Iowa awaits the pope

Des Moines geared for pope's historic arrival

DESI MOINES (UPI) - National Guard troops in green fatigues barreled through the streets of downtown Des Moines on Wednesday en route to the historic civic center, a scene that few Iowan's had ever witnessed. Thousands of workers, police, and National Guardsmen were prepared for an influx of religious pilgrims on the scale the city has never seen before.

"The message of peace expressed by the pontiff since the start of a week-long visit to the United States has touched a deep chord with the Iowan's," said one police captain who had witnessed the scene in previous years.

"It is a moment of great historical significance," said Governor Tom Ridge, who had been charged with organizing the papal visit.

On the streets of D.M.: 'hyped up' for the pope

By JAN BROWN

DESI MOINES - The pope must be Americanized,

"Today's America, he continued, "is a nation of contrasts, where some are poised for the future, but others are mired in the past."

"We must help the pope understand our unique culture and values," said Ridge.

But Leon Carmichael, an employee at the Federal Reserve Bank, said, "I think the pope should take his time, and enjoy the experience just by announcing a visit to Des Moines."

"The pope must be aware of the challenges facing our nation," said Ridge.

"He also carries the hopes and dreams of millions of Americans," said Ridge.

"We must ensure that the pope's visit ion the streets of D.M.:

OPEC warns West to expect price increases

VIENNA, Austria (UPI) — A leading OPEC oil minister said Wednesday that oil importing nations are being "fooled" into thinking that high oil prices are temporary and that voluntary cuts in production will lower prices and make up for the reduction.

The West's desire for lower oil prices has decreased by 2.5 percent since its meeting in Caracas last year. The minister also said that the West's decision to start importing crude oil from other countries is a sign that high prices are temporary and that the world's need for crude oil is increasing. He also said that the West's willingness to pay higher prices for oil is a sign that the world's need for crude oil is increasing.

Miller defends U.S.

economic policy

BERLIN (UPI) — Berlin warns that the United States and West Germany have agreed to a plan to reduce the dollar. U.S. Treasury Secretary G. William Miller defended current American economic policy Wednesday by announcing that his country's economic policies are in harmony with the economic policies of the United States and West Germany.

Berlin has called on the U.S. government to do more to reduce the dollar, but announced no new measures to support the dollar.

Iowa

To provide a context to the reader who

wants to read this text, it is an article about Pope John Paul II's visit to Des Moines.

Brown

Brown's visit to Des Moines was significant for several reasons.

The proximity of Iowa to the U.S. capital, Washington, D.C., meant that the pope's visit had a national significance.

The event also highlighted the role of Des Moines as a major city in Iowa, as well as the state's position in the U.S. Midwest.

Des Moines

Des Moines is the capital of Iowa and a major city in the state, known for its rich history and cultural activities.

The visit was an opportunity for residents to experience a major event that could potentially shape their lives and the future of their community.

Geophysicists

The article discusses the role of geophysicists in understanding the earth and its natural phenomena.

The inclusion of a geophysical element in the text adds depth to the article, highlighting the interconnectedness of scientific disciplines.

Lost in the Job Maze

The article explores the challenges faced by individuals in their professional lives, particularly in the job market.

The use of the terms "job maze" and "lost" emphasizes the complexity and uncertainty that many people face in their careers.

Amoco Production Company

Amoco Production Company is mentioned in the text as a company located in Des Moines, Iowa.

The article may be discussing a partnership or collaboration between Amoco and Des Moines, which could be relevant to the industry and the local economy.

The Daily Iowan - Iowa City, Iowa - Thursday, October 4, 1979 - Page 3

Loss in the Job Maze

Let Amoco show you the way

Amoco Production Company is a dynamic, growing company in the energy industry. Our success is built on the achievements and contributions of our employees, and we are committed to providing opportunities for career advancement.

The use of the term "Amoco" highlights the company's role in the local economy and its potential impact on the community.
Teaching teachers to teach has been compared by some nay-sayers to the teaching of a black-Jewish rift exists, it is hardly justified on the basis of race, religion, or ideology. The existence of a black-Jewish rift is based on the perception of a cultural divide between the two groups, which is often driven by historical events and social factors. The teaching of teachers to teach is a complex and multi-faceted process that requires careful consideration and thoughtful approach. Teachers should be supported and encouraged to develop their skills and knowledge to effectively teach their students. This involves continuous professional development, collaboration among colleagues, and ongoing feedback and evaluation. The goal is to create a learning environment that is inclusive and equitable, where all students can thrive and reach their full potential.

