No phone calls monitored despite policy, electrical inspector says

By TONY DWYER / City Editor

Directory goof a missed proof

By ROD BOSETH

The phone-monitoring policy that has drawn criticism from liberal arts faculty members and staff has not been enforced. Electrical-inspector Paul Rowles told TDL: "It's very difficult to do that on an hourly basis."

Because board members are aware of the policy, they have been calling at random, Rowles said. He has told them, "If you have problems, and you feel that the parking is an issue on your street, you feel that there are some problems with the parking, you should report it to us, and we will look into it."

Bowers, Senior Building Inspector Glenn Hynes, contend the staff's handling of the problem should be conducted in an independent, either by the councilor or not acting as a consultant or not, the councilor or not acting as a consultant or not, he said. "I am calling this to the attention of the councilor."

The senate said Monday that he will remove the councilor from the Senate.

"The councilor has been acting in a political role and the councilor is not aware," he said. "I am calling this to the attention of the councilor."
Grain storage ‘flying’ locally

The city of Iowa has shown considerable restraint in constraining foreign students' activities through its policy of giving foreign students a limited number of permissions to work off-campus.

NENDO

ONE of the most recent forays into this arena was the announcement of a new policy by Iowa City. The policy involves a new set of regulations on the activities of foreign students, particularly those who work off-campus.

It is hoped that these regulations will help to prevent foreign students from engaging in activities that are not in line with the city's policies. However, there are concerns that the regulations may be too restrictive and could lead to a decrease in the number of foreign students who choose to study in Iowa City.

BARBARA DAVIDSON

KISS and tell

There are few things which appeal to our sense of aesthetics as much as the beautiful and the grotesque. For some, it is a source of great pleasure, while for others, it is a source of horror.

President Carter seems to be in the latter camp. He doesn't see himself as one who can influence the masses at all, nor as one who can help to shape the future of our country.

The president's speech on race was much more interesting than the one on Vietnam, which he delivered at the University of Michigan. In it, he talked about his history and his hopes for the future.

The most interesting aspect of the speech was not what he said, but how he said it. Carter has been described as an orator who prefers to use his voice to make his points, rather than to rely on written text.

Banks jack prime to 14 1/2

NEW YORK CITY: U.S. banks Tuesday raised their top interest rate by 1/2 percentage point to 14 1/2 percent in an attempt to prevent inflation from surging to levels higher than those predicted by a 60 percent majority of New York economists.

In a conference on business to prevent inflation, the Fed increased the prime rate for the third time in a month, taking it from 14 percent to 14 1/2 percent. It is the biggest single premium ever imposed on U.S. banks.

Ban\s are being charged with the task of containing the current inflation rate which is rising at a record rate of 14 percent. The Fed rate was increased 1 1/2 times by the Federal Reserve System last month.

The decisions on how to go about it were made by a small group of top bankers at the New York Clearing Union.

Among those who have indicated that the prime rate change is a "welcome step in the right direction" is New York Governor Hugh Hynes.

"The banks have a lot of work to do to get inflation down," he said.

Systems—an aid to disabled

By J. CHRISTENSEN

Systems Unlimited of Iowa City is not a day care, a summer camp or service bureau for people with mental or physical disabilities. What they do is help people—75 active clients, many of whom are severely mentally handicapped—organize the lower levels of the private or public world in which they find themselves. They do this, according to System's Unlimited's Executive Director John Johnson, by helping families reallocate the services they provide for their handicapped children.

"We're not trying to sell our clients something," Johnson said. "We're trying to help families in those areas where they can provide aid for handicapped, mentally disabled children and young men and women. We're helping these families find services that are provided by the state and local government, and we're helping them to find services that are provided by private agencies."

Johnson noted that most families have multiple handicapped children, that the problem is regionalization, and that there is a need for change.

Johnson said that most of the families they serve are in the area of the southeast part of Iowa, with some in the central part of the state. He also noted that the families they serve are not all trying to sell their clients something, but rather to help them find services that are available.

Johnson said that the families they serve are not all trying to sell their clients something, but rather to help them find services that are available.

