UI officials will request approximately \$26 million to fund a new communications facility and College of Law when they present their 1980-1982 capital requests to the state Board of Regents next month, May Brodbeck, UI vice president for academic affairs, said Wednesday.

The UI will also ask permission to hire architects for both building projects when the regents meet here on Sept. 13-14, she added.

UI officials will ask for \$8.5 million for 1960-81 to construct a communications facility which would house the UI Speech and Dramatic Arts Department's speech, film and broadcasting division. Brodbeck said. They will request approximately \$17 million for 1981-82 to build a new College of Law facility.

Planning money totalling \$600,000 was allocated to the UI by the Iowa Legislature last spring.

A possible location for the new communications facility, which Brodbeck said could be completed by the spring of 1982, is east of the Old Armory, an area currently used for tennis courts. The armory would be torn down, providing room for a possible addition and recreational space.

THE NEW COLLEGE of Law, completed by the fall of 1983, would probably

Woodfield's court case: city warned

By NEIL BROWN

A district court judge cautioned the city Wednesday against citing threats of violence to pressure the court into letting stand a four-month suspension of the liquor license at Woodfield's disco. Woodfield's owner Harry Ambrose is

seeking an injunction to lift the suspension, which went into effect Aug. 1. The City Council suspended the license after the city Human Rights Commission ruled that Ambrose discriminated against blacks attempting to enter his bar June 23.

At Wednesday's hearing on the injunc-

Related story, section 3, page 11

tion, Johnson County District Court Judge Harold Swailes made no decision, asking attorneys to file briefs on the question by Tuesday.

Assistant City Attorney Roger Scholten called three witnesses who testified that some citizens might instigate violence if Woodfield's is allowed to reopen.

"The city had a legitimate concern following the incident at Woodfield's June 23 that violence would ensue," Scholten said. "The potential for new picketing presents a potential for public disorder " MARILYN TURNER, a third-year law student and adviser to the Black Student Union, said that reopening the disco would create tension in the community that might lead to violence.

"I see the potential for racial hostility in the Iowa City community itself," she said. "I've talked to several upperclassmen who say that if Woodfield's reopens they'll take matters in their own hands. Right now there are about 150 to 200 black freshman in this town who can be greatly influenced by these people."

But Turner said that students considering any violence "would be doing damage to themselves," and she said she does not advocate such action.

City Human Relations Director Patricia Brown testified that the city has been concerned with such the tension created by the Woodfield's incident. She said she was aware that some citizens "were not satisfied" with the four-month license suspension and they thought the bar should receive a stiffer penalty.

AMBROSE'S ATTORNEY, J. Patrick White, said he does not think there is danger of violence if Woodfield's is reopened, and that he is surprised the city raised the point.

White told the court that Woodfield's license should not be suspended because the city committed numerous procedural violations during its instigation and subse making the council action illegal. Among the major violations, White contends, is that the city acted against Ambrose prematurely. The council began license suspension procedures June 26 when it set a public hearing, and it held the first part of that hearing July 24; but the Human Rights Commission did not officially find Ambrose guilty of discrimination until July 26. White also said that the council voted the suspension at approximately 10 p.m. July 31, two hours before it was to take effect. This, White said, did not allow Ambrose "the opportunity for judicial review."

Library, she s id.

The UI video center and motion picture continuing education division, now located in East Hall, would then move to the present College of Law building, Brodbeck added.

UI President Willard Boyd said Wednesday, "Obviously this is a project of the utmost importance. We must find a replacement for Old Armory, which is an unbelievably bad structure in every regard. This will be the first thing that we will accomplish. We must also provide adequate facilities for the law school."

Brodbeck said replacing the Old Armory has to be top priority. "Old Armory is very hazardous for people to work in, yet one of our finest departments is housed there," she said.

"Also, we have an excellent College of Law, and one of the best legal libraries in the country," she said. "But ours is one of the more poorly-housed law schools in the country. Something must be done there, too."

Weather

Don't pressure us. Sure, today may be partly cloudy with highs in the 80s. It may even rain tonight. But cite any threats of violence, and we'll throw the book at you thunderstorms. Don't mess with your weather staff.

Summer vacation ends

Today is the first day of classes, and the more than 23,000 students that UI officials expect will attend this fall are in town celebrating. For some, though, the thought of another semester of long hours at the library is wearisome. One student takes a break from the end-of-the-summer revelry to rest on a fire escape at Burge Hall.

Draft deProsse effort started; she says re-election bid likely

By ROD BOSHART Staff Writer

With an effort to draft Carol deProsse underway, the two-term Iowa City Councilor said Wednesday she is "leaning toward" seeking re-election this fall.

DeProsse said she plans to announce her decision next week.

"I had convinced myself two months ago that I was absolutely sure I was not going to run," deProsse said. "I wanted to find someone I could support for the council but that person hasn't materialized."

Meanwhile, a leader of the draftdeProsse effort said a similar move to get Councilor Mary Neuhauser to run may also be undertaken. fav Leo Brachtenbach, one of those cir-

culating nomination papers for a deProsse candidacy, said that a draft-Neuhauser drive may be made if it appears the one-time mayor is having trouble deciding whether to run again.

LEADERS OF Brachtenbach's group say it is a neighborhood-organizing effort that wants to see continuation of a "people-oriented City Council."

Brachtenbach said the group knew deProsse was torn between her private life and serving another term and hoped the draft movement would influence her decision. He said response has been very favorable, that in one week the group gathered 112 signatures supporting her re-election.

"I see her as one of the most qualified persons in Iowa City to serve on the council," Brachtenbach said. "I would predict, if she runs, she will be elected." He said the group considers this fall's council election critical because three of

the four "people-oriented members of the council" are up for re-election, a reference to four councilors — deProsse, Neuhauser, David Perret and Clemens Erdahl — who often vote together on the liberal side of key issues.

Tom Baldridge, who is also circulating See **deProsse**, page 6 BUT SWAILES said that the court could not be pressured into denying the injunction if Ambrose is legally entitled to it.

"I am assuming that this certainly is not an attempt to threaten violence in the event that an injunction is granted to Mr. Ambrose based on his rights under the law," Swailes said. "If that were the case, this would raise some serious concerns with the city."

Scholten said, "I want to emphasize that this is not intended as a threat. We only want to apprise you (the court) of the concerns the city has found with this. I think it's a justifiable concern."

Robert Morris, who filed discrimination charges against Ambrose, testified that the Woodfield's incident "promotes a feeling of hostility for minority members around the community." Asked by Scholten if lifting the suspension of the disco's license — in effect permitting the bar to reopen — might cause violence, Morris replied, "It could, but I would in no way condone any violent actions on the part of anyone."

SCHOLTEN URGED that the request for an injunction be denied, saying Ambrose has not exhausted administrative channels in his attempt to overturn the action. He said the Iowa Beer and Liquor Control Board is the only body that can overturn license suspensions and asked Swailes to direct Ambrose to that board before seeking a court decision.

As with Ambrose's suit, Swailes made no decision on that request.

383 to live in UI temp housing

By TERRY IRWIN University Editor

For \$1.85 per day, approximately 380 UI students are experiencing the ups and downs of communal living, dormitorystyle.

Residence Services Director Mitchel Livingston says about three-fourths of the 220 men and 163 women in temporary housing are living in dorm lounges because they submitted late applications.

The others, he said, are new students who only recently applied for the 5,600 spaces in UI dormitories or old residents who failed to get renewed room assignments last spring.

THE TOTAL NUMBER of students who have signed the non-binding temporary residence hall contracts is slightly less than last year because a slightly greater number of students have canceled, Livingston said. This year no students were assigned temporary quarters in the Union.

With any luck, Livingston said, all of the lounge residents should be assigned rooms by Oct. 1. As many as 200 may receive assignments by late next week, he said. On Friday Livingston and his staff will begin to tabulate the number of students who have canceled or dropped out and by the end of next week will begin moving students into the vacancies.

UNTIL THEN the students in temporary housing will receive special attention from resident assistants and a newletter will keep them posted on the progess toward moving them into rooms, Livingston said.

Meanwhile, Residence Services is still receiving room applications. "We'll continue to get walk-in traffic for about one week — until the next Friday," he said. "We'll still get the over-the-counter business."

Livingston estimates that at least 500 more juniors and seniors are living in the dormitories this fall. The suspension of the parietal rule led a number of sophomores to leave the dorms, Livingston said, but many upperclassmen who have dealt with the Iowa City housing market have have returned to on-campus living and are taking the sophomores' places, he said. Section 1, page 2-The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979

Briefly

Navy vows to purge racism from its ranks

WASHINGTON (UPI) - The Navy announced Wednesday a new campaign to purge its racist organizations from its ranks, along with revised recruiting policies providing broader opportunities for the poorly educated.

The service released an Aug. 17 directive in which Adm. Thomas Hayward, chief of naval operations, told all commanders to prohibit racist organizations or distribution of racist materials.

Hayward's action followed the identification of three sailors on the supply ship Concord as card-carrying members of the Ku Klux Klan.

Outlining specific steps to be taken against racial agitation, Hayward wrote:

"Recent incidents within the Navy involving racists organizations highlight the need for every commander, commanding officer, and officer in charge to be fully aware of command responsibilities for enforcing antidiscrimiation policies...

Mondale receives warm welcome from Chinese

XIAN, China (UPI) - Tens of thousands of people gave Vice President Walter Mondale the biggest welcome of his life Wednesday as he became the first American official ever to visit the former Chinese capital of Xian.

"This has never happened to Walter Mondale, not even in Minnesota," said one staff aide as he watched the enthusiastic, clapping crowd.

Smiling residents lined Mondale's motorcade route 10 deep and workers stopped to wave excitedly at the vice president as his motorcade made a 30-minute drive from the airport to the guest house where he is staying.

Mondale, whom Chinese officials said was the first American leader ever to visit Xian, earlier received an equally warm welcome in Peking, where Vice Premier Deng Xiaoping traveled to the vice president's guest house and to the airport departure ceremony.

Thatcher denounces IRA

BELFAST, Northern Ireland (UPI) - Prime Minister Margaret Thatcher flew to the most dangerous part of Northern Ireland for a personal inspection tour Wednesday and vowed that "the men of violence" who murdered Lord Mountbatten "will never be allowed to win."

Officials described Mrs. Thatcher's surprise one-day tour as a morale boosting visit that also underscored her determination to "wage war" on the IRA terrorists who assassinated Mountbatten and killed 18 British soldiers in separate attacks Monday.

Mrs. Thatcher flew from London to Ulster Wednesday to meet with security officials and ordinary people who stopped in their tracks and applauded the prime minister as she strolled through a Belfast shopping center.

Mrs. Thatcher spent 30 minutes talking to the troops at Crossmaglen before returning to Belfast by helicopter

Godunov says he could have changed wife's mind

NEW YORK (UPI) - Dancer-defector Aleksandr Godunov said Wednesday he could have convinced his ballerina wife to stay in the United States if he'd gotten a chance to talk to her before she flew back to Moscow. "I think if we had the chance to meet we wouldn't separate," the former Bolshoi ballet star said at a news

The popularity of a new state student loan program has resulted in limited funds for students seeking aid from Iowa City banks, according to bank officials.

The Hawkeye State Bank, First National Bank and Iowa State Bank and Trust Co. have reported that their funds for the Iowa Guaranteed Student Loan program, which was initiated May 1, are nearly depleted. But limited funds may be available for students who have been customers for one to two years.

Students interested in acquiring the state-insured loans may have better luck if they apply at their hometown banks, according to John Wild, director of the student loan division of the Iowa College Aid Commission.

Under the Iowa GSL program "the state is like an insurance company," and repayment for any student default or delinquency is guaranteed by the state government, according to Wild

WILD SAID that 570 institutions, or approximately 80 percent of Iowa lenders, have signed contracts with the Iowa College Aid Commission to participate in the GSL program. He said he expects 90 percent of Iowa's lending institutions to join the program by the end of the year.

Iowa is one of 40 states participating in state guaranteed loan programs that are replacing the Federally Insured Student Loan program, Wild said. The other 10 states are preparing to change to state guaranteed programs, he said, and "by 1981 there will be no more FISL as we see it today.

The GSL program allows undergraduates to borrow as much as \$2,500 a year, but the student's total undergraduate GSL debt cannot exceed \$7,500. Graduate students may borrow up to \$5,000 per year, with a total GSL debt limit of \$15,000, including loans made at the undergraduate level.

The student must repay the loan at a 7 percent interest rate within 10 years after her or his graduation. Minimum payments are \$30 per month

The lender receives an additional 5 to 6 percent interest on the loan from the federal government in addition to the 7 percent interest that the student pays.

FROM MAY 1 to July 31 over 3,500 students in Iowa have borrowed more than \$6.6 million through the GSL program, and Wild estimates an additional \$5 million will be borrowed by the

end of this month.

The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979-Section 1, page 3

He said that many Iowa lenders have participated in the GSL program because they feel it is easier to get help and advice from the state than the federal government.

The federal government, Wild said, gave lenders much less assistance with the similar FISL program. "There was too much red tape with the federally insured loan," he said.

'People have more confidence in the governor than the president. They expect to get better service locally than nationally," he said.

According to one Iowa City bank official, the state loan program is also more organized than the federal loan program.

The state GSL requires less paperwork, Wild said, and usually takes only one week to process. He said processing for a federally insured loan can take three times longer.

UI to study Family Housing violations

UI officials say they will explore ways to determine if student applicants violate the basic eligibility requirements for living in UI-owned Family Housing, said UI Residence Services Director Mitchel Livingston.

Questioned by The Daily Iowan this summer, Livingston said Residence Services does not require applicants for the 799 family housing units to provide proof of marriage or, in the case of a single parent, proof of guardianship.

Phillip Jones, associate dean of student services, said this week that questions on family housing applications will be changed to require more specific information, but those modifications have not been made yet. "We have to be

careful about rights of privacy," he said.

ALTHOUGH THE potential for abuse is great, he said, changes in practice may be minimal because the degree of abuse has not been established. "We will not create a police-state atmosphere to alleviate the potential for abuse," he said.

This summer Livingston said his office would review the situation to determine if the policy was being abused. That has not been determined yet because of the extensive nature of such an investigation, he said.

He said, however, that after the story appeared in The Daily Iowan his office received two phone calls from individuals who said they knew family housing residents that are not eligible to live there.

Although he said he has not been requested to develop a policy, Livingston did indicate he anticipates some type, of change. "We will probably establish a different method of verification," he said.

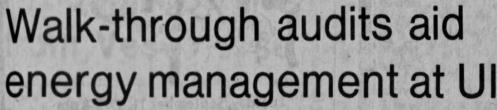

HOWEVER, HE ALSO said any change would be difficult to establish. First his office would have to define what a family unit is and what type of evidence should be required, he said.

'We want to respond without creating a bureaucratic hassle for students," he said. "It's the kind of policy-making that is difficult to define and enforce - we can create problems but we have to do something." policy would not affect current family housing residents or the 81 students on a waiting list, Livingston said.

In the past demand for the housing has been great because of the low rates, according to Livingston.

The average prices for family housing rentals are: efficiency apartments, \$87 per month; onebedroom apartments, \$112 per month; two-bedroom apartments and mobile homes, \$143 per month.

Students living in family housing are required to maintain at least five credit hours per semester unless the student is in a medical residency.

Walk-through energy audits — the first step in determining what needs to be done to make UI buildings more energy efficient - may be completed by mid-October, said John Houck, assistant to the director of the UI Physical Plant.

The audits constitute the first phase of a state Board of Regents \$26 million five-year plan to develop energy management programs at Iowa's three state-owned universities. The UI has received \$1.74 million to begin the program.

When the program is completed, most campus buildings will be controlled by a central computerized system originating in the Physical Plant, Houck said. Several buildings are already controlled by this system.

Since mid-May Houck has andited two million of the approximately 9.8 million square feet of floor space to be covered in the initial phase of ogram. An audit of a building includes its istory and a description of the facility and logs energy consumption and use patterns, occupancy patterns and any current conservation

All large UI facilities, excluding some self-supporting facilities such as UI Hospitals, the dormitories and the Union, will be reviewed during the procedure. Houck estimates that by spring the UI should be ready to accept bids for work on energy-saving building modifications, which are scheduled for completion in May 1981.

After preliminary auditing is completed, the "worst offenders," which can accept major construction projects without disrupting the normal function of the facility, will undergo more intensive auditing.

Although the state's allocation allows for the consultation of an outside auditor to conduct this phase of the program, Houck said that like some of the later renovations, it will be done "in house.'

He said the UI will save money by using its own personnel to do the auditing because they will be more familar with the buildings and the UI's auditing procedure. 'We have a better feel for the way the buildings are run as opposed to a hired supplier of the central control systems for buildings," he said

Horn's conviction reversed

The Iowa Supreme Court today reversed the first degree murder con-viction of Donald K. Horn, who was accused of the contract murder of a Burlington man.

Horn was convicted last year by a Henry County District Court jury of arranging the death of Jerri Connelly, whose body was found in a Burlington sewer pit on December 12, 1977.

Minipark taken off selling list

removed from the list of land to be sold under urban renewal, the Iowa City Council decided with a 4-3 vote Tuesday.

Councilor David Perret, who offered the amendment to the land disposition list,' said he believes it is "the consensus of the council that the area should remain a park for at least two more years, until the downtown area is further developed."

Under current city zoning provisions, if the park were included in the urban renewal package, it would likely be replaced by a commercial outlet.

Mayor Robert Vevera and Councilors Glenn Roberts and John Balmer voted against removing the land from the list. Roberts noted that there are already two blocks of plaza in the area, and said that may be enough for public use.

BALMER SAID rather than City.

Solar wind blast interferes with Saturn probe

MOUNTAIN VIEW, Calif. tist John Wolfe said the result (UPI) - Instruments aboard Saturn-bound Pioneer, 11 were confused Thursday by two enor- being "extremely unmous releases of energy on the sun as the spacecraft sped past the Saturnian moon Iapetus.

A solar flare Aug. 18 with the force of a thousand hydrogen bombs sent out highly charged particles at the speed of light 1 billion miles away to Saturn as Pioneer neared the ringed planet. The spacecraft will reach Saturn Saturday after a six and one-half year trip.

A month ago, another event on the sun spat out a blast of solar wind, or ionized particles. as if "it was coming from a hose" in the direction of

Black Hawk Minipark will be deciding the future of the minipark at this time he prefers to "wait and see what retail demand will be when the area is further developed."

Councilor Carol deProsse, who voted to remove the parcel from the list, said the land can still be sold any time the current or a subsequent council desires

During discussion of the urban renewal plan, Balmer introduced an amendment to delete the proposed library site from the provision. The amendment passed 7-0.

In other action, City Manager Neal Berlin reported the Un-iversity Heights bus contract is ready to be presented for consideration next week. Berlin said only one change had been made in the contract, a provision for refund if service is canceled during the year by either University Heights or Iowa

The space vacated when the Student Health pharmacy closed in July may be converted into an office and a conference room, a UI official said this week.

Philip Hubbard, vice president for stu-dent services, has endorsed a request made by Dr. Harley Feldick, Student Health director, that the vacated space be converted into a new director's office and the conference room. The request still has to gain final approval from other UI ad-ministrators, and the cost of the project, which would entail wall revisions and painting, has not been estimated.

The room does not have plumbing, Feldick said, and conversion to examina-

A public employee union has withdrawn its bid to represent 6,500 state-employed secretaries and clerks, canceling a scheduled November election.

American Federation of State, County and Municipal Employees officials an-nounced this week that the union could not get 30 percent of the state-employed clerical workers to support an election. The Public Employment Relations

Board set the election for November after complications in AFSCME's January bid to represent the state-employed office workers, including 1,700 UI secretaries and clerks.

The January election found the union 69 votes short of approval, but was discoun-ted by a PER Board hearing officer in

Old Armory

Dramatic Arts Department's faculty members and their film, broadcasting and drama classes have been housed in the Old Armory, a facility that Brodbeck has called a "firetrap," and "hazardous to life and limb."

Following a 1977 accreditation inspection by the American Bar Association and the American Association of Law Schools, the ABA recommended a "totally new law center building," in a letter to Boyd and N. Williams Hines, dean of the UI College of Law.

Studies conducted over the summer,

deProsse

deProsse petitions, said the group favors candidates who will support preserving the integrity of Iowa City's neighborhoods. Baldridge and Brachtenbach said they will also support Perret if he seeks re-election. Elected in 1977, Erdahl's term expires in 1981.

NEUHAUSER HAS said she will not announce her plans until after the Iowa City School Board election Sept. ll. Perret and incumbent John Balmer plan to seek re-election to the council and will announce their candidacies next month. Donn Stanley, Don Doumakes, John

Brodbeck said, have shown that both a new law center and a communications facility are needed. An addition will also be added onto Mabie Theatre as part of the project, she said. Representatives of both departments

said they are very pleased with the decision.

Samuel Becker, chairman of the Speech and Dramatic Arts Department, said "It's something that we've been working on for at least 15 years. Our people are obviously just delighted. This is something that was sorely needed, and we think it will be a tremendous boost to

New turbine engine bus in use

WASHINGTON (UPI) - A major nationwide bus line Wednesday unveiled a turbine engine bus that rides far quieter and smoother than the standard diesel-powered models, requires less maintenance and will even run on alcohol

Greyhound Bus Lines plans to begin using the new bus, which already exceeds Environmental Protection Agency noise and emission standards, for passenger runs between Washington and Philadelphia Thursday.

A demonstration ride for a group of reporters followed the unveiling of the new intercity bus, part of a joint energy efficiency project in which Greyhound sunk \$500,000 and the Department of Energy put up \$1.7 million. Officials said the multi-fuel engine re-

quires less maintenance, starts better in cold weather and will even run on alcohol and fuels made from coal, wood and biomass.

The light-weight gas turbines,

ABC report charges Young bugged by U.S.

WASHINGTON (UPI) - ABC News reported Wednesday that U.S. intelligence bugged the New York apartment of United Nations Ambassador Andrew Young and knew in advance of his secret July 26 meeting with a representative of the Palestine Liberation Organization.

Asked about the report, Attorney General Benjamin Civiletti told UPI he knew of no such surveillance.

"I don't think it (Young's apartment) was bugged, no," Civiletti said. "It sounds incredible to me I think it's a Towers residence of Young and eavesdropped on his July 26 luncheon meeting with Abdullah Bishara, the Kawaiti ambassador to the United States.

During that meeting, ABC reported it was agreed that Young would secretly confer with the PLO's UN observer, Zehdi Labib Terzi, at dinner. The meeting was in violation of U.S. policy barring diplomatic contacts with the PLO.

Young resigned following public disclosure of the meeting with Terzi.

developed by General Motor's Detroit Allison Division, is scheduled to go into commercial production in about three We've got good food vears.

With the first gas turbine bus on the road, the Energy Department's next goal is to make production model turbine automobile available by 1990. George Thur, a government turbine specialist, said the first gas turbine automobiles should roll off Detroit's assembly lines by 1988.

Pope plans U.S. visit, cancels N. Ireland stop

Administration confident

VATICAN CITY (UPI) — Pope John Paul II will visit six cities during his October tour of the United States but the Vatican canceled a planned stop in Northern Ireland because of the "dreadful murders of recent days," a papal spokesman said Wednesday.

The Vatican released partial details of the pope's visit to Ireland and the United States in early October, disclosing for the first time that the pontiff had also planned to stop over in Northern Ireland - a plan now canceled following the IRA terrorist assassination of Lord Mountbatten on Monday.

recession will be brief WASHINGTON (UPI) - A government index year, she added, a view that echoes President used to forecast the future path of the economy Carter.

> Top administration officials and Congress have acknowledged a recession began during the second quarter when national economic output fell 2.4 percent.

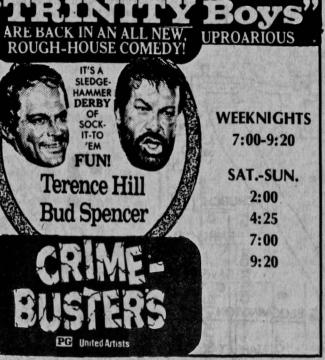

> The major factor which has clouded economists' predictions of the length of the recession is the continuing high rate of inflation, particularly in energy and housing.

Consumer prices soared at a 13.1 percent annual rate during the first seven months of the year, the largest dose of inflation over a similar period since 1946.

THE ADMINISTRATION believes the jobless rate will reach about 6.7 percent by December and more than 8 percent by the end of 1980. Unemployment during July was 5.7 percent.

As a rule of thumb, every one percentage point of higher unemployment translates into 1 million lost jobs. A random survey by UPI in 13 cities shows

prices of 10 staples fluctuating widely. In many cases they were up sharply from a year ago. In only a few were they unchanged or up only a few

IOWA

WASHINGTON (UPI) - Amtrak sentenced five passenger trains to death Wednesday, saying it was sorry to lose such old work horses as "The Floridian" and "The Lone Star" but con-gressional budget-cutters left no other choice. It was the first large-scale cutback in Amtrak service since the national rail passenger system

Asked what he would say to cities left without any train service, Amtrak President Alan Boyd said: "I'm sorry that it has happened in some cases

But he predicted the system would get new equipment and step up service in the future if increased passenger demand provides "evidence the system will have to be expanded.

1961 × 160 A PG PARENTAL GUIDANCE SUGGESTED CO

NOW

3rd WEEK

was formed eight years ago in hopes of saving the country's trains.

The Amtrak board of directors voted to halt passenger runs Oct. 1 along 4,687 miles of track through the states of New York, Florida, Illinois, Washington, Texas, Massachusetts, Kentucky and Missouri.

However, the board decided to add a new route to Las Vegas, combine two of the three New York-Florida runs and leave the fate of another train in the hands of California authorities.

THE DIRECTORS acted in response to pending congressional legislation that sets formulas for determining which passenger trains should stay in service and which should be discontinued.

Trains eliminated were the Chicago-Florida "Floridian," Chicago-Seattle "North Coast Hiawatha," Chicago-Houston "Lone Star," Boston-Catlettsburg, Ky., "Hilltopper" and New York-Kansas City "National Limited."

WASHINGTON (UPI) - Most Americans

THE NEW ROUTE - Los Angeles-Ogden Utah - will provide train service to the potentially high-volume Las Vegas market. The country's gambling capital presently has no train service.

Amtrak said it plans to discontinue service on the Oakland-Bakersfield "San Joaquin" - but negotiations with California authorities might lead to keeping the route alive under the Amtrak Improvement Act.

Amtrak said the criteria set forth in the legislation left the system "little or no latitude in determining those trains to be continued, discontinued or modified.'

The legislation would require Amtrak to discontinue passenger trains that fail to hold losses per mile within specific limits set by complicated financial formulas.

Under the legislation, a money-losing train may stay in service if a state shows there's a demand and provides 20 percent of the funds.

1979-80 Cambus Routes & Schedules

ک کہ دی ہے جو سے بلید کا کر بلی جو برو ہو کو کو کو کو جو بھی جو بھر جو برو کو کو

We at Cambus would like to welcome all the new and old students to the university. Below are all of our routes and schedules. There have been several changes this year in both route structure and schedules. These changes should provide better service during peak periods of the day as well as save fuel.

Cambus is a University of Iowa owned, student operated free mass transit system. Service is provided Monday through Friday year-round except university holidays. Service is from 6:00 in the morning until 12:30 at night. It is primarily operated through student and parking fees. However, your support through optional fees is greatly needed and appreciated. Cambus service is provided free to all stu-dents, faculty and the general public.

Drivers will only stop at locations marked by Cambus stop signs. Please stand behind the curb as the bus approaches, wave your hand so the driver will know you want his/her bus. Drivers' watches are set by the telephone time signal. For the correct time call 337-8212. Drivers make every effort to operate on schedule, however slight variations can occur.

Cambus Routes

Cambus operates seven regular routes (see schedules). Please note there have been several route and schedule changes from the past. • Red Route: (6:00 am to 12:30 am) Clockwise loop of the main campus • Blue Route: (6:00 am to 12:30 am) counterclockwise loop of the main campus • Pentacrest Route (6:25 am to 6:16 pm) Direct shuttle between the Pentacrest and the north entrance of the University Hospital. • Express Routes: (8:00 am to 3:30 pm and 8:00 am to 6:00 pm). • 1. The interdorm route (8:00 am to 6:00 pm) provides service between Hancher Auditorium and the Field House via the

- Pentacrest.

- Pentacrest.
 2. The shuttle route (8:00 am to 3:30 pm) provides service between the East and West side dorms via the Pentacrest.
 Hospital Route (7:30 am to 8:00 am and 3:30 pm to 5:30 pm) provides service between Hancher Auditorium and the University Hospital
 Hawkeye Apar./East Side Loop Routes:

 The Hawkeye Route (6:25 pm to 12:30 am) provides services between the Main Campus and the Hawkeye Apartment complex. There will be only one bus running every half-hour until 10:31 pm and then one bus every forty minutes until 12:30 am.
- 2. The East Side Loop (10:31 pm to 12:30 am) provides service between the Pentacrest and the area east of downtown. There are no signs up on the E.S.L. but the bus will stop at any corner on the route.
 Oakdale (6:30 am to 10:15 pm) Provides service between University of Iowa Hospitals and the Oakdale Campus. It also serves the University Printing Service. A special pass is required from the Cambus office for the bus to stop at the printing service. The night Oakdale also provides service to the Pentacrest (see schedules.).

Oakdale passes will be issued through the cambus office to allow passengers to get off at the printing service stop in Coralville issued to people who have university related business. Please show the driver your pass if you wish to get off or on at the printing service stop. The Oakdale bus doesn't make any stop on the Coralville strip.

• Bionic Bus: Cambus provides bus service for handicapped students, faculty and staff. The "Bionic Bus" is equipped with a wheelchair lift and provides personalized service for the wheelchair bound and ambulatory handicapped. For more information of the service for the wheelchair bound and ambulatory handicapped. For more information of the service for the service

Charter Service: Charter service is provided for unversity related groups.
Free Advertising: Space is provided on buses for university and non-profit organizations to advertise.
Lost and Found: If you believe you have lost an article on the bus please call the Cambus office at 353-6565. If you happen to find an article, please give it to one of the drivers.

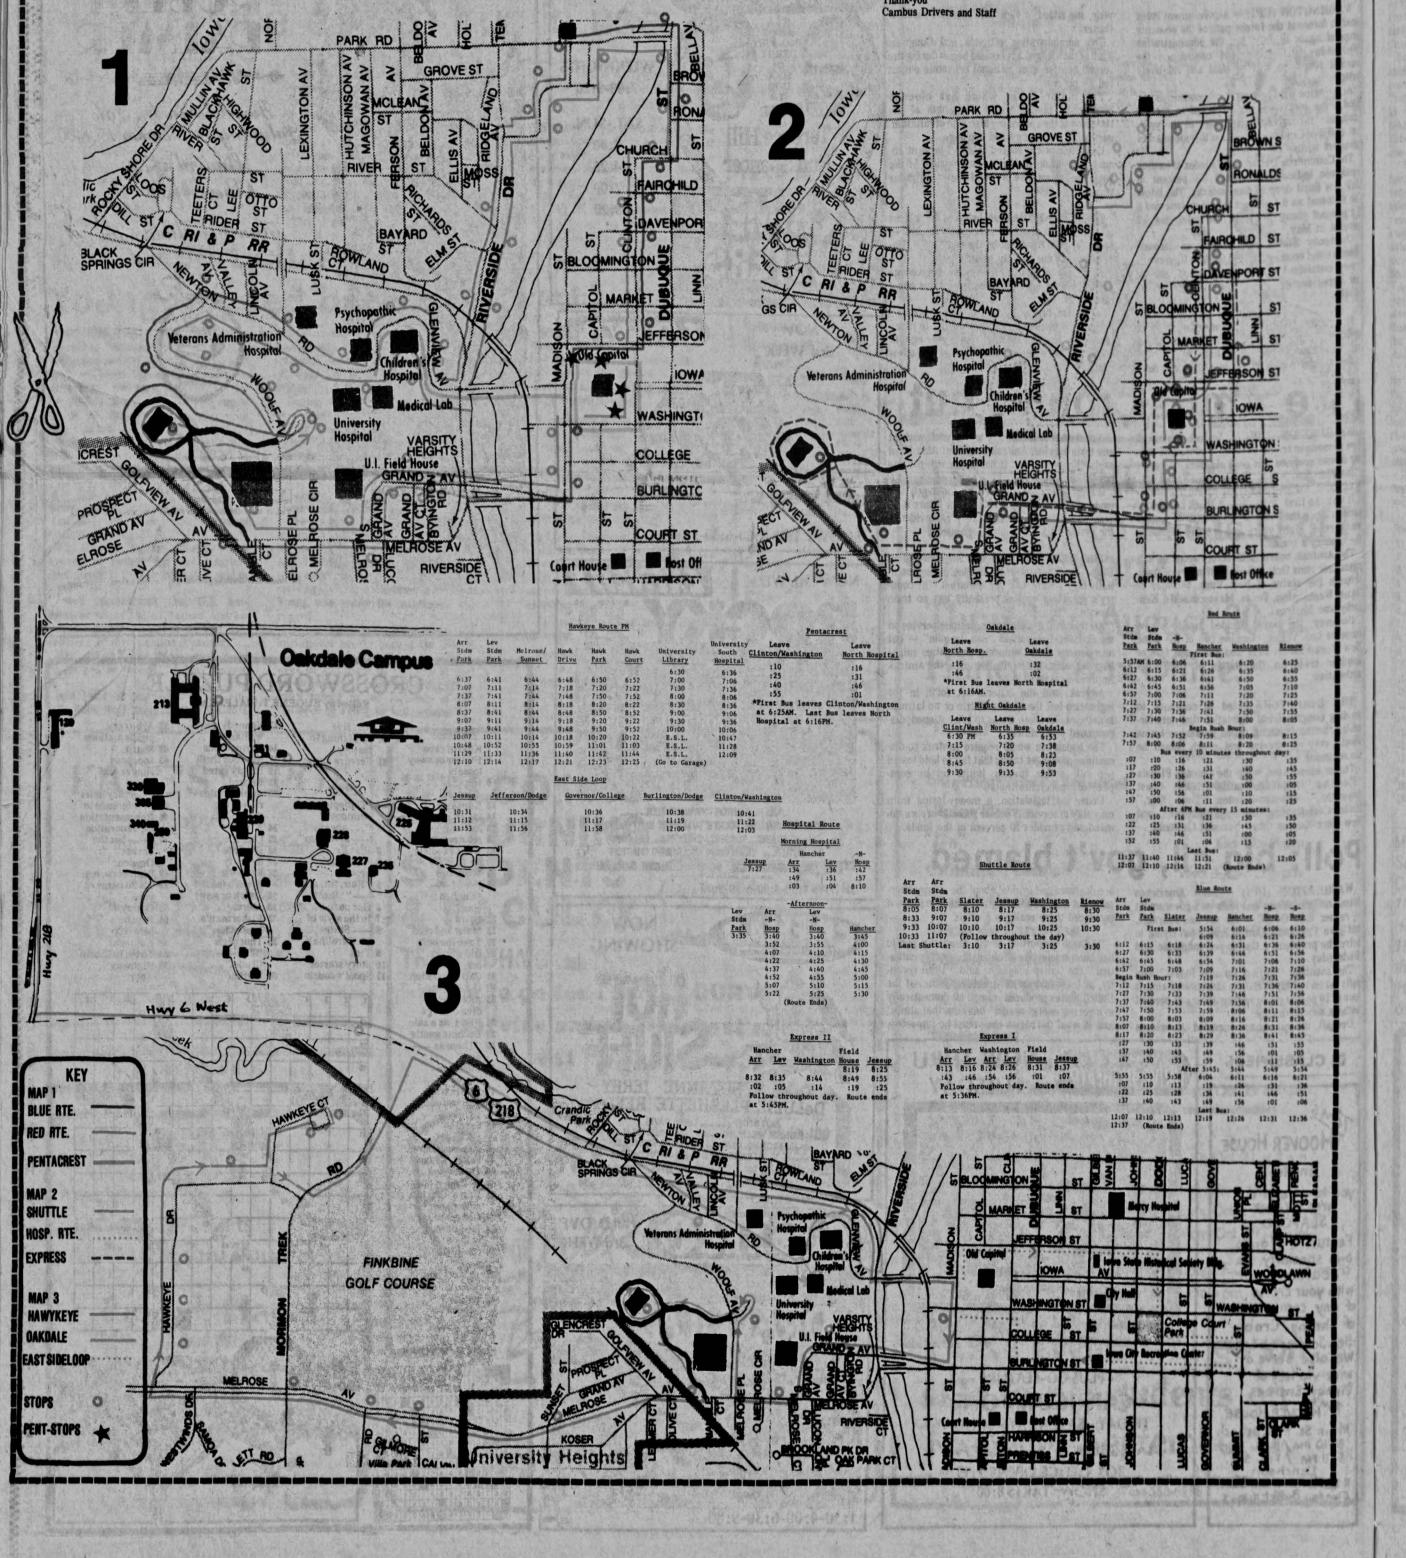

Passenger Safety and Convenience

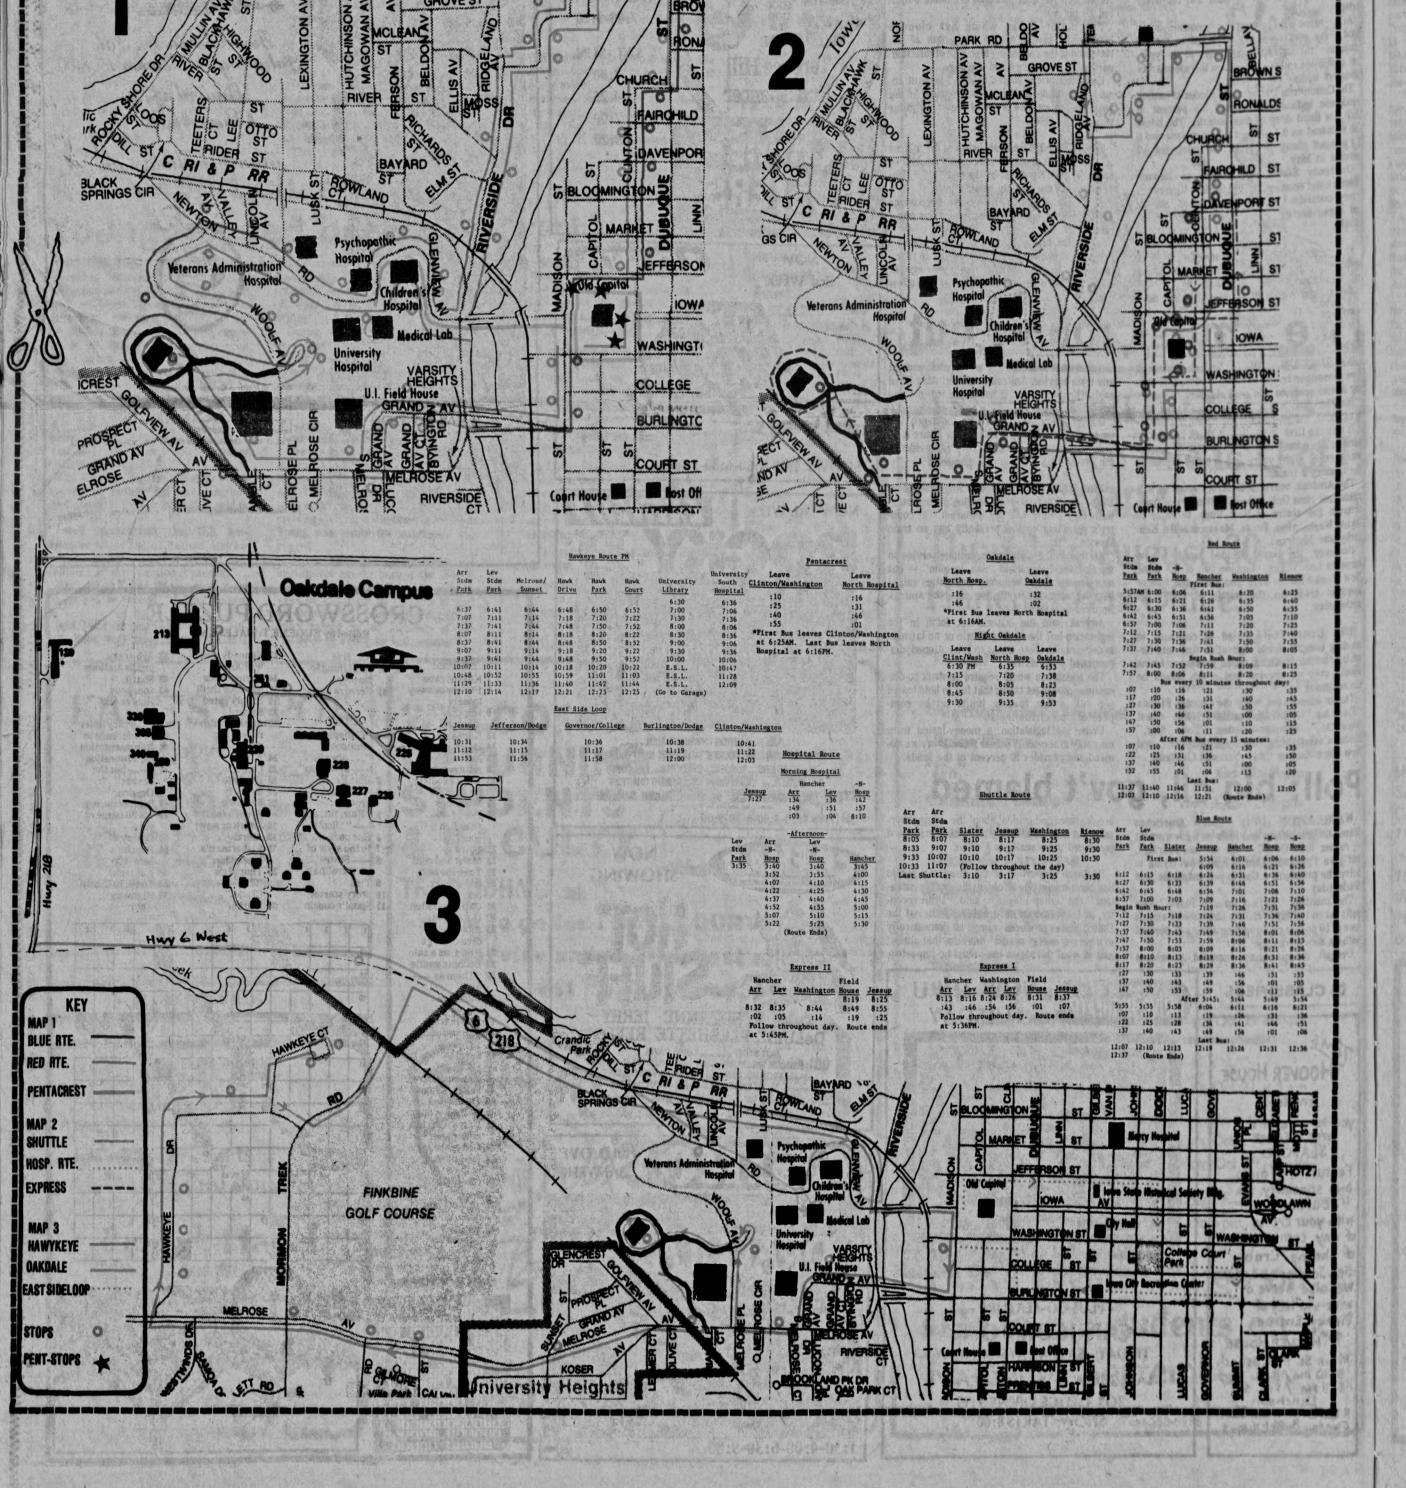

There are several things you as a patron can do to help us provide more efficient and safe service. • Please board the bus at only marked stops. • Please heed the rear-door-exit policy and never board the bus through the rear door. • Know what bus you are getting on by reading the destination scrolls on the front and side of the bus.

- Please pull the bell only once for a given stop enough in advance of the stop to allow the driver to stop smoothly.
 Always sit down if seats are available. State and federal laws prohibit overloading of the bus such that the driver's forward or side vision is impaired. If a bus passes you by, it is probably full or another bus is very close behind it. Please wait calmly for
- the next bus.
- · Please don't smoke or litter on the bus.
- · Please don't put your head or arms out the window.
- Please don't put your head or arms out the window.
 To use the cambus system to your fullest advantage requires a knowledge of our schedules and routes. We suggest you cut out this ad and save it for reference. In addition, times for individual stops are posted in the green schedule boxes underneath the bus-stop signs at most stops. The Cambus stop signs also list the routes which service that stop.
 Please be aware of safety at all times. Never walk in front of a bus! Never ride a bicycle in a bus' blind spot (the right rear side.) Never unduly distract a driver. In all cases, the driver is responsible for the operation of the bus.
 Any complaints, suggestions, comments, or compliments are appreicated.

There are a few temporary changes from the route map shown below. Until the construction is completed on Washington street all of the routes which normally would go down Washington will proceed straight on Clinton street and take a right on Burlington street. There will be no stops between the Clinton street stop and the Lindquist Center on Burlington and Madison streets. Due to a driver shortage we may not be able to run all of our routes for the beginning of the fall semester. If we have to cut service the Express Routes may not run and there would be only one red and blue routes after nine o'clock instead of two. We hope that the changes will be in effect only a short while. We will be as efficient as possible

Your support and assistance in the past has made the University of Iowa Cambus system one of the best student run bus systems in the country. Through your continued patronage and support through optional fees it can be ever better. Thank-you

Something new

Welcome to Iowa City and welcome to The Daily Iowan volume 112. For you newcomers to this town we offer some introductory info about the DI. For those of you returning from last year, we'd like to clue you in to some changes we've made from volume 111.

The DI is legally, administratively and financially independent. It is published by Student Publications Inc., a non-profit corporation.

The DI's circulation is approximately 17,000 during the academic year. The UI is the largest DI subscriber and pays approximately \$110,000 in mandatory student activity fees in order that students can get the DI every morning at their doorstep.

The bulk of the DI's income comes from advertising. Publisher William Casey is the paper's business manager and is responsible for the DI's total budget of more than \$600,000.

The DI editor is completely responsible for the news-editorial content of the paper. Every spring SPI chooses a new editor. Every spring the new editor hires a new staff composed mostly, but not entirely of students. And every spring the new editor makes changes.

This summer we published daily through June and July and initiated a number of changes. We've changed the typography and overall layout and we hope you like the DI's "new look."

SOME OTHER CHANGES include moving the popular "Briefly" section, which offers a short wrap-up of national and world news, from page one to page two in order to draw you to the inside pages of our paper.

"Postscripts," the community announcement section, can be found daily below the Briefly section on page two. "Doonesbury" will be found daily on page five.

In order to establish a more consistent "editorial tone" on this opinion page, we've set up an editorial board composed of the editor, editorial page editor and staff, two news editors and the managing editor. The opinions expressed in this "left hand" column will be those of the signed authors and represent the general opinion of a majority of the editorial board. And, as a type of extension to the editorial page, we will feature an "Op-ed" page Mondays and Wednesdays, offering interesting analyses and news features.

Below are three policies we would like our readers to know:

Postscripts

All subsmissions must be typewritten, triple-spaced, on a full sheet of paper. Postscripts will not be taken over the telephone.

Notice of events where admission is charged will not be accepted. Notice of political events also will not be accepted, except the meeting announcements of UI recognized student groups. Postscripts deadline for next-day publication is 3 p.m.

In general, Postscripts items will not be published more than once due to space limitations. Notice of events will be published on the day of the event unless good reason is given for earlier publication. Submissions should be short and the DI reserves the right to edit Postscripts for length.

Letters to the editor

Letters to the editor must be typed, preferably triple-spaced, and must be signed. Unsigned or untyped letters will not be considered for publication.

Letters should include the writer's telephone number, which will not be published, and address, which will be witheld upon request. The DI reserves the right to edit letters for length and clarity.

Use of names of alleged victims of sexual abuse

The DI's general policy is that we will not publish the name of someone who reports an instance of alleged sexual abuse when we report local incidents.

The Daily Iowan

Section 2 Thursday, August 30, 1979 Vol. 112, No. 40 c 1979 Student Publications Inc.

and presented to the solution of the sector of the sector

Tractors, steamboats and music lessons

During 25 years of residence in Burlington, Iowa, I never saw a tractor in the downtown area. That may seem surprising to non-Iowans, given the state's image of one great pasture awash with corn and people who chew on weeds and vote Republican, but it's true; tractors in downtown Burlington tend to dam-up the traffic flow and are thus relegated to the outskirts of the business area. Imagine my disconcertion, then, when I watched the CBS Morning News last week and saw an Allis-Chalmers, picturesquely festooned with black Iowa soil, chugging up Fourth Street past the city hall.

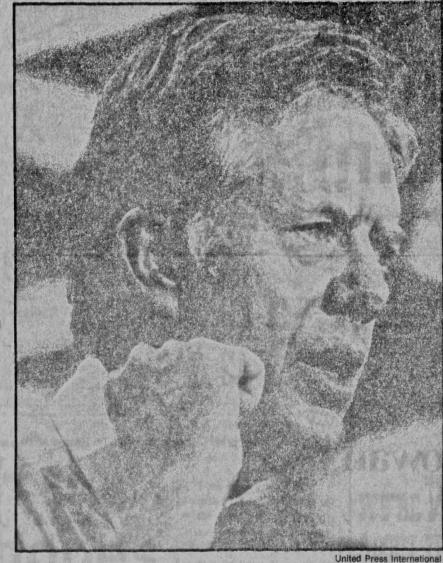

I immediately got the feeling the tractor was engaged not in agriculture-

Michael Humes

related pursuits, but in the business of image-making. The news story in which this tractor was a bit-player involved President Jimmy Carter's muchpublicized "town meeting" in Burlington during his family's tenure as boat people aboard the Delta Queen, one of the last of the steam paddlewheelers (I never saw many of those around town, either). It all came together: the tractor to show where the President was, the "town meeting" to demonstrate what a regular guy the president is and the steamboat to demonstrate he is up the creek.

THE TRACTOR and the steamboat exemplified the anachronistic air of the event. Plying the Big Muddy was, I imagine, a public relations device to boost the president's job rating (there would be little reason to try to boost his personal rating, since it is already high. Exactly what a steamboat trip has to do with an effective presidency is unclear, but he did score personal points with people who wouldn't get to see the president otherwise (although in many cases this amounted to the evangelization of people who were zealots to start with). And it is an awfully nice boat.

But at the Burlington stop, the big event was the open air "town meeting" in Crapo (as in "crepe" rather than "crappola") Park. First of all, Carter's "town meetings" are not town meetings

in the strict sense of the word: Tickets were passed out for the section of the audience which would be allowed to ask questions, and the questioners (a few of whom conspicuously wore Carter badges and t-shirts) were chosen at random beforehand. And some of these questioners were clearly not out for blood ("Have you caught any fish?" and "How is Amy coming with her violin lessons?"). Carter chose Burlington as the scene of his al fresco Q-and-A session for good reasons: First, because the editor of the Burlington Hawk Eye, John McCormally, endorsed Carter spectacularly early (in 1974, no less, making him the first do to so), and has continued to endorse him almost daily ever since;

and second, because the locals still support Carter by and large and he could be certain of a few questions about nothing tougher than Amy's musical destiny.

THE SCENE at the town meeting itself was a little disconcerting. Carter spoke from a band shell, against the backdrop of large flag that glowed ominously when the sun seeped in behind it. The TV cameramen, who were dressed like combination L.A. bartenders and Sandinista irregulars, loudly cursed this situation, saying how bad it would make Carter look and complaining that they were constantly having to change their apertures. A number of network news people arrived - I could

tell they were biggies because they had several varieties of press credentials in assorted color dangling around thei necks while I had but a simple black and-white one - and the people who have showed up to see the president seemed just as excited to see Cassie Mackin and Sam Donaldson (a rumor that Walter Cronkite had been seen lurking around the jungle gyms spread through the crowd like wildfire). Sam Donaldson of ABC was a particular crowd favorite. signing several autographs and posing for pictures with several family groups.

Hours before the president arrived. the Secret Service, conspicuous in their inconspicuous grey suits and dark glasses, tinkered with their lapels behind which rested .38 caliber bulges. and talked into their sleeves. One of them took an immediate dislike to me, so I hid out with the other terrorists and derelicts in the aptly named "press pen.'

THE PRESIDENT ARRIVED unexpectedly on time. He introduced his family, Secretary of Agriculture Bob Bergland and Senator John Culver, made a few characteristic remarks about how wonderful it would be if everyone saved just oodles of energy by walking to work and the like, took off his coat and asked for questions.

The questions were fairly predictable, most of them concerning agriculture and energy. The only sticky spot for Carter came when one man asked a question about nuclear reactors, harkening to the possibility of becoming "the moral equivalent of cannon fodder in the moral equivalent of war" if a major nuclear accident occurred in the farm belt. Carter gave a rather vague answer about nuclear energy being a "last resort," even though he seemed to think it should be used first, before all the other last resorts. The questioner, not satisfied, asked the question again, and yet again a third time when he still couldn't get a direct answer. The president finally got rid of him by saying such a "catastrophic accident would be a catastrophe.'