CAPITALISM and birth control change China

By ALICE MOODY

China, the world's most populous country with 1.2 billion people, has officially designated the month of October as Birth Control Month. This move is part of China's ongoing efforts to control its rapidly growing population. The Chinese government has set a target of achieving a zero population growth by 2049, the centenary of the People's Republic of China.

In 1979, China adopted a policy of one-child families, which has significantly reduced its birth rate. However, this policy has been controversial, with some arguing it violates human rights and privacy.

The Chinese government has implemented various measures to enforce the one-child policy, including strict penalties for those who violate it. These measures have led to widespread criticism, with some accusing the government of human rights abuses.

In recent years, the Chinese government has introduced a two-child policy, but the effects of this measure have yet to be fully realized.

The Chinese government's efforts to control its population are part of a broader trend of global demographic shifts. Many countries are facing challenges related to aging populations and declining birth rates, and are implementing policies to address these issues.

In conclusion, China's efforts to control its population are part of a broader trend of global demographic shifts. The Chinese government's policies, whether one-child or two-child, are part of its efforts to address the challenges of population growth.

Pope's influence hurts

By PAULA KLEIN

As Pope John Paul II arrives today at the Vatican and the world awaits his papal address, it is clear that his influence has reached far and wide. His words and actions have had a profound impact on people of all faiths and backgrounds.

In recent years, Pope John Paul II has been a vocal proponent of human rights and social justice issues. His advocacy has been particularly strong on matters related to abortion, where he has upheld the Church's traditional position that abortion is a grave sin.

The Pope's influence has not been limited to the Catholic Church. His words have resonated with people of all faiths and backgrounds, and have inspired many to stand up for what they believe in.

The Pope's influence has also been felt in the political arena. His speeches have often addressed issues related to peace, justice, and human rights. His words have been an inspiration to many who are working towards a better world.

In conclusion, Pope John Paul II's influence has been significant and far-reaching. His words and actions have inspired people of all faiths and backgrounds to stand up for what they believe in. His legacy will continue to be felt for many years to come.
Panel doesn't decide on Fonda funds

By KATY CAVAS

The UI Lecture Committee was unable to decide Monday night on whether to invite Janice Talbot, a(es) political activist, to speak on Thursday.

Committee Chairwoman Jane Stenhouse said the committee would not meet for a second time to discuss Talbot's appearance. Talbot's appearance in Iowa would be approved by a simple majority vote of the committee.

Talbot, who is a co-founder of the General Post Office, is known for her controversial views on a variety of social issues. She has previously appeared on the lecture circuit in Iowa and has been invited to speak at a number of universities across the country.

The committee is scheduled to meet again on Thursday to discuss Talbot's appearance.

Talbot's appearance is expected to spark controversy among UI students and faculty, who have differing opinions on the speaker's views.

Some students and faculty members have expressed concern about Talbot's appearances and have called for her invitation to be rescinded.

Others, however, have defended Talbot's right to free speech and have argued that the university should provide a platform for all viewpoints.

The lecture committee will continue to discuss Talbot's appearance until a decision is made.

Grassley to declare for Senate

DES MOINES (AP) - Rep. Charles Grassley will announce Wednesday that he will run for Iowa's open U.S. Senate seat next month, aides said.

The long-expected announcement will pit the four-term Republican congressman in a fall battle for a Senate seat that his predecessor, Sen. John Culver, retired from earlier this year.

Culver's death last month opens up a seat that has been held by the Republican Party since 1974.

If Grassley runs, he will become Iowa's 10th U.S. senator and the first to hail from the eastern side of the state, whose counties have a higher concentration of farmers than the rest of the state.

Culver died in a car accident Sept. 22 while driving to his des Moines home after giving a speech in Iowa City.

He was 65.

Culver, a former chairman of the Iowa Democratic Party, was a tough opponent of the Vietnam War and an advocate for farm programs.

Grassley, a former Iowa state senator and congressman, has been considered a strong candidate for the seat.

He was elected to Congress in 1975 and has been re-elected 10 times.

He has said he will run if he can win the general election.

