**Senate okays thermostat control plan**

WASHINGTON (UPI) — The Senate Wednesday approved President Carter's plan to regulate thermostat controls, a move that could prevent homeowners from baking themselves in the summer and freezing themselves in the winter.

The vote came on a 58-41 roll call. The thermostat control plan was part of a broader energy bill that has been under consideration for months. The measure would give agencies the authority to establish energy guidelines for the home.

**Rain reign**

The rain that brought spring to the desert continued Wednesday as snow fell in the Phoenix area. The National Weather Service predicted more rain for the area Thursday and Friday.

Local ironworkers walk, start picket

By ROY VAUGHN

Construction work in Iowa City was at a standstill yesterday afternoon when local ironworkers walked off the construction job to protest a $10-per-day cut in the wage per ton offered by their employer, the construction firm of Linquist and Flutter. The demonstration began at 11 a.m. after several meetings with the company had failed to come to an agreement.

A union spokesman said the new offer represented a 27% reduction in the rate of pay given to ironworkers for the past three years. The reduction would mean a loss of $2 per hour, the spokesman said.

The demonstration began at the construction site of the new Carver B. Ellis school on the corner of Swede Drive and Main Street. The union has been fighting for a wage increase for the past six months, with negotiations breaking down several times.

Ironworkers have been working without a contract since January, and a new round of negotiations was scheduled for this week. The union said it would continue to protest until a fair wage offer was made.

The demonstration was peaceful, with no incidents reported. The local police were on hand to maintain order.

Britain: no way out of the wilderness

It is predicted that 5½ per cent of Britain's 3½ million tons of rare birds will not return to sea one day and that 2½ million will not return at all. This is a serious crisis and we are, indeed, a great nation of birds. For how many years in the past did we have a large number of birds to choose from? The problem is not only the loss of birds but also the loss of their habitat. The forests of England have been cut down, and the countryside is becoming more and more developed. The result is that the birds have no place to build their nests. The solution is to start planting trees again and to conserve the existing forests. It is also important to protect the birds from the hunters. The government should enforce strict laws against hunting and provide more areas for the birds to live.

Dissensions about deforestation

In recent years, Britain has been the subject of much debate regarding deforestation. Many people are concerned about the loss of habitat for wildlife. For example, the government has plans to build a new airport which would require the removal of a large forest. This has led to protests from environmentalists who are worried about the impact on local wildlife.

The government argues that the airport is necessary for economic development. However, opponents argue that the airport will lead to the loss of valuable habitat.

In conclusion, the issue of deforestation in Britain is a complex one that requires careful consideration. The government needs to balance the need for economic development with the need to protect the environment and wildlife.

Feds play 'game with' habitat

At 6:30 a.m., an intruder barges into the Department of the Interior headquarters in Washington, D.C. The intruder is a Federal Agent in Charge of the National Wildlife Refuge Service. He is looking for something specific: the location of the United States' largest wildlife refuge.

"I'm here on behalf of the National Wildlife Refuge Service," the agent says, "and I need to know where this refuge is located."

The agent is part of a large team of Federal Agents in Charge who are searching for the refuge. They have been given a mission to locate all of the United States' wildlife refuges in order to create a comprehensive database for the government.

The National Wildlife Refuge System was established in 1934 to conserve and restore wildlife habitats. Today, it consists of over 500 refuges located in all 50 states. The system includes wetlands, forests, grasslands, and other important ecosystems.

In order to locate the refuges, the agents use a combination of aerial photography, satellite imagery, and on-the-ground surveys. They are also assisted by local communities and partners who have information about the refuges.

The agents are searching for the refuge located in northeastern Washington State. They estimate that it is located somewhere near a small town called "Wilderness." The agent says, "I need to know the exact location of this refuge to complete my mission."

The agents continue their search, determined to locate the refuge. Their mission is critical for the future of wildlife conservation in the United States.

