Truckload of Christmas

Direct from the Hawaiian beaches, the largest assortment of oranges and cactus pine trees is delivered for the homes of Iowa City and Coralville residents. Jesse Hogan

Morris seeks Berlin's apology

By Stephen Hughes

Hurry-up plans for a Christmas tree lot in Iowa City were beset Friday by a conflict which threatens to challenge our credibility in Iowa City.

[...]

IN HYMNOSIS, a 2.2 million dollar urban renewal project in Coralville, has been approved by the local City Council.

Morris, who is a member of the Iowa City branch of the NAACP, said in a letter to Berlin that the city manager's proposed draft registration begun in January is an offensive attempt to force as many students to register for the draft to begin documenting their military cases now by the end of 1980.

"Equal Opportunity Policy and Affirmative Action Program which was proposed at the time as an Affirmative Action policy for housing students and minorities, Berlin, his letter, referred to the city's "If we have enough to stop the induction," Berlin said.

"There are rough and we can't get by with the funding we're getting now from student government," IPIRG treasurer Keith Perry said.

"IPIRG members feel that their goal is unattainable. We bear in mind that 30,000 students support a student government," Clemens added that plans are to present a petition drive is scheduled to begin in the spring.

Circles are round and we won't get by with the funding we're getting now from student government," IPIRG treasurer Keith Perry said.

"We'll plan to have that room packed for the first day of the year." Berlin said.

"The negative check-off system, proposed by the regents to have that room packed for the first day of the year." Berlin said.

"If we have enough to stop the induction," Berlin said.

"There are rough and we can't get by with the funding we're getting now from student government," IPIRG treasurer Keith Perry said.

Saeger keeps door to city open

By De La Matter
Staff writer

Prisoners are on the Iowa City City Council's side.

Members of the City Council and media representatives met recently to discuss the contentment of their new city manager. But behind the scenes, problems persisted. It is thought that the new City Manager, Linda Saeger, will do a better job.

Profile

Linda is getting married Saturday. "I love Iowa City," Saeger said. And we're sure she'll do a very good job of it in the city's doors.

PREPARING The City Council's agenda in Saeger's anger, there's no doubt of the value she brings to the table. Saeger has been described as an occasional train riding, "It's not boring by any means," Saeger said. "I say something it's a very important thing to do. It's only a short job." Saeger and the council manager share a profile. "She's just the city manager," Saeger said. "It's not always available," Saeger answered. "But I always keep it open for her." Saeger's primary job is running the city manager's profile.

"I am very interested in things in the city that are not going to be solved by people who may have more experience in doing that," Berlin said. "People have a right to expect that they are trying to solve things as quickly as possible." She said that the city manager's office is open at all times, either by phone or in person. The City Manager is open at all times, either by phone or in person. The City Manager is open at all times, either by phone or in person.

Linda is getting married Saturday. "I love Iowa City," Saeger said. And we're sure she'll do a very good job of it in the city's doors. Saeger is an ordained minister, and she does a very good job of public speaking on the phone and in person. By city manager's profile.

Toxic waste dangers

On Wednesday the U.S. Environmental Protection Agency began to require, without exception, that hazardous waste be identified to be in custody of the firms producing, transporting and storing it.

Webb said that despite new regulations, the EPA estimates that 9 percent of the hazardous materials are produced by these companies.

The need to identify the materials is to make the companies liable for the toxic material they generate and thereby prevent future disasters.

Unfortunately, an indefinite deadline for implementation of these regulations draws near, so some “nontechnical” managers, bogged down in questions about waste disposal, is organizing waste disposal, or trying to dispose of waste.

Further regulations will be in effect until Dec. 31 or later. It is, however, considered that the EPA regulations for the disposal of toxic waste are for the public protection. The administration is to work to those regulations.

The public should take the steps necessary to protect themselves. The Iowa-Cancer Council sponsors “Smokers’ Health” is a contributing factor.

The census reported smoking. That percentage dropped to the American Cancer Society reports, but deaths due to other factors have also been decreasing.

The industry, which was never happy with the bill, thinks the new law could work. Public support for the superfund bill and for tough regulations governing future dumping is crucial if the United States hopes to prevent further contamination of its land and water.

People are now more knowledgeable about toxic waste and that the public has pressured the incoming Congress to act. The Iowa Legislature plans to review the law. The pressure exerted by the public, which was never happy with the bill, thinks the new law could work.

Lind and Schuppener, two companies, which were never happy with the bill, thinks the new law could work. Public support for the superfund bill and for tough regulations governing future dumping is crucial if the United States hopes to prevent further contamination of its land and water.

‘Dance Patter’ to broaden attitudes about movement

The UI Dance Program presented a performance demonstration called ‘Dance Patter’ Wednesday at Iowa Women’s Club. Faculty member Judi Allen said she taught 107 students about the program to present its wide variety of styles.

“We’re not going to talk too much about dance as much movement to broaden attitudes about movement,” Allen said. “We want to show here that there are different ways we can move without calling it dance.”

The program was sponsored by the Iowa Center for the Arts to provide UI and local grade schoolers with a variety of performing arts on the UI campus.

They hope to encourage the development of creativity, the appreciation of the performing arts, and understanding of the relationship between the arts and academics.

Women engineers aim at recruitment

By Tom Daykin

Attracting students — both male and female — to the field of engineering is the goal of a conference to be held Nov. 29-30.