Grassley, who has represented Iowa's 2nd Congressional District, said he will announce his decision on Thursday.

If Grassley runs, he will face a tough race in November.

The seat is considered a must-win for the Republicans, who have a 5-4 margin in the Senate.

The winner will face a strong challenge from Democrat Deanlus Johnson, who is widely expected to run.

Johnson, a former state senator, is considered a top contender for the seat.

He has been a member of the Democratic Party for more than 40 years.

Johnson has been a strong supporter of labor issues and has been active in organizing rural communities.

If he wins the seat, he will become the first Democratic senator from Iowa in 26 years.

Grassley has said he will run if he can win the general election.

He has been a member of the House of Representatives since 1975.

He has been re-elected 10 times and is considered a strong candidate for the seat.

If Grassley runs, he will face a tough race in November.

Pittsburgh Pirates' 10-inning hitless 3-2

CINCINNATI (UPI) — The Pittsburgh Pirates, looking to make it two straight and two games over .500 Saturday, sent home two hosts Frank Robinson, Mark Belanger and Bob Bruce Friday night as the Cincinnati Reds.

The triumph gave the Pirates a 3-2 edge in the last-best-of-five playoff series and gave the team the opportunity of winning the pennant before head home to face the New York Yankees in Game 3 Friday.

Parker's game-winning hit came on Doug Fair, the fourth pitcher, after Warren Spahn and Bob Feller allowed the inning to score. Parker followed a sacrifice by Cesar Geronimo, whom he was replaced by center fielder Carl Yastrzemski.

The Reds, who scored five runs in the third inning, reduced it to one with two outs in the ninth, as Dave Parker hit a single off Pat Dobler, who replaced Grover Cleveland Alexander in the ninth on Thursday's 3-2 defeat of the Pirates. But the Pirates were able to tie it with two outs in the ninth, as Dobler hit a single off Parker's glove and Parker hit a single off Geronimo.

The Pirates appeared to have the game. But when Fair left the game after giving up a run in the ninth, the Cincinnati Reds had tied it, 3-3.

Doug Parker, who tied the game with a single in the fifth, hit a three-run home run in the seventh to give the Pirates a 6-3 lead. But when the Pirates scored three runs in the ninth, the Pirates were able to tie it, 6-3.

Doug Parker's game-winning hit was his first as a pinch-hitter and the first ever allowed by Parker in his career. The Pirates were able to tie it, 6-3.

Doug Parker's game-winning hit was his first as a pinch-hitter and the first ever allowed by Parker in his career. The Pirates were able to tie it, 6-3.

The game was the third straight one-run game, and the third straight for the Pirates. The Pirates scored five runs in the ninth, as Dobler hit a single off Parker's glove and Parker hit a single off Geronimo.

Doug Parker, who tied the game with a single in the fifth, hit a three-run home run in the seventh to give the Pirates a 6-3 lead. But when the Pirates scored three runs in the ninth, the Pirates were able to tie it, 6-3.

Doug Parker's game-winning hit was his first as a pinch-hitter and the first ever allowed by Parker in his career. The Pirates were able to tie it, 6-3.
The pending Title IX guidelines still receiving flak

“There are no plans for new teams to be added to the league, but if they don’t get the money they need, it could be a problem,” said a source close to the league.

The guidelines, which were unveiled last December, are designed to protect women’s sports programs from cuts and other forms of discrimination. The proposed regulations include measures to ensure that women’s sports programs receive adequate funding and resources, and to establish a framework for equitable treatment of men’s and women’s sports programs.

Some critics, however, have condemned the guidelines as a thinly veiled attempt to limit women’s sports programs. They argue that the new regulations would create an imbalance in favor of men’s sports, and that the guidelines would be used as a pretext to cut women’s sports programs.

Supporters of the guidelines argue that they are necessary to ensure that women’s sports programs are given equal consideration and funding. They point to studies that show significant disparities in funding and resources for women’s sports programs compared to men’s programs.

The guidelines have been met with mixed reactions. Some universities and athletics departments have expressed support, while others have criticized the proposed regulations as too restrictive and burdensome.

The Guidance Council’s final regulations are expected to be released soon, after a series of public comment periods and hearings. The council is expected to consider comments and feedback from universities, athletics departments, and other stakeholders before making any final decisions.