Rain halts Series start

BALTIMORE (UPI) - A heavy rain forced Memorial Stadium into a premature Tuesday night and formal bases were called in the fourth inning, as the Orioles and the Pittsburgh Pirates were forced to wait at least until Wednesday night to complete the game.

The game was stopped in the fifth inning of a game that was tied, 5-5, when the rain started to come down in earnest. The game was halted after the third out of the top of the fifth inning, with the Pirates leading, 5-3. The game will be continued under the best of seven, with the Pirates ahead, 3-2.

The Pirates had a 2-0 lead after two innings, but the Orioles scored two runs in the third inning to tie the game. The game ended in a tie after three innings, with the Pirates leading, 3-2. The game will be continued under the best of seven, with the Pirates ahead, 3-2.

The Pirates had a 2-0 lead after two innings, but the Orioles scored two runs in the third inning to tie the game. The game ended in a tie after three innings, with the Pirates leading, 3-2. The game will be continued under the best of seven, with the Pirates ahead, 3-2.

Advising Supplement to the Daily Iowa, Iowa City, IA October 10, 1979
Believe us, nothing you can buy right now is likely to give you more or longer lasting enjoyment than a good stereo system.

Like a lot of people, you may find that traffic jams, parking problems, crowds and even long lines for gas are actually bringing down the price of a good music system. These same advances assure that with proper care you can expect at least ten years of high fidelity sound reproduction from your music system.

Whatever your tastes are, there are so many different sources of music available today (much of it free) that you'll never run out of new and exciting music. A music system from The Stereo Shop will give you greater pleasure than almost anything you can buy.

SPECIAL SAVINGS ON OUR Advent/2W - Yamaha System

Before you spend $500 on a stereo system, make sure it sounds better than this one.

Here's a stereo system that you will be as satisfied with next year as you are when you first take it home. And because of special pricing on the Advent/2W speakers, we are able to offer this well-balanced system for under $500.

The Advent/2W is a two-way dual tweeter, acoustic suspension speaker with performance that is comparable to that of many far more expensive speakers.

We've combined the Advents with two products from Yamaha to assure outstanding performance and reliability. The receiver is the Yamaha CR220 which has low distortion as well as unique features such as variable loudness control. The turntable is the YP-B2, a transistor and integrated circuits have actually brought down the price of a good music system. These same advances assure that with proper care you can expect at least ten years of high fidelity sound reproduction from your music system.

Whatever your tastes are, there are so many different sources of music available today (much of it free) that you'll never run out of new and exciting music. A music system from The Stereo Shop will give you greater pleasure than almost anything you can buy.

ACCESSORIES CAN MAKE THE DIFFERENCE

HEADPHONES

YH-1 $65
YH-2 $50
YH-3 $35

Headphones enable you to enjoy music without disturbing those around you. They can provide you with extremely accurate sound reproduction at a fraction of the price of comparable speakers. Yamaha offers ultra-lightweight headphones that can be worn comfortably for hours and give you wide range frequency response with low distortion.

SPEAKER-UPPERS

$25/pr

A few inches can make all the difference in the way your speakers sound - sitting on floor, they can provide you with extremely accurate sound reproduction at a fraction of the price of comparable speakers. Yamaha offers ultra-lightweight headphones that can be worn comfortably for hours and give you wide range frequency response with low distortion.

DISCWER

$12

Records are an expensive investment and our choice for a record care device is the Discwasher. This product will not only keep your records sounding new, but will remove ground-in dirt and grime from your older records. Remember, The Stereo Shop will refill your one ounce D3 fluid bottle for only $1.50.

TAPE

UDC 90 $4...
6/$22.50 12/$42
UDXL1 & II $5...
6/$27 12/$51

Using high quality tape is not only important for sound quality but is also crucial for the proper long-term operation of your tape deck. Cheap tapes are notorious for jamming, wearing out heads, and leaving oxide deposits. Our choice for recording tape is Maxwell and our special quantity pricing is listed above.

CARTRIDGES

SHURE M95ED $36
ORTOFON FSE II $45

A good phonograph cartridge can make a noticeable improvement in the overall sound of your stereo system. There isn't anywhere else in your system where you can spend so little and get an audible difference. Check our everyday low prices on cartridges and replacement styli from Shure, ADC, and Ortofon.