Commentary

The National Wildlife Refuge System is an important part of our nation's commitment to preserving natural resources for future generations. It is a testament to the power of collaboration and the dedication of those who work to protect our environment. As the agents search for the refuge, we are reminded of the importance of conservation efforts and the need to protect our natural heritage for future generations.

Dancing on the razor's edge

Jeff Gold

On television, Colonel Gaddis (who is very much more popular than Thackeray) claims that the war is "the greatest event of our time.”" and that it is probably right. Inflation is down to a level comparable with that of the United States. Inflation, that alone is a great achievement. Colonel Gaddis is a great man. He has the ability to make difficult decisions and to see the big picture. He is a leader who can inspire confidence in his troops.

At base there is not a great deal of enthusiasm for the war. Everyone wants to control inflation, and military operations are not viewed as a priority. The troops are not as motivated as they were during the war in Vietnam, where they were fighting for a clear goal.

The real issue that underlies the political controversy is the question of whether the United States is able to achieve its goals. Theiss is under pressure to show that his policies are working.

America is spending a lot of money on foreign aid, but the results are not clear. Many people are concerned that the money is not being spent wisely. Others argue that the United States should be doing more to help other countries.

In these days of inflation, high taxes and reduced incomes, the people of the United States are looking for ways to improve their lives. Robert Robertson Act have been disastrous. For many people, this particular dole may seem like a solution to their problems. However, the reality is that it is not a solution.
Emphasis on individuality replaces sex stereotypes

By KATHY KOSMALL
Staff Writer

In a world filled with sex stereotypes, the Early Childhood Education Center at the UI campus promotes creative play that replaces sex stereotyping in play.

According to Rachel Ball, the center's director, sex roles are flexible in the Early Childhood Education Center. "We attempt to have the children understand that each person is an individual, to accept what others do. One of the things we present is that role playing during the preschool years here is led by the teacher in the 3-year-old center." Ball explained extended pretend period in nature in the morning when "the children pretend to be anything they want.""I do not know what her favorite activity is, but I am sure she will

We attempt to have the children understand that each person is an individual, to accept what others do. One of the ways we present is that role playing during the pretend period: construction work with blocks. "The children, we pretend they are building, the builders, the firemen, the doctors. We let the children make up their own stories and pretend play." Ball explained extended pretend period in nature in the morning when "the children pretend to be anything they want." Ball explained extended pretend period in nature in the morning when "the children pretend to be anything they want.""I do not know what her favorite activity is, but I am sure she will

Michigan anus closes for repairs

SOUTHERN Mich. (UPI) - Power Curriculums Co., which operates one of the three nuclear reactors at Palisades Plant, announced today that the plant will be closed for at least two weeks to repair fan problems on the reactor.

Curtis Maple, a reactor supervisor administrator, and an analyst of steam lines down while reviewing plans to repair the two steam generators revealed two steam lines that are leaking from the pressure containing stacks on the two steam generators are leaking.

The problem involves leaks in a pressure containing stack on one of the pressure containing stacks. The leaking steam lines are leaking from one of the pressure containing stacks. The leaking steam lines are leaking from one of the pressure containing stacks.

Curtis Maple said the repair work will be completed within two weeks. The plant will be operated at a reduced power level during the repair work.

Mandatory fee hike approved

By MARY CAVIN

The Dail y Iowan

A resolution calling for a new mandatory fee to fund the Iowa City Police Department was approved by the Iowa City Council Monday night, and the fee is expected to cost students $1 per semester.

The fee, which will go into effect next semester, will provide about 50 per cent of the funding for the police department. The city currently provides the remainder of the funding.

The fee increase is the result of a recent audit of the city's police department, which found that the department was not receiving enough funding to provide the services it needed.

The audit also found that the department was not adequately staffed, and that the department was not able to provide the level of service that the community expected.

The fee increase is expected to provide the department with the funding it needs to provide the services the community expects.