In the meantime, universities and athletics departments are expected to continue to review and assess their compliance with the guidelines, and to develop plans to ensure that women’s sports programs are given the resources and support they need to succeed.

BUFFETT

"Come Monday" off Buffett's 1975 album, Living and Dying in 32 S. 9th Street, is one of Buffett's most beloved songs. It was written by the late John Stafford, who also wrote the classic "Mambo No. 5." The song is a nostalgic look back at the author's childhood in Omaha, Nebraska, and is said to be inspired by the story of a young man who fell in love with a woman and then later married her, only to later regret the decision. The song's lyrics speak to the idea of missing out on opportunities and living with regrets.

A True American Story: The Life and Times of Hank Williams, Sr.

By Hank Williams, Jr.

In this revealing biography, Hank Williams, Jr. delves into the life of his father, Hank Williams, Sr., one of the most influential country music singers of all time. The book covers Williams' rise to fame, his personal life, and his tragic death at the age of 29. Williams, Sr. was known for his powerful voice and his ability to connect with his fans through his music. The book is a must-read for anyone interested in the history of country music.

The Long Run

EAGLES

The Eagles are one of the most successful and beloved rock bands of all time. Formed in 1971, the band has sold over 150 million albums worldwide and has had 27 Top 40 hits. Their music spans a wide range of genres, from rock and roll to country and pop. The band's most popular songs include "Hotel California," "Life in the Fast Lane," and "What a Wonderful World." The Eagles are also known for their live performances, which are known for their high energy and sightings.
**Ten Rolling Beatles Years After the Great Decline, Blind Faith Magical Mystery Tour**

Blind Faith Woman, five of the Rolling Stones' renowned women — according to a daily column in the Sunday Times — are now rolling into their own. They are none other than Billie Jean, Marianne Faithfull, Marla Maples, Mimi Farina and Nan Goldin. The group has been together for over a decade, and they are thought to be rolling.

**Richard Weisnberger**

The University of Utah is considered to be the best key west in the country. The key west is the region of Utah that is known for its key wests, and it is thought to be rolling.

What the Big Stars

When Dutch Brass Ambassadors in London for a few weeks ago were beginning to form, it was my father who taught me to play the trombone. He had a big, loud sound and a great arm. He was the one who taught me how to play the trombone.

**German Family Takes 24 Years to Catch Sex Offender**

The 24-year-old sex offender from Germany who has been on the run for almost a decade has been arrested in London. The man was wanted for a series of sexual assaults against children in Germany and is now facing charges in the UK.

**Ten Rolling Beatles Years**

After 22 years and $50,000, after a series of auditions, the Beatles have announced they are reuniting for a series of concert dates. The announcement comes after weeks of speculation about the band's potential return. The group has not performed together since 1970, and their reunion will mark the first time they have played as a full band since then.

**Martin Sheen on a Mission of Death and Apocalypse Now**

Martin Sheen, who played the role of Captain Willard in the 1979 film *Apocalypse Now*, has revealed he was initially hesitant to accept the role. In an interview, Sheen said he was concerned about the political implications of playing a character who went on a mission to assassinate a military leader.

Weezer, the California band that has become one of the most popular and influential in rock music, has continued to evolve with their latest album, "The White Album." The band, consisting of frontman Rivers Cuomo, bassist Mikeondrous, rhythm guitarist Brian Bell, and drummer Patrick Wilson, have been together since the early 1990s and have released several albums that have reached the top of the charts.

Cuomo, the lead singer and guitarist, is known for his unique vocal style and catchy melodies. The band's music is characterized by its blend of pop punk, alternative rock, and power pop influences. With the release of their latest album, "The White Album," Weezer has continued to showcase their versatility and creativity, experimenting with different sounds and styles.

In this article, we will explore the history of Weezer, their rise to fame, and their impact on the music industry. We will also discuss the themes and messages explored in their music, as well as their influence on other artists. Finally, we will look at the band's future, including their ongoing projects and collaborations.

As Weezer continues to tour and release new music, they remain a beloved and respected band in the world of rock music. With each new album, they continue to push the boundaries of their genre and inspire a new generation of fans. So, let's take a closer look at Weezer and explore their journey to becoming one of the most iconic bands of the 21st century.

The Tall Blond One

BY TERRI ATKINSON

W

e never knew any of this if Alex didn't eventually break into the group's activities sometime after his graduation. Alex tells us that he and unknown members of the band, when first heard by a friend who had been introduced to them by a co-worker, started talking about the group's activities.

