Regents support salary increases

WASHINGTON (AP) - A congressional amendment ordering a federal budget cut of $525 million, supported by the House and Senate Appropriations Committees, will be placed on the conference committee for final action.

The amendment would reduce the Department of Education's budget by $525 million, according to a source familiar with the negotiations. The source said the amendment would also其中包括 a provision that would allow the department to increase its funding for education programs in the coming fiscal year.

The amendment was introduced by Rep. John Boehner, R-Ohio, and Sen. Arlen Specter, D-Pa., and was approved by both chambers of Congress without debate.

The amendment would affect the appropriation of funds for education programs, including grants for schools, colleges, and universities.

The House Appropriations Committee had earlier approved a similar amendment, but the Senate version was more stringent.

The amendment is expected to be voted on by the conference committee, which includes members of both chambers who will work to reconcile the differences in the House and Senate versions. If the amendment is passed, it will go to the full House and Senate for final approval.
Congress passes checking account interest bill

WASHINGTON, D.C. (UPI) - President Roosevelt signed a bill Wednesday that allows banks and other savings institutions to pay interest on checking accounts, opening the way for a six-week savings war that will challenge banks to lengthen their war to March 31.

The Senate then voted to end a noncontroversial measure that had been urged by the Senate Banking and Currency Committee, which was seeking to control the Senate.

The Senate then voted to delay the effect of the court decision for three months.

U.S. arms control director resigns

WASHINGTON - The President announced Wednesday that Ralph Earle, director of the Arms Control and Disarmament Agency, had resigned from his post.

Earle was named to replace Assistant Secretary of State for Special Political Affairs, who announced Monday that he would resign to take a post in the private sector.

The President also announced that he has accepted the resignations of two members of the arms control delegation.

Kung defies pope and continues lecturing

NEW YORK (UPI) - Cardinal Kung, head of the Roman Catholic Church in China, is defying Pope John II, who has ordered him to stop teaching.

Kung said he was "deeply saddened" by the church's decision and has decided to continue his work as the Bishop of Shanghai.

Tossa: Kosygin is still in power

MOSCOW (UPI) - Soviet Premier Kosygin, who is expected to resign within weeks, will be replaced by the current Communist Party leader, Leonid Brezhnev.

Kosygin's appointment was confirmed Wednesday by Premier Brezhnev, who said he had no plan to resign.

Wind-driven snow, ice snarl auto, air traffic

NEW YORK - Wind-driven snow, ice and freezing rain closed roads and caused delays in New York City Wednesday.

The New York City Department of Transportation reported that 120 mile-per-hour winds were causing problems on the highways and interstates.

There were reports of drifting snow and ice on the roads, causing problems for motorists.

Oil refining in U.S. increases

NEW YORK (UPI) - The U.S. refining rate hit a high last week and helped increase gasoline stocks, which still remain below the government's minimum acceptable level for the winter.

WASHINGTON - The nation's crude stocks are under scrutiny because of the potential impact of the Iraqi oil cutback.

WASHINGTON (AP) - The government cut back its estimate of the nation's crude oil stocks.

In the United States, the government cut back its estimate of the nation's crude oil stocks.

Economists predict a ‘lousy’ year for 1980

PHILADELPHIA (UPI) — Economists of the Conference Board this week issued a gloomy economic forecast for 1980, predicting more unemployment, less productivity and rising inflation. Although the nation’s economy appeared to be closer to the recovery stage, the report said there were serious uncertainties about the recovery.

The report said there were serious uncertainties about the recovery in 1980, but that the economy would continue to improve in the second quarter of 1981.

The report said that in 1979 there were 12 percent less people in the labor force than in 1978. It said the unemployment rate would average 7.6 percent in 1980.

The report said that the overall economy would improve in the second quarter of 1981, but that the recovery would not be strong enough to bring the unemployment rate back to the 1978 level of 7.2 percent.

The report said that in 1980 the economy would continue to improve, with the unemployment rate at 7.6 percent, but that the recovery would not be strong enough to bring the unemployment rate back to the 1978 level of 7.2 percent.

The report said that in 1980 the economy would continue to improve, with the unemployment rate at 7.6 percent, but that the recovery would not be strong enough to bring the unemployment rate back to the 1978 level of 7.2 percent.

Cable TV fees: unfair for non-viewers

Cable TV, the great wave of the future for Iowa City, is about to impose local government into people's homes. If the ordinance that is before us today is passed, it would not be only those who own televisions that would be hit but also those who do not. Since this wave of state Board of Regents, it may be that the proposed fee will be a matter of special is being considered. It seems that the state Board of Regents will impose an additional $20 to 30 per year for the satellite cable service, which would be equivalent to a mandatory charge on each resident's utility bill. This is a matter of concern to all of us who are interested in keeping up with the various services offered by the University of Iowa.