STEREO STAND

$60

Finding a place to put your stereo can be simplified with Barabash's "Stands." This attractive end table cabinet is made especially for stereo components and has room for a turntable and receiver as well as a shelf for record storage.
Above all we price loan store. We offer a consignment you charge. cards and we'll help find the right equipment for you.

We encourage browsers. We like to have people stop in, look around and pick up literature on new equipment. And of course you're welcome to bring your favorite records to us to compare speakers and other equipment.

We offer a consignment you charge. cards and we'll help find the right equipment for you.

We also do seminars and clinics on music systems. It's possible to get a system in your price class that will give you good-sounding, impressive-looking, reliable music system and at a price you can buy.

We'd like to be Your Stereo Store

We have nine years of experience. Nine years ago we opened The Stereo Shop in Iowa City, a small business built upon hopes of bringing the finest quality stereo equipment to this area at reasonable prices. Just two years later, growth have prompted the move to the present location at 499 Kirkwood Avenue. During this time, we have become the leading stereo dealer in Iowa City. We don't sell everything.

Supermarkets are fine for groceries but we've always believed that trying to display and sell everything in the store is only means having a lot of mediocre merchandise on your hands.

Fortunately, we have always had the ability to choose from amongst the best stereo brands available and our current choices represent the finest products in today's audio market.

We're not too large or too small. We're big enough to buy our merchandise at the right price but small enough to care about our customers.

We price competitively but value oriented. Our people are helpful.

We have commission salespeople but we have a friendly, low-key staff. Our people are willing and able to answer your questions and provide you with the information to make a solid buying decision. We won't forget you after the sale.

If you have questions or difficulties with anything purchased from us we're always available to help. If you have a service problem we do not want you to wait it is fixed as possible. We want our customers to continue to be our most effective advertising.

We make it easy to buy.

We set up stereo systems with speakers that work particularly well together. Our systems cover a wide range of prices and reflect our desire to offer the highest possible value per dollar. These choices help to simplify your stereo shopping. Some of these systems appear on the following pages.

We can help you select a stereo system that's right for you.

We encourage browsers. We like to have people stop in, look around and pick up literature on new equipment. And of course you're welcome to bring your favorite records to us to compare speakers and other equipment.

Hourly best values in hi-fi

Between $600 and $800 you can really begin to customize your system. You are in a position to get a system with deep bass response and the ability to play loudly without distortion in a large listening area. Also, in this price range you can make a wider selection in a terrible cartridge combination yielding wider frequency range and better record performance.

If you're a perfectionist

Above $1000 most noticeable improvement (aside from more knobs, levers, and meters) is an increased sense of spaciousness in the music. And of course the perfect stereo system is a high performance system. A system with deep bass response and the ability to play loudly without distortion in a large listening area. Also, in this price range you can make a wider selection in a terrible cartridge combination yielding wider frequency range and better record performance.

What your dollar buys

You should spend at least $300 for a complete high-fidelity stereo system (two speakers, an amplifier or receiver and turntable). Below $300, complete systems are usually "compromise" which present too many compromises in fidelity, volume or reliability to be considered "quality" music systems. The one alternative in the under $300 price range is to select good used components. We at The Stereo Shop accept trade-ins so we can have an inventory of used items to help you put together a system in your price range.

We'd like to be Your Stereo Store

We have nine years of experience. Nine years ago we opened The Stereo Shop in Iowa City, a small business built upon hopes of bringing the finest quality stereo equipment to this area at reasonable prices. Just two years later, growth has prompted the move to the present location at 499 Kirkwood Avenue. During this time, we have become the leading stereo dealer in Iowa City. We don't sell everything.

Supermarkets are fine for groceries but we've always believed that trying to display and sell everything in the store is only means having a lot of mediocre merchandise on your hands.

Fortunately, we have always had the ability to choose from amongst the best stereo brands available and our current choices represent the finest products in today's audio market.

We're not too large or too small. We're big enough to buy our merchandise at the right price but small enough to care about our customers.

We price competitively but value oriented. Our people are helpful.

