swim test would be less demanding.

The P.E. department at the Field House "recommends" league teams in the Illinois Invitational, the golfers fell to only Ohio State and Purdue (by three shots) last weekend while finishing in a tie for eighth. But, Zwiener said, there is no predicting the conference ranking.

"The league is still pretty well balanced. It depends on who's playing well on what day. We're getting outside more and seeing some improvement," the coach said.

Zwiener will take a team of Julius Boros Jr. (averaging 77.5 thus far this season), Kevin Burich (78.3), John Barrett (80.0) and Brian Elders (82.0), as well as freshman Craig Rank and junior Tom Louden.

Louden and Rank tamed Finkbine in convincing fashion Tuesday as Louden fired a four-under-par 108 for medalist honors with Rank at 114 in the 27-hole event. Boros shot a one-under 111 for the tourney, while Barrett and Elders were unable to compete.

The Northern will be Iowa's last opportunity to view their competitors before the Big Ten Championship to be held May 10-13 in Champaign, Ill. The Hawks took sixth in the conference last year in addition to a sixth-place finish at the Northern last year. "We always play well there. It's a real mature course with a lot of trees," Zwiener said.

Ohio State should have no trouble in leading the pack, however. The Buckeyes are seeking their fourth straight Northern title and will have the service of defending U.S. Amateur champ John Cook, who competed in last week's Masters.

## Golfers at Northern for conference test

By SHARI ROAN  
Staff Writer

The Ohio State golf course will be looking very familiar to the Iowa golfers as the Hawkeyes take to the par-72, 7,000-yard links for the second consecutive week in the Northern Intercollegiate.

The golfers, who fared well on "Scarlet" last weekend in the Kepler Invitational, are coming off of a convincing win over state rivals Drake and Northern Iowa Tuesday at Finkbine. With a little confidence behind them, the Hawks will be aiming to make a challenge in the prestigious Northern.

The tourney is a 72-hole event, with 18-holes on both Friday and Sunday and 36 holes scheduled for Saturday. After the first round of the Kepler was rained out, the Hawks managed rounds in the upper 70s and lower 80s despite mediocre weather conditions.

The familiarity of the course will be helpful, Coach Chuck Zwiener admitted, but he added, most of the Northern field will enjoy the same benefit.

"We were there last week, but everyone else was there, too. So the home team is the only one that has a real advantage, and they don't need it."

The host and favorite, is, of course, the awesome Buckeyes, winners of the Kepler. The remainder of the field will consist of all Big Ten teams as well as three Mid-American conference squads and Notre Dame.

Iowa is looking tough in the conference. After placing a disappointing seventh among

## Ohio State, Indiana

# Hawks tackle conference foes

By DOUG BEAN  
Staff Writer

Ohio State and Indiana come to Iowa City with less than spectacular records for two Big Ten doubleheaders this weekend. But Coach Duane Banks says beware — anything can happen in the Big Ten.

Ohio State, the Hawkeyes' opponent in Saturday's 1 p.m. contest, was idle in conference action last weekend but the memory of a 3-17 start still lurks in the minds of the Buckeyes.

"I know you can't completely forget a start like ours. But we did win two over Xavier, so we have a little momentum going. If we could just win one or two from Iowa, we would be in good shape," Ohio State Coach Dick Finn said.

Banks said you can throw previous records out the window when it comes to the Big Ten, and the ninth-year boss emphasizes that the Hawks won't be taking the pair of twinbills lightly.

"Anytime you play a Big Ten team, they're capable of beating you. We'll have to give it everything to beat Ohio State," Banks commented.

The Buckeyes will send a couple of tough pitchers to the mound Saturday with the likes

of left-hander Doug Dillie and Mark Dempsey, a hurler that Banks calls the second best pitcher in the conference. Dempsey has had tough luck so far this season with a 1-3 record, but he owns a 1.38 ERA. Dillie carries a 1-2 mark and a 2.33 ERA.

Meanwhile, Iowa will counter with junior Chuck Johnson and sophomore Tom Mullen on the hill. Mullen leads the Hawkeye pitchers with a 3-0 record and a 1.67 ERA.

Indiana, Iowa's opponent Sunday, has also had its share of early season problems while skidding to a 7-12 record. The Hoosiers, coming off three victories in four games this week, have had trouble at the plate. They bring a lowly .217 batting average to Iowa City, but the pitching has been a surprise to Indiana Coach Bob Lawrence.

Indiana's probable starters will be Matt Szymczak (1-4) and Steve Reish (1-1), a member of Bobby Knight's basketball squad in the winter months. Freshman Bill Drambel (4-1) and juniors Steve Rooks (4-0) or Chuck Halling (2-1) will go for the Hawks.

Both Ohio State and Indiana will have the massive task of controlling the hot Iowa bats.

Hawkeye hitters pounded out 10 home runs in a 15-0, 18-3 shellacking of Wartburg Wednesday. And Purdue, received a taste of the Hawkeye power as the Big Ten leaders pounded Boilermaker pitching for 31 runs and 34 hits in a pair of encounters last Sunday.

Seven Hawkeyes hit home runs in the Wartburg doubleheader with freshman Ed Garton, center fielder Lance Platz and Ed Lash ripping two apiece. Platz, one of the club's leading hitters, has only been

caught once in over 20 steal attempts this season. Shortstop Dave Hoeksema and designated hitter Jeff Jones continue to lead the Iowa offensive attack.

"We have to be happy with our hitting right now. We hit the Purdue pitching awfully well last weekend," Banks said. "But we'll have good and bad days with the hitting. Consistency in the pitching and defense will win games for us."

The reward for a pair of sweeps would be a big help for Banks' squad. Iowa, which possesses a 20-6 season mark,

could extend its record-breaking 20-game winning streak and could also tighten its grip on the Big Ten lead. The Hawkeyes lead the conference by one game over Michigan State, but Banks said the race for the crown has just begun.

"I still think it's (Big Ten) going to be a rat race. If we win three of four or get the four like we hope to, then I think everyone's going to have to reckon with us. Because then, we'll be in the driver's seat," Banks said.

## Angels extend winning streak

By United Press International

An unusual display of power has the California Angels off to their longest winning streak in 15 years.

The Angels, never known in the past as heavy hitters, got four more home runs Thursday en route to a 6-4 victory over the Minnesota Twins. Brian Downing's two-run single with two out in the eighth snapped a 4-4 tie and extended the Angels' winning streak to eight games, their longest since 1964.

The Angels got solo home runs from Joe Rudi, Willie

Aikens (his fourth), Bobby Grich (his fifth) and Carney Lansford to help Don Aase record his second victory without a loss.

Loser Mike Marshall walked ex-Twin Rod Carew to lead off the eighth and then hit Don Baylor with a pitch. Rudi sacrificed the runners and, after Aikens fled out, Downing singled in Carew and Baylor.

Rudi and Aikens had back-to-back homers in the fourth, Grich opened the fifth inning with his homer and Lansford hit his in the ninth. The Angels have now pounded out 20

homers in 13 games.

In the only other American League action Thursday, Baltimore defeated the New York Yankees 6-3 and Boston downed Milwaukee 5-3.

Two-run singles by Ken Singleton and Eddie Murray supported the eight-hit pitching of Jim Palmer and enabled Baltimore to end a six-game losing streak.

Rookie Chuck Rainey, making his first major league start, scattered four hits over 7-2-3 innings and Jack Brohm's two-run single keyed a four-run fifth to lead Boston.

## Softball team seeks league title after two second-place finishes

By HEIDI McNEIL  
Staff Writer

After settling for runner-up honors two years in a row, the Iowa women hope that the third time's a charm as they seek the Big Ten softball crown this weekend at Bloomington, Ind.

In last year's tourney, the Hawkeyes grabbed second place to two-time winner Michigan State. Coach Jane Hagedorn's crew faced the Spartans in the finals after winning the loser's bracket in the double-elimination play. After rain washed out that contest, the Spartans were declared the champions since they had beat Iowa earlier in the tourney, 7-0.

The Hawkeyes' (9-9) first challenge will come against Northwestern today at 10 a.m. The Wildcats, currently on a four-game winning streak after suffering five straight setbacks on their spring trip, look for an improvement over last year's finish in the Big Ten cellar.

The Iowa bats will deal with the likes of Tammy Malo (3-4 this season with a 3.68 ERA), who heads the Northwestern mound corps. Malo hurled a two-hit performance against George Williams College last week, according to first-year Coach Sharon Drysdale.

The Hawkeye women will also bring a tough pitching staff in the form of sophomores Cindy Carney (3-3) and Mary Swenson (4-4), besides a strong back-up crew in Peg Augspurger (1-0) and Rita Hellman (1-0).

Carney and Swenson have had a few injury problems lately, but Coach Hagedorn expects the twosome to be "100 per cent" going into this weekend's action. Speedy center fielder Polly Ven Horst will still be missing from the scene because of a knee injury.

The Iowa offense has steadily improved with each game, according to Hagedorn. Mary McAreavy and Chris Kennedy led the batting power in Wednesday's doubleheader against

Wartburg as the Hawkeyes pounded out 18 hits. "We just need more consistency with base hits out of all 12 players," the Iowa mentor said.

The Hawkeyes' defense has proved throughout the year to be a strong asset in the team's overall game and Hagedorn believes that her team will continue its defensive consistency. Topping the defensive ranks are left fielder Nancy Schaefer, shortstop Kathy Kasper and outfielder Tracy Taylor.

Hagedorn looks for her group to be a strong contender in the league race along with Minnesota and returning champion Michigan State. This will be the Gophers' first crack at a Big Ten crown after finishing third in the nation last year.

The Gophers beat Iowa twice on their way to winning the Minnesota Invitational. Coach Linda Wells' squad brings a 12-4 season record into action.

Hurler Dani Hortler (4-5) paces the pitching staff while Shelley Medernach leads the Gopher plate power with a .389 batting average.

Host Indiana and Ohio State round out the six-team field. Indiana enters the tournament with the most wins (15-7) besides boasting an early season 8-7 triumph over the Hawkeyes.

The Lady Buckeyes will be Iowa's second foe, should Hagedorn's team pull out a first round win. Ohio State presently holds a 10-5 slate on the year with one of those victories being a 4-3 decision over the Spartans.

# Hawks tackle conference foes

By DOUG BEAN  
Staff Writer

Ohio State and Indiana come to Iowa City with less than spectacular records for two Big Ten doubleheaders this weekend. But Coach Duane Banks says beware — anything can happen in the Big Ten.

Ohio State, the Hawkeyes' opponent in Saturday's 1 p.m. contest, was idle in conference action last weekend but the memory of a 3-17 start still lurks in the minds of the Buckeyes.

"I know you can't completely forget a start like ours. But we did win two over Xavier, so we have a little momentum going. If we could just win one or two from Iowa, we would be in good shape," Ohio State Coach Dick Finn said.

Banks said you can throw previous records out the window when it comes to the Big Ten, and the ninth-year boss emphasizes that the Hawks won't be taking the pair of twinbills lightly.

"Anytime you play a Big Ten team, they're capable of beating you. We'll have to give it everything to beat Ohio State," Banks commented.

The Buckeyes will send a couple of tough pitchers to the mound Saturday with the likes

of left-hander Doug Dillie and Mark Dempsey, a hurler that Banks calls the second best pitcher in the conference. Dempsey has had tough luck so far this season with a 1-3 record, but he owns a 1.38 ERA. Dillie carries a 1-2 mark and a 2.33 ERA.

Meanwhile, Iowa will counter with junior Chuck Johnson and sophomore Tom Mullen on the hill. Mullen leads the Hawkeye pitchers with a 3-0 record and a 1.87 ERA.

Indiana, Iowa's opponent Sunday, has also had its share of early season problems while skidding to a 7-12 record. The Hoosiers, coming off three victories in four games this week, have had trouble at the plate. They bring a lowly .217 batting average to Iowa City, but the pitching has been a surprise to Indiana Coach Bob Lawrence.

