# GOP gives rousing welcome to Reagan

received a hero's welcome Monday ight at the Republican National Convention as he arrived to accept the presidential nomination after a 12-year

quest.
The 69-year-old conservative hope flew to Detroit on a special jet only hours after the 32nd GOP convention

Enthusiasm was heightened by the

of President Carter in the battle for Reagan. the White House.

"All of us know why we're here the need for a crusade here today," Reagan told his followers at a hotel rally. "In our hearts we are determined to make America great again."

candidacy Monday — seven weeks to the day after he quit campaigning.

DETROIT (UPI) - Ronald Reagan polls, which show Reagan well ahead Bush asked his 259 delegates to vote for

At the same time, Bush proudly told his delegates he has paid off all his primary campaign debts, having rejected Reagan's offer of fund-raising help.

The former CIA director said he developed a new perspective on George Bush formally withdrew his Reagan since the GOP race was decided after the Michigan and Oregon primaries May 20.

"Since then, he's gone the extra mile making Barbara and I feel very much wanted in the fray," he said.

THE HIGHLIGHT of the opening day inside Joe Louis auditorium came when former president Gerald Ford delivered the evening's main address. Ford, speaking on his 67th birthday, promised to do "everything" he can to help Reagan and said President Carter

The former president coupled his allout pledge to Reagan with a stinging attack on Carter's foreign and domestic policies.

'We've got a lot of work to do and you are looking at one volunteer who will try harder, work longer and speak with more conviction to get this country a competent president again,"

Reagan, on arrival at the Detroit airport, unleashed an attack on the Carter economic policies he said have pushed the nation into recession.

"OUR PARTY is offering America a growth-oriented, productivity-oriented alternative to the high unemployment, high inflation and high taxes of the Carter administration," he said. See Convention, page 3

# 10,000 march through Detroit in support of E

DETROIT - More than 10,000 men and women dressed in white flooded Detroit Monday to show support for the Equal Rights Amendment and demonstrate disgust toward the party's neutral stand on the issue.

Stretching half a mile, tying up traffic and rallying near the convention hall, the marchers played on a central theme - the Republican Party is throwing away millions of votes by tur-

omission of **ERA** plank

a 'mistake'

by Rod Boshart

DETROIT - First District Rep. Jim Leach stood before a rally in support of the Equal Rights Amendment here and criticized the Republican Party for omitting a pro-ERA plank from its

And later, at a meeting between the Iowa delegation and former ambassador George Bush, Leach expressed pessimism that Bush would be former California Gov. Ronald Reagan's choice as a vice-presidential

Calling the exclusion of a pro-ERA plank a "mistake," Leach said:

"The Republican party can only be revitalized if it emphasizes individual rights for all Americans."

But he added that "if it was a mistake for 90 members of the platform committee to abandon the heritage of the Republican Party, it would be a bigger mistake for all ERA activists to abandon one of the two major parties in the United States today.

LEACH said the decision to drop the pro-ERA language from the platform for the first time in 40 years was short-sighted" and was dropped for

'political expediency." "To abandon individual rights for expediency in my judgment is probably the most important, in an unfortunate sense, happening since my association with the Republican Party," he said.

Leach - a moderate Republican who supported Bush's presidential candidacy - admitted it may be a political liability for him to oppose the conservatives, who control the party.

"Certainly there will be those on the other side of the issue that will hold this against me, and that's always the

# Hayek urges revocation of agreement for project

by Stephen Hedges Staff Writer

Iowa City Attorney John Hayek said Monday that College Plaza Development Co. has not met the city's requirements for the downtown hoteldepartment store project and urged the City Council to revoke its agreement with the developing firm.

In his recommendation, Hayek cited letters submitted Friday by College Plaza from Armstrong's department store of Cedar Rapids and High Country Corp., its partner in the project. He said the letters did not prove that College Plaza has a lease or the "certainty" of obtaining a lease for a department store and hotel for the project, as required by the City Council.

IN MAY the City Council named College Plaza the project's preferred developer, and gave it 60 days to obtain commitments from a hotel firm and a department store. On Friday, one day

before the deadline was to expire, College Plaza submitted letters from High Country Corp., its partner in the venture and the proposed owner of the hotel, and Armstrong's. Hayek said the letters did not indicate that legally binding agreements had been reached with either company.

The Armstrong's letter, from Chairman of the Board Robert C. Armstrong, says the company will give preliminary approval to the contract negotiations if it is given a 30-day extension to allow its consultants to study the store's layout and construction plans and for its legal counsel to study and approve a lease.