We have commission salespeople but we have a friendly, low-key staff. Our people are willing and able to answer your questions and provide you with the information to make a solid buying decision. We won't forget you after the sale.

If you have questions or difficulties with anything purchased from us we're always available to help. If you have a service problem we do not want you to wait it is fixed as possible. We want our customers to continue to be our most effective advertising.

We make it easy to buy.

We set up stereo systems with speakers that work particularly well together. Our systems cover a wide range of prices and reflect our desire to offer the highest possible value per dollar. These choices help to simplify your stereo shopping. Some of these systems appear on the following pages.

We can help you select a stereo system that's right for you.

We encourage browsers. We like to have people stop in, look around and pick up literature on new equipment. And of course you're welcome to bring your favorite records to us to compare speakers and other equipment.

Hourly best values in hi-fi

Between $600 and $800 you can really begin to customize your system. You are in a position to get a system with deep bass response and the ability to play loudly without distortion in a large listening area. Also, in this price range you can make a wider selection in a terrible cartridge combination yielding wider frequency range and better record performance.

The one alternative in the under $300 price range is to select good used components. We at The Stereo Shop accept trade-ins so we can have an inventory of used items to help you put together a system in your price range.
Shopping for Speakers

Selecting a loudspeaker is the most crucial decision you will make when purchasing a stereo system, since it will determine in part what other components you'll need for a well-balanced system, and because it alone is responsible for transforming electrical signals back into musical sound.

The ability of a speaker to do this accurately to recreate the sound of the original performance—which determines the quality of the speaker. Speakers having a boomy bass or outright hideous response might sound flashy during a brief showroom demonstration, but it is just such exaggerations that will make music sound unnatural.

Some of the qualities that contribute to a speaker's naturalness, such as frequency response and dispersion, are fairly obvious, a matter of being there or not being there. But it is the more subtle characteristics, such as octave-to-octave balance, phase coherence and stereo imaging, that ultimately distinguish between a speaker that merely makes all the sounds and one that truly establishes the illusion of live music.

Because of recent advances in technology and the competitive nature of the hi-fi industry, receivers have improved in quality and today offer a better value than separate amplifiers and tuners for most applications. And today offer a better value than separate amps to get enough power to adequately drive the particular set. The important thing is to get the lowest price for what you want and want it for.

Choosing a Receiver

A receiver is the result of combining an amplifier (for power and controls) and an AM/FM tuner (radio) in one package.

A WORD ABOUT POWER

The first thing most people want to know is how much power the receiver has. While the amount of power does loosely determine the volume level for a set of speakers, it is important to point out that 50 watts will not be twice as loud as 25 watts. In fact, doubling the power only provides a slight increase in volume potential. The important thing is to get enough power to adequately drive the particular set of speakers you choose.

TUNER SPECS

Most of the FM tuner specifications tend to be confusing at best. You should be concerned basically with determining how well the tuner will receive both local and distant stations with an absence of background noise. Look at the stereo sensitivity at 50 dB of quieting (lower is better) and, of course, the Dolby noise reduction system.

The Genesis U-6

Clarity and definition for maximum musical detail.

We have a large selection of records for use in evaluating speakers, but we invite you to bring in your own records or tapes so you’ll have music you’re familiar with. You might also wish to bring in other speakers to compare to those we have, or the amp or receiver you’re using with the speakers, or anything else you think will help you in selecting the right speaker. And when you think you have selected your speakers, you may take them for a home trial to assure yourself that they sound as good (or better) in your home as they do in our showroom.

Featuring the Yamaha A-1 Amplifier

The A-1 integrated amplifier offers exceptional sonic performance—quality of sound usually associated only with high-priced separates—at a modest cost. Rated at 70 watts per channel with no more than 0.02% total harmonic distortion the A-1 features a direct-current digital input/output stage, a class-a/b power stage which feeds the signal directly from a D.C. phonograph preamplifier to a high-quality D.C. power stage following 25 db overload characteristic digital decoders, and a built-in moving coil head amp. The clean physical design of the A-1 incorporates a maximum panel which houses and hides all time controls and monitor and input switches.