Indiana's probable starters will be Matt Szymczak (1-4) and Steve Reish (1-1), a member of Bobby Knight's basketball squad in the winter months. Freshman Bill Drambel (4-1) and juniors Steve Rooks (4-0) or Chuck Halling (2-1) will go for the Hawks.

Both Ohio State and Indiana will have the massive task of controlling the hot Iowa bats.

Hawkeye hitters pounded out 10 home runs in a 15-0, 18-3 shellacking of Wartburg Wednesday. And Purdue, Iowa's last Big Ten foe, received a taste of the Hawkeye power as the Big Ten leaders pounded Boilermaker pitching for 31 runs and 34 hits in a pair of encounters last Sunday.

Seven Hawkeyes hit home runs in the Wartburg doubleheader with freshman Ed Garton, center fielder Lance Platz and Ed Lash ripping two apiece. Platz, one of the club's leading hitters, has only been

caught once in over 20 steal attempts this season. Shortstop Dave Hoeksema and designated hitter Jeff Jones continue to lead the Iowa offensive attack.

"We have to be happy with our hitting right now. We hit the Purdue pitching awfully well last weekend," Banks said.

"But we'll have good and bad days with the hitting. Consistency in the pitching and defense will win games for us."

The reward for a pair of sweeps would be a big help for Banks' squad. Iowa, which possesses a 20-6 season mark,

could extend its record-breaking 20-game winning streak and could also tighten its grip on the Big Ten lead. The Hawkeyes lead the conference by one game over Michigan State, but Banks said the race for the crown has just begun.

"I still think it's (Big Ten) going to be a rat race. If we win three of four or get the four like we hope to, then I think everyone's going to have a reckoning with us. Because they we'll be in the driver's seat," Banks said.

## Angels extend winning streak

By United Press International

An unusual display of power has the California Angels off to their longest winning streak in 15 years.

The Angels, never known in the past as heavy hitters, got four more home runs Thursday en route to a 6-4 victory over the Minnesota Twins. Brian Downing's two-run single with two out in the eighth snapped a 4-4 tie and extended the Angels' winning streak to eight games, their longest since 1964.

The Angels got solo home runs from Joe Rudi, Willie

Aikens (his fourth), Bobby Grich (his fifth) and Carney Lansford to help Don Aase record his second victory without a loss.

Loser Mike Marshall walked ex-Twin Rod Carew to lead off the eighth and then hit Don Baylor with a pitch. Rudi sacrificed the runners and, after Aikens flied out, Downing singled in Carew and Baylor.

Rudi and Aikens had back-to-back homers in the fourth, Grich opened the fifth inning with his homer and Lansford hit his in the ninth. The Angels have now pounded out 20

homers in 13 games.

In the only other American League action Thursday, Baltimore defeated the New York Yankees 6-3 and Boston downed Milwaukee 5-3.

Two-run singles by Ken Singleton and Eddie Murray supported the eight-hit pitching of Jim Palmer and enabled Baltimore to end a six-game losing streak.

Rookie Chuck Rainey, making his first major league start, scattered four hits over 2-3 innings and Jack Brubaker's two-run single keyed a four-run fifth to lead Boston.

## WARM WEATHER WORKOUTS: A Guide to Getting in Shape

# FORD MUSTANG '79

## THE NEW BREED

Presenting a whole New Breed of Mustang for 1979. Dramatic new sports car styling gives it a most efficient aerodynamic design. With sports car features like a modified MacPherson front suspension, four-bar link rear suspension, rack and pinion steering and front stabilizer bar, all Mustangs have precise handling to help flatten corners.

The '79 Mustang offers a choice of engines (including the sporty 2.3 litre overhead cam as standard equipment), power trains and options to satisfy a wide range of driver needs. Available in 2-door or 3-door Hatchback models.

Experience the '79 Mustang with a test drive at your local Ford Dealer. See why readers of *Car and Driver* magazine named Mustang "the most significant new domestic car of 1979."

**\$4,458** As Shown  
2-door sticker price.  
Excluding title, taxes and destination charges.

FORD DIVISION 

*All right, gang, hibernation is over. Time to put away the sticky hot chocolate mugs and oversized sweaters and get ready for fun in the sun, cavorts on the courts and larks in the parks!*

## ANATOMY 5

When Hamlet said, "What a piece of work is man," he wasn't kidding. The human body is a walking wonder of the world. If all 696 muscles of your body could pull in one direction at one time, you could move 25 tons. And that strength is only one of three amazing aspects of your body that you can—and should—develop as part of a shape-up program.

## STRETCHING 6

After a winter of limited exercise, most of us have to get in shape before we can take to the courts, pools and jogging paths around campus. Stretching is the perfect way to begin now. We've put together a program that isolates eight major sections of the body and stretches them individually. And one super-duper total body stretch that's all-purpose (and thousands of years old).

## JOGGING 10

Some people say being on a daily running regimen is like having your own psychiatrist. Find out for yourself. This section gives you tips on setting up a personal jogging program. You'll also get the scoop on running shoes, info on heat exhaustion, a spring-to-winter marathon calendar—and words to the wise from Bill Rodgers, the *real* marathon man.

## TENNIS 14

Can you be a winner at tennis with only average physical ability? Yes, says Dick Gould, tennis coach at Stanford University (the 1978 NCAA champs). Also in this section: Rod Laver gives you advice on how to perfect your stroke. A former pro tells you how to develop effective doubles tactics. A Harvard psychiatrist categorizes tennis players by psychological makeup. And John McEnroe admits he's tired.

Superbody/16

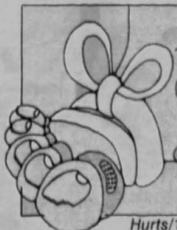

Inner Workings/5

Swim Tune-Up/21

Tennis Tips/14

Hurts/10

## WEIGHTS 16

Many top athletes combine weight training with regular workouts to increase stamina and muscle tone. You can, too. We'll tell you how to get started flexing your pecs and limbering your lats (and what that means in English). And lay to rest the myth that women shouldn't lift weights because they'll end up looking like the Hulk. (It's physiologically impossible.)

## BIKING 18

Bicycling is a great way to see the countryside and condition your body at the same time. But if you're a beginning rider, how can you avoid soreness? What's the connection between jumping rope and cycling? And who is Otto Wenz and why is he predicting that in five years bicycle racing will be as popular as jogging?

## SWIMMING 21

Boston University swim coach Raegh Wetmore (that's his name, honest) shares his five-step plan to get you into shape through swimming. We give you tips like how to avoid shoulder tendinitis (a common swim-related injury), what's the proper swimmer's kick, how to improve your crawl stroke, what it feels like to be a competitive swimmer—and how to flatten your stomach for swimwear.

## BODY/MIND 23

Some physicians are prescribing racquetball—not Elavil—for mildly depressed patients. Why? Aerobic exercises are believed to stimulate the production of body chemicals that have the same effect as antidepressant drugs. It's all part of a holistic approach to fitness. Its theme? Your mind affects the performance of your body, and your body has an effect on your mind. Sounds simple, but the ramifications could be mind-boggling.

### Free Wheeling Courier

comes with three-color accent tape stripe, cast aluminum wheels, RWL tires, black GT bar, front push bar. Sport Group, 7-ft. box and rear step bumper optional.

FORD

FORD DIVISION

## ANATOMY *You're incredible.* *A walking wonder of levers, pumps, bellows, filters and electrical circuits, all working in harmony.*

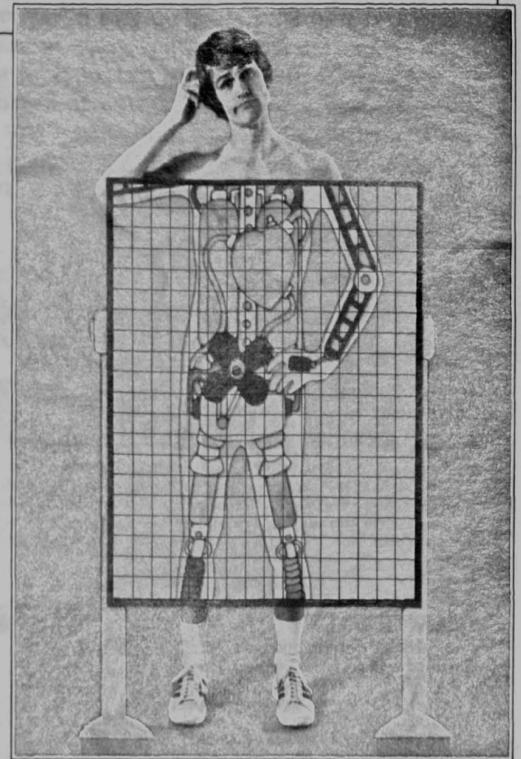

**YOU'VE GOT TO EXERCISE.** And it's not enough to have just *one* exercise activity, like tennis, and think you're giving your incredible body a total workout. To keep in shape, you've got to exercise both your muscular and cardiovascular systems with activities that develop the three basic elements of fitness: flexibility, strength and endurance.

**YOU NEED FLEXIBLE MUSCLES.** Any physical activity, from the blink of an eyelid to the lifting of a piano, depends on the muscular system, which makes up 45 percent of your total body weight. You've got 696 muscles supporting the 206 bones of your skeletal system, which are also surrounded and interlaced by another system of tendons and ligaments. These connective tissues bind, link and anchor organs, muscles, bones and the spaces in between. When a bone, muscle or joint is injured, it's usually partly because it didn't receive enough support from connective tissues that had become short and tight from nonuse. A flexible body generally absorbs more stress with less injury, so the importance of flexibility in a physical fitness program that includes vigorous activity cannot be understated.

**YOU SHOULDN'T GIVE UP.** When that familiar soreness and stiffness sets in after your first exercise sessions, don't throw in the towel. It's just that because you're out of shape, lactic acid has a tendency to collect in your muscles, making it more difficult for them to contract. When blood circulation increases with additional exercise, this waste product will be flushed out as your muscles begin to work more efficiently.

**YOU CAN BE REALLY STRONG.** If all the muscles in your body could pull in one direction at the same time, their combined force would come to about 25 tons. The surest and fastest way to develop this muscular potential is to work with weights, which can mean lifting hefty barbells in a gym or simply supplementing calisthenic exercises (chin-ups, half-squats) by using five- or 10-pound weights with the routines. Other exercises add strength in specific muscle groups through repetition (sit-ups for the abdomen, push-ups for the arms).

**YOU NEED OXYGEN.** The element that your body needs most isn't protein, vitamins, enzymes or minerals. It's oxygen. And the vital center that processes it is that marvelous muscle only about the size of your fist: the heart. Although flexibility and strength contribute to a well-conditioned body, the key is to saturate your 60 billion cells with a nourishing supply of oxygen through the bloodstream. This means the more circulation the better. Each day your heart pumps over 2,000 gallons of blood through your body, up to 12 gallons per minute during heavy exercise.

**YOU CAN TRAIN YOUR HEART AND LUNGS.** Aerobic exercises such as running, swimming, cycling or handball ("aerobic" means literally "with oxygen") are the foundation exercises on which every fitness program should be built. By using vigorous, perspiration-inducing activity to raise your heartbeat from 78-85 beats per minute to 120-140 per minute, you can train your heart and lungs to work more efficiently, bringing increased amounts of oxygen to the body with less effort.

**YOU MUST COOL DOWN.** Always follow this advice when getting in shape: Cool down for at least 10 minutes when you've finished exercising. If you've ever felt faint after running hard and then stopping suddenly, it's because the blood that was circulating has sidetracked from the brain and collected in the muscles. So decrease your activity gradually by continuing to walk or swinging your arms and legs to keep the blood circulating. And above all, pay attention to pain. It's nature's way of telling you something is wrong. When it hurts, ease up.

To learn more about your incredible body, look at a copy of *MAN'S BODY: AN OWNER'S MANUAL*, by the Diagram Group (Bantam Books, New York, 1976, \$2.75), or *WOMAN'S BODY: AN OWNER'S MANUAL*, by the Diagram Group (Bantam Books, New York, 1977, \$2.75).