Then came the question about Amy's violin, which Carter answered in much clearer terms: She's good considering the amount of talent she has. The same might be said of her father.

Because no all-inclusive policy can be made, the decision whether or not to use the name in our coverage of a trial will be made at the discretion of the editor on a case-by-case basis. Considerations in making that decision include, but are not limited to, the sensitive nature of the case, newsworthiness of the name and fairness to the defendant.

The DI is independent and free of UI control. The DI has no commitments to any special interest group or faction. Only with this freedom can we best serve our readers.

The only commitment we make is to publish a quality newspaper. We hope you enjoy it.

NEIL BROWN Editor

Welcome back

For those of you who have passed the summer 'midst other woe than ours, welcome back to Viewpoints, the Daily Iowan's editorial page. A few changes have been made, so here's what you can expect.

If you have been a Nicholas von Hoffman fan, you have fallen upon unhappy times. His tenure on this page is at an end, and he has been superceded by Garry Wills' Outrider column. Wills, better known as the author of Nixon Agonistes and Inventing America, refers to himself as a conservative, but his columns will demonstrate he is an unconventional one.

There is also a new look in the editorial page staff. Barbara Davidson and Linda Schuppener have signed on for the duration and will be producing both editorials and columns. Other members of the staff will also be appearing on the page with greater frequency.

There will also be a change in focus in the editorials, with more emphasis being given to local and university issues. We will also strive to make editorials more concise, which will lead to more editorials appearing each day.

Some things, however, will stay the same. Patrick Oliphant, he of the merciless ink, will be back, as will Winston Barclay, a DI mainstay whose byline has graced this page since the mind of man runneth not to the contrary. And then there's me, with my customary warlike ululations against brutish injustice, acerbic social commentary and typographical errors.

But our most dedicated and frequent contributors are our readers. We hope you'll be back, too.

nmerings of Camelot Latent gill

WASHINGTON - The plight of the Democratic left is acute, as one can learn by talking with Douglas Fraser, president of the United Auto Workers. On the one hand, the troops are itchy for Kennedy. On the other hand, if Kennedy doesn't go, labor must live with Carter, and there is no sense in making that process any more difficult than it is

Garry Wills

already.

These pressures have to reach Senator Kennedy. In the past, always being on the verge of presidential run always helped him as an effective senator. Talented staff, legislative allies and an attentive press made more of the senator's present career because of his possible future.

But we may be reaching the point where flirting with the future begins to

damage the present. If his friends are asked to hang loose from others in suicidal ways, he may loose some of his leverage even in the Senate. If he does not want to run - and I halfway think he does not - he may find it necessary, at some point, to run in earnest only to stay in place.

IT IS NOT PLEASANT to watch him being forced into this corner. Unlike both his brothers, he is a good senator, as good as there is these days. Why not let well enough alone? Why risk a certain good for a chancy better? Why risk danger and obloquy when he already has influence and respect? If he tries and loses, he's not only worse off, he has lost forever the magic that gives him an instant audience and response no matter what he does or where he goes.

But magic rusts unused. Some are beginning to ask what his magic exists for; and when they do that, the magic begins to go away, even in his present role.

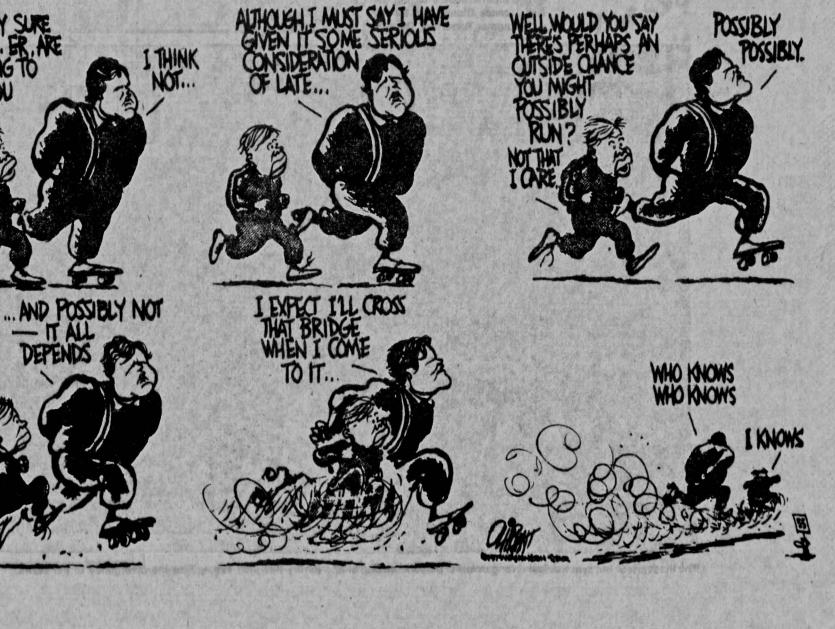

I don't underestimate the obstacles. Some of these are discussed in the current McCall's, where a wise range of people respond to the question whether Chappaquiddick matters anymore. Professor Arthur Schlesinger gives the sappiest answer, saying it matters, but as a plus - it has matured the senator. Schlesinger has been testing this line of the Kennedys for 20 years now, that they succeed by failure. The worse they get, the better they are bound to be. Most people would abandon that paradox, if for no other reason than out of boredom. Robert Sherrill makes a subtler point, worth pondering. The wish for Kennedy may itself be a form of self-delusion, a belief that one charismatic figure can set everything right; that without him we have no real hope; that a whole nation is at the mercy of one indispensable man. If that is what a Kennedy candidacy would mean, than it would not serve the nation's real interests.

ON THE OTHER HAND, you cannot say that Kennedy will lull the nation into some impossible dream of Prince Charming, and then say that raking up Chappaquiddick and other things will tarnish

and muddy his image in the campaign. It seems certain that a good deal of reality would break in, destroying the belief that Kennedy is peerless. Camelot faded a long time ago.

Barbara Tuchman, too, makes a telling point. Several repondents said let's forget and forgive. Rollo May, for instance, said he would not cast the first stone. (I wonder if he said that about Richard Nixon?) Almost all these people mentioned that other politicians have dark spots on their records, some known, some probably there but unknown (look at how much we have learned about presidents' flaws only after they die). Tuchman grants all that, but then asks: Should we come to expect and settle for tainted goods, condemning beforehand any search for human excellence above the "they all do it" level? (Douglas Fraser says a Kennedy-Connally campign might be the cleanest one in our history: Neither candidate would want to lift the rug of the past and look underneath.)

USC No. 1 in ratings; Oklahoma voted No. 2

NEW YORK (UPI) -Southern California is a big favorite to repeat as national champion. The UPI Board of Coaches, in its annual preseason balloting Monday, gave the Trojans heavy support and ranked Southern California as the No. 1 team in the nation.

The Trojans, one of five major teams to lose only once in 1978, collected 22 first-place votes and 492 points overall from the 34 members of the 42man Board of Coaches who took part in the preseason ratings. Oklahoma is picked as the nation's. No. 2 team and Alabama, Texas and Penn State round out the top five. Michigan is tabbed No. 6, Nebraska is seventh and Purdue, Notre Dame and Michigan State are the remaining teams in the preseason top 10.

Rounding out the top 20, in order, are No. 11 Houston, Missouri, Washington, Georgia, Florida State, Pittsburgh, Arkansas, Ohio State, with Earle Bruce replacing Woody Hayes as coach, UCLA and Texas A & M.

Southern Cal returns 15 starters, including All-America ning back and Heisman Trophy hopeful Charles White, to the National Chamionship team and Coach Johnny Robinson is confident but wary about repeating

repeat productive seasons," today, repeating is more difficult than ever.'

more difficult for Robinson, several talented teams have their sights set on dethroning the Trojans as national

Second-ranked Oklahoma, No. 3 Alabama and fifth-rated Penn State lost only one game apiece last year and each had a imate claim to the national title. Clemson, unranked in the preseason ratings, also lost only nce in 1979.

Sooners received two first-place votes and 437 points and return 11 starters.

By DOUG BEAN Sports Editor

If you were out of town this summer, you missed some high class sports action and several coaching changes.

The University of Iowa hosted its first national tournament of any kind to start the summer when the Association for Intercollegiate Athletics for Women National Large College Tennis Championships came to Iowa City June 4-12.

SOME OF THE world's top flight tennis players competed in the nine-day tournament with Kathy Jordan of Stanford winning the singles title and later teaming up with Alycia Moulton to take the doubles crown. Southern Cal took the national team title with an 8-1 victory over Stanford.

Jordan, who finished up her college eligibility, turned pro immediately after the tournament. She went on to finish in the top 16 in women's singles play at Wimbledon

AIAW singles runner-up Wendy White of Rollins College also competed at Wimbledon as did Stacey Margolin of Southern Cal. Anna Maria Fernandez of Southern Cal and Moulton

Iowa's Karen Kettenacker and Laura Lagan found the national competition tough and didn't fair well in singles and doubles play but the freshman duo will have three years of eligibility remaining at Iowa.

A WEEK LATER, some of the best golfers on the professional tour came to Finkbine golf course for the Amana VIP and a record number of fans turned to witness an event filled with action.

The saga of Billy Martin's return to the New York Yankees unfolded at the tournament. Martin received a call from Yankees' owner George Steinbrenner and was called off the course after playing the 13th hole. Martin denied that he would

return to the Yankees before leaving Iowa City but was installed as manager later that day.

In tournament play, former PGA champion Dave Stockton overtook Tom Watson late in the day with a seven-under-par 65 to win by one shot. Stockton birdied the final two holes to pocket the \$3,000 top prize. Larry Ziegler finished third with a 67, and Mason Rudolph, Mark Hayes and Johnny Miller tied for fourth with 68s.

THE IOWA BASEBALL team lost two starters off last year's squad when pitcher Chuck Johnson and outfielder Jeff Jones signed pro contracts with the Chicago White Sox and Cincinnati Reds, respectively, in mid-June. Johnson was assigned to Appleton of the Midwest League and Jones to the Billings, Mont. rookie team. Both players had one year of eligibility remaining at Iowa.

RONNIE LESTER HAD a busy summer playing on the Pan American basketball team. The Iowa guard was the only player to start all nine games for the gold medal winners and he hit double figures in five games. Lester was also named to Playboy's pre-season All-American team in June

THE WOMEN'S athletic department filled two coaching vacancies this summer by naming Judy Ann McMullen to the head basketball position and Diane Chapela as head gynmastics coach. McMullen has been a successful high school coach in California and Chapela is a former AIAW champion from Clarion State. She has been coaching in Florida for the past three years.

ON THE MEN'S side, Track Coach Ted Wheeler named Les Stevens, a former Iowa trackster, as his assistant. Stevens has coached at Santa Barbara City College for the past 12 years. Football Coach Hayden Fry replaced assistant Bob

Lee, who resigned to enter private business in Texas, with Barry Alvaraz. Alvaraz was the head man at Mason City High School and will coach tight ends at Iowa.

Most Hawkeye coaches were busy with recruiting over the summer.

Wheeler pulled in three Canadians: Rob Sametz and Glenn Dupont, middle distance and sprinter Craig Stanowski. In addition to the Canadians, Wheeler grabbed sprinters Kevin Marshall of Clinton and Cletus Howard of Bellwood, Ill. plus hurdler Chris Williams of Jacksonville, Ill., miler Matt Trimble of Iowa City and long jumper Brian Quarles of St. Louis.

Baseball Coach Duane Banks signed outfielder Paul Zach of Oregon, Wis .: Cary Kolbert, a catcher from Manhattan, Kan.; Brian Hobaugh, a right-handed pitcher from Ford City, Pa.; and Brian Charipar, an infielder from Cedar Rapids. Swimming Coach Glenn Patton picked up three more prospects in Jay Kerrigan, a backstroker from Belle Plaine, Mark Wuest, a sprinter from Marshalltown and Joe Nash, a diver from Winnetka, Ill.

Iowa signed two gymnasts: Dan Kapeller of Lincoln, Neb. and Steve Troester of Waterloo. Both are allarounders. Doug Lockin of Aurelia and Gary Claypool of Cedar Rapids signed with the Iowa golf team while Brian Johnson, the No. 1 high school player in Minnesota and John Williard, singles runner-up in Michigan, decided to become Iowa tennis players. Softball Coach Jane Hagedorn picked up Melanie Ruth, a catcher from Clear Creek High School.

FORMER IOWA linebacker Tom Rusk was just one of several Hawkeye football players to be drafted this spring. Rusk was cut by the New York Giants and was later dropped by the Buffalo Bills. Darrell Hobbs, Jon Lazar and Dave Becker were cut by the Atlanta Falcons, Philadelphia Eagles and the Chicago Bears, respectively.

Think school. Think JCPenney.

Soccer club desires varsity status

There's never a dull moment on the soccer scene. Above, a UI Soccer Club member attempts to kick the ball to score past the

By HEIDI McNEIL Staff Writer

Football, basketball and wrestling take the main spotlight at Iowa and it's tough for the UI Soccer Club to get any respect.

The UI Soccer Club was founded over a decade ago by a "bunch of guys who just wanted to go out and kick the ball around," according to team member John Newlin.

The club has now grown tremendously with several teams branching off from the parent organization due to popular interest in the Iowa City area

This soccer boom, which has even reached the youngsters with the Iowa City Kickers Club, can't be overlooked much longer, according to Newlin.

THE UI SOCCER CLUB recently submitted a proposal to UI Athletic Director Bump Elliott requesting varsity status. This proposal will be taken into consideration at the next meeting of the Board in Control of Athletics. Newlin said a similar request

was made four years ago but nothing materialized. "At that time there was little support in the area for soccer

goalie. But below, good goalies rarely let that and we were turned down," he ball escape as they'll do anything to prevent a explained. "But now the support has grown tremendously

due to incresing interest in soccer. The Board will be making a mistake to deny us varsity status much longer.'

Five Big Ten schools field varsity soccer squads with Indiana gaining the most attention after finishing second in the NCAA tournament last year. Wisconsin, Michigan, Michigan and Ohio State also have soccer on the varsity level. And Newlin said Minnesota and Northwestern are

"No matter what ki fense you've got, if yo great defense you're game," Schembechler always say.

WITH THE 1979 season just around the Schembechler, the dea Ten coaches follow departure of Woody from Ohio State, is still

Inexperience, schedule hamper Hawkeye hopes

Eighteen years - it's been a long, dry spell for the patient Iowa football fans. And though optimism is running high with new coach Hayden Fry in Iowa City, losing season No. 19 is on the horizon.

In all probability, Iowa will face one of the nation's toughest schedules this year with the likes of Oklahoma, Nebraska, Iowa State, Purdue, Ohio State and Michigan State. The Hawkeyes just don't have the horses to compete with those studs.

But Fry has ridden into town from North Texas State with a positive attitude and a passing offense which would excite any fan - especially an Iowa fan who sat through five previous years of running up the middle for no gain.

IOWA FANS ARE so excited about the upcoming season that three of the six

Doug Bean

home games have been sold out. Fry can't believe the loyalty of Hawkeye followers after losing year after year, but he doesn't promise any miracles for overly optimistic fans in his first year.

"We anticipate a tough year from a won-lost standpoint," Fry said. "We anticipate a tough year from an execution standpoint because of the complete new offensive philosophy. It's going to be one of those years - extremely tough."

Excitement? Well, maybe.

'We think we'll have an exciting football team because of the nature we play defense and offense. We pin our ears back and get after people.

"We're very aggressive from a defensive standpoint in that we try to create bad plays," Fry explained. "We cause fumbles, we try to knock the ball loose, we try to intercept the football, we try to camouflage what we're doing."

FRY WILL TAKE a team that has an offense with formations similar to the Dallas Cowboys and uniforms designed like the Pittsburgh Steelers into a Sept. 8 home opener against Indiana. This game will probably be the key to any hopes of Hawkeye success with a murderers' row lineup of Oklahoma, Nebraska and Iowa State to follow.

The Big Ten race doesn't figure to get much easier. The conference is expected to have more balance than it has in a long time and Fry predicts some good and bad things for his team.

"We'll have surprises without question," Fry said. "We will have some big plays and in all probability we'll have an upset or two."

Iowa will be shooting for upsets in most of their contests this season. Pre-season pollsters have tabbed the Hawkeyes to finish low in the conference standings.

The new Iowa coach refuses to predict how his team will finish, but he does promise to bring a coaching philosophy from Texas that is becoming more common in the league.

"We're going to establish the pass first and then run unless they don't want to stop the passing attack. And then we'll just keep passing," Fry said. "That's why we're liable to throw 50 to 60 times a game. We'll run ball control with the passing game.

IF FRY CAN find an offensive line to protect the passer, the Hawkeyes could find some success in this department with a wealth of fine receivers.

Keith Chappelle, a junior college transfer from Glendale JC in California, is considered outstanding and Iowa's 1978 Most Valuable Player, Brad Reid, returns. Jim Swift, the seldom used tight end during Bob Commings' reign, also figures heavily into Fry's offensive plans.

Fry won't call any of his quarterbacks exceptional but he thinks several can be adequate. Included in this group is Phil Suess, who had an excellent spring and holds the No. 1 position, Gordy Bohannan, a top passer at Glendale JC last season, Tony Ricciadulli and Pete Gales.

The Hawkeye coach rates the offensive line as adequate with the possibility of becoming better than average as the year progresses. Veteran tackle Sam Palladino and center Jim Hilgenberg return to anchor the offensive line.

Fry has joked over the summer that the Hawkeyes, with their new uniforms, will look like the Pittsburgh Steelers until the ball is snapped. But realistically, he could

sure use a few members of the "Steel Curtain" defense.

IOWA'S DEFENSE, which finished last in the Big Ten a year ago, was dessimated by graduation and Fry found the rebuilding chore to be a difficult one after spring practice. Injuries plagued the defense in spring drills and Fry had a difficult time coming up with a two-deep roster.

The linebacker position worries Fry the most with Tom Rusk and Dave Becker gone and Leven Weiss bothered by a bad knee. Fry has the same concern for the defensive line with Darrell Hobbs, Steve Vasquez, Doug Benschoter and Joe Hufford lost to graduation and veteran John Harty getting a late start in the spring.

A 5-2 alignment will at least give the defense a new look and its gambling style of play could be a joy to watch.

"The offensive team is going to have a difficult time just moving the ball consistently on us even though we don't have the personnel and depth we'd like to have on defense.

"But just by the nature of what we do has been very good to us so we know that we're going to create a little confusion. We're going to make the other team give up some bad plays - make them change their style of attack," Fry said.

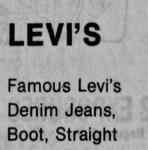

AFTER WATCHING THE Iowa secondary perform last season, it's hard to believe that Fry could call the defensive backfield the most improved segment of the team. But the zone defense and position changes have helped shore up the secondary.

Fry said he found that Mario Pace and Cedric Shaw could be two of the better cornerbacks in the Big Ten. He also moved former linebacker Mike Jackson to free safety.

A winner doesn't come easy to Iowa."Wait until next year" may again be the key phrase. But fans, coaches and players are confident that Hayden Fry will put the Iowa football program back on the map of football respectability, which it once attained.

Fry openly confesses that recruiting will have to be better and the talent of players will have to improve. But he has most people convinced that the "Hawks will be flying high again.'

The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979-Section 2, page 7 Wolverines looking for an offense

By HOWIE BEARDSLEY

Preparing for an interview with Michigan football Coach Bo Schembechler used to be the easiest assignment a reporter could muster.

Heck, the only prerequisites in tackling such a task was a well-sharpened pencil, a clean pad of paper and a little common sense regarding the game's defense - a word that is synonymous with the 10-year head boss' coaching reputation. "No matter what kind of offense you've got, if you have a great defense you're in every game," Schembechler would always say.

WITH THE 1979 college season just around the corner. Schembechler, the dean of Big Ten coaches following the departure of Woody Hayes from Ohio State, is still a stout

supporter of living and dying by defense. Even so, the topic of conversation in the Wolverine

reason

camp concerns Michigan's offensive punch. And with good "For the first time in four offensive starters is no

touchdowns).

of scoring strikes) is more of an option quarterback while Wangler likes to throw the football," Schembechler said. "We have confidence in both young men. All they need is game experience.'

Experience, or a lack of it, is also the key to Michigan's running attack. The departure of rushing leaders Harlan Huckleby and Russell Davis will leave the ground game in the hands of tailbacks Stan Edwards, sidelined the entire 1978 campaign with an ankle injury, sophomore speedster Butch Woolfork (78 carries for 370 yards and two touchdowns) and fullback Lawrence Reid (209 yards on 50 carries and two

While the backfield is indeed seasoning, the situation interior line riddled with in-

Dickey (last year's un- regarding the Wolverines' derstudy to Leach who com- receiving corps couldn't be better, according to Schempleted 8 of 19 passes and a pair bechler.

"There's no question that we've got receivers," he said. "This year's group will be the finest I've had at Michigan."

SUCH LOFTY expectations can only mean the return of All-American candidate Ralph Clayton (25 catches) at wingback, tight end Doug Marsh and deep threats Rodney Feaster, Tony Jackson and Alan Jackson. Clayton, an All-Big Ten pick last season en route to a record-setting eight scoring receptions, will be out to improve on his 50 career receptions worth 1,036 yards and 10 scoring trips.

If Michigan expects to operate a well-oiled offensive machine, the bulk of the work a question mark due to a lack of will fall on the shoulders of an

juries and graduation losses. A big boost will be a healthy All-Big Ten guard in John Arbeznik and counterpart John Powers plus veteran tackle Bubba Paris.

Defensively, Michigan will show little, if any, change when it comes to fielding a traditionally stubborn unit. The Wolverines, who over a fiveyear period (1975-78) topped the nation in rushing defense (114 vards per game), total defense (230.1 yards) and scoring See Michigan, page 13

By HOWIE BEARDSLEY

Dear Mom

Well, I made it back from the Windy City in one piece. As usual, it was one of those hot, muggy July days for the Big Ten's Annual Kick-off Luncheon. But that didn't seem to hinder the preseason confidence and optimism of the coaches and players present.

You know, Mom, the atmosphere that day at the Palmer House was really strange. Bo Schembechler from Michigan and Ohio State's Earle Bruce looked as if they were enjoying themselves. Heck, they were laughing, telling jokes and even obliging us interview-hungry reporters. Maybe it just goes to show that college coaches aren't all siness after all.

Schembechler didn't act like the kind of coach who directs nsults and four-letter phrases toward those men in the striped shirts. It was difficult to recognize him, though, since he

Buckeyes' Bruce faces tough task

By SHARI ROAN ssociate Sports Editor

Earle Bruce is feeling like a rookie although the head man at Ohio State is entering his 27th year of coaching.

But it is his first year with the Buckeyes and Bruce has just moved from a newlyemerging Iowa State football program to one of the most pretentious in college football at Ohio State.

In addition, Bruce will be following the legendary act of Woody Hayes who had been the main man in the 83,112-seat Big Ten football. "I'm very concerned about our football team because I know very little about the Big

Ten." he said However, Bruce will be building on some principles already established at Ohio State including an I-formation on offense and an Oklahoma (5-2) defense. "There's going to be a lot of similarities. I just hope

Ohio Stadium since 1951

ALL THIS WOULD tend to make one want to sympathize with Earle Bruce and the "new" Buckeyes. But no one associated with Big Ten foot-ball is feeling the least bit sorry for Ohio State.

Bruce won't need to start from scratch in his first campaign in Columbus. He is Hayes' disciple who played briefly for the Buckeyes in college and coached as an assistant under Hayes from 1966 to 1972. According to numerous sources, Bruce was Hayes' choice as a successor after Hayes lost his cool and his job following the 1978 Gator Bowl. Bruce does not appear as con-

fident in his initial plunge into

meeting in Chicago, Bruce's lopes appear to be realistic. Improvement over last season hinges on whether he can create a sound offensive line and toughen up a defense that gave up 216 points.

California coach creates flare

By SHARI ROAN Associate Sports Editor

7

Among those keenly tuned to the debate over the future of six-player girl's basketball in high schools are the college coaches in Iowa. New Hawkeye Coach Judy McMullen is one such interested observer.

McMullen, who was named to succeed former five-year Coach Lark Birdsong in June, comes to Iowa as a believer that the Midwestern cornland, "was always the place for girls basketball - well-grounded in

But, McMullen adds, the continuation of six-player basketball in high schools may force college coaches in Iowa to look beyond the state line. 'Philosophically, I think it

would be nice to get the Iowa fine players," she said. "They are proud to play for Iowa basket-ball and I think that's super. volved in six-player and five-The only drawback I see is that ferent," McMullen explained. lowa is in six-player basket-

schools. So a transition to cluding new Head Football collegiate five-player basket-Coach Hayden Fry's daughter, ball will not be a problem for Robyn Fry. Iowa's new head boss.

McMullen also hopes to comb Iowa's junior colleges as an ad-"It's unfortunate for the Iowa high schools to have to make ditional talent search. the transition from six to five-

"The whole job now is geared to recruiting," McMullen said. players. I know people involved in six-player basketball and "That's very, very important. they think it's the greatest thing in the world. And that's The support is here at Iowa and we need to recruit for the program."

The possibility of a new arena to house basketball offers another glimmer of hope in stepping up the women's program, McMullen says. "I think that's exciting and I

successful switch for an Iowa high school player to college think that it is going to be ball can depend solely on the helpful to us in regards to

facility is built, she said. "I know the wrestling team and men's basketball teams have really deserved it and hopefully, the women's program will deserve the same in the future."

McMULLEN ALSO VIEWS the suggestion of men's and basketball women's doubleheaders, similar to the current set-up at Iowa State, as a possibility for the future if troublesome organizational details can be worked out.

"I think any ways we can get exposure for women is important." McMullen said. "I don't see us as a side-show or gimmicky, however. I think we have a lot to offer. There's some neat things we can do," she added.

Even with the five-year-old women's program still working for recognition, McMullen expresses no misgivings about taking on last year's 18-11 team

"This was too neat an opportunity and I was ready for a change," she said.

MCMULLEN'S INCOMING group had the best record in history last season and lost only one player to graduation, guard

Barb Mueller, Scoring and rebounding standouts Cindy Haugejorde (18.6 points and 8.1 rebounds) and Cyndi Gaule (12.3 points and 8.0 rebounds) return as well as other seasoned performers. "From what I understand,

they're a hard-working group of athletes," McMullen said. "They like to run and I like a running game." In addition, the new coach will undoubtably bring a west-coast style of basketball to try to rattle Midwestern opponents.

'From what I've seen of both Midwest and Eastern basketball, they are used to playing a standard, more methodical, and more offensive-oriented game.

"On the west coast, they seem to play with more daring and flare. We'll try for more fast-breaking and pressing," she added, "I'm very defensive-minded from that point.

Iowa's height and speed is better than McMullen anticipated, but she said, "the better teams are getting the 6-3 to 6-6 players these days.' Thus, with four Hawkeyes due

to graduate this spring, recruiting will play an essential part in McMullen's first season

ards in total offense, passing or 1.250 yards and rushing for 590. The 6-2, 200-pounder ac-counted for 13 Buckeye TDs ast season.

"I think he had one tough freshman year," Bruce said. 'He's a fine quarterback and a very skilled athlete.'

Schlichter's favorite target eturns this season in Doug Donley (6-1, 180). Donley was he leading pass receiver in 1978 with 24 catches for 510 yards. The speedy flanker has the opportunity to set Buckeye records in receiving as a junior his season

At fullback, senior Paul Campbell (6-1, 222) returns after leading all rushers with 591 yards in 1978. At tailback, senior power runner Ricky Johnson (6-0, 188) will be hoping to overcome injury problems to earn a starting position.

ALL-BIG TEN guard Kent Fritz (6-3, 238) is the sole returing offensive lineman. Giving Fritz help and Schlichter protection is Bruce's first project in fall camp.

"The question mark is our offensive line. Specifically, at our tackle positions. And Ohio State is known for their offensive tackles," says Bruce.

Senior Tim Brown (6-6, 268) will give the Buckeyes tremendous power at right tackle with several 250-pounders seeking to

n-fall

set a Buckeye record for 1,840 start at left tackle. Senior Er- 1978. At the other linebacker nie Andria (6-3, 246) is a likely candidate for left guard, while senior co-captain Tom Waugh (6-1, 242) is tabbed as the Buckeyes' center.

Towering Ron Barwig (6-8, 250) will be at tight end after gaining some experience last season. At split end, Bruce is not short on talent with several men, including speedy Tyrone Hicks, vying for the spot.

BRUCE PROMISES the wide-open style of football he directed at Iowa State. "We're going to throw the ball 40 times a game," he said. "We will use

basically an 'I' attack, with two wide-outs. Defensively, Bruce may have one of the most talented secon-

Gymnastics coach reflects new image

By SHARI ROAN ssociate Sports Editor

The Iowa women's gymnastics team has a new coach and a new model in Diane Chapela, a former Big Ten champion from Michigan State.

Chapela, a native of Lansing, Mich., succeeds Tepa Haronoja who stepped down as head gymnastics coach in March after five years with the team.

For Chapela, the move to lowa from a high school coaching position in Boca Raton, Fla. was a dream come true

"My goal when I was a competitor in college was to go into college coaching," she said. However, Chapela coached in the high school ranks for three years before seeking the Iowa position.

will be gaining an instructor with recent competitive experience. Chapela was an All-American while performing at Clarion State College in Clarion, Pa. as an all-arounder. In 1974, she transferred to Michigan State and captured a Big Ten championship in the floor exercise in 1975.

While at Clarion State, she at the 1973 Association for Intercollegiate Athletics for captained her team at eyes open," she said. Michigan State.

Chapela was in Iowa only coaching duties, and that occasion was to interview for the job.

Director Christine Grant said. the experience to guide the tourney in Haronoja's last team towards that standard of season. excellence. She also represents effective in recruiting," Grant added

Several freshmen were Ten.'

recruited by Haronoja during the interim, including standout Eileen Flynn from New Jersey. With the graduation of only one senior, all-arounder Laura Putts, Chapela will inherit many experienced performers.

NATIONAL QUALIFIER Diane Lary of Maquoketa will return along with sophomore all-arounder Mary Hamilton; two gymnasts Chapela was par-ticularly impressed with.

"All the girls have a lot of potential. My strong areas are beam and floor. I hope to be able to improve their performances in these two areas," Chapela said, adding that the beam appears to be a weak area for the Iowa gymnasts. With nine veterans back this season, Chapela's initiation into her new position won't be similar to her last undertaking. THE HAWKEYE gymnasts At Boca Raton High School, she was the first gymnastics coach and essentially started the

> team from scratch. In her first vear there, she coached a gymnast to a state championship on balance beam. "I've worked with the talented girl and I've worked with

the beginner," Chapela said. Her experience in Midwest colleges, in Florida and in gym captained her squad and took clubs in California leads 10th place in the floor exercise Chapela to hope for successful recruiting years ahead.

"I have contacts around the Women National Gymnastics country. And we'll look into Championships. Chapela also Iowa, too. We'll be keeping our

THE FIRST TASK at hand for the young coach is to once before assuming her get to know her team. "My own goal as a coach is to bring the girls as close to their potential as possible," she said. But, "I am glad to have someone Chapela added, there are no of Diane's caliber in this posi- reasons why the athletes cantion," Iowa Women's Athletic not progress from last year's best season ever. The Hawks Since she has competed with took fifth in the conference and the best in the nation, she has third in the AIAW Region VI

"I'm not much of a predica good role model which will be tor," Chapela said, "but I would like to see Iowa improve its team standing in the Big

Women athletes to hold reception

An All-Women Athletes meeting and reception has been slated for Thursday from 7 to 9 p.m. at Shambaugh Auditorium. All present lowa coaches and team members will be introduced. Anyone interested in women's athletics or event management is welcome to attend. For further information call 353-7288.

Charity Horse Show scheduled

The third annual Iowa City Charity Horse Show will held Sept. 1-3 at the Johnson County Fairgrounds with over 150 hunter-jumper riders from all over the Midwest featured. Admission is free.

UI recreation facilities reopen

The Field House will be open from 8 a.m. to 10:30 p.m. Mon. through Fri. and 9 a.m. to 10:30 p.m. Sat. and Sun. The Field House pool is still under construction but is expected to open around Oct. I. The Rec Building may be used from 8:30 a.m. to 10:30 p.m. Mon.

through Sun. The Canoe House will be open 4 to 8 p.m. Mon. through Thurs. and 10 a.m. to 8 p.m. Fri. through Sun. Rental fee is one dollar per hour or \$5 a day.

The Stadium Tennis Center will be available for use 8:30 a.m. to 10:30 p.m. daily.

Halsey Gymnasium will open Sept. 4 with set hours from 4:30 to 10:30 p.m. Mon. through Fri. The pool area, which is now accessible to male usage, will be open from 11:30 a.m. to 12:30 p.m. and 4:30 to 7:30 p.m. Mon. through Fri.

The Field House will be closed Labor Day with this facility and the Stadium Tennis Courts closed during the afternoon of home football games.

For further information, call 353-3494.

Rec trips offered

The UI Recreation Services are offering various fall trips as part of its Touch-the-Earth Recreation Program.

A Coyote Research expedition has been set for Sept. 14-15 with registration beginning Sept. 5 in the Rec Office (Room 111, Field House).

White water rafting and advanced kayaking trips on the Wolf River of Wisconsin are slated for Sept. 14-15 with sign up beginning Sept.

A bass fishing clinic will be held for three weeks starting Sept. 12 with a weekend trip scheduled for the end of September. Enrollment begins Sept. 7.

A parachuting clinic has been planned with the UI Parachute Club with evening classes slated for the week of Sept. 17-21. A day of actual jumping will follow. Sign up starts Sept. 7

There will be limitations on the number able to enroll for each trip. Costs usually include transportation, food and lodging. P.E. credit will be available for certain expeditions. For more details, contact the Rec Office or call 353-3494.

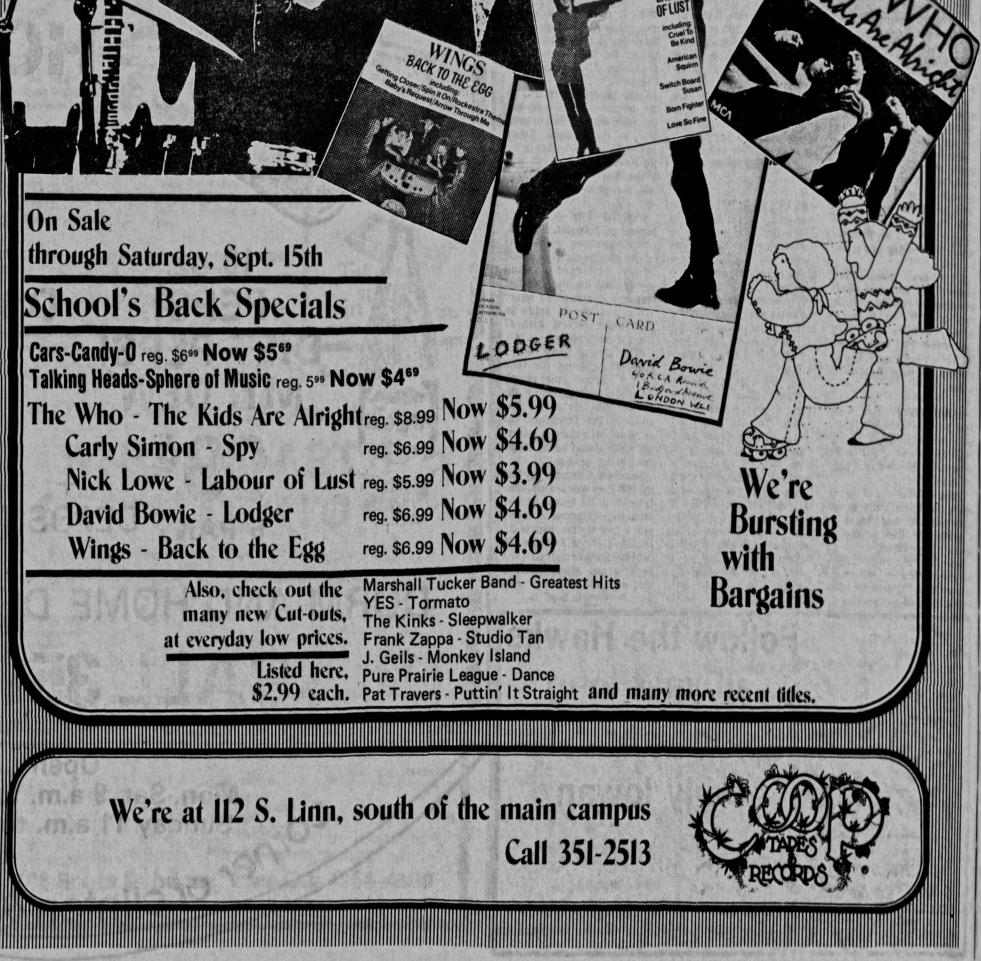

Lesson Programs to begin

Registration for the Rec Services Lesson Programs will begin Sept. 4 for various classes starting Sept. 10. Offerings include gymnastics for all age levels, swimming, Hatha Yoga, Shorin-Ryu Karate, Chung Do Kwon plus Tae Kwon Do. Any questions, contact the Rec Office (Room 111, Field House) or call 353-3494.

IM managers meeting set

All Intramural managers are encouraged to attend the upcoming orientation meetings. Men's dormitory managers will meet at 4:30 p.m. Sept. 5 with independent and fraternity leaders following at 5:15. Women's and co-ed team managers will meet Sept. 6 at 4:30 p.m. and 5:15, respectively. All meetings will be held in the Lettermen's Lounge of the Field House. For further details, contact the IM Office (Room 111, Field House) or call 353-3494.

DI CLASSIFIEDS

IF OPPOSING to gain ground run Michigan, the idea stairs with the pig just as hazardo veteran secondary **Big Ten selections** and Mike Harden.

"All you have to the schedules this y can see why we are win the Big Ten bechler said. "If ye picks, it would have due and Ohio State. both have experience backs who are good they don't play each season. And that break.'

And the Wolverin "Hey, we may toughest schedule in this year, but we'll in the conference r it's over,'' Sche predicts. "Don't cou it. If you do, you're big mistake."

Michigan State Continued from page 3

center Matt Foster.

ACCORDING PRESEASON depth charts, the Spartans' defense may want to break some records of their own with eight returning starters and the squad's top eight linebackers from a year ago. All-Big Ten linebacker Dan Bass (136 tackles) will be the main cog in a Michigan State defense that welcomes back middle guard Bernard Hay and safety Mark Anderson.

All-Big Ten punter Ray Stachowicz (43.1 average) will also be on hand along with Morten Anderson (52 of 54 extra point tries and seven field goals) to provide a potent kicking game. "We'll definitely have to rely

on our defense and the kicking game while our quarterback comes along," Rogers said. "We're confident in both those areas, although we do worry about the depth in our secondary and the lack of experience at defensive tackles.

Rogers is also confident his Spartans will make a strong bid at another conference crown while climbing up among the nation's top 20. But he remains very realistic thanks to "a horrendous" schedule. "We'd like to think that we

can win the conference this year and go to a bowl game, which a lot of these guys deserve after last year's showing." said Rogers, in reference to a three-year NCAA probation that kept Michigan State off television and out of postseason appearances. "But with the middle part of our schedule the way it is, you know it's not going to be easy.'

Playing such powerhouses as Notre Dame, Michigan, Purdue and Ohio State in a five-week period will indeed make duplicating last year's feat difficult. But fans in East Lansing aren't worried. They're too busy consuming tickets. After all, the circus is coming to town

Autumn retreat

The UI Rec Services will offer students a chance to "get away" from it all through various activities in the Touch-the-Earth The Daily Iowan/Bill Olmst

Program. Interested individuals should contact the Rec Office (Room III, Field House) or call 353-3494 for more details on the trips available.

From parachuting to kayaking: **Recreation Services offer it all**

By HEIDI MCNEIL Staff Writer

Imagine yourself rafting down the swift rapids of Wisconsin's Wolf River ... jumping from an airplane hoping that the parachute opens...backpacking through the colorful Yellow Forest in northern Iowa...tracking coyotes in southern Iowa. All of these things can be possible through the Touch-the-Earth Program offered by the UI Recreation Services this fall

The program will begin its second year after a successful launching in 1978, according to organizer Warren Slebos. The 1979 slate has included more trips as "most of the demand last year exceeded the supply," Slebos noted.

This year P.E. credit will be available for certain expeditions, Slebos said. Two weekend outings will equal one credit hour with participants encouraged to take the courses pass-fail.

THAT ELUSIVE VARMIT, the coyote, will be tracked and studied during a research expedition Sept. 14-15 sponsored by the Iowa Conservation Commission. Individuals enrolling for this trip will hike through the wilds of south central Iowa hunting the animals and their lairs besides studying various trapping methods and covote habits. Registration for this trip begins Sept. 5 in the Recreation Office (Room 111, Field House).

For those wishing to go a step further from canoeing on the quiet Iowa River, white water rafting and advanced kayaking trips will be offered Sept. 14-16 on grade four rapids on the Wolf River in Wisconsin. The rafting expedition requires no previous experience just a "desire for adventure," according to

Slebos, while the kayak participants must have taken last year's beginning course or possess passable skills. Sign-up for this trip begins Sept. 6.

Fishing enthusiasts will also have their chance with the newly-added "fishing in Iowa" program. A three-week clinic hosted by the Fin and Feather Sports Center will teach techniques of catching large mouth and small mouth bass. Classes will meet once a week beginning Sept. 12 with a weekend excursion planned for the end of September. A similar walleye clinictrip is slated for October. Registration for the bass trip starts Sept. 7.

The parachuting program "should not let you down," according to Slebos. Members of the UI Parachute Club will work with participants during the week of Sept. 17-21 in evening sessions then engage in a day of actual jumping. Sept. 7 is the first day individuals may enroll in this course.

THOSE WISHING TO learn kayaking skills may register for a two-week clinic prior to an Oct. 5-7 trip to the Wolf River. Sign-up for this program is scheduled to start Sept. 14.

A "hole different world" will open up for those taking part on a Sept. 30 spelunking trip to caves in northeast Iowa, Slebos said. Sept. 18 is the date the Rec Office will begin registration.

If you can't get enough of biking around the Iowa City area, a leisurely bike tour has been planned for Oct. 6-7 through scenic parts of Wisconsin. Bikers can begin enrolling Sept. 20.

Warming up for the home football games Texas-style will feature "chuck wagon horseback rides" at the Pleasant View Stable near North Liberty. Individuals will enjoy an early morning ride then conclude with a hearty ranch breakfast. Rides have been slated to precede the Nebraska, Iowa State and Minnesota clashes. Sign-up for the activities will begin 10 days before the scheduled games.

Participants on the Oct. 9-10 "Coho Killer" expedition along Lake Michiganin Wisconsin will search for the mighty 30pound King Salmon. "Foul hooking techniques will be used to try and land these large beauties," Slebos said.

A REAL "HONKER" of an adventure can be found in the Canadian Goose Research program set for Oct. 11-12. This trip will be held in cooperation with the Wisconsin Department of National **Resources and National Wildlife Division** as seen on "Wild Kingdom" and will feature methods of trapping and tagging the birds.

Individuals on the backpacking trip through the Yellow Forest of northern Iowa will have an opportunity to get closer to nature with a colorful view of Autumn at its best. The jaunt has been set for Oct. 13-14.

A coon hunting clinic will begin Nov. 1. Following the learning clinics, hunting sessions will be scheduled with a "coon feast" at the program's conclusion.

A rock climbing trip in October is still in the planning stages, according to Slebos. Slebos emphasized that there is a limitation on the number that may enroll in each program. Trips may fill up quickly according to their popularity, he added. Costs will vary for each program and will usually include transportation, food and lodging expenses. Interested in-

dividuals should contact the Rec Office or call 353-3494

Rugby enthusiasts mix good times with tough action

By HEIDI MCNEIL Staff Writer

Take one oversized football, throw in some fast moving plays, add 15 energetic men and you should have all the ingredients to make a rugby team.

In its 14th year, the UI Rugby Club boasts one of the finest squads in Iowa, according to Peter Snell, one of the club's organizers. The club has won a Big Ten championship in the spring of 1977 and runner-up trophies in '78 and '79. The squad also was the 1976-78 er Wed Ellis.

Midwest Collegiate champ and

All-Iowa runner-up in '77. still growing stronger with 45-50 active members on last year's roster and even more expected this season. "We guarantee that every active member will get to play in every game.

finances for the team's equipment. The players have to pay the rest of the expenses, which includes officiating, travel plus post-game parties. Union.

A motley crew is found within the team's nucleas. "We have medical students to undergrads to Ph.Ds," Snell said.

Although the majority of the club consists of native Americans, there are many foreign students involved. Rugby was born during a bit

of foul play in the late 1800s, involving Englishman William

"Ellis, while playing a soccer physical aspects of rugby, the game at the school in Rugby, sport isn't that dangerous. Snell believes that the club is England, decided to pick up the 'We teach the players ways ball and run instead of kick it," to tackle and run without caus-Snell explained. sive lineman Bob Winkle and offensive lineman Stan Waldemore. - Pittsburgh waived running back Jack Deloplaine, safety Ray Oldham, defensive end Dwaine Board, linebacker Tom Graves and wide receiver Larry

Green returned a punt 80 yards for a TD in his second game with the Redskins last year, then went 99 yards for a TD on a kickoff return the following week. He finished his rookie season second in the NFC in punt returns (10.5 average), and third in the conference in

month.

'Tony has not shown any of the flash and zip that he showed last year." said Washington Coach Jack Pardee Monday in announcing the cut of the 22year old, second-year pro from Florida. The Giants have also not shown any flash or zip in the preseason. New York, 1-3, didn't score a touchdown over the final 12 quarters of preseason, and is in desperate need of a player with Green's game-breaking abilities. New York Tuesday also acquired running back Todd Christenaon, released by Dallas, and offensive tackler Gus Coppens, waived by Los Hackett selected as athletic assistant Women's Athletic Director Christine Grant has announced the hiring of Linda Hackett as acting assistant athletic direc-Hackett, a former administrative intern under Grant and a Ph.D candidate. will serve in an interim capacity until a nation-wide search for the position is conducted sometime next year. Hackett is the first administrative assistant to Grant since the women's athletic director position was created in 1974. Grant will begin her duties as president of the Association for Intercollegiate Athletics for Women in January of 1980. Grant's activities in the national AIAW offices in Washington, D.C. create the necessity of administrative aid, according to officials in Halsey Gymnasium. In addition, women's athletics at Iowa has grown to the extent that more help is needed, officials said. "I have long recognized the need for additional support personnel in women's athletics,' Grant said. "This new position will significantly assist in the smooth running of our opera-

Ingvald Glesne and Lady

Candidate Doumakes: Fire Berlin

This is one in a series of profiles of candidates for four City Council seats open in the upcoming city election; the primary is set for Oct. 16 and the general election for Nov. discrimination and said the city was wrong to deny Eaton's request to nurse her son at the fire station. "It should not have been handled by a professional (the city manager) who is supposedly apolitical but in

Not an and the second

Lady comes home

By HEIDI MCNEIL Staff Writer

Ingvald Glesne found his Lady. A small black dog, Lady disapeared for 10 days last July before turning up in a small Missouri town.

This lost dog story was not of the ordinary variety. Lady had been the constant companion of Glesne for the past 15 years as he lived a transient way of life, traveling about the United States.

Glesne interrupted his ramblings to seek medical treatment for an eye problem at the Veterans Administration Hospital in early July. Various hospitals in the South failed to cure Glesne's problem, he said, so his brother in Fort Dodge, Iowa, recommended the Iowa City facility.

Each day during the 2½ weeks Glesne received treatment Lady faithfully waited. Glesne refused to leash his friend.

"Lady worked harder to keep track of me than I did of her," Glesne noted. "I never had a dog like that before."

Glesne, who considers an Ardmore, Okla. hotel his home, stumbled upon his traveling partner along a busy street 15 years ago. Glesne has spent his life as a traveling salesman. Different articles the 76 - year-old man says he has traded include a ton of macaroni, a truck load of

women's shoes and sleds.

SHORTLY BEFORE LADY'S disappearance, Glesne's truck was knocked off the road by another vehicle and the trailer he hauled his wares in was totaled. The old man was forced to carry all the goods in the back of his campertruck which also served as his hotel room at night, while he patiently awaited Lady's return.

And the traveling salesman was determined to wait, no matter how long it took. The VA Hospital gave Glesne permission to park his truck in the same spot as he kept his vigil.

Glesne was at a loss in the beginning when Lady was first discovered missing. But a local man came to Glesne's aid. Barry Morrow of 4 Woolf Avenue Court suggested handing out mimeograph notes describing Glesne's plight to all hospital patients and visitors.

"Barry brought me down out of the clouds of thinking," Glesne said. "He had the common sense to organize the search logically."

Only one lead surfaced in the beginning. Someone saw a young man take Lady into the hospital; another saw the man turn down a corridor leading to the back entrance. July 26 an article appeared in The Daily Iowan telling of Glesne's problem. That same day the DI received various phone calls reporting "Lady lookalikes."

THE MEDIA EXPOSURE was the "match that set the ball of fire rolling," according to Glesne.

A cashier at the VA Hospital recalled seeing a young man in the back parking lot chasing a small dog the day Lady disappeared

"The article in **The Daily Iowan** started me thinking, about that guy and dog," said Dale Kingery, agent cashier at the VA. "At the time, I assumed that this fellow was the owner but after reading the article I realized that he wasn't.

"That day the guy and his brother had been in my office to get travel money," Kingery continued. "I remembered him from previous visits and was able to put a name to the guy."

July 27 Glesne was contacted by the hospital in the late afternoon and considered the cashier's story to be the "hottest lead so far."

The man that had supposedly dognapped Lady was from Alexandria, Mo., a small town across the border from Keokuk, Ia. The sheriff of the town was contacted on the matter and recalled

Local news

that this young man had recently acquired a new dog fitting Lady's description.

GLESNE IMMEDIATELY jumped into his truck and drove straight through to Alexandria, arriving at 2 a.m.

"The sheriff's deputy went and got Lady with no hassle from the young man," Glesne said. The first thing Lady did, he said, "was run up to my truck and sniff it. Then she recognized me and ran up to me. The sheriff said that he was sure now that "This gentleman was the true owner.""

Glesne was just happy to be reunited with his pal and harbored no ill will toward the dognapper. "I wish no revenge and don't want to file any charges," Glesne said.

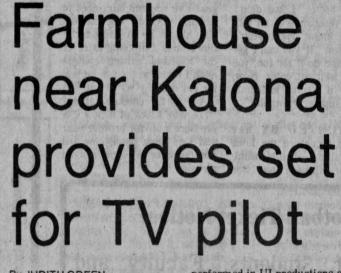

Glesne and Lady returned to Iowa City July 30. "I just had to come back and thank everybody who helped me find Lady," Glesne said. "I don't ever want to forget any of the kindness shown to me while I was in Iowa City."

As for Glesne's present whereabouts, it's anyone's guess. Another eye appointment has been made in Iowa City in eight months.

Unitl that time, Glesne will continue his transient ways. But he is not alone he has his Lady once again.

an winer

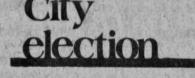

By ROD BOSHART

The People's Alliance candidate for an at-large position on the Iowa City Council says he would settle with firefighter Linda Eaton on her terms if elected this fall.

Don Doumakes, who is seeking one of the at-large seats held by John Balmer and Carol deProsse, said he would also fire City Manager Neal Berlin and the city's Civil Rights Specialist Sophie Zukrowski for formulating what he called unjust policies in the Eaton case. Doumakes, 24, said that the current

council ignored its power to control

Don Doumakes

fact is making a political decision outside the political arena and outside accountability for that,'' Doumakes said.

DOUMAKES ALSO WANTS an ordinance to prohibit transporting nuclear wastes through Iowa City via Interstate 80; decriminalization of

See Doumakes, page 4

New York this week to work out financial arrangements for shooting other episodes – 26 planned in all – of Mini Mystery Theater, an anthology of American folklore concerned with the mysterious and

macabre. Troyer's three-year-old comany, which she describes as a non-profit organization to provide channels for artists and public information people to do media work," produced "Scarecrow" for Gus Nathan, formerly a communications teacher at New York's New School for Social Research. Nathan and MetaMedia hope to use this pilot episode to break into "the many, many new possibilities opening up for video syndication videocassettes, pay television, cable," says Troyer. 'Scarecrow'' was filmed, she explains, partially as an experiment to test MetaMedia's speed in filming and editing an episode.

DON NIGRO, a graduate of the Iowa Playwrights Workshop, wrote the script for 'Scarecrow," which concerns a mother and daughter living in an isolated farmhouse. The daughter's youthful resentment of her confinement leads her to run away into the woods, where she meets a soft-voiced young man who persuades her to murder her mother and run away with him. A faceless yet decidedly malevolent scarecrow broods over the grim tale, which is set, ironically, in an idyllic sylvan setting that heightens the lover's faunlike persona.

