Problem of low faculty salaries

By DIANE SHAPLEY
Des Moines Register

The average salary of the faculty salaries begins with six to 10 percent. The faculty salaries are not kept up with the cost of living. The increase in the cost of living has not been increased in the salaries of the faculty.

In June, the faculty salaries were increased by 5 percent. This increase is not enough to keep up with the cost of living.

"The cost of living is increasing faster than the faculty salaries," said one faculty member.

The increase in salaries is not keeping up with the inflation rates.

Inflation undercutting sales

By STEVE MULHAN
Des Moines

The situation is changing. That's because consumers are becoming more price-conscious. The economy is slowing down and people are spending less. The prices of goods and services are going up, and people are not willing to pay as much for them.

The sales of the company have been declining. The company has been forced to cut prices in order to keep up with the competition.

"The prices of our products have been going up, but the sales have been going down," said one company executive.

The company has been cutting prices in order to stay competitive.

Money is tight, and people are more price-conscious. The company has been forced to cut prices in order to keep up with the competition.

Deadlocked Colombian talks may resume Sunday

Negotiations between the government and leftist guerrillas were suspended...Brotherhood member said that version was "preliminary," and said it would be released to the public on Friday.

Panama claims to have destroyed rebel bases

Panamanian defense minister said that his government had destroyed the last rebel base in the country. The government has claimed to have destroyed all rebel bases in the country since the beginning of the war. The rebels have denied the claim, saying that they still have bases in the country.

Soviet cancels Moslem New Year celebrations

The Soviet government has canceled the traditional New Year celebration for Muslims in the country. The celebration is held on January 1, and it is a major holiday for Muslims. The cancellation was reportedly due to security concerns.

Covered rebel plans to incite thousands of festival goers

A knowledgeable source said that the rebels had plans to incite thousands of festival goers in their homeland, where they have been placed in internal exile, to violent action as a sign of provocation, interference or external aggression.

**New Three Mile leak sought**

WASHINGTON, Pa. (UPI) - Technicians at the Three Mile Island nuclear power plant sought Thursday to locate a suspected leak in the underground cooling system of the disabled nuclear reactor that caused millions of dollars in radiation damage. Technicians were checking the cooling system of the Three Mile Island reactor for a leak that could have required the plant to be temporarily shut down.

Iowa House to require 23 cities to reform current housing codes

DOROTHYETERS (CPI) - Descriptions ranged from pro-business rule "invading" and "confusing" but the Iowa House Thursday passed legislation that would require all 23 cities to adopt housing codes.

Revised the Code right before the break. If I write it right, it is short, but it is a hard, bad bill. Many residents argue, and Rep. Dale Stibbs, D-Indianola, passing to bill of an Iowa State woman who "menace to public on her bedroom business" because it is done in public.

LORD COUNTY, W. Y. Answer the Census. is a responsible ropes and ladders. It is given you a option. All kinds of people can take a code and fail to their own needs.

The bill sent to the Senate at 3:30 p.m., would repeal the current state housing law on Jan. 1, 1981. By that time, all cities with a population of more than 15,000 must adopt one of several similarly recognized housing codes.

"This is one of the most pro-business rule invading acts ever to come in Iowa and I'm not bringing legislation," said Rep. Lyre Loucks, R-Williamsburg, chief sponsor of the bill.

Krevisen said there are only 23 cities that would be affected, although four others are nearing the population requirement. He said most of the cities want reform because the current law is about 80 years old.

Class affected by the bill include Ankeny, Burlington, Cedar Rapids, Clive, Des Moines, Delphos, Fort Dodge, Iowa City, Marshalltown, Newton, Oelwein, Ottumwa, Sioux City and Waterloo.

City officials would have to adopt un- favorable procedures that include regular inspections and condemnations, a schedule of penalties or fines, authority to issue orders for correction of violations and an overall system for the redemption of rent or correction of violations.

Rep. Philip Tredyffrin, R-East Burlington, attempted to reverse the scope of the bill just before the Senate acted on the cities with populations of 3,000 or more, which Rep. Rocky Clark, D-Marshalltown, said were more lenient than the requirements of the bill.

The House rejected Tredyffrin's proposal and held later legislative amendment.

3. Get a hold of your stereo, T.V., radio, tape machine, etc. before spring break and you'll have it ready to - go again when you get back.

"We can't see you won't see you... it'll kill you!"

WASHINGTON (UPI) — The American Cancer Society Thursday revised its recommendations for cancer checkups and exams to cut the frequency of screenings among almost all patients and eliminate annual physicals for some through age 50. The new advice was issued because of the success of earlier recommendations that affected more than 200 million Americans.

The new advice, which is based on a review of the scientific literature, is designed to reduce the number of annual physicals, mammograms, prostate exams and colonoscopies that are currently performed. The new recommendations are expected to save millions of dollars and reduce the burden on healthcare providers and patients.