'I don't see this as a commitment at all," Hayek told the council. "I don't see anything that would bind Armstrong's in any way, shape or form to an agreement. I think this letter leaves big enough loopholes that Armstrong's could drive a truck

### Soviets start bombing Afghanistan villages

NEW DELHI, India (UPI) - Soviet saturation bombing in Afghanistan reduced 50 villages to ruins and caused "thousands and thousands" of casualties, a diplomat said Mon-

The Soviets previously retaliated for rebel ambushes by sending helicopter gunships to

The bombings attempt to intimidate guerrillas with massive fire power, diplomats in Kabul said.

The unexpected intensity of the raids resulted in "thousands and thousands and thousands" of estimated casualties, he added, and resulted in a "virtual stream" of refugees to Kabul, which is now restricted by "Soviettype passport control" barriers.

The raids were apparently triggered by a rebel ambush on a Russian petroleum convoy in Bamyan province that reportedly destroyed

An Afghan who traveled to Pakistan said the convoy, initially escorted by only two armored cars, was sprayed with machine gun fire by Moslem rebels.

#### Missouri governor calls National Guard

UPI - Missouri Gov. Joseph Teasdale, reacting to 119 heat-related deaths in his state, Monday declared a state of emergency and activated the National Guard to assist heatstricken residents.

Teasdale, the first governor seeking federal help because of the heat wave, asked Washington for up to \$8 million to help provide electric fans and air conditioners for residences, hospitals and nursing homes in Missouri, which has the highest heat fatality toll in the nation.

The National Guard will transport people to

relief centers and distribute equipment. Of the 518 heat-related deaths reported in 14 states, most of the recent ones have been in the Midwest, particularly in the St. Louis area. Thirty heat-related deaths were reported in Illinois with 23 in Kansas, three in Indiana, and one each in Colorado and Nebraska.

The heat wave has lingered over the Southwest for three weeks. Dallas, with 21 consecutive 100-degree plus days, has suffered more than 60 heat deaths but very few in the past week while St. Louis had temperatures in the high 90s this weekend.

### Diggs to jail July 23

WASHINGTON (UPI) - Former Rep. Charles C. Diggs Jr., D-Mich., lost his final bid for leniency Monday on mail fraud and payroll padding convictions and was ordered to begin serving a three-year prison term on July 23. Diggs, who resigned from his House seat following Supreme Court rejection of his appeal, represented Detroit's inner city for 13 terms and was the senior black member of Congress.

He was convicted in 1978 on 11 counts of mail fraud and 18 counts of filing false pay vouchers in what the government said was a scheme of inflating staff payrolls to obtain kickbacks to meet business expenses and pay mounting personal debts.

Diggs appeared before U.S. District Judge Oliver Gasch Monday and asked to be placed on probation or given a reduced sentence, but Gasch turned him down in a brief hearing.

Gasch ordered Diggs to report to a prison to be designated by the Justice Department. The judge said he would recommend that Diggs be assigned to the prison at Maxwell Air Force Base in Alabama.

### Waldheim: progress 'slow' for women

COPENHAGEN, Denmark (UPI) - U.N. Secretary General Kurt Waldheim told an international conference on women that progress on women's rights has been slow in a world marked by "anxiety and fear."

The gathering of 2,300 delegates from 153 nations, which opened Monday to review the status of women five years into the "Decade for Women," simmered with regional political issues that will be debated in the next two weeks.

"Women lag behind men in literacy," he said. "Two out of three persons in the world who cannot read or write are women."

Papers prepared for debate at the two-week conference showed women are still overworked, underpaid, poorly educated and lacking the political and economic power to change things rapidly.

is completed in 1982.

relationship of individual to place as expressed in art and literature. Describing herself as rootless, she is drawn, she says, to work that attempts to create a sense of personal space. This interest led her to the work of Georgia O'Keeffe and then to the role of women artists in American culture.

The evolution of art by American women, Dean believes, has paralleled the changing role of women in this culture. The artists' sense of personal space has developed, beginning with quilting and home decoration in the 18th century and moving on to family portraits, landscapes and genre paintings of the 19th. In contemporary art, the evolution has been expressed internally, by primitives like Grandma Moses, who painted childhood memories, and externally, in the bold work of contemporary land artists like Nancy Holt and Alice Aycock, who manipulate the en-

discussed larger issues: the image of women artists in American literature, the question of specific female imagery. Students found their biographical research on women artists constricted by minimal materials, a tangible comment on scholarly neglect of

Dean's interest in women artists is acutely personal. She teaches this course because women's contributions have been overlooked by art historians for too long. At the same time, as she feels a need to do creative work on her own in film and fiction, she finds in the way creative women have ordered their lives a source of personal strength.

When Dean goes to France next fall to travel from university to university presenting her O'Keeffe lectures, she wants to expand her research in a new direction: studying American expatriates in Paris, especially those women artists and writers who never returned home.

# Libraries expect books increase

by Irving Isaacson

The UI Libraries has an annual acquisition budget of more than \$2.1 million and will increase its holdings by 4 to 6 percent this year, according to Wayne Rawley, assistant UI librarian.