# STRETCHING

Before you start a program of warm weather workouts, it's a good idea to stretch out any winter kinks. The stretches shown here are designed to build flexibility in eight major sections of the body. Remember, before you play to get in shape, you have to get in shape to play.

## NECK

With spine straight and without moving your shoulders, drop your chin to your chest and slowly rotate your head, first clockwise five times and then counterclockwise five times. Don't use jerky movements but try to make as large a circle with your head as you can, feeling the full range of the motion in your neck.

## LOWER BACK

Lie on your stomach and bend your legs so that your feet are over your thighs. Firmly grasp your right ankle with your right hand and your left ankle with your left hand. Then slowly raise your head, body and knees by pulling up on your ankles, lifting your head high and arching your back at the same time. Do not strain. Your weight should be resting comfortably on your abdomen. Pause, relax back into the starting position and repeat five times.

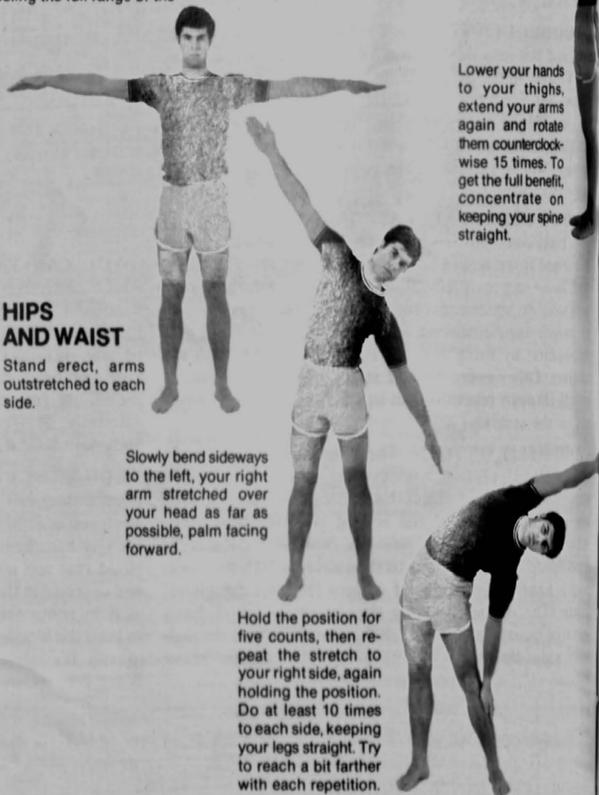

## HIPS AND WAIST

Stand erect, arms outstretched to each side.

Slowly bend sideways to the left, your right arm stretched over your head as far as possible, palm facing forward.

Hold the position for five counts, then repeat the stretch to your right side, again holding the position. Do at least 10 times to each side, keeping your legs straight. Try to reach a bit farther with each repetition.

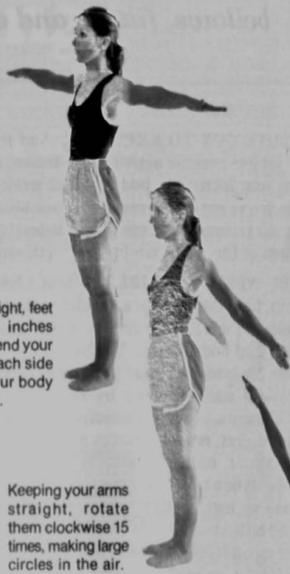

## ARMS

Stand straight, feet about six inches apart. Extend your arms to each side so that your body forms a T.

Keeping your arms straight, rotate them clockwise 15 times, making large circles in the air.

Lower your hands to your thighs, extend your arms again and rotate them counterclockwise 15 times. To get the full benefit, concentrate on keeping your spine straight.

## UPPER LEG

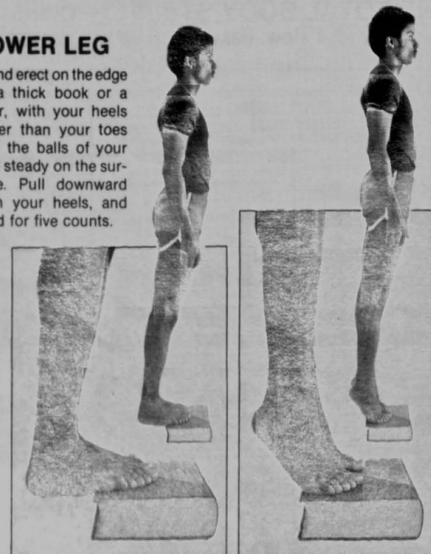

Lie down on your back with arms outstretched to each side, feet together.

Lift your right leg so it's pointing upward. Keeping both legs straight, try to lower your toes to your left hand. Pause, return the leg to its original position and then lower it to the floor. Repeat the movement with left leg to right hand. Do 10 times to each side.

## LOWER LEG

Stand erect on the edge of a thick book or a stair, with your heels lower than your toes and the balls of your feet steady on the surface. Pull downward with your heels, and hold for five counts.

Then rise as high on your toes as you can, and hold for five counts. Repeat these two movements 20 times.

## FEET AND ANKLES

Sitting straight with legs extended and palms pressing on the floor at your hips, point your toes downward as far as you can. Hold for five counts, then flex the toes backward, spreading them apart as much as possible, and hold for another five counts.

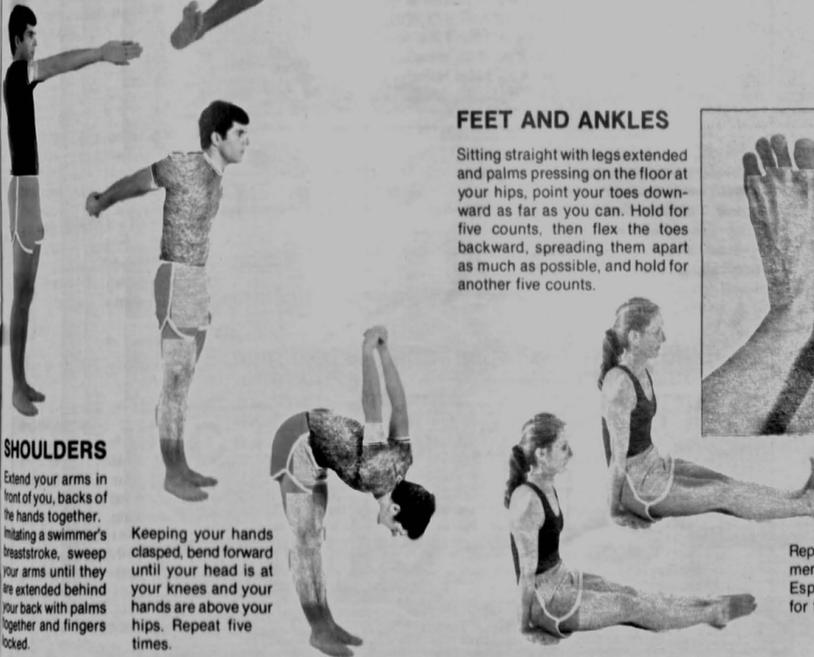

Repeat both movements 10 times. Especially good for tired feet.

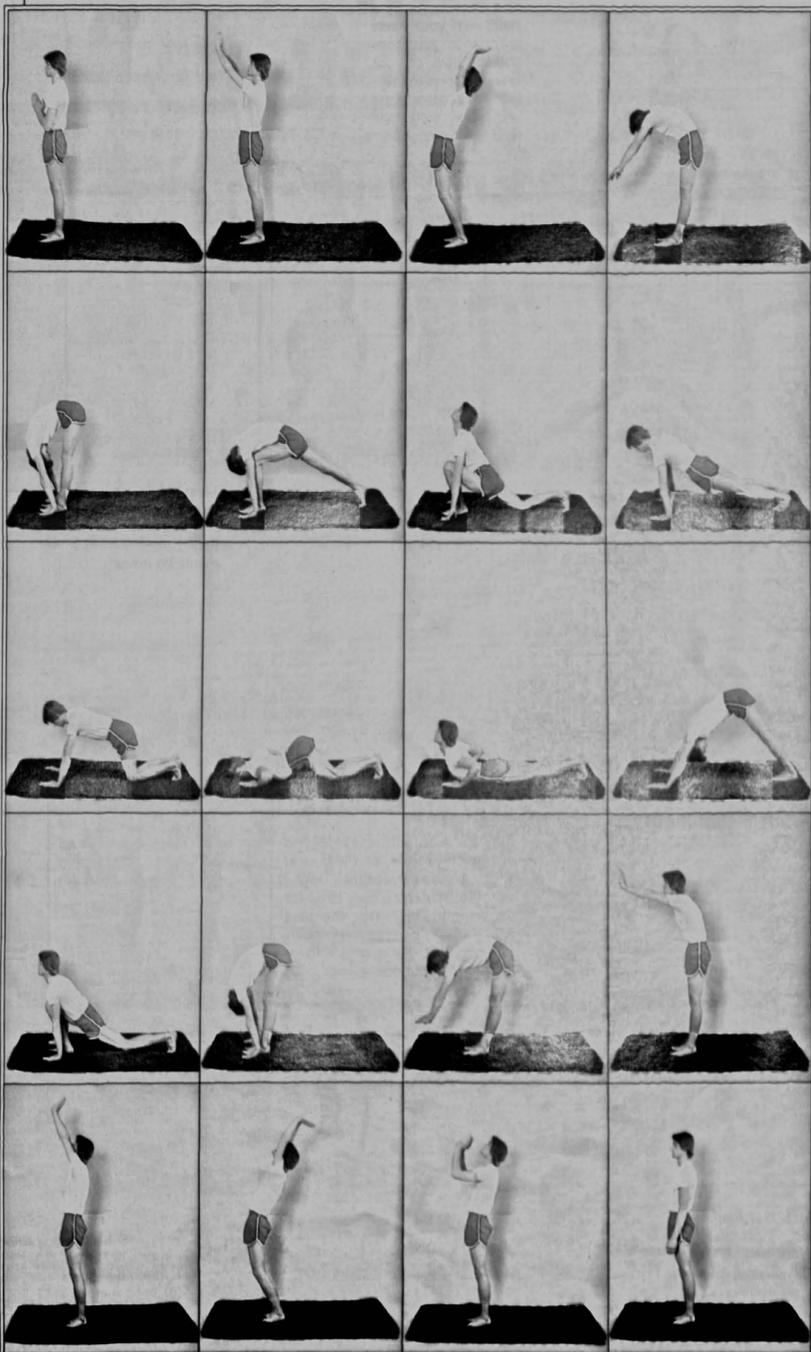

## SHOULDERS

Extend your arms in front of you, backs of the hands together. Imitating a swimmer's breaststroke, sweep your arms until they are extended behind your back with palms together and fingers locked.

Keeping your hands clasped, bend forward until your head is at your knees and your hands are above your hips. Repeat five times.

**THE TOTAL BODY STRETCH** Over 5,000 years old, the Sun Salutation is a hatha-yoga routine whose slow, easy postures will vitalize you each day.

Stand erect, hands in front of your chest. Raising your arms high above your head, bend backward as far as you can. Then, keeping your legs straight, bend forward and reach with your palms toward the floor.

Gently try to bring your forehead to your knees. Then extend your right leg backward with the right knee touching the floor and the head bent back. Stretch both legs out together so that your body forms a straight line supported by your hands and toes.

Drop to your knees, chest and forehead to the floor, keeping your abdomen raised. Then lift your chest from the floor and arch backward. Point your toes forward, press heels flat on the floor and raise your hips, keeping your legs straight.

Bring your right foot forward between your hands, your left knee touching the floor, and hold. Bring your left foot forward and try to touch your forehead to your knees. Slowly straighten up, arms extended.

Bring arms overhead and bend backward as far as you can. Finally, slowly drop your arms to your sides and relax. Complete the entire routine two to eight times. Daily practice will improve your flexibility right away, and your circulation and muscle tone as well.

