# GOP panel adopts plank against ERA

Republican platform subcommittee Tuesday snubbed the party's historical support for the Equal Rights Amendment and adopted a motion favoring a constitutional ban on abortions.

While the convention that will nominate Ronald Reagan for president next week was known to be staunchly conservative, even Reagan forces have sought to avoid controversial and potentially divisive stands on such issues as ERA and abortion.

Both the anti-abortion motion and the decision not to support the ERA will probably be challenged in the full Platform Committee later this week and on the convention floor next week, if enough votes are available for a minority report.

THE SUBCOMMITTEE first voted 11-4 to reject language supporting passage of the ERA, then approved by the same vote a resolution stating: "We affirm our support of a constitutional amendment to restore protection of the right to life for unborn children."

The panel's action on ERA came less than 24 hours after Reagan - who opposes ERA - said he could run on a platform supporting it.

Every Republican platform since 1940 has backed the ERA, but the new language would leave the issue up to state legislatures and blasts the Carter White House for pressuring states to ratify the amendment.

Party moderates led by national Chairman Bill Brock, former Chairman Mary Louise Smith, Gov. William Milliken of Michigan and members of the Republican Women's Task Force are expected to work to modify the

BUT IT appeared anti-ERA forces have the votes to keep out of the platform any language renewing support for the amendment.

Smith, a delegate from Des Moines, pledged to fight for the ERA on the convention floor if backers can muster

See editorial on the decision not to support the ERA... page 4

the 27 votes needed in the full 106member Platform Committee to get a minority report.

She said anything short of adopting pro-ERA language would be detrimental to the election of Republicans."

But Sen. John Tower, chairman of the Platform Committee, said: "ERA is an issue over which Republicans are divided, but it's not a divisive issue. I don't believe that it is a party-

THE VOTE pleased Phyllis Schlafly, an anti-ERA leader, who had advocated the language that eventually

"I think that was a good compromise and is fine," she said. ERA opponents had not hoped to win

such conservative language and some were prepared to compromise by leaving the issue out of the platform altogether.

By a vote of 11-4, the subcommittee defeated a move by ERA supporters to adopt the 1976 platform language, which read:

'The Republican Party reaffirms its support for ratification of the Equal Rights Amendment. Our party was the first national party to endorse ERA in 1940. We continue to believe its ratification is essential to ensure equal rights for all Americans.'

THEN IT approved a resolution by delegate Marilyn Thayer of New Orleans saying the GOP supports equal rights and equal opportunities for women, without taking away traditional rights of women such as exemption from the military draft."

It said ratification of ERA is a state issue, and assailed the White House and federal departments for applying 'pressure against states which refused to ratify ERA."

### Heatwave death count near 220

I.C. beer isn't as cold anymore

The death toll from a heatwave hovering over nine states in the South and Southwest neared 220 Tuesday, but medical officials were hopeful the count would climb at a slower rate as sweltering residents learned to deal with the third week of 100-plus degree temperatures.

Many towns in the "Heat Belt" were dangerously low on water and there were indications the heatwave would have serious financial im-

Bikers are angry and frustrated at the sudden closing of the bike path that linked the UI's West Side and Coralville. These riders feel their bikes are just as useful up in the air as on the barricaded bicycle route.

### Bicycle path linking UI, Coralville closed

By LISA GARRETT

The bike route connecting the West Side of campus with the Coralville city limits near Mormon Trek Road was barricaded Tuesday and bikers will have to take an alternative route possibly for several years.

The path is blocked with a fence and barricades less than a mile northwest of the UI Recreation Building. Contractors working on a storm sewer project closed the route, said Richard Gibson, director of UI Facilities Planning. But he said bikers were not warned in advance of the closing.

"Things over there are going to be messed up for at least a couple of years," he said.

The storm sewer project is part of the construction needed for the Hawkeye Sports Arena's drainage system, Gibson said. Funding to keep a bike route open in the area was lost when Gov. Robert Ray cut arena roadway money earlier this year, Gib-

KATHLEEN BRAYTON, a UI em-

ployee who bikes to work on the route, said she will start driving because the only alternative bike routes leading from Coralville to campus - First Avenue (Mormon Trek Road), Benton Street and the Highway 218 have a high volume of traffic.

Martha Kinney, a teacher at Roosevelt School located at 724 W. Benton, said she uses the bike route once or twice weekly and was surprised to find the route closed Tuesday. Brayton and Kinney said signs marking the path closed should be placed at the beginning of the bike paths, instead of in the middle.

Bikers who do not know that the road has been blocked off will have to go back up the hill that leads to the Recreation Building and then select an alternative route, Brayton said.

Kinney said she is worried about the possibility that a biker may crash into the fences blocking the path.

"It's a blind turn coming down the hill into the fences. And there is no warning until you reach the fence,"

#### U.S. completes airlift as new fighting erupts

BANGKOK, Thailand (UPI) - U.S. Air Force cargo planes completed their emergency airlift of weapons and ammunition to Thailand Tuesday as ferocious new fighting erupted near the Thai-Cambodian border between Vietnamese troops and Cambodian

Military sources said the border region exploded in gunfire when Vietnamese units laying siege to Phnom Malai, the home fortress of Cambodian guerrilla leader Pol Pot, stumbled across a rebel base near Non Sao E, 150 miles southeast of Bangkok.

Thai commanders said the eye of the battle was only 500 yards inside Cambodia and Thai border patrols were put on alert in case of any

The Thai supreme command reported four Vietnamese divisions, with a total of about 30,000 troops, encircling Phnom Malai with

tank and artillery support.
In Bangkok, a U.S. C-141 starlifter loaded with 15 tons of 50-caliber machine gun ammunition touched down at Don Muang airport, completing the six-flight \$3.5 million airlift.

#### One desert survivor may be smuggler

TUCSON, Ariz. (UPI) - One of the survivors of a desert ordeal in which 13 El Salvadorans died may have been a part of the alien smuggling operation, a Border Patrol official said Tuesday.

Fourteen other aliens, mostly dazed and delirious from heat and lack of water, were rescued over the weekend from rugged desert terrain in the 516-square mile Organ Pipe Cactus National Monument.

Ron Johnson, assistant shift patrol agent of the Border Patrol, said one of the survivors is under suspicion of smuggling. The man's nationality will not be disclosed "until we're prepared to arrest the man for the act," he

Johnson said interviews with the Spanishspeaking survivors were just about completed and said if the patrol makes any arrests, it will only be on smuggling-related charges. Any prosecution stemming from the deaths will be up to state authorities, he said.

'We have some suspects but I don't think we have any imminent arrest plans," Johnson

An outraged Gov. Bruce Babbitt Monday offered a \$10,000 reward for information leading to successful prosecution of the smugglers.