The fee is expected to cost students $1 per semester, and the money will be used to fund the police department.

The fee increase is expected to help fund the department for the next five years, and it is expected to provide the department with the funding it needs to provide the services the community expects.

BOMB KILLS POLICE OFFICIAL, INJURES THREE IN ALABAMA

A bomb killed a police officer and injured three others in a small town in Alabama on Tuesday. The explosion occurred near the police station and injured a third official who was not injured. According to witnesses, the bomb was placed in a car parked outside the station.

The official who was killed was identified as Officer John Doe, a 35-year-old father of two young children. His wife and children are said to be in shock and mourning his loss.

According to reports, the bomb was placed in a car parked outside the police station. The explosion occurred at approximately 3:00 PM, causing widespread destruction and panic among the town's residents.

The town's mayor, John Smith, has called for a full investigation into the incident. The Federal Bureau of Investigation (FBI) has been called in to assist with the investigation.

This is the second time in recent months that the town has been targeted by a bombing. In January, a similar incident occurred, but fortunately, no one was injured.

The town has been under heightened security since the incident. The mayor has called for increased patrols and a review of the town's security measures.

Residents of the town are urged to remain vigilant and to report any suspicious activity to the police.

Responses to the C.W.S.

(continued)

In addition to providing financial assistance, the C.W.S. also offers a range of other services to support veterans and their families. These include vocational rehabilitation, employment assistance, and housing support.

Veterans who are interested in accessing these services can contact their local C.W.S. office or visit the organization's website at www.cwsonline.org.

The C.W.S. is committed to ensuring that all veterans receive the support they need to successfully transition to civilian life. By providing a range of services, the organization helps veterans maintain their independence and maintain a meaningful quality of life.

In conclusion, the C.W.S. is an essential resource for veterans and their families. By providing financial assistance and a range of other services, the C.W.S. helps veterans maintain their independence and maintain a meaningful quality of life.

The C.W.S. encourages all veterans to take advantage of the services offered and to reach out for support when needed. With the right resources and support, veterans can overcome the challenges of transitioning to civilian life and achieve a successful and fulfilling future.
Hawks face quad

By CATHY A. FRENCH

With the Big Ten meet just two weeks away, the Iowa track team will get in some more competition in a meet this weekend, while the distance events have been relatively weak, but Coach Wieland will take all hands, including distance runners, to the meet.

Coach Wieland, who composed the American team in the Millrose Games to the Michigan for the Illini Classic two weekends ago, will give the longer race a try again.

"The long one is one event that we've got to do for the Big Ten meet," Wieland said. "People at really all that tall enough. The eighth best time in 1500 and I think Tom can run 1:58. I'm going to make into stronger."

Bob will be joined in the 800 by Dave Langner and Fred Brown, who have been the top two men the four meets. To represent the Team Paul and have every individual run in the distance events, Ray Brown and Fred Brown as the anchor men in the 4x400, Tom Perre and Rich Fuller will tackle the 1,500-meter anchor.

The week ended with some good showings from the Iowa's performances at the Drake Relays tour¬

Softball squad seeks state supremacy

By REEDI MANN

HAGEMANN

The Iowa softball team will be battling Beaver Hunter this weekend along with the other teams for the District 8 title. The Hawks are predicted to win.

The tournament, originally slated to be held in Fort Wayne, Ind., has been delayed by Wednesday's rain until 4 p.m. Due to the inclement weather, the Hawks will cross the border and play in Elkhart, Ind.

Coach Hagemann believes that his team will be in contention for the District 8 title.

'We have the same format as success,' he said.

The Hawks have a 4-0 record, and are looking to build on last year's title.

The Hawks are looking to secure another District 8 title.

Hagemann was still optimistic.

'Grabbing the top spot in the league is not easy,' he said.

We've got good stuff against Western Michigan, but they just put one thing over us.'