Cancer checkup intervals reduced

WASHINGTON (UPI) — Americans ages 50 and older who have had cancer may benefit from cancer-related checkups every two years, according to new guidelines from the American Cancer Society. The guidelines are based on a review of the latest research and are intended to help doctors and patients make informed decisions about cancer screening and treatment.

The new guidelines recommend that patients with a history of cancer have checkups every two years, instead of annually, to assess their risk for recurrence and to detect new cancers early. The guidelines also recommend more frequent checkups for patients with certain types of cancer, such as breast, colon and prostate cancer.

The new guidelines were developed by a panel of experts from the American Cancer Society and other organizations, and are based on the latest research and best practices in cancer prevention and early detection.

The guidelines are intended to help patients and their doctors make informed decisions about cancer screening and treatment, and to help reduce the burden of cancer screening on healthcare providers and patients.
Pilobolus may become new dance species

A new dance species—Pilobolus—draws its motifs from green, viney things, and one more long ago, inspired the group’s exploration of an ancient but beautiful aspect of their dances are requiring archaic botanical lore.

The group not only choreographs its own dances but also draws its inspiration from nature. One Pilobolus is a phototropic fungus, and another is a llama discovered by Dr. Hugh Lofting. These and other natural elements are woven into the fabric of their performances, creating a unique and compelling dance language.

As with any artistic endeavor, Pilobolus is committed to the preservation and interpretation of these ancient botanical motifs. Each dance is a testament to the beauty and complexity of nature, and the group’s dedication to honoring these elements in their work.

The growth areas in the private sector are in service industries and the construction sector, where unions have not been particularly strong. "One reason is that the private sector is not as unionized as the public sector," said Gilroy. "In the private sector, we see the trend of reducing employment, and that has an impact on union organizing."

Gymnastics face regional action

BY DAN O'CONNOR

Disciplined...Chapela has painted a successfully impressive picture this year for her Iowa women's gymnastics team this weekend.

The Hawks hand the Blue Demon's 98.350-97.750, with their signature dual event sweep, and Chapela was named Big Ten Coach of the Year.

Chapela says she feels a team that has been together two weeks and was in a mess until a week ago Tuesday.

"Mary's talent, another floor specialist, will be entering the floor at the end of the dual event, missed four days of practices with a minor strain. But Chapela, over the opinion, is not prominent. Until the big gap, the "everyone was looking good. Our performance was good and we were ready to really improve." Although everyone competes in regions, advanced performance, quality team that can also achieve a medal, the national event is in April at Lausanne, Iowa, that means Greg Rogers and Bruce Smith in addition to thinness.

To quality in an individual, a gym­nastics team this weekend. In the last two weeks of the regular season.

Outdoor tennis highlights women's trip

The Iowa women's tennis team heads south today for a week's tour on the southern coast while the spring season

Tennis has had some success on the eastern side and on different surfaces but in the first two weeks of March 21 & 22.

The Hawks' dual record is 7-5 and a prominent high-

Coach Bob Weltlich and Texas Woman's University have played on clay courts, and perhaps some individual honors at All-American, the Hawks to have a period of competition that was not particularly new but very real.

Three of the top contenders that are quite impressive, apparently they certainly have done so. The Hawks have been preparing on the power of their own strength today.

"SOUTH CAROLINA IS very strong on our tour. We have nothing to be afraid of but we can play as well," Chapela said.

"I am not too concerned about Iowa," she said. "I think Iowa has been working on a new building court in preparation for spring," she said.

The Hawks' dual record is 7-5 and a prominent high-

Iowa wolves for top 20 finish

By HOWIE BEARDSLEY

Coach Glenn Patruno and his Iowa track and field staff will be going after their 13th-straight NCAA Division I championship this week.

"The team will enter the 1976 NCAA meet as one of the top entries in the nation," Patruno said. "The team has a lot of depth and will be one of the favorites to win the title.".

Patruno, who has been coaching at Iowa for 13 years, said the team will be going for their fourth straight championship..

"We've been working hard this season to prepare for the NCAA meet," Patruno said. "The team has a lot of potential and I'm confident we can come out on top.".

The team will be looking to improve upon their third-place finish at last year's meet.

"We have a lot of experience this year and I think we can take a step forward," Patruno said. "We have some great runners who can score well and I think we can medal in a couple of events.".

The team will be led by seniors Joe Schumacher and Mike Winkler, who both placed in the top 10 at last year's meet.

"I'm really excited about the season," Schumacher said. "I'm ready to match my personal bests and I think we can do well as a team.".

Winkler, who has been a star performer for the team, said he's looking forward to the meet.

"I'm ready to go out there and do my best," Winkler said. "I'm confident we can medal and I'm excited about the possibility of winning a national championship.".

Patruno said the team will be looking to win the 4x100 relay, the long jump, the triple jump, and the 1500 meters.

"We have some great performers in those events and I think we can medal," Patruno said. "I'm really excited about the season and I think we can do well.".

The meet will be held at the University of Iowa track in Iowa City, Iowa, and will be held over the course of three days.

"I think we have a great chance to do well," Patruno said. "I'm really excited about the season and I think we can medal in a couple of events.".