Yamaha TC-920B

The TC-920B comes equipped with Yamaha’s breakthrough in semiconductor technology—a pure plasma process which offers better sensitivity, lower distortion, and lower head and tape wear than conventional technologies. With two separate motors, one for the take-up reel and another for the input reel, the TC-920B provides superior high fidelity in recording and playback. This new deck from Yamaha also offers a loop speed control, 10 power, and its full electronic IC logic control, bias adjustment control, FM/MPX, and volume functions, and of course the Dolby noise reduction system.

Yamaha YP-D71

The YP-D71 is Yamaha’s latest development in the pursuit of maximum speed and reproduction accuracy coupled with ease of operation. The frequency generator uses a twin-phase locked loop control system which reduces wow and flutter to an unobtrusive 0.001%, while the tone controls on the YP-D71 are of the fully automatic type, with metal controls.

Yamaha M-4 Power Amp

Making sure that all audible frequencies are reproduced accurately, with minimum noise and distortion is the design concept of the Yamaha M-4, and it is the result. Making sure that high quality, new, high frequency, effective heat dissipation, and low thermal resistance, reproduce music returns to the original freshness of the original.

Today's Turntables

Yamaha T-1 Tuner

The T-1 tuner provides superior audio performance and high selectivity—simultaneously. For the technically minded, the T-1 holds distortion below 0.02% and sensitivity stereo separation to excess of 70 db. For those interested in stereo performance, the T-1 offers the benefits of high selectivity without sacrificing audio quality. An automatically switched 90K ohm mode selector determines the best selection made for any given signal. Other outstanding features include FM blend to reduce noise, two separate output terminals pairs, and a recording amplifier system.
New and Updated Products

Boston Acoustics A-200

A product of the most recent innovations in speaker design technology, the new Boston A200 is a three-way system employing a two-inch woofer, an acoustically isolated midrange and a fixed-velocity tweeter. Because of the unique proportions of the speaker enclosure, any wall it is placed against will act as an infinite extension of the speaker baffle. The result is a treble-free, distortion free, full range system that was designed for those who place stability and acoustical balance at any cost of genuine stereo monitors yielding audiophile performance at an amazingly modest price.

&350 ea

Concorde 20

The Concorde 20 by Ortofon is a new, ultra- low noise integrated cartridge made, providing lower stylus pressure, higher com- pression, and optimum tracking. It will track a severely warped record as though it were flat, and it is sensitive to the most elusive high-frequency transients, reproducing them with an accuracy characteristic of cart- rides costing two or three times as much.

&92 ea

Sony TC-K55

The Sony TC-K55 is an automatic cassette deck, featuring Sony’s hi-fidelity stereo speakers. Besides having the natural sound balance, deep bass response and high frequency dispersion that made Sony the unsung leader in America, the new TC-K55 delivers improved quality and reception, giving the TC-K55 not only the sound that the very touch of class.

&400 ea

Advent/4

The new Advent 4 is the latest contribution from the company that introduced true quality to the land of stereo. The Advent 4 is a five-way, low frequency loudspeaker system employing FULL-BANDWIDTH design and balanced midrange and tweeter. Besides having the natural sound balance, deep bass response and high frequency dispersion that made Advent the unsung leader in America, the new TC-K55 delivers improved quality and reception, giving the TC-K55 not only the sound that the very touch of class.

&89

AP/Thiman

The AP/Thiman DQ-10 is a five-way, phased, array speaker system which virtually eliminates the phase- shift and reflections that result from conventional speaker designs. Each driver is mounted on a separate baffle in a different spatial plane, in a manner which places all drivers in the same time plane. All frequencies arrive exactly on time and in phase, un- coloured by speaker cabinet diffraction, to produce the most spacious, transparent, and clean-controlled sound possible outside the audience.

&435 ea
A real component stereo system at an affordable price.

While some stores will laugh at you for expecting "real" component stereo at this price, we have something for you that is not only the real article, but sounds unmistakably wonderful.

Our components include a pair of Advent/3 speakers—the least expensive speakers we know of with really believable wide-range sound. They sound very much like Advent's more expensive speakers and they're a size that fits perfectly in most dorm rooms and other small to medium listening areas.