**INTRODUCING THE SPORTY NEW FORD PINTO RALLYE**

**ENTER THE RALLYE YOU'VE BEEN WAITING FOR.**

The Rallye... it might just be the adventure you've wanted to experience. With charcoal grille and headlamp doors, "Rallye" bodyside tape, and distinctive front and rear spoilers (all standard), it looks like a million. Packed with value, the Rallye also comes with all these other standard features at a remarkable \$4,078 (sticker price as shown, excluding title, taxes and destination charges)

... Sport Instrumentation Cluster including Tachometer, Ammeter, Temperature Gauges and Sport Steering Wheel. Rack and Pinion Steering. Sport Stabilizer Bar. Steel-Belted Radials. Bucket Seats. Four-on-the-Floor. 2.3 Litre Overhead Cam Engine. Dual Sport Mirrors. DuraSpark Electronic Ignition. Styled Steel Wheels. And more.

**COMPARE PINTO. IT MAY BE THE BEST SMALL CAR BUY IN AMERICA TODAY.**

# JOGGING

Think of it as fun  
and not something that's  
good for you, like spinach or a trip to the dentist.

## Born To Run

Running is an exercise that helps your entire body feel better. Regular running will strengthen your heart and increase your lung capacity, thus improving cardiovascular efficiency. Running will also lower your blood pressure, tone your body and help keep off extra pounds by burning calories.

The sport is as individual and noncompetitive as you want to make it, and provides much-

touted mental benefits. No one is sure what causes "runner's high," but a general explanation may be that running creates a harmonious balance between mind and body. A Howard University study reported that students felt less anxiety and more positive feelings about their bodies, after lengthening their running distances. Some people say being on a daily running regimen is like having your own psychiatrist.

Hot weather can wilt the hardest of joggers. When outside temperatures rise, it's harder for the body to perspire and heat gets trapped inside. That can lead to cramps and heat exhaustion. To guard against this, jog in light clothes when it's hot and drink plenty of fluids. Rest occasionally and douse yourself with water; this helps you sweat and cool off.

## For Women Runners Only

Women derive the same benefits from running as men do. There's this difference: Since a woman's heart and lungs are smaller than a man's, she doesn't have to run as long or as hard to improve her level of fitness.

Kathryn Lance, author of a book on running for women, took up the sport when her poor physical condition led to high blood pressure. She urges the beginning runner to persevere. "Not every run is wonderful,"

she says. "If it's torture, try it three times a week. Tell yourself how great you'll look and feel after that tough first period." Lance's book includes a guide to warm-ups and developing a running program. She gives special emphasis to questions concerning muscle development, weight loss, and running while pregnant or during menstruation.

Kathryn Lance, *RUNNING FOR HEALTH AND BEAUTY: THE COMPLETE GUIDE FOR WOMEN*, Bantam Books, 1977, \$2.25.

## Your Own Workout

Once you've decided to take up running, think of your regimen as a training session—not a straining session.

Set yourself an attainable goal. Try running for two months, at least three runs per week. A more rigid six-week program involves running four times the first week for 18 minutes each time. You can then work your way up by stages to half-hour runs. Feel free to mix walking and running at any stage in the program.

A 10-minute warm-up will help cut down the chance of injury. The warm-up should consist of stretching exercises that get your heart, blood and lungs working at more than a resting pace.

When you first start out, you'll experience an overwhelming urge to forget the whole thing and resume eating pizza. But the day will come when your normal workout is a piece of cake—and then you'll want to push even farther.

## Marathon Man

The ultimate proving ground for a runner is the marathon—a grueling, 26-mile 385-yard test of bodily strength and will power. Bill Rodgers, who holds the American marathon record with a time of 2:09:55 (set at the Boston Marathon in 1975), has been running in marathons for 27 years.

"I know what's good for me from my own experience," says Rodgers, who has no coach or personal trainer. "When I've trained well and know the competition, I'm usually confident before a race."

Rodgers recommends that beginners buy a good running book or subscribe to a runner's magazine for tips on developing a personal program. "It's also good to join a running club, or just talk to experienced runners. There are too many people going too hard and too fast. You have to be patient and work with your body," he says.

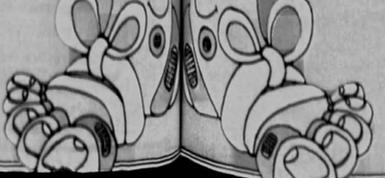

## WHAT TO DO WHEN IT HURTS

On the road to glowing health and inner peace, the beginning runner will doubtless stumble across a variety of injuries common to the sport. If you pull, strain or sprain something, try a hot bath, liniment or an ice pack on the injury. As you heal, try running at a slower pace on a softer surface. If the injury worsens, knock off for a few days.

**Runner's toe**—This occurs when a toenail is bruised, turns every hue of purple, and eventually falls off. Trimmed toenails and decent running shoes are the best means of prevention.

**Shin splints**—Running too high on your toes or wearing stiff shoes on a hard running surface causes this painful injury. The shin muscles pull at the surrounding shinbone membranes, which results in tearing or separation of the membranes. Doing stretches designed to limber up the back of the leg can help you avoid shin splints, as can running on a soft surface and wearing flexible shoes.

**Blisters**—Good shoes and petroleum jelly or moleskin on rubber spots help avoid blisters. To treat a blister, puncture with a sterilized needle, apply a disinfectant cream or ointment and cover for a few days.

## In the Beginning

Modern marathon racing has classical and heroic origins. In 490 B.C., the Greek allies fought the decisive battle of the Persian War against the army of Darius, the Persian emperor. The Athenian-led Greeks won a stunning victory on the Plain of Marathon, and a runner, Pheidippides, was dispatched to Athens with word of the victory. Legend has it that Pheidippides ran the entire 26 miles without a stop, delivered his good news, and dropped dead.

In 1896, the first of the modern Olympic Games were held in Greece. As host nation, the Greeks chose to revive the marathon. The British tagged an additional 385 yards onto the distance of the race during the 1908 Olympics, held in England. (The proper Britons wished the race to commence at Windsor Castle, and the extra yards have become part of the official distance.)

Today, many cities around the world hold annual marathon races which attract runners of every nationality. Among the most noteworthy are the Boston and Fukuokoa, Japan marathons.

## A Day at the Races

Marathons, mini-marathons and races of all distances are held in every state, all year long. A sampling:

- BOSTON MARATHON**  
Boston, Mass. . . . . April 16
  - MILE HIGH MARATHON**  
Denver, Colo. . . . . May 6
  - MADISON MARATHON**  
Madison, Wis. . . . . June 30
  - MAYOR DALEY MARATHON**  
Chicago, Ill. . . . . Sept. 23
  - LOS ANGELES HARBOR MARATHON**  
Los Angeles, Calif. . . . . Sept. 30
  - PROVIDENT MARATHON**  
Philadelphia, Pa. . . . . Oct. 14
  - NEW YORK CITY MARATHON**  
New York, N.Y. . . . . Oct. 21
  - WHITE ROCK MARATHON**  
Dallas, Tex. . . . . Dec. 1
  - MARYLAND MARATHON**  
Baltimore, Md. . . . . Dec. 2
- For a more complete listing, plus information on entry requirements and other details, consult *THE RUNNER'S GUIDE TO THE U.S.A.*, by Martina D'Alton, Summit Books, 1978, \$6.95.

*The Complete Book of Running*, by James F. Fixx, topped the bestseller list for 22 weeks last year. Fixx writes informally and personally about the physical and psychological aspects of running. He cites studies and medical opinions to back up his claims concerning the benefits of running, and includes guidelines for setting up a personal running program. James F. Fixx, *THE COMPLETE BOOK OF RUNNING*, Random House, 1977, \$10.

## TUNE-UP

Save yourself the torture of massaged muscles by loosening up before you take to the jogging trails. You shouldn't expect your body to function at peak efficiency without some advance notice. Stretching your legs before you run can help prevent injuries that could inhibit you from further exercising. These two easy exercises will warm up your legs to avoid muscle strain:

(At top) With your hands on the floor, bend one leg as shown. Attempt to press down with the heel of the extended leg. Do this five or six times with each leg.

To stretch the backs of your legs, try the three-step exercise shown at right. Sit on the ground with your legs bent as shown, knees to your chest and hands grasping the sides of your feet. Then "walk" your feet out as shown, continuing to hold onto them. When you've straightened your legs, pause and hold the position for a few seconds. Repeat five times.

**FOR THE RECORD**—In 1929 a transcontinental footrace was run from New York to Los Angeles. The winner, Finnish-born Johnny Salo, finished the 3,665-mile course in 79 days, an average of 46.5 miles per day. His time was 525 hours, 57 minutes and 20 seconds, and he won the race by 2 minutes and 42 seconds.

## What's a Shoe To Do?

The main job of a running shoe is to cushion shock, and to keep your foot straight and your heel steady. Your best bet is a general-purpose or training shoe. It should be flexible at the ball of the foot, and the heel should be at least a half-inch higher than the toe.

Running shoes are the only equipment you need, and it's worth it to lay out the money for a good pair. Good running shoes range in price from about \$25 up to \$40 or more. Consult *Consumer Guide*, *Runner's World* and *The Runner* magazines for price lists and comparative ratings.

"The masses have finally discovered what athletes have known all along—exercise makes you feel good."

—JAMES FIXX, author and runner

# SOUND THE CHARGE!

## '79 FORD MUSTANG TURBO.

Here's a whole new breed of Mustang. It's the exciting Turbo-charged Mustang from Ford. Dramatic sports car styling with an excellent combination of responsive performance and fuel economy.

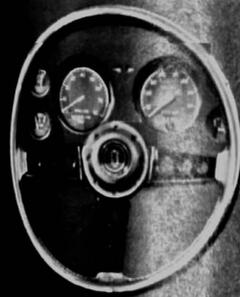

**Turbocharger:** Mustang's AiResearch TO-3 Turbocharger is actually a turbine compressor driven by wasted exhaust gases. At higher engine speeds, it

compresses more fuel/air mixture into the cylinders, enhancing combustion for increased power output. Additional power that's only there when you call for it. That means you get 4-cylinder economy combined with performance comparable to larger V-8 engines.

**Michelin TRX Tires:** Mustang's optional Michelin TRX 190/65R X 390 ultra-low profile tires are

built in America. A vehicle with a low drag coefficient requires less engine power to propel it to any given speed in low ambient wind conditions.

**Full Instrumentation:** All Mustangs feature easy to read instrumentation including an engine tachometer, oil pressure, ammeter, engine temperature and fuel gauges with international symbols, a speedometer marked in both miles and kilometers per hour, and a trip odometer.

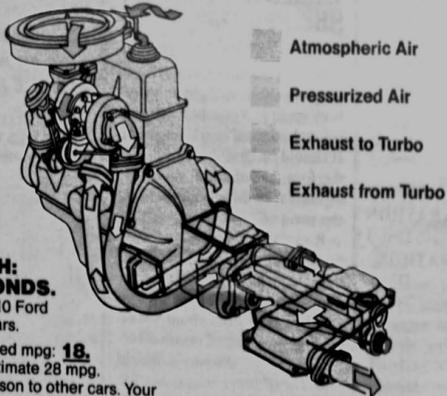

**Precise Handling:** With sports car features like a modified MacPherson front suspension, four-bar link rear suspension, rack and pinion steering and front stabilizer bar, all Mustangs have precise handling.

For even better handling, there's the optional Handling Suspension and radial ply tires. Included are radial-tuned springs and shock absorbers plus stiffer suspension bushings and a rear stabilizer bar for increased roll control.

To get the ultimate in Mustang handling order the optional Michelin TRX tires, metric forged aluminum alloy wheels and specially tuned suspension. This system provides Mustang with cornering ability comparable to high performance sports cars costing thousands more.

Experience the exciting new Mustang Turbo for yourself. Test-drive one at your local Ford Dealer.