Kathleen Wachel, head of acquisitions, said the libraries purchase books in accordance with what is needed to "support the curriculum and research at

Many of the new books will come from book supplier Blackwell North America. Based on a continually revised analysis of the needs of UI Libraries, Blackwell North America ships between 150 and 225 books a week to the UI. Wachel said that "library administrators are then free to return any books that are not wanted.'

SHE SAID, "Most of these books are in English, and undergraduate textbooks and what can be considered 'popular' books are usually not sent."

Wachel said many books are also purchased because of requests by faculty members and students. Over 25,000 requests were made during the 1979-80 academic year, and Wachel said a majority of these requests were filled.

Wachel noted that while there has been a 9 percent increase in the acquisitions budget for this fiscal year, the increase will probably be insufficient to offset inflation.

She said, "We will have to be cautious at the beginning of the fiscal year."

WACHEL SAID she believes the UI Libraries will continue to purchase the books it needs, and "we are in no position to agonize." She added that the UI is a member of the Center for Research Libraries, and that collections too expensive to purchase can be borrowed from this service.

The Main Library, plus the 12 departmental libraries, currently contain more than 2 million volumes. The library system is the 27th largest academic research center in the United States, Rawley said.

### 'Space Day' designated

In commemoration of the 11th anniversary of the first manned landing on the moon, July 20 has been proclaimed "Iowa Space Day" by Gov. Robert D.

The L5 Society, an international organization dedicated to promoting the exploration and development of space, proposed the designation of Space Day to increase the public's awareness of space exploration, according to Brandon Ray, a member of the L5 board of directors in Iowa City.

Ray said his group hopes to present a slide show somewhere on the UI campus to commemorate Space Day.

He said the group feels it is important for the public to see the benefits that have come from the space program, such as advances in computer technology and medicine.

"IT'S GOING to be won or lost in the next five to six years by people who are elected to public office as well as by those actively involved in politics. This convention represents a skirmish, but

a very important one," he said. Leach's opponent in the fall, Iowa City Democrat Jim Larew, has attacked the exclusion of the ERA plank from the Republican platform as

deplorable. Last week in Iowa City, Larew said Leach's inactivity for the ERA at the state level indicates he "holds more respect for party members than for

women, and I say shame on him." Leach said Monday he does not know what effect the ERA will have on the election in the 1st District.

anti-draft subjects prior to the question and answer period.

Joe Iosbaker, a member of the Student Coalition Against Registration and the Draft, said, "The military draft comes down to the U.S. putting troops into another country." He said that this is futile because many foreign countries do not want U.S. troops in their countries.

Leigh Vaughan, an Iowa City resident who was released from military duty after becoming a concientious objector, said, "The government will only present one side of this.'

Vaughan said conscientious objectors are not necessarily a "small group of pacifists."

He said those who file for conscientious objector status may do so because they oppose participating in a nuclear war, or because "you don't FOUR speakers discussed various

number of "brushfires" that

threatened the Republicans' hoped for

want to participate in a war you can't give your full part to."

"People should understand other options," Vaughan said.

JACOBSEN said that obtaining conscientious objector status is "limited to the rich and well-educated who can put together a claim." Jacobsen handed out leaflets written

by the county coalition that explain the options open to those who object to registering. One option is refusing to register. Those who do so may be fined \$10,000

and be sentenced to five years in prison. Another option is registering under protest - registering only because the law requires it.

The leaflet listed several ways to slow down the registration system by doing such things as omitting a social security number on the registration form and using poor handwriting.

Vaughan said, "It is important to pinpoint your feelings as soon as possi-

ble. Draft boards must be able to legitimately document what you are

"COURTS tend to favor persons morally against the draft who consistently support that view" and do it publicly, said Jacobsen.

Howard Hawhee, a UI graduate student, said that registration for a possible draft is not a first step toward a United States-Soviet Union confrontation, but that the United States is building up its armed forces for several "dirty little wars" in Central American countries and other places.

He said that America's former practice of training allied soldiers "to do our work" is not working anymore.

moral," Lugar said.

## Take the bus and save

The increase in Iowa City Transit ridership shows that you can't keep a good idea down for long. People are beginning to realize the value of mass transit as a cheap, efficient alternative to those gasguzzling autos.

During the 1980 fiscal year, annual bus ridership for the first time topped the 2 million mark, representing a 15.5 percent increase over the previous year. In Coralville, bus ridership jumped a whopping 26 percent over the same period.

The addition of two new routes last summer was one reason for the Iowa City increase; another was the economic pinch felt by citizens because of rising fuel costs and the deepening recession. A threat to the pocketbook tends to make Americans more open to practical, energy-saving ideas.