#### Gov't aids Detroit

DETROIT (UPI) - President Carter announced Tuesday the government will give the auto industry a \$1 billion boost by relaxing federal car emission standards for 1984, pumping money into depressed cities and backing loans to dealers.

Carter flew to Detroit especially for the announcement, saying the government stands ready to enter a "closeknit partnership" with the industry, which is suffering its worst

slump since the Great Depression. Both auto executives and labor leaders called Carter's plan a good first step, even though he did not go along with their pleas for

quotas on imported cars. Carter announced his plan to help Detroit after what he called "an historic meeting" with

industry and labor leaders. Under his plan - which he said does not need congressional approval - the government would relax auto emission standards set to take effect in 1984 to reduce smog in moun-

Carter said the industry would save \$500 million through the change because the Environmental Protection Agency has figured out how a reduced set of standards can be met for less money. He did not elaborate.

#### **Hua meets Carter** at Ohira's funeral

TOKYO (UPI) - Chinese Chairman Hua Guofeng arrived Tuesday to attend a memorial service for Japan's late prime minister and to meet for the first time with President Carter.

Carter arrived in Tokyo today just in time to attend the memorial service for late Prime Minister Masayoshi Ohira, who died June 12 of a heart attack

Carter and Hua also planned to meet privately Thursday morning for the first Sino-American summit talks since the two nations established diplomatic relations Jan. 1, 1979. It will be the first time the two men have met.

### Crushed can refund sites revealed

redemption centers where crushed cans will be accepted were disclosed by the state's beer distributors Monday.

Persons wishing to redeem their empty cans covered under the state's bottle bill can do so at Adek Inc., 702 Second St. in Coralville, Watts Food Market, 1603 Muscatine Ave., and the UI's Free Environment Can Van. The Can Van is parked at Currier Residence Hall Monday through Wednesday and at South Quadrangle Residence Hall Thursdays and Fridays.

The hours are 1 p.m. to 4 p.m.

George Mellickler, manager of Adek

Inc., said Tuesday that this company will accept any can as long as the Iowa 5 cent refund stamp is visible. Mellickler added that Adek has been accepting cans in the past and will continue to do so now that an amendment to the state's bottle bill went into effect July 1.

UNDER THE new amendment, beer distributors must provide a redemption center for crushed cans in all Iowa county seat towns. The legislation also called for one redemption center for every 25,000 people

Threatening to withhold the information

unless subpoenaed, Russell Larid, director of the Iowa Wholesale Beer Distributors Association last week refused to disclose the locations of Iowa's redemption sites.

A change of heart came Monday when Iowa Gov. Robert Ray said he expected the distributors' association to release the locations of centers where Iowans may redeem their crushed cans.

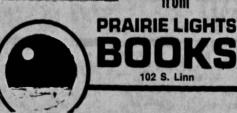

Free Environment Can Van employee Aaron Barlow said that they will accept any can under the same criteria their distributor, Adek, redeems cans. Barlow said crushed cans have caused little trouble so

#### State employees directed USED **FURNITURE AT** to disclose all free gifts Leavit æ

DES MOINES (UPI) - Employees of state agencies and departments have been directed to begin reporting the receipt of free meals and other gifts under terms of Iowa's revised bribery

Gov. Robert D. Ray, in an executive order released Tuesday, outlined a set of formal procedures that will provide for public disclosure of gifts and gratuities received by thousands of state workers.

News of the action was not warmly received by employees scattered throughout the state bureaucracy. Many argued the disclosure requirement would be an administrative nightmare, amount to little more than unnecessary paperwork and be unenforceable.

"I just don't think you're going to see 30,000 state employees keeping little records of every lunch, dinner and Christmas present they get," said one state official.

The long-awaited order clears the way for full implementation of a gift reporting requirement established by legislation passed by the General Assembly earlier this year and signed into law by Ray.

However, critics of the law, who argued it did not go far enough in establishing a code of ethical conduct for state employees, are faulting the governor for not plugging "loopholes" they contend were left by the

The law - and the rules set down by Ray - require state workers to report gifts valued at more than \$15. Although it refers to gifts received during "any one occurrence," there is disagreement over what constitutes a single oc-

The statute also does not place an annual limit on gifts that can be accepted from a single source.

The executive order signed by Ray requires officials and employees of Executive Branch agencies to file monthly reports with the secretary of state's office.

The rules provide for public disclosure of the reports, which must list the names and addresses of donors as well as the nature of the gifts

### State files suit to recoup bonds

DES MOINES (UPI) - The Iowa Commerce Commission Tuesday filed suit to recoup \$221,000 in bonds issued to the bankrupt Prairie Grain Company of Stockport.

The elevator, which left net losses totaling \$7.9 million in the aftermath of its financial collapse, had posted a \$196,000 warehouse bond and a \$25,000 grain dealer bond with the commission.

The bonds, required of facilities licensed by the state, are designed to provide indemnification against outstanding debts in the event of financial

The ICC, in a lawsuit filed in Polk County District Court, notes claims by the bankrupt company's creditors far exceed the bond posted at the time the elevator was licensed by the state.

The lawsuit alleges ICF Insurance Company, which holds the bonds, has ignored its demands for payment. The bonds were revoked April 30.

ICF has a claim pending in Van Buren County District Court, seeking \$221,000 to cover the bonds from the estate of elevator manager Raymond Keller, who committed suicide the day state inspectors arrived to look over the firm's books.

#### What is Bio Resources? plasmapheresis center located adjacent to the University of

But what is a plasma center? Plasma, first of all, is the liquid portion of an individual's blood. Plasma and its products are needed in large quantities by the medical field, especially in the treatment of burn victims and hemophilia and assuring the availability of immunoglobulins and standard testing serums. A plasma center then is a facility for the collection of plasma.

How is a plasma donation obtained? This is the procedure at Bio Resources: a

donor relaxing in a lounge chair fills a bag of blood. A technician takes this unit to a centrifuge area where the blood bag is spun at 5,000 r.p.m. separating the heavier elements in the bag to the bottom of the bag—this includes red cells, white cells and platelets. The plasma remains at the top of the unit and is simply extracted into a second bag of cells as belonging to that individual through a five step identification process that saves no room for error. When the cells are totally returned to the donor, the process is com ely repeated for a second unit. Bio Resources has a comprehensive program assure the good health of all donors. Prior to

### Day care funding for students cut

By CRAIG GEMOULES

UI students who received aid for home day care services under the federal Title XX program will have to find other alternatives because the federal aid was cut and a Johnson County relief program does not cover most students.

The Title XX funds included federal money to aid parents with day care costs, but at the beginning of July, the federal program that serves Area 10 — which includes Iowa City - was cut.