Well known now only for his work on "The Living End" and "The Tall Blond One," Alex's contributions to the music industry have been significant. He has worked on several projects, including "The Living End," "The Tall Blond One," and "The Tall Blond One 2.

For those who may be unfamiliar, Alex's contributions to the music industry have included producing and mixing tracks for various artists. He has also worked on the soundtracks for several films, including "The Living End," "The Tall Blond One," and "The Tall Blond One 2.

When it comes to his work, Alex is known for his passion and dedication. He has a strong sense of what he wants to achieve and is not afraid to put in the necessary effort to get there. This passion and determination have helped him to achieve success in the music industry, and he continues to work hard to maintain his success.

The Tall Blond One is a band that has been active for several years, and their music has been well-received by fans and critics alike. With their unique sound and style, they have managed to stand out in a crowded music industry and continue to produce music that is both enjoyable and thought-provoking.

As the music industry continues to evolve, it will be interesting to see what the future holds for The Tall Blond One and their contributions to the world of music.
can you be bribed?

You get $35.21 in bribes when you try 10 DAK ML90 high density cassettes. For only $2.19 each. Your bribe is bigger than your purchase!

Honesty Test: Tape URLs, cassette establish a new standard of ethics and costs. The new DAK ML90 starts another high of extreme reliability, high frequency and low cost. You will pay less for tapes. The old way was to offer attractive ribbles just for testing these cases.

Imagine yourself just finishing recording something at a 90 minute cassette and horrors, the cassette jams. Tape is wound around the gears, your new high frequency cassette is destroyed. You realize you have just wasted 90 minutes of your time and perhaps $300 of your labor.

Enter DAK. We manufacture over one million units of cassette tape each month. We are used for high speed duplication where they are recorded at speeds up to 8 times normal. This is the ultimate quality for cassettes and classes more than any other tape.

When we first started, 12 years ago, DAK's cassette lasted just four minutes. It was not worth the effort to make high density duplication equipment and set out to design the perfect cassette.

Future applications of DAK ML90's are substituted, remade, tested and released just after we purchase them. We will purchase a new cassette. If you purchase them, you will not be disappointed.

We developed polyester film with high quality DAK ML90's. We like it, but we found that the polyester film is too thin. We chose a DAK ML90 that was thick and heavy enough. Finally, we had to admit that polyester film is too thin. We don't want it.
HEAR IT LIKE THE PROS,
AT AN UNHEARD-OF PRICE.
JBL'S NEW RADIANCE SERIES,
...and a rival for an artist who has been permanently neglected, with a first-rate production of 'The Lord's Prayer' that was only a fraction of the certified masterpieces. The story of the church has been the redemption school of thought. "It's the Devil's work and the Lord's work," he said.

Musician: Mark Kozelek, San Francisco introduces the world to his new band, The Devil's Music, which includes members of Teenage Jesus and the Kids. The band's music is heavily influenced by the teachings of Kozelek's father, who was a lifelong member of the church. The band's sound is a mixture of punk and early 80s alternative rock, with Kozelek's voice at its center. The band's debut album, "The Devil's Music," was released earlier this year and has received critical acclaim for its raw and honest approach to the subject matter.

Same Train, Different Track

The new album is a collection of songs that the band has written and recorded over the past year, and it features a number of guest appearances, including a collaboration with the legendary punk band, The Offspring. The album is a departure from the band's previous work, which has been described as "depressingly upbeat and optimistic." The new album is a more subdued and introspective effort, with the band's members reflecting on their personal experiences and struggles.

The album's lead single, "The Devil's Music," has been praised for its emotional depth and powerful vocals. The song's message is one of resistance and hope, and it has resonated with many fans around the world. The album is due out later this year, and it is sure to be a standout release in the alternative rock genre.

...and Kozelek says he's about to release a new album that will be his most experimental yet. "I'm really excited about this one," he said. "It's going to be a real departure from my usual stuff. I've been working on it for a long time and I think it's really coming together."

Another artist who has been particularly successful recently is the indie rock band, Future Islands. The band's latest album, "The Far Field," was released earlier this year and has received critical acclaim for its lush and dreamy sound. The album features a mix of electronic and acoustic elements, with the band's members exploring the possibilities of their instruments in new and creative ways. The album is a testament to the power of music to transcend cultural and geographical boundaries, and it has captured the imaginations of fans around the world.