Federal allocations for transit systems will in the future be based partly on ridership statistics, which may mean more funds for the Iowa City system. The increased use of mass transit by the public should be rewarded with an expanded offering of service.

**Randy Scholfield** Staff Writer

## Go slow on auto aid

President Carter promised "a very close-knit permanent partnership" of government, car companies and workers as he unveiled an aid program for the ailing American auto industry.

The program inexcusably weakens safety and pollution regulations faced by all companies selling cars in America. Allowing more carbon monoxide to enter the atmosphere should not even be considered. Yet Carter feels he must play politics with people's health because the industry's health is so closely tied to America's overall economic well-being. Unemployment among autoworkers has surpassed 30 percent. Compared with last year, sales have plummeted: down 34.5 percent at Chrysler; 32.1 percent at Ford and 17.8 percent at General Motors.

The other rule changes will not be so costly to society. Changing, but not eliminating, some Occupational Safety and Health Administration standards will make the industry more - not less competitive. For example, car makers will no longer be required to completely remove toxic lead and arsenic from the air in the plant as long as workers are given protection.

The Small Business Administration will guarantee loans for car dealers and the Economic Development Administration will spend at least \$50 million in communities harmed by auto industry trou-

What is most laudable is what Carter did not do.

In the face of enormous pressures and even political threats from both unions and companies, Carter has so far avoided calling for quotas on imported cars.

One in every four cars sold in the United States is an import. While U.S. automakers are watching their sales figures decline, the Japanese share of the U.S. market is up 6 percent from one

The Japanese cannot claim credit for their success any more than Detroit can blame them. The truth is simple. Japan is building cars that suit American tastes for style and fuel efficiency. Giving the public what it wants is supposed to be the American formula for business success, but American automakers have long ignored their own market research.

To do what Ford has called for — limiting imports to 15 percent of all sales - would seriously harm competition and needlessly make the consumer pay for the industry's own short-sightedness. In the long run, it would, like the Chrysler bailout, only hurt the industry more by taking away the incentive to remain economically

# A home for Harper's

Fortunately, Harper's magazine has been rescued. Two foundations will form a non-profit organization to continue publication of the literary and political monthly that since 1850 has sparked debate of current affairs.

The recent announcement that the Minneapolis Star and Tribune Co. would not publish Harper's after August was received with sad acceptance, as if it was inevitable that after 130 years the magazine would succumb to the pressures of declining revenues and increasing distribution costs. Amidst choruses of "I knew it would happen," the magazine was charged with being "too trendy" and therefore unable to sustain a faithful audience.

The foundations — the John D. and Catherine MacArthur Foundation and the Atlantic Richfield Foundation - plan to create an independent board of directors to run Harper's. The publication will qualify for lower postal rates and the non-profit status may provide easier access to federal research grants. The organization also can solicit tax-exempt contributions from the public.

Because Lewis Lapham will remain editor, Harper's should continue to stimulate discussion of provocative and sometimes unconventional ideas. As Matthew Stevenson, an assistant editor at Harper's, said, the magazine's continued publication is "a triumph for thinking people."

# Viewpoints

... SOMETHING ABOUT A RUNNING MATE!

# DI readers criticize the critic

To the editor:

I am appalled by Michael Kane's inaccurate review of The Shining (The DI, July 7). Kane obviously misunderstood the thrust of this suspensefilled tale.

Kubrick's artistic control creates a continuous tension between scenes. The Shining stands in the same league as Wait Until Dark and Hill House. Simply, Kubrick manipulates us into believing the classic story of a haunted house, or in this case, a hotel.

Jack's opening interview gives us the perspective we need to understand his character. He exemplifies the disillusioned man, floating from job to job, struggling to survive, emotionally busting at the seams.

Humor is inserted as a tension breaker. For example, Jack plummets through a door with an ax in an attempt to chop his wife into bloody pieces only to peek through the door to deliver, "Here's Johnny" instead. The audience needs this emotional release before the next scene.

The film paces itself beautifully through unusual camera angles. Con-

### Letters

tinually we wheel down the corridors with Danny and wind through the maze scene by foot. We feel the chill of the biting cold. Everything seems real, believable. We witness a series of images piecing together an unraveling mind, illusions of grandeur. Gripping the edges of the chair,

knuckles white, while watching this complex film could hardly be called

30 Valley Ave.

To the editor:

Rebuttal of any sort has never been known to improve the quality of the reviewing in the DI. However, if you would like a little difference of opinion anyway, perhaps some of your readers will feel compelled to see The Shining despite Michael Kane's definitive piece of critical crapulence in (the July 7) edition.