Carmel Quinn, an Irish singer and actress who was a regular on the old Arthur Godfrey show, plays the mother. The daughter is Judith Zeiler, who received her M.F.A. in acting from the UI this spring; she has who has been active in the Iowa City Community Theater, plays the lover.

THE FARMHOUSE itself is almost another character in the drama. Its white clapboard siding and vine-smothered porch, its yard-pump and weathervane, its tinny upright

The farmhouse itself is almost another character in the drama. Its white clapboard siding and vinesmothered porch, its yardpump and weathervane, its tinny upright piano covered with yellowing sheet-music, the dust and clutter of its fusty interior, even the floral pattern of its wallpaper and slipcovers give the slight story depth.

piano covered with yellowing sheet-music, the dust and clutter of its fusty interior, even the floral pattern of its wallpaper and slipcovers give the slight story depth, melancholy and a sense of the past. The women, in fact, wear Depression-era housedresses, discovered in an upstairs closet, that belonged to Stutsman's mother.

Troyer shot the episode with MetaMedia equipment and personnel, including cameraman Michael Mikus, a UI film student, and technical crew Wes Llewellyn, Wes MaComber, and Rich Rosensweig. She received technical assistance from Cordell Jeppsen of the UI

UI to offer classes in the dormitories

By BETSY DAVIS Staff Writer

UI Residence Services is expanding its usual function of housing and feeding students to begin teaching them as well.

Twelve courses to be held in UI dormitories are offered this fall as part of a new program designed to make the dorms a part of the academic environment.

Last year a committee chaired by May Brodbeck, UI vice president for academic affairs, investigated ways to use the dormitories for educational opportunities. Both faculty and students had expressed interest in having classes in the dorms, according to 'arol Epling, coordinator for student development

Mitchel Livingston, director of esidence services, said, "Faculty nembers wanted to develop a better rapport with students and provide cademic support within the dorms. students wanted classes in the dorms so there wouldn't be a dichotomy between where they live and where they

APPROXIMATELY \$300,000 will be used to develop the educational aspects of on-campus living, Livingston said. Two new staff members have been hired - to coordinate classes and faculty and to organize educational, recreational and social programs - and a learning resource center is being built in Burge Hall. Last spring three core literature courses were offered in the dorms on an experimental basis. Livingston said the response was overwhelming. Instructors were pleased, and the students liked having classes in their living area, he said

This fall, sections of rhetoric, core literature, math, Problems in Human History and relaxation techniques are being offered to any student interested. Students do not have to be residents of a dorm to take a course there.

Epling said this will enable students who may be interested in moving into a dorm to decide if they might like dorm life.

UI ADMINISTRATORS, she said, wanted to use existing space for the classrooms. "But we won't take away space used by students for other purposes," she said. "The only negative response we got last spring was from students in Currier because the only student lounge in the dorm was used for a classroom.

The classes will be conducted in a private dining room and a conference room in Burge Hall, and in a room in Currier Hall.

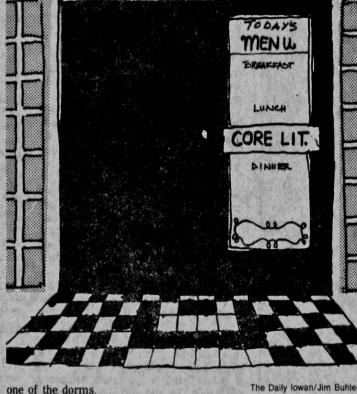

"Classes in the dorm were tried several years ago, but the plan failed because it was too casual. Students were coming to class in pajamas and curlers. We still like the idea of classes in the dorms, but it has to be more traditional," Epling said Another reason for the past failure

was that there was "no rationale" for the courses offered - they simply offered whatever professors were willing to teach there, according to Gertrud Champe, one of Residence Services' two new staff members. Champe is coordinator of academic affairs for residence halls.

"But now the courses are designed to help integrate incoming students,' she said. "We're going to get the faculty into residence halls for less formal circumstances, but still serious work.'

THE BURGE HALL carrel room, which is being converted into a learning resource center to house computer terminals, audio-visual equipment, and a library substation, will not be completed until later this year. The converted room, to be called "The Study," will also offer an extensive tutoring program. Teaching assistants will offer small-group tutoring in rhetoric, math, physics and foreign languages. A branch of New Dimensions in Learning, a federally-funded tutoring service for underprivileged students, will also be housed there.

Champe is also planning other noncredit educational activities. A series of eight faculty member lectures on science and the humanities will be offered. Each lecture will be followed by dinner in a private dining room in

Cafeteria

In conjunction with a plan to give special discounts to dorm residents that attend Hancher concerts in groups, music professors will give lectures before the concerts. Champe said this will make the events more accessible to students.

"The university now believes that everything has to be put together to produce a real education," Champe said. "We're trying to increase the academic flavor of the living environment.

Schreiber lacked the lubbies

microphone with grim deter-

By WINSTON BARCLAY Features Editor

Early morning at the Iowa State Fair is a relaxed time. The midway, with its seedy barkers and blaring music, is dormant. The exhibition halls, stock buildings and sidewalks, which will later be packed with bustling, jostling throngs, bear only a relative sprinkling of people. Most of the myriad of food stands, which sell everything from footlong hotdogs to multi-colored bomb pops, are still locked and vacant. But one particular morning at this year's fair was anything but relaxed for Kathy Schreiber, a resident of Lone Tree and an employee of the Lipid Research Clinic at the had a boil on her foot. So we University of Iowa Hospitals took care of this chicken's foot and Clinics.

The Clearing, an aid to the spiritual community

By WINSTON BARCLAY Features Editor

The gray frame house at 525 Oakland Ave. looks like any other home in that pleasant old neighborhood just south of Burlington St. But it's no ordinary house. Inside, it is the Clearing, an enterprise dedicated to holistic health and New Age consciousness. The Clearing was created in April 1977 and is still operated by two of its founders, Carol Bridges and Dan Cheeseman.

Dan said there are two aspects to the Clearing. "One is a school of the healing arts, and the main focus of that is to bring major spokespeople in the areas of holistic health and New Age consciousness into this area. The other aspect is a spiritual community. Mainly, that focuses on helping individuals attune to their inner essences, integrating all aspects of their beings - mental, emotional, spiritual, physical - and then to manifest that energy outward. For that aspect, we offer classes and individual appointments and offer memberships. The other aspect of that is probably the Friday community dinners.'

Dan said the Clearing now has about 20 members, who receive discounts on workshops, classes and individual appointments. The dinners, which consist of natural foods and wide-ranging conversation, attract a dozen or more participants each week.

WHILE THE CLEARING offers a variety of specific services, all its activities are based on a central philosophy. "Basically, we feel that all things are connected, that nothing happens by accident and that people create their own realities. And we believe that there is a life force in the universe," explained Carol

They believe that everyone has the

receptors in which all information is there. All we have to do is tune our receivers to pick it up."

receivers to pick it up." They hold that this philosophy is at the heart of all religions and that the attempt to tune in is represented by the traditions of every religion that are called "mystical," which, according to Dan, "says nothing more than that the spirit is at the center of all manifestations. The process that human beings use to create their own reality is no different than the process that all creation uses. It's a pattern that we're all part of, and as we get in touch with the mechanism, we learn how we shape our lives and our reality and learn how everything flows."

ALL THE SERVICES of the Clearing are aimed at that learning. "We see our role as helping people make transitions from ways that aren't working to ways that are working. And the ways that work are those where human beings are attuned, not only with themselves and other people, but with all nature forces."

Dan and Carol contribute their own specialties to this process. Dan offers individual counseling in holistic health, polarity therapy, reflexology, natural diet and gestalt therapy. His approach in each instance is based on the needs of the specific individual he is counseling. "I pretty much focus on whatever need the person has — mental, physical, emotional — and then see what method is the best way to change that situation," he said.

He explained that many people come with a specific need and already know what they want, while the needs of others must be discovered. "Maybe the best way to describe it is just an intuitive feel," he said. "Sometimes you get someone who comes for one thing, but it isn't what they need."

the life reading, Carol and her subject discuss how to put the new information to work.

Carol said that her psychic abilities developed slowly, beginning with experiments with self-hypnosis to quit smoking. Her interest was quickened by a visionary experience that occurred on a day after she had been dancing. "Suddenly I became aware that I was seeing a second reality in addition to this one. The other reality was a scene from ancient Egypt. For about 15 minutes, I just stood there watching this Egyptian scene unfold in front of me," she said.

LATER, WHILE INVOLVED in gestalt therapy sessions, she found that she could see what other people were seeing and could anticipate what they were going to say. Eventually, she became aware of the presence of another being, a spirit guide, that wished to speak through her, and she began doing readings.

Unlike many psychics, Carol does not lose consciousness during readings. Instead, she explained, she consciously judges the information that comes through her to filter out any material she feels might be coming from her own mind.

In addition to psychic readings, Carol conducts a women's spirit class, which aims at helping women express their spirituality. "We attune to one person's needs each week, and the whole group meditates and psychically attunes to her, to see how she can meet that need," Carol said.

According to Carol, the results of these sessions are sometimes striking: "One woman in the group needed to go to a folk festival and she needed some money. She had temporarily lost her job, so she was disappointed that she wasn't going to get to go. Everyone

wishing I could get in touch with you. I have a check for you for \$210' — which is exactly what she needed."

IN ADDITION TO its regular classes, the Clearing is offering a busy schedule of workshops this fall, including appearances by Dorothy MacLean, co-founder of the Findhorn community in Scotland; Will Schutz, founder of the Human Potential movement and former staff member of the Esalen Institute; and Dhyani Thorner, a Cherokee Indian medicine woman.

Carol related an incredible experience she had with Alberto Villoldo. who will give a workshop in November. At a session she attended, Villoldo conducted a South American fire ritual in which participants offered into a raging fire symbolic representations of problems they wished to release. 'Alberto informed us that, if we were sincere, the fire would become our friend for about a half an hour - which meant that we could put our hands in the fire and not be burned," she reported. Subsequently, Carol said, she and all the other participants placed their offerings directly in the fire, a fire that she claims was so intense that before the ceremony she could come no closer to it than four or five feet.

As with its other services, the workshops are available for a set fee. Dan and Carol said they were reluctant at first to charge for their services, but had to find ways to cover their expenses. "Even though most people have the idea that religious things shouldn't have a charge, all religious organizations have a tremendous money flow through them," Dan noted. "They don't take the form of charging: it's all donations. But if you look at the methods churches use these days, it's pretty high pressure."

Dracula offers stylistic strength, credible acting

Director John Badham has created a film in which style dominates, often (and deliberately) at the expense of substance. Cinematographer **Gilbert Taylor has** shot most of it in dark colors and velvety textures that exploit the seductiveness of night, its mystery and incipient terror. The film's only jarring moments occur in two attempts to heighten and prolong the climactic moments (Dracula and Lucy's love scene and his final disintegration in the sunlight) with gaudy psy-

By JUDITH GREEN Staff Writer

The latest film version of Dracula emphasizes — as have few of its predecessors — the exquisite symbiotic relationship of plot and period in Bram Stoker's classic novel of vampirism in the Mauve Decade.

Dracula is a story peculiarly suited to the Edwardian era; hence the unhappy results of Hollywood's many attempts to update its character or change its locale. Its stress on physical and emotional darkness, its psychosexual insights and its disturbingly ambivalent view of religion — in which the potency of symbols and superstition outweigh considerations of faith — all testify to a civilization's foredoomed attempt to shore up Victorian values even as they crumbled with the approach of the new century.

IT WAS a dark, soft period of draped and pleated fabrics, massive wood furniture, paneled and curtained walls. All the lines and edges of things blurred in the thick luminescence of gaslight; women's hair, piled in heavy knots, gleamed dully; the air was stuffy and tangible. People lit their bedrooms with candles — tiny ineffectual lights unable to dispel the deeper shadows in the corners.

Recognizing this, Director John Badham has created a film in which style dominates, often (and deliberately) at the expense of substance. Cinematographer Gilbert Taylor has shot most of it in dark colors and velvety textures that exploit the seductiveness of night, its mystery and incipient terror. The few daylight shots, of the wild, beautiful Cornish coast, are similarly muted, in sedgy greens and greys. The film's only jarring moments occur in two attempts to heighten and prolong the climactic moments (Dracula and Lucy's love scene and his final disintegration in the sunlight) with gaudy psychedelic graphics.

SEVERAL SUB-THEMES, expressed primarily and intelligently in visual terms, almost succeed in masking the many plot problems. Badham shows great directorial restraint in handling one of these, a series of deliberate obverse relationships that give the film a carefully maintained balance. Rather than present such oppositions baldly, back to back, he strews them with deceptive casualness throughout the film; their resolutions are therefore subtle as well as satisfying.

One such relationship frames the film: The opening sequence, a ship drowning in a violent nocturnal storm, becomes, at the end, a ship disappearing in the bright haze of the noon sun. Clever technical work saves the reversal from conventionality: In the first scene, the camera thrusts us directly into the turbulence with short, choppy, rapidly shifting images; the ending's long objective shots detach us from the story and let us go.

IN ANOTHER EXAMPLE, the monotonous light voice of the priest intones, "I am the Resurrection and the Life" over Mina van Helsing's body; its later complement is Dracula's black and bloody vision of

its headlamps glaring painfully into our eyes, overtakes the carriage, the squat steam tug catches the graceful sailing ship — modern technology ugly and efficient even at its birth. It is entirely fitting that Dracula (Frank Langella) is challenged and bested by the frail, determined van Helsing (Laurence Olivier). The opposed faces of dying romanticism, they intuitively understand each other.

THE YOUNGER GENERATION of antagonists, Lucy Seward (Kate Nelligan) and Jonathan Harker (Trevor Eve), exhibits, by contrast, a chilly rationalism even in its softer moments. Lucy, though seduced quite languorously by Dracula, becomes a hygienically pretty rather than a corruptly beautiful vampire; she does not inherit, along with the infusion of his blood, his devastating sexuality that tempts as it terrifies.

Composer John Williams (Star Wars, Close Encounters), today's "in" man for soundtracks, has conjured up another of his monothematic scores that perfectly captures the film's spirit, unencumbered by musical originality. The opening interval of its basic melodic fragment, derived from a dog's mournful howl (one of the film's Leitmotivs), and its falling cadence embody both the voluptuous blood-lust and the elite decadence of the title character.

NONE OF THE multifarious holes in the plot gape wide enough to tear the weave, but their cumulative effect is annoying. Why does the consumptive Mina (Jan Francis) rush out into a storm in her nightgown? Why does Dracula laboriously climb walls when he can become a bat at will? Why does his black horse bear him calmly yet rear in terror at another vampire's grave? How did Harker become a rising young lawyer when he can't even speak the King's English?

Badham spends so much energy on stylistic considerations (profitably, we grant) that the details of the story have been left to fend for themselves, not always successfully. Such flaws are doubly irritating when it is obvious that certain incredibly tiny points have been thoroughly researched (Dracula's name, for instance, receives its correct Rumanian pronunciation for the first time in cinema history).

A CREDIBLE, often outstanding cast adds to the film's stylistic strength. Nelligan and Francis, for example, with the kind of bones and coloring that translates well into sepia prints, suit the time period and do not look like 20th century girls in Victorian costumes. Their transformation into vampires arouses our pity as well as our revulsion.

Olivier, with his all-purpose European accent and high forehead, gives the scientist humanity and dignity, even when he is forced to take measures such as cutting out his dead daughter's heart and to reel off encyclopedias of folk wisdom concerning vampires.

Langella, foregoing (thankfully) the ghoulish B-movie stereotype of the Late Show, invests his role with the elegance, sophisticated sensuality and vulnerability of his Broadway creation (though the play, with Edward Correy's surrealistic attdeep sets

Holloway receives suspended sentence

Vic Holloway, the former UI football player whose late February trial stirred a controversy over media coverage of alleged rape cases, was given suspended sentences on terrorism and criminal trespass charges last week.

On Friday, District Court Judge Louis W. Schultz placed Holloway on four years' probation after sentencing him to five years' imprisonment on the terrorism charge and 45 days on two criminal trespass charges, and then suspending the sentences.

Holloway was arrested by Campus Security and charged with third-degree sexual abuse in connection with an Oct. 10, 1978, incident involving an 18year-old UI student in her Quadrangle Residence Hall room.

Holloway's trial resulted in a hung jury and mistrial March 2. After a retrial was set for April 23, Holloway won a change of venue to Lynn County because of extensive media coverage of his previous trial.

With the retrial due to begin May 21, Holloway pleaded guilty to the lesser charges on May 15, in a plea-bargain.

his revivification. Again, intervening scenes and a detached vs. an involved camera save the comparison from being direct and obvious.

The film is underscored, as well, with the tension that results from one era's unwilling surrender to its successor: The automobile, has been scrapped). He is a Dracula to whom any woman, even if fully aware of his deadly nature, would still willingly surrender. "I need your blood" — four husky words, the only dialogue in the love scene, somehow reach, in their urgent simplicity, the heights of eroticism.

Doumakes

posession of marijuana in small amounts in the city; the city building code changed to incorporate energy-saving technology into newlybuilt structures; and the establishment of cooperative housing on a massive scale in Iowa City.

He said co-op housing could undercut local private-sector rents by 30 percent. He favors scrapping the downtown hotel project and studying the feasibility of not building the second parking ramp. Rather, he wants to construct coop housing in the downtown block slated for those two projects.

"It's clear we don't need anymore temporary housing in this town," Doumakes said. "The only people who do need a hotel are the people who invest in hotels."

DOUMAKES SAID the city should closely examine its energy franchise with Iowa-Illinois Gas and Electric Co. which expires in 1984, especially the utility's rate structure and policies concerning nuclear energy.

When asked what alternatives to Iowa-Illinois are available if the utility refused to service Iowa City due to changes in the franchise, Doumakes said, "I think it's unlikely they'd pull a stunt like that, but it's a possibility I hadn't

considered and the only thing I can say is we'd have to buy our electricity somewhere else." He favors the city's efforts to move Freeway 518 further west and eliminate an interchange at Melrose Avenue. He also favors selling the Iowa City Municipal Airport to a private owner, with restrictions on airport expansion, jet flights and allowable noise levels.

Continued from page 1

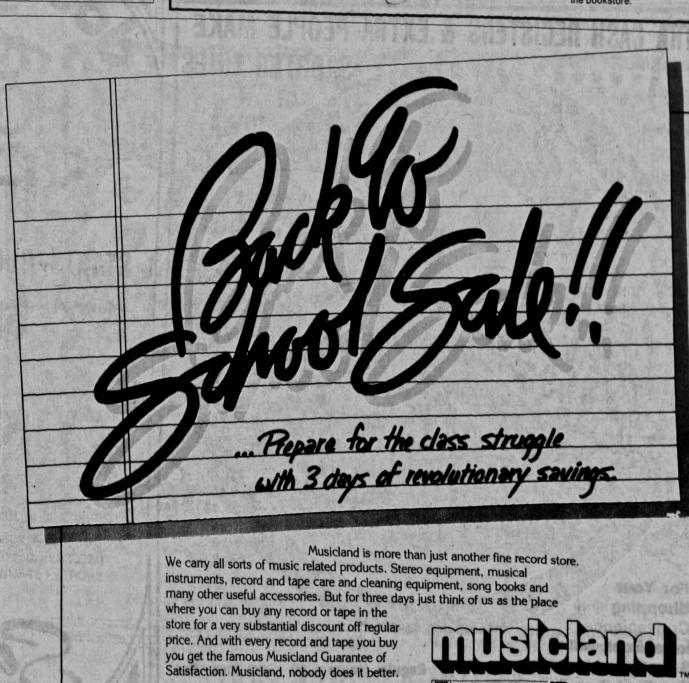

Doumakes said he and Linda Nelson Manuel, the People's Alliance candidate for the District C council seat, expect to draw most of their support from Iowa City feminists, environmentalists and workers, but not exclusively from those groups.

"ONE OF THE THINGS we wanted to do was to come out early and create a debate on the issues that we think are important," he said. The People's Alliance platform addresses more than 35 issues facing the council.

"It's worth the risk of alienating some people to let them know about as many issues as is possible," Doumakes said. "It's just truth in advertising. They deserve to know what we intend to do."

Doumakes, a 6-year Iowa City resident, is a UI teaching assistant in Zoology. He is a former member of the UI Student Senate and the former publisher of the short-lived Iowa City Life and Times.

TV pilot

Video Center; her assistant director was Stephen Spencer of Spencer Sound Systems, Inc., an Iowa City supplier of specialized sound equipment. Local people and aid enabled MetaMedia to keep production costs within a tight \$100,000 budget (Troyer explained that a typical episode of The Incredible Hulk, for example, costs around \$640,000).

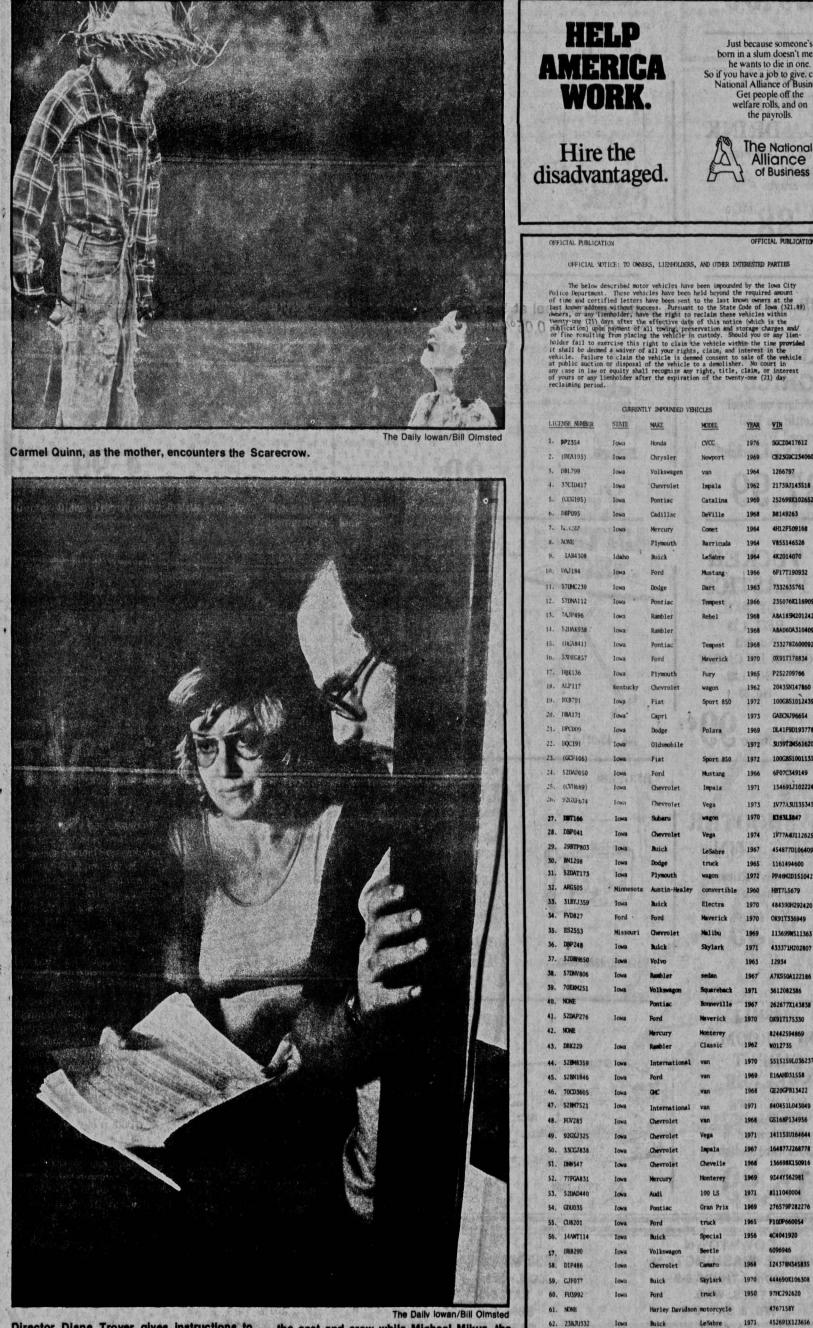

"Scarecrow" is a half-hour episode, which actually means 24 minutes of film-time. It took approximately a week to edit it, says Troyer, with each minute of processed film condensed from five minutes of rough footage.

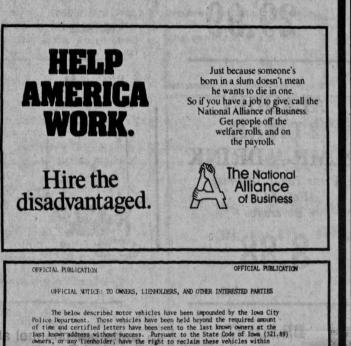

TROYER STUDIED playwriting and fiction in the UI Writers Workshop under Howard Stein and Vance Bourjaily (1963-65) and media at Iowa State. Her previous work includes the feature film Nine O'Clock in the Afternoon, which has been shown on German television, at the Whitney Museum and at the 1974 Refocus Festival. MetaMedia has most recently produced Cornucopia, a show written and performed by teen-agers that has been shown on public television, and A Day in the Life of a Quadriplegic, an hourlong video documentary that will be used as evidence in a lawsuit brought by its protagonist.

The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979-Section 3, page 7

Image: Winston Barclay Features Editor Symphonic Choir as a choral ensemble for "music students and students across the chorus, open to all students

Are you one of those people who can't take a shower without belting out the "Toreador Song"? Do you hum "La Donna e Mobile" on the way to work? Are you intrigued by "All We Like Sheep"? If there may be a place for you in one of the UI's choirs.

Many musically inclined students do not realize that the UI choirs are open to all students, according to Fred Stoltzfus, a music T.A. who assists with the choirs and manages the choral library. Although music majors comprise a majority in each choir, any student may audition for a sition. "There's nothing exclusive about t," said Stoltzfus.

The UI choirs offer something for every taste. Dr. Don Moses conducts three choirs, each with a different size, repertoire and level of difficulty:

STOLTZFUS DESCRIBED the the

UI with experience in choral organizations and who wish to sing repertoire for large groups and orchesta." This choir is composed of 125-150 intermediate to advanced singers and this year will present two concerts each semester with the UI Symphony Orchestra. Among the works scheduled for performance this year are Berlioz' The Damnation of Faust and Mozart's Regiuem. The Symphonic Choir rehearses twice weekly - on Tuesday and Thursday evenings.

The Kantorei is a more demanding ensemble. This group of 30-40 singers rehearses five times a week and is designed for "singers of considerable experience and ability," according to Stoltzfus. The Kantorei's schedule and repertoire demands that its singers possess a good sight reading ability in addition to purely vocal skills. One of the Kantorei's performances this fall, featuring Gian Carlo Menotti's The Unicorn, the

Gorgon and the Manticore, a madrigal for chorus, dancers and instrumental ensem ble, will be broadcast on IPBN.

THE UNIVERSITY CHOIR is the busiest choral group, giving a concert every six weeks. According to Stoltzfus, this choir was designed primarily as a training group for undergraduate students with less musical training. Its 30-40 singers rehearse 2:30-3:30 p.m. daily and their efforts cover a great variety of musical styles.

The Camerata Singers is supervised by Dr. Richard Bloesch. This ensemble of 30-40 singers meets weekly and presents one concert each semester. The Camerata Singers focuses primarily on chamber music but also performs some student compositions.

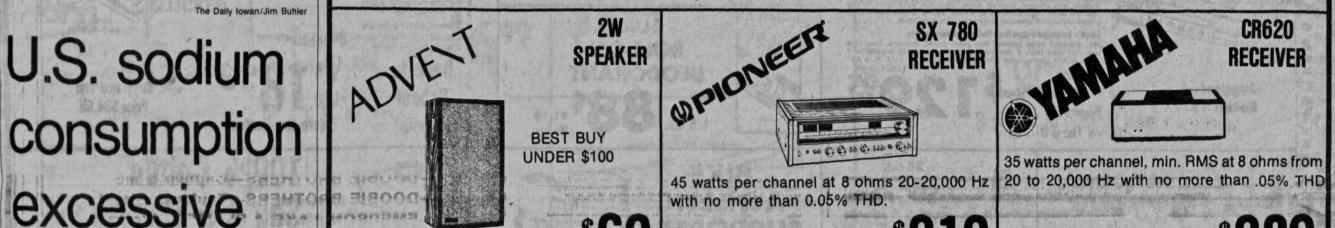

Auditions for all the choirs will be held through Aug. 31 in Dr. Moses' office, room 1033 at the School of Music. A sign up sheet for audition times is posted on the bulletin board outside the office.

By KAY BLACHINSKY Staff Writer

Americans consume 20 times the amount of sodium that their bodies need, according to Consumer Reports magazine.

But the saltshaker on the kitchen table is not the only culprit.

"Salt is added to just about every type of convenience processed food," said Sydne Carlson, a nutritionist in the UI Hospitals Internal Medicine outpatient clinic.

Today about 55 percent of the food Americans buy is processed, and half their meals are eaten outside the nome, the magazine article states. As a result, Americans are often left in the dark about the amount of salt present in the foods they eat.

The Center for Science in the Public Interest, a con-sumer group, has petitioned the U.S. Food and Drug Administration to require that labeling on packaged food include sodium content.

MOST PEOPLE EXPECT to find heavy sodium content in salty foods, but its presence in other foods can be surprising. A one-ounce serving, or 1¼ cup, of cornflakes can contain twice as much sodium as an ounce, or two tablespoons, of roasted Peanuts.

Carlson said most people need about 400 milligrams of sodium per day. The average American intake, however, ranges from 4,000 to 9,000 milligrams per day, she said.

"Our country contains more sodium-containing foods than other countries do," said Mary Fran Sowers, pediatric cardiology research coordinator at UI Hospitals.

Sowers said sodium is the oldest and most highly regarded preservative, as well as a great flavor enhancer, which accounts for the high levels contained in processed foods. "One of the reasons for the high level of hyperten-sion in the United States is the high amount of sodium contained in processed foods," Sowers said.

THE UNITED STATES ranks second in the world in the incidence of heart disease. Sowers said an estimated 30 million people in the United States have disease of the heart and blood vessels, and of these, 27 million suffer from hypertension.

"I would estimate that 15 percent of the adult popula-tion is hypertensive," Carlson said. "Also about 50 per-cent of the people I've seen come in through the clinic watch their sodium intake.

People with hypertension are normally placed on a no added salt diet in which sodium intake is kept down to 200 or 300 milligrams of sodium per day, Carlson said.

'Because of the salt added to convenience-type foods, we encourage people on these diets to do a lot of their own cooking," Carlson said. "For example, chicken contains only 20 to 30 milligrams of sodium, and fruits and fresh vegetables are very low."

Sodium is also present in many non-prescriptive drugs such as laxatives, cough medicines, alkalizers and aspirin. Carlson said that people on no added salt diets are encouraged to rely on their physicians for approval of the medications they take.

Water softeners are another source of sodium. People with hypertension are urged to use hard water. Carlson said.

During the break Eaton issue unresolved

By ROD BOSHART Staff Writer

For seven days in late July and early August, Iowa Civil Rights Commission Hearing officer William Stansberry heard testimony from both sides on the allegation that Iowa City discriminated against firefighter Linda Eaton in denying her request to nurse her son at the fire station.

At issue is the employer's right to establish work rules versus the employee's right to the equal, nondiscriminatory application of those rules.

After the final briefs from the attorneys for both sides have been submitted by the Oct. 1 deadline, Stansberry will make a recommendation to the commission which will then make a tinal decision in November or December whether discrimination did occur. From July 30 to August 7, attorneys

for both sides dealt with four issues resulting from the complaints filed against the city by Iowa Attorney General Tom Miller and Eaton.

The complainants contend the fire department's rules regarding the use of unscheduled time while on duty and its visitation rules were not applied equally to male and female firefighters; that the no-nursing rule has a disparate impact on female firefighters; that the city retaliated against Eaton and harassed her after the complaint was filed; and that Eaton should receive back pay plus interest, compensatory damages and attorney fees from the city.

EATON BECAME THE focus of national attention in January when the

city denied her request to nurse at the fire station, and suspended, reprimanded and threatened to fire her for disobeying the city's order. A temporary injunction allowing Eaton to nurse her son at the fire station and prohibiting further disciplinary action against her and until the civil rights commission rules on the case was issued Jan. 30 by Johnson County District Court Judge Ansel Chapman.

In their closing statements, Clara Oleson, who represented Eaton with Jane Eikleberry, and Assistant City Attorney Angela Ryan agreed the disparate impact question is the most significant issue and could effect employment practices nationwide.

"I do not find it frivolous that management, who is paying for a person's time to be on call, cannot make decisions on what will interfere and what will not interfere. Management right is not an insignificant issue," Ryan said.

She said to apply the disparate impact theory in the manner Eaton's attorneys and Assistant Attorney General Victoria Herring are applying it will have extremely serious ramifications for every employer. She said the union contract clearly gives the city the right to make work rules. Oleson said, "Our evidence more than amply demonstrates that the city's rule was no breast-feeding on the job. We realize the city will articulate it through another language - no regularly scheduled visits and insubordination - but we believe the evidence more than amply demonstrates that these are post-facto fabrications.

"TO HAVE A RULE AGAINST

breast-feeding, only women are going to be affected, Oleson said. "If Linda Eaton is not allowed to breast-feed on the job site, she is forced to choose between work and motherhood."

Ryan argued that, in jobs such as being a flight attendant, trucker, petroleum engineer or traveling saleswoman - jobs where women must be away from their families for 24 hours or more - "clearly employers are interfering in the relationship of mother and child."

"The impact on an employer, if suddenly now that women have gotten the right to be gone for a day, a week, a month in some of these non-traditional jobs, if now an employer must accommodate and somehow re-unite the mother and child at the job site, this will have serious ramifications," Ryan said.

"The employer is at a great disadvantage in that situation. As we have stated, the employer is put in a position of being against motherhood," she said.

Oleson said the city's decision not to allow Eaton to nurse was made out of "a pompous bureaucratic desire to save face."

"The city gave absolutely no evidence that the decision was made on anything less than vague and unsubstantiated fears, stereotypes and preconceived notions of what a woman could do on the job site," Oleson said. She said women in traditionally male jobs are destroying those stereotypes.

"THIS CASE DEMONSTRATES that women are heads of households. They are in the male domain. They have invaded, they are conquering and their

jobs are important to them," she said.

Oleson called the Eaton case a 'purely American case'' because it deals with two values Americans hold dearly - motherhood and work. She said the city is asking Eaton to choose between her job and her child.

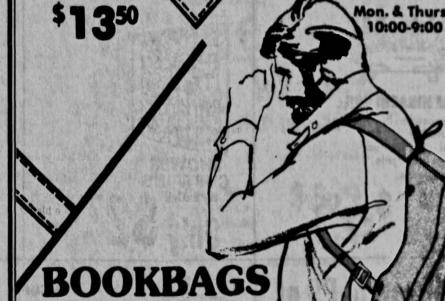

"In a real sense, Linda Eaton has won on the facts of this case," she said. "Every day that she breast-fed for the last six months at the fire house she has proven, in the realm of experience, that she can be with her child and be a firefighter.'

Ryan said city administrators made every effort to create a reasonable atmosphere in the fire department since Eaton was hired as a firefighter.

"I think the testimony amply shows that the city was concerned with Linda Eaton's treatment; that it actively inquired about her well-being and that she brought no complaint to their attention," Ryan said.

"I do not think there was any evidence of the hostility, insensitivity and deliberate cruelty to Ms. Eaton that we saw inflicted on the male firefighters during these hearings by opposing counsel," she said.

Ryan was referring to the extensive questioning of several male firefighters regarding derogatory remarks toward women and blacks made by some male firefighters, speculation in the fire station about who the father of Eaton's son is, some firefighters' sexual attractions toward Eaton and the overall atmosphere in the fire house since the controversy began.

Take yourselves as a case in point. You go to an establishment with two or three good triends of a different color than you are and you go to the door and you say I want to come in and he (the doorman) says 'Give me a dollar and show me some ID.' You take out the dollar and show him the ID and then he says 'That's not good enough.' You show him another ID and he says 'That's not good enough.' You show him another ID and he says 'That's not good enough."

Okay, now, at the same time, another person in your group says 'Well man, here's my dollar, let me go in.' And the doorman says Show me some identification,' and the friend says 'Okay, here's my driver's license,' and there's no picture on it. And the doorman says, Well fine, go ahead in '

Now I don't care who you are, or how calm you try to be. The first thing you want to know is why?

-Robert Martin, complainant against Woodfield's disco, at a public hearing before the lowa City Council to determine whether to suspend the bar's liquor license.

We have categorized his (the doorman's) actions that evening, and I think fairly, as

-J. Patrick White, attorney for Woodfield's owner Harry Ambrose.

In the harshest action taken against a bar in recent years, the Iowa City Council suspended the liquor license at Woodfield's disco for four months, ruling that the owner discriminated against blacks on June 23.

The license suspension - effective Aug. 1 came after the city Human Rights Commission ruled that Woodfield's owner Harry Ambrose knowingly and recklessly tolerated discrimination against blacks.'

Seven persons, including a 47-year-old man, filed race discrimination charges against Ambrose. They claim that blacks attempting to enter the bar that Saturday night were required to show three types of personal identification with es were asked for little or no

publicly apologized to citizens who believed they were discriminated against.

At a Human Rights Commission public hearing, one month after the incident, Ambrose said that he had instructed his doorman, Pat Conway, to do "whatever it takes" to keep minors from entering the disco.

Conway testified that he "might have gone overboard in the carding," but that more whites were turned away because of lack of ID than blacks.

But two former employees testified that Ambrose had discussed ways to discourage blacks from going to Woodfield's because he said they were hurting his business.

THE COMMISSION RULED that "The new carding policy was used to exclude blacks because of their race," and that "the carding policy in effect June 23 was the final and most obvious attempt to exclude blacks equal access to Woodfield's." As damages, the commission ordered Ambrose to pay each complainant \$400.

The case then moved to the City Council, which held a public hearing to consider suspension of the Woodfield's license.

After hearing testimony, the council voted 6-0 on July 31 to suspend the bar's liquor license for four months, although some council members said that they would have voted for a lengthier suspension

The council action came despite repeated warnings from Ambrose's attorney J. Patrick White, that any action taken would be illegal and could be overturned in court.

Throughout the city's investigation and subsequent hearings, White raised numerous procedural objections and on Aug. 21 filed suit in district court asking for an injunction to prohibit the license suspension.

AMONG HIS OBJECTIONS, White said that it was illegal for the council to take any action until they had received "certification" from the Human Rights Commission that a finding of discrimination had been made. The council began its action. White said, on June 26 when it set a date for the public hearing, and held the first part of the public hearing on July 24; the comdiscrimination ruling was not made

Dinner Special

More than 15 persons picketed the entrance to Woodfield's after a council meeting this summer. The picketers acknowleged that they could not stop anyone from entering the disco, but said they wanted to inform people of the controversy.

HINGTON

proof of age.

Ambrose summoned Iowa City Police to the disco that night when a group of approximately 50 persons gathered in front of the entrance, protesting that blacks were not being allowed in. The police took no action and there was no

AMBROSE MAINTAINS that he was not discriminating against blacks; he says the heavy carding policy was implemented to crack down on permitting minors into the bar.

Several Iowa City residents, most of whom were white, picketed Woodfield's during the following two weeks in protest of the alleged discrimination. Ambrose admitted that the pickets caused a significant decline in business.

On July 3, Ambrose - to avert court action against him - signed an agreement in Johnson County District Court that said the carding practices June 23 were "overzealous," and he

until July 26. Prior to the suspension, White told the council, "All your actions prior to tonight are in violation of your own ordinance. Should you

complete them to whatever action you choose, you will be acting illegally." And he added, "There was at least a couple of individuals who felt that they wish you to go slow and be careful and make sure that this wasn't going to be overturned on some procedural ground.... It is more than a case of just going back to point A and commencing again. These procedural violations go to the very heart of due process.

"My client has already suffered substantial economic harm. Not just the damages that have been assessed against him, but a virtual complete absence of business since these proceedings began. And all those wrongs (procedural violations), if you will, are obviously redressable in court.

Housing tight this year, but 'not a panicky situation'

Coralville areas is tight as usual, but some housing can still be found.

Jean Kendall, Union facilities coordinator and director of the Housing Clearinghouse, says the Clearinghouse still has rental units, mostly one and two-bedroom apartments, available in its

"It's about like last summer," Kendall said. Anyone attending the university should be able to find housing. We've had a lot more students using the Clearinghouse to find housing this year, but we've had a lot more listings. Students who are coming in are being taken

Preliminary victories won by both sides in F-518 battle

By ROD BOSHART

Both sides have won preliminary court victories in the battle over the location of Freeway 518.

Iowa City, which is fighting the Iowa Department of Transportation's proposed F-518 alignment through the city, won on August 16 when U.S. District Court Judge William Stuart denied a DOT motion to have the suit transferred from Johnson County District Court to federal court.

However, the Iowa City Chamber of Commerce and the Johnson County Board of Supervisors will be allowed to intervene on behalf of the DOT in the suit, County District Court Judge August Honsell, Jr. ruled July 31.

IN RULING AGAINST the city's motion to deny the two intervenors, Honsell said the county and the chamber would be allowed to join in the suit because their interests in the case are separate and distinct from the DOT's and therefore should be included.

David Elderkin, Jr., the attorney for the city, requested at the initial July 5 hearing that Honsell dismiss the intervenors petitions, contending they are not aggrieved by the DOT's proposed alignment.

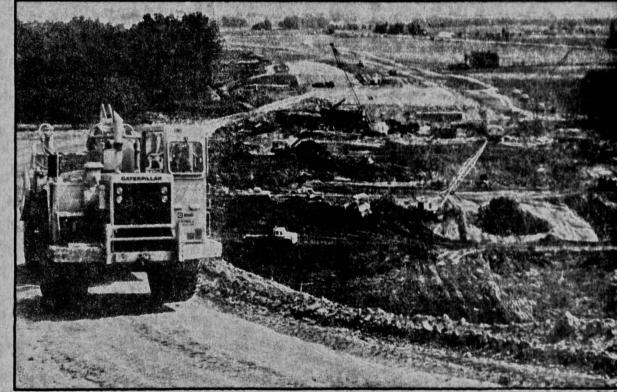

The city, by a 4-3 vote of the City Council brought suit June 15 for a permanent halt to implementation of the DOT's proposed F-518 alignment and design between Highway 1 and Interstate 80 until the DOT reaches agreement with the city on the freeway's construction. The council majority wants the freeway moved farther west and no Melrose Avenue interchange.

DENYING THE DOT'S motion to move the suit to federal court, Stuart said the city's suit is based solely on state law and therefore should not be transferred

DOT Counsel Robert Goodwin requested the transfer to federal court because the project involves federal funding and because the DOT's environmental impact statement has been approved by the Federal Highway Administration and the federal court.

Originally, the city's petition to halt the F-518 project alleged violations of the U.S. Code as well as the Iowa Administrative Procedure Act and the Iowa Code. But the city dropped the allegations of federal code violations when the DOT requested a transfer to federal court.

Elderkin said the city may file a separate suit in federal court against the DOT's proposed F-518 project in Iowa City but he said that decision would not be made for two or three more weeks

Construction of Freeway 518 near Hills continues while lowa

City pursues court action to change the DOT's planned route rough the city.

78-degree compliance delayed by paperwork

By LIZ ISHAN Staff Writer

Problems with federal paperwork have plagued the UI's attempts to comply with President Carter's 78-degree order, according to John Houck, assistant to the President of the UI Physical Plant.

Temperatures in UI buildings have been adjusted, but federally-issued signs and exemption forms that should have been returned to the Department of Energy by Aug. 15 arrived at the UI just last week. Carter's order, which was signed into law July 10, required that temperatures in public buildings be adjusted to 78 degrees by July 16. Those agencies affected were also given until Aug. 15 to complete and return the federal forms and post federal signs in buildings.

The DOE is now allowing a "reasonable amount of time" for agencies to return the forms and post signs, Houck said. "Carter caught his own group by surprise," Houck said. "We're in violation because of things outside our control -

THE TEMPERATURES were adjusted in all affected UI buildings by Aug. 15, he said, and UI-issued signs have been posted in 95 percent of the buildings affected.

Violators of Carter's order can be subject to federal prosecution, and federal officials could show up at the UI "anytime between now and the middle of April" when the order expires, Houck said. But compliance requires more than

signs and forms, he said. Houck suggested that student groups become involved in enforcing the order

"How about some spot checks?" Houck asked. "If it's not working, I would like to know about it because if you don't find it and I don't find it, and the federal government comes in there, they'll find it.'

"There will always be that staff person or student who will say 'Why should I do his?' "he said. "I'm sure that the (UI) vice president's office would be very interested in finding out that information. Who is not doing it - is it primarily an

blame lie?

DEPARTMENTS WITH specific temperature requirements for computers, animals, books and other equipment can file a UI exemption request form, Houck said

The form was introduced in late July, and Houck said he has received over 300 requests during a time when he thought many UI personnel would be on vacation. "To approve all is not in the spirit of the emergency," he said.

Houck said that he will be working with the offices of May Brodbeck, vice president for academic affairs, and Randall Bezanson, vice president for finance, to determine standards and criteria for approvals.

For some equipment, such as computers, university- wide standards will be eveloped, Houck said.

Those areas automatically exempt from the order include hospital and health care facilities, dormitories and other

Motion for change of venue pending in Jensen murder trial

By KEVIN WYMORE Staff Writer

Defense motions for a change of venue are pending in the trial of an Iowa City ouple charged with the April 14 murder of Ady Jensen, according to Cedar County court officials.

The first-degree murder trial of Robert and Judy Kern, formerly of 47 Amber Lane, is scheduled for Sept. 11 in Cedar County District Court in Tipton, and the motions are expected to be acted upon "within days," the official said.

Defense attorneys for the Kerns filed the change of venue motions because of the amount of local publicity surrounding the case, the official said.

Motions were also filed to grant separate trials for the Kerns, who were married 24 days after the shotgun slaying. Under provisions of the Iowa Code, spouses cannot be forced to testify against one another in criminal cases.

IN A RELATED development, the wife of the slain Iowa City man was sentenced Aug. 13 to 10 years in the Iowa Women's Reformatory on charges of conspiracy to commit a forcible felony in connection with the murder.

Jeanne Jensen, formerly of 1007 N. Dodge St., was charged late in June with the conspiracy count, which was the result of a plea-bargaining agreement, according to Cedar County Attorney Edward Kemp. She pleaded guilty to the charge in return for testimony against the Kerns, Kemp said.

Judy Kern was released from Linn County jail after posting \$100,000 bond. Her husband is still in Cedar County jail in Tipton under the same bond amount.

ACCORDING TO public documents filed in Johnson and Cedar County courts, the Kerns and Jeanne Jensen - with an unidentified male "who was to kill Ady Jensen" - planned to blow up Ady's pickup truck five days before he was murdered

Later, on the morning of April 14, Ady was called to the home of his parents, Ferdinand and Olga Jensen in West Branch, where the killer shot him twice with a .410 shotgun, according to the documents. The evening before, the intruder forced his way into the elder Jensens' residence, tied them up, and told them he would wait for their sor

A \$50,000 life insurance policy application on Ady Jensen's life had been filled out by Robert Kern, then an insurance salesman, shortly before the murder, according to the documents.

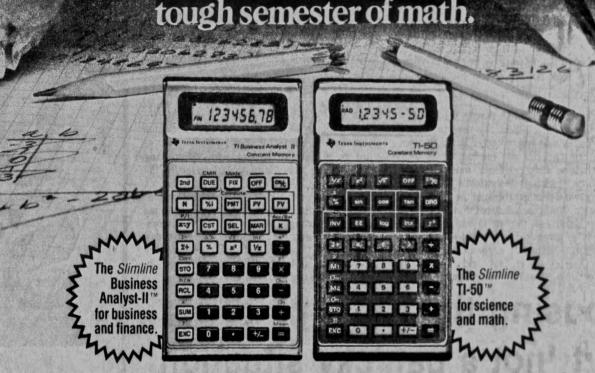

ROBERT KERN and Jeanne Jensen were to split the insurance proceeds upon the death of Ady Jensen, a document said.

After the murder, the Kerns and Jeanne Jensen met at Jensen's residence to discuss, among other things, the insurance proceeds, the exhibit said.

According to the Cedar County exhibit, Jeanne Jensen and Judy Sorge Kern met loans, investment yields, on March 17, when Judy Sorge Kern told amortization schedules Jensen "Robert Kern could have anyone and more. killed for \$50.00."

Jeanne Jensen then said "maybe she should invest \$50.00." Judy Sorge Kern then said she would talk to Robert Kern, the exhibit said.

Later, Jeanne Jensen gave Robert Kern \$50.00 and a photograph of her husband, "U.S. suggested retail price the exhibit said.

Slimline Business Analyst-II. Sleek LCD calculator with versatile business capabilities.

Solving financial problems with the Slimline Business Analyst-II can make working with your old calculator seem like pencil-and-paper arithmetic. The functions required to perform many common business, financial and statistical calculations are built in to help you make quick, accurate evaluations of many complex business situations

Special financial keys are used to handle time and money problems such as compound interest, annuity payments, mortgage

Statistical and linear regression capabilities provide the power you'll need to boil down data and automatically handle problems such as sales and earnings forecasts. Profit margin calculations concerning

cost, selling price and margin can be performed rapidly when any two of the variables are known. Other features include a four-function data register with Constant Memory[™] feature that retains its contents even when the calculator is turned off. Two miniature batteries provide up to two years of operation in normal use. And TI's APD" automatic power down feature helps prevent accidental battery drain.

The Business Analyst-II, with detailed owner's manual and suede-look vinyl wallet with pockets for notes, \$45.00*.

The Slimline TI-50 packs 60 powerful functions into a handsome, compact package.

The pocket-portable Slimline TI-50 is a remarkably powerful LCD slide-rule calculator. Yet it's as thin as a pencil and weighs only three ounces!

Its 60 versatile functions can help you handle a wide range of college math problems. Capabilities include common and

natural logarithms. Six trigonometric oper ations that can be performed in three and lar modes (degrees, radians or grads). Two constant memories that retain their con tents even when the calculator is turned of And more.

Seven built-in statistical functions sim plify the task of boiling down large sets data points so you can perform accurat analyses and draw reliable conclusions.

The power of the Slimline TI-50 is made easy to use by TI's AOS™ algebraic operation ing system, which provides 15 sets of p rentheses and accepts up to four pending operations. That means you can enter mos problems just as they're written, left to right.

Two miniature batteries provide up b two years of normal operation. And TIs APD[™] automatic power down feature helps prevent a ridental battery drain. The Slimline TI-50 includes a detailed

owner's manual and a durable vinyl wallel \$40.00*

Make sure your next calculator has th specialized power to handle the problem unique to your major. See the Business Analyst-II and the Slimline TI-50 at your college bookstore or other TI dealer today.

Summer news focus: truckers strike, energy

Here is a recap of some of the major local news stories that occurred this summer:

A group of local independent truckers set up blockades at area diesel fuel outlets during June to protest high diesel fuel prices.

One blockade was set up at Williams Brothers Pipe Line Co. in Coralville, where independent truckers demonstrated and stopped transport drivers, asking them to honor the nationwide shutdown. Williams Brothers is the largest fuel distributor in Iowa, and the strike led to a shut down of nearly half its outlets.

Due to cutbacks by diesel fuel suppliers, several area truck stops were forced to shut down their diesel pumps. Among the stations that were closed were the Hawk I Truck stop in Coralville, the Landmark Truck Center and the Mid-America and Star Inn truck stops near Williamsburg.

tage of energy, just the means to convert John Houck of the UI Physical Plant believes there will be more cutbacks due to increased demands brought on by remodeling and construction of new buildings. And construction of additional transformers probably will not be completed until 1981.

As part of a UI fuel conservation program cutbacks in the Cambus service are planned for fall. UI employees are being encouraged to carpool on business trips and the UI motor pool will have a more fuel-efficient fleet this year. Even Campus Security will be using more foot patrols to save gas.

THE IOWA CITY AIRPORT **COMMISSION** was the source of repeated controversy this summer, culminating in the resignation of E.K. Jones, airport manager for 19 years.

On May 17, the 5-member commission adopted a restriction on student-piloted flights that was soon labeled dangerous, discriminatory and probably illegal by state and federal officials. The measure, sparked by complaints of noise and safety

tric powerline in a cove on the east side of Lake McBride.

Groff's wife Marina filed the suit July 12, charging that negligence on the part of Iowa Electric was "the proximate cause" of Brad Groff's death.

THE STATE BOARD OF REGENTS in July cleared the way for the construction of a \$21.9 million addition to UI Hospitals. The regents approved a preliminary budget for the project, to be completed in 1983, and authorized the UI to renegotiate for architectural services.

Hospital officials have proposed that the addition, called the South Pavilion Phase A, be financed with \$18 million in revenue bonds that would be retired with patient fees. The remaining \$3.9 million would be paid with money from the hospital's Building Usage fund, reimbursement allowances paid to the hospitals by patients' insurers.