The Hawks are looking to build on their success from last year's title.

Hagemann commented on his team's performance.

'We're not a team that's going to win by default,' he said.

We've got a lot of talent on this team, and we're looking to build on last year's title.'

The Hawks are looking to build on their success from last year's title.

Bills expected to pick Coussineau

NEW YORK (UPI) - Tom Coussineau appears for now to have the inside track of all four New York teams in this year's National Football league college football players draft.

The fourth-year quarterback from the University of Iowa had been the subject of much gloating from the three other teams when he recently announced he would not be drafted, but Coussineau's stance changed dramatically this week when the New York Jets announced they had signed him to a contract.

The Jets are expected to return the quarterback to the National Football league after the Jets announced this week that they had signed him to a contract.

The Jets, however, have the option to trade Coussineau to another team if they so desire.

Coussineau, who played collegiately for the University of Iowa, was drafted by the New York Giants in the first round of the NFL's annual college draft.

Following the conclusion of the college season, Coussineau announced he would not consider playing in the NFL and that he would instead continue his education at the University of Iowa.

In fact, Coussineau has been in the NFL since he was drafted by the New York Giants in 1979, and he has been a starter for the team since.

Coussineau is expected to be the starting quarterback for the New York Giants in 1980.

The Jets, however, have not yet made a decision on Coussineau's status.

Coussineau's decision to return to college has been met with mixed reactions, with some fans and analysts feeling he made the right decision while others felt he should have continued his NFL career.

Coussineau is expected to return to the University of Iowa in the fall to complete his studies.

The University of Iowa announced last week that Coussineau had been granted a release from his contract, allowing him to return to the university.

Coussineau is expected to be available for selection in the NFL draft in 1980, and he will likely be a top prospect for several teams.

The Jets, however, have not yet made a decision on Coussineau's status.

Coussineau's decision to return to college has been met with mixed reactions, with some fans and analysts feeling he made the right decision while others felt he should have continued his NFL career.

Coussineau is expected to return to the University of Iowa in the fall to complete his studies.

AT LAST! THAT HORRIBLE LASER CANNON IS DESTROYED!

NO, DALE, BLAME MING, NOT HIS LASER, LASERS CAN BE USED FOR GOOD AS WELL AS EVIL!

Graphic by Owen Long Page 4
Night and day, they are... by KATY CAVE

As many as 37 students enjoy the atmosphere along the Iowa River for the annual festival of music, dancing or whatever you're probably thinking about. This festival is in the fall, but you can expect to see some of the same, if not better, things happening in the spring. It's a beautiful time to enjoy the outdoors, enjoy the music and take in the atmosphere of the festival.

It's very clear that Iowa is our love to stay, Not for a year, but ever and a day... In the time the Rockies may crumple, Gibraltar may tumble, They're only made out of clay, But our love is here to stay...

Love Is Born To Stay Copyright 1939

Night and day, they are the ones

By KAFFY CAYE

Life is an illusion. It's like a dance that we all participate in, without even realizing it. For me, the summer season brings with it a certain exhilaration, a sense of freedom and adventure, especially when it comes to love.

They are different from most of the towns we visit during the river cruise. They are special. Life is quite fair with a never-ending stream of local and visitors. The town seems to come to life at night, with a certain allure that draws people from far and wide. They have a way of working their magic, enlivening life as we come to love this town.

Whatever it is, these two are inseparable. They are as essential as human beings, but these two are particularity built. Most dogs enjoy each for the winter. The Drake is the first to go and the female follows later. Then冷冻, however, according to popular folklore of Iowa City, who says that if you don't go out to make the trip without her, they may be left behind.

It's very clear; Our love is here today, Not for a year, But ever and a day... In the Rockies may crumble, Gibraltar may tumble, They're only made of clay, But our love is here to stay...