The bill a year doesn't sound like a lot of money to many people, but there are some basic questions that need to be asked. Why should it be necessary to impose such a fee? What are the reasons behind this decision? These are important issues that need to be addressed. It is not only the issue of fairness but also the question of whether or not the proposed fee is justified.

Letters

Dear Editor,

I am writing to voice my concern regarding the proposed fee for cable TV. I believe that this fee is unfair and unreasonable. The fee has been imposed on all residents, whether they use the service or not. This is not only a matter of fairness but also of equity.

I understand that cable TV has become a part of our daily lives. However, I believe that this fee is not justified. The cost of the service should be shared by those who benefit from it. The fee should not be imposed on those who do not use the service.

I urge you to reconsider the proposed fee. I believe that a fair and equitable solution can be found. I thank you for your attention to this matter.

Sincerely,

[Name]

Planning bus system changes

by Carol Thomas

I have lived and worked in Iowa City for many years. During that time I have observed the city’s public transportation system and have noticed some issues that could be improved. One of the main concerns I have is the current bus system, which is not always accessible to all residents.

I believe that there is a need for a more efficient and reliable bus system in Iowa City. The current system is not only outdated but also does not meet the needs of the residents. The buses are often overcrowded, and the waiting times are long. Additionally, the routes are not always convenient for those who need to travel to different parts of the city.

I propose that the city should look into the possibility of implementing a new bus system that would be more efficient and accessible. This could include adding more routes, improving the frequency of the buses, and incorporating innovative technologies such as real-time tracking.

I understand that implementing a new bus system may require significant investment. However, I believe that the benefits of a more accessible and efficient public transportation system would outweigh the costs. The city should consider exploring different options and working towards a solution that best meets the needs of the residents.

I hope that the city officials will take my proposal into consideration and work towards creating a better public transportation system in Iowa City.

Sincerely,

Carol Thomas

Guest opinion

such an alternative approach. My assessment of the service the system has provided me has been as a user for many years. The system has been reliable, efficient, and cost-effective. It has provided me with access to transportation when I needed it, and it has been a significant part of my daily routine.

I have noticed some areas where the system could be improved. For example, there have been times when the buses were late, which caused delays and inconveniences. Additionally, the bus routes could be better planned to meet the needs of different neighborhoods.

Despite these challenges, I believe that the Iowa City bus system has been a valuable asset to the community. It has provided many residents with access to transportation, and it has helped to reduce traffic congestion. I hope that the city officials will continue to support and improve the system so that it can continue to meet the needs of Iowa City’s residents.

Sincerely,

[Name]
Op-ed

Op-ed policy

Op-eds appear every Tuesday and Thursday. Op-eds must be 400 words or less and must relate to current news, local, national and world issues. The primary goal of Op-eds is to encourage an exchange of ideas that will benefit our community.

Op-eds should be submitted to the editor via email at editorial@idaweek.com. A selection of submitted op-eds will be published online and in print as space allows. Op-eds that are not selected for publication will not be returned.

Panamanian forces broke up two anti-shah riots; 40 persons hurt

Panama City, Panama (UPI) — Panamanian troops using tear gas and pepper gas broke up two anti-Shah demonstrations in Panama City today, taking 77 persons prisoner. At least 40 persons were wounded in the riots. If the total toll of persons arrested — including those photographed in police custody — is 145 persons, some 100 persons may have been injured in the two demonstrations. The National Guard said five persons were wounded in the clashes.

Barry, Missouri (UPI) — President Carter said today that his government would not use force against the Iranian government of the late Shah Mohammad Reza Pahlavi. Carter called for negotiations, meeting of nations, and support of the government of the late Shah in its efforts to stabilize the country and make it peaceful.

Carter also said he would not use force against the Iranian government of the late Shah Mohammad Reza Pahlavi. Carter called for negotiations, meeting of nations, and support of the government of the late Shah in its efforts to stabilize the country and make it peaceful.

The National Guard said five persons were wounded in the clashes.

Well-fed worms can wash out waste

By BARBARA NOFFERT
National Geographic News Service

There's a little creature that just might help solve one of the nation's biggest environmental problems - the disposal of human excreta. Meet the earthworm.

Earthworms are small animals that live in the soil, where they feed on decaying organic matter, including human waste. When they die, their bodies become part of the soil, enriching it with nutrients and improving its structure. This makes the soil more fertile and ideal for growing plants.

But before we get too carried away about the magic of earthworms, it's important to understand how they work and how they can be used to dispose of waste. Here are some key points to consider:

1. **Worms and waste:** Earthworms can break down waste into smaller, more manageable pieces. They consume the waste and then excrete it as castings, which are rich in nutrients. These castings can then be used as fertilizer to enrich the soil.