A STATE HEALTH FACILITIES Council member, angered with the 48 percent jump in the average expenses of UI Hospitals patients over the past two years, blasted the increase as "about the worst inflation I've seen in a long time."

At a June 29 council meeting, Robert C. Armstrong, an 82 year-old Cedar Rapids merchant, criticized the hospital as a "sacred cow" and was the council's sole dissenting vote on a \$149,000 hospital office project.

Patient charges jumped from \$168 per day in 1977 to \$248 in 1978. But hospital officials say that charges at the UI rose at a rate well below the national average of increases.

ELECTRICAL WORKERS STRUCK for seven weeks beginning in June, halting electrical work at many Iowa City and Cedar Rapids construction sites.

The electricians returned to work July 30 after contractors agreed to give the electricians a \$1.30 raise for each of the next two years. The contractors also agreed to increase their contribution to the employees' health insurance fund as part of overtime compensation.

A TWO MONTH INVESTIGATION by the The Daily Iowan revealed that the Duane Arnold nuclear power plant was a chronic violator of the Federal Water Pollution Control Act from third quarter 1977 to February 1979.

Documents obtained through the

blocking the road leading to the plant in protest of the use of nuclear power.

IN JULY, 400 BOOKS allegedly stolen from UI libraries were discovered at a Rock Island, Ill. residence, capping a three-week investigation by UI Campus Security.

Campus Security officers and Rock Island authorities found nearly 3,000 volumes allegedly stolen from libraries in Iowa and Illinois at Charles Barton's residence. Barton is a library science student at Marycrest College in Davenport.

Former UI student Rudiger Scheidges, questioned in June about missing UI property, was cleared of any suspicion. Earlier Scheidges, who received his master's degree in journalism from the UI in May, said that on June 21, two Campus Security officers had threatened and harassed him during the investigation of a possible theft. Scheidges, who came to the UI from West Germany, is now attending the Free University of Berlin.

THE U.S. ARMY CORPS OF **ENGINEERS** agreed July 17 to convert part of the Sugar Bottom campground at Coralville Lake back to day use.

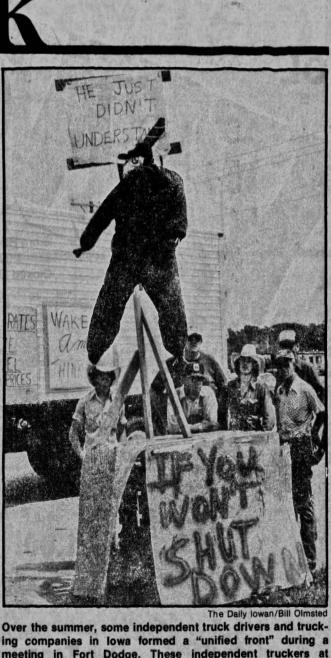

The decision came after approximately 2,000 persons signed a petition opposing Corps restrictions that limited use of the campsite to 250 camping units, with no day use for non-campers.

URBAN RENEWAL TRUDGED ON, with the partial completion of the pedestrian mall, the excavation of Washington Street between Clinton and Madison Streets and progress on the first of two planned city parking ramps.

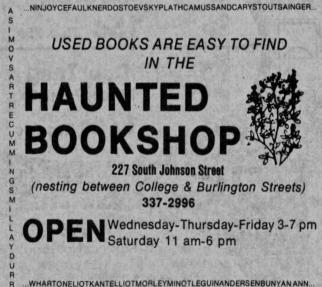

But all did not go smoothly. In the second week of June, the ramp, at approximately one-third its present size, was found to be leaning four and one-half inches to the north, two inches more than considered normal.

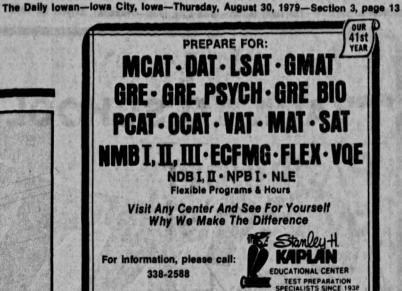

This led Mayor Robert Vevera to quip, "Don't anybody tell Donald Kaul." After the tilt was revealed, an anonymous tipster phoned local media to say that the ramp had also sunk five inches. This was denied by all involved in the project and city officials said the tilt had been corrected by June 19. The ramp marches on.

THE INVESTIGATION into 26 missing hogs from the Johnson County Care Facility farm continued with the subpoenaing and questioning of former facility co-administrator Richard Kelley on May 29.

meeting in Fort Dodge. These independent truckers at Hawkeye Truckstop gathered to join the protest against rising fuel prices.

hazards from residential areas, disllowed student-piloted flights on two of the airport's runways between 4 and 9 .m, Following strong criticism, the comission voted on July 23 to lift the ban, replacing it with a set of flight restrictions pplying to all pilots.

Also July 23, the commission voted to advertise for a replacement for Jones, who the city legal staff had concluded over a year ago had a conflict of interest while acting as both manager and holder of extensive leases with the city as operator of the Iowa City Flying Service. Jones resigned the next day.

THE DEATH OF UI STUDENT Brad Groff on May 16 resulted in a \$2.5 million suit against Iowa Electric Light and Power Co. Groff, 24, died when the capsized catamaran he and two others were in tilted up and hit a 12,500 volt Iowa Elec-

Freedom of Information Act show that the plant dumped nonradioactive sewage wastes into the Cedar River at a rate up to 420 percent over Environmental Protection Agency limits.

Duane Arnold officials blamed the violations on an excess number of workers at the plant for refueling and repairs to substantially cracked coolant pipes, and on inadequate operation of the sewage treatment system. Federal officials said they believed that release levels in compliance in March marked the end of the problem at the plant, and said they probably would not prosecute.

A SIX MEMBER JURY found 12 members of the the Palo 13 not guilty of criminal trespass at the nuclear power plant. The remaining defendant, Greg Green, was hospitalized and not tried. The 13 were arrested March 24 while

The DI revealed in March that the sheriff's office was investigating the missing livestock. Kelley was coadministrator of the facility with his wife Doris Kelley from July 1, 1977 to March 8, 1979,, when they resigned, citing "pressure" they had experienced during their employment.

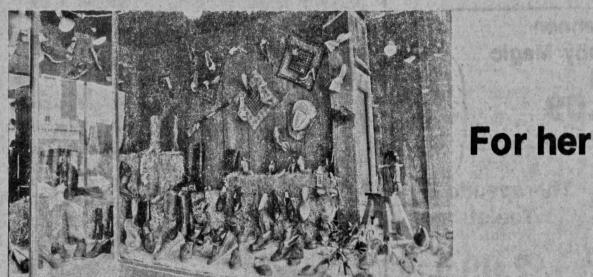

THE CITY COUNCIL VOTED unanimously July 17 to reject the DEY Building Corportation as preferred bidder for the \$5 million downtown hotel project after the corporation said it could not afford the project without city revenue bonds

The bonds are tax-exempt and can be sold to banks or investors at interest rates 4 or 5 percent less than market rates.

The UI Hospitals is a big place. And you're probably not there unless you have a serious problem. But more than just complex, expensive equipment is needed to help take care of a problem. The hospital's "humanistic resources" can make a patient's stay a little more comfortable, and might just make it easier to take care of the problem

Page 4

The UI Hospitals has its own security force. One responsibility of the force, which is led by former Air Force Col. Robert Stein, is to ensure that swift and efficient measures are taken in the event of a fire. Stein doesn't take that responsibility lightly.

A nationwide shortage of anesthesiologists has had some effect at the UI Hospitals. One anesthesiologist at the UI says he and his fellow doctors are overworked and underpaid.

Page 6

The UI is one of three diabetes and endocrinology research centers in the United States. Intensive research is underway at the UI to find a better way to treat diabetes.

Nation's largest teaching hospital — still growing

By NEIL BROWN Editor

ock

It's billed as the nation's largest university-owned teaching hospital. It's one of the few teaching hospitals operating "in the black." And the mammoth UI Hospitals health complex, enigmatic in nature, is still growing.

The establishment of UI Hospitals as a major health service center —it may be the most active tertiary care center in the Midwest — can be traced to an act of the state legislature.

In 1915, the Iowa General Assembly enacted legislation which from a national perspective was revolutionary. The state said it would guarantee comprehensive health care to every adult and child in the state who otherwise could not afford it. The new law also stipulated that this health care would be delivered at UI Hospitals.

But at that time the hospital was housed in East Hall, a building illsuited to serve the health needs of the state's indigent.

As plans were developed to expand the hospital facilities, officials of the Rockefeller Foundation, a New York philanthropic organization, were apparently impressed with the state's attempts to guarantee health services to the indigent. Hence, the Rockefeller Foundation pledged half the cost of a brand-new 900 bed UI Hospital to be constructed on the west bank of the Iowa River. The state legislature responded with a \$2.5 million appropriation; the Rockefeller Foundation matched that, and in 1928 a new hospital was dedicated.

For approximately 40 years that facility was used to provide health care for the state's poor, plus an increasing number of paying patients. But the facility soon wore down.

On July 1, 1963, the UI was given the word from the state Department of Health, to start planning for the future. In the "Iowa Plan for Hospitals and Related Health Facilities," health department officials wrote:

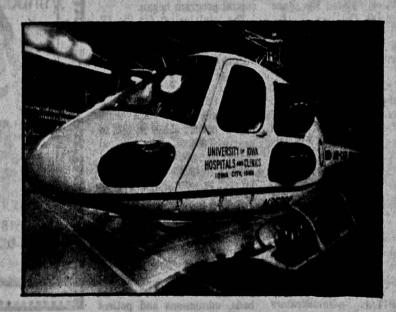

"A major structural element of the total plant is almost 40 years old. While the maintenance of the facility has been commendable, the cost, comparatively has been noticeable. The unit imposes physical features which are rather intolerable in terms of present day design and usage. As for fire safety, the structure leaves much to be desired. Mechanically, it is a tremendous maintenance burden. It is shortsighted to continue adapting this unit to future needs or to permit it to dictate future design of adjacent facilities.

"Most importantly, these existing facilities and their antiquated features can hardly be considered appropriate as a model training environment for Iowa's only medical school," the health department stated.

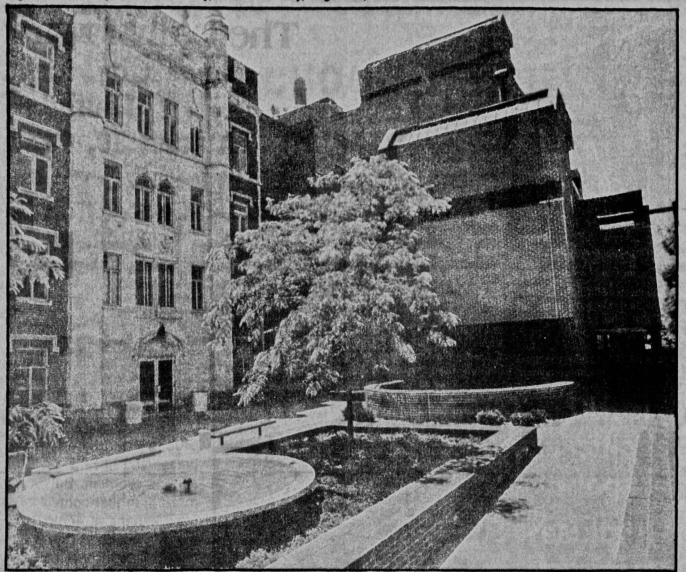

See Expansion, page 2A

Page 7

The UI Hospitals Emergency Medical Services have expanded. The air-care service now flies emergency patients to the hospital from most locations in eastern Iowa. A new Mobile Care Unit offers further emergency service, especially for neonatal transport.

Page 2A-The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979

Expansion

It was not until 1969 that UI don't like to call the officials seriously heeded the health department's message, and after about three years of study announced a Capital Development Program for 1970-

The three-phase program, when completed, will replace and expand most hospital facilities at a cost of more than \$124.3 million.

Probably the most advertised factor of the capital replacement-expansion plan is that the first two phases, which represent \$84.3 million in construction and renovation, have been financed entirely with UI Hospitals selfgenerated funds - no state appropriations. Self-generated funds include gifts, federal grants and earnings from paying patients.

Phase I of the capital program was the North Tower Addition. This project was

impetus for this "replacement" plan. As late as 1977, the state Department of Health determined that 529 of the UI Hospitals beds did not conform to department standards.

Stephen Ummel, associate director of UI Hospitals, said 148 beds were replaced in the first stage of the Carver Pavilion, leaving approximately 380 beds nonconforming to health department standards. He said the remaining non-conforming beds will be replaced upon com-

pletion of the second stage of the Carver Pavilion and the South Pavilion. He added that the health department notification does not carry any penalty, to have a good hospital. rather it urges that the nonconforming beds be brought into compliance with the accepted standards. "The state department of health uses just a myriad of criteria in calling a bed nonconforming. It can be the gross physical size of the room, the presence or absence of toilet and shower facilities, the presence or absence of windeveloped at this time.

Continued from page 1A

revolution in health care delivery," he said.

'When people say Carver II (South Pavilion) and no further south, nobody gets me into that kind of discussion. They can all discuss it and they can all say it all they want. But my experience is just when you think something is settled, it's going to be unsettled."

Ummel confirmed that no plans are currently underway for expansion past 1985. But he too, does not rule out the possibility.

pand beyond completion of the "There are no active serious planning efforts afoot for any "I'm never going to make a major capital replacement commitment like that. I've projects beyond the South never made any. There are a lot Pavilion," Ummel said. "The of commitments that have been South Pavilion is targeted in the attributed to this offfice about time frame 1980 to 1985. It may one thing or another, and I have be necessary for the university never made any commitments to provide additional ramp to anybody because I don't parking facilities in the know what the future's going to university hospital area. There hold," Boyd said. "All I know is are several sites under conthat I want to have a good sideration, but several years recreation program and I want will probably elapse before that kind of planning is com-"Now I understand this is a menced.'

Size of hospitals grows faster than number of staff per bed

By NEIL BROWN

The physical size and the services of UI Hospitals have apparently grown at a faster pace than the number of staff per occupied bed.

A study published in 1978 by the National Council of Teaching Hospitals showed that for fiscal year 1976, UI Hospitals ranked 59 of 60 hospitals in the number of staff per occupied bed. At that time the UI had 3.14 staff per bed. The University of Connecticut Health Center ranked first with 9.82 personnel per occupied bed.

UI Hospitals has more beds than any other teaching hospital in the United States, which affects that figure, but UI administrators admit that the number of staff needs to be increased.

SINCE THE STUDY the UI has increased to 3.7 the number of staff per occupied bed. Stephen Ummel, associate director of the hospital, said efforts to increase staff size are continuing.

"University Hospitals has been

working in concert with the university administration and the state Board of Regents for three years now in a phased program of augmenting the number of staff per occupied bed," Ummel said.

"This is being done as the hospital Is having an increasing number of very sick patients referred to it for tertiary level care. We have several critical care units in the hospital and as those units have been developed, and as the census in each unit has increased, we have been increasing staff to meet those critical requirements," he said.

UI President Willard Boyd said the hospital must be large enough to accommodate the large volume of patients who require complex services. "I suppose it's possible to become too

medical attention. Maybe this country big. But one of the problems is that -cannot afford to provide its citizens well, take open heart surgery. You have with some of these esoteric transplants. to have a certain volume in order to Maybe the decision will be made by make it economic. It's much cheaper to society that it's too expensive to provide for a transplant. Well, I think do 250 than it is to do one," Boyd said. that's going to be a pretty tough political and ethical issue to deal with "If you're going to do this esoteric care, you've got to have a certain volume, not only in order to gain the expertness, but because people are interested in in order to make it economical." longevity.

completed in 1976 at a cost of \$15 million and provided new facilities for the Departments of Internal Medicine, Dermatology, Thoracic-cardiovascular surgery, Neurosurgery, Obstetrics and Diagnostic Radiology. Also in the North Tower Addition are new operating rooms, replacement beds for the Surgery and Internal Medicine Departments, a respiratory therapy clinic and the hosptal's central sterilizing unit.

PHASE II of the program is the Carver Pavilion. Named for Muscatine, Iowa industrialist Roy Carver, who donated \$2 million for the construction, the pavilion is being built in two stages.

The first stage, dedicated in October 1978, cost \$19 million and provided facilities for a new emergency treatment center, the Departments of Physical Therapy, Neurology and Orthopaedic Surgery, a pyschiatric outpatient clinic, and a material distribution center, which dispatches equipment and supplies throughout the hospital.

The second stage of the Carver Pavilion is a vertical extension, which is slated for completion in 1981 at a cost of approximately \$14 million. Three inpatient floors and a pediatric intensive care unit will be among the facilities included in this second stage.

The third phase of the capital program is construction of the South Pavilion. Scheduled for completion by 1985, con-struction of this phase will cost approximately \$56 million and will add about 396,000 gross square feet to the hospital complex.

Tentatively slated for space in the South Pavilion are the Department of Surgery clinic and the entire Department of Pediatrics, including its inpatient services. Hospital officials say the specific use of other pavilion space "has not yet been solidified."

Funding for the third phase is not yet guaranteed. UI officials are hoping that if a national health insurance plan is adopted and the federal government pays for care for the indigent, the state will redirect the money it now provides for the indigent care - approximately \$20 million this year - toward funding construction of the South Pavilion.

HOSPITAL administrators

dows, access to the outside, the existence of special support facilities within the room itself oxygen, vacuum, etc," he said. He said the obsolescence of

these facilities, in part, motivated hospital officials to develop the capital replacement

"At that time (when the replacement plan was devised), this hospital had a spatial deficit in terms of the universally accepted gross square feet per inpatient bed," Ummel said. "We also needed to allocate more space for the teaching function. "Another need for the capital

development program was the obsolete nature of our patientcare facilities in the original 1928 structure. Some of these rooms did not have windows. Others did not meet various accreditation standards or code requirements. They simply were not modern accommodations for inpatients or outpatients," he said.

ALTHOUGH HOSPITAL administrators like to refer to the physical adjustments as "replacement," the hospital's budget and services have greatly expanded since the

capital program began. The total budget for the UI Hospitals system for 1971-72 was \$34.1 million. The 1978-79 budget was \$84.2 million — an average increase of about 13.8 percent per year. Hospital figures show that

admissions have risen from approximately 31,000 in 1972 to nearly 40,000 in 1978. Clinical visits in 1971-72 numbered slightly more than 260,000, but jumped to more than 314,000 in 1977-78.

Ummel said the UI has been ranked by the National Council of Teaching Hospitals as the largest of the nation's 64 teaching hospitals for five consecutive years. He said that ranking is based on number of beds, admissions and patient

The UI Hospitals and Clinics are renowned for pioneering research and clinical expertise in areas as diverse as renal medicine and hand surgery. But the patients who fill its beds and use its clinical services - and their families - have many needs that are non-medical. These needs are met by a cluster of support services labeled by Chaplain David Belgum as "humanistic resources."

The responsibilities of these services the Department of Social Service, the Patient Service Representatives, the Volunteer Program and the Department of Pastoral Services — are hard to define, because they stem directly from the particular needs of individual patients. And because their boundaries are vague. there is a certain amount of overlap.

"Inevitably there is overlap in what people do," noted Dr. Lois Boulware, founder of the Patient Representative service. "Our housekeeping people sometimes answer the questions of confused people around here. But our philosophy is, we don't care who gets the credit, as long as the response is made."

DR. BOULWARE - who retired July 1 - said patient representatives try to combat depersonalization. "With anything as complex as this hospital, or any institution of this size, you have to fight the depersonalization - to diffuse, to dilute, to address the depersonalization.'

To counteract depersonalization, patient representatives serve as "communicators and catalysts," by cutting red tape and offering personal attention. "I'm convinced," Boulware asserted, "that most snafus in one's personal and corporate life are due to a lack of communication." Along with the complexity of the institution itself, patient representatives must cope with the unreasonable expectations of patients, Boulware said.

"The public, by and large, wants miracles in the hospital, but they go out and drink and smoke and overeat and then have unreasonable expectations of doctors being able to reverse all that."

BOULWARE LOCATES one source of patients' unrealistic expectations in TV depictions of medicine. "Marcus Welby only saw one patient a day. He gave his total time. He was not a surgeon, but he was always in the operating room observing; he made drop-in house calls; his waiting room was never filled; his telephone was bringing in only pertinent calls. Now, the programs were very sound - those were screened by the American Academy of General Practice - and I think he did a lot of good in bringing things to the attention of parents, like learning disabilities, and epilepsy, and childhood diabetes. They were all wonderful. But nobody can practice medicine with one patient a day' The staff of six patient representatives locate patient needs mostly by what staff member Margaret Nusser called "minding the territory." Certain areas, such as surgery and the burn unit, are covered each day. In addition, volunteers are sent out to greet each new admission - the hospital averages about 150 new admissions each day.

of these experienced volunteers, the patient representatives follow up their reports.

OF COURSE, patients who have not made overt complaints must be approached with some subtlety. "One of our volunteers will tell us, 'I'm a little uneasy about this patient: I sense something.' Boulware said. "You don't go in there and say, 'What's bugging you, buster?' You just go in and have a little visit with them,

"One of our volunteers will tell us, 'I'm a little uneasy about this patient' ... You don't go in there and say, 'What's bugging you, buster?' You just go in and have a little visit with them, and knowing this little bit you can bring them out, relax them into talking about what's really bothering them."

and knowing this little bit you can bring them out, relax them into talking about what's really bothering them."

Often, the patient representatives discover that the patient is troubled by something that is easily corrected. "Sometimes it's a big thing to them and it comes across to us as something that's so

easily managed," Boulware said. Boulware told of one case in which a patient complained that a certain nurse was unfriendly. It turned out that the nurse was simply busy caring for the person in the next bed and the patient misinterpreted the situation, concluding that the nurse what ignoring her., All that was necessary to remedy the problem was to initiate some communication between the nurse and the patient.

ASIDE FROM odd-jobbing, the patient representatives have launched some specific projects. One of the most successful has been the day-of-surgery waiting room, the need for which was first recognized by Boulware. The patient representatives had heard "horror stories" about the experiences of families and friends waiting during surgeries. Nusser mentioned the case of an obviously distressed woman who had been waiting all day to see the doctor, but had been in the bathroom when the physician was in the area. The woman vowed that she would not leave for any reason until she saw the doctor. The new waiting area is an attempt to avoid those problems. A volunteer is always on hand to assist patients, and patient representatives frequently attend the area. The waiting area itself is divided so that families can have a sense of privacy and the walls are decorated with soothing murals. A separate room off the main area serves as a refuge when the news from the operating room is bad. In the 12 months since the day-of-surgery

waiting area was opened it has served 10,500 individuals. It is a tangibleexample of the philosophy contained in a summary by Dr. Boulware of the patients representatives' role tacked up on the bulletin board in their office:

help

We are not do-gooders or bleeding hearts; We are not adversaries; We are not passive collectors of complaints. We are active observers. We listen and communicate and seek to be catalysts. We are fully accountable. And our assignment within the administrative framework is to constantly seek the maximum response to the needs of our patients and families.

ANOTHER SERVICE aimed at fighting depersonalization is the Volunteer Program directed by Norma Adams. Approximately 325 volunteers (about 35 percent of which are students) last year contributed 24,000 hours of work, Adams said, and try to add "a caring touch" to the hospital.

One major responsibility of the volunteers is dealing with the orientation of thousands of patients, relatives and visitors who use the hospital. "We have a traffic pattern here of about 9,000 people every day," Adams said. "And, of course, we have considerable people who are lost. Most of them are coming with anxieties and fears, so we really like to greet them and help them find their way." Volunteers also aid in the patient

library, assist recreational and physical therapists, serve at open houses, the gift shop (an enterprise that literally began in a closet less than a decade ago), deliver books and other diversions to patients and do whatever "little extras" are needed to make the hospital experience more pleasant. "The patient may think it's the most important thing in his day getting his paper at 8:30 in the morning," Adams said.

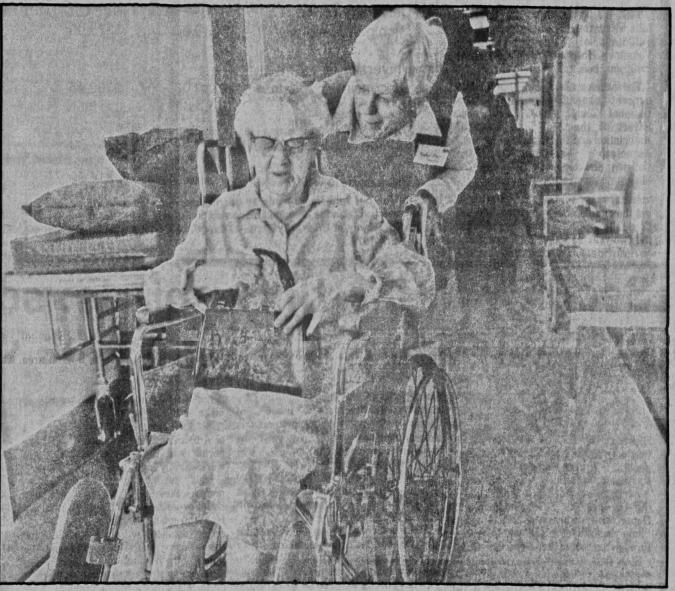

THE VOLUNTEERS have also been effective as fundraisers. The Volunteer Program donated money for the construction of the recently completed Pediatrics play area, contributed \$17,000 to outfit the day-of-surgery waiting area, spent \$5,000 for new shelves and equipment for the library and, in their biggest outlay, donated \$50,000 toward the purchase of the new Mobile Critical Care Unit.

The program also provides a corps of 75 volunteer on-call interpreters. "This group of people must be very proficient," Adams said, "because they are involved in patient teaching or may be assisting a doctor in communicating to a patient while a procedure is being done.'

ANOTHER LINK in the chain of humanistic resources is the Department of Social Service. The 33 social workers on the social service staff served 14,216 patients during 1977-78.

The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979-Page 3A

The volunteers may bring back complaints or may report their impressions of a patient. Relying heavily on the instincts

Department Director Roald Rolfson said social services involve the practical needs of patients, and their socialemotional needs. Some of these needs include financial resources, transportation, child-care and discharge planning.

"We become involved with the patient with the family, in trying to assist them in looking at the problems and exploring with them what their options or alternatives may be and what resources may be available to them, particularly in their

At \$80.9 million a year, **UI Hospitals a big business**

By TERRY IRWIN University Editor and NEIL BROWN Editor

It's a big business.

In June the state Board of Regents approved an \$80.9 million budget — to be raised totally through patient care earnings — for general operations at UI Hospitals and Clinics.

On July 1 rates for care at UI Hospitals rose 9.6 percent, and UI of-ficials say the 1979-80 budget reflects a 9.6 percent increase from last year's budget.

Most of the hospital's income, or an estimated \$60.8 million, will be generated through the care of paying patients.

The rest will be earned by providing medical care for the state's indigent. Although the funding is part of the UI's state-appropriated support, the hospitals must earn the estimated \$20.1 million "on a per patient basis," ac-cording to Randall Bezanson, UI vice president for finance.

Private donations, such as con-tributions used to help finance capital improvements, are managed by the UI Foundation, and research grant funding is handled through departments within the UI College of Medicine, Hospital Information Director Dean Borg said.

THE 9.6 PERCENT rate increase falls within the 9.7 percent expenditure guideline of President Carter's Voluntary Hospital Cost Containment Program, hospital officials say.

The increase also falls within the 11.6 percent expenditure goal of the National Voluntary Cost Containment Effort of the American Hospital Association and the American Medical Association, according to John Colloton, director of UI Hospitals.

A major objective of the national voluntary cost containment effort is to cut the annual rate of increase in total hospital expenses by four percent over the two-year period 1977-79, according to information distributed by the

hospital. The average rate of increase in 1977 was 15.6 percent, ¹ trimmed to 13.6 percent in 1978. To comply by the end of 1979, the national rate of increase will have to be cut to 11.6 percent.

In a May 4 letter to UI President Willard Boyd, Colloton wrote, "Worthy of note is the fact that with this (9.6 percent) increase University Hospital rates of charge will have increased only 61.2 per cent during the eight-year period spanning from 1972 to 1980. Nationally, it is projected that hospital rates of charge will, by the close of 1979-80, have increased 82.9 percent since July 1, 1972."

BEZANSON SAID that ap-

	373.86 340.00 310.08 310.00

The charges reported include all hospital services the average patient receives while in the hospital and some special services. The figures are from a survey of University Hospital Executive Council Hospitals made in April 1979.

proximately \$56.5 million of the total budget will pay salaries and wages for administrators, faculty and staff members.

Stephen Ummel, associate director of UI Hospitals, said, "We are a laborintensive organization. We devote twothirds of our budget to staff salaries and benefits. This is in sharp contrast to manufacturing companies who would devote only one-third to salaries and wages

"Staff members expect and receive cost-of-living adjustments and periodic improvments to their benefits to keep abreast of inflation.

Approximately \$23.4 million was budgeted for administrative and basic

ed

operational supplies, including \$1.2 million for fuel and the purchase of electricity. "We are very dependent on the American marketplace for products we buy and services we purchase,"

Ummel said. "We purchase a great deal of utilities, and we also have a very large grocery bill. People should realize hospitals are one of the greatest purchasers of food of any organization in the country. Costs also go up every year by virtue of malpractice insurance.

The remainder of the expected income has been slated for equipment needs, estimated at \$639,000, and for building repairs, estimted at \$359,000.

Boyd has often said UI Hospitals is one of the few teaching hospitals in America that is not operating at a deficit.

"The reason I make that point is because it is generally said, among people who do the kind of work I do, that the medical school and the hospital are the most difficult things they have to contend with. My point is I am very happy to have them in this university," he said.

"I POINT OUT to them that this state is the beneficiary of an exceedingly well-managed operation, which is in the black, not being bailed out as many university hospitals are. There are many university hospitals in serious trouble. Millions are being used to bail out various university hospitals. And we've never asked the state to do this."

Ummel said that because the hospital has never requested an operating or capital appropriation, administrators are by necessity cost-conscious and continue to employ cost-containment procedures.

Boyd said, "I worry a lot about the hospital. I worry a lot about the medical school. I worry a lot about the other health colleges. The dimensions of it (the UI health complex) are kind of frightening and awesome. But on the other hand, the quality of the people over there is without peer in the United

On June 4 Iowa-Illinois Gas and Electric Co. suffered a power outage that caused the huge diesel emergency generator in the basement of the Carver Pavilion to kick in.

According to Robert Stein, director of the UI Hospitals Safety and Security Department, when the diesel starts "huge bellows of black smoke go out through the roof of the Carver Pavilion."

Stein says someone observed the mass of smoke and "called in a code F" - the security department's term for a fire alarm. The Iowa City Fire Department answered the alarm; the diesel was running fine, no fire.

Though some might view this incident as a goof-up, Stein doesn't.

He says that when the smoke appeared, "I said, 'Hey, has someone called in a code F?' and I said, 'Good. Let's bring them (the fire department) over here.' In the meantime we went and checked it out.

"WE ASSUME it's a fire until we know it isn't," he says. "Our no. 1 priority is our fire protection."

Stein is fond of setting scenarios. "Let me take you up to 6-OR, okay? The sixthfloor operating room. You are undergoing surgery and there's a fire. I want that fire out now. You have no time to worry about that; that's my job. That's very sacred to us."

So sacred that the department conducts fire drills at a frequency of one per unit shift every three months. And possible fires, as Stein says, receive the same treatment as known fires.

"We had a situation in the fall of 1977 in which a cable overheated in a freight elevator and we had 44 people there in 70 seconds," he says.

When there is a code F, Stein explains, safety and security officers "assume command" of the area where the alarm originates until fire department personnel answer the alarm. A "hospital fire brigade," made up of

75 persons from various departments, is trained to deal with fires until the department arrives.

BESIDES ITS FIRE PREVENTION efforts, the department also trains hospital personnel on how to deal with fires and suspected fires.

Stein said that the number of hospital personnel drilled on the use of fire safety the security of the resources and the equipment increased from 2,346 in 1977 to 3,001 in 1978. elevator, and we had 44 people there in 70 seconds." said, adding that 4,000 will have been

trained by the end of the year.

The educational aspects of the department's fire prevention program are not limited to the hospital grounds. Safety and fire training official William Hahn, the department's educational media coordinator, "has seen to the production of three unique fire safety training films for hospitals and clinics," Stein says. The filming is done by the UI Audiovisual Center.

The films are marketed nationally and the proceeds go to the hospitals.

Hahn's film "Protect the Patient" won the 1976 Golden Eagle Award, the highest national award for a film of its kind.

Fire safety may be the department's top priority, but it's not the only priority.

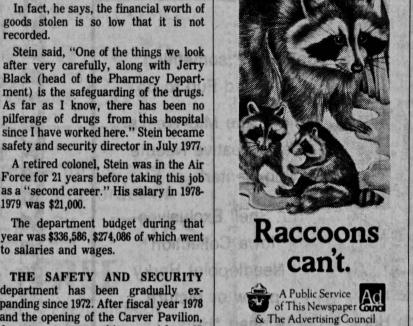

THE DEPARTMENT is also responsible for safety and security throughout the hospitals complex. The

recorded Stein said, "One of the things we look after very carefully, along with Jerry Black (head of the Pharmacy Depart-ment) is the safeguarding of the drugs. As far as I know, there has been no

since I have worked here." Stein became safety and security director in July 1977. A retired colonel, Stein was in the Air Force for 21 years before taking this job as a "second career." His salary in 1978-1979 was \$21,000.

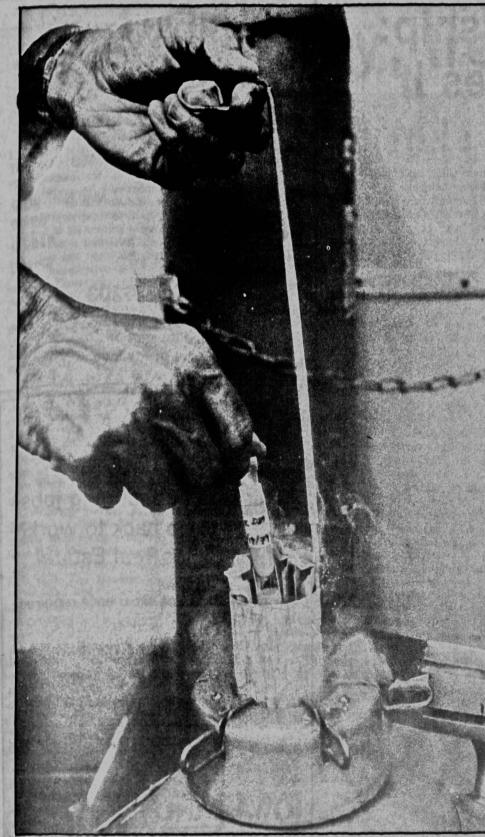

The department budget during that year was \$336,586, \$274,086 of which went to salaries and wages.

THE SAFETY AND SECURITY department has been gradually expanding since 1972. After fiscal year 1978 and the opening of the Carver Pavilion, department personnel increased from 17

UI anesthesiologist shortage limits teaching, doctor says

By STEPHEN HEDGES Staff Writer

RKING

A shortage of anesthesiologists at the UI Hospitals is limiting the amount of research and teaching anesthesiologists can do, a UI doctor says.

"We have enough to cover the clinical load but that's not enough," said Dr. Shiro Shimosato, a UI anesthesiologist. "We start early and stay late — everybody is working very hard in here."

UI anesthesiologists, who also serve as faculty, are not offered enough time for research, he said, which hurts the teaching program. "We have to give each of the staff members the chance to carry an academic career," Shimosato said. "Most of us have a heavy commitment to clinical work and don't have time to do the research."

For the past year the UI Hospitals have been short of anesthesiologists, according to Dr. Mohamed Ghomein, but a decline in general surgeries has eased the burden. "There's a lot of talk about more general surgeries available to people outside of lowa City," he said. "There has been something of a decline in the cases coming to surgery."

NEVERTHELESS, GHOMEIN said the anesthesia staff works more hours than other UI Hospital staffs.

"There isn't enough time for teaching or research," he said. "We start at seven and finish between five and six, and we're on call after that."

There are currently 20 anesthesiologists on staff at the UI Hospitals. Dr. John Eckstein, dean of the UI College of Medicine, says the department should have five to eight more anesthesiologists in the future. Eckstein added that shortages have hit other areas besides anesthesiology.

"There are shortages in a lot of departments," he said. "The Department of Anesthesia is larger than it's ever been. The department is perhaps pressed but no more so than any other departments." Eckstein said the UI is hiring three more anesthesiologists later this summer, but that "We're constantly fighting the competition from other medical schools for faculty.

"Anesthesiology is becoming more popular, and particularily here," he said. "We're finding more and more students that are talking about taking interns and residencies here."

Ghomein says the long hours and low salaries make it difficult to draw more faculty members.

"THE SALARIES we get are certainly not comparable with other private institutions or other hospitals in the Big Ten," Ghomein said. "I think it comes down to salaries. People can find better salaries in private practices or at other universities outside of Iowa."

Both Ghomein and Shimosato said the anesthesiologists shortage is a national problem, not just limited to the UI.

problem, not just limited to the UI. "We would like to get more people," Ghomein said, but added, "this is a common problem in the nation." The UI's shortage may be slight compared with other hospitals, he said.

"(The shortage is) distributed by region mostly," said Dr. Richard Ament, chairman of the American Society of Anesthesiologists' manpower committee. Ament explained that in the more populated regions, namely the Western and Northeastern United States, anesthesiologists are abundant because there are more patients and doctors in those areas.

But the Midwest, he said, has more 100bed hospitals, which are mostly staffed by anesthesia nurses under the supervision of one anesthesiologist.

The number of medical students electing to go into anesthesiology has remained stable for the last four years, he said. Approximately 4 percent of all medical school graduates become anesthesiologists. Ament said the ASA is actively recruiting more students.

"We offer a summer program in which 600 med students in different regions are assigned to programs to acquaint them with anethesiology," the Buffalo, N.Y. doctor said.

Ament also said that more popular medical specialties have become saturated, which might sway more medical students toward becoming anesthesiologists.

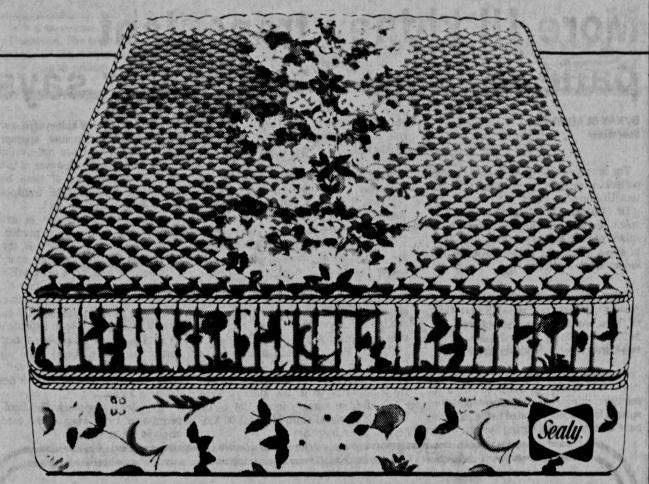

"We see that with trainees they are starting to go out in secondary communities since positions are less available in larger cities at the moment," he said. Ament admits that in some areas salaries may be lower than normal, but said, "It varies. I think an anesthesiologist who is in a busy practice can make a comfortable income just as other specialists do."

Ghomein says although the salaries may be higher in private practice, the work is a still hard.

"Even in a private practice you have to work long hours," he said. "There's a lot of stress, long hours, and a lot of responsibility, even for younger doctors."

More UI kidney transplant patients surviving, doctor says

By KAY BLACHINSKY Staff Write

The survival rate of kidney transplant patients is steadily increasing, according to a UI doctor.

Dr. Robert Corry, director of transplantation at UI Hospitals, says transplant success has been rising, especially in cases where the patient receives the kidney from a relative.

Since November 1973, 375 kidney transplants have been performed in Iowa City. Of these, one third of the patients received kidneys from living, related donors, while two-thirds received cadaver kidneys.

Corry said transplant success is greatest when the kidney is received from a relative, citing that 85 percent of transplants from donors related to the patients have been successful during the past three years. There has been a 60 percent success rate for patients receiving cadaver kid-

"THIS LOW mortality rate is encouraging, particularly since we are accepting a higher percentage of recipients considered to be in the 'poor risk' category," Corry said.

Patients regarded as poor risks, he said, are those with diabetes, irreversible kidney failure, or over 50 years old.

In June, there were 80 patients at UI Hospitals on a waiting list for cadaver kidneys. Corry said the number of available cadaver kidneys has remained. stable in recent years.

The UI has received some kidneys through the United Network Organ Sharing System. Corry said that of the last 100 transplants, 30 of the kidneys were received from outside Iowa. But a UI Hospitals retrieval team has sent 30 kidneys to other hospitals.

"THE EXPORT of kidneys from our own program occurs because appropriately matched recipients are not available in Iowa," Corry said. "However, it is best to decrease the amount of time between kidney removal and the transplant as much as possible," he said.

The Daily Iowan/Bill Olmstee

Corry said an increase in available cadaver kidneys in Iowa is needed. "The more public awareness there is, the more likely organ donation will increase."

To become a donor, a person fills out a donor card provided by the National Kidney Foundation. The prospective donor must have two witnesses sign the card. In Iowa it is also possible to indicate on the back of a driver's license, a desire to donate a kidney. Corry said the UI Hospitals Transplantation Center urges donors to inform relatives of their desire to donate a kidney.

"We always approach the family for permission, even when donor cards are involved," Corry said.

The patient comes first at the **UI Hospitals Emergency** Treatment Center. Paperwork comes second.

An incoming emergency patient is whisked through an enclosed receiving area directly into one of six trauma rooms; registration is completed after the crisis has been met, Joe Tye, administrative associate for UI Emergency Medical Services, explained.

The trauma room used depends upon the type of emergency, according to Esther Kalb, clinical nurse specialist III.

One trauma room is for cardiac problems. This room is ready for use as a radioactive decontamination unit and can, if necessary be entirely sealed off, Kalb said.

Drug overdose and poison cases are treated in a second room. The trauma rooms can be used interchangeably, Tye said. Emergency medical equipjobs? ment is available in each vork? trauma room along with "all the supplies that could possibly be needed in a 24 hour period," Kalb said. The supplies are inventoried and replenished equired

al

daily, she added. X-ray equipment and a "cast room" for setting broken bones are near the trauma rooms, along with an elevator to quickly transport patients to surgery. A special key is used to summon the elevator immediately and block its further use until the patient is transferred.

THAN 15,000 MORE emergency and trauma victims are admitted to the emergency treatment center per year, transported by air, ambulance or private car.

In its first 11 weeks of operation, the UI emergency Air-care helicopter made 142 flights and carried 150 patients, Tye said. "Ten of those flights were made directly to the scene of an emergency," he added. The helicopter is airborne

within five minutes of a spatch, which comes after a direct request for the service to the Emergency Communication Center or after a consultation via a telephone "patch" between a doctor and a UI Hospitals staff physician, Tye

The service costs the UI \$24,000 per month and is financed "strictly through patient charges," Tye said. "No federal grant money and no state appropriations" will be used. The charge for the service is 15 to 25 percent higher than most ground ambulances, but the air-care may be worth the additional expense.

"THERE ARE A NUMBER of cases in which it is pretty clear that the patient would have died or would have had a much worse outcome had the helicopter not been available," Tye said.

Recently, an individual had a heart attack in an outlying communnity. An ambulance was summoned and CPR (cardiopulmonary resuscitation) was applied. The ambulance called the Emergency **Communications Center and the** helicopter was dispatched," he said. "The two nurses on board the helicopter and the two ambulance attendants were able to stabilize the patient at the scene, who was then flown to the UI Hospitals. Two or three years ago that patient's chances would have been very minimal. This is an instance where the whole system worked."

Previously, air ambulance service had been provided by the National Guard in Waterloo, Tye said. "They deserve a lot of credit. They started it back in 1970 as a community service and would come from their homes and would bring the nurses from the referring hospitals."

The guard no longer routinely offers air ambulance service, but serves as a back-up if needed by the hospital, Tye said.

A NEW Mobile Critical Care Unit supplements emergency service. The van, which was purchased, in part, by a \$50,000 gift from the UI Hospitals Volunteer Program, will serve as a back-up for the air-care service and will be the primary vehicle for emergency neonatal transport.

> **Emergency Medical Services** is also involved in medical education. An EMS library houses one of two \$15,000 computers used for medical education. The other unit is

program received with the

computer dealt with deter-

mining trajectories, he said.

Two trained flight nurses are on board, and in 10 percent of cases, a trauma surgeon makes the flight. The Air-care helicopter maintains communication with

> Center, he said. The helicopter is available through a "service agreement" with Aviation Medical Services of Houston, Tye said. "They provide the aviation, the pilots, and a mechanic; the hospital provides the medical care," he

Emergency Communication

Resources

the

community," Rolfson said. Much of the department's work entails

keeping up with the available resources. Since 90 percent of the patients at UI Hospitals live outside Johnson County, social service must deal with hundreds of agencies throughout the state, and be aware of the data and services those gencies offer.

"IN THE AREA of discharge planning, we've recently developed a post-hospital care planning unit and one of the functions of that unit is to try to keep track of all the resources and all the information that's needed just in the area of discharge planning," Rolfson said.

Despite rising hospital costs, Rolfson said the financial problems of patients have not placed increasing demands on his department. "It's always been a very significant part," he said. "We deal with a lot of patients whose finances are a problem, but I think in many ways there are more resources available for them now than there were several years ago."

MEETING THE patients' emotional needs involves counseling. "People who are affected by any type of illness go through some adjustment process. We assist them in working through that process," Rolfson explained. "And we also work with the family, because rarely does an illness just affect the patient; it ob-viously affects the family."

The process of meeting emotional needs involves working with the medical staff as well as the patient. "Part of our role is to help understand the patient and to assist in terms of the staff understanding of what the patient's social-emotional needs may be," Rolfson said.

ete

VISA

"It's unrealistic to expect the doctors to be able to do everything, as perhaps they did years ago," Rolfson asserted. "The doctors are obviously trained in their particular area of medicine. It is very unrealistic to assume that doctors should know all the community resources, know

all the kinds of things we have to offer, and so I think they rely a lot on us."

PATIENTS, TOO, depend on social service during their hospitalization. "In many ways, being hospitalized represents a crisis. And most patients recognize the need for some kind of help in dealing with this crisis," he said.

Occasionally, social service personnel find they must counteract the "social

worker" stereotype. Social workhas been sterotyped as being public welfare, or, in the medical setting, as discharge planning. We have to work on responding to those stereotypes. People automatically think 'public welfare worker.' I think a lot of patients don't realize that's not the case.'

THE SPIRITUAL needs of patients are the responsibility of the six chaplains and four trainees of the Department of **Pastoral Service.**

Director Dr. David Belgum said that the need for pastoral service is pronounced at large, tertiary facilities such as UI Hospitals:

"The rationale for having chaplaincy is that many of the persons are far from home, far from their home altar and pew and pastoral resource, and are lonely and lost in this big place." When there is a need for moral or spiritual comfort, the pastoral service intervenes to "help to humanize, to personalize, the patient's hospital experience."

The pastoral service aids patients in dealing with problems about values and the meaning of life, anxieties about illness and fears about death. More specifically, it offers baptism, communion, confession, annointing — whatever a patient's tradition allows or requires.

IN ADDITION to serving individual patients, the department also conducts two religious services each Sunday — an ecumenical service in the morning and a Roman Catholic mass in the afternoon. Chaplain John Saeger, who is in charge of the chaplain trainees, also conducts a

support group for cancer patients, where they may share their feelings and help one another cope with the affliction.

Belgum said it is a misconception that when faced with a crisis such as a serious illness, people suddenly "get religion."

"My assumption is that people make use of the religious resources they already have. By and large, people do not make dramatic changes. Occasionally a person is challenged to marshal their resources in a new way and may surprise people with an inner strength others didn't know they had.'

BELGUM FINDS that the chaplain's role is accepted by the medical staff. "A given staff member may say, 'I don't have this need, but if this patient has this need, I think we ought to meet that.' '

Belgum traced this attitude to a growing awareness among doctors of the need to treat the whole person. He said doctors are communicating more with patients and "doctors are quite open to the idea that a destructive attitude or self-destroying guilt feelings doesn't foster good health or good motivation for rehabilitation. Then you have the doctor versus the patient and the disease."

In fact, medical personnel sometimes avail themselves of the counseling of Pastoral Service in dealing with moral dilemmas, according to Belgum. "The field of medical ethics has come to the fore lately because of the dilemnas created by the capacity to carry out more treatment than might be appropriate. If you have the capacity to do too much, then you have to make a decision. In 1910, a doctor didn't have that problem, because there wasn't much chance to do too much. Now these people operate under a tremendous load of stress, and it can be a pretty lonely thing standing there making these decisions."

A spirit of cooperation and mutual support appears to be reaping benefit. Patient Representative Margaret Nusser reported, "I hear many more people saying, 'I was scared to death to come to this great big place, but it's more personal than I ever thought it could be."

Coping with the modern world isn't always easy, but usually those in need of help have no where to turn. In Iowa City, though, two agencies are ready when problems seem to overwhelm. The UI Counseling Service, located in the Union, is designed to specifically help UI students, staff and faculty. The Crisis Center is open to anyone, but faces special problems of its own because it is a referral agency.

Page 3

At first glance, the UI Union is a block-square building that houses numerous lounges and meeting rooms, two ballrooms, an information desk and a bookstore. But a closer look reveals organizations and offices designed to serve students, a craft center hidden in the basement

Dr. John Singer says that at any one time, 10 percent of the population could benefit from talking with a psychiatrist or other counselor. And while the figure is constant, today's 10 percent could be entirely different from next month's group.

"So what does that mean?" he asked. "It means that many people are coming in and out of adjustment situations where they at one time need help or at another time do not need help. So there isn't any hard and fast rule to pick out who should go to see a psychiatrist."

Singer is the UI Student Health Service's staff psychiatrist. He provides confidential and free aid to students who have found themselves under various sorts of stress — for some the result of a bad day; for others the last straw.

"It's a confusing word, and usually stress is thought of in physical terms, as a here and now type of stress," Singer said. "Sort of like the person who's lifting 100 pounds. He's under stress. As soon as he puts the weight down he's free from stress.

"Psychological stress, on the other hand, is more easily defined as anticipatory in nature because what you're really doing is having a stressful experience thinking about something in the future, a threatening experience."

Singer said "stress" is a general term. Psychiatrists and

psychologists better understand "anxiety," he said.

"With anxiety, a lot of times you think of it in physiological terms," he said. "Anxiety produces an increased pulse rate, sweating of the palms, tightness in the stomach. Animals have the hair come up on their backs. Those are physiological parameters of anxiety.

"Anxiety is probably the most uncomfortable experience in the whole human repertoire. And the worst kind of anxiety or psychological stress for a human is anticipatory anxiety — anticipating a situation that is in some way threatening."

He said physical illness is sometimes correlated with anxiety. Stress can trigger ulcers, skin conditions, hypertension and allergic reactions such as asthma attacks.

"Then indirectly over a long period of time, hypertension is related with heart trouble, kidney trouble and stroke, so there are a lot of things that are made worse by or are the direct result of anxiety," Singer said.

"Anxiety itself, just pure anxiety, is really a disability. It causes difficult memory and loss of energy and a loss of motivation. Just a bad feeling, a sort of ominous feeling, an impending doom feeling."

Singer said students are often fall prey to stress and its physical effects around exam periods — with finals usually one to two weeks

See Stress, page 98

and some not-sohidden problems among them a space shortage.

Page 4

Campus Ministries abound at the UI — and seem determined to help. They offer clothing and food to the needy, conduct special programs to help new residents adjust to Iowa City and often hold worship services. But even more important than the material or the spiritual, says one person working with a campus ministry, is the sense of community built by people working together.

Page 5

Attending college is becoming a big bucks business, and only those who know how to get the money survive. Last year, 9,500 UI students found survival easier because of student financial aids. Money pours into the UI from the federal and state governments, from services offered by the university and from thousands of private contributors. Knowing what is available, where to look and how to qualify can make the difference.

Page 7

Area residents, accustomed to too few parking spaces in the Iowa City area, have long known what high gasoline prices and long service station lines are teaching the rest of the world — it's easier to take the bus. In the Iowa City area, John Q. and Jane Z. Public discover, riding the bus is especially easy because of low rates, an abundance of routes and convenient schedules.

Page 2B-The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979

ASWADERIO (TERT) SHOL OHS AND Crisis counselors: ready to help when problems overwhelm

By MARY F. ADAMS Staff Writer

There's something for time staff members and 100 everyone at the UI. Sometimes volunteers. There are five shifts it gets to be too much.

When personal problems overwhelm the student, several counseling services stand ready to lend an empathetic ear and offer guidance.

Two of these are the Crisis Center, 1121/2 E. Washington St., and the UI Counseling Service at the Union.

The Counseling Service is open from 8 a.m. to 5 p.m., Monday through Friday. In general, the service is available only to registered UI students, according to Ursula Delworth, director of the service.