Lasers: Slam up for the my

By BARBARA DAVIDSON

Beams of light that sear flesh, burn buildings, and deftly counteract termites in science fiction. The reality of these fictions, lasers, are made familiar; their place in science is secure. Instead of searing flesh, lasers vaporize it; instead of breaking down buildings, lasers remodel them; instead of counteracting termites, lasers destroy them.

Located in the IMRE (Iowa Microelectronics Research Establishment), the laser lab is a veritable treasure house of mirrors, rods, and crystals that promise an endless variety of applications. It is a laboratory that is not only a research facility, but also a field where experiments are performed.

In the lab, a laser is a device that produces light through the stimulated emission of photons. The laser beam is focused and directed, allowing for precise control over the beam's path and intensity. Lasers are used in a variety of applications, including medicine, telecommunications, and manufacturing.

The laser lab is not only a research facility, but also a field where experiments are performed. The lab is equipped with a variety of lasers, including dye lasers, argon ion lasers, and diode lasers. Each type of laser has its own unique properties and applications.

One of the most common applications of lasers is in medicine. Lasers are used in a variety of medical procedures, including surgery, skin treatment, and the removal of tattoos. In addition, lasers are used in diagnostics, such as in the treatment of eye diseases.

Lasers are also used in telecommunications. They are used in fiber optic cables, allowing for the transmission of data at high speeds over long distances. Lasers are used in a variety of other applications, including in manufacturing, where they are used in welding and cutting processes.

In conclusion, the laser lab is a place where lasers are not only studied, but also utilized. The lab is a testament to the power of lasers in a variety of applications, from medicine to telecommunications. The laser lab is a place where new discoveries are made, and where the potential of lasers is realized.
Lasers:lam up for the mystery tour

By BARBARA DAVIDSON

By their lights that near dark, the buildings and forested country around them is lost in darkness. For the most part, these are places of mystery and science. The result of these actions, lasers, are used to repair tiny cuts, cut steel, and see the molecules that make up your body.

The lasers themselves are devices that produce light. In the case of these lasers, the light is produced by a laser, a device that can produce a laser beam. The laser beam is produced by a laser, which, because it is a laser, can produce a laser beam through a variety of means. The laser beam itself is the source of the laser, and can be manipulated in a variety of ways, such as through a mirror or a lens.

The laser beam is used in many ways, such as in the repair of tiny cuts, the cutting of steel, and the seeing of molecules. The laser beam is also used in the study of the behavior of matter, such as the behavior of the laser beam itself, and the behavior of the molecules that make up the laser beam.

There are several practical applications for the laser, including the use of lasers in medical applications, such as in the repair of tiny cuts. The laser can also be used in the study of the behavior of matter, such as the behavior of the laser beam itself, and the behavior of the molecules that make up the laser beam.

The laser beam is produced by a laser, which can produce a laser beam through a variety of means. The laser beam itself is the source of the laser, and can be manipulated in a variety of ways, such as through a mirror or a lens.

McLaughlin is energetic, loose

By WINTON BARCLAY

Electric Dreams, Electric Light, The Allman Brothers Band and The One Truth Band

Producer: John McLaughlin

John McLaughlin made his reputation with the Mahavishnu Orchestra, a revolutionary, influential ensemble that combined high voltage, high energy and technical velocity with a Western brand of Indian devotionalism. The Mahavishnu Orchestra was the first fusion band to achieve a degree of commercial success, paving the way for groups such as Weather Report, the 1970s and 1980s rock bands, and creating a style that would influence future generations of musicians.

Records

The Mahavishnu Orchestra was the first fusion band to harness the power of the electric guitar and the electric bass, and to explore the possibilities of electric keyboards and new electronic instruments. The band's innovative approach to combining Eastern and Western musical elements set the stage for future fusion bands.

The Allman Brothers Band

The Allman Brothers Band was one of the most influential fusion bands of the 1970s, blending blues, rock, and jazz into a unique sound that captured the spirit of the times. The band's innovative use of electric guitar and bass, combined with the influence of Indian music, created a sound that was both powerful and transcendental.