The Johnson County Supervisors then approved a plan to use \$40,000 from the county Poor Fund to provide aid for about 57 area

But the aid is not being provided to most students who use home day care facilities because there is not enough money to include students, the supervisors said.

HOME DAY CARE services are registered households, while day care centers are licensed facilities outside the

Homer Haynes, a UI student and chairman of the Coalition for Quality Child Care, a recently formed group of home day-care users and providers, said that students have been "automatically" cut off from

"What they're doing is putting students on the spot," Haynes said.

To meet the requirements to receive county aid, parents must be employed a minimum of 30 hours per week or have a mentally retarded or handicapped child for whom they are unable to adequately care: According to Haynes, few students meet these requirements.

He said that the theory used to "justify" excluding students is that by attending a university, students voluntarily leave the work force, demonstrating that they have no need for county aid.

HAYNES said some students who are parents, and who formerly received Title XX aid, may move their children to licensed day care centers. Day care centers, unlike home day care providers, are still eligible for Title XX aid.

This option, Haynes said, may be a problem for students who have inadequate transportation. He added that day care centers "cannot accept so many children." Another option is to form co-ops among

students with children - similar to a babysitting service, Haynes said. "There's not much talk about that because this summer session there aren't that many students around," he said John Moore, director of UI financial aids. **Prices Effective thru** 

said that the financial aids office is trying to pick up the slack for students who formerly qualified for Title XX aid. He said that students who no longer receive Title XX money may now be eligible for a larger financial aid package.

BETTY BUNGE, coordinating secretary for Community Coordinated Child Care commission of Johnson County, said that the exclusion of students will "affect them

"I think they're going to have to form independent co-ops among themselves," she said. "If they're (the parents) both students full time, they'll have to do very careful scheduling of their time."

Ron Larson, Iowa Social Services administrator, said that students do qualify for county relief if they are parents of a handicapped or retarded child, or if one of the parents is hospitalized.

In other cases, students will be excluded from receiving county relief under the supervisors plan.

We're at the final end of government, where we have to say what money is available and who gets it," Larson said. "That's a real tough spot to be in."

### Students still visit Europe despite high travel costs

By WILLIAM NICHOLS

Despite the fact that the cost of traveling to Europe has increased greatly and in some cases doubled during the past two years, American students have not decreased the number of overseas trips they are taking this

Icelandic Airlines, one of the most common student carriers, has increased its prices 35 percent this year and more than 100 percent during the past two years, said Elaine Shalla, international travel consultant for Meacham Travel Service.

For example, a round trip ticket from New York City to Luxembourg on Icelandic now costs \$633. During the summer of 1978, the round trip ticket cost \$295, Shalla said. Despite these increases, she said, "as many students are going this summer as ever."

Fritzen Ravenswood, coordinator of the UI Office of Overseas Study and Travel Abroad agrees that although prices have increased, student travel erseas has not declined.

WITH THE decreased value of the dollar, "Americans will have to get used to being the poor man in Europe rather than the rich man," she said. Ravenswood said she still encourages students to travel overseas.

"The broader spectrum of cultures you can get, the better understanding you have of the world," she said. "A lot of students feel that they won't be able to do these things after they settle down, which is true."

She added that traveling overseas is one of the best ways to "cut the apron

To save money and time, Ravenswood suggests that students do "a great deal of reading" before deciding where to go overseas.

"If you don't like cathedrals in the U.S., you won't enjoy them there. If you don't like beaches here, don't waste your time going to them there,"

TRAVELING in Europe can be expensive, Ravenswood said. A first class train ticket from Paris to Rome costs \$220; second class costs \$137, she

Ravenswood said that Eurail Passes. which permit unlimited rail travel in most European countries for a specified period of time, are still an economical way to travel.

First class Eurail passes range in cost from \$210 for 15 days to \$530 for three months of travel, according to the Council on International Educational Exchange's 1980 Student Travel Catalog.

By renting a car, a student may be able to see more of a European country, but cars are expensive, Ravenswood said. And she said that in large cities such as Rome, traffic and parking can be difficult.

Areas in Europe that are currently expensive, she said, include France and Germany. "In Germany you can count on a glass of breakfast orange juice costing \$3.50 or maybe more," she said. And she added that currently, London is the most expensive city in

Europe to visit. 'The best buys in Europe are Spain, Portugal and Yugoslavia,"

### Last census effort made to ensure federal funds

By WILLIAM NICHOLS

U.S. census takers last week began the final attempt to find those Iowa Citians still unaccounted for in the 1980

Linda Svoboda, district manager for the Census Bureau in Cedar Rapids, said that everyone in Iowa City must be counted to ensure that the city receives a Standard Metropolitan Statistical Area designation. With SMSA status, she said, "the

Iowa City area has the potential of receiving about \$700,000 per year in mass transit funds and \$600,000 to \$700,000 per year in Housing and Urban Development funds.'

The money would go toward public transit systems, day-care services and low income housing, Svoboda said.

**IOWA CITY Councilor David Perret** added that with a SMSA designation the UI Hospitals would qualify for federal grants for which it would otherwise be ineligible.

But to receive the SMSA designation and the \$1.3 million in funding, Iowa City and University Heights must have a combined population of 50,000 people, Svoboda said. Although a final popula-tion figure will not be available until later this year, a preliminary estimate will probably be provided to city of-

ficials next week, she said.

Perret said the city will have 10 days to respond to that estimate and ask for a recount in areas that the city feels may have been undercounted.

Svoboda said she hopes the 50 census takers in the Iowa City area will be finished with their count by late next week. She said the bureau expects to account for 100 percent of the population in Iowa City and added that she thinks they are "quite close" to that

PERRET SAID, "I am very hopeful that Iowa City will reach that 50,000 population figure. I've been scared by reports of cities in western Iowa losing

The census forms were due April 1. Because many people, including 1,200 UI dormitory students, failed to submit forms by that date, a second canvass was made in May.

Svoboda said that after the May canvass the "census takers did a really good job of getting all the students that were originally missed."

Iowa City received a temporary SMSA designation in 1977 on the basis of birth certificates, income tax returns and employment records, he

But the city can receive a permenent SMSA status with a population count of 50,000 in the 1980 census, Perret said.

### Medical program to expand

The U.S. Department of Health and Human Resources awarded the UI Physician's Assistant Program \$442,326 to expand its educational training to three family practice residency programs. The four year grant allows PA students to train at "medically underserved areas" in

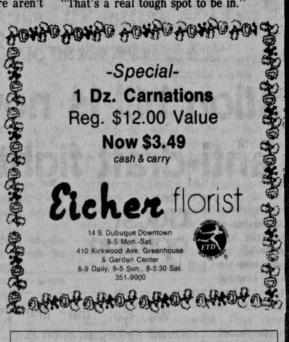

Muscatine, Sioux City and Waterloo. Denis Oliver, director of the PA program, said the expansion will allow PA students to work with resident physicians and staff PAs.