THE CRISIS Center is open from 11 a.m. until 2 a.m. of the following morning and is available to anyone. "That's 15 hours we're available for walkins," said Kay Duncan, director of the center. "And we're available by phone 24 hours a day."

The center was founded in 1970. "The primary motivation for starting was suicide prevention and a concern that there was no place for people to get help after hours, when other agencies were closed, and on the weekends." explained Duncan.

The Counseling Service exists rimarily for college students.

analyze psychological tests, activities." Another 500 people are reached by workshops in The Crisis Center has two full-

per day with two persons working each shift. In addition, there is an "on-call" individual who can be reached by phone or a beeper in emergency situations. All personnel have been given 50 hours of training in counseling skills, according to Duncan.

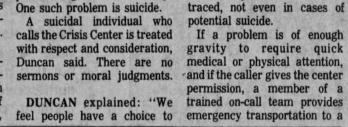

We do our own training," she said. "Staff and volunteers, who themselves went through the training program, provide the training." This consists of "lots of role playing," specific intervention techniques and 'learning what other resources are available in the com-

munity," according to Duncan. SINCE THE center's inception, the tone of the counseling has evolved from an "emphasis on spending a lot of time conveying understanding,

career choices, interpersonal relationships, study skills and coping with test anxiety. "Hundreds more," she said, come in contact with the service through short consultations in

the residence halls. Both the Crisis Center and the Counseling Service help individuals deal with a variety of problems: loneliness, depression, drug or alcohol abuse, academic problems anything that is causing the

individual stress. However, at the Crisis Center, which had over 6,000 contacts last year, some problems present a greater immediacy. One such problem is suicide. calls the Crisis Center is treated

No one is "We have a very good relationship with Dr. Singer. ever asked to give her or his name. No phone calls are ever "The Counseling Service is the other half of the mental health service of Student Health. So we are on both sides of the river," she said.

In addition to individual counseling, Delworth said, the Counseling Service also offers group therapy, for example, when a person is experiencing interpersonal difficulties.

THIS GIVES persons a chance to "work things out and get feedback from other members of the staff," she said. "People are concerned about their relationships with other people, and a group is often the best and most immediate way to work on those issues."

Feedback is what the staff members at the Crisis Center

UI ministries: a myriad of spiritual, social help

By KEVIN WYMORE Staff Writer

"My brothers, what use is it for a man to say he has faith when he does nothing to show it? Suppose a brother or sister is in rags with not enough food for the day and one of you says, "Good luck to you, keep yourselves warm and have plenty to eat," but does nothing to supply their bodily needs, what is the good of that? So with faith, if it does not lead to action, it is in itself a lifeless thing. -James 2:14-17

Judging from the array of services offered by UI campus ministries, the bibical injunction to clothe the naked and feed the hungry seems to be taken seriously in Iowa City. Not only is there a free clothing center located in the Catholic Student Center and low-cost Sunday evening meals offered by the Wesley Foundation, but a myriad of other services, spiritual and social, are offered by area campus ministers.

"Ministry is caring for people," asserted Jo Hoover, assistant director of the Wesley Foundation, "but people attach the connotation of ministries to ministers."

THE WESLEY Foundation, run by the United Methodist Church, and the Catholic Student Center, financed largely through the Archdiocese of Davenport, are two of the larger campus ministries.

Eleven organizations make up the Association of Campus Ministers: the American Baptist Student Center, 230 N. Clinton St.; B'nai B'rith Hillel Foundation, 122 E. Market St.; the Catholic Student Center, 104 E. Jefferson St.; Christian Reformed Campus Ministry, 120 N. Dubuque St.; Episcopal Chaplaincy, 120 N. Dubuque St.; First Mennonite Campus Ministry, 405 Myrtle Ave.; Friends House, 311 N. Linn St.; Lutheran Campus Ministry, 26 E. Market St.; St. Paul Chapel and University Center, 404 E. Jefferson St; Unitarian Universalist Society, 10 S. Gilbert St.; United Ministries in Higher Education, 707 Melrose Ave.; and the Wesley Foundation, 120 N. Dubuque St.

Surviving tuition: student financial aids

By STEPHEN HEDGES Staff Writer

It is hard to get through college without money; everyone gets it one way or another. For over 9,500 students, one of those ways is financial aid. In 1977-78 the UI awarded almost \$20

department may supplement up to 80 percent of a student's wage with federal work-study funds, freeing departmental funds for other wages and projects. "The number of students in work-study

is controlled strictly by number of dollars we have," Moore said. "If they (students) want to qualify for work-study, they have

"The work program is for a student who just wants to work and who just needs some supplemental income, no strings attached."

application.'

each state, Moore said.

million in grants, scholarships, loans and UI student work money, according to John Moore, director of student financial aids. Student work, Moore said, is the by far the most popular form of aid. Last year almost 6,000 students earned more than \$5 million in wages as part-time UI em-

"The work program is for a student who just wants to work, and who just needs some supplemental income, no strings attatched," Moore said.

UNDER THE student work program, each department pays students out of its own budget. If the student qualifies, a

to show need and fill out a financial aid

Last year the UI applied for \$2 million in

federal work-study money and was awarded \$800,000. The federal government

allocates work-study funds to states based

on the number of students and schools in

whole year, so we do have work-study

LAST YEAR the UI received more work-

study money than any Iowa college or

university, according to John Kundel,

assistant director of financial aids. In 1979-

throughout the year," Moore said.

"We try to spend it all throughout the

80, he added, the UI will probably get more

"Tentatively we've been allocated \$1.2 million," Kundel said. "But until we get the final award letter, we don't absolutely know what we're going to get."

In 1978-79 the work-study money ran out, Kundel said, and to keep the program going, the UI supplemented the federal funds with its own money. But because of the next year's anticipated \$400,000 increase in federal money, he said, the UI does not plan to supplement funds again.

THE FEDERAL government also provides aid for students through Basic Educational Opportunity Grants and a supplemental grants program. Last year these programs accounted for more than \$2 million in aid for more than 2,500 students.

BEOG grants are often awarded to students coming from lower- or middleincome families, Moore said.

"After you're given a basic grant and loans, if there is still a need for more assistance, you can go to a supplemental program," Moore said.

OF ALL the financial aids, scholarships are probably the most difficult to obtain.

The UI offers federally funded general student aid scholarships, which are based on a student's academic acheivement and financial need.

'We use sort of a scale," Moore said. Entering students must have graduated in the upper one-fourth of their high school

The federal government provides aid for students through Basic Educational Opportunity Grants and a supplemental grants program. Last year these programs accounted for more than \$2 million in aid for more than 2,500 students. "We deal with an awareness of the college student's development - predictable and normal kinds of development. The theories of the development of the college student underlie much of our work."

class, have a score of 28 or higher on the American College Testing program entrance exams, fill out a financial statement and demonstrate they have need. "Everyone who applies is ranked in

descending order," he said. "And then we go from the top until we run out of money."

SCHOLARSHIPS are also awarded from the UI's own funds, which include donations, money from the state legislature, income from UI contracted

services, grants, other miscellaneous income and funds taken from student tuition. The criteria for the UI scholarships is also academic achievement and financial need.

Last year approximately 10 percent of

student tuition went to the scholarshi fund, according to Randall Bezanson, acting vice president for finance. Bezanson said the amount of money allocated to the scholarship fund each year is "part of our budgeting process we spend the money we get."

Each department also has its own list of scholarships, and last year the State of Iowa awarded 139 UI students \$71,905. Students with incomes up to \$20,000 may be eligable for state scholarship money, Moore said

Additional funds are provided by private donors, corporations and citizens groups, Moore said. The financial aid office handles indirectly approximately \$700,000 in "outside scholarships," Moore said.

Trust charges \$2.

By TOM SEERY Staff Writer

One of the first problems that confronts any new UI student is money. Even students who come to Iowa City with pocketfulls of summer-job money may face a problem: where to put it. The student can, of course, choose to leave his funds in his hometown bank or savings and loan association. But after a few weeks of trying to cash out-oftown checks or writing home for money, many students find that system inconvenient at best.

So most bring their money with them to Iowa City and deposit it in a local bank. But choosing a bank in a new town is often a rather arbitrary decision on the part of most students. After all, aren't most banks the same? In Iowa City, the answer is both yes

three charge \$2 per overdraft. THE THREE downtown banks are the First National Bank, 204 E. Washington St.; Hawkeye State Bank, 229 S. Dubuque St.; and Iowa State Bank and Trust Co., 102 S Dubuque St.

EACH OF THE three banks allow students to close their checking accounts during the summer, then pick up the same account again in the fall When surveyed in June, all three without having to pay service charges during the summer months. This allows the student to avoid standing in the same line every fall, waiting to open a

Bank and Trust offer this service, and both have 24-hour terminals located downtown.

ONE FINAL factor that may affect the choice of bank is its various locations around town. In addition to their downtown offices, each of the three banks has at least one branch office.

Iowa State Bank and Trust has branches located at the Keokuk Street-Highway 6 bypass, at First Avenue in Coralville and at 325 S. Clinton St. First National Bank has a drive-in office downtown and branches at Towncrest and at 10th Avenue in Coralville. Hawkeye State Bank has a branch office located in the Mall Shopping

Ul's career placement centers teach students to find jobs

By LIZ ISHAM Staff Writer

UI career placement centers do more than just introduce students and alumni to job possibilities. According to one director, they are also a training ser-

"We teach the student how to find a job and plan for their career," said Elizabeth Erickson, assistant director for placement at the UI Career Services and Placement Center, located in the Unior

"We talk to various groups before they're ready to look for a job," said Judith Hendershot, director of the Educational Placement Office, which places students and alumni in library science and education. "We want them to be thinking about their careers early before it's time to look.'

ERICKSON SAID the Career Services has a resource center with material "on all kinds of careers and jobs." Information on how to write a resume, conduct a job search and tapes on interviewing are also available. Similar information can also be found at the Educational Placement Office, located in East Hall.

On-the-job work experience is available through Career Services' cooperative education service. Open to all students except freshmen, the service helps students find career related work.

Although it "may take two to three semesters longer for the student to finish (her or his degree)," Erickson said, "it's a wonderful opportunity for the student to get work experience.'

SENIORS, graduate students and

alumni may register for Career Services' job placement service, which allows them to attend job search and interviewing skills seminars and oncampus interviews with employers held each spring and fall. They also receive a weekly bulletin listing job openings and can be included in a student reference file, Erickson said.

"If you're really looking for a job, you ought to be registered," Hendershot said. The Educational Placement Office also offers a file for resumes and other placement information, a weekly job-opening bulletin and on-campus interviews to all registered students and alumni

At Career Services, Erickson said, 4,000 to 5,000 students are assisted each year. Of the 723 who registered last year, 426 found a job, 30 went on to graduate school, 10 went into another

field, 48 are still looking for a job and 209 did not answer the Career Services questionnaire, she said.

OF 2,500 applicants registered with the Educational Placement Office last year, Hendershot said, 70 percent were placed in teaching or teaching related fields, 13 percent went into another kind of work, and 7 percent went back to school. Only 10 percent are still looking for a job, she said. Although "we try to help anybody who walks in," Erickson said, Career

Services handles job opportunities mainly for those students in the College of Liberal Arts and the College of Business.

Individual colleges and departments may also have their own placement offices and sponsor interviews between students and potential employers.

328 S. Clinton (1/2 block south of Burlington) Mon-Fri 9-5

Warranty & Service

All units we sell are covered by the manufacturer's warranty on parts and labor which we honor through our store. If you have problems with any of your components during the warranty period, simply bring the unit or units to us for repair. If your unit can't be fixed right away, we'll loan you a unit so you won't be without music while the service is being performed. You won't spend a dime for service and you won't be without music at The Stereo Shop.

• Trade-Ins

If you trade in a unit purchased at The Stereo Shop, we will guarantee at least 80 per cent of the original purchase price back within the first year. (Providing the equipment is still in excellent condition.) We also welcome older trade-ins and give fair prices to allow you to upgrade your system.

Exchange on Defective Units

If any of our components fail to operate in the first couple weeks, bring it back and we'll replace it with a new one, providing you bring in the defective unit along with all boxes, packing and unfilled warranty cards.

Getting Everything Together

Before you leave the store with a stereo system, we'll furnish speaker wire and complete instructions to assist you in hooking up your stereo gear. If you wish, we will deliver and set-up the system in your home or dorm free of charge.

• We Encourage Browsers

Hours:

Sat 10 - 4:30

Mon & Thurs 11 - 9

Tues, Wed, Fri 11 - 5:30

We like to have people stop in, look around and pick up literature on new equipment. And of course you're welcome to bring your favorite records to use to compare speakers and other equipment.

Consignment

We offer a consignment service for items we wouldn't normally take on trade. We'll sell your unit for you and turn the cash over to you.

Home Trial

Above all we want you to be happy with the stereo system you purchase from us. We encourage our customers to try a system in this home before making a final decision on the specific components. If it doesn't meet your needs, bring it back along with all packing material and warranty cards and we'll help find the right equipment for you.

• Free Stylus Inspection

The Stereo Shop wants to give added peace of mind about your component system, especially one of the parts that most people forget ... until it's too late ... the stylus. Bring your stylus or cartridge in at any time and we'll examine the stylus for wear at no charge to you.

• Fair Comparisons

Contrary to what is commonly believed choosing speakers does not have to be confusing. We at The Stereo Shop have a unique speaker comparator. This unit in no way alters the sound quality of the speakers, it simply allows you to compare speakers at exactly the same volume level.

Knowledgable Sales Persons

The people who work at The Stereo Shop are highly trained and genuinely interested in quality hi-fidelity stereo equipment. Our goal is to give you the best stereo system possible for the money you wish to spend.

• Equipment Clinics and Seminars

Several times during the year we offer a free cartridge and turntable clinic. We also do seminars and clinics on speakers and electronics. Watch the Daily Iowan for announcements of clinics.

• Ways to Pay

The Stereo Shop accepts Mastercharge and Bank Americard charge cards. Or you can pay by cash or check, and bank financing is available through the store.

We specialize in quality high-fidelity components from:

Advent - ADC - APT - BIC - Dalquist **Discwasher - Genesis - JBL - Maxell - Ortofon Pioneer - Shure - Sony - Yamaha**

By LIZ MILLER Staff Writer

> When the show ended at the Mall Shopping Center theater, John Q. and Jane Z. Public scurried through a pouring rain to Old Faithful, their 1939 Chevrolet truck, but found Old Faithful faithless. John Q. peered into the gas

tank and said, "It's full." Jane Z. lifted the hood, checked things out and shrugged.

"What will we do?" John Q. wailed. "We're miles from home.'

"THE BUS!" Jane Z. exclaimed as a red and silver Iowa City Transit bus lumbered through the parking lot to the mall entrance. The Publics ran to catch it.

"Can we get to Coralville on this bus?" John Q. asked. "You have to transfer

downtown," the bus driver said. The Publics dug into their jean pockets and found the requisite 25-cent fares. The driver gave them two transfers to the Coralville bus.

The Iowa City Transit,

Coralville Transit and Cambus systems converge downtown at the corner of Washington and Clinton streets. From there they serve their specific and often overlapping areas.

The wheels

that move

Iowa City:

our buses

Hugh Mose said the three this year. systems cooperate with each other a great deal. The directors meet regularly, exchange ideas and work jointly, he said, but the systems are administered separately.

Until November 1977, Iowa Iowa City buses. City Transit operated only during the day, Mose said, but with the addition of service until

approximately 10 p.m., the number of riders increased substantially. The increase was due more to an increase in the number of daytime riders, he said, than to the number of

passengers carried at night. Perhaps people are more aware of bus service, noticing buses operating at night, Mose said. And those who take the bus at night probably take it during the day to get to work or school in the first place.

BAD WEATHER encourages Iowa City Transit except for

bus use, too, Mose said. The last two winters were unusually severe, and that contributed to the jump in the number of

ITAN CASE

passengers since November 1977. He estimated that 1.7 million passengers would be IOWA CITY Transit Director carried by the Iowa City Transit

Elderly and; handicapped people can ride the Iowa City buses free, and children under five, if accompanied by an adult, can also ride free. Passes are available for Coralville and

Iowa City Transit operates six round-trip routes. Downtown each bus changes its name and direction to run the other half of its route. The Mall bus that John Q. and Jane Z. were on became the Rochester bus and headed east for the second part of the route.

IOWA CITY Transit is funded by fares and governmennt subsidies. Local government pays the lion's share of the subsidies, and state and federal revenue-sharing money pays a part of the system's needs. No direct federal funds are used by

capital items including new buses, Mose said. of the money the transit system needs, Mose said. The Iowa City

Council wants to keep fares low so that bus service remains a real service to the public, he

THE PUBLICS stood in the

shelter on the corner, deciding what to do next. "Where can we get a bus to Coralville?" Jane Z. asked the person sitting beside her.

'There," she was told. "Which bus?" Jane Z. asked.

'The blue bus. The yellow and black buses are Cambus although 10 cents less is buses."

CAMBUS is a UI-owned and student-operated bus system. 21st Street on this bus?" John Q. Service is provided Monday through Friday except UI holidays, and service is reduced on some routes during the summer session and between sessions.

routes run in opposite directions around the main campus from 6 Route goes from the main and ends at 12:30 a.m. in

campus to Hawkeye Apartments, Hawkeye Court and Fares provide only 40 percent Hawkeye Drive during the evening Pentacrest buses are a direct shuttle between the UI

Used bookstores an alternative to long lines and big bills

By TOM TUDOR Staff Writer

UI students shopping for textbooks generally restrict their search to the two large, centrally located stores, the Union Bookstore and Iowa Book and Supply Co.

Both stores are well-stocked, convenient and large enough to carry a wide variety of texts as well as leisure reading materials.

But there are alternatives to the early-semester lines at the cash registers and the totals those cash registers finally ring

The Collegiate Associations Council Book Co-op, located on the main floor of the Union. offers a broad selection of used texts, both paperback and hardbound.

THE CO-OP takes textbooks on consignment, allowing contributors to price the books they bring in, but competition for sales keeps prices at about 50 percent of the new purchase price.

According to Diane Sieman, director of the co-op, selections are excellent for literature, history and most sciences.

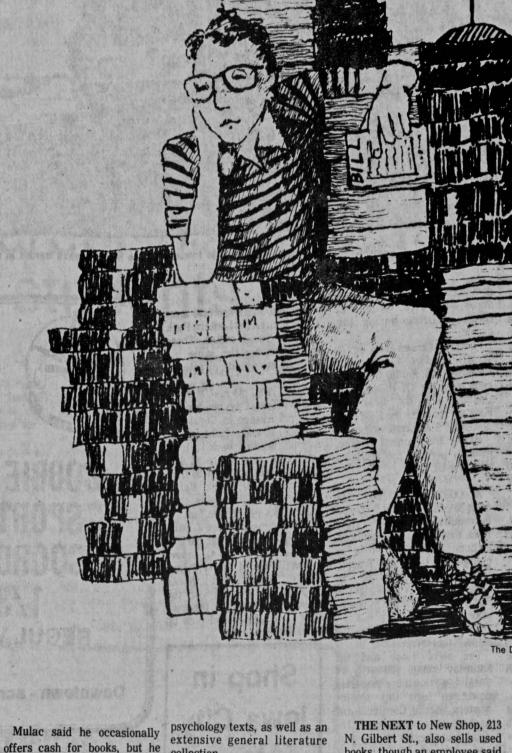

"The stuff we don't have is engineering and art texts - the kind of books people keep," Sieman said.

Because the co-op store is small, its operation is moved to the Hawkeye Room during the first part of the spring and fall semesters.

SIEMAN SAID the proceeds from the co-op's operation go to the CAC's scholarship fund. The co-op also sells lecture notes for some core courses during the spring and fall semesters, Sieman said.

The co-op will accept books any time during the school year. But the consignment contract used by the co-op states that books unsold and unclaimed by April 15 each year will belong to CAC

Two book shops within easy walking distance of the downtown also offer bargains for economy-minded students, although neither shop deals exclusively in texts used in UI

books, though an employee said most of the books are paperbacks, not textbooks. The "We have a section or subpaperbacks sell for an average section for almost any depart-

"In my own experience I often think that students have a lot more difficulty now than I did," he said. "I was in school in the late '30s and early '40s and we at that time could be more singular in our purpose. My group of people grew up in the depression years so we knew, or thought we knew, our main goal was to find financial security.

"I THINK that kids in school now have a more diffuse kind of challenge and it's hard to know what the challenge is and how you want to respond to it. So I suppose in that sense you could say it is difficult to be a student now. There's an overkill of possibilities, data and news that's constantly being flooded

The stress that students feel doesn't always end with graduation. Singer said some of the students he works with have problems because they are highly trained in areas that have few job opportunities. Careful decisions should be made early to insure that college is what the student really desires, he said. "And then you should decide

where you want to go and for what reason, and tie that into what the economy is asking for or what society really needs," he said. "Sometimes that answer

doesn't tally at all with what the

To prevent stress, students should "order" their day to include four elements: hard work, leisure, social interaction and physical exercise.

individual is interested in or what he wants to do for himself. That's the problem for a lot of kids — to just work and work and work and then not find a job and be well-qualified."

SINGER SAID the majority

"I think that kids in school now have a more diffuse kind of challenge, and it's hard to know what the challenge is and how you want to respond to it. So I suppose in that sense you could say it is difficult to be a student now. There's an overkill of possibilities, data and news that's constantly being flooded now."

other Student Health physicians fall into two categories.

Some are students who, before coming to the UI, had difficulties stemming from personality problems, and for whom school becomes an additional stress. "So the university situation itself isn't necessarily what brings the student to see a psychiatrist," he said. "But oftentimes it's the

straw that breaks the camel's back."

A smaller segment are troubled because their expectations exceed what the UI has to offer or what their own oapabilities are.

"You see some students who are here to please their parents or they're here for some reason other than their own idea about advanced education," Singer said. "In that situation they get into difficulty with motivation. It's hard to get up and go to class in the morning. They skip classes. They begin to do poorly academically, and then the whole thing becomes trouble."

SINGER SAID that he usually tries to limit what the student works toward to what will enable the student to finish a semester or a year or to get a degree, for example, "and then work tangentially with any other problems that seem to be

getting in the way." To help prevent stress problems, Singer suggests, students should "order their day" to include four elements: hard work, leisure, social interaction and physical exercise.

"It makes a rhythm," he said. "It's not humdrum. Then there's the rhythm of the week.

You do something for five days, then the other two you do something different.

"Of course, there are other rhythms, too. Seasonal rhythms, holiday periods, vacations. And I think it's designing that kind of rhythm between com-

Page 10B-The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979 Dealing with local government agencies: Where to go to get what you need

By ROD BOSHART Staff Writer

Although most students coming into the Iowa City area try to minimize their contact with local governmental agencies and authorities, a certain amount of interaction is unavoidable.

The following is a capsulized listing of some of the governmental agencies, services and duties you may need to be aware

With four positions on the Iowa City Council to be filled in the November election, one of the first things you may wish to do is register to vote in Johnson County. Anyone 18 years or older by election day may register.

YOU MAY register at the auditor's office

If you own a motor vehicle, you are required to license your car in Johnson County within the month you establish residency or employment.

Chief Clerk Cletus Redlinger said Iowa residents moving here from another county must contact their county treasurer and have their records transferred to Johnson County before registering and licensing their vehicles.

PERSONS FROM other states must pass the state's safety inspection to register. The Motor Vehicle Department, located in

the Courthouse Annex south of the main Courthouse, also handles motorcycles, mobile homes, trailers, travel trailers and title transfers. You are also required to have a valid

lowa City requires a license to operate a bike, which may be obtained at local bike shops or from the Iowa City Fire Department. The licenses cost \$2 and are valid for four years; the sticker must be displayed on the frame of the bike below the seat.

at the Johnson County Courthouse or at with a "mobile registrar," but you must do so at least 10 days before the election. The Courthouse is located in the 400 block of South Clinton Street.

Where you vote will be determined when you register, and it will included on the registration card you are issued.

drivers license with your current address in the county in which you reside. The drivers license station is located at the north entrance of the National Guard Armory and is open Tuesday through Saturday. The Armory is located in the 900 block of South Clinton Street. Both auto and motorcyle written and driving exams are given there.

of the 100 participants in the fall

MANY UI students choose to ride bicycles instead of drive cars, and it is important to know that a license is required by the city to operate a bike.

criminal charges is also held in the Courthouse and the Civic Center. If you are unfortunate, you may find yourself in overnight jail at the Civic Center

If you have a car, you may receive a parking ticket with some regularity. The average ticket is a \$2 overtime parking citation. If you disregard the ticket, a warrant will most likely be issued and you will be required to appear in traffic court.

Licenses may be obtained at local bicycle shops or from the Iowa City Fire Department. The licenses cost \$2 and are valid for four years. The license sticker must be displayed on the frame of the bike below the seat.

The city's bike ordinance requires that bicycles be equipped with reflectors. The bicycle must be equipped with a headlight or the operator must wear a flashlight or lamp when riding at night.

IF YOU have a car, you may receive a parking ticket with some regularity. The average ticket is a \$2 overtime parking citation that may be paid at the city's Traffic Bureau in the Civic Center, located in the 400 block of East Washington Street. If you disregard the ticket, a warrant will most likely be issued and you will be required to appear in Traffic Court in the Civic Center.

Court for moving violations or for various

special someone and wish to dissolve your present marriage. That also can be accomplished through the clerk's office. Also go to the clerk of court to change your

name, adopt a child, pay or receive child support or alimony money ordered paid through the office and to apply for a passport.

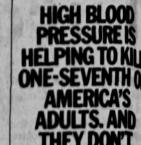

To obtain a license to hunt or fish in the county or to operate a boat or snowmobile, you should go to the county recorder's office in the Court House.

IF YOU OWN a pet and live in Iowa City, you must obtain a license from from the Animal Shelter, located south of the National Guard Armory.

If you own a pet and live in Johnson County, you must obtain a license from the County Auditor's office in the Courthouse. Students who qualify for food stamps can receive them at the Johnson County Social Services office at 911 N. Governor St.

Zip

And if you wish to tell fortunes, operate a taxi cab or use one of Iowa City's parks for a special event, you must obtain a license at the city clerk's office.

brain for an idea. This became were, although others were and I considered racking the pavement and saying derisively, "Ha ha, fried eggs." someone else's brain for an idea, but there were police cruisers nearby.

This made me consider It was a day so hot that you writing a critique of eating could've fried eggs on the establishments in Iowa City, but

I WANDERED aimlessly through the city, all the familiar sights and sounds surrounding me, as soothing as a piranha in a wading poel. Jackhammers pounded away erratically. Great piles of dirt were moved back and forth.

As a cloud of dust blew in my face and a dump truck barely missed running over several children, it suddenly struck me: a source of inspiration.

I caught the first bus from downtown and ran through the doors of the liquor store.

"You could've opened those doors before running through them, chump," remarked a man who was moving slowly through the merchandise with an empty shopping cart.

BRUSHING the crushed glass from my arms, I smiled. I was touched by the man's concern and hurled a bottle of Daniel Boone whiskey in his direction. He ducked at the last minute and a liquor store employee caught the projectile deftly. "Okay Don," he said to the

"Enough screwing man. around."

The clerk walked past Don and took me aside. "Listen, about Don. He loves it here and often walks these aisles for hours, so don't hassle him, okay?"

I glared at the clerk. There was something about him I didn't like. Maybe it was the vise-like grip he had on my arm, I don't know. "Okay, pops," I sneered.

you.' He was a character. **PERHAPS** a fine wine will get till dawn began to take its toll on the old creative wheels rolling, I me. Like most veterans back thought, and began searching the shelves: Bordeaux St. then, I had gotten a soft job, Emilion from the south of shoveling molten steel in the France. Valtellina from the mills. One day my foreman north of Italy, Annie Green came up to me and screamed -Springs from the east of we had to scream to be heard -Cleveland. Which to choose? he screamed, 'Don! You're just not moving that molten steel,

My indecision was suddenly interrupted as I felt icy fingers on the back of my neck, like a harbinger of some terrible fate.

"Don't worry, it's just me," said Don, cheerfully waving a down on my luck, out of work piece of ice he had been slurping on. Startled, I cracked a bottle Pina Coladas. I had to have 'em.

of Lachryma Christi down on Are you listening?" his collarbone. "Yes, yes," I snapped, looking at my watch.

"Oh, don't get sore," he chuckled. "Frankly, you look as uptight as the cork in a bottle of 1946. I was living at the Hotel Cavit Pinot Grigio," he ad-, Cretzmeyer, a real seedy dive. monished me, trying to move his arm.

story.

The manager was a woman named Annie. Gosh, she had the "I'm sorry, Don, you startled me," I said. I explained the funniest habit, picking her teeth situation, that I had passed my with a snow shovel. But deadline and was stuck for a anyway, um "

"You were hitting rock-bottom," I said helpfully.

"I GUESS I hit rock-bottom in

"Oh yes. It was Christmas Eve, 1946, and I needed money bad. I had to have a Pina Colada. So I knocked over a Vienna sausage joint on 51st and Hoover. It was a little old man starting to move away. Don grabbed my shirt and who was running the joint, and it broke my heart when I took his last sausage. But I had to. I was planning to dump the links off on the Black Market. There was a great Black Market for Vienna sausage in those days.

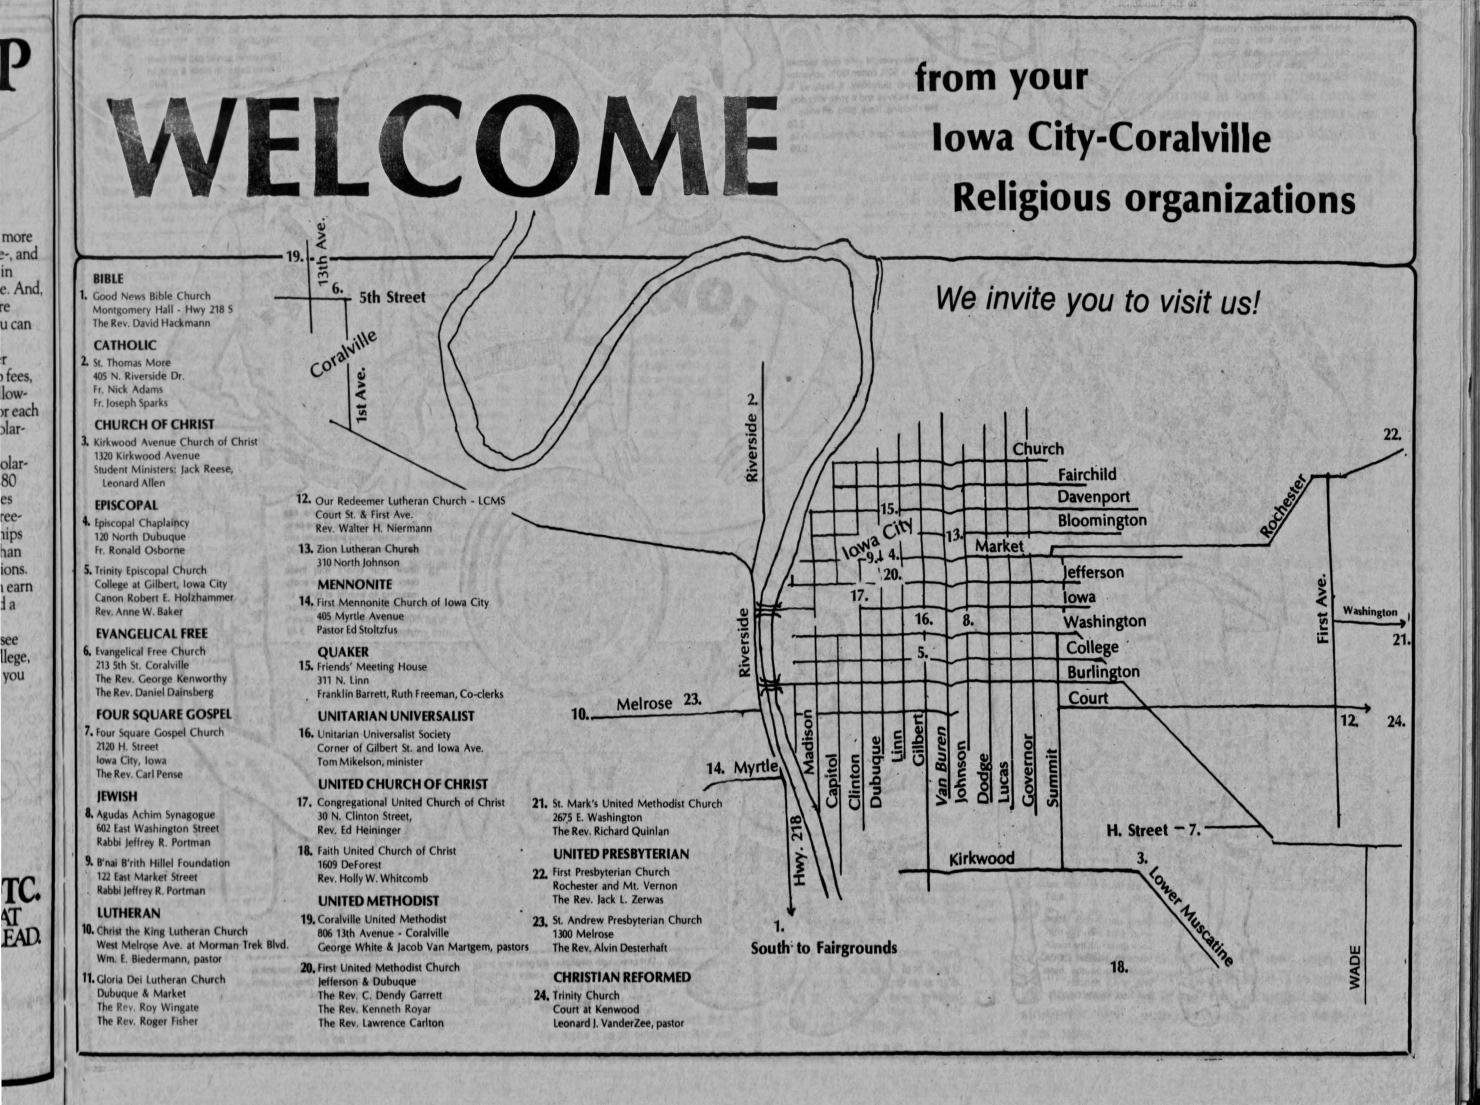

"I WAS runnin' down the street, sausages in tow, when I looked over my shoulder and ran smack into a Salvation Army band. Vienna sausage and instruments flew drink every night until dawn at Tommy Henderson's bar "Suddenly,

"Suddenly, the leader of the band grabbed me by the shoulders. I knew I was done for. But he said, 'Son, you look like a troubled soul. I don't know where you got all this Vienna sausage and I don't want to know. But end this life him on Veterans' Day and he of crime, it'll get ya nowhere. And, unless I miss my guess, you been drinkin' Pina Coladas. That stuff is the devil's cough syrup, pal. Listen, it's Christmas Eve. Take this 10 bucks and make a new start.'

> "SO I DID. I got a job with a kite distributor. I ain't touched a Pina Colada in years. Sure, I still come by and look at the ingredients and think of those great days back at Tommy Henderson's. But believe me kid, booze is a one-way street with no exit ramps, not even at Melrose Avenue.' I relate this story because I think that in Don's life there's a lesson for all of us: Don't hang around the liquor store without buying anything; it bothers people.

Page 2

Dan Gable has seen many accomplishments in his wrestling career, highlighted by a gold medal in the 1972 Olympics. But Gable refuses to live on the past. His latest aspirations hinge on coaching individual champions because "that's as high as you can get."

Page 4

Forest Evashevski was one step and 10 years ahead of everybody else when he generated plans for an "Iowa Arena" in 1969. That plan fell short of reality, but this year UI officials have given new life to the massive "Hawkeye Sports Arena" project.

Page 7

For a team that has suffered through 17 consecutive losing seasons, football has seen enough financial success over the years to keep all other intercollegiate sports at Iowa afloat. Athletic Directors Bump Elliott and Christine Grant talk about their budgets and spreading the wealth.

Page 8

In Halsey Gymnasium, one of the most influential leaders of women's athletics in the United States can be found working on problems common to women athletes everywhere. Yet, Christine Grant manages to take care of those at home while serving national women's athletics during a very critical time.

Page 9

go international

This story was compiled by Doug Bean, sports editor; Shari Roan, associate sports editor; and Howie Beardsley, staff writer.

For a handful of past and present UI athletes, the year 1979 is a forerunner. While they are only living a dream today, they know a lifetime goal can be made real in 1980 - in the Games of the Twenty-second Olympiad.

To compete internationally is the chance of a lifetime for many Iowa athletes, but the opportunity is rare. At times, when they are working out at late hours in the Field House, the idea can even seem a discouraging impossibility.

Of the many athletes in the University community, several are already in training or competition to test their talents against the world's best competitors. Olympic trials will begin next year and many athletes were involved in lower level international events this summer - in the Pan American Games and in European tournaments.

In this story, 10 athletes among many potential international competitors at Iowa, talk about their aspirations and the one chance they have to achieve the ultimate honor of amateur competition.

Chuck Yagla

Seven years ago, Dan Gable looked awesome in winning the Olympic gold medal at 149.5 pounds. Next year, his coaching assistant, Chuck Yagla, has an excellent chance to perform the same feat.

Yagla has his sights on that gold medal after making the 1976 Olympic team as an alternate. It's been a long road for the former Iowa star after graduating in 1976, but he feels the ultimate payoff is within reach now.

"Right now I feel like I have an excellent chance to make the Olympic team, primarily because in the AAUs this year, I dropped down a weight to 149.5 and won it real easily," Yagla said. "That's the top tournament each year for freestyle competition, so right now it looks like I have a real good chance."

Yagla became an Iowa assistant coach after completing his college eligibility and has been wrestling in top freestyle meets since that time. He has wrestled at 149.5 and 163 in freestyle after wrestling at 150 in college. Yagla won the AAU title at 163 in 1978 and the 149.5 championship at the 1979 AAU meet in Ames.

FORMER WISCONSIN star Lee Kemp has been wrestling at 163 since college and has given Yagla trouble at that weight. With the Olympic year quickly approaching, Yagla figures the lower weight class to be wide open with former Iowa standout Bruce Kinseth, and Dave Schultz, who are wrestling at 163 now, being the top challengers.

Since capping an outstanding collegiate wrestling career by being named the outstanding wrestler in the 1976 NCAA Championships, Yagla has won several international titles. He went to the Soviet Union earlier his year and took second in a tournament, plus taking one of two dual meets with the Soviets. In April, Yagla won the World Cup by beating a Soviet in the finals.

"I've gotten a lot more exposure to freestyle than I had in college and that's helped an awful lot," Yagla said. "It's hard to adjust to freestyle from collegiate style, but it's been pretty good for me because I've been able to devote my time to it and get more experience."

AFTER SETTING an Iowa record for career wins (133), Yagla admits that it's tough to keep going sometimes after being out of the team atmosphere for four years. Yagla said that winning becomes more individual in international competition. But being around the national championship program as an assistant coach has been a tremendous advantage, he said.

"I'm actually in an ideal situation here," Yagla said. "By being an assistant here, I can still work out twice a day and devote a lot of time just to myself as well as coaching; which helps me too."

Yagla would become the first gold medalist at 149.5 since Gable. Lloyd Keaser picked up a silver medal at 149.5 at that weight in 1976, but Yagla really wants the top prize.

"In my mind, I think I'm good enough to win a gold medal because I've been around enough and seen enough that I don't think there's anyone who's any better than me," Yagla commented. The road to the Olympics in Moscow is still a long one with the trials a year away. But if Yagla qualifies for the U.S. team and wins the gold medal, he will probably bring his competitive career to an end.

There just wouldn't be much Yagla

could do for an encore

Cindy Haugejorde

International competition is usually an opportunity that occurs just once for an athlete. But Cindy Haugejorde is well-accustomed to packing her bags for an overseas haul. A year from now, the Iowa senior-to-be hopes to tag her suitcase with a ticket to Moscow for the 1980 Olympic Games.

Haugejorde's basketball prowess is common knowledge in Iowa City where she has led the Hawkeye women for three years, scoring an average of 18.6 points this season and pulling down 8.1 rebounds per game. But Iowa basketball is only part of a manyfaceted career game-plan for Haugejorde.

"Ever since I was a little kid I wanted to be in the Olympics and I played basketball because it was fun. I remember when I was 16 and being so upset with myself for not trying out for the Olympics. I've thought about it a lot and dreamed about it," the Parkville, Minn, native said.

There's no chance that Haugejorde will let the Olympic basketball tryouts slip by this time. Trials for the Games will begin in March of 1980 and she's begun training for a big pivot in her

THIS PAST SUMMER, Haugejorde spent six weeks competing in Europe for the U.S. Athletes in Actions team. It is the second such tour for Haugejorde and the trip included stops in Czechoslovakia, Italy and the Soviet Union. Haugejorde has also competed internationally on the 1978 U.S. Select Women's National Team which traveled to the Orient and the 1977 U.S.A. Gold Pan Am team in Mexico City. She tried out for the 1979 Pan Am trials in Knoxville, Tenn., in April, but was unsuccessful.

Haugejorde claims the disappointment in the Pan Am tryouts will help her in future endeavors. Developing a higher level of concentration is needed the most, she said. "It's hard to develop intensity. Playing basketball is like the intensity of a test."

Haugejorde has a fairly good notion of what the judges will be looking for in the trials. "It will be really tough to make it because they like people big inside and fast outside.

"I'm not big and I'm not fast, but I can make it as an outside shooter and by being tough on the boards and very

aggressive," she said. "I really think women's basketball is more political than men's," she added, as the administrators of U.S. teams look for people that come from places with wellknown traditions.

Experience in playing European ball with various U.S. teams has wisened Haugejorde to the workings of international ball. "You've got to be tougher and rougher, because of the officials. They're often biased against U.S. teams. It's more of a physical game overseas. In the U.S., basketball is more of a feminine sport," she explained.

A WIDESPREAD search for Olympic talent is not conducted in the field of women's basketball, Haugejorde adds, No one approaches anyone about competing in the trials, yet the judges look for experienced competitors, she said.

"The biggest thing is to be intense and aggressive. Skill-level is only five percent and the mental aspect if 95 percent," Haugejorde said.

Ronnie Lester

Ronnie Lester has spent his last two summers traveling around the world to play basketball, and there's a possibility that he'll be on the road again next summer.

Yes, Lester is becoming a real journeyman and is making a name for himself on the national and international scene.

In the summer of 1978, Lester played on the U.S. World team in the Gagarian Cup basketball tournament in Moscow. The 6-foot-1 guard started five of the seven games in the tournament on a classy U.S. team that had such guards as Michigan State's Earvin Johnson, Kansas star Darnell Valentine, St. John's Reggie Carter and Indiana's Mike Woodson.

Lester averaged 9.5 points per game in the tourney hitting on 27 of 45 field goals and 12 of 13 free throws. His highest point output was 14 and it came in a 106-68 victory over Lithuania. The U.S. team finished second in the tournament behind the Soviets.

THE EXCITING Hawkeye guard came back from the trip to lead Iowa to the Big Ten title, the first since 1970. And in the process, Lester grabbed many post-season honors for his brilliant season performance.

See Athletes, page 3C

The Field House pool crumbled under picks and hammers this summer in the attempt to rebuild two hampered diving programs at Iowa. While completion of the reconstruction project is expected this fall, the lowa swimming coaches long ago adopted a wait-and-see philosophy.

Page 10

After signing a 10-year contract last winter, Big Ten Coach of the Year Lute Olson says he has "no desires to move." Yet Olson is constantly on the move in trying to overcome what he claims are builtin problems in Hawkeyeland.

Page 11

Soccer has grown in popularity among lowa City youths and the Kickers Soccer Club is evidence of the new trend. The sport "can no longer be considered foreign," enthusiasts say. "It is an American sport now."

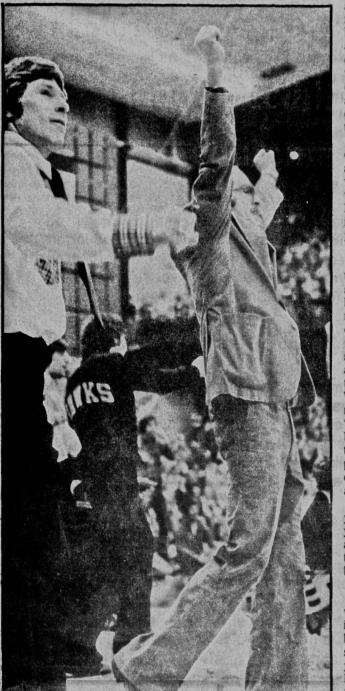

Page 2C-The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979

'Gold' not end of rainbow for Gable

By DOUG BEAN Sports Editor

Dan Gable probably accomplishes more for wrestling in one day than any other one wrestler does in a lifetime. But just talk to the Iowa coach for a minute, and he'll tell you he has so much more to achieve.

It doesn't quite seem possible that Gable would speak these words after winning about Championships. The list of more successful," he added.

achievements by Gable can go a second that he is content to live on the past.

"If there's never a step up, you're going to find yourself going down - you've just got nowhere to go," Gable said. "There's always something to accomplish, no matter what area you're in.

"I don't care if you're the President of the United States, everything the sport of there's more things in his wrestling has to offer, plus program that he can do to make coaching a team to two NCAA more people happy or to be

GABLE HAS BEEN a winner on forever, but don't believe for since the day he became associated with wrestling. He raced through 181 high school and collegiate bouts, losing only once, the last match of his

college career in the NCAA finals. Gable went on to become one of the heros of the 1972 Olympics, winning a gold medal at Munich while wrestling injured.

But now, Gable is totally committed to coaching and he enjoys coaching more than his individual competition.

"When there is individual success involved, sure it was myself and I knew what it felt like inside. But I've never had anything better able to show my emotions more than coaching a winner in wrestling," Gable commented. "In terms of being successful, if you take one and compare it to the other. I think the coaching part is greater." Gable, who took over the head coaching position after the 1976

season, said he is not satisfied with the Iowa program staying where it is right now. The Hawkeye coach believes there is a new challenge to meet each year.

IN FACT, GABLE is already talking and planning for next season. The Iowa team will have four All-Americans returning from the 1979 championship squad.

"I lose 50 points off last year's squad and that doesn't give me any place to say that I'm hurting for next year, but Wisconsin is a challenge for me next year," Gable said. "They've got nine of 10 starters back, so the challenge for me is to get our new kids, the ones I put on the mat who haven't been on the college mat before, to be

an All-American next year. "It's a continual process, you've got new people and you're motivated again," he added. "The six weight classes that aren't All-Americans are a heck of a challenge for me."

THE IOWA WRESTLERS, who have won four NCAA titles in the last five years, may be building a dynasty with the success they've had in recent years. But Gable said the

"You've got to get a few more to call it a dynasty, but I think we've proven now that we're the hottest team in American," Gable said.

With the Olympics Games only a year away, Gable has also set goals for coaching in international competition. After experiencing the thrill of winning an Olympic gold medal, he would like to coach gold medalists in 1980.

"I'll be working with the Olympic team next year but the capacity hasn't been announced yet," Gable said. "I'd like to be the Olympic coach."

GABLE HAS HAD international coaching experience with the World Championship teams in 1977 and 1978, and he will be coaching the World Team at San Diego in late August. The Iowa coach is hopeful of taking some home-grown talent to San Diego and then to Moscow.

"Right now I've got goals internationally - not only with the Hawkeye Club but producing a few champions from the Iowa wrestling team as a coach," Gable explained. "Or as a coach, why not take a team to Moscow in 1980 to whip the Russian team, but that's almost unheard of and probably won't happen."

Gable said he recalls his competition in the Olympics to motivate himself now.

"I think back on the Olympics not just to remember the memories but to put myself in that competitive atmosphere when I'm not in the atmosphere," Gable said. "I think the Olympic Games are the highest competitive atmosphere there is.'

ALTHOUGH THE Hawkeyes have won six consecutive Big Ten team titles and have a string of 30 straight dual meet victories going into next season, Gable still puts an emphasis on individual champions. In 1978, Iowa won the national team title over Iowa State but didn't have an individual champion.

"I think the most satisfying thing for me as a coach is to produce individual national champions because that's as Hawkeyes are going to have to high as you can get," Gable win the title several more years said. "As far as I'm concerned, before he can call it a dynasty. that's really what you strive for

individually. toward that, you're bound to

end up with the team title because you'll end up with 10 good individuals," he added. With all his wrestling and coaching success, Gable said he has been offered jobs at other colleges. But the Hawkeye coach is content with the University of Iowa at this moment.

"I really have no reason to want to consider other offers because I really can't see the big advantage," Gable said. "If you don't think you can compete as well at one place as you can the other, you might think about moving."

AFTER COMPETING for Iowa State, some people have speculated that Gable could be in line for the top position when

retires. But Gable can't foresee "If you get the guy working moving back to Iowa State in the near future.

"I have to admit being from both institutions that I like it at Iowa State and I like it here. I was a competitor at Iowa State, he will do whatever needs to be but I don't have the same roots done to beat his old school. that I do here." Gable said. "Some people think the opposite "YOU CAN'T HELP but think the students at one time were because I started out at one rooting for you, but it's not

place. As an individual comgoing to overtake any feeling petitor, I feel you don't belong you have for your own kids and like you do as a coach. "So I'm more deeply involved your own school," Gable said.

"All I hope is when I step into here than I was at Iowa State. but that doesn't mean a coach the Iowa State arena that I'm wouldn't ever change his mind. not hated." Like I say, you never know," he added. "All of a sudden the The former Cyclone standout found it tough making the administration here might go coaching transition at Iowa in anti-athletics and if an ophis first few years. But once he portunity arose somewhere made it, Gable said, it's easy to else, that's your life - you've make it a livelihood. "It's not a so-called job where got to do what you have to do to survive."

Dan Gable, a former Olympic Gold medalist, rides West Germany's Klaus Rost in the 149.5-pound weight class during the 1972 Olympics. The former wrestling great has now continued

"You'll do it as long as it's two wrestling powers meet in head-to-head competition, it's a different feeling for him when keeping you sane. So, for the man who has done he goes back to Iowa State. many things in wrestling, the Despite some feeling of loyalty past has been great but the for his alma mater, Gable said

future holds his key to success. Gable is never content to keep the status quo — he is always striving for improvement in himself or his wrestlers. "If you are at the very top

you may be beyond everybod else but there's still a highe level you can achieve. That's my attitude and because of that, I'll just never want to lay back and take things for granted,' Gable said. "I think that's what makes me a good coach.

"It's just like me in wrestling now," he added. "If I got to a point where I was satisfied with what I was doing totally, we would go downhill because I probably wouldn't work as hard or be that interested."

IOWA'S FLASHY guard saw considerable action and aided the U.S. team in the Games. Iowa Basketball Coach Lute Olson projects that Lester will be the premier guard in the country next season. And Indiana Coach and Pan American Head Coach Bobby Knight always has had words of praise for Lester when his Hoosiers club plays the Hawkeyes.

After Iowa's 90-61 win over Indiana in Iowa City last anuary, Knight said, "Lester played as well against us today any individual player has since I've been at Indiana." In that Big Ten clash, Lester had a ame high 27 points and hit 8-ofs free throws.

The trip to the Pan American Games turned out to be a successful one for Lester and the lowa guard will probably set his sights on making the 1980 Olympic basketball team. The scenery would be familiar because Lester visited Moscow for the Gagarian Cup Games last summer.

Mohamad and Ali Tavakoli

political situation there." Iowa gymnasts Mohamad and Ali Tavakoli have set their goals gh, but the political turmoil in their home country of Iran may shoot down any dreams of

reaching the 1980 Olympic

Games in Moscow. Mohamad said that because of Iran's recent revolution, the country may not have a team for the 1980 Games. But Mohamad believes that the trouble will be settled and he hopes to earn a spot on that 1980 Olympic team.

'Hopefully, peace will be totally established soon," Mohamad said. "The World Games are in December and they are a trial for the Olympics.

THE HAWKEYE standout, who has one year of college eligibility remaining, said team must be selected by December, in order to get ready for international competition preceeding the Olympics. Another Iranian gymnast in California and myself went

home in late July to see how we do compare to gymnasts who are there," Mohamad said. 'We've got a good chance to make the team, I think.

"There are a lot of gymnasts who are on my level, so I stayed there and trained for awhile with the team," he added. "The team will be one of the best teams they've ever had." But the Tavakoli brothers figure they have an excellent edge over competitors in their native land because of their international and collegiate experience. Ali, who has three years of eligibility remaining at Iowa, had a good first season on The Hawkeye squad. He decided to remain in Iowa this

summer and see how well his brother did at home. Mohamad has been Iowa's top gymnast the past three asons, according to Assistant Coach Neil Schmitt. Before moving to the U.S. several years ago, the older Tavakoli

was a member of the Iranian national gymnastics team and participated in international competition. This past season, he had his highest finish (seventh) in Big Ten all-around competition.

"I've competed in more meets than they (gymnasts in Iran) have," Mohamad explained. "They haven't had much competition at all the last two years because of the

MOHAMAD IS nursing a

recent shoulder injury, but is still working hard in hopes of

making the Olympic team. "I think I can make it to the

Games, but I don't know if I can place - the competition is tough."

