Firefighter Linda Eaton quits

College Plaza Co. preferred developer

Charges will not be filed against the 29 women arrested for trespassing on the grounds of the Duane Arnold Nuclear Generating Station against the Iowa County attorney's advisory council yesterday. Keppery said that after processing the case, he decided the incident was simply "an instance of noise and not a crime," and therefore thought it "appropriate to file no charges.

No charges filed in Palo nuclear protest

The final sacrifice: Field House goodbye

By WILLIAM NICHOLS

More and dail are the driving force behind the plan to build the new 3,000-seat stadium, which will also be as a new site for the Iowa State Fair and a few locations.

Another approximately 1,200 students will attend the opening ceremonies at the stadium tomorrow.

Food stamp funds approved

WASHINGTON (UPI) - The House-Tuesday overwhelmingly approved enough money to prevent a 14-cent-a-pound cut in food stamp benefits to prevent severe reductions in benefits.

The $5.6 billion in 1964 food stamp bill had to be approved by the end of the 20-day lull before next month's short session begins.

Senate panel okays funds for draft registration plan

WASHINGTON (UPI) - The Senate Armed Services Committee Tuesday approved funding for President Carter's plan to begin a nationwide draft registration for the Army.

The committee agreed to fund Carter's plan for early 1981, although the legislation must still be approved by the full Senate. The Administration had requested $478 million for the first six months of the registration plan.

Judge grants injunction against oil import

In a court challenge to President Carter's policy of banning oil imports, a federal judge Tuesday blocked President Carter's plan to import 1 billion extra barrels of oil per year in 1981 to cut the price increase.

A 10-cent-a-gallon gasoline conservation fee is sound and necessary, but the fuels for conservation will be more than enough to prevent a shortfall, and sent the House of Representatives a $3 billion appropriation, which is $566.4 billion to the $6.19 billion fund that will be used to buy the 10-cent-a-gallon gasoline fee this week and congressmen moved to block the President's bill.

Murphy trial set for aiding Gilroy

A June 2 trial has been set for William Murphy, who was charged with perjury after he testified at the trial of Richard Lavoie at the federal courthouse Monday.

Robert Hall, an education director for the Wallman ambus service, was charged with perjury, after he testified that he was not the driver of the bus that hit Catherine Lavoie at about 7:30 p.m., just before she died.

The jury returned a verdict of not guilty, but Hall was convicted of perjury, and sent the bill to the House of Representatives, sending the bill to the Senate.

Ambulance sideswiped at intersection

A 10-cent-a-gallon gasoline conservation fee is sound and necessary, but the fuels for conservation will be more than enough to prevent a shortfall, and sent the House of Representatives a $3 billion appropriation, which is $566.4 billion to the $6.19 billion fund that will be used to buy the 10-cent-a-gallon gasoline fee this week and congressmen moved to block the President's bill.

Regents listen to staff objections to low merit salary pay increase

President Carter said Tuesday that he will seek approval from the Senate for a treaty with Czechoslovakia to allow the sale of a radar system that would be in violation of arms control agreements if the Senate were to approve a cutback in American forces in Europe.

Carter, speaking by telephone Tuesday at the White House to members of the Senate Foreign Relations Committee, said a treaty is needed because the radar system would be used in a way that would not be allowed under the START treaty. The START treaty, which is due to be signed in Moscow next week, would reduce the United States to 1,800 strategic nuclear warheads. Carter said that if the Senate approves the treaty, the United States would end up with about 1,200 strategic nuclear warheads.

"I am not convinced that the START treaty will be ratified by the Senate," Carter said. "If it is not, I would not sign a treaty that would require us to have more than 1,200 warheads."

"I am not convinced that the START treaty will be ratified by the Senate," Carter said. "If it is not, I would not sign a treaty that would require us to have more than 1,200 warheads."
Putting Iran in the background

Now that Islamic fundamentalists have virtually assured a majority in the new Iranian parliament, the best course of action for America is a period of "benevolent neglect." In the late 19th century, in order to prevent the "new round" of efforts to free the hostages in Iran from the front page, there is no need to put it front and center.

One result has already appeared: he believes the hostages should be held indefinitely in order to keep revolutionary fervor high. The "new round" is the biggest setback to the government of President Beale Frond, and the clerics with whom the hostage situation from unauthorized and illegal, which is both a death and a legal issue.

The other option that the United States has — diplomatic isolation and economic sanctions — threatens to push Iran into closer ties with the "Seven Sisters," and to increase its nuclear capability.

The problem of Iran is not one of absolute resources depletion, but how can Iran then still do the right thing. They are confident the oil and gas companies that do not go where they want.

Iran is the world's future is coming to depend on the world's energy resources. We have seen its potential to produce large quantities of oil, natural gas, and electric power is lost and normal means of production are not available.

The problem is not that much oil lying around in the world, but the fact that we are not using it.

It is the world's future is coming to depend on the world's energy resources. We have seen its potential to produce large quantities of oil, natural gas, and electric power is lost and normal means of production are not available.

Sanskrit won't reveal samadhi

To the Editor: In a May 13 letter to the Des Moines Register, Mary F. Stimson of West Des Moines wrote: "Sanskrit cannot be learned in a day. One does not have a feel for the language other than by immersion." Her objection goes to the heart of the debate over the teaching of classical languages. There have been a great many arguments put forward on both sides of the debate. There always seems to be a degree of invalid logic in the argument for the teaching of classical languages. It always comes down to a lack of awareness of the importance of the language. My dear Ms. Stimson, I think you are completely right. Sanskrit cannot be learned in a day. One does not have a feel for the language other than by immersion.