'Their initial training is a good time to encourage the association of these

groups in a team approach to the practice of family medicine," he said.

Oliver said the program, which requires about two years of study after a student receives an undergraduate degree, will give resident physicians a "better grasp of a PA's capabilities." Another purpose of the project is for staff PAs to serve as "role models" for the PA students.

The UI program ranked third among 58 national programs. UI graduates also ranked in the top 5 percent in the most recent national certification examination.

When you put part of your savings into U.S. Savings Bonds you're helping to build a brighter future for your country and for yourself.

#### Work for The Daily lowan

The Daily Iowan is taking applications for editorial page editor. The position requires a wide knowledge of current events, particularly local issues, and excellent writing and editing skills. The editorial page editor will be required to write at least two editorials a week, assign and edit all articles for the page, and lay out the page. Newspaper experience preferred. Pick up applications at the DI business office, Room 111 Communications Center. Applications must be returned to that office by 4 p.m. Monday, July 21.

Your color prints will be ready when promised, or your processir is FREE. This service applies to all original rolls of 110, 126 and 135 color print film (C-41 process, full frames only).

The Platform Committee of the Republican Party should resist manipulation by Ronald Reagan and endorse the federal Equal

Reagan is certain to be nominated as the party's presidential candidate when Republicans meet in Detroit next week. He continues to oppose the amendment despite the party's longstanding support for the proposal.

His opposition has led the Platform Committee to attempt to juggle party unity and basic human rights. On Tuesday a platform subcommittee voted 11-4 to reject language in support of the ERA.

Iowa Republicans, meeting last month for their statuatory convention, voted to eliminate the ERA from the party's platform. The move, which confused and alienated some Iowa voters because two consecutive Republican state legislatures have supported a state ERA, should not be repeated at the national conven-

The ERA is needed to eliminate sex discrimination in this country, and it should not be bartered away so that Reagan and his staunch supporters can save face.

**TERRY IRWIN** 

### But what will it cost?

Although plans for reallocating space in the Union have been approved, the financial estimates of moving costs are tentative at

Union administrators have said that \$100,000-\$150,000 is available from a UI fund for Union renovation, and the moving costs cannot exceed that amount. But they have no itemized financial estimate of many of the costs.

The administrators say they could not prepare an estimate before the move is completed because many kinds of physical rearrangements were being considered and they could not estimate each one. The administrators say they believe no more than \$100,000-\$150,000 will be spent, based on the expenses incurred when other UI areas were rearranged.

Expecting an on-the-button estimate of every moving expense is unreasonable, but an itemized estimate of what will be needed during the several phases of the move is nothing more than good planning. Without an estimate it may be easy to run up higher costs. And if higher costs are incurred, the job may not be done thoroughly or the move may have to be funded with other sources.

Students should not have to pay if costs exceed the amount available from the Union account. Student government representatives have submitted to Union administrators a list of costs that should not be covered by student group or Office of Student Activities funds. These include payment for room dividers, physical labor and light fixtures.

Union administrators should prepare estimates for the move as quickly as possible and honor the UI's commitment to pay the

### Planning UI concerts

The failure of the student-run Hancher Entertainment Commission's programming methods resulted in a \$21,665 deficit. The new Student Commission on Programming and Entertainment must overcome that debt, and the stigma it caused, if quality entertainment is to be available here again.

This summer's popular music entertainment has been especially bleak. Doug Mau, director of SCOPE, said this is because the new group is still being organized. Mau believes more research, including determination of the cost of each phase of production, is needed if he is going to make the committee accoun-

HEC was sorely lacking in this kind of professionalism. Its bookkeeping showed only that the deficit was somewhere between \$15,000-\$20,000. A more efficient system is needed, and Mau should explore other record-keeping methods such as use of the UI com-

The weight of the deficit now rests on SCOPE, although the Student Senate is ultimately responsible and must answer to the central administration. Student Senate should consider deferring the \$6,000 profit made by the Commission on University Entertainment, the entertainment predecessor of HEC, to help alleviate the deficit. This would show support for SCOPE, which should not be completely responsible for the economic failure of HEC.

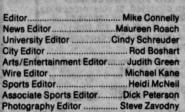

The UI concert policy that prohibits non-students under age 18 from attending Field House concerts is an obstacle in the path of a profitable entertainment committee. CUE was able to make money by favoring shows at the Field House, which offers a greater seating capacity.

It is unfair for the UI to deny access to a group of people whom promoters count on to make concerts profitable, and at the same time expect entertainment committees to keep in the black. It is unfair to the people who travel miles to see a show and are turned away at the door. No other university in the Big Ten has this policy, and the UI should revise it.

If the policy is changed, and SCOPE develops into an responsible organization attuned to student needs, top-flight and profitable entertainment will be available at the UI.

'YOU'VE GOT ANOTHER WEAK SPOT OVER HERE!

### Registration bill is now signed, but the anti-draft fight isn't over

By MARLETTE LARSEN

On June 27 President Carter returned from his European trip and promptly signed into law the bill requiring 19- and 20-year-old men to register for the draft. That evening more than 45 people gathered downtown in a candlelight vigil to protest that action.

The UI students there represented the Student Coalition Against Registration and the Draft. Over the past semester SCARD has been educating students about registration and its serious consequences. We oppose registration, the draft and the moves toward war our government is making. We would like to take this opportunity to say our movement is not over. We lost the first round - registration is law and it will soon be a reality. However, the battle isn't over. We must continue to organize to stop registration and the potential draft, and to fight against the war that we see on the horizon.

THE CONNECTION between registration and the draft is quite clear, contrary to President Carter's campaign claims. Registration in its present form would only reduce the time involved in mobilizing for a largescale military confrontation by 13 days. Militarily speaking, this is negligible. We are not opposed to registration because it is not a concrete enough step toward war preparation. We oppose it because it is a step,

Along with the other requests made by the president — a 5 percent real increase in military spending (figuring in the present inflation rate, it could be 16-23 percent) and the streamlining of the CIA - the government is gearing

#### Liz Bird

danger to the mother's life. It does not affect the legality of abortion itself. What it does mean is that for a few hundred dollars a woman can buy herself out of an unwanted pregnancy; if money is unavailable the problem is hers for life.

Tom Rittsher, chairman of Iowans for Life, stated, "The concerns expressed for the poor are of course serious concerns...the best approachis through those programs which will eliminate the causes of poverty.'