Kane claims the film's humor is unintended. Now that's humorous. Stanley Kubrick's tongue has always been stuck firmly in his cheek, and if nymphets, nuclear war, God, delinquent droogies and gigolos have not been able to coax it out for a strictly serious word or two, I doubt an axheaving hubbie could. The Shining is a horror movie, but more than that it is a comedy about horror movies, and

The last dark alley you walked down doubtless held no bogeyman at its end, but you didn't feel the walk was one of unfulfilled anticipation afterwards. You felt relief and laughed. The "Tuesday" sequence that Kane lambasts, the suspense of which is based on a little more than soundtrack, I might add, is just such a dark alley stroll. It's not the only one in the film either, and none of them are tedious. The interview which Kane faults is a gem. It is necessary for for Torrance's development, but more importantly it is probably the quintessential job interview on film. Kane has no taste for, sends shivers of recognition through the audience. Everything's insidious, knowing what you know when you enter the theater: Something's gone wrong in the state of

Its each little detail, like the coffee

Jack Nicholson's acting is extraordinary and needs no justification. The baseball bat segment is heartbreakingly, intentionally funny.

Kane makes no mention of what a cinematic tour-de-force so much of the movie is. Though he does drop the word Steadicam, he makes no mention of the marvelous tracking shots or even the sound of a plastic tricycle running alternately across carpet and floor, like repeated blows, taking your breath. But maybe that's for the best. One perhaps could hope that the next movie reviewer for the DI has at least seen enough movies to understand their language. But then again, why tempt fate?

Charlie Langton 215 Ronalds St.

## and the court's abortion ruling find it mentally easier to drive by and cent new journalism wave, problems

On July 1 the Supreme Court overruled a district judge's decision that found the Hyde Amendment an unconstitutional violation of liberty interests guaranteed to pregnant women by the First and Fifth Amendments. It can be seen that the court's decision is a travesty of justice, as the Hyde Amendment denies abortions except in very restrictive cases such as when the woman's life is endangered, where she would face severe and long-lasting health damage if she gave birth or where pregnancy is due to rape or in-

The overall effect of the this amendment is to encourage states to cut off public funding for abortions and to stop providing abortions in public health facilities. The Hyde Amendment causes public hospitals, and many private and freestanding clinics, to withhold abortion services because of mounting economic and social pressure. With cuts in public funding, the costs of private abortions go up. Consequently, many women cannot afford abortions. Further, the opportunity is created for an exploitative private abortion market to develop because abortions are both legal and scarce. The Supreme Court's decision and the Hyde Amendment represent an attack on the constitutional rights to choose an abortion in general, and hit low-income, young and minority women especially hard.

**DOONESBURY** 

In addition, the court is actually stating that the ultimate decision on abortion is to be left up to the political arena. In this year's elections the right-wing forces are mobilizing to elect anti-choice delegates. The decision as to whether women retain reproductive rights and freedoms will be made at the ballot box. For prochoice voters the task is clear. We must ourselves mobilize to elect candidates who represent our views and further, must educate the public as to the dangers posed by the right-wing, anti-choice movement.

Linda J. Yanney President, Student Abortion Rights Action League

#### Old Jet To the editor:

This letter is a message of appreciation to the local individuals who, to my knowledge, have never received public attention for their recent accomplishment at the Iowa City Airport. Thanks to these individuals, persons driving by the airport see Old Jet with a new coat of silver, red, white and blue paint. It also appears that the canopy has been improved or repaired.

To some this may be no big deal, but I would say many residents of this city appreciate being able to look at the monument without the traces of childish vandalism. As a private pilot and a patriotic American, I certainly

to the airport. And no matter how one feels about it, anyone should be able to appreciate the efforts of private individuals who devote their own resources to the cause of community betterment. This job took a lot of work, and as far as I know, was privately, and not publicly, organized and com-I don't know exactly who did the

work, but that doesn't stop me from saying "Thank you" for a job well done. An Iowa City eyesore has been turned into a public asset, as it was intended to be, and city residents and visitors alike will benefit thereby.

#### The sneer-seller beat To the editor:

You're hot and thirsty, and you just knocked off a couple of tough paragraphs of Woodward and Bernstein. It's not easy being a wouldbe reporter, but somebody's got to do it. You want a sneer and you want it

You can count on it.

In fact, it's much easier than counting on your fingers, and it doesn't draw nearly so many snickers. Although sneer sales in Iowa City

have risen considerably during the re-

with regurgitation systems have left some would-be reporters flat.

"The noses work harder, and they tend to sneeze up," one such discouraged newshound said.

Undaunted, and still hot and thirsty for a story, any story, you press on. And on. Checking to ensure that your press card is firmly in place, you put on your hat that makes you look like Clark Gable and Jake Barnes, and you pick up your pack of Camel straights, which make you cough like Clark Gable and Jake Barnes.