### Optional 2.3 Litre Turbo Engine

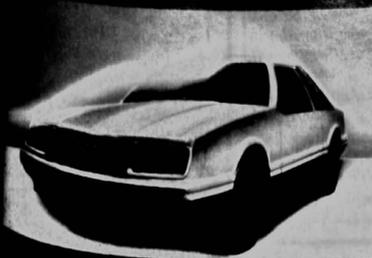

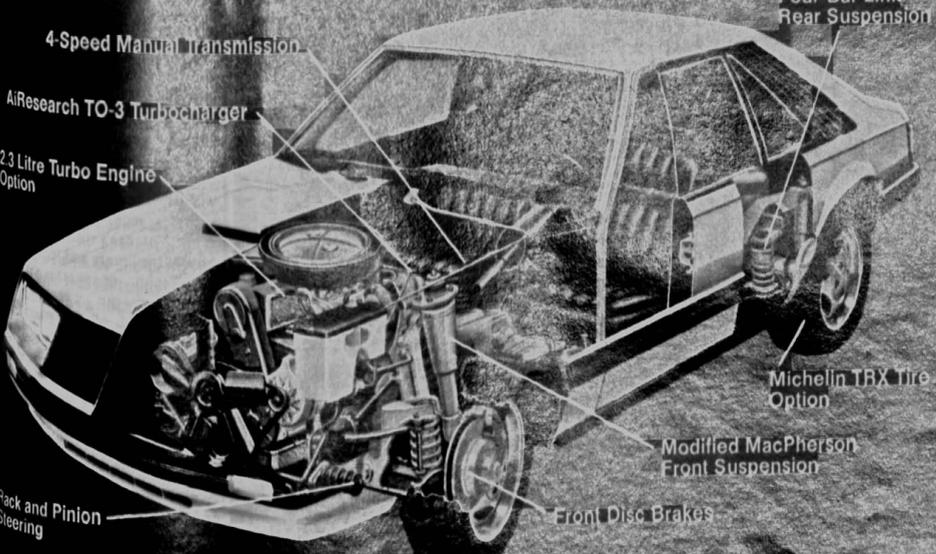

**0-50 MPH: 7.1 SECONDS.**  
Average of 10 Ford tests on 3 cars.

EPA estimated mpg: **18.** Highway estimate 28 mpg. For comparison to other cars. Your mileage may vary, depending on speed, weather and trip length. California mpg is lower. Actual highway mileage will probably be lower than estimate.

mounted on metric 390MM x 150MM forged aluminum alloy wheels. Included is a specially tuned suspension system. This system gives Mustang its highest level of handling, directional stability and steering response.

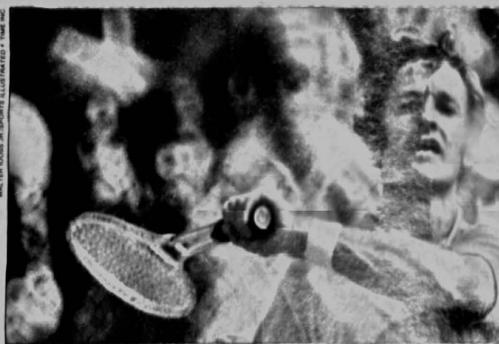

**Aerodynamics:** Mustang's dramatic sports car styling with a drag coefficient of .44 on the 3-door and .46 on the 2-door gives it one of the most efficient aerodynamic designs of any car

## TENNIS *The tennis boom has more than 40 million Americans hitting a ball over a net with a racket.*

Four-time Wimbledon champion Rod Laver recommends that beginners follow these six steps to achieve a smooth and accurate tennis stroke:

1. Keep your eyes on the ball.
2. Get your weight forward and keep your feet apart.
3. Get your racket back quickly by pivoting.
4. Keep your wrist locked.
5. Put your body weight into the shot.
6. Follow through.

Rod Laver, TENNIS DIGEST, Follett Publishing, 1975, \$7.95.

### Tips from Dick Gould, Champion Tennis Coach

If you have the motivation to become a winner in tennis, but only average physical ability, you can still do it. That encouragement is from Dick Gould, and he should know all about victory in tennis. Coach of Stanford University's varsity tennis team (the 1978 NCAA champions), Gould has seen a lot of winners.

"There is a special drive inside people who strive to win, and it forces them to prepare until they reach their goal," Gould says. "If you have that kind of motivation, you can do anything you set your mind to—whether it's to be a tennis star or a business executive."

Although his business is coaching winners, Gould feels that the exercise and enjoyment tennis provides are the best things the game has to offer students.

"It's not necessary that you be a top performer," he says. "You will still feel refreshed, because tennis is such an invigorating game. You can't spend all your time at the library and feel your best. Tennis—or any other physical activity—can get your mind off your studies." To that end, Gould has one final tip to offer the tennis player:

"Enjoy it. When you start getting furious about your playing, it's time to quit. Then the game is controlling you, and it's not a game anymore."

*"I began playing tennis seriously when I was 8 years old. And while I may get tired from playing—especially in matches against Connors or Borg—I never tire of the game."*

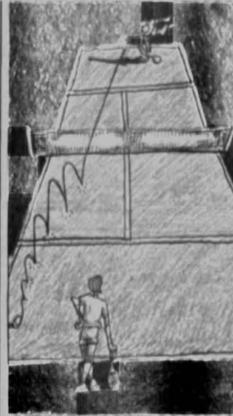

—JOHN MCENROE, 20-year-old winner of the 1979 Colgate Grand Prix Masters pro tournament

### In Praise of Wood Rackets

Although the tennis market has been bombarded with rackets made of everything from steel to fiberglass, wood is still considered the best material for a racket that will allow you control and "feel" for your shots.

The ball leaves a wood racket with only the force that the player has applied, and this control is especially helpful to the beginner who has trouble keeping the ball in the court.

Wood rackets range in price from \$20 to \$60. If you buy one, you should also invest in a press to keep the wood from warping in humidity and heat.

*When people are practicing or warming up, they often let the ball bounce two or more times before returning it. But allowing extra bounces really defeats the purpose of practice, which is to tune you up for match play. Waiting at the baseline for the ball to arrive not only burns fewer calories, it can also hurt your game by fostering bad habits and making you less responsive.*

### Doubles Tactics & Strategies

For the weekend player who prefers social tennis over competitive or highly strenuous play, doubles tennis can provide a slower pace and a more relaxed game. Doubles, however, is a team pursuit that requires team strategy and tactics.

"Doubles is not just singles with two players on each side of the net," says Tony Trabert, former tennis pro and author of *Winning Tactics for Weekend Tennis*. According to Trabert, a major problem for novice doubles players is not knowing where to stand or where to return the ball.

When an opponent is serving to your doubles partner, says Trabert, you should stand with your heels on the service line. This puts you deep enough to cover your side of the court if your partner makes a weak return. If he or she makes a good return, you should then move forward into a volley position.

The best place to hit the ball in doubles play, according to Trabert, is up the center of your opponents' court. They will have less angle on their return and may get confused over who takes the ball.

Tony Trabert, WINNING TACTICS FOR WEEKEND TENNIS, Holt, Rinehart & Winston, 1972, \$5.95.

### Take a Course!

If you're fed up with chasing balls you've sent flying over the fence, some basic tennis instruction can help you iron out the kinks in your game.

"Tennis instruction is not only to train those who want to become champions, but also to help the average player enjoy tennis for fitness and fun," says Eve F. Kraft, director of the Education and Research Division of the U.S. Tennis Association.

Such instruction can take many forms. Enrolling in an introductory course at your col-

lege or university may be your best bet. Most colleges have tennis instruction in their curriculums; the classes are usually conducted as group lessons within the physical education department. Group or private lessons at a local club are another possibility. If you want total, crash-course immersion in tennis, you might consider a camp or clinic—though these can be expensive.

For information and lists of tennis camps or instructional programs in your area, write the U.S. Tennis Association, 729 Alexander Rd., Princeton, N.J. 08540.

### Harvard Prof Psychs Out Players

As the game of tennis has gained popularity, it's become possible to categorize certain types of players by psychological makeup. So says Dr. Alvin Kahn, a psychiatrist and clinical instructor in psychiatry at Harvard Medical School.

"Some colleagues and I were intrigued by how much a person's emotions and personality entered into his tennis game, so we began researching the idea," says Kahn. The result turned into a book called *Love and*

*Hate on the Tennis Court*. In one chapter, Kahn and his co-authors described 34 "tennis types." Here are a few of them: **The Bouncer** has a compulsive and obsessive need for the regularity and control he finds in the bouncing ritual, which can work to lessen his anxieties.

**The Equipment Freak** always has the latest composite racket and the newest in Italian tennis wear. He tries to cover up his flawed self-image with his new outfits.

**The Social Climber** spends more time in the locker room, pro shop or bar than on the court.

**The Clown** giggles when he hits the ball out, trying to convince his fellow players that it really doesn't matter to him. But inside, he's crying.

Dr. Alvin Kahn, with Stanley Cath and Nathan Cobb, *LOVE AND HATE ON THE TENNIS COURT*, Charles Scribner's Sons, 1977, \$7.95.

*If you're playing tennis to shape up, you might consider trying one of the indoor court sports as well. Handball, paddleball, racquetball and squash are played at a faster pace than tennis and will give you a harder workout in the same amount of time.*

### In the Beginning

Crusaders returning from the Middle East probably brought tennis to Europe in the 12th century; the game resembled handball at that time. French monks played it inside their monasteries until 1245, when an archbishop forbade all clergy to play. French monarchs had taken up the sport in the meantime, and from them it spread to the royalty of other nations.

The monks and kings played tennis by batting the ball with their bare hands. (The French still call tennis *jeu de paume*, game of the hand.) After years of bruises and blisters, a protective glove was developed, and around

### EYES

Playing close to the net requires fast reflexes to avoid getting an eyeful of tennis ball, which can result in bruises, cuts from broken glasses, and even retinal detachments.

### SORE SPOTS & DANGER POINTS

### ELBOW

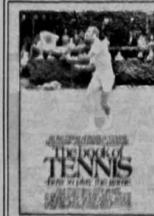

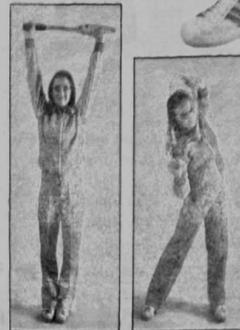

Tennis elbow is an inflammation near the elbow joint, caused by poor muscle strength and faulty strokes.

### FOOT

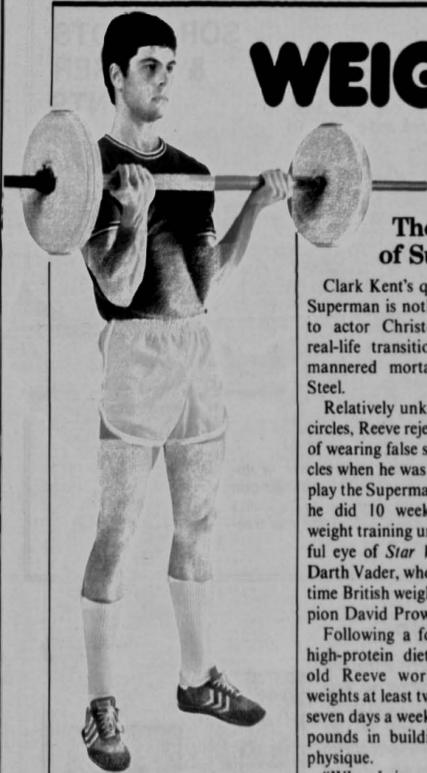

Blisters can result from friction or improper shoe fit. (Moleskin or Vaseline on "hot spots" can help you avoid them.) Badly worn soles can hinder your traction and cause ankle sprains.