AS A GLIB, pseudo-concerned glossing over of real human misery, this takes some beating. What are Iowans for Life, March for Life and all the other anti-abortion groups actually do ing to ease the problems of poverty! Their repeated concern is for the right to live, or more accurately, to exist Once the babies are born they are or their own. What does it matter if the child's 'life' is one of beatings an neglect, while the mother pays v the law forces you to. This can include her life for her misjudgment?

Pro-life groups maintain that man abortions are carried out for frivolous reasons. One of their myths is tha women treat abortion with about as much concern as a visit to the dentist. Those women at the bottom of the social pile do not abort just to make life a little more comfortable; they abort because one more child stretch their flimsy resources until they snap or because there is simply nowhere left for them to turn.

IOWA IS a fairly affluent state, wi few people below the poverty line Maybe that is why the restrictive funding law has been accepted with litle protest. The Hyde Amendment wil be enforced nationally, however, and the consequences in such cities as Chicago or New York could be horrific There is no doubt that women will die become sterile or be mutilated at their own hands or those of illegal abortionists just as they did in the 'good old days' before abortion was legalized.

Abortion is a last resort as a back-up for contraception, not a substitute Even legal, safe terminations can leave a woman mentally scarred Without a legal outlet, however, women will be driven to illegal, unsafe operations, just as women throughout history have resorted to self-induced abortion and infanticide. No one likes abortion. In my native Britain, which has fairly liberal laws, I have talked to nurses who feel sick at heart when they have to help perform the daily lists of legal terminations. I have also talked to doctors who have had to patch up th results of illegal operations. One finds very little support for a return w restrictive laws within the British medical profession.

THE HYDE Amendment denies the equality for all that is enshrined in the Constitution. It singles out those people who are least likely to have been educated in the responsible use of contraceptives and who can least afford them. The well-known cycle of deprivation perpetuates poverty an failure through the generations; the amendment closes one more escap route from that cycle. Iowans for Life do nothing to 'eliminate the causes of poverty'. They merely cast stone while spouting pious rhetoric.

# Study shows link of abuse, personality

By TIM ELIASON

Wife and child abuse in a family may be related and some people may have characteristics that predispose them to violent behavior, according to a recent study by two UI staff members.

Results of the study of 126 families indicate that mothers of those families may have characteristics which may make it more likely they will be abused. The study was conducted by Mark Stewart, professor and head of Child Psychiatry and C. Susan deBlois, a UI social worker

Those five characteristics are that the

-Had a conduct disorder as a child or adolescent. -Quit school early.

-Had a father that was either antisocial,

-Married before the age of 18.

-Bore children out of wedlock.

DeBLOIS said, "If spouse abuse occurred, child abuse did also in a high degree of the population."

The point of the study," Stewart said, was to relate psychiatric disorders in parents to specific problems in boys.'

The study, which took about two years, consisted of two sets of interviews - one with the mother, and the other with both parents and relatives of the boy. The latter, the researchers felt, would aid in finding reasons for the boys' problems. Data analysis, which has been going on for 18 months, is not yet completed, Stewart said.

'We have yet to analyze data on the relatives, and we've only touched on the mothers' characteristics," he said.

Findings also indicate that family violence is a common outcome when a "wild, rebellious young man" marries a young woman of similar nature, Stewart said.

"GIRLS FOUND to have conduct disorders as teens tended to marry boys with conduct

disorders as teens," he said.

The Daily Iowan/N. Maxwell Haynes

About 40 percent of the women studied were abused by their husbands, Stewart said, and child abuse occurred in about 25 percent of the

The findings refute prevailing sociological theories of family violence which say that wife and child abuse are rampant at all levels of American society," he said. Such be violent in such a way if put under certain stresses," he said.

'Our paper suggests very strongly that abnormal people (those with histories of antisocial behavior) are far more likely to be involved in wife and child abuse," Stewart said. "It is definitely not just your average guy."

EIGHTY percent of the men that abused their wives were either antisocial or alcoholic, said Stewart. They displayed aggressive behavior elsewhere besides the home, he said, such as engaging in fights at work or in a bar.

Joan

Crawford

Possessed

Current explanations "are saying that there is something rotten about American society," Stewart said. These say Americans are prone to family violence, he said.

But Stewart said that wife and child abuse are common in all Western European nations. Stewart said he is interested in learning about aggressive conduct disorder, which he says affects about 5 percent of all boys theories "reflect a tendency for everyone to many who, as adults, exhibit antisocial behavior.

He said that when examining aggressive conduct in boys, they studied genetic aspects of the mothers' behavioral characteristics, which other studies have ignored.

"It appears the mothers are probably carrying something they give to their sons, said Stewart.

"I have no proof at this point," he said, but "it is possible that part of the transmission may be genetic.'

Counseling, said Stewart, "could head off some mildly deviant young women from getting too involved with hoody young men.'

## Medical grants to aid rural area practices

Two grants to the UI College of Medicine — totaling \$392,159 — will courses on rural medical practices. physicians in Iowa's rural areas.

Dr. Paul Seebohm, executive associate dean of the UI College of Medicine, said a three-year, \$355,927 grant from the Robert Wood Johnson Foundation, Princeton, N.J., will pay for research toward the selection of five new rural medical practice sites

The communities chosen for the program will be in "health manpower shortage areas," or areas with a proven need for additional health care professionals, Seebohm said, and most will be tied to private practices.

ROGER TRACY, director of the research on the five new practices, said four UI researchers will conduct feasibility studies, serve as advisors and assess program progress in selecting the sites for the practices.

Tracy said planning is complete for the first rural practice site in Akron, Iowa, a town of 1,324 about 28 miles north of Sioux City, and sites are being considered near Des Moines and

Waterloo. Seebohm said the new program will be closely linked to the UI network for training family physicians located in Davenport, Mason City, Iowa City, Waterloo, Sioux City and Des Moines.

"IT'S NOT accidental that we're receiving these grants," Seebohm said. "We're trying to maximize outside support to help develop the attractiveness of rural practicing, and many granting agencies are supporting such programs because the lack of physicians in rural areas is a national

The grant will fund the de of student and teacher manuals for the courses, according to Dr. Kelley Donham, associate professor of preventive medicine. Donham and Cornelia Mutel, program associate in preventive medicine, are coinvestigators of the curriculum pro-

DONHAM SAID the study materials, which cover topics such as unusual health problems in agricultural medicine, will be incorporated into sophomore-level medical courses this fall, and 10 hours of new discussion courses will be added to the curriculum

Donham said the materials will be useful nationwide. "They will emphasize major rural and agricultural regions in a broad sense, but will be flexible enough to be fitted to any rural area," he said. Seebohm said the trend in medical

training has been toward specialization, and that the UI is attempting to encourage more of its students to establish rural practices. Seebohm said there has been an emphasis in the past 10 years on rejuvenating family practice programs in rural areas. In 1969, less than 5 percent of U.S. medical college graduates established a medical practice in a rural area, Seebohm said.