You go to your favorite sneerseller's place. Business is brisk. You might even say it's hectic, but you try to steer clear of two-syllable words. "How cold are your sneers?" you

The sneer-seller fixes you with a gaze that might be described as contemptuous. "Look Mac," he says, "I'm busy. I ain't got the time to discuss the relative qualities of sneers with you. Besides, cold sneers were all snapped up long ago. You'll have to settle for a lukewarm, leering glance.'

It's not what you wanted. But wouldbe reporters have to start somewhere. "I'll take it," you say. As you pick up your glance, a hot flash hits you.

"Say," you say, "do you know how Jake Barnes keeps this tobacco from sticking to his lips?"

Beau Salisbury

## **Insurance covers** press box repair

by Michael Knox

The Iowa City Community School District has full insurance coverage for the estimated \$60,000 damage caused by fire Saturday to the City High School stadium press box, a local insurance agent told the Board of Education Monday.

Bill Ambrisco, representing the group of insurance companies that insures the district, told the board that the district's \$1,000 deductible policy will

pay for repair of the gutted press box.

The board voted 6-0 Monday to allow School Superintendent David Cronin to hire an architectural firm to draw specifications for rebuilding the

The board also voted 6-0 to set Aug. 19 as the deadline for receiving bids on reconstruction of the

NO ACTION was taken on repair to the City High School building, which was also damaged Saturday when vandals broke into the building and flooded the second floor by activating emergency fire hoses.

Board President Nicholas Karagan said the damage caused by water in the school building was

"We'll wait a couple of weeks to see how much damage there is," he said. "It may well just dry out and be fine."

Iowa City Fire Marshal Larry Kinney spent Monday afternoon examining the remains of the press box with Iowa City Police Department detectives. "We suspect a highly flammable liquid started the fire," Kinney said. "We have all our samples and

pictures and now we're talking to people. The Iowa State Fire Marshal's office is offering a \$5,000 reward for any information leading to an arrest and conviction in connection with the press

## Work 'satisfactory' on code violations

by Melody Myers

Coralville building official Omer Letts said Monday he is "satisfied" with efforts to eliminate unsafe conditions at a Coralville apartment complex, but said he has since found a more serious violation that is being corrected.

The new violation, Letts said, is in the wiring of six air conditioning units in apartments located at 2010 10th St. in Coralville. On three of the units, he said, anyone could open the fuse box and be in direct contact with 220 volts of electricity - a violation of the national electrical code that has been adopted by

The direct contact is possible, Letts said, because the wiring used for the six units was "romex" wiring, a type of wiring used between interior walls. It is not appropriate for outdoor use since it has no metal protection around it, he said.

LETTS SAID owner-builder Douglas Duss promptly eliminated all danger in three of the units by replacing the "romex" wiring with "greenfield" - a flexible conduit wiring with metal protection -

Letts said the other "three fuse box lids are not openable and are at least five or six feet" from ground level. The remaining three units are not in compliance with the electrical code because the "romex" wiring has not been replaced by "greenfield" code. But Letts said, "They are not

Last week Coralville Mayor Michael Kattchee and Letts expressed concern with an open basement foundation of a four-plex apartment that had no barrier to prevent someone from falling into the unfinished structure.

Letts said he sent a written notice to Duss last week to either "fence off or cap off" the "attractive nuisance" - a hazard that in this case attracts children and is dangerous. Letts said last week that if Duss did not make an effort to correct the danger by Monday, he was going to consult the city attorney about filing formal charges.

"IF THE man is trying — which he undoubtedly is — I don't think it would be fair to file charges," Letts said Monday. "He's made substantial progress (since last week). I'll let him go until tomorrow night" to enclose the unfinished basement.

"I respect the man's decision to fix the wiring first," Letts said. He said the wiring violation had priority over the open foundation and influenced Letts' decision to give Duss more time to correct the 'attractive nuisance.

Duss started Monday to enclose the east front of the open foundation.

"I SHOULD have it all wrapped up tomorrow so everybody's happy," Duss said. "I've always gotten along with the city. I think they've got a legitimate beef (on the open foundation). I just haven't had time. I'm building eight houses at North Liberty and we got too far behind" to get everything done at

The written notice also said patios built on six apartments violated three building code require-

"Our criteria was to make the decks safe," Letts said. He said he had been out to check progress and was convinced the "decks are in there tight." Letts said that "for all intent he (Duss) almost has the patios in compliance." He added that Duss has 30 days upon receving written notice to comply to the building code.

### Grain claim rejected

DES MOINES (UPI) — The State Appeals Board Monday rejected a list of claims filed against the state as a result of the multimillion dollar financial collapse of the Prairie Grain Co. of Stockport.

The three-member board rejected property damage claims totaling \$3.8 millon, saving Iowa law exempts state agencies, employees and officials from liability. The claims were filed by 159 farmers who stored grain at the scandal-wrecked elevator.

State Comptroller Ronald Mosher said the next step for farmers who want the state to cover their losses would be to go to the General Assembly.