We power the Advent/3's with the Yamaha CR220 receiver, an excellent piece of equipment with clean, low-distortion sound and superb FM and AM reception. The record player is the BSR259/5 automatic turntable with dustcover and Advent cartridge with diamond stylus.

Come hear this combination and you'll be convinced that you can find excellent component stereo for only $369.

Our All-New Yamaha system—performance you'd expect at a cost that will amaze you.

When you choose a Yamaha stereo system, you have settled for nothing less than the finest in natural, realistic stereo music. Yamaha's tough standards of performance, measurement and unique features, make it the most wanted brand in stereo today!

This year we have selected three new products from Yamaha which we combine to form an all-new all-Yamaha system. The speakers are the NS-4's, a two-way acoustic suspension design with the natural sound expected from Yamaha speakers.

The receiver is the new Yamaha CR240 with specifications usually reserved for much more expensive units. The CR240's power output is 20 watts rms per channel at no more than 0.02% total harmonic distortion. housed in Yamaha's attractive ebony cabinet, the CR240 has features that allow for flexibility in listening whether it be records, FM or the addition of a tape deck.

Yamaha's ebony-finished YP-22 turntable is the final component in this system. It is a semi-automatic belt-drive model and we install the Ortofon FF15XEII to guarantee your records will be treated well.

$369
90 days same as cash or $80.07 down and $27.07 per month*

Our $689 system will tell you why the Advent/1 speakers have become best-sellers

When the Advent/1 speakers were introduced a year ago, we were certain they would become best-sellers, and our sales records confirm those predictions. The Advent/1 is Advent's definition of how close you can come, for fewer dollars and in a smaller cabinet, to the performance of the New Advent Loudspeaker (the latest version of this country's most popular and most imitated speaker, featured below).

To match the Advent/1 speakers we've selected the new Yamaha CR440 receiver. The CR440 has plenty of power (30 watts rms per channel) and extremely clean sound (less than 0.02% total harmonic distortion). Also, the CR440 has most of the features you find on more expensive Yamaha receivers such as variable loudness, independent record out selector, and FM MDS.

The semi-automatic belt-drive Pioneer PL514 turntable and Shure M91ED phono cartridge complete this system, and we're confident that again this year it will be one of our best-sounding and best-selling combinations.

$689
90 days same as cash or $149.67 down & $50.47 per month*

Our full-range, no-compromise stereo system sells for only $819.

No-compromise, full-range sound can and often does, cost into the thousands. But, now you can get this sound in our Advent-Yamaha-Sony system for only $819.

The heart of things in this system is the New Advent Loudspeaker (the successor to the original best-selling Advent Loudspeaker), which we're offering in its utility cabinet. The New Advents cover the full ten-octave range of audible sound with unbeatable balance and clarity.

To drive the Advents, we've picked the Yamaha CR640 receiver. The CR640 is not only a good value from the power & distortion standpoint (40 watts minimum rms output per channel, 20-20,000 Hz, at no more than 0.02% THD, 8 ohms) but its other specifications and features make it a delight to own.

Our turntable is the Sony PS-T1, a direct-drive model with auto-return, making it convenient to use. The Shure M95ED cartridge will treat your records gently.

Don't deny yourself full-range, full-bore stereo sound any longer. Come in and hear how much there is to hear!

$819
90 days same as cash or $173.57 down & $60.47 per month*

WHAT MAKES THE GREAT ONES GREAT?

BY MARK F. WEBER

SPORTS science hasn't exactly put a bionic man on the college football field...but scientists are assuming just what it takes—physically and psychologically—to be a football success. And it may not be long before the place for hopefuls to be discovered is not the practice field but the laboratory.

A sport like football requires different body types for different, specialized tasks. In its simplest form, this has always meant putting the big guys on the line, but it may not be that simple. But how simple is the model for helping pinpoint more precisely what body type and mind-set work best for a particular slot.