'Specialists naturally gravitate to larger communities because smaller ones don't have the facilities or the need for them," Seebohm said. "When you get down to a community of 5,000, it's hard to attract specialists, and there just aren't enough rural practitioners to accommodate the needs of all Iowa's small communities."

## Underground homes in city okay if codes are met

By DAVID WHITWER

While most construction of earthsheltered homes in Johnson County has occurred outside the Iowa City limits. local officials and builders say the urban underground homes can be built if they comply with the building codes.

Glenn Siders, the city's senior building inspector, said that while no building permits for earth-sheltered homes in Iowa City have been requested, he received around 15 inquiries from individuals and architects last year about the feasibility of building them in the city.

'They are becoming very popular to build and conserve energy," said Siders as he explained one of the reasons for the increased interest in earth-sheltered homes.

PAT HARDING, an Iowa City

The high cost of heating and maintaining a home is driving some Johnson County residents underground...... page 1

developer who is interested in constructing underground homes in the area, said, "Everybody is so darn conscious about how to heat, this is becoming more than a selling point - it is becoming a way of life

Because of growing interest nationwide, Siders said a new Uniform Building Code for earth-sheltered homes is being developed by the International Conference of Building Of-

Under the city's current building code, the earth-sheltered homes' concrete walls must be thick enough to support the structure's weight, inmaterials depending on the particular

Siders said the building code also requires strict standards for natural lighting and ventilation.

ACCORDING TO the code, "all guest rooms, dormitories and habitable rooms within a dwelling unit shall be provided with natural light by means of exterior glazed openings with an area not less than one-tenth of the floor area of such rooms with a minimum of 10 square feet."

Also, the code requires that "all guest rooms, dormitories and habitable rooms within a dwelling unit shall be provided with natural ventilation by means of openable exterior openings with an area of not less than one-twentieth of the floor area of such

What these requirements mean, Siders said, is that "a house totally underground is out." He added that these two code requirements almost

preclude that the structural design will have bedrooms and living rooms with walls exposed to the open side or sides THERE IS NO county building code

covering earth-sheltered homes, County Zoning Administrator Ben Johnson said, but he recommended that persons interested in constructing rural underground homes also follow Uniform Building Code standards. However, factors other than code re-

quirements have curtailed some planned underground home projects in the

Dwain Detweiler, a local contractor,

the county had approached him about constructing earth-sheltered homes, but he said those plans were shelved due to high loan interest rates.

Harding's plans to construct six earth-sheltered homes west of Iowa City on a hilly, 35-acre wooded tract fell through last year when he was unable to get the land re-zoned from agricultural to residential use.

HARDING SAID earth-sheltered homes are ideal for land with a hilly

'You can bury these things back in the hills. Preferably you need a southern exposure and I thought I would be able to get it re-zoned," Harding said.

Harding added that he would build earth-sheltered houses in Iowa City, but he conceded that, aesthetically, they do not have a lot of "street ap-

However, Bob Bates, a building contractor with the Des Moines-based Earth Sheltered Housing of Iowa, said that making urban earth-sheltered homes aesthetically pleasing - even when constructed on a flat lot - can be accomplished through landscaping features, such as the use of railroad ties, retaining walls and multi-level en-

"I'm not restricted by any type of topography," Bates said. "Landscaning is an integral part of an earth sheltered home.

Bates, who currently has six earthsheltered homes under construction said it costs between \$45 and \$55 per square foot to build these houses, and he estimated the energy savings of earthen homes over conventional hous ing is 85 percent.

Visiting artist Arturo Sandoval, left, demonstrates an Ikat weaving technique to Karen Kofron, a member of his "On-Loom Weaving Collage" workshop.

### Fiber media expert to discuss his work

By JUDITH GREEN Arts/Entertainment Editor

who works in various fiber media, will show and discuss his work in a slide presentation this evening in Room E109 of the Art Building.

Sandoval is on campus to direct a two-week workshop called "On-Loom Woven Collage" for the UI Department of Home Economics. The 18 workshop registrants, he said, experiment with color and design through the traditional technique of Ikat, a Javanese-Indonesian method of adding design motifs to the warp (vertical) threads of the weave. He describes the resulting weaving as almost like a watercolor painting.

DURING THE first half of the winter semester, the UI Museum of Art sponsored an exhibit of fiber art by Sandoval and Joan Livingstone called "Beyond Tapestry," which featured half a dozen large pieces by each ar-

'Although the scale of their work is reminiscent of tapestry commissions of the medieval, renaissance and baroque periods," wrote Joann Moser, the museum's acting director, in the exhibition catalogue, "the power of their artistic statements defies the conventional classification of fiber work among the decorative or functional arts. Their creations have more in common with contemporary sculpture and painting than they have with traditional forms of tapestry.'

Sandoval's works included constructions in various technology-derived materials such as paper, microfilm, Mylar, videotape, newsprint and computer tape. He uses contemporary industrial and communication materials. he said, because "they are products of our time created by a technology which influences almost every segment of our modern-day culture... Their color and surface texture is predetermined by the technological process that manufactured them. They also are pliable and can be woven on the wall or floor; this affords a more direct involvement with the construction and processing of each woven

SANDOVAL HAS a B.A. in design and an M.A. in weaving from California State College at Los Angeles, and an M.F.A. in loom-structured sculpture from the Cranbrook Academy of Art in Michigan. He has taught for seven years in the art department of the University of Kentucky at Lexington. The recipient of a 1973 National Endowment for the Arts Creative Research Grant, he will devote a fall sabbatical to exploring

His slide lecture, which will describe the chronology of his work and techni-

### Wealthy Texas villain makes 'Blood' different

By T. JOHNSON

There is a long-running American fascination with violence. Everytime or particularly disgusting way, one or another of the survivors or witnesses parlays the story into a six-figure paperback contract.

Blood Will Tell is a book about the murder of two people and the wounding of a few others. The murders were not particularly odd: An estranged husband, killing his wife's lover and his stepdaughter, then shooting a couple of eyewitnesses, is regular Saturdaynight-in-the-city stuff. What makes this book a lucrative proposition is that the accused murderer, T. Cullen Davis, is one of the wealthiest men in the coun-

GARY CARTWRIGHT, the author, recognizes the bread and butter of this sort of book. He packs it with detailed descriptions of Davis' opulent life, making us very aware that Davis is the sort of sleazy nouveau riche that only Texas could produce - right down to the carved ivory lawn flamingos and bulk-bought art works. We also get descriptions of group sex and drug abuse - not serious observation by an interested journalist but the type that smacks of National Enquirer sensationalism.