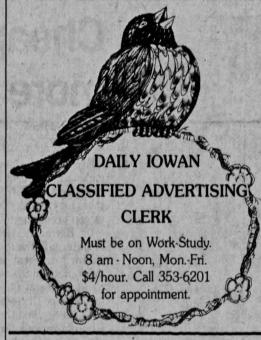

## Palo reactor test said 'satisfactory'

Results from a reactor test conducted last Saturday at the Duane Arnold nuclear plant in Palo are "satisfactory," according to Pat McPartland, spokesman for Iowa Electric Co.

McPartland said the aim of the two-part test is to find out whether the control-rod drive mechanism functions properly. The test included a manual and an automatic shutdown of

"The control devices worked as they are expected," McPartland said.

The test was ordered by the Nuclear Regulatory Commission in June after control rods used to quench the fuel reaction in the core of the Browns Ferry nuclear plant at Decatur, Ala., failed for several minutes to insert properly.

# AIAW leaders work to retain control of group

by H. Forrest Woolard Staff Writer

While many women athletes complain of sharing beds on road trips or the absence of training tables the male athletes enjoy, the "Mothers of the AIAW" at this week's workshop are still celebrating the existence of their woman-controlled organization.

"During my presidency, we experienced crisis day-to-day management," said Carol Gordon in Monday's

session. Gordon was the Association of Intercollegiate Athletics for Women president in 1973-74. "There wasn't time to try new approaches. We had no real philosophical base."

The AIAW, which has more than 900 institutional members, has grown tremendously in its nine years of existence, but it has not been an easy process, according to former AIAW

In the early stages, the AIAW encountered problems with physical

educators and male-controlled associations (such as the NCAA) in terms of

"WE WERE NOT only a threat, but an enticing prize for the other sport organizations," said Carol Oglesby, the AIAW's first president. "They (the NCAA) thought they had mandate to do it all. But the NCAA was and is an organization run by men for men."

The early AIAW leaders believed that their organization should be con-

trolled by professional women, Oglesby said. Enriching the lives of women through intercollegiate athletics and providing balanced athletic programs was the AIAW's main concern, she added.

"We wanted the AIAW to stand for something that was worthy of respect," Gordon said. "Encouraging students to participate in athletics for other reasons than the financial benefits" was a major issue, she said.

DOWN-PLAYING athletics' monetary issues, the early leaders voted initially to exclude athletic scholarships for women competing in AIAW-sanctioned events. A suit, however, was filed against the policy and the AIAW changed its philosophy. Oglesby said the AIAW was the only organization forced to make rule changes to comply with Title IX.

Oglesby said the initial move to ban sports scholarships was not meant to

be "discriminatory to physically-gift women," and added, "We did not see the monetary issues as equality.'

The AIAW now allows full scholarships in all sports. "A feminism has become more accepted the AIAW has aligned itself with feminist viewpoints," Oglesby said.

Such viewpoints include equal opportunities for all students to compete in athletics and the chance to become the best competitor possible.

# Athletes' lives ruled by water at swim camp

by Dick Peterson Associate Sports Editor

One way to avoid the summer heat is to spend a lot of time in water. It's cooling and relaxing.

But it can also be grueling and taxing - if the summer is spent with Iowa Swimming Coach Glenn Patton and his Intensive Swim Training camp at the

Field House pool.
"It's for the serious, competitive swimmer who wants very intensive training," Patton said. The camp provides "an opportunity to train intensively, to put yourself into a sum-mer commitment of swimming," he added.

"It leaves very little time for anything else," he said.

"You just want to sleep," said Tom Roemer, an Iowa swimmer who is participating in his fourth intensive camp.

BETSY NOWAK of Iowa City West High heard about the camp two years ago and was encouraged to enroll this summer by Paul Eaton, the West High swimming coach and one of the camp

"Eat, sleep ... and swim," is how Nowak describes her summer.

And for the 50 swimmers enrolled, that's fairly accurate, Patton admit-

The swimmers' day begins at 6 a.m. hours the distance training. At 8:30 a.m., they break for breakfast.

At 10:30 a.m., they are back in the water to practice stroke technique and sprints until at 11:30 a.m.

Another workout begins at 2 p.m. and lasts until 4:30 p.m. And from 4:30 p.m. to 5:30 p.m., the swimmers may leave the waters for "dry land workouts." Patton said.

DRY LAND training consists of

After the dry land workouts, it's time for dinner. Two or three nights a week, classroom instruction in swimming is offered, Patton said.

"You get in better shape than ever before," he said. "If you're serious about swimming, you can sustain your-

"To become a top swimmer you have to do it (intensive training) for a number of years."

The Iowa camp is "a national-level type of training program," Patton said. "The top swimming clubs average 20,000 yards of swimming per day." He said that would compare to 48 to 50 miles of running per day.