2. **Efficiency and sustainability:** Using earthworms to dispose of waste is an environmentally friendly and sustainable solution. It reduces the need for landfills and incinerators, which can be expensive and harmful to the environment. In addition, using worms to dispose of waste can help reduce greenhouse gas emissions, as it reduces the amount of methane that is produced in landfills.

3. **Application:** While earthworms are a promising solution, they are not a perfect one. For example, they have a limited capacity to break down waste, and they require specific conditions to thrive. In addition, they cannot handle all types of waste, such as certain industrial and medical waste.

4. **Current efforts:** Several projects are currently underway to test and develop earthworm-based waste disposal systems. These include the use of earthworms in composting, where they are used to break down organic waste into compost, and in aquaponics, where they are used in combination with fish farming to create a self-sustaining system.

5. **Challenges:** Despite the promise of earthworm-based waste disposal, there are still many challenges to overcome. For example, the cost and logistics of setting up such systems can be significant, and there are still concerns about the potential for contamination and the spread of disease.

In conclusion, while earthworms may not be the silver bullet to解决我们面临的废物处理难题，它们提供了一个有前景的解决方案。通过研究和开发，我们可以进一步提升利用地球worms in waste disposal techniques，从而为创造更清洁、更可持续的未来做出贡献。
The story is about a couple, Ted and Joanna, and their son Billy. Ted is a lawyer who has to go to court; there, Ted and Joanna return to reclaim Billy. She seeks custody. The children have to air for young audiences. The exhibition catalogue is on sale at the front desk of the Museum. Kramer vs. Kramer is a movie about a divided family. The sense of understanding begins to dawn during the testimony. The court scenes, most viewers believe, are snuffling into our lives.
Boyle’s resolution: a ‘positive’ new year

BY SHARI ROACH

The Terps Hawkeyes were already through the first half of the season. They had been building their roster for the past season when many of them were at the same school with no interest in football. They had been doing it for the past two years.

Here’s the best part: the Terps began the season in the football twilight zone of the midseason period. They were one of the few teams that had not lost a game yet and were ranked in the Top 10.

They were a ‘positive’ new year. They had made a lot of progress and were looking forward to the next season.

Boyle was an accomplished quarterback on the Maryland Terrapins with the type of leadership that had been recognized for his accomplishments. His achievements were acknowledged with the prestigious Heisman Trophy, the award and the first position.

By the end of the season, Boyle had received the top award for his contributions to the team and the school.

Boyle was a true leader and a role model for his teammates. His determination and focus were evident in every game he played.

White, Campbell receive top award

PHILADELPHIA (TTP) — A senior receiver and a senior quarterback from the University of Delaware, Wednesday, received the Maxwell Football Club’s Heisman Trophy award. The Terps Hawkeyes were named the Overall Winner.

The Terps Hawkeyes were considered one of the top teams in the nation. They had played a tough schedule and had proven their worth throughout the season.

Boyle’s future is uncertain. His injury-prone team is facing a lot of challenges. But Boyle is determined to stay and fight for his team.

Boyle’s future is uncertain. His injury-prone team is facing a lot of challenges. But Boyle is determined to stay and fight for his team.

Trackmen pin indoor hopes on 'suppers'

By HEIDI MANN, Special to the Associated Press

Men's Track Coach Ted Wheeler is looking for a rather unusual Christmas gift this year. His team is in a position this season that places higher in the Big Ten than any time in recent school history. In fact, a victory next month might secure a second place finish, a feat that has eluded any varsity team since the late 1920's.

The team has a record of six wins and one loss, the only loss being a one point defeat to Illinois last month. The team is capable of finishing in second due to the consistant performance of individuals. Wheeler, however, predicts that things will not be easy for his team when they take to the track at the University of Illinois, and states that although many people are pinning hopes on the team, the men are trying to remain modest.

"I hope to have an excellent season this year," Wheeler said. "We are solid in every event and the regulars are all near their best form."

WHEELER'S WORDS in those two events are the result of Froehlich's graduation and Clemons' move to the U.S. He said that with Froehlich, the team would be tough to fill. "We have Froehlich and Jerry Wright back in the picture now. Jerry fired up those fellows. We have our wieners cooking in all the other events and things are working out very well, I believe," Wheeler said.

Wheeler frequently visited about a few of these events and said he decided to label his four "suppers". Wheeler added, "It might be a supper for people who want to eat and get their own."

Wheeler said that most teams only have one or two supers but he believes that his team has the ability to fill five or six outstanding individual events. Wheeler added, "It might be a supper to keep them going while the other teams are having their individual performances, it will keep us going for the remainder of the year."

The men's first big in the regular season will be Jan. 19 against Illinois at the University of Illinois Indoor Track. Other meets are scheduled in Cleveland, San Diego, St. Louis, and Atlanta.

The team plans to compete for their final home meet Jan. 24-25. Wheeler said, "We will have a home meet, it is going to be a big deal and we will be looking forward to the experience with different people."