### TUNE-UP

*Here's an exercise that utilizes your racket to help limber your back and shoulders before you hit the courts: Standing erect, stretch as high as you can, holding up your racket on your palms. While still holding the racket, slowly lean back and bend at the waist. Feel your muscles stretching as you bend. Straighten up and lower the racket behind your head. Then bend sideways and twist forward from the waist. Do this five times on each side.*

In the *Book of Tennis*, professionals show you in pictures how to play the game. The black-and-white photos and diagrams are accompanied by easy-to-understand explanations and pointers on all aspects of tennis, from serving to practicing with a backboard. Corneliu Lumiere and the *WORLD TENNIS* magazine editors, *BOOK OF TENNIS: HOW TO PLAY THE GAME*, Grosset & Dunlap, 1970, \$2.95.

**Q:** What is the most weight ever raised off the floor by a human being?  
**A:** In 1957, Paul Anderson of Toccoa, Georgia, raised 6,270 pounds in a back lift.

## WEIGHTS *If you train properly with weights, you can tone, shape and strengthen your entire body.*

### The Making of Superbody

Clark Kent's quick change to Superman is nothing compared to actor Christopher Reeve's real-life transition from mild-mannered mortal to Man of Steel.

Relatively unknown in acting circles, Reeve rejected the option of wearing false styrofoam muscles when he was approached to play the Superman role. Instead, he did 10 weeks of rigorous weight training under the watchful eye of *Star Wars* archfiend Darth Vader, who is really three-time British weight lifting champion David Prowse.

Following a four-meal-a-day high-protein diet, the 26-year-old Reeve worked out with weights at least two hours a day, seven days a week. He gained 30 pounds in building his Superphysique.

"When I signed for the part, I looked like Jimmy Stewart standing sideways," says Reeve. "I had to get to a state where I could believe I was Superman."

Weight training is a system of resistance exercises that use weights to develop specific muscle groups. Many top athletes combine weight training with regular workouts to increase their stamina and muscle tone. Your age, sex, body weight and experience affect the type and number of weight training exercises you should do. Heavy lifting with minimal repetitions builds muscle size and strength; lighter lifting with more repetitions tends to build endurance and muscle definition.

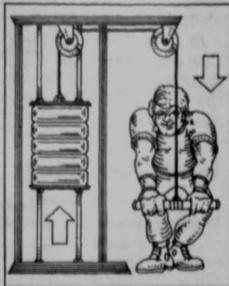

### Your Own Workout

Weight training exercises emphasize the six basic muscle group areas: the neck and shoulders, chest, back, stomach, arms, and legs. The proper method for training with weights is to isolate a specific muscle group and then exercise it intensively.

A beginner's workout shouldn't take longer than half an hour. As your body becomes accustomed to the workouts, you can gradually increase the time to an hour. The amount of weight you lift will vary from exercise to exercise and depend on your own physical capabilities. A good rule of thumb is to use a weight you can comfortably handle for 10 repetitions (reps) of an exercise. When you can easily do three sets of 10 reps, add another five pounds and begin again.

Experts advise beginners to start slowly and develop a total body program—moving from station to station on a Universal Gym, for instance, to give all the muscles a workout. There are many weight training books on the market that can help guide you in designing a personal program.

The building of muscle involves first tearing it down with concentrated exercise, then allowing it to rest so that the tissue can grow back a little larger than before. That tearing down of muscles can do damage if practiced too often. It is important, therefore, to lay off the weights and rest at least every other day to allow tissues to rebuild. After a few sessions, you should see results that even a week of sports activity wouldn't provide.

plates at the ends of the bar.) Although it isn't needed for some weight training exercises, the added support of a bench is generally safer than the floor because you're less likely to strain your back muscles or drop a barbell on your chest. Benches range in price from \$20 for a simple flat seat with standing metal slots to \$225 for an outfit with features like leg lifts and an adjustable incline.

*"For three days a week, lifting weights becomes part of my life style to keep all my muscles in shape."*

—SALLY WORDMAN, junior at the University of Tennessee

### No Ms. Hulk

Contrary to popular misconceptions, weight training will not turn women into incredible hulks. Developing huge Mr. Universe muscles takes years of long daily workouts in addition to the male hormone testosterone, present in only small amounts in women. But weight training will develop a woman's endurance and muscle tone, for a body that's not only better-looking but also stronger.

"Everyone should do some weight training, even if they're not training for a sport," advises Jandrena Irwin, the 19-year-old University of Nebraska freshman who is currently the national women's AAU Powerlifting Champion in her 132-pound weight class. "The first thing a lot of women think is that they're going to get big. They won't.

When bodybuilders work with weights, they often feel a tingling sensation caused by increased amounts of oxygenated blood swelling muscles and flushing the skin. This high is called "the pump." Pleasurable because it's an exhilarating feeling, the pump is also a visible sign of muscle growth.

You can stay the same size—or even lose weight—while getting into shape."

As a high school sophomore, Irwin began weight training to improve her performance in track and volleyball. Now she works out two hours a day, six days a week, under the guidance of her father, who is also her coach.

"Sometimes it gets lonely, but after you win and know you're the best, it's all worthwhile," Irwin says. She follows a varied diet but keeps a wary eye out for sugars in order to remain in her weight class.

To win last year's title, Irwin lifted a record total of 690 pounds divided among the squat lift, bench press and dead lift. She hopes to open her own health club someday. But for the present she continues to train, and this spring she'll defend her championship.

### The Sporting Side of Weights

Two competitive sports involving weight training are weight lifting and bodybuilding.

The object of weight lifting is simply to outlift your competition. Male lifters are divided into 11 body-weight divisions ranging from flyweight (114½ lbs.) to super-heavyweight (over 242½ lbs.). Women have nine categories, from flyweight (96½ lbs.) to heavyweight (over 181 lbs.). The barbell is made progressively heavier during the competition, with weight increasing in multiples of five pounds.

Bodybuilding is not so much concerned with shows of strength as it is with beauty of physique. Like a sculptor, the bodybuilder uses weight training techniques to create his or her version of physical perfection. Competitors perform personal posing routines and are judged on muscle development and poise.

### Sore Spot

The most common injury in weight training is lower-back strain resulting from poor body position during an exercise. To avoid this, make sure you're doing the exercises correctly. Slow, steady pacing and proper breathing are also important. A 10-minute warm-up routine of rope-skipping, stretching exercises or running is also advisable, to allow your muscles to limber up before you start lifting.

### LIFTING LINGO

#### DUMBBELLS:

The original "dumbbells" were bell-shaped pieces of solid lead that didn't ring when they were lifted. Today, these small, hand-held barbells are usually bought in pairs.

#### BENCH:

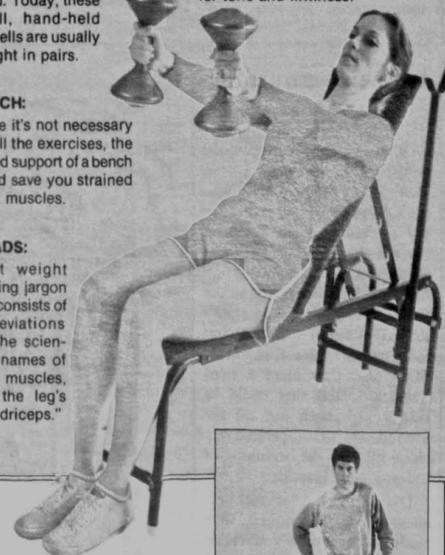

While it's not necessary for all the exercises, the added support of a bench could save you strained back muscles.

#### QUADS:

Most weight training jargon just consists of abbreviations for the scientific names of your muscles, like the leg's "quadriceps."

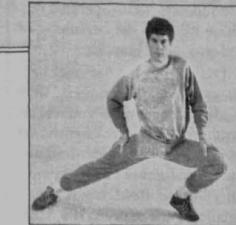

#### BICEPS:

She can't turn these arm muscles into incredible hulks—but look out for tone and firmness.

### TUNE-UP

Limbering up shoulders, back and legs is a must for weight trainers who don't want to strain themselves. These two exercises will help: (Top) Ease slowly into the position shown. Straighten up, then bend the other leg. Repeat five times on each side. (Middle and bottom right) Sit on the floor with your arms extended behind you, palms flat and feet pointed. Next, slide your hips forward as shown and pause for a few seconds to stretch your muscles. Repeat five times.

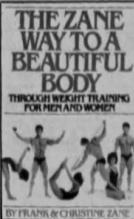

### In the Beginning

In a sense, weight lifting is one of our oldest sports. The whole thing probably started when one caveman challenged another to lift a craggy boulder. It was first used as a method of training, however, in ancient Greece. Milo of Croton, famed as Greece's best wrestler, used to train for matches by running laps around the Olympic stadium with a newborn bull slung over his shoulders. Milo continued this training program every day for four years. As the bull grew, so did his muscles.

In 18th-century London, the circus strong man emerged. Thomas Topham, better known as "The Strong Man," was said to have the strength of 12 men. In a 1741 performance, using a rope and tackle laid over his shoulders, Topham raised three hogsheads of water, a total of 1,836 pounds, several inches from the ground.

Eventually the carnival and vaudeville shows gave rise to standardized amateur competitions. The first world weight lifting championship was held in London in 1891.

In their book *The Zane Way to a Beautiful Body Through Weight Training for Men and Women*, Frank Zane (a world bodybuilding champion) and his wife Christine present a progressive series of over 120 exercises that can be done with minimal equipment at home. Also included are a nutrition guide and a section on exercises for couples.

Frank and Christine Zane, *THE ZANE WAY TO A BEAUTIFUL BODY THROUGH WEIGHT TRAINING FOR MEN AND WOMEN*, Simon and Schuster, 1979, \$9.95.

# BIKING

*The simple action of pedaling can strengthen your legs, arms, back and abdomen.*

## In the Beginning

Pedal-powered bicycles have existed for only about 140 years, even though Leonardo da Vinci designed one on paper in the 15th century. In the late 1790s, the Comte de Sivrac of France put a crude wooden horse on two wheels and fastened a saddle on the top. But his construction had no drive mechanism, so the rider had to push it like a child's scooter. It wasn't until 1840 that a Scotsman named Kirkpatrick Macmillan developed a two-wheeled vehicle that could be ridden with both feet off the ground. His pedal-operated machine marked the beginning of self-propelled bicycles.

During the next several decades, various improvements were made in Macmillan's machine. Around 1870 an Englishman named James Starley designed and manufactured a bicycle with an enlarged front wheel and a smaller back wheel. His bike, called the "ordinary," was the first design to allow the rider to thrust his legs downward effectively while pedaling.

The Starley ordinary is generally considered to have been the first truly practical bike. Some ordinaries were brought to the U.S. during the 1876 Centennial Exposition in Philadelphia. When the exposition ended, the bicycles were purchased by the Cunningham Company, which went on to manufacture them under the "Columbia" trade name. Although the Columbia ordinary weighed over 70 pounds and cost \$313, bicycle fever quickly spread throughout the United States.

*Bicycling is a great way to see the countryside and condition your body at the same time. Nearly all the large muscle groups of the body are exercised when you ride; your breathing is deepened, your circulation stimulated and your endurance increased. Cycling can help you lose weight as well. At average speed, a woman on a bike burns around 300 calories per hour, a man 450.*

## Your Own Workout

If you are a beginning rider, you will be using your muscles in a new way and from a different position. To avoid soreness, you should start out with short rides (perhaps half a mile), gradually increasing the distance as your muscles and cardiovascular system get conditioned. Use low gears to start with (pedaling is easier), and work up to higher ones as you get in shape.

One exercise that will help can be done on your dorm room or living room floor. Lie down on your back and stretch your arms over your head. Holding a 15-pound weight in each hand, lift your arms over your head and down to your stomach; then return them to the floor above your head. This exercise will strengthen your chest and diaphragm. Another good exercise is running up and down stairs or bleacher seats to develop your legs.

When you've worked up to distance riding, don't forget to "warm down" at the end of your ride. Take the last couple of miles slowly in order to relax your muscles and prevent cramping.

## Going Nowhere Fast

What if you don't like biking in a rainstorm?

Bad weather can't stop you from cycling if you have an exercise bicycle. These stationary models allow you to pedal indoors while watching television or daydreaming, since you have no gears to shift or traffic to watch for. You burn approximately the same number of calories on an exercise bike as you would on a real bicycle, but fewer muscles are worked since there is no strenuous hill-climbing involved.