THE CAMP builds up swimming yardage over the summer, said Charlie Roberts, an Iowa swimmer. Last week, the swimmers notched 24,000 yards in one day.

West High's Laura Colloton said the camp helped her distance training. She has gone from 5,000 yards a day to 20,000 yards through intensive work at

The camp for commuters began May 5 and continues until the Long Course National Swimming Championships begin July 29. The camp costs \$300 for commuters.

The resident program, for those on dormitory board contracts, lasts from June 22 to July 19. The four-week resident program costs \$545.

Anyone over 12 years old can participate in the camp, Patton said. But the swimmer should be warned: "He's captured here in swimming camp."

# Cheaper shoes cost more in health terms

Sports Editor

Even though Nike running shoes make a larger dent in the wallet than 'blue light special" tennies, the latter shoes may actually cost more in health terms, according to a UI study.
Dr. Herman Falsetti, a UI professor

of internal medicine, is currently studying different running shoes and their effect on the red blood cells. Dr. George Klee of the Mayo Clinic, formerly of the UI Hospital's Department of Pathology, and Dr. Henry Hamilton, UI professor of internal medicine, are also working on the study.

The shoe study is the second part of an overall investigation on the effects of running on red blood cells. The study should aid understanding in the "anemia of athletes" syndrome, Falsetti said. Anemia in athletes occurs when there are low levels of hemoglobin in the blood.

FINDINGS OF the first part of the study were revealed last year. The second part should be disclosed by late August or early September when it is published in the American Medical Journal, Falsetti said. Falsetti said the first part concluded

that beginning long distance runners will initially feel worse due to the destruction of red blood cells.

"We have found that long distance runners tend to destroy red blood cells, but their bodies are usually able to keep pace with this destruction by producing more," said Falsetti, who runs eight to 10 miles daily. "This causes problems for the runner who has not been running constantly for several weeks.

Falsetti said the beginner will have a greater destruction of red blood cells tance runner rather than the leisure than production, thus causing the run- jogger of two or three miles per day.

Scoreboard

NATIONAL LEAGUE

IT USUALLY takes six to eight weeks before a runner's cell production and destruction are equal, Falseti said. He added that eventually the ab solute number of red blood cells in a trained runner will be greater than those in a non-runner.

Falsetti said the red blood cell destruction may be partially caused by the mechanics of running - the "pounding" of the feet against the 'Long distance runners put mor

force on the heel, the back of th shoe," he said. "The faster the race or runner, the more the toe is used." This is where the second part of the

study comes in, he said. "In the second part, we wanted in see how we can minimize the loss of red blood cells through the type of shoes the runner wears," Falsetti said

THE INVESTIGATORS are studying seven marathon runners includi Falsetti and Dr. Charles Hess of the University of Maine.

Falsetti said the subjects run i regular shoes and then have blood tests taken. The subjects then run in specially cushioned running shoes such as the Nike Tailwind, with blood tests again following.

He did say, however, the "shoes that are highly cushioned decrease the cells." The shoes use pockets of air to cushion the pounding of the runner's

What it all comes down to, is simply having the "right shoes and equip ment' when taking up running,

Falsetti noted the study appears to have more relevance for the long dis-

What is Bio Resources?

Bio Resources is a plasmapheresis center located adjacent to the University of lowa campus at 318 E. Bloomington St. They opened their doors to the community in Nov. 1975.

But what is a plasma center? Plasma, first of all, is the liquid portion of an individual's blood. Plasma and its products are needed in large quantities by the medical field, especially in the treatment of burn victims and hemophilia and assuring the availability of immunoglobulins and standard testing serums. A plasma center then is a facility for the collection of plasma.

How is a plasma donation obtained? This is the procedure at Bio Resources: a

donor relaxing in a lounge chair fills a bag of blood. A technician takes this unit to a centrifuge area where the blood bag is spun at 5,000 r.p.m. separating the heavier elements in the bag to the bottom of the bag—this includes red cells, white cells and platelets. The plasma remains at the top of the unit and is simply extracted into a second sterile bag. The donor and technician verify the bag of cells as belonging to that individual through a five step identification process that leaves no room for error. When the cells are parally returned to the donor, the process is comreturned to the donor, the process is con repeated for a second unit.

Bio Resources has a comprehensive program to assure the good health of all donors. Prior to an initial donation each person between the ages of 18 and 64 is examined by a physician at the

The first visit will take approximately two hours with each subsequent visit lasting between 1½ and 1½ hours. Each donor is paid in cash

The center accepts appointments Tuesday, Thursday, and Friday, 8:45 to 5:30, and Monday and Wednesday, 10:45 to 7:30. Individuals wishing more information should feel free to call

Bring this coupon with you on your first donation and you will receive a

\$5.00 BONUS When you have donated 5 times