The story is ostensibly about the trials of T. Cullen Davis, and its moral is that rich guys get away with things that regular people go to jail for. The Davis case is a prime example of America's dual legal system.

The facts alone, reasonably reported and substantiated, would have illustrated the double standard. The wheeling and dealing that Davis' attor-

### Photographers withdraw work

HARRISBURG, Pa. (UPI) -Twenty photographers Tuesday withdrew their work from a special exhibition at the executive mansion because Gov. Dick Thornburgh prohibited the hanging of three nude

"Censorship has no place in a free society," the photographers said in individual letters to Thornburgh and his wife, Ginny, who reside in the executive mansion.

Because of your continued refusal to include the photographs by Becky Young and Laurence Saltzmann in the exhibition of Pennsylvania photographers, I request that my photographs be withdrawn immediately," each said.

THORNBURGH, in his only public comment on the flap, said he removed three nudes from the exhibition in the

claimed photographers who have exhibited in Philadelphia, New York and Washington. They were invited to be among 37 photographers in a "Salute to Pennsylvania's Artistic Heritage" at the executive mansion June 8 to July

Stephen Perloff, who removed the other photographs from the executive mansion on behalf of the protesting photographers, said he objected to Thornburgh publicly restricting what

#### **NBC** head Pfeiffer fired by Silverman

NEW YORK (UPI) - NBC President Fred Silverman Tuesday fired Jane Cahill Pfeiffer as chairwoman of the National Broadcasting Co. in the second ouster of a major RCA executive in less than two months.

In June, Maurice Valente, 51, was forced to resign as president and No. 2 man at RCA Corp., NBC's parent firm, a post he had held for only six months.

"During the past two weeks discussions have been held with Jane Cahill Pfeiffer con-cerning her status at NBC," Silverman said in "I have today relieved her of all respon-

sibilities and, effective immediately, her organization will report directly to me." Three people formerly reported to Pfeiffer: Richard Salant, vice chairman of the NBC

board; George Black, executive vice president of personnel and labor relations, and Corydon Dunham, executive vice president and general

Silverman also said NBC was prepared to continue discussions with Pfeiffer on her employment contract, which is scheduled to expire in October 1981.

A spokeswoman for Pfeiffer said she was out of the office on personal business and had no immediate comment.

Pfeiffer had been an executive vice president in charge of communications at IBM Corp. before joining NBC in October 1978.

someone gets wiped out in a peculiar ney (nicknamed 'Racehorse') goes through in his anyone-but-Cullen defense is the American legal system at its worst. All the lawyers involved seem to care only about winning. BUT CARTWRIGHT doesn't trust

the facts to speak for themselves. Using a curious mixture of legalese, straight journalism and oddball slang, he chooses his details carefully in order to paint Davis as the corruptor of juries, the buyer of innocence. It's almost too obvious throughout Blood Will Tell that Cartwright considers Davis guilty but knows that he will not be convicted. The idea of the jury's not

convicting Davis becomes so repug-

nant that the only reason to read the book is the reader's desire to be ap-Tom Wolfe wrote that Truman Capote's In Cold Blood sold millions of copies not because it was interesting but because of the "hair on the walls" payoff: The readers wanted the graphic description of the murders, the only tension that the book built. It's the same with Blood Will Tell. We're well aware of what's going to happen; it's the how that pulls the story along.

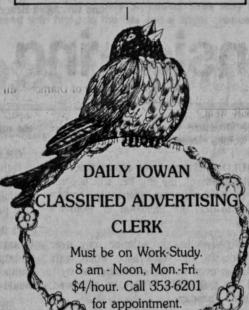

lawyers sink? Can you believe what's happening? If you can work through a couple of hundred extra pages of detail and court transcripts, the payoff is there: Davis celebrates with his lawyers, and the courageous D.A. who went after him is in trouble with the electorate. There is plenty of hair on the walls. Have a good

# A.L. suffers ninth straight All-Star loss

Rod Carew, No. 29, steals second base safely for the American Angeles. Bill Russell of the Los Angeles Dodgers fields the throw League in the first inning of Tuesday's All Star game in Los from Cincinnati catcher Johnny Bench.

LOS ANGELES (UPI) - The National League, unable to get a runner to first base for nearly five innings, treated Tommy John like a batting-practice pitcher in the middle innings Tuesday night and, sparked by Cincinnati's Ken Griffey, defeated the American League 4-2 to win the All-Star game for the ninth straight year.

It was 17th victory in the last 18 All-Star games for the NL and it was one of its more dramatic comebacks as the team failed to get a hit or a base-runner until Griffey unloaded a 400-foot homer off John with two out in the fifth inning.

Griffey, added to the team by Manager Chuck Tanner after batting .314 during the first half of the season, also had a hand in the NL's final run in the seventh when he stroked a leadoff single. But it was a sixth-inning barrage of singles against John that turned the game in favor of the National League.

The AL, on the strength of a two-run homer by Boston's Fred Lynn in the fifth, was nursing a 2-1 lead in the bottom of the sixth when the NL battered John after one was out.

Cincinnati's Ray Knight, Pittsburgh's Phil Garner and St. Louis' George Hendrick rapped successive singles off the sinker-balling left-hander to tie the score 2-2 and forced Manager Earl Weaver to go to his bullpen for the first time in the game.

Ed Farmer of Chicago, the AL leader in saves with 17, took over and appeared to have gotten out of trouble when he got San Diego's Dave Winfield to hit a sharp grounder to the left of second baseman Willie Randolph. However, the ball handcuffed the Yankee infielder and instead of turning the smash into a double play, Randolph misplayed it for an error as Garner crossed the plate with the tie-breaking run.

The NL added an insurance run in the seventh and this one was strictly a gift - courtesy of Toronto pitcher Dave Stieb and Kansas City catcher Darrell Porter. After Griffey, who was named MVP for the game, opened the inning with a single, Cincinnati's Dave Concepcion hit into a force-out but was standing on third a moment later after a wild pitch by Stieb and a passed ball by Porter. Stieb, extremely nervous

in his first All-Star appearance, then uncorked another wild pitch, allowing Concepcion to score.

As it has in the past several All-Star contests, the AL failed repeatedly in the early innings to come up with a clutch hit. The AL got a runner as far as third base in each of the first three innings but each time a batter went down on strikes for the final out of the inning. Over the last four innings, the American League was virtually helpless against the offerings of Los Angeles' Jerry Reuss, Pittsburgh's Jim Bibby and Chicago's Bruce Sutter.