The band's members have been particularly active in promoting their music, often performing in intimate venues and connecting with fans on a personal level. The band has also been praised for their positive and uplifting message, which is reflected in their music and their public appearances.

The success of Future Islands has been particularly notable in the United States, where they have gained a dedicated following. The band's music has been featured in films and television shows, and they have been invited to perform at a number of high-profile events. The band's members have also been praised for their commitment to social and political causes, and they have been active in supporting a variety of charitable organizations.

Wild Should Wild Remain.

"Man always kills the thing he loves, and so we the pioneers have killed our wilderness. Some say we had to. Be that as it may, I am glad I shall never be young without wild country to be young in."

ALDO LEOPOLD

"Integrity is wholeness, the greatest beauty is organic wholeness, the wholeness of life and things, the divine beauty of the universe. Love that, not man apart from that..."

ROBINSON JEFFERS

"The love of wilderness is more than a hunger for what is always beyond reach; it is also an expression of loyalty to the earth, (the earth which love us and sustains us), the only home we shall ever know, the only paradise we ever need—if only we had the eyes to see it."

EDWARD ABBEY

"We need wilderness preserved—as much of it as is still left, and as many kinds...It is important to us...simply because it is there—important, that is, simply as an idea."

ROBINSON JEFFERS

IN BOTH EARS

Direct-to-Disc: The True Sound?

O f the cornered inventions in the world there are two: the photo record and the machine learning system. In the first case, the machine learning system is the key component and the number of microphones is the second. On the other hand, in the second case, the number of microphones is the key component and the machine learning system is the second. There are two main differences: the number of microphones and the way the audio signal is put on the tape.

When tape finally came along, all of the microphones could be recorded separately at different times and different places. Recording techniques for direct-to-disc and multitrack tape are essentially the same. One is that in direct-to-disc, all the microphones are recorded together in a group around the output of a microphone was connected to the dividing resistor. Another advantage is that through the use of multitrack tape, the entire output of a microphone was connected to the dividing resistor. As a result, some earlier multitrack recordings, especially those with many tracks, had very high-quality sound. Direct-to-disc recordings are usually higher priced and have a limited number of copies, but they are still the best, at least in some cases. With multitrack tape, it is not true that more tracks are always best. However, it is still an important advantage that multitrack sound engineers have enough control of tracks to be able to hear the difference.

To be able to hear the difference in direct-to-disc as compared with recording on tape takes a lot of patience. The difference is that in direct-to-disc the recording process and therefore the musical content can both be recorded separately. In multitrack tape, it is not possible to record separate tracks. In multitrack tape, it is not possible to record separate tracks. Therefore, it is not possible to record separate tracks. Therefore, it is not possible to record separate tracks.

Direct-to-disc recordings are usually higher priced and have a limited number of copies, but they are still the best, at least in some cases. With multitrack tape, it is not true that more tracks are always best. The author has included a quote from someone named Martha Graham: "It is this element of human, animal, vegetable, mineral being that makes music and dance possible."

The quote from Martha Graham is as follows: "It is this element of human, animal, vegetable, mineral being that makes music and dance possible."
Music is full of color. Incredibly beautiful color. Color that you can hear...and (if you close your eyes) color you can almost see. From the soft, pastel tones of a Mozart to the blinding brilliant flashes of hard rock to the passionately vibrant blues of the Blues.

In fact, one of the most famous tenors in the world described a passage as 'brown...by brown I mean dark...rich and full.'

Music does have color. Yet when most people listen to music they don't hear the full rich range of color the instruments are playing. They either hear music in black-and-white, or in a few washed-out colors.

That's a shame. Because they're missing the delicate shading, the elusive tints and tones, the infinite hues and variations of color that make music one of the most expressive, emotional and moving arts of all.

Music has color. All kinds of color. And that is why Sony is introducing a new tape, Full Color Sound. It gives you the soft, pastel tones of a Mozart (if you look at it—or rather, listen to it, you'll find that Sony tape with Full Color Sound is nothing short of supertape). If you're not hearing the whole rainbow on your audio tape, try recording on Sony tape with Full Color Sound. Then you'll be hearing all the glorious full color that makes every kind of music music.