Tim Cysewski Tim Cysewski has been turned back before in the Olympic Trials, but he vows to be successful in the next at-

tempt. Cysewski, a former Iowa All-American who graduated in 1976, is a member of the Hawkeye Wrestling Club and, like many other wrestlers in

Iowa City, he's striving to make the U.S. Olympic team in 1980. The former Iowa standout is a seasoned veteran in international competition since using up his college eligibility. Cysewski was a member of the Pan American team in 1977, World team in 1978, World Cup team twice and he's been to the

Soviet Union twice. The past months have also been good for Cysewski. The 136.5-pounder faired well in a winter trip to the U.S.S.R and the World Cup meet. His only recent disappointment was the unsuccessful defense of his AAU title in April.

CYSEWSKI FEELS he is right on schedule with his training for the Olympics, but he won't put too much emphasis on the trip to Moscow until he's finished with international competition this summer. With the Olympics a year away, Cysewski is aiming toward winning several tournaments in the remaining months before the Olympic trials.

"I've had a couple of disappointments in the last few months but nothing too concerning to me," Cysewski said. "I've just been trying to keep working out as hard as I can and get myself in the best shape for the upcoming tournaments around the United States this fall and winter."

According to Cysewski, Oklahoma's Andre Metzger, Iowa's Randy Lewis and former Hawkeye Keith Mourlam will be the toughest competition in the 136.5 weight class. Lewis, an NCAA champ at 126 in 1979, may drop a weight for the Olympic trials, but wrestled at 136.5 for the World Team trials this

summer. Metzger, who just completed his freshman season at Oklahoma, finished fifth in the national tournament at 142. Mourlam is a former Iowa

successful in both attempts. **Bent Brask** "My goal is never just to make the team, that's one step," Cysewski said. "But it's **Brett Naylor** when you're on the team, you've

team."

kind — the wishful thinkers.

got to go for that gold. "You've got to go for winning it or otherwise it's just ridiculous to be out there," he added.

For Cysewski, a successful wrestling career will probably come to an end regardless of the outcome. But to go out with gold, retirement would be much easier.

Kris Rogers

Kris Rogers has a message for serious athletes: Always do your best. You never know who may be watching.

It was an unobtrusive spectator that spotted Rogers' abilities when she was playing for an-Amateur Softball Association team in Marion, Ia. last summer. The payoff is that the Hawkeye senior was named to the U.S. Pan American team as an alternate.

It was just when Rogers thought her softball days were winding down that opportunity came knocking. After six years of softball competition for Langhurst Motors in Marion and playing for the Hawkeyes in the 1977 season, Rogers hung up her spikes and spent the 1978-79 school year competing for the Iowa women's basketball team. But an official from the ASA, who had noted Rogers' fielding abilities at third base during a regional tournament last summer, invited her to try out for the Pan Am team last fall. It was a surprise, Rogers claims, because only 60 individuals were selected to attend the sixday tryouts May 31 in Colorado Springs. Eighteen women were selected for the American team.

WITH THE suddenness of the invitation to compete in softball, Rogers was left little time to condition herself for the rigorous tryouts. But with the help of her coach in Marion, Perry Langhurst, she was off to Colorado Springs.

"I don't think it mattered who I went up against in the tryouts. The nomination meant a lot of confidence for me and it's enough being asked to try out,' she said.

Rogers survived the first of two cuts at the tryouts before being chosen as an alternate to the team.

Evy's arena dream pushed aside, but sees revival a decade later

By SHARI ROAN Associate Sports Editor

It has been one decade since Forest Evashevski pushed plans for a new arena to a UI planning committee. Those plans were scraped and the former Iowa athletic director retired in 1970. But some dreams refuse to die and Evashevski's has made a resurgence. This time, in a form closer to reality.

Talk of a new athletic facility Evashevski claimed, was to try to replace the antiquated Field to separate the different House started as far back as 13 operations. "The two didn't years ago, according to records work harmoniously together.' on UI facilities planning. The idea again made a comeback in

the fall of last year and this time it looks as if plans may move beyond the sketching stage. This summer, UI officials began obtaining architectural estimates on designs for the proposed Hawkeye Sports Arena project.

The "dream" design in 1969 was for a cross-shaped building ONLY AT ONE other time with seating for 16,000 to 17,500 since the mid-60s has the arena and retractable bleachers on fream come close to physical reality. Evashevski said that in the floor. The "basic concept" 1969 plans were submitted to a in the works now is for a 14,000 nes architectural firm

athletics.

football parking," he said. Although it never materialized, the 1969 plans for the arena created enough of a stir to keep rumors of "a new parpose recreation-athletic arena on old Finkbine" alive

> throughout the 70s. As to why Evashevski's scheme slipped from the planning board, many theories exist while no real explanation can be found.

"I DON'T KNOW why it failed," the former athletic director said. "I know what they told me. They said we did

too good a job on renovating the Field House in 1966.' According to Evashevski, a reconstruction project on the Field House in '66 included

replacing the floor on the basketball court and in the armory gym. "We only did that as a temporary move to help basketball. It was so dingy in there. But they said that the of renovations were good enough that they didn't need a new

arena.' Richard Gibson, director of reasons the 1969 plan may have said.

Southern California offered him a head position. Olson, however, signed a 10-year contract and plans for the Hawkeye Sports Arena were fervently thrown into the works.

"Having a winning basketball season didn't hurt at all," in spreading arena fever across ne campus, Gibson mused. Also, he said, landing a new football coach and Olson's signing may have added to the

effect. "WHENEVER THERE'S

new blood, there is always hope again and an overall resurgence of support in athletics," Gibson said

Present Athletic Director Bump Elliott said studies for considering a new arena have been going on for a long time, however. "It has been a matter of timing. It has been a matter support from the administration. About five years ago there again a consideration out no real attempt at that time.

And then from that time on UI Facilities Planning and there has been a gradual growth Utilization, theorized on other of recognition for the need," he

Iowa Basketball Coach Lute Olson has reason to worry about next season after losing three top players in William Mayfield, Dick Peth and Tom Norman. Especially when 40 out of 50 starters will return in the Big Ten next year. With only Michigan, Michigan

State and Iowa losing more than one starter off last year's squads, Olson knew he had his work cut out for him in

recruiting "I think we're solid, but so is everyone else in the league," Olson said. "As much as we have coming back, the other people have more coming back than what we do. So a lot of our success will be dependent on how well we jell again as a basketball team." Michigan State was undoubtedly the hardest hit in the Big Ten the loss of Greg Kelser and Earvin "Magic' Johnson off its national

Miller left Iowa for Oregon want to spin our wheels,' State after his championship Gibson explained. At any rate, Evashevski's season. This spring, Lute Olson

leaned toward leaving his head dream, Olson's dream, the UI's job when the University of dream is now a plan in motion.

Air Force Accomplishments

Air Force scientific, engineering, and technology-oriented programs are a vast blending of talented people who operate at the leading edge of tomorrow's echnology. Some of the Air Force's current technological accomplishments are listed below: -Providing the economic and qualitative ad-

vantages of hot isostatic pressing - a process that may largely eliminate the need for machining aircraft parts.

-A major advance in engine airframe interaction and control.

-Development of a technique to correct for ionosphere-induced signal time delays in the NAV-STAR Global Positioning System.

-Development of a more efficient means of digital communication by bandwidth compression, and improved digital-to-analog and analog-to-digital conversion

ROTC

Gateway to a great way of life

-On-going development of superplastic forming of titanium sheets, a new manufacturing process that permits easier and less costly production of complex parts.

These are but a few of the Air Forces accomshments made within recent years. For information on how you may become a contributor to this technological advance, contact Captain Roger Pace at 353-3937, and see how Air Force ROTC can help you get there

Remember "Bankers'Hours?"

They weren't always this convenient for you

But now First National has 24 HOUR TELLERS at three convenient locations to serve you:

- Main Bank, Downtown
- Towncrest
- Coralville

Customers can receive cash, make deposits, transfer between accounts and obtain balance information... There's a First National Bank close by, wherever you are.

One block from campus

The main office of the First National is the place to go to open your account. It's one block from campus at the corner of Washington and Dubuque. The Personal Loan Office has it's own entrance on Washington Street next door to the main office.

• Drive-in, walk-in and customer parking downtown

Want to bank in a hurry from your car? You'll find quick service one block east of the main bank. Enter from Washington Street. The drive-in also has a walk-in lobby for fast pedestrian service. When your banking is more involved, park free in the Customer Parking Lot and come into the main bank. We're always glad to see you.

24 Hours a Day7 Days a Week

Stop by any of First National's locations to open your account and get your Instant Access Card, the key to 24 hour banking. It's free, fun, easy to use, and convenient.

• East side of Iowa City --our Towncrest Office.

A little big bank, or a big little bank. Every service of the main office. Located in the Towncrest Shopping Center.

• Coralville

Again, another full service office. Located east across the street from the Coralville Post Office.

A well-informed tennis player knows that the tension on the strings of a racquet is important. Good golfers will relax their grip on a drive from the tee. And swimmers know what type of suit can make a lifference in their times.

While certain mannerisms among athletes may seem to be quirks, their techinques can often be explained in the laboratories of biomechanics. At Iowa, athletes wouldn't have to look far if they were curious about what makes a pool 'fast' or why a spit ball ehaves differently. On the third floor of the Field House, country's oldest biomechanics department exists under the direction of Dr. James G. Hay.

Hay was Iowa's first Ph.D student in biomechanics in 1965. After returning to his native New Zealand upon graduation, he came back to head the program here in 1971.

BIOMECHANICS AS a study goes back much farther, however.

The study of how physics applies to biology is an old science, Hay said, but in the past century its application has been significantly broadened with sports research being the newest topic.

"There was a great deal of research done in the automotive ndustry and the space industry. Coming rather slowly after that was sports and athletics," he explained. "It would be fair to say that the use of biomechanics in athletics is very, very new, within the last 10 to 15 years. It's probably one of the least developed of the biomechanics areas."

The upper level of the Field House is not the only place where biomechanics is utilized, Hay pointed out.

"THERE IS a lot of biomechanics activity on this campus and what goes on here in physical education is a very important part of it. But there's also work being done in engineering, oerthepedics and physical therapy," he said. "So,

program in biomechanics in the country at this time."

Biomechanics is simply the said. The question in sports is gained in the laboratories. Apparently, for many of the

Iowa coaches, the field is still a bit vague. Coaches have not come to the labs with a specific problem and most of the Iowa research becomes known through research journals made available to anyone. "We often use Iowa athletes

as subjects in our studies and convey the results to them so that they can make whatever use they want of them," Hay said. "We're not really concerned with trying to make better teams here or any place else. We're just trying to un-

derstand the sports movements more completely."

THE FINDINGS from various studies done at Iowa has caught the eye of some

people, however. Head Track Coach Ted Wheeler and Swimming Coach Glenn Patton have expressed interest in students

One of the most notable experiments from the lab appeared to have a very positive effect on a group of Iowa high jumpers. Studies done by Jesus DaPena, a student in biomechanics, applied certain methods of jumping and many Hawkeye competitors noted improved heights, Hay explained.

"I think that they would agree that it has been beneficial to them and that they had a good deal of success during that period," he said. But he added, one of the

problems in applying biomechanics theory is, "It's always difficult to say why a performance improves. I would be hard-pressed to prove it was the biomechanics rather than anything else."

CERTAIN SPORTS lead others in the application of "There's no doubt that in-

considering the breadth of dividual sports are those that coverage, we probably have the use biomechanics the most. The broadest and strongest team sports have made virtually no use of biomechanics by comparison.

"Of the individual sports, effects of forces on bodies, he track and field is way, way ahead of all the others in its use. how to apply the knowledge Next would be swimming and weight lifting. Those three have used biomechanics quite extensively," he said.

There are three main areas of research in sports biomechanics, according to Hay. One area of study is for equipment and facilities - for example, he said, evaluating running shoes. One study Hay and his associates undertook was on the forces exerted on the parallel bars in gymnastics competition, which came about because of a rash of incidents where bars were breaking during performances.

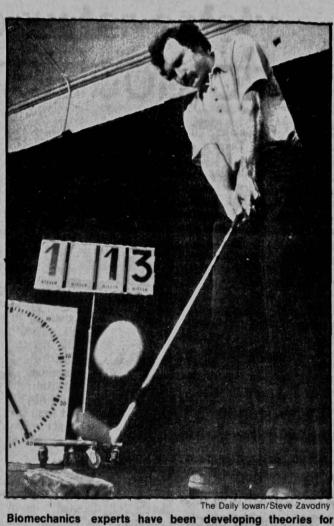

'We found that there is quite a large difference between the forces exerted on the high and low bar and they vary ac-

cording to the type of stunt," he said. "On the basis of that we came out with a recommendation on how much force the bars should be designed to withstand. That information is being used in redesigning working with biomechanics bars," he explained.

> ANOTHER SERVICE to come out of Hay's laboratories involved the labeling of tennis racquets. "We found that what manufacturers put on the tennis racquets with regard to the flexibility - stiff, average or flexible - are very, very poor ratings. A stiff racquet for one manufacturer might be a flexible racquet for another. You simply can't put faith in those classifications," he said.

The second area of research involves the study of sports safety, which also ties in with equipment studies, Hay said. For example, he said, a study done on vaulting in gymnastics competition questioned the movement of the equipment as the gymnasts spring from the horse.

how much of it is dangerous. We

several years to aid athletes, but their work is just starting to be recognized. For example, it has been proven that this golfer won't lose distance by loosening the grip on his club.

chained-down horse," Hay said. with intuition," Hay added. 'It has no significant effect on the performance of the gymnast, which may surprise someone.' The third area of study is

technique, Hay said. "I think this is where the bulk of the work goes.

SOME OF THE most mindboggling theory comes out of studies in this area, Hay said. One experiment at Iowa involved hitting an object, as in baseball, tennis, golf and other sports.

"Most of the available coaching wisdom says that you should hold the racquet or bat or whatever, firmly at the moment of impact to increase the striking mass," Hay said. "However, tests run in the labs showed that a tennis ball came off a loosely held racquet at the same velocity as a tightly clamped racquet.

"It raises important "It always moves to some questions about the role of the extent. But the question arises firm grip in striking activities. It's certainly not to do what is so found that the movement of a often preached. It's the kind of biomechanics, Hay added. free-standing horse is quite result that even engineers look acceptable rather than a cross-eyed at. It's not consistent,

Women's sports budget up; but men are big spenders

The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979-Page 7C

By SHARI ROAN Associate Sports Editor

While the Department of Intercollegiate - Athletics Women has noted a far greater growth rate in their budget over the past three years, the men's program continues to operate with vastly higher expenditures.

However, respective athletic directors, Bump Elliott and Christine Grant, have both expressed satisfaction with the year-to-year growth of their budgets.

Since the fiscal year 1975-76, the women's budget has more than tripled and the men's department has noted a 33 percent increase.

According to Grant, four years ago, the women were operating with a total budget of approximately \$142,684. The estimated budget for the 1978-79 year ending June 30 was now." \$499.000.

FOR THE MEN in 1975. Elliott said, the budget was approximately \$2.3 million while the 1979 budget will slightly exceed \$3 million, excluding scholarship allocations.

"This institution has done a fair job for women's athletics." Grant said. "There has been a significant increase and it was steady and based primarily on

"THE EASTERN BLOC what our needs were." The greatest increase in money spent on the women's making the most dramatic program is for scholarships, steps in international com-Grant noted. A total of \$28,000 petition in East Germany and was awarded in scholarships to about what they are doing," Hay said. "The exwomen in 1975, with \$135,000 being handed out this year. Maximum awards in the change of information with East Germany is virtually nonexceed tuition. However, the existent. They are happy to men's athletic department does know what everybody else is award full-rides. doing but they will not tell you

Operating expenses for the women, including car transportation, officials, accommodations and meals, have also risen drastically; from \$25,800 in '75 to \$132,000 last year, Grant

"I think that in many of the said. In other general categories other countries it is better comprising the women's total coordinated than it is here. budget, transportation to There is a great deal of special events (requiring plane handled completely by conduplication and repetition here. or bus) doubled in price, from tributions. In all those years, My own personal feeling is that \$10,000 to \$20,000. Miscellaneous contributions have increased.

expenses, including recruiting, supplies and publicity, went up from \$6,500 to \$25,000 and equipment and uniforms rose from \$11,700 to \$15,000.

SALARIES FOR the Halsey Gymnasium department is the largest item on the budget, totaling \$135,000 this year. In '75, coaching, training and administrator's salaries amounted to \$60,684. "It looks like the coaches

salaries have shot up - they haven't. More of their salaries are being covered as being a cost to athletics," Grant added, because the coaches are spending less time teaching and

INCLUDED IN THE men's total budget are items such as salaries, recruiting, equipment, uniforms and operating expenses. The biggest increase on the budget has come fromsalary raises, Elliott said. "It's because of the cost of living. Jumps and increased in salaries have been pretty basic with the overall university formula, give or take. Because on the merit basis, some of the coaches may or may not receive more than that "

Travel and costs for football equipment have also resulted in measurable budget increases. However, Elliott noted, "We have not necessarily restricted

"Our gate receipts wouldn't take us to Ames...Hopefully, that will pick up in three or four years. But that's not a factor

more time coaching. Across the river at the Field House, the men's athletic department has seen an increase of \$700,000 to their budget since 1975. However, our budget showed no significant increase from 1978 to 1979. The biggest jump in the budget

came in 1978, when expenses rose from \$2.6 million to \$3 million Additional scholarship allocations amounted to \$550,000 in 1976 and \$500,000 in both '77 and '78, Elliott said. Approximately half the

scholarship money came from private contributions. This year, the cost of scholarship awards was \$550,000 with the women's department cannot majority of the funding supplied by contributions.

'The basic scholarship cost over the past four years) has been similar to what it was this year. Costs have gone up, but we've tried to cut down on the number of scholarships through the last three years. We've tried to hold the line," Elliott explained. "Money coming from contributions to provide scholarships is changing. This year, scholarships are being

our coaches in recruiting or restricted our participation. We have tried to localize some of our travel as far as events are concerned in some sports to cut down on expenses.

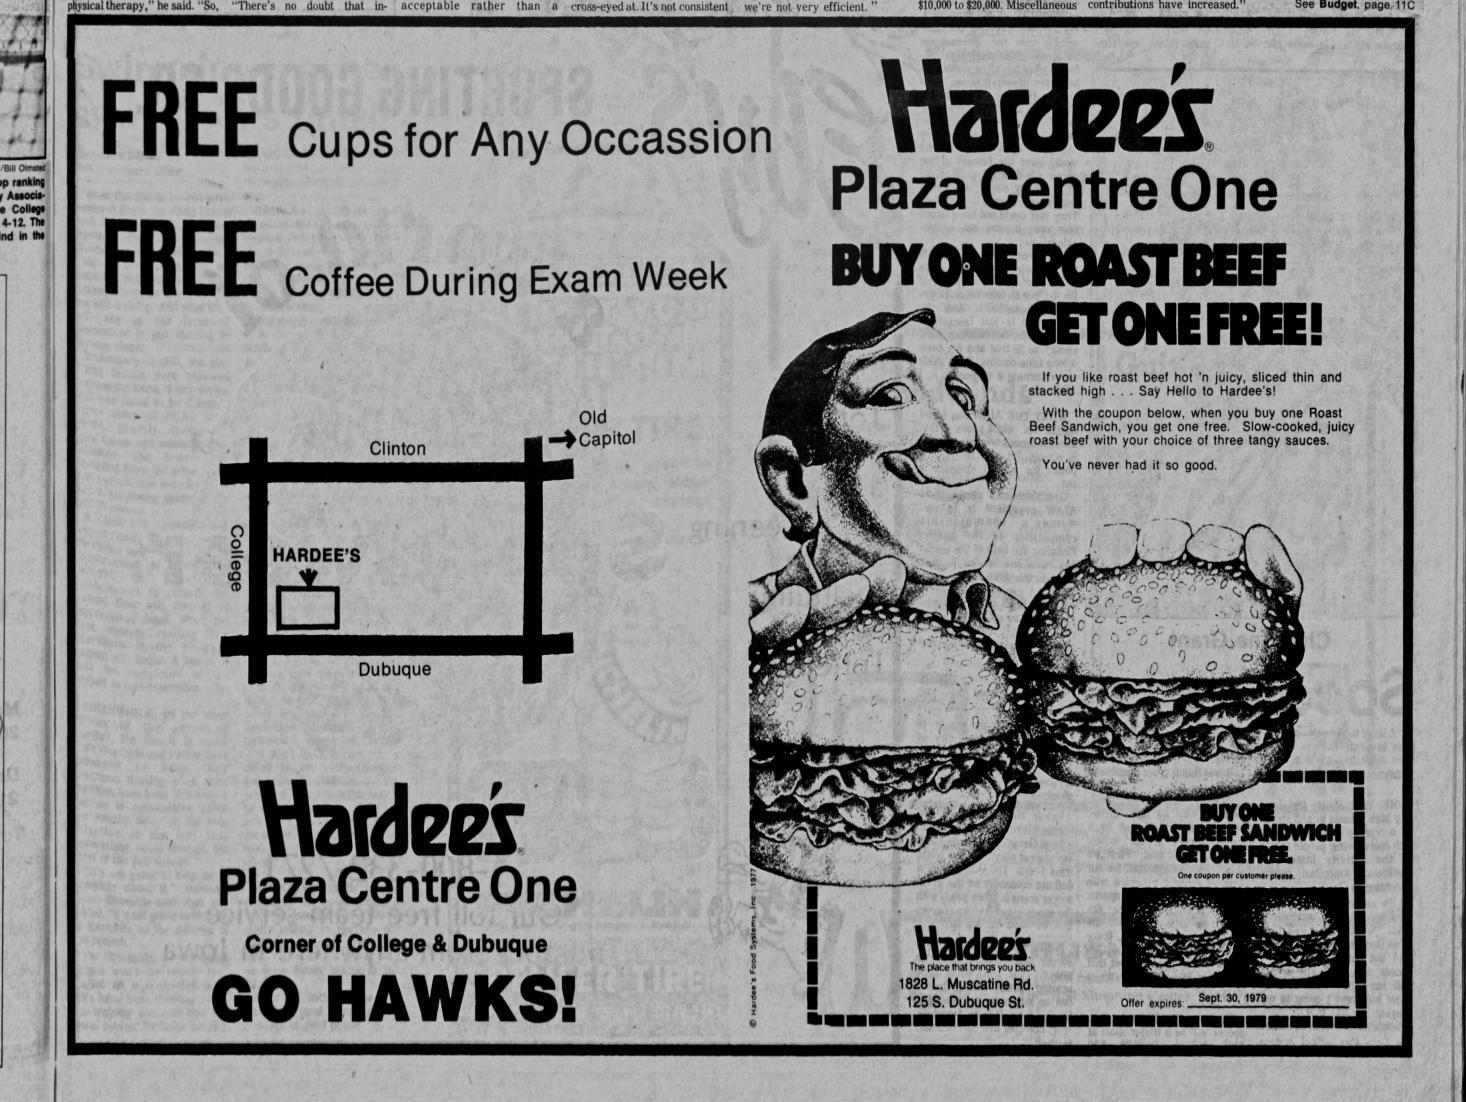

While the income from men's athletics has roughly equaled expenditures, as Grant noted, "Our gate receipts wouldn't take us to Ames.'

Money to support the women's athletic program comes largely from the university's use of nonrestrictive funding, which is not state money, Grant explained. The women also receive assistance from the men's intercollegiate athletic department.

IN THE 1975-76 year, \$28,000 changed hands between the two programs, while approximately \$190,000 of the men's funds were distributed to the women this year - over one-third of the women's total budget.

Grant is awaiting an increase in gate receipts from women's events in future years. "Hopefully, that will pick up in three or four years. But that's not a factor now. We have to make sure we bring in enough

From Halsey to Washington Grant takes on hectic double role

By SHARI ROAN Associate Sports Editor

If Iowa Women's Athletic Director Christine Grant isn't in her Halsey Gymnasium office these days, chances are good she's in her Washington, D.C. office.

And while she won't be taking care of matters exclusive to Iowa athletics when she goes to Washington, those at Halsey Gym know that what she does there will be in their best interests.

In January of 1980, Grant will be taking 1,000-member institutions into her hands as she asumes the duties of president of the Association for Intercollegiate Athletics for Women.

AND THOUGH she will attest to the fact that things often move pathetically slow in the fight for equality in women's collegiate athletics, Grant's progress through the ranks of AIAW has been rapid. Apparently, it has been support from the University of Iowa that has helped launch Grant out of her office in Halsey and into the national spotlight.

Grant became involved with AIAW at its inception in 1971 while Iowa was signing the AIAW charter one of its first members. In 1974, Iowa made Grant the first women's athletic director in the school's history. And in 1979, AIAW made Grant their second president from Iowa. Dr. Peg Burke, chairwoman of the Iowa Department of Physical Education and Dance, was AIAW president in 1977. Grant's latest undertaking

with the largest athletic organization in the country has unfolded quickly. An unexpected nomination for the presidency in November of 1978 was followed by discussions with many Iowa administrators and colleagues. In January, she began her year as presidentelect. Her three-year service will also include her 1980 presidential year and the following year as outgoing president.

The trips to Washington for Iowa's athletic director are now routine. But the central office While she will take on a new job,

Grant refuses to give up duties another.

"The nomination was a very difficult decision for me to make,"'she said. "There are so many things happening on building a program, as we are, there is more than a full-time job right here. I did not want to run for president and then feel I was being unfair to may own institution."

THERE IS no evidence that Iowa is being slighted while Grant assumes the presidency of AIAW. The opposite appears to be true. In June, Iowa hosted its first national championship women with the tennis for tournament. At the same time, on the national scene, Grant was instrumental in organizing 27 national championships under a new three-divisional structure for AIAW schools in 1980 — up from 18 this past year. Yet, Grant is unruffled by the magnitude of her double role

thus far. 'The duties to date have been fairly minimal, so I have not had a conflict with AIAW responsibilities as opposed to University of Iowa responsibilities. I've been able to do both," she said.

Grant will not make Washington, D.C. her home during her tenure. "I would much prefer to travel into Washington when I have to be in Washington and come home and run as much as I can from home. That's quite possible because previous presidents have also done it that way. I would really like to keep close ties with the University of

Iowa," she explained. THE FREQUENCY of travel to Washington is dependent upon the issues of the time, Grant admits. And since its birth in 1971, AIAW has been beset with enough controversial full-time trouble-shooter. Grant hopes she can hold the

fortress down with monthly problem to us right now." visits for two or three days. "In the history of AIAW, we seem to be facing one crisis after

"I would say that the biggest problem that AIAW has right now is that we're understaffed. It's a bigger organization than NCAA. We've got a staff of six campus that really have my full-time people. When you're attention. And when you're talking about servicing 1,000 institutions with six people it's tough," she added.

> Grant, who holds a Ph.D in physical education from Iowa, has always been active in servicing other institutions for AIAW. She has worked on the state level of AIAW since 1971; was coordinator for championships on the regional level; chaired the recruitment

Washington and working with the global picture then to come back and immediately switch back to our own program where it may be something like somebody's stolen our 30-second clock. It's just a sudden switch that I've got to be

Grant was an early advocate of career in Canada, coaching the Canadian national field hockey team.

Grant still found the step into AIAW's higher echelon to be more of a stumble.

March and I thought I had a pretty good idea of what happens in the national office. But my idea of what happened and what actually happens is fairly different. The hours the staff keeps are phenomenol," she said. "I was working there often until 10 at night, as were other issues to require the skills of a members of the staff. And the volume of work is just so great. The lack of staff is a severe

Lake MacBride and Coralville Lake are by no means Daytona Beach but both recreation spots serve as adequate ways of surviving the hot Iowa summers.

The trouble is that everyone in the Iowa City area gets the idea to hit the beach at about the same time on weekends and holidays. By the time the sun is at its scorching point, it's vir-tually impossible to find a place to even stick your big toe in the water. The overcrowding is a major

problem at Coralville Lake, according to chief ranger Steve Fairbanks. "On a busy day there can be three or four thousand people out here. It's just like a small city," the ranger said. "Once at the West Overlook boat launching area, we counted over 200 boat trailers." West Overlook is one of at least six launching areas on the 4900-acre lake.

Overcrowding has the greatest effect on safety measures at recreation spots. In July of 1977, a collision by two boats resulted in a drowning, according to Fairbanks. "This accident occurred on a weekend when boating traffic was very heavy," he explained. "But as narrow as Coralville Lake is, it's really surprising that there are not more boat collisions."

LEANNE VAN ZANTE, a water skier at Coralville lake, agreed overcrowding is a definite problem. "It seems that there are boats going every which way and it's realy hard to find an open spot to ski," Van Zante said. "The more boats out there, the choppier the water gets with more waves and wakes. It's just not safe conditions for anyone to ski."

Trying to solve the situation is not easy, according to Fairbanks. "There is just no feasible way that we can limit the number of boats we have on the lake," the ranger said. "It may be something that can work itself out. People know that there are going to be a lot of boats out on the weekend or holidays and may decide to leave their boat at home or come during the week at a uieter time.

But overcrowding is not to lame for all of the accidents, debris," Kenyon said. Fairbanks noted. "A fishing

Swimming coaches await pool's finish

By SHARI ROAN ssociate Sports Editor

When the diving boards were removed from the Field House pool, Iowa Swimming Coaches Glenn Patton and Deborah Woodside were forced to take a 'wait-and-see'' attitude on plans for pool renovation.

Now, 1 1/2 years later, the two are still waiting. And what they will see in the form of renovations is just starting to ecome clear.

In January of 1978, the pool diving boards were removed because the 9 feet, 8 inch diving well was found to be 7 feet, 3 inches short of NCAA standards. Shortly thereafter, Iowa's men and women divers followed the boards by departing from the school. And both swim teams were forced to forfeit all diving points in the 1978-79 season.

A \$350,000 construction project finally began to deepen he diving well in May. Burger Construction of Iowa City brought in picks and jackhammers to remove the cement floor and drop it to the required depth. When the dust clears, retiling and alterations in the electrical system will begin. A tentative date for completion of the project is mid-September.

MEANWHILE, IN the outer offices of the swimming coaches, the facade is calm. Both Woodside and Patton have managed to keep their programs floating when their acilities have been threatened. Neither is complaining about the lengthy delay on the construction or the fact that renovations could disrupt the start of the fall season

"It's not going to help us to complain about it," women's coach Woodside said. And, she added, "it's not going to help us to speculate on the success of the project."

For Woodside, a successful leason won't be totally contingent on a completed pool. "We have been thinking about our training program and the use of outdoor facilities and dry workouts," Woodside said, it the pool is not completed before the women's first home meet on Nov. 3.

Patton, who will bring several excellent recruits to a team that claimed fourth in last season's tough league meet, doesn't relish the thought of a delay to the upcoming season.

lines," Fairbanks said.

"We will work outdoors a lot in September, running and lifting weights," he said. "But if it is delayed much past September, it will hurt us. We'll just have to wait and see.'

IF A DELAY is imminent. Patton added, the team will probably seek swimming time at City Park pool, since the city Recreation Center pool is "booked solid," he said. Patton and Woodside have managed to remain optimistic about the completion of the pool work. Perhaps it is because actual progress can be seen.

"I have confidence that they'll do everything they can to get it done," Patton said. The coaches can't help but

anticipate that day when the last tile is laid and the tank is filled. The added depth will greatly improve the whole pool, besides alleviating the diving hazard, Patton claims. "We'll have one of the fastest

pools in the country when it's done," he said. Deep water is faster than shallow water, he explained, because water turbulence dissipates better. "I don't think it (the year's delay on reconstruction) is going to make a turnabout in the program in any negative way," he said. "We had one of the top programs in the country when we pulled the boards out. What hurt us was that we lost our divers."

PATTON EXPECTS TO see results in the swim program when the ordeal is over. "We're really looking to upgrade the quality of competition here," he said. "It should definitely help us draw better teams in the future."

After all, both coaches contend that good teams should compete in good places.

Page 10C-The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979

Conference.

Olson struggles with lowa handicaps

By SHARI ROAN Associate Sports Editor

When Lute Olson first came to Iowa City from Long Beach City College, he inherited a team that had lost twice as many games as they had won the previous season. That was in 1974. Now, at the end of his fifth year as head basketball coach, he can claim a share of the 1979 Big Ten title.

Championship teams from Iowa are rare - only in 1955, 1956, 1970 and 1979 have the Hawkeyes won league titles and made NCAA appearances. In Olson's five years at Iowa he also has seen the ups and downs that punctuate the basketball tradition here. His 1975 squad went 10-16. The 1976 Hawks coasted to 19-10 and in 1977 the record was 18-9 with a fourthplace league finish. The 1978 team suffered at 12-15 before luck turned with this year's 20-8 record which included a 13-5 Big Ten mark.

Olson doesn't guarantee the start of a basketball empire at Iowa. But with a championship season under his belt, plans for a new arena underway and perhaps the premier guard in the nation on his team, he hopes to be able to avoid the skids that have plagued Hawkeye teams in the past.

Here, Olson talks about the past seasons, the inherent problems unique to Iowa's basketball program and why he chose to stick it out when an attractive job on the west coast beckoned.

Q: After four mediocre basketball players, number finishes in the Big Ten, do you feel this season's accomplishments coupled with plans for a new arena will provide a turning point in Iowa basketball?

A: You'd like to think that that's the case, but if you look at the program in the five years that our staff has been here, the first year we came in with practically nothing. I think we were 10 and 16. The next year we won 19 games. The following year with the forfeitures by Minnesota we ended up with a 20-game winning season which is the first time since 1955-56 that two Iowa teams have put back-to-back years of that type carefully, he might not have together of more than 18 wins. So we really didn't look at it like vear that things have really gotten done. We felt like those two years were both excellent years. Regarding the arena, the fact that the arena will be built, again is going to have more of an effect on our future recruiting than it had this year. So we'd like to think that it's going to signal a turn in the year-to-year success of the basketball program. There are still built-in problems that we face in Iowa basketball that you're not going to be able to do a whole lot about. One of which would be that the state population is small. We constantly have to go out of state for a good part of our recruiting. A second problem is that most of the population of the state is centered in small communities where players tend to participate in football, basketball, baseball. And basketball has become a specialization.

out-of-state players. I think it's advantages on us. On the other a long-standing trend. And it gets back to that population thing again. Basketball, by nature, is pretty much of an urban sport. It's a game where the best players generally come from the larger cities because they've been exposed to great competition through their formative years. There's a definite correlation between the Ten competition that a young man faces and how successful he

Q: What about recruiting from the Chicago area. Do you think not drawing from that area this year will have any effect in future recruiting?

A: No, it won't have any effect. In Kenny Arnold and Kevin Boyle's case, they were both well-known in Chicago. Ronnie Lester will probably be the premier guard in the country this year. We've got our roots in there and there are going to be years when you get shut out. But then there are going to be other year when you come out in good shape. Out of eight returnees next year, six of them of them are from the Chicago area. I don't how we're going to have better exposure than what we're going to have. Even though we didn't get anyone in our freshman group. We will be continuing to hit that area hard. The reason you hit Chicago harder than probably St. Louis or Kansas City or some of the others is that they've had a history of producing great one. Number two, the kids are brought up on Big Ten basketball. But they don't have any great allegience to the University of Illinois. It's like a

When you first came here, Q: you have certain ex- as permanent, probably, as this did pectations that you have seen fulfilled and what are your expectations for the remaining ten years of your contract? A: As far as expectations

things Coach Fry is saying right now. Like, if he would have looked at that schedule more come. If I had researched the thing a little bit better than what I did. I might not have come. You don't have the same chance as a number of schools in the league. If Illinois does a good job of recruiting Illinois, we would have a difficult time competing with them. Indiana, the same thing. They both have new facilities and excellent instate basketball. Michigan and Michigan State have a definite edge because of the strength of the state of Michigan with their basketball program. And Ohio State is the university in Ohic. You have some built-in disadvantages that are always going to be present and are always going to place you in a position where if you do as good a job as everyone else in the league does, you're probably relegated to somewhere near the bottom of the Big Ten Conference.

hand, we felt if we worked hard enough and if we could come up with some special things that might allow us to get an edge in the recruiting, like our summer camps have given us. Out of the last 11 signees, nine of them were in our summer camp. I think that edge is gone, but now, by having tied for the Big Championship, we probably don't need that kind of edge as much as we needed it ends up being in the Big Ten four year ago. Expectations are that we are going to have to work awfully hard to make this program a succesful program.

The shares

Q: What about your future here? Why did you sign such a long contract instead of one for four or five years?

A: Well there's probably only one other job that I would have considered leaving Iowa for. And that one was the one that happened to open up in the University of Southern California situation. And my feeling going in was either I was going to make the move to USC and try to make that a permanent position where I would continue working until I was done with coaching. And then at that point I would not have been looking for another job.

On the other hand, if I was to stay at Iowa, then I wanted to make this, hopefully, the last stop in my coaching career. So, whether I stayed or went, I wanted it to be the last move. If I stayed, I wanted to be in a position where I would coach the remaining ten years and then, at that point, I would consider something in athletic administration or whatever. But, going or staying, I wanted to make it as permanent as I neutral area that sits nearby. possibly could. And the contract out there would have been not as long, but certainly every bit,

> one would have been. Q: So you weren't pressured in any way into signing a longterm contract?

when I came in, I guess I would A: No. I don't know how that have to think about some of the thing (the contract) came up always said that, all things

being equal, it could hurt you. because during that period of time I was so involved in my season, I didn't want to get involved in any kind of bargaining or hassling or anything else. Whatever the university felt they wanted to do, that was fine. As long as they understood that I would have to weigh the two situations. The situation there (at USC), in the long range outlook, would have been a considerably easier job than what the Iowa job is. Because out of the top 20 players, for example, in California this year, 16 of them lived within 40 miles of the campus. And whether you're a good recruiter or a bad recruiter, you'd have to be awfully bad not to pick up some of the very top talent. Whereas here, we generally have to go quite a ways into

other people's backyards to recruit. Whether I staved or whether I left, I wanted to try to make that a permanent position for me. I don't have any desire to move again, somewhere else.

Q: Would you have considered staying and signing that long a contract if there hadn't been plans for a new arena?

A: No, if I hadn't had the feeling that a first-class arena was going to be built, I don't think I would have made a move to that - signed that long-term contract. Because, as I indicated before, there are some built-in problems that we have with population and being on the the game. western fringe of the Big Ten. If you're on the eastern fringe of the Big Ten, like Ohio, you would go into Pennsylvania and New York to recruit in populous areas. But for us on the western end, we can go into South Dakota and Nebraska and you might not find a player every 10

We can be given a first-class arena to give us at least a chance in that area that the Field House has been a deterrent to us. I don't think I've belabored that point in terms of recruiting, the Field House being a problem. We

But if a kid really wants to come here it's not going to keep him from coming here. But I know of instances in the past where we've lost kids because our facilities were so outdated compared to the facilites of other places they were thinking about. But, if you say that, then it becomes sour grapes. He's rationalizing because he lost this recruit or that recruit. But now that we do have a new facility in the making, I think I can feel safe in saying that it has been a real problem to us in the past. And it's going to be a real boom to us once that thing is completed.

Q: You mentioned often last season that the success of the year had a lot to do with the fact that your certain group of players never gave up. Do you feel like there is else about the way the program has progressed that contributed to your success this year?

A: Our senior group was made up almost exclusively of people who were not recruited by any other Big Ten schools. But we had to go in the early years just to get the toughest, most competitive young men that we could get. And even though, basketball-wise, he might not have been in great demand by other institutions, we tried to find a combination of a kid who was a pretty good player, but had great inner drive and great character and attitude towards

Now. in recent years we've been able to get in and compete with other people because we did have some success in our program in our second year and in our third year. It's more of a case of we're starting to get players with more physical ability now, that still have that kind of attitude that's so necessary to our style of play. We have to play that way if we're going to be successful

here. Because year in and year out, we're not going to get the kind of players that Michigan, Michigan State, Ohio State and Indiana gets.

After five seasons at the helm, Coach Lute Olson brought lowa its first Big Ten title since

1970. Olson admits the task wasn't easily a complished because of built-in recruitin problems at lowa.

Staff Writer

Q: Do you foresee more recruiting out of the state of Iowa in future years? Will this be a trend and how will it affect the program?

A: I think if you look back on the history of Iowa basketball, you'll see this trend has existed almost since the program started. The interesting thing in comparison with the championship years of 1955, 1956, 1970 and 1979 is that they all had an and year out with some of the

The primary selling point for our program was then, and still is, the tremendous enthusiasm of the Iowa fans. And the fact that they're going to be here win or lose is something that we try to sell consistently to recruits. The second thing that we try to sell is that Iowa City is a rather unique little college town. I think when players get in here for a length of time, they really feel comfortable.

We knew that it was going to be difficult to compete year in Iowa center mixed in with four universities that have definite

Budget

who take tickets," she

S

This year, gate receipts for wrestling and football, hasketball totaled \$2.2 million of the \$3 million budget, Elliott said. Of that, \$1.8 million came from football receipts. In 1975, football gate income covered half the total athletic department expenditures.

"Other sports have very little income, but the expenses of these sports are considerable more than any income they have. The income that football makes against the expenses that they have is considerable more. And, of course, the money that is in excess of that goes into other sports," Elliott explained.

THE REMAINDER of the income comes from conference distributions and sharing, TV, radio broadcasts, minor sports' gate receipts and money from Finkbine golf course. Under conference distribution, Iowa received \$140,000 from the Rose Bowl while Michigan fought the battle in Pasadena last January. Other bowl games rought the school an additional

security \$50,000 last year, Elliott for the fiscal year 1979-80. reported.

For Elliott, the budget figures

approved by the Iowa Board in Control of Athletics have been adequate and relative to Iowa's size as compared to other Big Ten schools. "There are several (schools),

because of the magnitude of their stadiums and their crowds, like Ohio State and Michigan, that have considerably more money involved. "But there are other considerations that they're involved with," Elliott said,

adding that many league

schools combine their physical

However, he would like to see an increase of "a couple thousand dollars. The projection is very much the

same as it has been. We're hopeful we will increase our gate receipts with Nebraska and Oklahoma on the schedule. "We've got to get something

out of it. Those are hard games to play," he added. Basketball and wrestling will also be relied upon for additional income, according to Elliott.

Grant, however, is looking for the rapid growth rate to coneducation, recreation and tinue for women's athletics. "I athletic department budgets. would expect an increase of

"We're hopeful we will increase our gate receipts with Nebraska and Oklahoma on the schedule. We've got to get something out of it. Those are hard games to play."

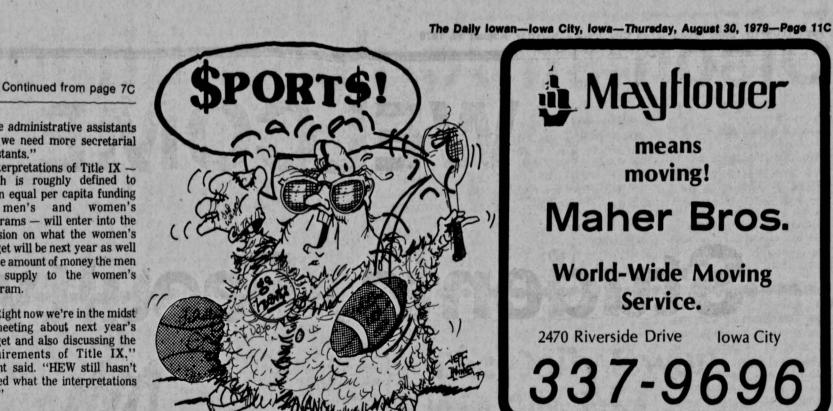

THE IOWA MEN'S athletic budget. Our biggest need right director doesn't foresee any now is an increased support major differences in the budget system," she said. "We need

some administrative assistants and we need more secretarial assistants."

Interpretations of Title IX which is roughly defined to mean equal per capita funding in men's and women's programs - will enter into the decision on what the women's budget will be next year as well as the amount of money the men will supply to the women's program.

"Right now we're in the midst of meeting about next year's budget and also discussing the requirements of Title IX." Grant said. "HEW still hasn't issued what the interpretations are.'

ELLIOTT DOESN'T anticipate the women's allocation figure to shoot up, at least not next year. "I don't expect it, this year, changing from last year," she said. "But it has changed over the years, increasing some. It depends on what some of the decisions are in respect to Title IX in the guidelines as to whether it will or will not get into our program and how deeply."

wasn't easily a

uilt-in recruitin

Baseball, hotdogs, apple pie and Mom - it's time to move over and make room for a newcomer.

If soccer continues to create the wave of excitement in the rest of the United States as it has in Iowa City, the sport may be the next addition to the list of all-time American favorites. Soccer's growing popularity can be witnessed in the Iowa City Kickers Soccer Club. The organization evolved in the summer of 1976 when the Hawkeye and UI Soccer Clubs initiated a soccer workshop for area youth.

Peter Gross, an Iowa City soccer enthusiast and player, was instrumental in organizing workshop. Gross, a European native, was born and raised on the sport just as most Americans grew up with baseball and football. "I have ayed and enjoyed soccer all of ny life and wanted to see soccer upper age brackets since the organization is so young yet in Iowa City. "It will take a little

time for more older girls to turn out," Strief said. "The girls can play soccer just as well as the boys if the ref good and calling all fouls," Strief added. "The girls are able to learn the skills just as easily as the boys. Also, size is not a factor in soccer at all." The Kickers was the first club to form in the Eastern Iowa Soccer League, according to

Gross, who is also director of the league's youth division. The league originally included only adult teams until the youth division was sanctioned in 1977. Presently, the youth division

of the Eastern Iowa Soccer across the nation? League, which involves over

that not many girls are in the other clubs and with fellow around waiting to come up to broken ankle," Gross said. teams within the Iowa City club. bat as there is in Little League," Gross said.

IOWA CITY IS second to Des Moines for soccer growth in Iowa, according to Gross. "Over 3,000 kids are playing in Des Moines clubs that have been organized for five years now," he explained.

The East Coast boasts the largest number of soccer enthusiasts but "most of the leagues out there have been going for 10 to 15 years now,' Gross said. "Over 8,000 kids play soccer in the state of Iowa right now. That's not bad at all considering how young our leagues are compared to those out East," he added. So why the boom in soccer

It's simple, according to 1500 youths, is comprised of Gross. Unlike football or fifty teams from the 17 baseball, soccer involves respective clubs. League continuous action by the 11 competition is found against players. "There is no standing

child must be allowed to play at least half of each game. ANOTHER REASON for soccer's popularity is that one doesn't have to be big to play the game. "Soccer is a thinking game that involves much coordination," Gross explained. "A soccer game involves a lot of sprinting that tests your endurance," Gross said. "The 13- to 15-year-olds will run up to 10 miles in one game that has 45minute halves. But the player must also exert an extra effort on top of running when he uses

soccer skills for both offensive and defensive tactics." A low injury rate is an additional point in soccer's favor, according to Gross. "In the three-year existence of the Kickers, only one serious injury has happened which was a

Club rules also state that each Chronical of Higher Education just not a brutal game."

"There doesn't exist the 'super star' pressure as in Little League.

See Soccer, page 8C

studied the seriousness of football injuries while a similar study on soccer was conducted in the Journal of Medicine. According to the soccer article, the majority of injuries were kicked shins _ with serious mishaps occuring usually through freak incidents. 'Soccer is a contact sport but you don't go out to hurt someone as in football," Gross said. "It's The children are not as pressured in soccer as in Little League, according to parentcoach Strief. "The Kickers stress the non-competitive aspect of the sport with the goal being out to learn the game and just have fun," she explained.

A domain where orcs hobnob with hobgoblins

By MICHAEL HUMES Editorial Page Editor

Hrolff of Grimthorpe, dwarf fighter of the tribe of Scquat, was quaffing a few orcish ales at his favorite tavern in the corrupt and dangerous Trollville area of town. Suddenly, a tall figure loomed beside him. It turned out to be a cyclops, his single lidless bloodshot eye regarding Hrolff with unalloyed hate, yellowed tusks dripping with ropy saliva, orangish countenance marred by red bristles and oozing sores.

"I don't like your face," said the monocular villain to Hrolff, who took the remark as a direct challenge. The dextrous Hrolff quickly freed his battle axe from its holster and swung at the one-eyed giant. The edge of his weapon bit into sinew and bone and the cyclops reeled; even so, he was able to swing his great spiked war club at the dwarf, but the meter-tall dwarf easily dodged it.

Again Hrolff struck at the giant and again his aim was true, neatly severing the cyclops' head at where his neck would have been had he a neck. Hrolff went to search the body; it was only at this point he noticed the two hobgoblins of

the dreaded Marrowsucker As these points build up, a tribe bearing down on him from behind.

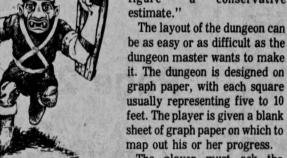

THE ABOVE SCENARIO, related to his or her profession. filled with gory battle and populated by creatures from legends or nightmares, is not something the average person is likely to witness every day, not even in Iowa City. But there are those whose lives are crowded with such adventures, throws a 10-sided dice once for whom an evening is not complete unless battle is joined with goblins and kobolds, for whom manticores and trolls are hits to kill (HTK); for each level as real as tabby cats and basset that character advances, he or. hounds. dungeon, they ask the DM what they can see. Before them is a hallway that goes 50 feet and turns to the left; there are doorways in the hall on the right and left, 25 feet away. There is nothing else in the hall. The party goes to the door on the left and listens, but they hear nothing.

THE GNOME, BEING the strongest member of the party, rolls a six-sided dice to open the door. He needs a one, two or three, and rolls a two; the door is open. The DM describes a room that is 15 feet deep and 15 feet wide. Unfortunately, it is occupied by four zombies who stagger forward to attack the party. The cleric pulls a holy symbol from his tunic and turns the zombies away.

The party closes the door and goes to the door across the hall. They listen at the door, and hear nothing. The gnome rolls a three and the door opens. The DM describes a room that is 20 feet wide and 25 feet deep. Against the far wall is a chest. The gnome rushes forward to open the chest, but when he is within five feet of it, a secret door on the west wall opens and a troll rushes out. The gnome strikes at the troll with his sword but misses; the troll strikes at the gnome with it claws, hits with both, and does 14 hits of damage, killing the gnome. The other two members of the party slam the door and rush down the hall.

Paul fanasty group, the Castle and Crusade Society. A member of the group, Dave Arneson, designed the rules for a fantasy game set in a rather nasty section of "The Great Kingdom" called Blackmoor. Arneson and Gary Gygax later refined the game into Dungeons & Dragons and went public with a single booklet in 1974.

That booklet has since expanded into a whole line of Dungeons & Dragons books, maps, charts and playing aids. The basic game costs only \$10, but a "serious" player might have over \$100 invested in his dungeon.

THE FIRST STEP in Dungeons & Dragons is to "roll up" a character. This is done by rolling three dice six times to determine the characteristics of strength, intelligence, wisdom, dexterity, constitution and charisma.

Each characteristic has a particular function: strength determines a characters ability to fight, to carry heavy burdens, to open doors in the dungeon itself; intelligence and wisdom determine a character's magical ability; dexterity relates to a character's fighting and defensive capability; constitution determines a character's resistance to disease and whether he or she can be resurrected from the dead by a High Priest who might be passing by; and charisma determines how the money for the books, dice, successful a character will be in maps and other equipment and his or her dealings with other determines the length of the characters and how many henchmen he or she will be able to attract.

The characteristics rolled

games and pin-ball.

to memorize 55 minutes of Denzas Argentinas. While she be able to play well and would poser before.

DIAMOND SAID SHE began practicing the pieces at the beginning of the school year and finally had them memorized a month before her recital.

"The most important thing is you can start to worry about style and expression. It is odd, though — you play the music for so long and so often that it just comes to you, your fingers do it for you," Diamond said.

Diamond said that when she plays she does not listen to the music as much as to the tone. said. She said that if she listens to the melody she will often forget where she is and make a mistake.

IN ADHERENCE TO her school-year-long rehearsal regimen, Diamond could be found most school nights practicing in a small cubicle in the Music Building. With a dreamy glaze in her eyes she would play a piece, then take a 30-second break. As she practiced in the spring, her attire of tennis shoes, jeans and tank-top Iowa T-shirt oddly contrasted the sounds of Bach and Mozart.

"I usually spent two to three hours each day playing the plano. It was hard work but after a while it turned into a way to relax and unwind," she real; I'm really doing it."

said. THREE DAYS BEFORE her recital, Diamond said she felt

completely ready for her performance. She said she still to know your music well. After thought the whole idea of a you have learned to play a piece recital was part of some long and somewhat scary dream. "Just before the recital I felt I knew my music well and I wanted to perform it for others. You can't rehearse a piece to long or you risk the possibility of losing your feel for it and it can get boring to play," she

> Among the things she was not concerned about before her recital was what other music students would think of her performance. She said she only

wanted to satisfy herself and her instructor.