There are dozens of exercisers on the market, ranging from a \$500 model with an electric motor to a couple of metal tubes (\$50) that attach to a real bike and transform it into an exerciser.

## LOOK OUT FOR BIKE RACERS!

The frequency of bicycle races and the number of bike clubs are increasing, but bike racing as a sport has not even begun to peak, according to Otto Wenz, president of the U.S. Cycling Federation.

"Cycling is really starting to pop, and I expect it will be as popular as soccer in five or six years," Wenz says.

On the college level, bike racing is mainly an intramural sport, although several colleges in the East (such as Yale and West Point) have given varsity status. Others schools have cycling clubs which participate in local races. Cyclists of all

levels can race in local events, since competitors are usually matched according to age, sex and ability. To join a bicycle club, check with your local bike shop or write the U.S. Cycling Federation, Box 669, Wall Street Station, New York, N.Y. 10005.

Track events for bicycles are held in a facility called a "velodrome," a banked oval track which resembles an auto speedway. Like a speedway, a velodrome's turns are steeply banked and its straightaways are level. Although Europe abounds with both indoor and outdoor velodromes, there are only 13 in the U.S. (all of them outdoor concrete tracks). Among the American cities that have velodromes are New York, St. Louis, Milwaukee and Atlanta.

## John Marino, Cross-Country Champ

"Of all sports, bicycling is the most functional. You can get a workout while doing something useful like going to the grocery store or going to work," says cross-country bicycling champion John Marino.

Short trips such as these were the extent of Marino's cycling until three years ago, when he decided on impulse to go after the transcontinental bicycling record. After two and a half years of training to build his endurance, he finally departed from Santa Monica on August 13, 1978. He arrived in New York City 13 days, one hour and 20 minutes later, breaking the old record by better than five days.

Marino was accompanied on the trek by a motor home carrying four people, among them a masseuse, a mechanic and a public relations man who arranged police escorts through towns along the way to avoid traffic tie-ups. Marino slept only three hours per night and rode the last 400 miles—28 hours' worth of cycling—without a break. This August he plans to make the ride a second time in an attempt to beat his own record.

"I know I can break last year's record," Marino says. "I've learned from my mistakes and I've improved my endurance. More important, the mental pressure is off because I know I can make it."

## Bike Hikes

Hiking across the city or the countryside on your bicycle can challenge your endurance and give you a chance to see the scenery as you never could before.

For information on nationwide bicycle tours, check out *The North American Bike Atlas*. This book lists 175 cycling routes from coast to coast, as well as in nine Canadian provinces, Mexico, Central and South America, and Europe. (Send \$3.50 to: American Youth Hostels, Delaplane, Va. 22025.)

Another national organization that provides free information to interested bikers is Bikecentennial, Box 8308, Missoula, Mont. 59807, (406) 721-1776.

A section on do-it-yourself repairs and a bicycle buying guide are two features of *Richard's Bicycle Book*, by Richard Ballantine. Illustrations provide step-by-step instruction on maintenance and repairs. The book also lists names and addresses of mail-order parts shops and touring and racing clubs. It is revised annually, so information on prices, trails and cycling innovations is kept up to date. *Richard Ballantine, RICHARD'S BICYCLE BOOK*, Ballantine Books, 1978, \$4.95.

## The Safest Routes

Bikeways—regulated safety routes for bicycle riders—are a growing national phenomenon. During the past 17 years, more than 250,000 miles of bikeways have been established in the U.S. They usually take the form of a series of city streets or country roads marked to guide the cyclist and to alert motorists.

The first bikeway, a 25-mile route, opened in Homestead, Florida in 1962. Two years later, a 300-mile bikeway in Wisconsin was opened.

Abandoned railroad tracks in scenic countryside are also being converted into bike paths. Local or state governments buy up trackage, rip out rails and smooth the surface with asphalt.

## TUNE-UP

*Leg strength is the most important element in biking. A good way to get your legs in shape is to jump rope. A daily stint will increase strength from your ankles to your thighs.*

*To start, try jumping for just a few minutes the first couple of days, increasing the time as you feel stronger. Always jump from the balls of your feet. You may feel awkward at first, but a little perseverance will have you skipping along like Muhammad Ali.*

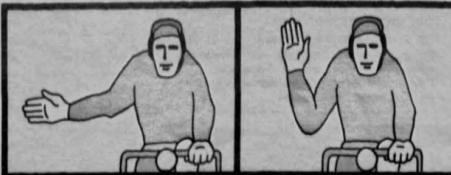

## A Better Breed of Bike?

A mechanical engineering professor has redesigned and built a 1930s "recumbent" that could soon be mass-produced as a better breed of bicycle. The recumbent is a variation on the conventional bike in which the cyclist is seated behind the pedals and supported by a backrest.

According to its designer, Dr. David Wilson of the Massachusetts Institute of Technology, the recumbent is safer than a 10-

speed because the rider is less likely to be thrown forward from a reclining position. In addition, all muscle pressure is directed onto the pedals, which allows the cyclist to attain speeds of up to 30 m.p.h.

The recumbent was produced experimentally by the British and French in the '30s, but failed to catch on. Wilson's new-and-improved model will be built and sold by special order. Prices will range from \$800 to \$1,500. If the recumbent sells well, mass production will soon follow.

*Cycling on city streets or other much-traveled roads requires certain safety precautions. To improve your visibility to motorists, you should wear light clothing. Equipping your bicycle with a tall bike flag will make you stand out even more. In addition to reflectors on your spokes and seat, a headlight is essential for riding at night or on dark days. Finally, be sure to use hand signals when turning corners or stopping so that motorists will know your intentions.*

*"Biking clubs are not just for the experts. When I joined the cycling club at the University of Florida, I was only a recreational rider."*

—DAVID ISRAEL, college sophomore who recently biked 4,500 miles from Gainesville, Florida, to Seattle, Washington

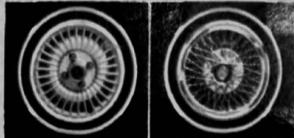

# THE FUTURA IS NOW.

Right now! Ford Futura gives you advanced styling with the look of tomorrow today. A sporty coupe with all the style and flair that's just right for the life you're livin'. You don't have to wait for the future to afford an expensive personal car. You're ready for Futura—now!

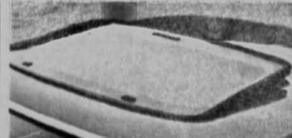

**Now** is a sporty way of life. Futura matches it with a sporty rack and pinion steering and an economical 2.3 litre overhead cam engine with 4-speed manual transmission.\*

**Now** means personal style. Add your own touch. Order your own personal Futura to your own personal taste.

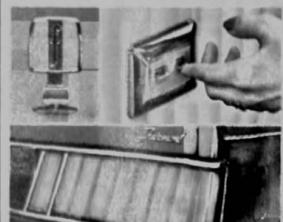

\*EPA estimated MPG: 20. Highway estimate 31 MPG. For comparison to other cars. Your mileage may differ, depending on speed, weather and trip length. California MPG is lower. Actual highway mileage will probably be lower than estimate.

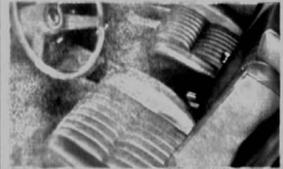

**Now** is a flip-up open air roof... open up your roof and let the sunshine in.

**Now** means you've got your own style... and we've got the car to match.

**Now** means luxury touches and high style, coming and going. Why not the optional touch of power windows?

**Now** is comfort. The luxury of 5-passenger roominess.

## FORD FAIRMONT FUTURA

FORD DIVISION

The future isn't someday, it's now. Why wait? Step into the '79 Futura—now!

## SWIMMING *A good workout in the water makes use of almost every muscle in your body.*

The world's largest swimming pool? The saltwater Orthlieb Pool in Casablanca, Morocco measures 480 by 75 meters. That's almost nine acres of water.

### Your Own Workout

Boston University swim coach Raegh Wetmore suggests this five-step plan to get you into shape:

**Step 1:** Swim one lap, then rest for 10 seconds. Repeat 10 times. (A lap is the distance from one end of the pool to the other. Standard length is 25 yards.)

**Step 2:** When you can make eight laps without tiring, double the distance to 16 (400 yards). Rest 10 seconds after every two laps.

**Step 3:** Swim eight laps consecutively, then rest for 10 seconds. Repeat.

**Step 4:** Swim 16 laps consecutively, then rest for 30 seconds. Repeat. (To minimize the risk of developing tendinitis in your shoulders, Wetmore recommends staying at step four for two weeks.)

**Step 5:** You should now be able to swim 32 laps (one-half mile) without stopping. Do this three times a week to keep your lungs, heart and muscle system in tip-top shape.

### Improving Your Stroke

The distance from one end of the pool to the other can seem infinite, especially to the swimmer just beginning a lap program. These tips on improving your crawl stroke will make the going easier.

**Body moves:** Keep your body parallel to the surface and in a streamlined position. Don't submerge your head completely—the water should come to just below your hairline. Roll your body only slightly when you stroke; too much movement in either direction will slow you down.

**Arm forces:** Don't overexert your arms by digging straight down toward the bottom of the pool. You'll get just as far, and with less effort, if your arms just skim the water. Angle each arm into the water, with the elbow slightly bent. Reach forward, fingers together, and pull the water toward your chest. Push the water back so that you've made an S with your arm.

**Getting a kick out of it:** The kick comes from the hips and thighs, not the knees. Kick upward with straight legs, using your feet almost like flippers. Try counting six kicks for every arm cycle.

**Catching your breath:** Don't lift your head out of the water to breathe. Instead, rotate your head from the neck, to one side only. Inhale when your head is turned to the furthest point, exhale when your face is back in the water.

### In the Beginning

The first swim meet on record took place in Japan in 1603. But the British are credited with starting the growth of swimming as a popular sport. In fact, the word "swimming" derives from the Old English "swimman." After Captain Matthew Webb became the first man to swim the

English Channel in 1875, pools were built all over London and the first swimming associations were formed.

Competitive swimming emerged in the U.S. when the first AAU meet was held in 1893. Three years later, freestyle swimming events were part of the first modern Olympic games.

### TUNE-UP

Looking good in your swimsuit starts with a flat stomach. This exercise will do the trick:

Lie down on your back, arms stretched over your head, fingers and toes pointed. All in one motion, lift your legs and upper body off the floor and touch your toes. (Your buttocks should be the only part of you still on the floor.) Hold and count to five.

Stiff shoulders can cause tendinitis when you swim. Here's a simple exercise that will stretch your shoulder muscles:

Grip a towel in both hands behind your back. Lift your arms as far overhead as you can. Reverse the movement with the towel overhead, reaching backward and downward, until your shoulders feel loose.

### CRAMPS

You're more likely to develop a leg cramp—rather than stomach cramps—when you swim after a meal. Why? Because a large amount of blood goes to your stomach to aid in digestion, leaving your extremities short on circulation and prone to cramps.

**To work out a leg cramp:** Float on your back and bring the leg close to the surface. Massage the leg to relax the tissue and help the blood circulate. Knead the muscle with both hands several times, alternately rubbing up and down and pinching the flesh. Then slowly exercise the leg.

"Not only will swimming work almost every muscle in your body, but your cardiovascular system will also benefit tremendously."

—BILLY FORRESTER, Olympic medalist and Auburn University student

# OUT FRONT IN VANS. FORD!

More Ford vans are on the road today than any other make. There are good reasons why!

(based on cumulative registrations as of 7/1/77)

Advanced van design. Ford's engine is set forward—for easy entry and easy move-around room. Ford vans are built tough, with rugged body-on-frame construction.

Personalize your Ford, or buy one already customized.

If you're really into vanning, you're into FORD!

Owner-painted rocker panel.