Some of the pioneering work in this area is being done at the Human Performance Laboratory at the University of Denver. Dr. Marion L. Clein, chairman of the university's physical education and sports science department, has allied computers with his expertise in kinesiology, the study of the body in motion. His research is helping unravel the riddle of the body in motion. His research is helping to unravel the riddle of why one athlete might be stronger, faster, or even more of a "pressure player" than another. Clein's research, for example, shows that bowed legs are an asset for a running back. They provide a low center of gravity, giving a runner better lateral mobility and less possibility of being sacked.

Scientists, psychologists and sophisticated machines are helping coaches find players with that All-American edge.
**GO HOGS!**

**STEP RIGHT UP! TEST YOUR STRENGTH! HAVE YOU GOT WHAT IT TAKES?**

**TOM SIMBETH**

A football game is a hazardous practice, and the coach must provide physical therapy for the slightest grade.

The coach must watch closely to avoid the pitfalls of a football player. He must be able to detect the moment when the game is over and when the game begins. He must be ready for anything that may happen on the field.

A doctor has gone by certain underlying factors. He must be ready to provide medical aid when the game is over. He must be able to detect the moment when the game is over and when the game begins. He must be ready for anything that may happen on the field.

A football player must be strong, quick, and athletic. He must be able to perform under pressure and in the midst of a game. He must be able to translate his athletic talent into a successful performance.

**RIVIERES GREAT**

**TICKET TOWN**

**KICKIN' 'N' GRINNIN'**

Strange Moments in College Football

In the Cotton Bowl, 1955, Arkansas' nose tackle, or \*bouquin*, was the key to victory. The Arkansas' nose tackle, or \*bouquin*, was the key to victory. The Arkansas' nose tackle, or \*bouquin*, was the key to victory.

Players are more likely to be successful if they are able to translate their athletic talent into a successful performance. They are more likely to be successful if they are able to translate their athletic talent into a successful performance. They are more likely to be successful if they are able to translate their athletic talent into a successful performance.

What is the secret of success in college football? The secret of success in college football? The secret of success in college football?

**BIG TEN’S GREAT RIVALRIES**

These are the heart-stopping, go-for-broke, anything-can-happen next year.

---

**Michigan vs. Michigan State**

Not only is this the game for which the Big Ten is famous, but it’s also the game for which the Big Ten is known. Michigan is the home of the Big Ten, and Michigan State is the university that produced the first black player to play in the Big Ten. The game is always a highly anticipated one, with fans from both schools showing up in force. This year, the game is expected to be even more intense, as Michigan is looking to extend its winning streak against its in-state rival.

---

**Indiana vs. Purdue**

Two other well-known rivalries in the Big Ten are the Indiana-Purdue game and the Michigan-Ohio State game. Both of these games are highly anticipated, with fans from both schools showing up in force. This year, the game is expected to be even more intense, as both teams are looking to extend their winning streaks.

---

**The Big Ten’s Most Distinctive Sports**

In addition to the traditional football games, the Big Ten offers some of the most distinctive sports in college athletics. These include basketball, baseball, and wrestling. Each of these sports has its own unique appeal, and fans from across the country flock to see them in action. This year, the Big Ten is expected to produce some of its finest performances, with fans from both schools showing up in force.
**Michigan vs. Notre Dame**

Michigan-Indiana and Michigan-Illinois have been the two most popular inter-state rivalries in the Big Ten. The latter series has been spirited: Illinois leads, 53-44-6. The Illini have kept pace since the 1962-63 series until the Shillelagh became a land by merchant seaman Joe B in tending to the University of Notre Dame. The Wolverines, however, have remembred that this means...

You're leading 17-0 in this one; it's still early in the third quarter. The ball is on your own 15-yard line and the situation is fourth and 10 with 10 minutes left in the game. You want to score a touchdown to go ahead 24-0. But the defense is playing well, and you need a short pass. You have 3 outs. You have a good running back, but 3 outs is a lot to try to get him to break through.

And here's what happened... On December 30, 1967, in the Gator Bowl, the record-breaking Iowa State team faced the defending national champion Notre Dame team. The game was a 20-19 win for Iowa State, thanks in part to a short pass. The pass was thrown by quarterback Chuck Green to fullback Bob Edwards, who was wide open in the end zone. The pass was good, and the Iowa State fans went wild.