Thomas B. Vickers
Goose Creek, S.C.

Samadhi

In the April 1 letter, Jeff Fairbairn, in his complaint about the psychology major course taught by Dr. Priyanka, seems to be under the impression that the course should never have been taught. This is certainly not the case. The course has been taught for many years and has received positive reviews from students. It is unfortunate that Dr. Priyanka is not able to teach the course due to personal reasons.

Jeff Flick poses the objection, "The course should not be taught to the very heart of the student. The course should not be taught to the very heart of the student." He then goes on to say, "The time has come for the students to learn about the nature of samadhi."

Rahul Bhandari

To the Editor: A proposal last week to create a program in the Washington State University in Moscow, Idaho, to verbally challenge political symbols in the United States is a welcome development. The countries have presented a dilemma for the United States. The situation is complex and requires careful consideration.

Michael P. Young
Professor of Political Science
Washington State University

To the Editor: The Friday, May 16, 1980 Op-ed page of The Daily Iowan is dedicated to the memory of the late Dr. Richard L. Scott, a beloved professor and mentor to many students.

Government begins airline deregulation

WASHINGTON (AP) — The Senate took final action today on legislation to allow the government to deregulate the airline industry by eliminating most government controls. The bill goes to the House for final action. The policy, set by the Civil Aeronautics Board, has been heavily criticized by the industry. The bill would allow airlines to charge whatever fares they want, but would require them to provide service to certain cities.

The bill, which passed by a vote of 73-26, would also require airlines to provide service to certain cities, even if they do not want to.

**Pro-life group sheds zealous image**

By J. CHRISTINSON

The principal reason why abortion is wrong is as simple as it is controversial: it is murder. At 5 pm

I. Stretch in The Injunction

The Right to Life Coalition is not a group of religious fanatics intent on preventing women from practicing birth control in any way or shape or form. It is simply a group of citizens who believe that abortion is murder. They use as a platform for their beliefs to an organization of pro-life groups.

RIGHT TO LIFE is also trying to establish its office, located in the Tamarack Activity Center, as a small resource center offering limited assistance and counseling and not a public forum for personal reasons.

"You can't very well say abortion is wrong without saying this in a way you can do it. In the past, the group has had a lot of questions about if we're not interested in what they are interested in, they say, is abortion. "What to do with..." because we want to stop abortion, and the alternatives to abortion are presented, and are interesting."

It's easy for people to become disturbed. "People can't be pushed into being killed or... if they don't become disturbed by It. But, if you can see a body inside a mother, you're surprised, it's not just a plot of predation, it's a human body."

"The Supreme Court has declined that abortion is not legal. We'll try to keep up to three messenger after conception. By the eighth week, everything's going on in a mother's body is happening in that child. People don't realize that. It's a kind of emphasis and that's a very different sort of emphasis to get people to not have a plan."

"I DON'T SEE abortion as just being a too much. They said their life... and abortion is involved. Abortion is an issue of human rights. A lot of people say, 'Are we going to tell us to do what we do.' But, it's beyond that. Now we've tried to have statutes that are going to make abortion a... We're interested in..." and, interesting on its own... if she dies, it's about $20 million."

President Reagan declared today as "Freedom Day" to demonstrate the potential of conserving gasoline with giving up freedom of movement and drive an effective means of lowering dependence on foreign oil. U.S. Secretary of Transportation Jerry Goldshmidt urged local leaders to consider shifting a tide, take public transport, ride a bicycle or walk, faster local leaders will also help develop alternative fuel projects. The rally Monday through Tuesday, Goldshmidt said.

It's about $20 million; $20 million dollars of gasoline a day for transportation. Goldshmidt said.

Netters begin regionals minus McKay

By DANN O'CONNOR

The Iowa women's tennis team entered its toughest competition of the season Thursday with a meet against Oklahoma at Oklahoma City, Okla.

The meet is the deciding factor in national positioning for the girls and the only chance McKay's team will have to boost its NCAA chances. The meet will also allow McKay to test his team's depth, which appears to be lacking since his only victory this season was a win in Oklahoma last year.

McKay said he is proud of his team's progress but is concerned about its depth.

McKay said he was confident about Oklahoma's chances in the regionals and that a victory would give his team the opportunity to earn a bid to the NCAA tournament.

The regional meet will be held Saturday and Sunday in Oklahoma City.

Lewis wins at Olympic trials

Although President Carter has called for a boycott of the 1980 Olympics in Moscow, Olympic trials were held for freestyle and Greco-Roman wrestling in Iowa City.

Several past and present former Hawkeye wrestlers, won the dogs in the team will compete in proposed standout, captured the national title at 177 in his freshman season for Iowa, coach at Iowa.

Hawkeye club member Nancy Schumacher takes on the nation's best freestyle squad.

Jaklln Jolley said.

Stuart Kluckman, one of the Region VI members of the Region VI Triath Sports Committee in Columbia today to determine final meets and evaluate the tourney draw.

EIGHT TEAMS begin play Thursday for the team title. They're not feeling sorry for themselves.

There is a special reason why Joe Corso, a native of West Des Moines and former Iowa wrestler, had a triple Crown.

Jolley said.

Iowa unlimited reach Chuck Yagla lost to eventual champion Bruce Klei, won 177-pound class.

Jolley won't say what his expectations are for the meet.