"I KNOW MANY other students who have played much longer and who play much better than I, but it doesn't really matter. When I get done playing a piece and I've done it well I just say good and com-mend myself," Diamond said. During the day of her recital, Diamond said she tried to relax and concentrate on her style. A few hours before her performance she said, "Before, all

of this felt like some sort of dream, but now I know it is On May 16 at 6:30 p.m., in

A long way to go TV reflects tolerance for abuse

By MILES DUCORE Staff Writer

When all else fails, there is television. In this town of poetry readings, discos, chamber music and athletic fields, it is easy - maybe all too easy - to find oneself eye to eye with CBS, NBC or ABC; nor should we ignore the growing place of Public Television in the air and in our lives. It is hard to believe that anyone ever came to Iowa City intent on watching much TV, yet many of us here will spend more time staring at the tube than in any other activity that might even vaguely be described as entertaining. If we watch Saturday morning cartoons, we have plenty of company, no small part of it attending college, too. (One school in Illinois reported not long ago that more than threefourths of its freshman class watches cartoons all Saturday morning.) And "The Gong Show" is holding its own.

That the programs rarely rise above mediocre is understood and the cartoons are probably no worse than the rest, showing as much imagination and often more talent, continuity and a better sense of television's limitations and

potential. We are color- or sensitive, stereoscopic beings, something - almost anything. and our vision usually takes precedence over our other the important news, maybe the most important news of the day, senses. Television needn't do more than periodically change that finds a secondary or even the picture to keep our attertiary spot in the evening tention, and there are times reports because there is no film to dramatize it. But what can when it doesn't do any more than that. Roger Mudd you do with much of the reporting the news but facing scientific data whose meaning the wrong camera is an image dependent on complex is

Opinion

Page 6D-The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979

familiar to everyone. Until a few years ago, we sat through those long, monotonous reports, not paying too close attention probably, and then scratched our noses or chewed our fingernails more from boredom than anything else. Then the networks began switching cameras on the whose job is not easy. And the newscasters, purely for dramatic effect, and there was Roger Mudd talking to the wall. Of course, we didn't get any more news than we ever had.

IF TELEVISION NEWS suffers from anything, it suffers most from its, and our own, visual orientation. No news some satisfaction from the service can adequately convey the agony and helplessness of capabilities. Television is the Vietnamese "boat people," announcers wouldn't talk so

spendable income or IN GENERAL, THOUGH, What is most regrettable is Public Television seems to have set aside the notion that great art guarantees great TV. The Victorian England of "Upstairs-Downstairs" has conjured up much good literature, but some of the programs were real sleepers. The local network - IPBN -

also originates shows on statistics? It isn't that the political and economic issues in numbers are not reported, but the state. It has its version of that they are buried under ever-"Washington Week," a farm program dealing with growing prices and unemployment figures. everything from organic soybeans to citrus exports and Mary Jane Odell's weeknight ON THE OTHER hand, television does a very interviews. Public Television creditable job with professional continues to experiment in its sports and major amateur role as the alternative to sports. The network cameras commercial television, offering a wide range of music, drama, follow footballs better than dance, sports, documentaries some defensive linemen and children's shows. When we turn off the coverage of the Olympic Games and other events has broadened

television, we rarely ask ourtheir appeal and so contributed selves what we thought of the to our physical well-being. Of course, TV is the ideal medium program, the opposite of our behavior following a concert, for sports. The camera can play or movie, or when we have follow and isolate action, and finished a book. Maybe it's because television is too easy, with almost no understanding of the rules, a viewer still derives the cost hidden in the higher prices due to TV commercials. presentation of physical strength

> WE DON'T ASK very much of television because television that TV has a long way to go.

development of personalities TV characters emerge fullgrown in their first five minutes. They are closer to comic book heroes and heroines than real people, but we aren't even treated to the imaginative and talented drawings in the comics.

The viewing public has come to accept and expect this, and we watch the sit-coms and crime shows, not for entertainment but diversion. TV has no calories; these shows offer nothing to digest. A reader is forced continually to create his or her own pictures of characters and events. The ballet-goer must synthesize meaning from body movements synchronized with music. These are introspective acts, which tell the viewer something about himself or herself. But TV doesn't force us to look into ourselves, and so doesn't tell us very much about ourselves.

SO, WHEN ALL else fails and we find ourselves deeply entrenched in an evening of "Kojak" and "MASH" and "Mork and Mindy," we should at least realize our nearly infinite capacity for laziness and our tolerance to the point of abuse. And we should realize

1.

and coordination. If only the

violent, but certainly no more though the television reports much. violent than the blinding of are perhaps most impressive. Gloucester in King Lear. It is Still, the newspapers and veiwers are much fewer and in loudspeaker squawks and we erotic and sexually exploitive, magazines have been far more which, in that sense anyway, is get worn-thin plots, atrocious but no worse than an ad- informative. It may be that we less public than commercial TV dialogue and actors and acertisement for men's un ould do everythin alleviate their suffering, so derwear in a recent Newsweek.

TELEVISION'S CRIME WOULD seem to be its ubiquity, its accessibility, rather than its morality. Actually, television touches on many of our values and concerns, conscious and unconscious, though there is often a delay while the networks fumble around for an "acceptable" presentation of the material. Thus, "Mary Hartman, Mary Hartman" and "Soap" reduce adultery and homosexuality to slapstick and their characters to Batman and Robin. And these shows are the "boat people" better if we best, funniest, when the hammer strikes not a thumb but the funny-bone, a place we know can be very painful. TV does reflect our society, it just isn't very illuminating.

"One picture is worth a rates in Iowa. We would learn thousand words," and so more from a graph comparing television has an enormous mortgage rates to interest rates

and

e of

all.

Going to the movies may never be the same again in Iowa City. A new item has been added to the usual fare of disasters, Vietnam soul-searching and true love tales - a musical alternative. The Movies are a new band in town, a five-piece outfit that plays light, tasteful rock 'n' roll, a good deal of swing in both the country and jazz veins and some blue-eyed funk. Comprised of a trio of local veterans and a pair of Easterners, the Movies are not quite like any of the other bands in town. So far they have managed to avoid falling into the megawatt trap of high-powered noise, playing instead a distinctive brand of high-energy, low-decibel music that sets them apart from most of their Midwestern contemporaries. If Ted Nugent is your tankard of tea, you probably won't care for this band.

In a sense, the movies are a reactionary band. "We just kind of got sick ng into local taverns and hearing real country music," explained bass player Gary Horrell, "you know about last winter that's all you could hear around here, really heavy country. We just figured people might be ready for a change...something a bit more tasty." type of a deal, so I called and he came over. That's how we got him."

With the personnel set, the band began to rehearse in earnest, building a repertoire that includes songs by Van Morrison, Jackson Browne, Linda Ronstadt, the Guess Who, Orleans, Jonathan Edwards, Elvin Bishop, Eric Clapton, Michael Franks and others.

THE CRITERIA FOR choosing songs were simple. "If we like a song, we do it," Roth explained.

'We would like to make as much money as possible, start making money on the weekends instead of spending it.'

play.

At present, the Movies are a weekend band, with no intention of going fulltime. "I think we're going to stay pretty much a weekend band, maybe three nights a week at the most," Horrell explained, "unless something really good comes up, an opportunity for a lot of money. We would like to make as much money as possible, start making money on the weekends instead of spending it."

"We'd like to get as good as we possibly can get," added Desterhaft, explaining that any further speculation on the future of the band would be fruitless

"I WOULD LIKE to put out a 45 of original stuff, for regional use," Horrell said. "We'd distribute it ourselves, just for bookings' sake. We might be able to get some airplay on local stations ...maybe it could boost us another \$50 a night or something. It would really help out, I think, if it's good."

One favorable aspect of this

pair that they have indeed been playing together for some time, for they seem to anticipate one another with little or no effort.

The vocals are shared by Smith, Roth and Desterhaft, with Horrell chipping in on some of the harmonies. Each singer has a good voice, with Roth's bordering on the sensational. The harmonies (arrangements courtesy of the Yard-ape) are quite good, sweet and tight. The band plays underneath the vocals very well, only occasionally allowing the instrumentation to overshadow them.

Desterhaft favors a clean sound, playing well-thought-out lead lines and a wide variety of chords on all the tunes. He avoids, as do the others, any really flashy stuff, preferring, it seems, to add as much as possible to the ensemble sound

Rose's electric piano is constantly swirling just beneath the surface of the sound, adding a great deal of depth to the band without ever standing out. His leads are similar to his rhythm playing, densely textured with a minimum of flash.

The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979-Page 7D

The Ultimate in dance and contemporary Sound found in a most accommodating atmosphere

SO HORRELL AND drummer Mike Smith, who have been playing together "off and on for about six or seven years" enlisted the aid of guitarist Steve "Yard-ape" Desterhaft, a Massachussetts transplant who has been playing locally for some nine years, and began to put together the band last January. Shortly thereafter they were joined by singer Pam Roth, originally from New Jersey, who is singing professionally for the first time in the Movies.

"We just practiced four-piece for a long time," Horrell said, "We figured that's the way it was going to be ... until we came across a piano player. I found (pianist Mike) Rose's number ... you know, 'piano player looking for a job'

"I'm tired of learning songs just because somebody said that I should learn them," added Desterhaft.

"Now, since we have a repertoire," Horrell chimed in, "we're kind of a little bit more choosy. We try to make sure that they're danceable and that people are going to get off on them as much as we do. I think we try to keep a wide variety of songs...you can't really catergorize us, I don't think."

THE BAND ALSO plays some original material, written, for the most part, by Horrell. "We do a lot of originals," he said, "and we've got a lot of songs we've written but haven't had a chance to work up. When a band is so young, we don't know each other that well, or what we're really suited for yet. We find out each week what comes off better and what doesn't. We've got quite a few originals in the can, really - probably about 20 or so." The five original songs the band has incorporated so far are among the most exciting tunes they

that the Movies possess their own recording facilities, a four-track set-up owned by Smith. "If we do the recording," Horrell explained, "we'll do it right here in the basement, make the masters here and take it down and let somebody do the pressing.'

In Iowa City, the Movies have appeared at Gabe's and at the Moody Blue. They have no stage show to speak of, each member having a personal manner on stage. They are not a show band at all; they merely play good to excellent music with consistency.

PERHAPS THE MOST striking aspect of their sound is the rhythm section of Horrell and Smith. Whether they are playing a rocker or a seamless jazz tune, the rhythm is always flawless. Smith's crisp, imaginative drumming sets the pace and direction of the music, while Horrell's clean bass defines the sound and prevents it from becoming diffuse. It becomes apparent after a few moments of listening to the

THE MOVIES ARE a young band, having only started playing jobs last March, but they are not inexperienced in any sense of the word. Each member knows exactly what to do, when to lay back and when to shine.

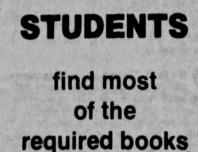

The dynamics of the band are at once their strong point and their only weakness. That they know what to do is unquestionable, but, as with any band, it takes some time to learn how they will sound in any room and how to tailor their sound to best suit the room they are playing. The band can sound a little muddy at times, but it seems only a question of becoming more familiar with their stage sound.

THE MOVIES HAS an awesome amount of talent and promises to deliver ever-improving music. They are well worth the price of admission, regardless of what that might be.

and speakers found in Western sunbathers, swimmers and countries are rare sights, mostly due to financial considerations.

A LOT OF middle and upper class folks flock to live performances. Concerts of both classical and light music are held frequently in the cities. There are annual music festivals, which usually last a full week and feature classical music. Classical dances have regaled many audiences and historical, comedy and romantic plays are also devoured delightedly.

One form of entertainment that has continued to be at the top for over a decade is the movie. India is the world's largest single producer of movies. They are often escapist, melodramatic adventures into the world of song, family, romance, crime and tragedy, but one may weed out a few

joggers are absent. And biking is more a mode of transportation than one of recreation in India.

Religious and social functions abound and many of them are public holidays. The grandest by far is the Diwali or "Festival of Lights," which spans a threeweek period when every home is lit up with dozens of candles and oil lamps. On the actual days of the celebration, everybody stays up almost all night bursting firecrackers and wearing their new clothes.

Holi, the "Festival of Colors," is another popular social occasion. During the festival, people douse one another with colored water, powder and paste and participate in various kinds of mischief.

Other religious functions are highlights for the more orthodox, who during certain seasons go to the temple every movies that are artistic and day. ably directed. The Indian THE DATING GAME is a tricky subject to discuss. In

ceremonial occasions. (This picture is from a remarkable

collection of photographs, The India I Love).

tremely popular in very limited student circles. Albums of movie-goer faithfully pays at least weekly visits to the cinema and enjoys the popular themes. SPORTS AND GAMES are

the forte of the youngster in India. Group games tend to be more popular and the young Indian avidly participates in a variety of them. Cricket and field hockey are the national games, with soccer, tennis and basketball gaining in impetus. Space and equipment are

scarce, with the result that a number of children play homemade variations of these games at street corners.

Indoor games enjoy great popularity among both young and old. Physical sports like football or wrestling are not common, nor is much emphasis placed on individual sports such as track or gymnastics. And, while auto racing is not very

big, there is always a crowd betting at the horse races. Travel is usually limited to the middle and upper classes. Indian tourists stay within the country and undertake their journeys by train. Rail and bus fares are quite inexpensive in comparison to the United States. Visits between relatives living away from one another are quite frequent and travellers are keen on sightseeing. Popular travel choices are the cities, religious centers, hill resorts, cultural centers, historical sites and wildlife

CAMPING IS RARE, but people love to picnic and go for strolls in the park. Gardens and beaches are crowded spots but

some communities, dating is fully accepted, but, for the most part, parents (especially the girls') frown on it. Dating goes on in group form and, to a certain degree, surreptitiously. Many schools and colleges are limited to one sex and, owing to this separation, boys and girls are not always comfortable in close pre-marital relationships. However, with the younger generation, customs are changing and Indians are getting to be more liberal and Westernized in their outlook.

If you have never lived in India, what exposure could you have, here in Iowa City, to the entertainment of the Indian world? The answer: limited. Indian movies are screened once every month by the India Association, cricket games are held most Sundays during the summer at City Park and an India Night is held every year in

the fall. Beyond that, the closest contact you will find with India is in your clothing store. If you pick up some hand-woven cotton shirts, chances are they are from India.

We'll pay you for having it. When you use Privileged Payment Share Drafts to pay your bills, or for any reason, you earn dividends (interest) on the unused balances that remain in your account throughout the dividend period. just like your regular share savings account It's a new easy and unique way to make some extra money

We'll pay you if you open a Privileged Payment Account with us. After all, privileges are something you shouldn't have to pay for.

It's Free. There's no monthly transaction charge, no minimum balance requirement. We believe that you shouldn't have to pay us to keep your money here. In fact, we consider it a privilege to have your business. If anything, we should be paying you - which is precisely what we do. So forget about service charges and

minimum balances There aren't any It's easy to reconcile. You'll find a "carbonless" copy beneath each Privileged Payment Share Draft that

HOURS: 9:00 a.m. to 6:00 p.m. on Mondays:

NCUA

9:00 a.m. to 4:30 p.m. on Tuesdays thru Fridays

you write Just write your draft and there you have it: an instant copy. You also have a draft register available for use. The register and duplicate drafts

give you two methods to balance (reconcile) your account. No storing of cancelled share drafts They won't be returned to you because you don't need them

To prove payment, just produce your copy of your draft and its corresponding account statement. Together they provide legal evidence of payment. If necessary, we can also provide you with a photocopy of your original draft for a small fee.

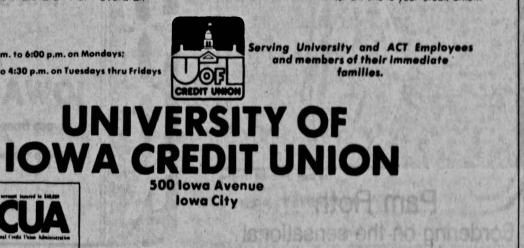

Automatic Transfer. We'll automatically transfer money from your regular share savings ac count in the event of an overdraft Think of it as extra protection in an unexpected situation when your credit union is not open for business. Write a draft for more han you have in the account and the extra money will be transferred from your regular savings in order to cover the overdraft

It's more convenient. When you open a Privileged Payment Account. you're putting most (or all) of your personal financial matters under one roof your credit union's. Your spouse may sign if a joint account is desired.

In fact, we think it pays to invest your entire paycheck with us So much so that for those of you who are eligible to do so it is a requirement for enrollment in the share draft program. To deposit your entire paycheck with U of I Credit Union your signature is required on the University authorization form 1321. This form is available from the credit union or your department secretary.

Relaxed delivery of WSUI broadcast fixture bucks trend of radio carnival barkers

By RON GIVENS Staff Writer

Jim Dougherty is an oasis in radio's wasteland. In the midst of screaming commercials, screaming music and screaming announcers, his gravelly voice is that of a friend.

Dougherty's "Jazz and Jim" program on WSUI reaffirms the fact that radio is an intimate medium. Weekday evenings from 9 p.m. to midnight, Dougherty plays jazz and talks. His low-key patter is a welcome relief from the carnival barkers of the airwaves.

Some may find Dougherty's taste in jazz a bit old fashioned. Now a portly 44, Dougherty was weaned on big band music, and although his program draws from all eras and styles of jazz, "Jazz and Jim" is dominated by big bands and the musicians who played in them.

ON TRUMPETER MILES Davis' birthday, Dougherty's show highlighted all phases of Davis' career except the most recent one. The tribute began with Davis' early days with saxophonist Charlie Parker and ended with "Bitches Brew," a seminal jazz-rock work. For Dougherty, Davis' subsequent work has been unacceptable.

But none of this takes away from the beauty of Dougherty as an announcer. He successfully transforms radio into what it should be — a one-to-one relationship between announcer and listener. "When I'm broadcasting," Dougherty said, "I think of one person. Whatever I say is to that individual." Dougherty is also unusual in the depth of his commitment to the music he plays. Unlike some announcers who can play different kinds of music as easily as changing a suitcoat, Dougherty is committed to jazz. He uses his extensive knowledge of the

subject to supplement the music he plays with information. And in his nine years at WSUI, he has done interviews with many of the major jazz artists of our time, from Duke Ellington to Dave Brubeck.

IT'S ALMOST AS if Dougherty's life has pointed to his job at WSUI. At the age of seven, he toured the WSUI studios on a visit from his native Ft. Madison and was bitten by the radio bug. He never recovered.

While other kids pretended to be doctors and nurses and cowboys and indians, Dougherty would make believe he was a radio announcer, playing records and talking into an imaginary microphone. Whenever his family traveled somewhere, Dougherty would visit the local radio station.

"I had a closed-circuit system which broadcast from a microphone and record player in the bedroom to a radio in another part of the house," Dougherty said. "I conducted record programs, wrote commercials and read news."

DOUGHERTY'S PERSEVERANCE paid off. At 13 he was guest announcing at a Ft. Madison station. After his family moved to Muscatine, he landed a job with the local FM station while a junior in high school and continued to broadcast there part-time while finishing high school and completing a degree from the UI, at which time he went to full-time.

While at Muscatine he played all types of music, from polkas to big bands to Bill Haley and the Comets. He also worked as music director and program director while at the station. Except for the years 1960-62, he was at the Muscatine station from 1958 to 1970. But as rock and roll grew in popularity Dougherty began to be dissatisfied. For someone who had grown up in the heyday of the big bands and had listened to jazz on the radio after his parents had gone to sleep, there wasn't much reward in playing rock.

So, in 1965 Dougherty began to syndicate his own jazz and big band programs while continuing his regular job. These were recorded in the attic bedroom of his home. The following conversation resulted when a station official discovered Dougherty's syndication efforts:

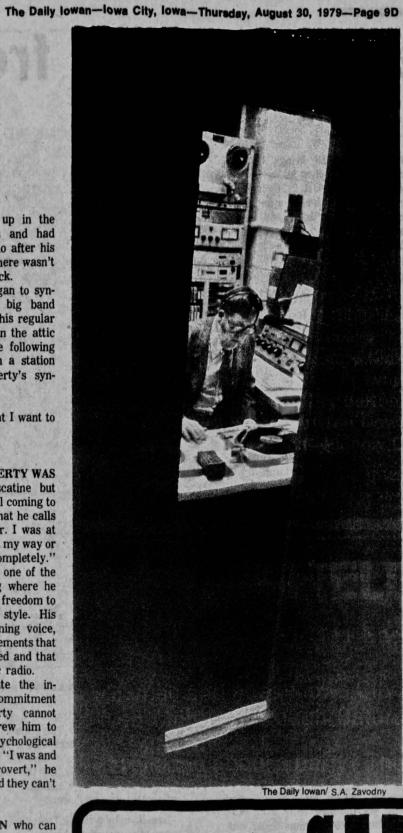

"Do you get paid?" "No, but I get to play what I want to play."

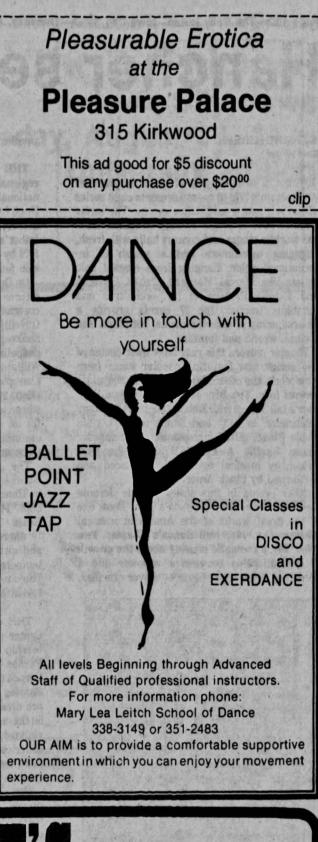

"You're a damn fool."

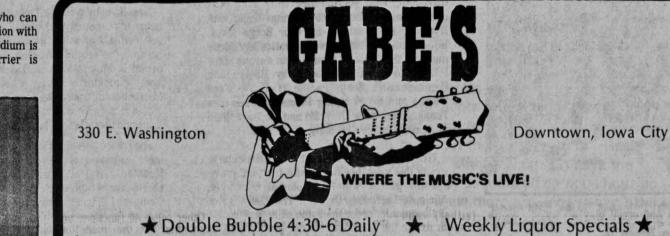

EVENTUALLY, DOUGHERTY WAS taken off the air in Muscatine but continued to work there until coming to WSUI in October of 1970, what he calls "the salvation of my career. I was at the point where I had to do it my way or get out of broadcasting completely." Dougherty's WSUI job is one of the few places in broadcasting where he would have enough creative freedom to work in his own unique style. His relaxed delivery, non-booming voice, and style of music are all elements that commercial radio abandoned and that can only be found in public radio.

Curiously enough, despite the intensity and duration of his commitment to broadcasting, Dougherty cannot identify what originally drew him to the field. Dougherty's psychological make-up may provide a key. "I was and basically still am an introvert," he said. "I can reach people and they can't reach me."

IRONICALLY, THIS MAN who can so successfully achieve interaction with a listener through the radio medium is uncomfortable when that barrier is removed.

Jim Dougherty prepares a disc for broadcast on his nightly "Jazz and Jim" program.

WOMEN. YOU'RE EQUAL IN THE AIR FORCE.

Women start out on the same footing as men in Air Force ROTC. Women wear the same insignia and hold the same cadet positions in AFROTC, just as they do later on as Air Force officers.

And the same AFROTC scholarship can be yours as a woman. If you qualify, you can have your tuition, book costs and lab fees paid by the Air Force, and receive \$100 a month for other expenses. It helps free you to concentrate on your education. And that's important.

As an Air Force officer, you'll be expected to use your training and education, and be a leader managing people and complex systems. You'll be handed executive responsibility starting with your first job.

It's a great way to be equal, and a great way to serve your country. Check into the AFROTC program at your campus. Be sure to ask about AFROTC scholarships — you may be helping yourself earn an exciting new lifestyle.

Hancher season ranges from elegant to exotic

By JUDITH GREEN Staff Writer

In honor of its eighth year of operation, Hancher Auditorium's 1979-80 season presents eight series of music, theater and dance events. The series balance several of the best-known names from the world's stages and concert halls with fresh, engaging newcomers and a splash of international color. Ranging from elegant solo artists like Marcel Marceau, Itzhak Perlman and Estelle Parsons to full orchestras and acrobatic troupes, the 27 events provide a diverse array of entertainments, both light and serious, exotic and familiar.

Theater patrons this year have their choice of two series, one featuring popular items from New York, the other classical drama and more serious fare. The Broadway Series opens Hancher's fall line-up with Eubie! (Sept. 11), a flashy celebration in song and dance of 96-year-old Eubie Blake, gifted jazz pianist and composer whose Shuffle Along (1921) was the first Broadway musical completely produced and performed by black Americans.

Other events in this series include Jerome Kern and Oscar Hammerstein's Show Boat, one of the great works of the American musical theater (Oct. 16); Neil Simon's Chapter Two (Nov. 26), a romantic comedy about the growth of a relationship between a widower and a divorcee; and Ira Levin's clever thriller,

Young cellist Nathaniel Rosen, gold medal winner at the Tschaikovsky Competition, will perform March 14.

Deathtrap (Feb. 15).

THE THEATER SERIES brings two fine regional companies to Hancher as well as two national productions. "Da" (Oct. 2), by Ireland's Hugh Leonard describes, with candor and gentle humor, a man's return to his home for his father's funeral. "Da" was named Best Play of 1978 by the New York Drama Critics Circle and won four Tony Awards, including Best Play. On Oct. 26, the Milwaukee Repertory Theater returns to Hancher (it was last here in 1978 contrasting the light and dark sides of Eugene O'Neill) with a contemporary version of Shakespeare's The Taming of the Shrew. Minneapolis' Guthrie Theater brings Tennessee Williams' classic The Glass Menagerie, a lyrical example of confessional poetry in dramatic form (Feb. 29). Marcel Marceau, the French mime whose white-painted face and protean body can fill an entire empty stage withour benefit of costumes, props or sound, appears on a date yet to be announced.

The critically praised, much recorded Guarneri Quartet, making its third appearance in Hancher, opens the Chamber Music Series Sept. 14. It will be followed by the Canadian Brass (Oct. 3), a quintet described as the "Marx Brothers of brass" for its integration of comedy and virtuosity in its mixed Baroque and contemporary repertoire. On Feb. 8, the 11-member Toulouse Chamber Orchestra appears with flute soloist Michel Debost.

THE CHAMBER MUSIC Society of Lincoln Center performs on March 3. Its mixed membership includes Paula Robinson (flute), Leslie Parnas (cello), Walter Trampler (viola), Jaime Laredo (violin), Gervase de Peyer (clarinet) and Charles Wadsworth (piano), and its programs are diverse, wide-ranging and innovative. Last on this series is the duo of Miriam Fried, Isreali violinist, and Garrick Ohlsson, prize-winning American pianist (March 20). This partnership pairs two fine soloists to create one superb ensemble.

The Sunday series, new this past season, proved a popular choice for families and travellers, with its matinee time and light entertainment. The '79-'80 offerings begin with Danish pianist and clown Victor Borge (Sept. 16), a madcap musician whose antics have done more for the cause of silence than anyone since P.D.Q. Bach. He is followed by Rogers and Hammerstein's South Pacific (Oct. 7), Fred Waring and his 30 Young Pennsylvanians in a Thanksgiving show (Nov. 25) and the Bayanihan Philippine Dance Company (Feb. 10).

THE CONCERT SERIES is particularly strong this year, beginning with the diminutive Spanish pianist with the colossal technique, Alicia de Larrocha (Oct. 10). The Los Angeles Philharmonic, under the baton of its new music director, the patrician Carlo Maria Giulini,

Acclaimed actress Estelle Parsons will appear in a special event per formance of the award-winning monologue play, Miss Margarida's Way.

performs Dec. 1. Contrasting the "Apollonian" reserve of Giulini with the "Dionysian" exuberance of the orchestra's previous conductor, Zubin Mehta, Newsweek's Hubert Saal wrote, "Whereas Mehta built the orchestra into a virtuoso instrument, Giulini has given it a new refinement and mellowness."

Israeli violinist Itzhak Perlman (Feb. 11), who began his career with the 1964 Leventritt Award, and cellist Nathaniel Rosen (March 14), who became the second American to take the gold medal in Moscow's Tschaikovsky Competition, are superior young instrumentalists. Metropolitan Opera soprano Grace Bumbry, whose rich voice is equally adept in mezzo and dramatic literature, closes the series on April 19.

The Dance Series, as in the past, features twonight engagements by its companies. The Houston Ballet, under its excellent choreographer-director Ben Stevenson, performs the full-length Romantic ballet Giselle in a new production created by Alicia Alonso for her Ballet Nacional de Cuba, and a mixed second-

night program (Oct. 12-13).

THE FAST-RISING Pittsburgh Ballet, directed by Patrick Franz, presents, just in time for Christmas, the first Nutcracker to be seen in Hancher (Dec. 5-6). Of Feb. 19, the young dancers of the Joffrey II, the contemporary chamber ballet sponsored by the Joffrey Ballet, perform; second-night dance patrons will se Soviet folk dance and music by the Krasnayarsk Company on Feb. 22.

The six-member Pilobolus troupe returns to Hancher March 18-19 with its unique blend of dance, gymnastics and mime, converting bodies into moving sculptures, mechanical contraptions and animated creations.

The Chinese Acrobats of Taiwan (Oct. 21), jazz trumpeter Dizzy Gillespie (Feb. 4), duo-pianists Ferrante & Teicher (March 16) and singer Harry Belafonte (April 10) appear on the familyoriented Variety Series.

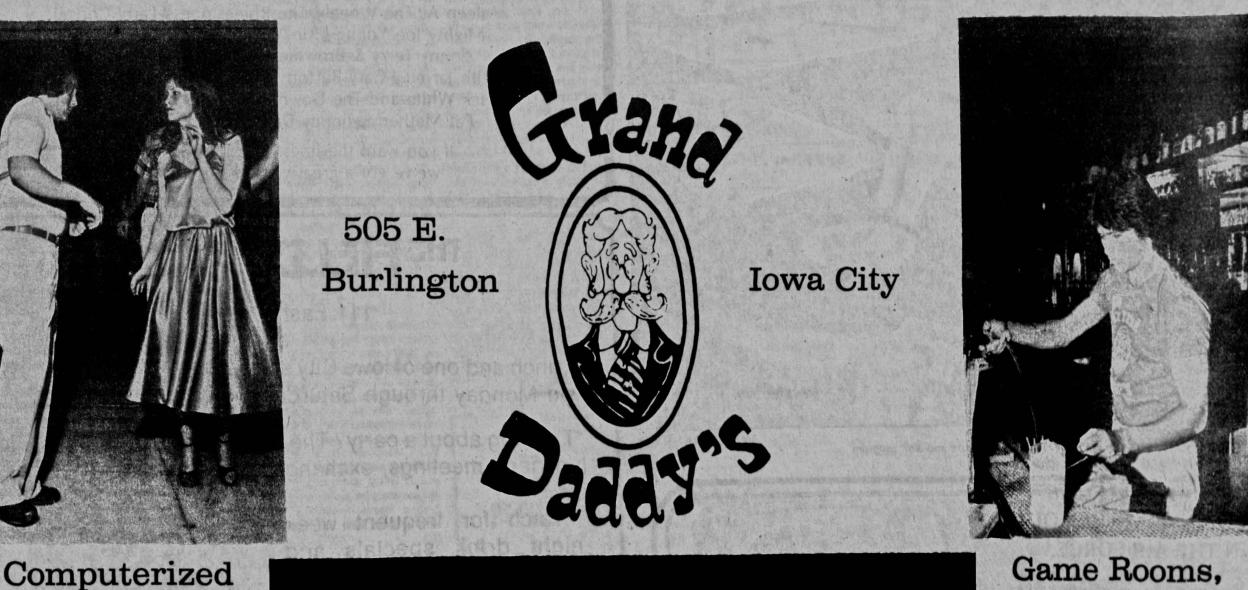

A SPECIAL EVENT not on any series is a single performance by Estelle Parsons in her

virtuosic monologue Miss Margarida's Way. She protrays a straight-laced, middle-aged teacher who gradually reveals her paranoia, sexua frustration, tyrannical nature and professional incompetency to her 8th grade biology class, played by the audience. Recipient of the Drama Desk Award for the most unique theatrical enperience, 21-year-old Brazilian playwright Roberto Athayde's work has been called a "damning denouncement of dictatorship."

Other special events include extra performances of Eubie, South Pacific, The Taming of the Shrew, The Glass Menagerie and the Houston Ballet.

Series subscribers can save up to 35 per cent over the cost of individual events, and the purchase of a series entitles patrons to buy special events tickets far in advance of the box office sales. Hancher's five-zone seating plan makes it possible for students, who receive \$2.00 discounts on single ticket prices, to attend all events for slightly over a dollar per event. Series tickets can be purchased until the opening night of each series' first event.

Living in Iowa City: How to beat the crunch

Page 3

More than 500 sophomores decided to leave the dorms this fall after last January's suspension of the parietal rule for sophomores, but the number of applications from upperclassmen has increased by about the same number. Residence Services Director Mitch Livingston says the sophomores falsely assume off campus housing will be easy to find, while more upperclassmen have applied because they have "had to fight for housing...they've heard the war stories, and they know."

n makes i

The crunch — that is what persons who assist Iowa City apartmenthunters call July and August.

The crunch occurs every summer when the new wave of UI students arrive for the start of the fall semester and try to find housing not already reserved or occupied.

Housing in Iowa City, like many other university towns, has been a scarce commodity in recent years. Although rental housing is more available than it was during the bleak period of the mid-70s, the supply still only narrowly exceeds the demand.

"It would be unfair to say it's loosening up," says Lyle Seydel, Iowa City housing coordinator. While the vacancy rate in Iowa City has increased from 1 percent in 1975 to the current level of 2-3 percent, Seydel said there has not been an appreciable change in the amount of available housing.

SEYDEL SAID a vacancy rate in the range of 4 or 5 percent is more desirable because it lets prospective renters "shop around" and it keeps rental rates lower.

Robert Johnson, an Iowa City apartment owner, said, "The market is not as tight as it once was. We're not seeing the pressure on rental units that we once did. This past January it was much more orderly than in past years," Johnson said.

Johnson said the housing market runs in cycles, and said it is his opinion that the supply is increasing at a greater rate than the demand.

"We're in a swing. Right now we're turning the corner on it and things will loosen up. It may not be right away but it will happen in the next couple of years," he said.

HE SAID THE reversal of the tight housing trend can be attributed to the construction of more apartment units and the steady conversion of older houses from single-family units to rental units.

Julie Vann, former block grant coordinator, said it is difficult to precisely determine the current housing situation because the most recent data was compiled during the period when Iowa City was experiencing "a housing shortage crisis." "In 1975 (when the last rental housing survey was conducted), people waited on the steps outside of the (Iowa City) Press-Citizen to get first chance at the new apartment listings, and that doesn't happen anymore," Vann said. But despite these glimpses of optimism, Vann said rental housing still makes up more than 54 percent of the city's total occupied housing stock, and the scarcity of rental housing still results in limited choice of rent, location and quality.

IF YOU ARE among the approximately 12,000 UI students (53 percent) who live off-campus in the lowa City vicinity and are either a newcomer to the area or contemplating a move, here are some tips and information on finding an apartment supplied by some of the local rental assistance agencies.

According to Jean Kendall, coordinator of the UI Housing Clearinghouse at the Union, the best time to look for an apartment is near the end of each semester when the housing turnover is at its peak. But she said many students seeking housing for this summer and fall began looking as early as last February.

Kendall said most of the newcomers to the Iowa City area do not anticipate the higher rents and may turn down some early prospects because they think they will find something cheaper. Once they adjust to the rent levels, they eventually find something, she added. Kendall said the Housing Clearinghouse estimates the approximate rents of their average listings at the following levels:

-three-bedroom apartments range from \$245 to \$590 with an average rent The Daily Iowan/

of \$375; --two-bedroom apartments range from \$165 to \$400 with an average rent of \$260;

-one-bedroom apartments range from \$150 to \$300 with an average rent of \$185;

-efficiency apartments range from \$110 to \$210 with an average rent of \$160; --cooms range from \$65 to \$120 with

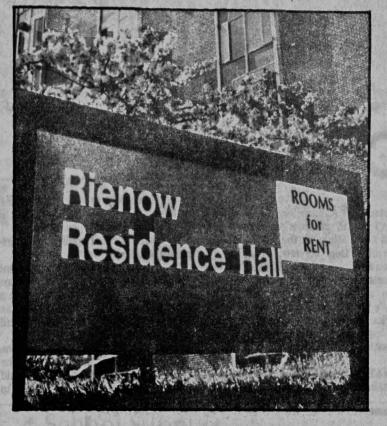

an average rent of \$95.

KENDALL SAID the clearinghouse recalculates these estimates several times each year based on the averages computed from the apartment listings it receives from various owners.

These listings are placed in bound notebooks at the information desk. Kendall said many of the apartments are rented within 24 hours after they are listed. She estimated that most apartment-hunters find a place in two days.

The most sought-after apartments are the ones that are within walking distance of campus, she said. Many of these apartments are never listed and are passed among friends or by "word of mouth." The second most popular apartments are those close to city bus lines, she said.

Sherry Watters, a counselor with the See Crunch, page 2E

Page 4

Iowa City rents may be high, but for more than 600 Iowa City apartment units, the federal government is picking up part of the tab. Low-income families or elderly and handicapped individuals may qualify. Many UI students are involved, according to officials, despite restrictions built into the program.

Page 5

Your housing costs can be at least 30 percent less than the lowa City average — if you live in the River City Housing Collective Inc. Started about two years ago, the cooperative now consists of four houses. Members say the savings are nice, but they also like the exciting atmosphere and "dynamic flow of interaction."

Page 6

The UI owns 12 houses and 37 apartments that it rents to students, faculty and staff. The rents are comparable to rents for privately owned housing, but there is a long list of people waiting to get in, according to Doug Young, UI assistant business manager. Page 2E-The Daily Iowan-Iowa City, Iowa-Thursday, August 30

I.C. neighborhoods: 'based on money, not common ties'

By ROD BOSHART Staff Writer

With the conversion of older houses to apartments and the advent of clustered apartment complexes, many areas in the Iowa City-Coralville vicinity have become rental neighborhoods.

The most popular rental areas among UI students are located north and east of the downtown area. Students are drawn to them because of the proximity to the central campus and a preference for living in older houses rather than new apartment complexes.

Many of the rental neighborhoods are comprised of houses converted into four rental units or houses still occupied by a family that rents out part of the house, said Michael Kucharzak, director of housing and inspection services.

Kucharzak said neighborhoods "take on their own characteristics because of the way the particular area is zoned." He said the area around Mercy Hospital has a heavy concentration of rental units due to its duplex and multi-family zoning while an area like Manville

Heights (east of City Park) has remained single-family with some rentals because of its zoning.

UNLIKE MANY larger cities where common bonds and overlapping ties distinguish neighborhoods, Iowa City's small geographic layout has tempered neighborhoods on the basis of economics and age, Kucharzak said. The character of many neighborhoods in Iowa City has been established by a common trait, such as the clustering of married student housing or fraternity and sorority neighborhoods, or by the density of large apartment complexes in one area, such as those along West Benton Street, the area west of University Heights or in many parts of Coralville.

"There are definitely apartment neighborhoods in Coralville," Coralville Mayor Michael Kattchee said.

Kattchee said Coralville is about 50 percent renters, but there are both students and non-students living in the various apartment complexes.

"MOST OF OUR apartments are the newer types. Nothing is over 20 years old," Kattchee said. He said the trend has been toward building more duplexes and triplexes in Coralville, and there is very little conversion of older homes to rental units taking place.

"I think maybe the people who used to build single-family dwellings are building duplexes now. This could be happening because we changed our zoning law so you can own half of a duplex," he said.

In contrast, Kucharzak said many of the new Iowa City dwellings being constructed are four-bedroom houses that he said may cause future problems for renters.

The way Iowa City's zoning laws are currently written, these homes could be rented eventually, but to no more than four persons, which would result in very high rental rates, he said.

"I HAVE ONLY issued one apartment building permit this year. So what does that say - there's nothing new for renters," he said.

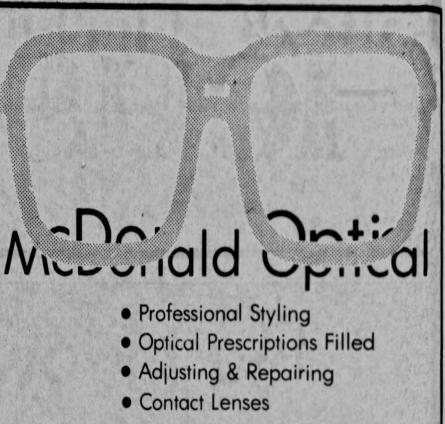

"Eventually only the wealthy will have single-family houses," Kucharzak said. "Those who have houses and can no longer afford the high costs will be forced to rent."

Kucharzak said he would like to see more of a mix between duplex or apartment dwellings and single-family homes in the future.

The city's planning staff is drafting a new zoning ordinance to be considered later this year. The ordinance will redesign the zoning of land in Iowa City based on the information gathered when the city's comprehensive plan was compiled, he said.

KUCHARZAK SAID the zoning trend has been to establish new apartment complexes on the city' periphery, but he said this will mean additional costs to renters who must drive farther to reach the downtown area.

A change in the zoning of the city's northeast neighborhood last year resulted in fewer rental units because fewer houses have been converted to apartments, he said.

Protective Association for Tenants (PAT), said prospective renters can also find listings in the PAT's weekly "Prairie Dog Review," The Daily Iowan, Iowa City Press-Citizen, Interstate Shopper, from area realtors who manage rental properties, the city's various trailer and mobile home parks, on bulletin boards throughout the city and from commercial rental agencies

WATTERS ADDED, "If you know a certain neighborhood you want to live

in, the best thing to do is to knock on doors in that neighborhood and ask if there's any housing opening up." The same method applies for apart-

ment complexes, Watters said. Kendall said most of the apartment complexes have waiting lists. Persons interested in renting an apartment in a complex should put their names on the list well in advance of the time they will need the apartment, she said.

Most of the people who use the clearinghouse are from outside the Iowa City area, Kendall added. She said many of these people cannot afford to

live alone but do not know anyone in the city, so the clearinghouse provides a roommate-matching service during the busy times.

THE CLEARINGHOUSE also provides a notebook of roommatewanted listings and mimiographed copies of the Press-Citizen want ads during the peak periods.

Meetings are arranged where prospective roommates have a chance to decide if they are compatible, she said

By TOM DRURY **City Editor** and DEB AMEND Staff Writer

C

Iry

Dan River/

Tenants are too often ignorant of their legal rights or afraid to exercise them, local housing authorities say.

The result is that both the state Landlord-Tenant Act and Municipal Housing Occupancy and Maintenance Code are less effective than they might be.

For all of the known rental units in Iowa City, the city's Housing and Inspection Services office gets "very few complaints," according to Director Michael Kucharzak. In 1978, the inspection services office received an average of 15 complaints a month.

Because of the city's high rental turnover rate, Kucharzak said, "sometimes people are here for months and n't know what the protection of the laws are."

SHERRY_ WATTERS, a counselor with the Protective Association for Tenants, agrees that renters often don't know ousing law.

"It's funny," she said. "It works both ways. Either they don't think they have any rights or they think that they have some that they really don't." Watters said that a tenant ho is unsure of legal rights nould either contact PAT or ucharzak's office. And she explained how a renter can proceed with action against a ndlord. (If it's unclear who the landlord is, as may be the case with corporation-owned apartments, Watters said nants should talk to the person who collects rent.)

FOR SERIOUS deficiencies in housing or if renters have tried to handle a problem informally without satisfactory results, she said, "start putting things in writing or have a witness there when you talk to your landlord. Keep Xerox ies of everything. Watters said a tenant with a

mplaint should ask that the blem be remedied by a specific date and make it clear

the landlord. Instead, the rent goes into the escrow account until any time within six months of certification for rent escrow that the building is found in compliance with city law. At that time the landlord can collect the amount in the escrow account. If the dwelling unit has not been found in compliance within six months of certification, money in the escrow account will be turned over to the tenant

KUCHARZAK SAID the escrow provision is "a rather significant benefit" for tenants. But he admitted that tenants have gone to escrow in only two instances since the city housing code was adopted last year.

"Maybe they don't want to hassle with it," he said, noting that many buildings have been declared eligible for escrow proceedings. Terry Steinbach, city senior damage deposit with an raised later. itemized list of damages to a WHEN A TENANT is moving

We want to get the word Watters says, adding that the out that retaliation is not permitted under the law, but even court costs are approximately \$15, which can be awarded to knowing that," people are still the tenants as part of a setafraid to complain, Kucharzak

"It's like you, me and the judge sitting here talking. It's not Perry Mason or anything," housing code prohibits showing that:

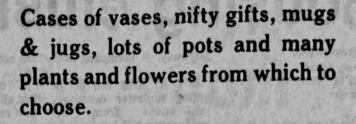

-complaints to a governmental body of a violation affecting health or safety;

-complaints to the owner or operator of a rental unit of such violations: -the joining or organization

of a tenant's union or association; and -pursuit of legal remedies. In the event of prohibited landlord action within six months of any of the above actions, courts are instructed to presume that the measure was retaliatory unless it is proved not to be.

WATTERS SAYS that the legal provisions for evictions are "a big area where tenant ignorance really helps out the landlord because landlords use the threat of eviction all the time.

A landlord is allowed to evict, increase rent or other fees, decrease services, or terminate CHAPTER 9.30.12 of the a rental agreement only after

No wonder people depend on us.

Downtown in Cedar Rapids The Mall in Iowa City.

that after that date legal steps may be taken to solve the

The kind of steps to take depend on the specific problem. For physical deficiencies that may violate city codes, such as inadequate ventilation, insufficient heat, hazardous wiring and others, tenants should notify the inspection services office. An inspector will visit the property in 24 to 48

"A simple phone call is all it takes," Kucharzak said. But, he said, "We don't get into aesthetics. Once a hole in wall is patched, then it's fine. We don't worry about what color it should be painted."

IF AN INSPECTOR deternines that a violation exists, the landlord is notified in writing and given 10 days to appeal. City law states that the landlord will be allowed "a reasonable time" to correct any violation. The time allowed is generally 90 days.

An inspector encountering a situation "which requires immediate action to protect the public health or safety" may ssue without notice or hearing an emergency order requiring mmediate corrective action. The inspector may also order vacation of the premises until the hazard is remedied.

There are other methods a enant may use to bring rented property into compliance with state and local law. State law allows a tenant to use a landlord's noncompliance with housing code as a defense against a charge of nonpayment of rent. A court may then order the tenant to pay the court all or part of the rent due and divide the amount among the tenant and landlord accordingly.

THE CITY ordinance provides that, should a landlord fail to comply with an in-spector's order to correct a violation within 90 days, the city will notify the landlord that the dwelling unit in violation is ligible for rent escrow.

A tenant of the unit may produce within 30 days a signed rent escrow agreement, cer-tified by the Johnson County Recorder's Office, with "a bank, trust company or other lending institution approved by the city." The dwelling unit is then certified for rent escrow by the city, and the tenant is no longer required to pay rent to

gone through rent escrow due to all the red tape that's involved." Kucharzak said the amount of time from a complaint to certification for escrow may vary, depending on the severity of the complaint and the amount of

time necessary to repair. **HE ESTIMATED** an average time span at five months - the 90 days normally given for

response to a violation plus two months for the city to attempt to talk a landlord into compliance. But he stressed that the time period is not rigid and could be as much as a year or less than 90 days, depending on the violation involved.

Watters was critical of the escrow program, saying the inspection services office has "adopted a procedure that makes it very hard to get your place certified for rent escrow. "It takes about six months and with Iowa City tenants usually having a one-year lease, either you find the problem on the day you move in, or it's not going to help you anyway," she said. And even after a rental unit has been certified and the escrow process begun, the tenant cannot get at money being paid into the account, Watters noted.

WATTERS SAYS the reason many Iowa City tenants are unaware of their rights is because many are first-time renters.

"The unfortunate thing about your first apartment is you learn the hard way," Watters said. "You get damages deducted that maybe you didn't cause but you don't have any

proof that you didn't cause them, and that's sort of sad but I guess it's the only way sometimes."

PAT gets 25 to 50 calls a week from tenants with serious problems with their landlords, she estimates. The most common complaint concerns damage deposits - either problems in getting them back or disagreements over how much should be deducted. Iowa law mandates that a

damage deposit must be an amount no greater than two months rent, and that a landlord must return all or any part of a

retaliatory conduct To avoid problems with crease in rent or other fees, a damage deposits, Watters says, decrease in services, tertenants should go over a mination or threat of terchecklist of the physical conmination of a rental agreement, dition of a rental unit after or eviction or threat of eviction finding a place. In the ideal because of any of four tenant situation, she explains, the actions:

place in the community."

By TERRY IRWIN University Editor and KELLY ROBERTS Staff Writer

Sophomores who left UI dormitories when plans were made to suspend the parietal rule may be back after roughing it in the Iowa City housing market, according to Residence Services Director Mitchel Livingston.

Since 1971 the rule has required nearly all unmarried freshmen and sophomores to live in the dormitories. But last January the state Board of Regents voted to suspend the rule for sophomores beginning this fall. The rule will be lifted for freshmen in fall 1980.

Livingston says students who chose not to renew their dormitory contracts because they were no longer affected by the rule are operating under a false assumption that finding a place to live in Iowa City will be as renewing their leases because easy as securing a dormitory they're moving back into the room.

"THIS GROUP THAT is not subject to the parietal rule next tired of cooking all their own year received a different introduction to the Iowa City housing situation," he said. "It makes a significant difference from the other students in the system. This group has had guaranteed housing. And it's likely that that assumption will carry over when they go out into the community.

"They think the market is as easy to walk into in terms of accesssibility, cost effectiveness and desirability. We think the experience may be disappointing.

More than 500 sophomores did not renew their housing contracts during the reapplication period last spring, Livingston

period of time.' "A significant number will be back in the fall saying, 'Where am I going to live? It costs too much. It's inconvenient. It's too

far away,' " Livingston said.

are not waiting for dormitory rooms, Livingston said. BUT AT THE end of the that all of them don't want to be spring semester dormitory in a residence hall room," he applications from upperclassmen had increased by said. "Maybe they're from out of state and they simply signed a contract. Or they want a 538 over the previous year.

"This group has had to fight for housing," Livingston said. "They've dealt with the market. They've heard the war stories, and they know. They're responding to it — the cost ef-fectiveness. And it's close and within financial reach."

not to attend the UI or will drop out during the first week of Local apartment owners say the total effect of the suspension classes, Livingston added. "Not all will show up on day of the rule will not be known until fall. one, and we will have space for

Federal subsidies could alleviate pinch of high-priced I.C. housing

City's part of the new housing program.

By ROGER THUROW Staff Writer

Squeezed out of Iowa City's notoriously tight housing market because of in-

According to Seydel, a family — which is described by the HUD guidelines as "two or more persons with a legal family relationship" - is eligible for the program ity it its gro \$9,650 for a two-person family, \$10,850 for a three-person family and \$12,100 for a fourperson family An elderly or handicapped individual must have a gross income of less than \$8,450 to be eligible. Seydel said the assets of a family or an individual are also taken into account when computing eligibility. Seydel said that once an individual or family is found to be eligible for federal housing assistance, they must make the proper rental arrangments with their landlord. He said the tenant is expected to pay up to 25 percent of her or his income for housing, and the government will pay the remainder of the rent through a subsidy to the family.

the HUD office in Washington, D.C. In Iowa City, the program's fair market rent, according to Seydel, is \$189 a month for a one-bedroom apartment and \$224 a month for a two-bedroom unit.

as

Ten sections of classes such core literature and relaxation were taught in the residence halls during the

The federal government is ready to assist low-income families and elderly or handicapped individuals by picking up part of the monthly rent tab.

Under the housing assistance payments program of the Department of Housing and Urban Development (HUD), the government is currently subsidizing the rent of more than 600 apartment units in Iowa City.

Known among local housing authorities as "Section 8," the housing assistance payments program is divided into two sections: leased housing and new housing. The leased housing program deals with apartment dwellings that were already in operation when Section 8 went into effect in 1975, and according to Iowa City Housing Coordinator Lyle Seydel, 384 housing units in Iowa City are part of this program.

THE NEW HOUSING section concerns public housing that is constructed specifically to be a part of the Section 8 program. The 248-unit Mark IV Apartments, which house low-income families, and the 64-unit Autumn Park Apartments, which are only for the elderly, are Iowa

UNDER THE LEASED housing program, the entire housing market in Iowa City and Coralville is open to the tenants, but the places they choose to live

in must meet several requirements. Seydel said the unit must meet the minimum housing standards of the city and the owner must have a rental permit. Also, the rent cannot exceed the fair market rent for the area as established by

that most Iowa City are "too expensive" to fall under the fair market value, and one representative of the Protective Association of Tenants said that most Iowa City apartments that do qualify "would be

TO SOLVE this problem, the new housing program was set up so units could be built specifically for low-income families. At Mark IV and Autumn Park the tenants pay a basic rent determined by the government or 25 percent of their income (whichever is higher), and the government then picks up the tab for the remainder of the contract rent.