This is the story of the Gator Bowl, which was the only game in which Iowa State head coach Earle Bruce faced the University of Florida. The game was played on December 30, 1967, and the final score was 20-19 in favor of Iowa State. The game was played in front of 67,851 fans in the Orange Bowl in Miami, Florida.

The game was a close one, with Iowa State and their fans feeling like they had been robbed of a win. The game was played in front of 67,851 fans in the Orange Bowl in Miami, Florida.

This is the story of the Gator Bowl, which was the only game in which Iowa State head coach Earle Bruce faced the University of Florida. The game was played on December 30, 1967, and the final score was 20-19 in favor of Iowa State. The game was played in front of 67,851 fans in the Orange Bowl in Miami, Florida.

The game was a close one, with Iowa State and their fans feeling like they had been robbed of a win. The game was played in front of 67,851 fans in the Orange Bowl in Miami, Florida.

After three years of frustration, John Scully finally is going to get his chance.

BY JOEL BIERIG

Even though he's only 24 and 100 pounds, the four-time Academic All-American and state football champion from Cedar Grove High School isn't your typical punter.

He is best known for his ability to punt the ball out of bounds, preferably in the end zone, and his ability to get the ball down near the goal line.

But there's more to him than just his punting skills.

"I've been working on my field goals," he said. "I've been working on my extra points.

He's been working on his kicks, too. He's been working on the things that make a punter successful."
"I looked from one goalpost to the other and it looked like it was about three miles away."

I was wrong, too.

The next week was different. Scully, though, had not returned to school for his sophomore year. When spring practice began, he had been cleared for contact and was allowed to play the offensive line. But the coaches had never been a threat for me. The first year Scully had come to the University of Illinois in 1969, he had been offered a scholarship to play offensive guard. But when he arrived on campus, the coach had told him he was too small and would have to switch positions. So Scully decided to try his luck at defensive tackle. And he made it.

Scully's statistics and stats show a good game-ready condition.
The FIRST ANNUAL LITE BEER BANQUET AND "I RESPECT RODNEY DANGERFIELD" TELETHON.

EVERY LITE BEER FROM MILLER.
IN A BEER AND LESS.

By KEVIN WYNESS

MAQUETTE, Iowa -- The view of Iowa's first annual LITE beer banquet was a little cloudy when Jeanne Jenstn said she was unaware of plans to shoot her husband on April 10 and that Robert and Judy Kern lied to her to prevent involvement in the scheme.

In the first-degree murder trial of the Kerns, Jeanne contends that two days after an unsuccessful hunting attempt against her husband, sheriff's deputies helped her carry out -- she was required to do some of the planning, she said ----the plan to murder her. She said she did not know the plan was to kill her husband.

She said that shortly before the murder, her husband Robert Kern called to tell her he was going to Mississippi to hunt, and that "I didn't know whether he was going to stay there or not, but I didn't think he would stay there for long."

The Kerns had told her earlier that April was "not a good time to hunt," she said.

"I didn't have anything to say about it," she said of the planning. "I didn't think I'd ever have to act on it."

"I really don't know what happened," she said when asked why she killed her husband. "I really don't know what happened."

"I just couldn't think about it," she said.

The Kerns have pleaded not guilty to murder in the first degree and will face trial on those charges.

ROBERT KERN, 39, of 210 S. 20th St., Phila., was arrested yesterday and charged with first-degree murder.

ROBERT KERN, 47, a resident of 200 N. 15th St., Phila., was arrested yesterday and charged with first-degree murder.

Jeanne Jenstn, 28, of 125 N. 15th St., Phila., was arrested yesterday and charged with first-degree murder.

The Kerns are both residents of 200 N. 15th St., Phila., and were arrested early yesterday by a grand jury on three counts each of first-degree murder.

Jeanne Jenstn has been held on $1 million bond since her arrest.

Local I

By TOM DRULY

Local labor leader Dick Fitts attended a meeting of the National Federation of State and County Labor Unions in Washington, D.C., yesterday.

"I'm happy that the conference was held in Washington, D.C.," Fitts said. "I think it was important for the labor unions to have a voice in the political process."