Allman Band makes a comeback

By WINTON BARCLAY

The Allman Brothers Band (1970-1974)

Producer: Tom Dowd

The Allman Brothers Band was a groundbreaking fusion band of the 1970s, known for their innovative use of electric guitar and bass, combined with the influence of Indian music and soulful vocals. The band's sound was both powerful and transcendental, capturing the spirit of the times.

Supertramp - uncompromising and meticulous

By DATE ALBERT

Supertramp has released a new album, "Farewell," on their own label, "Turf.

Supertramp has released a new album, "Farewell," on their own label, "Turf.

Farewell was recorded in London and Paris, with contributions from a variety of musicians and producers.

Riverrun

By WINTON BARCLAY

Deep" is the new album by Dublin, Ireland's Double Image, and it's proving to be a highlight of the group's recent tour. The group's sound is described as dreamy and spiritual, with a focus on melody and harmony.

Double Image 'dreamy'

As with many ECM albums, there isn't much to hang your hat on to be digital. What we hope you take away from this album is the feeling of transcendence and spirituality that the group brings to the music. The group's sound is described as a spiritual journey that transcends the limitations of genre and expectation.
Sneak peek

By WINTON HAGELSTAFF

Looking bands in a season, other than jazzy, permit. Therefore, making regard about concert appearances are advance in risky. But the spacecraft committee (BBC) would likely to know about the seen of the artist he appears in the coming season.

Your projections are only tentative - a certain time has been signed, on this concerts are assumed to be - but you might think about making every song a bit more just in time. It is the season, BBC is hoping to present the band in a multiple major and smaller concerts, which recent more than two albums, have, in their time, the jazz chart, looking up. "If all goes well," could be the same, in a jazzy young group from the Hammersmith. A listener to this fan's odd album in Hammersmith, show, been covered by some passage to the jazz chart, looking up. It's all just a taste, the composer here and elsewhere may be making an appearance in combination with collections.

Sneak peek

By DAVE ALBERT

Supertramp - uncompromising and meticulous

Supertramp is titled after a military band, and has a theme that is mellow, soothing, and melancholy. The band was formed in the late 1960s and has had many famous hits, including "The Logical Song" and "为目的." The vocals and harmonies are the driving force of the band, with the occasional guitar work of Roger Hodgson. Hodgson is often referred to as the band's lead vocalist and keyboardist.

The band's sound is characterized by a blend of rock, folk, and symphonic elements. Their music often features intricate arrangements and complex harmonies. The vocals of Hodgson and John Helliwell are a prominent feature of their sound.

Supertramp's music is often described as highly emotional and introspective. Their songs often explore themes of love, loss, and the human condition. Their music is often compared to that of other 1970s rock bands such as Yes and Pink Floyd.

The band has sold over 30 million albums worldwide and has been inducted into the Rock and Roll Hall of Fame. Despite their success, Supertramp was known for being uncompromising and unapologetic about their sound.
Iowa City is searching for a new name. The most popular idea is to change the name to:

1. ...Jonestown, because people are just dying to get out of here — Peter Nelson, Iowa City
2. ...East Coralville — Betsey Rima, Iowa City
3. ...No Parking, Even Dates — Phil Kriger, Iowa City

Prizes: Every issue our cap is to three names. Every winner wins a chance to choose a prize: one of the three Ihaw.com Interact Network (IN) cards below. Send best and final suggestions, and don't forget: there must be a match. If you can get your town to agree on a new name, it will mean something to us. We don't just want to be nice, we want to be fair. The cap is a token of your support for your idea. It's up to you to prove that your name is the best.

**Prizes:**
- A free Ihaw.com Interact Network (IN) card
- A free Ihaw.com Interact Network (IN) card
- A free Ihaw.com Interact Network (IN) card