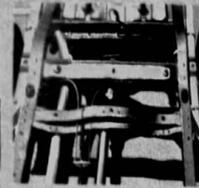

## Ford's van variety

Everything from a "Cruising" van already customized to a "Free Wheeling" van (shown with optional portholes, pushbar, fog lamps, wheels and tires).

## Ford's roomy design

Lots of livin' room! Even tilt steering wheel, swivel/reclining chair options.

## Tough frame

Separate body-on-frame, cushioned by rubber mounts.

FORD

FORD DIVISION

# BODY/MIND *Could it be possible that the path to your soul is the one you're running on?*

**THE INNER EXPERIENCE.** Right after an intense and exhausting football game, ex-Cincinnati Bengal Mike Reid used to spend hours at the piano producing what he felt was his best music. Golf pro Arnold Palmer believes that when his mind is calm, he can focus his attention so completely that his body performs with its own "internal sense of rightness."

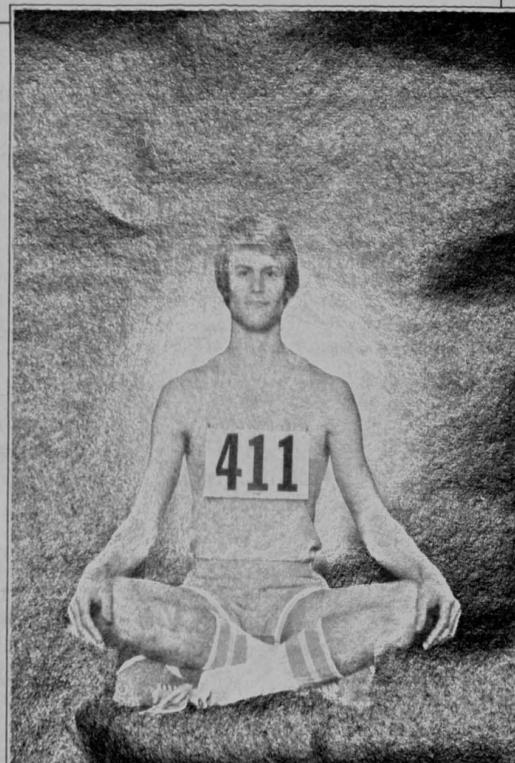

The experiences of Mike Reid and Arnold Palmer are just two examples of a growing recognition among athletes and amateurs alike that the body and the mind do not function independently of one another. "Every change in the physiological state is accompanied by a change in the mental state—and vice versa," says Edward Greenwood, M.D., a consultant to the Meninger Foundation. To put it simply: Your mind affects the performance of your body, and your body has an effect on your mind.

**EAST MEETS WEST.** This holistic approach to fitness, which acknowledges that there is a dynamic relationship between body and mind, is not new. The ancient Greek, Oriental and Indian cultures knew the concept of mind-body harmony thousands of years ago. Today, everyone from the professional football player to the weekend runner is beginning to approach fitness from a less strictly physical point of view.

Tennis is a case in point. One of the best-known American proponents of the "inner" approach to sports is Tim Gallwey, author of *The Inner Game of Tennis*, Random House, 1974, \$6.95. According to Gallwey, what hinders a tennis player's performance is not faulty equipment, bad conditions or lack of expertise, but the doubt, fear and lack of self-confidence he creates in his mind. The object of the inner approach is to calm the mind and let the instincts take over.

That sudden hot streak you hit in the middle of a game, and that freedom-from-self feeling that can come with strenuous running, swimming or skiing, are examples of the state Gallwey thinks you should try for—a state in which the trained movement becomes natural and effortless because the body has taken over and the mind is out of the way.

**THE CHEMICAL CHANGE.** Not only can your mind and emotions affect your physical performance, but it also appears that exercise may enhance your mental awareness and attitude. Physicians and psychologists are currently studying physiological evidence which indicates that vigorous aerobic exercises such as running, swimming and racquetball, done regularly for sustained periods, may stimulate the production of certain body chemicals that can have the same effect as antidepressant drugs. It is already known that aerobic exercise increases the flow of oxygen to the brain and helps eliminate toxins from the body.

Other physicians believe the psychological benefits of exercise come not so much from the act itself as from the release and relaxation it affords. "I jog to keep in shape," says Marc Ross, a Kent State graduate student, "but I really look forward to my daily run because I can escape the pressures of the day. Somehow by the second mile I feel calmer, the stress subsides and I return to my studies with a clearer head."

**A NEW ATTITUDE.** Finally, it usually happens that being physically fit not only helps clear your mind and reduce tensions, but also brings a sense of control over your body and mind that can lead to a better feeling about yourself in general. In the words of body-builder Arnold Schwarzenegger:

"I think you gain a lot of self-confidence by having so much command over yourself, over your body, and that is a reflection of your mind. It carries a kind of confidence into a lot of other areas of your life."

## Sports arena response to rec demands

By CATHY BREITENBUCHER  
Staff Writer

First of two

The plans for a new sports arena are really the result of the increased demand for recreational space, according to Harry Ostrander, UI director of Recreational Services.

A 1976 feasibility study showed stability in the number of students involved in athletic programs, and a slight decrease in demand for physical education space, Ostrander said. "So all of the growth has been in the area of recreation," he said, citing the general fitness boom as one reason for higher demand for rec facilities.

"The need really was for expanded recreational use, and the solution they came up with was to move athletics to the new arena, freeing the Field House to be double-decked and renovated for increased recreational usage," Ostrander explained.

Plans for the Hawkeye Sports Arena, which were unveiled at a state Board of Regents meeting Thursday, indicated that the new facility would provide space for both intercollegiate athletics and recreation. This compromise plan, Ostrander said, was offered because of the high costs of splitting the Field House into two floors to increase rec space.

Calling the proposal a "very legitimate compromise," Ostrander admitted that there still may be some disagreements over the arena. "I don't think it's the best for athletics; I don't think it's the best for recreation," he said.

"The administration has to come up with some compromises here. There will be some objections from the athletic people; there will be some objections from the recreation people about this facility. They're getting closer, but even this (proposal) probably is not the final thing."

While the double-decking plan has been much talked about, Ostrander said he didn't know until a week ago that it was abandoned. "I found out that this had changed considerably — and costs entered in to this — that instead of renovating the Field House, they were going to leave the Field House basically as it is," he said.

"Which is fine with me because I'm reluctant to put a whole lot of money into the facility since it is 52 years old," he added. "It is a very functional facility; it's a great facility, one of the most functional in the Big Ten as far as that's concerned, so it would serve us very well as is."

"I recognize the need for a new arena. It's obviously there," he added. "This (the Field House) is an old facility, but it's old for recreation too."

Another of Ostrander's main concerns these days is the future of the UI's outdoor recreation space, especially since the Hawkeye Sports Arena and its parking lots will be constructed on open fields currently used for recreation.

"We are the only school in the Big Ten that does not have any outdoor lighted field space. In evaluating our whole program, that's probably our most serious lack of facilities," he said.

The total arena project, as presented to the regents, includes the development of the lower nine of the Old Finkbine golf course for a recreational complex. The area would include intercollegiate softball and field hockey fields, and rec fields for softball, soccer, rugby and lacrosse. Space would also be available for future flag football fields.

The plan also calls for rearrangement of the play fields in the arena area, including the addition of a flag football

## All ages in Palo

By TOM DRURY

CEDAR RAPIDS — Frank and West don't trust the nuclear power industry and those who run it.

They've read accounts of hazards producing nuclear power — plants with radiation containment, plants with plant decommissioning — and are angry at those responsible plants.

"It's obvious that they don't know what they are doing," Hope West said. "And this thing at Harrisburg — are afraid to come home. And it will never be over."

Living here, the Wests say they worried that the Duane Arnold Center in nearby Palo will in 30 years be "a radioactive hulk" that can't be taken down. The plant, which opened in 1974, has a life expectancy of 40 years.

So the Wests joined more than 100 others Saturday in a march on the Electric Light and Power Co.'s town tower. The marchers' message was that they want no more nuclear power in Iowa, they want the existing plant Duane Arnold facility — closed, and they don't want to pay the costs of the month shutdown at the plant.

The Wests are not young, stereotypical protesters. "It is a young people that can think and act," Hope says.

Karin Thompson, one of many in planning the peaceful protest, said she is a presence of people of varying ages encouraging sign.

"I think the good thing is that

## Viets smash Khmer

BANGKOK, Thailand (UPI) — Vietnamese troops using Soviet-built tanks smashed Khmer Rouge defenses in western Cambodia Sunday, driving thousands of soldiers and civilians into a major defeat in Peking forces.

The Vietnam-backed Phnom Penh government claimed its naval forces destroyed the Khmer Rouge navy in the southwestern coast, sinking capturing about 50 ships.

Thai military sources said more than 25,000 Khmer Rouge soldiers and civilians forced their way into Thailand near the border town of Aranyaprathet, 145 miles east of Bangkok, despite efforts to stop them.

The Khmer Rouge soldiers, who were supported by China, told Thai officials that Vietnamese units led by Soviet T-54 tanks began surging forward through a screen of grey drizzle Sunday morning.

**TRACTION OF FRONT WHEEL DRIVE**

**QUICK ACCELERATION**

**EXCELLENT FUEL ECONOMY**

**BUILT IN GERMANY**

**RACK AND PINION STEERING**

**ROOMY INTERIOR**

**SOLD AND SERVICED AT OVER 5,000 FORD DEALERS**

**WIDE HATCHBACK DESIGN**

# FIESTA. WUNDERCAR!

**Imported From Germany.** Ford Fiesta is Europe's most successful new car in history. (Based on new car nameplate sales in the first 24 months.) It's an import buyer's dream. A car that's at home on the San Diego Freeway as well as on the high-speed autobahn. Fiesta—Wundercar.

**Excellent Fuel Economy.** Fiesta gives you excellent fuel economy. EPA estimated mpg: 28. Highway estimate: 39 mpg. Compare this to other cars. Your mileage may differ depending on speed, weather and trip length. California mpg is lower. Actual highway mileage will probably be lower than estimate.

**At Over 5,000 Ford Dealers.** Fiesta is built in Germany and is successful throughout Europe, but it's sold and serviced at over 5,000 Ford Dealers and backed by Ford Motor Company, Dearborn, Mich. Test-drive a Fiesta and see why we call it Wundercar.

**Roomy Interior.** Performance is what Ford Fiesta is all about. With front wheel drive and Michelin steel-belted radials to help take you up hills, through mud and over ice and snow.

## Briefly

### Ugandan city taken

JINJA, Uganda (UPI) — Tanzanian troops Sunday captured Uganda's second largest city of Jinja — assuring the nation's electrical supply — but found no trace of Idi Amin, who was thought to be hiding there.

A UPI correspondent and photographer accompanied 2,000 Tanzanian soldiers on the 40-mile journey from Kampala to Jinja, across the Nile River at the Owen Falls Dam.

The dam provides Uganda with most of its electricity and it was feared Amin's troops would try to destroy it before it was captured by the Tanzanians.

Jinja residents cried "Welcome, welcome," and "Thank you, now we are free," pelting the Tanzanians with flowers as they marched down the street behind one T54 and two T34 Soviet-made tanks.

### Amin's last: death squad dispatched

KAMPALA, Uganda (UPI) — In a last fling of brutality, deposed Ugandan President Idi Amin's secret police dispatched a team of assassins on a slow, methodical murder mission across the north of the country.

At least 50 persons were killed in one small town alone, said a witness who saw

the killer squad from the dreaded State Research Center as it made its way across the country.

The witness, a Roman Catholic missionary, said the assassination team consisted of about 15 men traveling in a Mercedes Benz minibus and a blue Peugeot, accompanied by a motorcycle rider who sought out victims for elimination.

The priest said the group selected its victims from a prepared assassination list, and when it found one, he was shot on the spot and residents were warned that anyone touching the body would be executed.

Often, he said, the killers stole their victim's car.

The priest said he received a call from one town in the north, reporting tersely: "They have come and begun to kill people."

In the town of Lira, 125 miles north of Kampala, where the priest was visiting, the killers murdered about 50 people during a week of terror, he said.