Reuss, who got the victory, pitched only one inning and struck outthe three batters he faced. After the fifth inning, the AL managed only one other hit - a single by Randolph in the seventh inning.

Aside from Lynn, about the only hero the AL had was starting pitcher Steve Stone of Baltimore, who

pitched three perfect innings in his All-Star debut.
"I couldn't look at this lineup as a group," said Stone, who became the first pitcher in All Star competition since Detroit's Denny McLain in 1966 to pitch three perfect innings. "I had to face each one as a single entity. As a group, it would have seemed too big a task but one by one, I was able to handle nine

If Stone and Lynn were the AL stars, then surely Randolph was the game's goat. Not only did the sure handed second baseman commit two errors but h made a mental mistake as well by getting picked off first base by Los Angeles' Bob Welch in the third inning, taking the AL out of a potential big rally.

Randolph opened the third with a single but was picked off just before California's Rod Carew laced a double to left field. Had Randolph not been picked off, he probably would have scored moments later on a wild pitch by Welch while walking New York's Reggie Jackson on a 3-2 pitch. Welch, however, managed to escape trouble in that inning by fanning Milwaukee's Ben Oglivie for the third out.

Carew got to third base against Houston's J.R. Richard in the first inning when he walked, stole second and moved to third on a groundout. But Richard struck out Jackson to kill that threat.

In the second inning, Oglivie led off with a walk and went to third on a two-out single by New York's Bucky Dent. However, Richard reared back and fanned Stone to end the inning. In all, NL pitchen struck out 11 batters with Welch fanning four in three innings and Richard striking out three in his two innings of work.

Richard pitched only the first two innings at the request of his manager, Bill Virdon, because the big right-hander has been suffering from a tired arm over the first half of the season. Richard said his arm

showed no signs of fatigue after the two-inning stint
"My arm feels great," Richard said. "I felt no
fatigue or tiredness. I feel like I'd like to go back out there and pitch some more but I just work here. I was hyper-active for the game. I was rushing and trying to do too much. That's why I was wild. I was nervous

For almost five innings, it appeared Lynn's two-rul homer, which came off Welch on a 3-2 pitch after a two-out single by Carew, might be enough for the Al.

#### Elliott to receive award

Iowa Men's Athletic Director Bump Elliott from the Chicago chapter of the National Football Foundation and Hall of Fame today at a luncheon in Chicago.

The award honors a former football player who becomes involved in his community after concluding an active football career.

Elliott was an All-American at Michigan and was named the Big Ten's Most Valuable Player in 1947. He led the conference in scoring with 54 points that year and also led the Wolverines to the Rose Bowl championship.

Elliott was an assistant coach at Oregon State, Iowa and Michigan before becoming the Wolverines' head coach from 1959-68. In 1964, Michigan won the Rose Bowl title.

Elliott was appointed thhe Iowa men's athletic director in 1970.

#### Padres fire general manager

LOS ANGELES (UPI) — The San Diego Padres fired Bob Fontaine, vice president and general manager, Tuesday.

No decision was made on Fontaine's successor but Padre officials hinted at elevating current manager Jerry Coleman to the vacated general manager's spot.

'Too Tall' Jones hangs gloves DALLAS (UPI) - The Dallas Cowboys announced Tuesday Ed "Too Tall" Jones had agreed to contract terms and would return to the team he left just more than a year ago to

become a professional boxer.

### Big Ten considering womens' By HEIDI McNEIL

athletics into the Big Ten conference may sound like a step forward for women. But, according to Dr. Christine Grant, Iowa women's athletic director, it may not be economically

The presidents of the Big Ten schools, the Council of Ten, met Monday in Chicago and adopted a resolution establishing a task force to plan the incorporation of women's inter-

collegiate athletics into the league. The task force will be comprised of the current Big Ten faculty representatives and a second faculty person from each institution to ensure balanced perspectives, a conference spokesman said Monday.

The task force report will be presented at

report is to include timetable recommenda- added, however, that he would "probably seek be flying all over when we can find equal con tions for implementation for a new con- input" from many sources knowledgeable in petition nearby," Grant added. ference structure which would ensure ade- the matter.

SHOULD THE task force report meet the council's approval, the Big Ten will become one of the first major conferences to create a mechanism for the inclusion of women's

The Big Ten has jurisdiction only over men's sports. The conference would gain jurisdiction over women's athletics as well, should the task force report be approved, Grant said Tuesday.

If the report is passed, each institution will be given the choice of whether or not to adopt

the new structure.

Grant said the UI's decision would officially the council's December 15 meeting. The be made by UI President Willard Boyd. She

'And, from the women's standpoint right now, we have excellent competition nearby such as Iowa State and Drake. They provide

"In such an economic stressful situation as

currently has 10 sports with Big Ten change pionships held annually in each. Grant sai the Iowa women compete in the league men and also schedule games with nearby or ference schools as Wisconsin, Illinois Northwestern and Minnesota.

Grant expressed fear that the reorganiztion may change some of women's athletic

'At the current time, AIAW (Association for Intercollegiate Athletics for Women) are good and I would hate to see men's rules im posed on us," Grant said. "I'm not saying the would actually happen but it is possible." Grant said the Big Ten has been discussing

the reorganization concept for seven years.

### Hot Powerhitters win fourth

The Powerhitters surged to their fourth straight victory to highlight men's summer intramural softball action Tuesday. The Powerhitters, a perenial IM softball power, beat the Pharms, 12-5. In other men's softball play:

#### Phils face drug investigation TRENTON (UPI) - Investigators want to question a number of Philadelphia Phillies players, including All-Stars Pete Rose and

Mike Schmidt, to determine whether they had obtained amphetamines illegally, a Trenton newspaper reported Tuesday.

The Trenton Times said in a

copyrighted story from Reading, Pa., that the players will be questioned by the Pennsylvania Drug Law Enforcement Office when they return to Philadelphia

later this week following Tuesday's All-Star Game in Los

Meanwhile, in Los Angeles, Phillies Executive Vice President Bill Giles told UPI, "We have no idea about this at all."

In addition to Rose and Schmidt, Greg Luzinski and Larry Bowa are among those to be questioned, the newspaper said, quoting unidentified law enforcement sources.

PLASTI-CARE HINTS

Drilling Plexiglas with an electric drill

Specially ground drills by Hanson are required when using power equipment to drill Plexiglas. Tighten drill securely in chuck. Back Plexiglas sheet with soft wood and clamp or hold firmly. Use highest spped up to 3000 rpm. When drilling holes 3/8" or larger, slower drill speed (1,000 to 2,000 rpm) will improve quality. Do not force feed. Slow feed as drill point penetrates second surface. Next week—Capillary cementing of Plexiglas G.