According to Marilyn Herdlicka, the manager of Mark IV, the basic rent for a one-room apartment is set at \$160 a month and the contract rent is \$231. The government makes a housing assistance payment of approximately \$71 to cover the difference

Seydel said a number of UI students are involved in the city-operated leased-housing program, although he he could not name an exact figure. Herdlicka said about 50 percent of the Mark IV units are occupied by students.

Married student housing cheaper, but the list is long

By STEPHEN HEDGES aff Writer

Married UI students can save nearly half of what many now pay in rent if they live in UI housing, according to Residence Services officials.

Nearly 800 efficiency, one- and twobedroom apartments are available through Residence Services at rents of approximately \$100 to \$135 per month. But only married students or students who are parents with dependent children are eligible for the low-priced housing.

There are four family housing complexes, three of which are located west of campus on Hawkeye Drive. Hawkeye Drive Apartments have 192 two-bedroom apartments, Hawkeye Court has 504 oneand two-bedroom units and Hawkeye Park has 50 mobile homes.

Parklawn, the UI's fourth family housing complex, is located on Riverside Drive and has 53 one-bedroom and efficiency apartments.

All the apartments are unfurnished, and tenants pay for the utilities.

Residence Services officials say that students are on a waiting list to get into the low-priced family housing.

"We carry a waiting list throughout the year," said Mitchel Livingston, director of Residence Services. "The list usually slides down to a small number by the fall." An occupancy count in April indicated there were 13 family housing vacancies, and Livingston said that vacated apartments are usually filled immediately.

"Our costs are half as expensive as our competitors in the community," he said. Apartments are assigned much like dorm rooms, on a first-come, first-served basis. Livingston recommended applying as much as a year in advance

Although family housing is cheap, residents do not have many of the advantages other apartment dwellers enjoy. Both Hawkeye Court and Hawkeye Park do not have laundromats or basement storage space.

Paul McAndrew, a resident of Hawkeye Drive apartments and family housing representative on the Student Senate, says some improvements must be made in family housing.

Despite the problems facing family housing residents, McAndrew said that he enjoys living there.

"Anybody that rents is going to have complaints," he said. "It's cheap here. Compared to living anywhere else, it's really cheap.'

THIS COULD BE YOUR LUCKY DAY

An Air Force ROTC scholarship can mean a lot when you need help with college finances. It pays tuition, books and lab fees . . . and gives you \$100 a month for other college costs. This could be just what you need to permit you to fine-tune your concentration on your studies. It could mean the difference between not making it at all, and going out on your own with a good, solid college degree.

The Air Force is a great way to be on your own. As a commissioned of-ficer, you'll have responsibility with your very first job. You'll find an at-mosphere of dedication, trust, and reliance, and you'll jump right into managing people and expensive resources. You'll have an excellent starting salary - good financial security

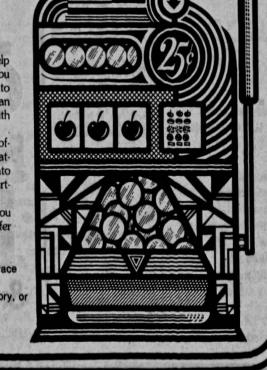

It can all start with a decision to check out AFROTC. Find out how you can get a scholarship. See what we offer, then show us what you can offer in return. It just might be our lucky day, too!

City housing.

are leased to day-care centers and four are leased to students in a cooperative housing program, Young said. The UI also owns 37 one- and

two-bedroom, apartments located on or close to campus. Young said these apartments are located in three areas: on for the duplexes. Melrose Avenue, on Moss Street near Hancher Auditorium and on Harrison Street near the facilities. Johnson County Courthouse.

but they aren't expensive.

'The UI decided that the rent should be comparable to the market price," he said. "Because there are so few

and staff is also available at the UI's Oakdale campus, Young said

rent.'

Cliff Murphy, supervisor of the Oakdale housekeeping service, said the units at Oakdale are full and there is a waiting list to get in. "There are just not enough

rooms for the number of people who want them," he said. "I'd say about one-fourth of the people who apply for housing get in."

The Oakdale campus has 24 one-bedroom apartments, 24 rooms with shared bathrooms and 30 dorm-type rooms, Murphy said. There are also several cottages and three duplexes. The rent runs from \$30 for the smaller rooms to \$160

Murphy said there is a mixture of students, staff and faculty staying in the Oakdale

"It's usually pretty full around here, but this year it's worse than usual," he said. "I guess because the rent's going up outside, people want to get cheaper housing. The rooms here aren't the fanciest things, "The only bad thing is that the

eople who live here either have to ride Cambus or have their own car to get to classes," he said. "This place isn't exactly in the thick of things."

purpose of repairing violations; -compliance with safety or health codes requires conditions that deprive tenant use of the unit; and

-the tenant has not paid rent

Watters stresses that tenants "cannot be evicted without their day in court." She says the standard three-day noticee to quit the lease may mislead tenants into believing they have three days to leave once the notice is served.

ACTUALLY, she explains, the notice means that if after three days a tenant has not gone, the landlord may begin legal action for eviction.

Watters says that another problem tenants have is landlords who visit with no notice and want to inspect a dwelling

Four Good Reasons why you should bank at ISB

She points out that the state landlord-tenant law states that "Except in case of emergency or when it is impracticable to do so, the landlord shall give the tenant at least 24 hours notice of the landlord's intent to enter and enter only at reasonable times."

unit.

WATTERS SAYS that PAT encourages landlords and tenants to settle their differences without legal action if possible.

"Landlords, really, if you can explain to them that this is going to help them in the long run too because it's making them take care of their property better and it keeps the value of their property from decreasing - you know, they're not unreasonable people, not all of them."

Running for the president

The Democrats The Republicans

By TOM DRURY City Editor

The business of presidential politics, like the business of seduction, is conducted as much with illusion as it is with reality.

-Martin Schram, in Running for President: A Journal of the Carter Campaign

In 1972, approximately 25,000 Iowa Democrats braved a fierce snowstorm to attend the January 24 state precinct caucuses across the state.

What happened left an indelible mark on the battle for that year's Democratic presidential nomination. Edmund Muskie's endorsement-laden campaign began to falter and George McGovern won a newfound credibility. And Iowa Democrats were ensured a position far more influential than their numbers mandate.

It's not delegates, nor votes, that are the major product of the Iowa caucuses. The most important thing that came out of the small, informal precinct gatherings in 1972 and 1976 — and that will come in 1980 — is a hook

See Democrats, page 3

By NEIL BROWN Editor

The issueless campaign is on.

A pack of Republican VIPs with their sights on the White House will get their first chance to test political waters during the Iowa precinct caucuses in January.

But as they come to the state they do not carry with them files full of position papers on important issues. Instead their briefcases are loaded with plans and strategies to form extensive grass-roots organizations.

And as a reminder of why they are even spending significant time and money in a cornfield that will send only 37 of nearly 2,000 delegates to the national convention, the candidates carry with them pictures of the national media flocking around an unknown former Georgia governor in 1976 because he came out ahead in the precincts.

"IOWA TESTS AND EXPOSES the candidates' organizations. It's a media event, the impact comes from the press and the publicity," says Rich Bond, See **Republicans**, page 2 Richard Nixon's thumb in time, Kansas Sen. Bob Dole's political acumen and chameleon voting have brought the feisty disabled vet a long way. Will the man who would only nod to Nixon's tape recorders end up on the other side of the Oval Office?

Page 5

Five-term lowa Gov. Robert Ray may be in the right place at the right time. A moderate midwestern Republican often considered a potential national officeholder, Ray says he's keeping his political options open. Meanwhile, Lt. Gov. and heir to the throne Terry Branstad waits with baited breath.

Page 6

With three members of the often triumphant and usually liberal four-member Iowa City Council majority up for re-election in November, city policy may soon take a turn for the conservative. Or it may not. Either way, the battle over Freeway-518 figures to play heavily in the outcome.

Page 2F-The Daily Iowan-Iowa City, Iowa-Thursday, August 30, 1979

GOP caucuses winnow out candidates

Continued from page 1

field director for George Bush's Iowa campaign. "So, say a George Bush, relatively unknown, if he can come into the state and finish near the top, he has greater credibility. I don't think this is a test of issues at all. It's a test of ability to run."

run." "The reason Iowa is important in politics," says Kim Schmett, Iowa campaign coordinator for Robert Dole, "is because of what you people (the media) make it. It's too small a state to be important as far as the number of delegates is concerned. The media attention is important."

Even state GOP chairman Steve Roberts concedes that the benefit of doing well in Iowa lies in the press attention that comes with the nation's first major presidential preference polling.

"THE IMPACT IS AT the caucus level. Iowa's one of the first showings of how good an organization you have and what your strength is. After that it doesn't mean much," Roberts said. "In 1976 it had a tremendous impact. Iowa brought Carter into the forefront. It could have the same impact on the Republican side this time. Iowa could give a candidate momentum, bring somebody out of the pack."

And because there is a "pack" of GOP candidates after the presidency, party leaders are excited about the new importance that their caucuses have taken on. In 1976, with only two Republican candidates — one an incumbent — the GOP caucuses offered little drama, overshadowed by a Democratic dogfight.

"It's a heyday for us," said one party leader. "I've never seen anything like it. They (the candidates) don't dare ignore us." Actually, the procedures used by the GOP are not conducive to making the caucuses a "media event." The Republicans elect their friends and party activists as delegates to the county convention, but those delegates, in the name of Republican unity, do not commit themselves to any presidential candidates and are not required to announce their preference even if they have one.

ONLY BY ANALYZING who has been selected as the delegates can party leaders know how the presidential candidates finished, and that process takes about two weeks — hardly the formula for a media event.

So to preserve the immediacy and create the excitement necessary for a press romp, the GOP will take a presidential preference straw poll of all the precincts. The top finishers of the straw poll are credited with "winning Iowa."

The seven major Republicans vying for the nomination include Bush, 54, a former Texas Congressman who served as Ambassador to China and director of the CIA; Dole, 55, a second term U.S. senator from Kansas and the GOP vice presidential nominee in 1976; Howard Baker, 53, from Tennessee and Senate minority leader; Ronald Reagan, 68, former California governor who is making his third attempt at winning the White House; John Connally, 62, former Texas governor as a Democrat and treasury secretary under Richard Nixon; Philip Crane, 48, U.S. represenative from Illinois; and U.S. Rep. John Anderson, 57, also of Illinois.

While most of the Iowa campaign workers strongly agreed that the biggest prize in winning Iowa was the national media attention, workers for two of the candidates said they were more concerned with winning the 37 delegates Iowa will send to the national convention in Detroit next summer.

STATE REP. MICK LURA, Iowa organizational director for Reagan said that since Reagan fell just 117 delegates (out of a total of more than 2,200) short of wresting the nomination away from Gerald Ford in 1976, he is more concerned with capturing Iowa's 37 delegates. Lack of name recognition, Lura said, is not a problem for Reagan.

Bill Savard, coordinator for Baker's Iowa effort, said the Baker campaign is already receiving national press coverage and campaigning in Iowa will center around wooing potential delegates.

"In our campaign, our emphasis is on gathering delegates wherever we can," Savard said. "For some of the other candidates Iowa is an opportunity to build a certain amount of credibility for the statewide primaries such as New Hampshire and Massachusetts. But as a senator, Baker already has that credibility and name recognition."

Whether the candidates are shooting for the delegates or the attention, Iowa is a test of a candidate's organization.

Iowa "requires the toughest organizing in politics," says Bush campaigner Bond. "There are 2,531 precincts, 99 counties in the mainstream, choosing delegates and its all happening simultaneously. You've got to have people and they in turn take care of other people — motivate people." State Sen. David Readinger, Iowa campaign manager for Connally, agrees that success in Iowa is based on good campaign organization.

"It's a matter basically of organization and people contact," Readinger said. "It's a matter of turning out your supporters across the state on Jan. 21.

THE CAMPAIGN COORDINATORS all said that creating a good organization means identifying support for the candidates in every county and ultimately in every precinct. This is done, they said, by pouring through lists of registered Republicans and determining who is traditionally involved with the party and then contacting the active Republicans and soliciting their support.

"Iowa is retail politics. It's one of salesmanship, identifying support," Bond said.

And Dole campaigner Schmett said, "Name recognition will do little good. You've got to have a good grass roots organization. Since Iowa is a small state, almost every active Republican in the state will have an opportunity to meet the major candidates. It's almost a contest of who can shake the most hands."

Reagan, the campaign workers all agree, is the frontrunner in Iowa due to "residual support" from his previous efforts. Bush is believed to be running second. Both camps claim to have identified supporters in all 99 Iowa counties.

A DES MOINES REGISTER statewide lowa Poll taken in May showed Reagan the favorite among rank and file Republicans with 42 percent, followed by Baker with 20 percent, Connally with 13 percent, Dole with 5 percent, Bush with 3 percent and Crane with 1 percent.

But a straw poll taken at a GOP fundraiser just days later showed Bush the favorite with 39.6 percent followed by Reagan with 25.9 percent, and Baker with 13.8 percent. And political observers note that Carter was getting just 1 percent in 1976 statewide polls, while winning the early straw polls of Iowa Democratic activists.

Reagan and Bush have the greatest number of paid Iowa staffers — seven but party chairman Roberts, who will be leaving that post September 15, said Reagan has the "strongest" Iowa organization.

"Reagan's been around the pike in 1976. He lost some of those people since then, but some of his people have been around the pike with him," Roberts said.

BOND CONCEDES THAT at this point Reagan is the frontrunner, although he says Bush has the combined support of many 1976 Ford delegates and ex-Reagan supporters who say the former governor is too old. And he adds, "His (Reagan's) world is going to shrink to a very small hard core group of supporters."

Yet Reagan organizational director Lura, does not believe that Bush poses a threat to Reagan. "Bush is making a lot of noise, but as far as depth of support I would say Baker and Connally are probably tied for second. But none of them have the organization that we have."

He attributed the strength of Baker and Connally to their name recognition and added, that "Bush's just an asterisk as far as Gallup and Harris are concerned." Most of the candidates, the workers said, would regard a first, second or third place finish in the state party's straw poll as a victory, though none are predicting

an outright first place finish. CRANE'S IOWA COORDINATOR, Elaine Smith, said she expects Crane to finish within the top three, while Mark Bisnow, press secretary for Anderson, said he could not make a prediction. Anderson has not yet opened an Iowa office and Bisnow said that Anderson will cam-

paign more extensively in Iowa, although he admitted that the "heaviest emphasis" has been on New Hampshire and Massachusetts. T

Both Savard of Baker's campaign and Readinger of Connally's say they expect to finish within the top four. Both however say that a poor Iowa showing would not change any campaign strategies or jeopardize the candidacies.

jeopardize the candidacies. "We're going to do everything we can to win and the ideal thing is to be out in front, but we'll settle for third," Readinger said. "We will not be desperate to finish first. A campaign is a long haul thing. Even if we finish sixth or seventh, it won't change anything at this point."

Lura said he expects Reagan to remain the frontrunner, but he would not predict a certain first place finish.

Bond said Bush will finish strongly, within the top three. When asked whether a poor showing of sixth or seventh would prompt Bush to consider dropping out, Bond said, "It's an impossibility. It cannot happen. There is no way we will finish worse than third."

SCHMETT SAID DOLE would be happy with a fourth place Iowa finish, and he admitted that a sixth or seventh place showing could jeopardize the Dole candidacy. "If we did that poorly in Iowa, it would take a very strong showing in New Hampshire to keep us in."

State GOP leaders are hoping the caucuses will serve as a dramatic "winnowing out" process — as it did for the Democrats in 1976 — indicating which candidates had the ability to organize and operate viable campaigns.

"Iowa is a test of psychological commitments to being in there," Bond said. "And with some of these people, their psychological commitments aren't there."

NARAL to spearhead vote effort

By TERRY IRWIN University Editor

A national abortion rights group including more than 1,000 Iowans is spearheading grassroots efforts to get — and keep — congressional allies in Washington, D.C.

As part of the National Abortion Rights Action League's Impact 80 plan, Iowa City resident Jan Scolastico will attempt to bring to the polls Iowans who support abortion rights.

"It's a politically scary issue right now because up until now the opposition to abortion rights has been more vocal than we have," said Scolastico, organizer for NARAL's Iowa branch. "And even though the polls show that the majority of Americans are in favor of a woman's right to choose abortion, the people that have been voting at the election polls have not represented that. And so we assume that all we have to do is get out and activate the people who already believe the way we do."

It's All Happening in Downtown Iowa City

The Iowa City Downtown Association has taken up the challenge of providing the best of all worlds. There's 68 terrific member merchants ... each striving to please you, the shopper. And we think you're sure to find something in downtown Iowa City to suit your every need. Just look at all the great shops we have to offer.

b the whe bar right here, "eavy

AS NARAL'S INFORMATION Director Janet Beals put it, "We have given up arguing with anti-abortion people. And we don't think we have time anymore."

NARAL's membership has grown from 8,500 in 1977 to 70,000 this year. But at the same time anti-abortion forces have become more powerful and vocal than ever.

NARAL has allocated approximately \$15,000 each to Iowa and three other states with congressmen that have been targeted for defeat by politically strong antiabortion groups. Sen. John Culver, the liberal Democrat from Iowa, is one of those targeted.

"That doesn't mean we're going to work on Culver's campaign," Scolastico said. "It only means that we are going to try to activate abortion rights advocates politically. We're going to educate them on the abortion rights issue, and we're going to let them know what voting records have been in the past."

ALONG WITH KEEPING pro-choice advocates in Congress, NARAL also hopes to bring out the vote to defeat anti-abortion incumbents.

"We're starting to feel like there's no way we can change opinions or the minds of the people who are in Congress right now," she said. "We have to get new people in Congress who feel the way we do about it."

Beals said the Impact 80 program is designed to show legislators the grassroots base for the group's lobbying efforts.

"One thing we kept hearing (from legislators) is 'It's fine to lobby and it's fine to present this information, but where are your constituents? Where is your power?' " she said.

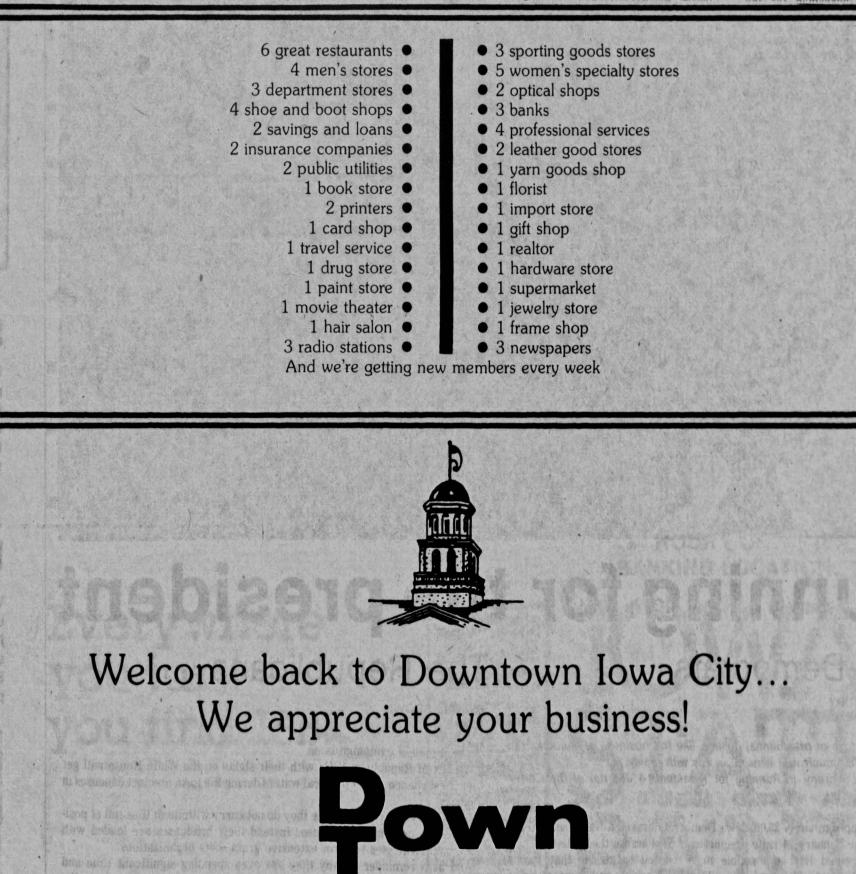

The \$15,000 allocated by NARAL for Iowa will pay Scolastico's salary and expenses. She will be traveling through the state making contacts and organizing house meetings. "With each house meeting we hope to get another volunteer to have another house meeting and gather people who are basically pro-choice."

NARAL HAS ALWAYS DONE that type of organizing "to some extent," Beals said. "But the legislators never felt the power. And it seemed that the only way to a legislator's heart was in whether to keep him in Congress or not," she said.

The Iowa organization, formed in January, is conducting fund-raising efforts and a membership drive. The group currently has approximately 1,100 members. "And I think we can owe that to (former Iowa Senator) Dick Clark's defeat — if we can look at something positive on that," Scolastico said.

She said her long-time interest in women's health care has included work at the Emma Goldman Clinic for Women. "And I got involved in abortion rights partly through my own experience," she said. "I've had an abortion and I'm convinced that it's a basic right that women need to have. I have a master's degree in women's studies, and I feel that abortion is the most basic feminist issue right now. So I'm personally involved as a feminist, but I also think it's a human rights question."

Scolastico will be based in Iowa City and will be working with a state coordinator in Des Moines, whose salary will be paid from funds raised in Iowa.

fight or support pending legislation.

America, as a nation and a people, has stood in her brief history as the mightiest (and perhaps the last) great home of the Faith. She is known to the peoples of the world as a "Christian nation." It follows naturally that she and her people are the special target of Satan as he seeks to devour the planet and everyone

-From an introductory letter signed by the Policy Committee and Congressional Advisory Committee of Christian Voice.

Gary Jarmine says the fifty million Christian evangelicals are the "sleeping giant of politics" and he and Christian Voice intend to wake that

Jarmine is the legislative director of the group, organized to give a voice to the conservative Christian community and to lobby Congress on a variety of issues of concern to Chris-

Christian Voice has established a Congressional Advisory Committee of 11 representatives and four U.S. senators, including Sen. Roger Jepsen. Though Jarmine, a former follower of the Rev. Sun Myung Moon and former legislative director of the American Conservative Union, says that Christian Voice was formed to lobby, Jepsen does not.

In an interview with The Daily Iowan, Jepsen strongly denied that Christian Voice is a lobbying group, saying that it only coordinates funnentalist Christian groups and Congressmen from around the country.

But Jarmine described himself as the group's chief lobbyist and said the function of the Congressional Advisory Committee is to both develop new legislation and to develop tactics to

IN A STATEMENT attributed to Jepsen by Christian Voice, the senator said, "I want to commend you on your most worthwhile objectives set forth through Christian Voice, and know that I shall assist your efforts in any way I can in the U.S. Senate."

Jarmine did agree with Jepsen that no formal meetings to decide strategy or policy have been held, saying that he dealt with the members of the advisory committee on an individual basis. Jarmine also said that in addition to lobbying, Christian Voice will set up a Political Action Committee. (PACs are established to allow various groups to contribute campaign funds). Jarmine said that Christian Voice, founded in early June, is necessary because the "mainline denominations represent a liberal point of view which is inconsistant with most Christian belief." The group had an initial budget of \$1 million. Both Jarmine and an information packet distributed by Christian Voice said the group opposed the following:

-banning prayer in public schools;

-abortion on demand; -banning Christmas celebrations in public

places and schools;

-teaching secular humanism and evolution as opposed to creation;

-homosexuality and pornography;

-withdrawing tax-exempt status from private schools that don't adhere to mandatory racial guidelines;

-"betraying Christian allies in Taiwan and Rhodesia.

THE GROUP'S introductory letter says "These are not political issues - liberal vs. conservative, or Democratic vs. Republican. We are not concerned with energy policies, farm subsidies, economic or political theory, etc. "These are moral issues - good vs. evil, Christ vs. anti-Christ!"

Despite that assertion that the issues are not liberal versus conservative, the letter says that the "extreme left, liberal branch of the Christian denominations is disproportionately more vocal in Washington than it should be. The only Christian influence heard in the halls of Congress is the increasingly radical voice of nonbelievers, political and theological liberals, humanists who gain a hearing by wearing the clerical collar."

And, though Christian Voice representatives say their aims are nonpartisan, the advisory committee is made up of 13 Republicans and two Democrats.

ONE ISSUE RAISED by the activities of Christian Voice is that of the Constitutional provision of separation of church and state. The letter says that Christians "misunderstand the First Amendment of the Constitution, which forbids government from involving itself in the matters of the church - but does not say anything about Christians staying out of the affairs of government!"

Jarmine said that if other groups such as Common Cause, Ralph Nader's Public Citizen and business groups have a right to lobby, the church does also.

"Christianity is the vanguard of preserving moral force in society," he said, adding that 'secular' and 'amoral' mean basically the same' thing.

Jarmine agreed that the issue of separation of church and state refers only to state involvement with religion and not vice versa.

in Emerson v. Board of Education, 1947, "Neither a state nor the federal government...can pass laws which aid one religion, aid all religions, or prefer one religion over another ... Neither a state nor the federal government can, openly or secretly, participate in the affairs of any religious organizations or groups and vice versa. In the words of Jefferson, the clause against establishment of religion by law was intended to erect 'a wall of separation between church and state.""

Asked about the propriety of Congress considering conservative, fundamentalist Christian doctrine over other religions and atheism when enacting law, Jepsen responded that the United States was founded on Christian ideals and said people should "stop ridiculing those who devoted their lives to Christ."

Christine Hansen, Jepsen's press secretary, said the question was an improper one, and that the "premise of the question is wrong" because it was a "Have you stopped beating your wife?" kind of question. She recommended that the writings of the founding fathers - Washington, Jefferson, Franklin - be read.

HISTORIANS AGREE that Jefferson, Washington and Franklin were not Christians but deists. The eminent intellectual historian. Stow Persons, in his book American Minds, describes deism in the following way: "Deists agreed that while God was the author of nature and its laws, it was not His practice to intervene in the orderly course of mundane affairs; there were no miracles that countervened the natural course of things. Man was possessed of an immortal soul and was rationally and morally obligated to worship his creator. Jesus...was a great teacher of virtue. The Christian Scriptures were said to contain much wisdom - and

Sen. Roger Jepsen and his wife Dee during his 1978 campaign.

HOWEVER, THE SUPREME COURT ruled . much that also was best passed over in silence."

Democrats

SINCE 1972, THE CAUCUSES have been the first electoral test of strength in the Democratic presidential race, and national media members pour into the state to make political sense of the results.

"The influence of any system that's first is always going to be out of proportion to its number of delegates, obviously," says Elaine Kamarck of the Democratic National Committee. "But it's you people in the media that create that. It's not anything inherent."

The draft-Ted Kennedy movement in lowa, which has shown impressive gains this summer, hopes to make full use of the media blitz that will accompany the January 21, 1980 precinct caucuses.

"It's my contention that we can put an end to the whole thing right here." says Matt Wanning, spokesman for the Democrats for an Alternative Candidate. vno savs ne is weico fold more ex-Carter supporters all the time, believes the president can be irreversibly crippled by a poor showing in the caucuses and that Kennedy backers "can finish him off two weeks later in New Hampshire," the first primary state. Wanning admits that his group's organization is so far only "sporadic" with contacts in 17 major cities in the state - and says he's concerned with Carter's impressive ability to build an organization, considered crucial to success in Iowa. Bill Romjue, director of the Carter-Mondale Presidential Committee in Iowa, says he is confident Carter can take all challengers, if any.

Carter-Mondale Presidential Committee, says, "Obviously that was a part of the strategy - that media attention would set the pace for the rest of the campaign."

This intense media attention is new to Iowa Democrats. Chamberlin says that the caucuses' rise to prominence has been progressive since Eugene McCarthy's anti-Vietnam War campaign fared surprisingly well here in 1968.

BUT THE MAJOR REASON for the media blitz on Iowa is that the caucuses are first. And Richard Bender says that they became first quite by accident. Bender, a staffer for 5th District Rep. Tom Harkin, explains that the caucuses were moved up from March to January following extensive rule changes stemming from the McGovern-chaired commission on party reform following the 1968 elec-

Bender, who was involved in creation of the Iowa reforms, says that before 1972 ways a suc event with the decision having been made by the powers that be." The reforms brought about a much more open system, Bender says, one that involved more decision-making by delegates rather than party leaders. The reforms plus the addition of a congressional district-level caucus pushed the precinct caucuses back to January, according to Bender. But he says the caucuses would not have gained their present status had the party not dropped its winner-take-all rule under which a majority vote took all the delegate-votes at a caucus. In 1972, for the first time, any candidate group with at least 15 percent of the vote received a proportionate share of delegates. Instead of the winner-take-all rule that discouraged splinter groups and obscured delegate preferences, the 15 percent rule gave the media a way to record just how the delegates were dividing.

than specifying Kennedy delegates. His reasoning is that all uncommitted delegates will be perceived as Kennedy backers, and so going strictly uncommitted gives the appearance of stronger support than splitting Kennedy delegates and uncommitted delegates.

The committee hopes to make Carter's support seem so minimal that the president does not seek re-election.

In that case, Wanning says, "I can have everybody. A lot of people want to jump ship but they want to make sure they have a ship to jump to first." He says the fundraising letter - with the endorsement of the six party leaders, including Gert Mc-Queen of Iowa City - has broadened the base of the Kennedy effort. Before the endorsements, he said, it was viewed as only a labor movement.

"And a labor movement in Iowa is analogous to an agricultural movement in New Jersey," he says.

Wanning says a ticket led by Carter e defeat of ould mean the Democratic Senators - John Culver, Birch Bayh, Frank Church and George McGovern.

FITNESS SALE MONTGOMERY Sale Ends Wednesday September 15 it mitrode roug It's a politically s

Continued from page 1

BUT A GROWING NUMBER of state Democrats are saying a Carter campaign would be disastrous to the party, and an intense fight appears to be in the offing. Media scrutiny is expected to be more pervasive than ever.

Just how tenuously the media's analyses are formed is shown by the 1972 caucuses, which McGovern "won" by finishing second to Muskie

At midnight on January 24, with 25 percent of the precincts in, Muskie had 36 percent of the vote, McGovern had 24 percent and 36 percent were uncommitted. In Des Moines, R.W. Apple of The New York Times wrote of "a surprisingly strong showing" by McGovern, who had been receiving around 3 percent in presidential preference polls. According to McGovern's campaign manager Gary Hart, other media members followed Apple's lead - with the surreptitious help of the McGovern staff.

In Right From the Start, Hart's chronicle of the campaign, he writes, "I muttered to the other staff members to look as happy as possible, and it worked. The iollier the McGovern people began to look, the more solemn the Muskie staffers appeared.'

The next day, Hart writes, "the late correspondent Bill Lawrence summed it up on the ABC evening news: 'The Muskie bandwagon slid off an icy road in Iowa last night.' We sweated blood for that one sen-

Like McGovern before him, Jimmy Carter in 1976 was the chief beneficiary of the lowa caucuses, though he received nowhere near a majority of the delegate-votes and finished well behind "uncom-

CARTER WON 27 PERCENT of the delegate-votes in the January 19 caucuses, finishing over opponents Birch Bayh, Fred Harris, Morris Udall, Sargent Shriver and Henry Jackson. 37 percent of the elegates were uncommitted.

In Schram's book on the 1976 campaign, Carter says that he and his staff saw a good chance to make the caucuses into "a major media event.

Mary Ellen Chamberlin of Davenport, who was on Carter's Iowa steering committee in 1976 and is a staffer on the

Bender points out that these two decisions, which combined to lure the media to Iowa, were made separately and at different times.

BUT EVEN IF THE PARTY did not purposely create the influential position it is now in, it has worked to enhance it. In a move engineered by then state Democratic Chairman Tom Whitney, the state committee in 1976 gathered and demographically analyzed delegate-votes and made the Des Moines Hilton "Caucus Central," at an estimated cost of \$30,000. The goal - carried out successfully was to court the national media and the power they wield (much to the consternation of members of the state press, some of whom felt that the caucuses had been stolen from them).

The state party currently has a full-time staffer, Maria Menne, working to coordinate the caucus activity. Menne says that the influence the caucuses have gained is not excessive. "If the national media need a plug into how the rank and file members of this party are thinking as of January 21 of 1980, this is a very good indicator.

Romjue of the Carter-Mondale campaign says there are seven full-time workers for Carter in the state and that the committee will spend "something over \$100,000" here. He is careful not to speculate on how large a proportion of delegate-votes Carter must take from the caucuses in order to be perceived as winning, but some analysts say a showing of less than 50 percent will hurt Carter. Romjue says he does not believe Kennedy will run, and that "there are no significant political leaders organizing a draft-Kennedy movement."

IN EARLY AUGUST, however, a coalition of labor leaders and other Democrats who want to see a Kennedy bid, sent out a fund-raising letter signed by six influential Iowa Democrats.

Wanning says he hopes to carry a large uncommitted bloc for Kennedy, rather

"Unfortunately, when you're an incumbent, you have to run on your record. I just think it would be hard to put together Carter's record with a straight face.'

LOCALLY, BOTH CARTER and Kennedy forces are gearing up for a caucus fight.

David Dix, a UI student and a staunch Kennedy backer, said, "We want to get enough students to railroad all the precincts (in Iowa City).

"Some people say that this is going to be like 1976. It isn't. We're going to get college students to the goddamn caucuses.

Dick Myers, an alternate delegate for Carter in 1976, disputes Dix's claim that he can take the majority of the city's 25 precincts. "There is an active organization in the First District for Carter right now and it's working."

California Gov. Jerry Brown is another potential challenger to Carter, though his reputation is probably as bad here as anywhere in the nation and many say Brown will not bother to run in the caucuses

But Mike Gage, state legislator from California's Northern San Francisco Bay area district, visited Iowa in early August to meet with state Democratic leaders concerning a Brown caucus effort. Gage, a volunteer with the Brown for President National Exploratory Committee, says he believes that Brown will campaign in the state.

STATE DEMOCRATIC leaders say they don't see Jerry Brown as a particularly viable candidate: one of the recurrent remarks is that party members haven't yet met anyone who openly supports him. "I'm on the road, week in and week

Menne says. "I've never met out." anybody that is an outspoken Brown supporter. We know so little about him it's hard to believe he's even a viable candidate.

Asked if Brown's opposition to nuclear power might score political points in the caucuses, Menne says it could. "That would be the way for him to do it, if he were going to do it, in my eyes.'

Iowa will send just 50 delegates to the 3,331-delegate Democratic National Convention. Those 50 will not be decided at the precinct caucuses; uncommitted delegates will commit and others will switch at the county, district and state conventions that follow. But the initial results, from the precinct caucuses, are the ones that will have maximum impact.

"National media people who missed it (in 1976) will certainly look into it this time,'' Romjue said. "Nonpoliticalfriends of mine say 'What are you doing?' I tell them I'm putting together the president's campaign in Iowa, and they say, 'That's a nice place to put you.' But it is important."

Versatile fitness combo helps you trim.

Not simply a weight bench, but a complete exercise center. Comes with leg lift/arm curl and weight pulley attachments. Sturdy tubular steel frame supports a maximum of 600 pounds. Adjustable backrest provides five different incline positions.

Dole remains political enigma

By NEIL BROWN

It was Republican Sen. Robert Dole who coined the acronym CREEP for Richard Nixon's Committee to Reelect the President.

For Dole that was sort of a revenge on Nixon, who decided in 1972 that GOP national chairman Dole would not be involved in the Nixon-Agnew reelection campaign. Though Dole may have been slighted at the time, Nixon's snub might also have saved Dole's political career.

Known as a White House 'mouthpiece'' in 1971 and 1972 and appointed as Republican national chairman by Nixon in 1972, Dole had to work hard to disassociate himself with Vixon and Watergate in order to save his Senate seat in 1974.

The junior senator from Kansas won only narrowly. He fought bitterly against popular Democratic Rep. William Roy who jumped out to a 12 point lead in the polls by identifying Dole with Nixon and Watergate. Dole charged Roy with mudslinging (one of Dole's most effective maneuvers, according to press reports, was a TV commercial that showed mud being slung at a poster of Dole; the mud then slid off the poster, revealing a "clean" Dole)

DOLE USED THE ABORTION issue

is a counteroffensive against Roy, an bstetrician who had admitted to performing legal abortions. Dole ran newspaper ads denouncing Roy for performing abortions. Soon after, a massive anti-abortion mailing campaign began, using literature including pictures of dead fetuses.

Although Dole denied any connection with the distribution of the literature, and no evidence was found tying him to the distribution, Democrats charged that he was responsible and that he would do "anything for political survival.'

But Dole now has few real fears about his political survival and he believes the recognition he received as Gerald Ford's running mate in 1976

gives him enough political security to run for president and enough political strength to win.

It won't be easy for Dole to reach the White House. Not because of his record, a very conservative one, which he claims is far more impressive than those of the six other major GOP candidates. And not because of poor name recognition. It will be difficult for Dole because he is an enigma.

NEITHER HIS POLITICAL friends nor foes really understand him, nor are they sure of how he'll vote on a given issue. One Democratic colleague said at the time of Dole's vice presidential nomination, "He's one of the genuinely complex people on Capitol Hill. Just when you think you have his number, he contradicts your calculations." He is a conservative from small-

town Russell, Kansas. He was a strong supporter of the Vietnam war; Dole himself was seriously injured during World War II, losing nearly all use of his right hand. He opposes school busing, oil company divestiture and government-created jobs.

But, as a friend said of Dole, he is "no ideology's true believer." In fact, New Times magazine has called him 'half a civil libertarian.''

At the peak of campus unrest during the Vietnam era, war supporter Dole voted against revoking federal financial aid to students involved in protests or riots unless they had been convicted of breaking the law.

One of his most important legislative victories came when he co-sponsored a bill with liberal Democratic Sen. George McGovern that was supported by the AFL-CIO and the hunger lobby. The bill, in effect, saved the food stamps program from elimination by conservatives.

DOLE PLAYS POLITICS well on Capitol Hill and his voting record may be deceptive. This is exemplified by Dole's performance on the Senate Budget Committee, according to a committee source quoted in New Times in 1976:

'He's a contrived political

kaleidoscope. He's incredibly skillful, so cynical in a way. He doesn't believe in half of what he does. His most reactionary votes are gestures, issues where he knows he'll lose. When he can make a difference, he often does the right thing. He doesn't believe in a balanced budget as a theological proposition. So he voted last fall for the **Budget Resolution Conference Report** in committee, where he could denounce high spending and it would pass anyway. When Ford selected Dole as his runn-

ing mate in the summer of 1976, the New York Times called the move the "Doleful nomination." Newsweek magazine called Dole "autonomous and irreverent." Among the reasons for such descriptions is that Dole is known for his ability to sharply attack opponents. Some of his colleagues regard it as wit. Others say he is offensive.

Conservative Arizona Sen. Barry Goldwater was pleased when Nixon named Dole as national party chairman and said "He's the first man we've had around here in a long time who will grab the other side by the hair and drag them down the hill." Yet former Republican Sen. William Saxbe called Dole a "hatchet man."

And at times he has served as both the witty senator and the gun-slinging attacker.

IN 1972 HE ATTACKED the McGovern-Shriver ticket as a "ticket which can do nothing but parrot the propaganda of the Communist enemy." And in 1976 he blasted the New York Times for running stories concerning an illegal, but never proven, contribution to his 1974 campaign from Gulf Oil. "They're part of the Carter operation They made no bones about it.'

Dole is also lauded for his humor. "You have to have a sense of humor about things if you are a Republican,' he says. When he learned that Nixon had taped all White House conversations Dole quipped, "Thank goodness whenever I was in the Oval Office, I only nodded.

One friend of Dole said the Kansan has had his eye on that Oval office for some time. Before the 1976 election the friend said that if Dole is elected vice president "he will move for 1980 right away. If they lose, but he comes out OK...then he can try from the Senate." Friends and enemies say Dole is a hard worker and a good campaigner. Some critics say he is too clever and too manipulative. To outdistance the large field of GOP presidential candidates he'll have to pool all those characteristics.

TENANTS The new Iowa uniform Landlord-Tenant Act went into effect January 1, 1979

The law represents a large step forward for tenants because it clearly lays out the obligations and rights for both landlords and tenants. Its stated purposes are to simplify and modernize landlord-tenant law, to encourage land and tenant to maintain and improve the quality of housing, and to insure that the right to the receipt of rent is inseparable from the duty to maintain the premises.

Note: Many of the provisions in the new law may not apply to leases signed before January 1, 1979. If you have a lease that was signed

mate in 1976. But most observers, including Roberts, feel it is too late for Ray to throw his hat into the presidential ring. "He has said he is not going nount a formal candidacy

best shot at a national elected office would be as a vice presidential candidate. Ray has yet to endorse a presidential candidate, keeping his options open and allowing the presidenfor the presidency," Roberts tial candidates more campaign said, although he added "I see a freedom. Former Ray workers can be found working in the possibility that there could be

leadership qualities." Dale Hibbs, 74th District

representative in the Iowa

legislature, agreed that the

chances of a Ray presidency

be a vote getter.

Halverson also sees a Ray presidential nomination as a solution to a potential Republican Convention stalemate.

'It would have to be a deadlock, and I can see that happening," he said, but added,

run for president last winter, and in July said Ray would be a top contender for a vice presidential bid with a nonmidwestern presidential candidate.

"If one of the presidential election He is indeed not a legislative governmental candidates were to look at him as a vice presidential selection. animal

He's been a very effective governor. You can't rule it out, but I think it's very unlikely that he'd run for the senate." The following is a summary of some of the major obliga-Halverson said, "I don't see Bob Ray running for the Senate tions and benefits to tenants under the new state law:

Tenant Rights

- Unconscionable provisions are prohibited from
- 2. Leases may not contain provisions that: a. force the tenant to waive the rights and
 - remedies under the Landlord/Tenant Law; b force the tenant to confess a judgeme
 - c. force the tenant to pay the landlord's attor ney's fees; or d. limit the landlord's liability under the law
 - If a landlord willfully uses provisions that are prohibited, a tenant may recover actual damages and three month's rent.

landlord must place all rental deposit money in an insured account, and must return the money within 30 days after the end of the lease and having received notice of forwarding address. If the landlord withholds any of the rental deposit, the landlord must provide a written statement of why the money is be ing withheld. Rental deposit money may be withheld only for the following reasons:

- a. failure to pay rent;
- b. actual cost of returning the rental unit to its condition at the beginning of the lease, or-
- dinary wear and tear excepted; or c. actual cost of acquiring possession of the rental unit from a tenant who does not act in
- good faith in surrendering the rental unit. The landlord must give the tenant the name and address of the person authorized to manage the ses, and the name and address of an owner, or other person authorized to receive notices
- . If the landlord intends to raise the rent at the end of the lease period the landlord must notify the tenant at least 30 days in advance of the end of the lease
- 5. The landlord must comply with all applicable building codes, and do whatever is necessary to keep the premises, and all facilities and appliances supplied by the landlord, in a fit condition
- A landlord may impose reasonable rules concerning the use of the premises by all tenants, but only if the rules are written and are not designed to harass the ints, avoid the landlord's responsibility, or make a substantial change in the lea
- fore entering the rental unit, except in case of nergency, the landlord must give the tenant 24 hours notice, and then enter only at reasonable times and for reasonable purposes.
- 9. A landlord may not retallate against a tenant for organizing or joining a tenant's union, or for complaining to a government agency about violations of ing codes
- 10. If a landlord fails to comply with the law of the lease, the Landlord/Tenant Law gives the tenant several possible remedies. Some of the remedies are:
 - tual damages b. recovery of damages based on the diminui-
 - tion in the fair rental value of the dwelling unit withholding all or part of the rent; or
 - d. if the landlord fails to make needed repairs to the dwelling unit, and the cost of repairs is
 - equal or less than one month's rent, the tenant may give the landlord 14 days notice and then have the repairs made and deduc the cost from the next month's rent

a. termination of the lease and recovery of acnotice being given by the landlord. The payments must be made in the

Election hinges on F-518

By ROD BOSHART Staff Writer

With the field of candidates and issues for the November Iowa City Council election beginning to take shape, the city's dispute with the state Department of Transportation over Freeway 518 is expected to figure heavily in the outcome.

Mayor Robert Vevera and Councilors Glenn Roberts and Clemens Erdahl the three City Council members not up for re-election this fall - say Freeway 518 will be the key issue in the October primary and the November general elections.

Nine candidates have announced or have indicated they plan to run for the four, 4-year council terms that begin in January.

Newcomers Donn Stanley, Don Doumakes, Robert Stevenson and John Suchomel will seek the two at-large positions held by Carol deProsse and John Balmer, Richard Taylor and John Goeldner will seek the District A position held by David Perret. Linda Nelson Manuel will seek the District C position held by Mary Neuhauser.

Balmer and Perret plan to seek reelection. Perret will announce in August and Balmer will announce his candidacy in September. Neuhauser and deProsse are undecided.

A PRIMARY ELECTION will be held Oct. 16 for each position being sought by more than two candidates. A primary will be held for the two atlarge seats if more than four candidates seek the two positions. A general election will be held Nov. 6. While it is still early and issues develop as the campaigns unfold. Vevera, Roberts and Erdahl identified the following as preliminary issues that will come up during the campaign:

Freeway 518

"I think there will be one real issue in this election and that's 518," Vevera said. "I think 518 is definitely the campaign issue.'

The city and the state DOT disagree over where the freeway should pass through Iowa City and whether an interchange should be constructed at Melrose Avenue.

Erdahl, Perret, Neuhauser and deProsse voted to take the DOT to court to block the department's plans to proceed with the construction along its proposed alignment. Balmer, Roberts and Vevera voted against the suit to avoid further delays in completing the freeway.

ROBERTS SAID the F-518 issue is significant because the DOT does not have any work planned on the freeway near Iowa City until January 1980. Therefore, the department is in a position to wait and see if the make-up of the council changes to one that supports building the highway along the DOT's proposed route.

"If the council changes to where there would be four votes to let them go ahead that would close off all the lawsuit and give them clear sailing. I think this is what they're waiting to see - the make-up of the new council," Roberts said.

Erdahl said, "One of the major dividing lines of this election should be, 'Are you for or against Freeway 518?' "I think it's real bad to be in favor of 518 especially if you're on the west side of town. I don't see how anyone could win in District A who was in favor of 518," he said.

"IT'S AWFUL HARD to convince people that having a freeway go through part of their town is good, especially in this town. The problem with the conservatives is they get on the wrong side of an issue and they can't get out and that's the way it is with 518. It's dumb for them to act the way they're acting, it loses votes, but they can't stop. So I think it's incumbent upon liberal candidates to really get out there and make it an issue," Erdahl said.

Linda Eaton

All three council members said the city's handling of firefighter Linda Eaton's request to nurse her son while at work should not be an election issue but they anticipated new candidates will probably bring it up.

They said the Eaton case is "a nonissue" because the city manager is in charge of personnel matters according to the city charter.

"Let's say you're a candidate and you get asked, 'What would you have done in the Linda Eaton controversy?' What do you say? Because anything that you say that's in favor of her is illegal," Erdahl said. "I did the maximum I could do by saying exactly what it says in the city charter - give your opinion to the city manager.

Roberts said, "I do think we had some control over it. I think we refused to take that control. We discussed it and we all agreed it was an administrative problem.

"If we'd have said to Neal (Berlin, the city manager), maybe we should decide, I think we could have accepted that responsibility but we didn't. We decided to let our administrators handle it and we backed their decision."

ERDAHL SAID, "The one thing I wasn't going to do was to cut the funding from the legal department so that we couldn't pursue the suit. It seems to me that that is just a lie. That's doing substantively what you can't do in form and I think it would be illegal.'

Roberts said no one should be elected on the basis of a single issue and he said. "I don't think it would be a valid issue as far as getting elected to the council.'

The airport

Roberts and Erdahl said the Iowa City Airport will be an issue particularly for Iowa City's west side. The airport has been surrounded by a longstanding controversy involving several matters: whether it should be expanded to better accommodate jet aircraft; whether the city is providing adequate financial backing for the facility; and whether west side residents near the airport have been subjected to noise problems and safety hazards because of aircraft flying over their homes.

ROBERTS SAID, "We've had a make-up now of the council that is pretty negative as far as the airport is concerned, as I see it. The council, since I have been on these two years, has not allowed the Airport Commission one penny of tax money that they've asked for improvements and I say they're stifling the airport by their actions.

"We've got to get council people that are for it in order to keep it running," he said.

Erdahl said, "The airport is a big issue on the west side. It seems to me the conservatives would want to say they're in favor of the airport but not in District A and the liberals want to make the airport an issue, particularly

in District A."

Mass transit

This past summer the council voted to expand the city's bus system from 12 to 14 routes but a proposed fare increase was defeated 4-3. Ridership as increased dramatically as well over the summer.

Vevera said expanding the bus system further could very easily become an issue but he said, "Candidates who use that as an issue should have some fresh ideas where we can get the money to pay for it."

ALTHOUGH THE COUNCIL voted down the fare increase and several persons came to council meetings to speak against an increase, Roberts said, "I think if they put it up to the general public they would vote an increase.

"I talked to many, many people who ride the bus that would say they think it's too cheap. They think it should be higher. And the people who don't ride the bus would want to see the riders carry a bigger share," Roberts said.

Erdahl, who along with Perret, Neuhauser and deProsse vetoed the proposed fare increase, called mass transit "a good liberal issue."

Neighborhood

Issues such as the closing of Melrose Court, garbage fees, alley garbage collection, zoning issues and calendar parking were mentioned as smaller, related issues that will come up during the campaign.

Other issues

Housing, urban renewal and the second downtown parking ramp were also cited as issues that have come up in past elections and may resurface in this campaign.

They also anticipate new issues will surface during the campaign.

Erdahl said, "The thing that's great about conservatives is they always do something that's so inane that it makes a great campaign issue. You don't have to contrive anything - they'll do it. So I'm sure between now and November, blunders will occur."

Crucial vote seen in coming council election

By ROD BOSHART Staff Writer

For the past two years, most of the important issues that have come before the Iowa City Council have been settled by the majority vote of the same four councilors. With three of their terms expiring, the outcome of the November election could have a significant effect on the direction city government will take in the next two years.

Among the decisions made by the same 4-3 split are those to challenge the state Department of Transportation's proposed Freeway 518 alignment and proposed Melrose interchange, to expand the city's bus service without increasing the bus fare, to close Melrose Court and various budget allocations

The majority is made up of Councilors Carol deProsse, David Perret, Clemens Erdahl and Mary Neuhauser, who often vote on the liberal side of issues facing the council. The three members frequently voting against them are Mayor Robert Vevera and Councilors Glenn Roberts and John Balmer. The seats held by Perret, Neuhauser, deProsse and Balmer expire in January.

Vevera, Roberts and Erdahl are quick to point out there are many issues where the council votes unanimously or where some members cross over the 4-3, liberalconservative split.

"I THINK MOST PEOPLE will agree this is one of the better councils we've had in terms of getting the business of the city done. We've had some Looney Toon things in the past," Erdahl said.

But he, Vevera and Roberts agree that most of the important issues are decided by the 4-3 vote

Erdahl said most of the major issues where the 4-3 split occurs involve development questions that strongly divide the council

Vevera agreed with Erdahl's assessment, saying, "This council we have now and the last council have been two of the best councils the city's ever had - and I'm the guy on the short end of the 4-3 vote all the time.

"But I would be lying if I didn't want to see that 4-3 vote change around the other way. And that means if all four incumbents

Back the flying Hawks; read The Daily Iowan for the best coverage Karabah (h. 197)

because of this 4-3 vote," Roberts said. "I definitely think it would have an effect if the 4-3 vote swung the other way.

run, one of them (on the majority) would

"I think this is a real important election

have to lose," Vevera said.

Vevera said the effect of a change in the 4-3 majority would not be drastic but he said the council would be more conservative.

"I think we would be a little more careful about where we spend money and worry a little more about where we were going to get the money from," Vevera said.

Vevera said he did not think any services would be cut back or eliminated, but he added, "If the 4-3 majority did change, I can definitely see no more starting of new services or programs."

Roberts said there is a very good chance the election outcome will produce a more conservative council.

"I think there are a lot of folks in this town ready to switch that (the liberal majority). Most people feel the older populace are the conservative ones and the younger people are liberals, but I think a lot of younger people are changing their thinking," Roberts said.

"I think that, with the changes along those directions, there is a very, very good chance that you will see a switch in the council make-up to what we all term conservative," he said.

BUT ERDAHL DISAGREES with Roberts' prediction.

"If I was going to predict, I'd say there won't be a clear cut majority either way. We'll probably get one liberal, one conservative and a couple of in-betweens," Erdahl said

"We need to get District A and C in order to maintain that majority," he said.

Two at-large council positions, as well as the seat in District A and the seat in District C, will be filled in the November election