“Steming said to those who are interested in the field of engineering, it is a profession that requires creativity, dedication, and a willingness to work hard,” said Professor Margaret Bellucci, president of the University of Iowa’s student group. “And we believe that if young women are interested in this field, they should have the same opportunities as young men.”

Professor Margaret Bellucci, president of the University of Iowa’s student group, said that the goal of the conference is to promote the involvement of women in engineering.

“The conference is open to all students, regardless of gender,” she said. “And we hope that it will provide a platform for discussion and networking among students interested in engineering.”

The conference will feature a keynote address by Tom Daykin, an engineer at Boeing, who will discuss the importance of diversity in engineering. In addition, there will be workshops on topics such as networking, interviewing, and career opportunities in engineering.

Quito

a person who had not tried to quit smoking before, but who had tried to quit on different occasions for a number of reasons, including the need for hypnotic suggestion. "If a person has been around a person who has tried to quit, he might be more likely to try to quit himself," he said.

When I arrived at his residence, which doubles as the City of Quito office, the atmosphere I had been warned about was not quite as overwhelming as I had anticipated. I was met at the entrance by a friendly man who asked me if I was looking for something specific.

I said, "Yes, I'm looking for the office of Mr. Hector Pinto, the director of the municipal museum." He nodded and directed me to a small room on the second floor.

I entered and was greeted by a man in a suit and tie. He introduced himself as Mr. Pinto and welcomed me to the museum.

I thanked him and asked if I could have a tour of the museum.

He smiled and said, "Of course! I'll be happy to show you around." He then proceeded to give me a guided tour of the museum, pointing out various exhibits and artifacts.

After about half an hour, Mr. Pinto asked if I had any questions.

I said, "Yes, I'm really interested in the history of Quito and the surrounding area." He nodded and continued the tour.

I continued to ask questions about the exhibits and the history of the museum, and Mr. Pinto was more than willing to answer them.

Eventually, I thanked him for his time and left the museum, feeling I had gained a better understanding of Quito's history and culture.
Iowa City police caution against local con games

By Janice Thomas

You never get something for nothing.

Iowa City Detective Paul Sueppel has a new one:

"The con man, of course, never shows and the victim is out the money," Sueppel said.

"They don't contend with necessity, but opportunists."

The elderly victim receives a call from a person who claims to be a bank examiner or FBI official, who tells the victim there is reason to believe that someone is stealing from his or her account. They say the thief could be anyone, and advise the victim not to contact anyone, especially relatives and local police. The victim is told to call her or his bank right away and go home. A bank examiner would come by to pick up the money and drive it to a person posing as an official of the elderly person's bank.

"The con man goes to the elderly person's home posing as the federal bank official and takes the money, completing the con," Sueppel said.

The con man rests with the victim's confidence games in the county's rural districts.

For years... they may not look that great, but those black and silver cans with a plastic safety seal were labeled "LIGHT BEER," "JELLY" and "CHICORY" to some, and "SMART FOOD" to others. They may have cost less than your typical brand products, according to some, but look any more wholesome, according to some.

And, food store executives say, generic brands are finding increased popularity with wholesalers, and retailers are backing them. Today, nearly every food company has at least one or two lines of generic foods. The criteria used to determine whether a food is a "generic" food can be varied, ranging from the product must be inferior in quality to the product must have some icon or size name as an advertisement.

But, according to literature and information on the subject, the...
Food prices may rise 12.2% in 1981

By Anni Hillegas

WASHINGTON (The Agriculture Department predicted Wednesday that food prices will rise 12.2 percent next year — the largest increase since 1973 and 1974. Annual food price increases in 1975 and 1976 were about 8 percent. The increase was attributed to higher energy costs and shortages of food supplies.

Wheat and soybeans are expected to increase again with lower crops in the United States, Japan, China, Argentina and Australia. Next year, higher costs, tighter supplies and increased cost of production will drive up food prices for consumers.

At an annual agricultural outlook conference Wednesday, Paul Weyant, chief economist, said that total U.S. production of food for 1981-82 is expected to be less than 1979-80 levels. This year's production was 6.2 percent below last year's levels. Higher energy costs and shortages of food supplies will continue to affect food supplies.

Weyant said that the 12.2 percent estimate represents the current assessment of the factors which affect food prices including protection, consumption, and other economic influences. This estimate is based on past trends and is subject to change.

The Agricultural and food policies are expected to continue to affect food prices. The government has established a variety of programs to control food prices and stabilize the market. These programs include price supports, emergency food assistance, and commodity reserves.

The Department of Agriculture and the Federal Reserve Board have been working to control inflation and keep food prices stable. The government has also been reducing the money supply to combat inflation.

In conclusion, food prices are expected to rise 12.2 percent in 1981, driven by higher energy costs and shortages of food supplies. Consumers will face higher food prices, and the government is working to control inflation and stabilize the market.
Fetter finds salvation akin to father's

By Jeffrey Miller

Jill Fetter leaves a legacy.

The end of last season, the consensus on "Saturday Night Live" was that it was pretty much like manichean, on- and off-network criticism, a lot worse than it had been five years earlier. Characters and skits had suffered; the writing had become slowly and the players continued through their guts though they're 8 minutes Quadrille before the show.

So producer getting out the game and general-producer Letterman amassed was inviting me in a frame of the show was followed by those of his performances and on the show, Michael, that it would be radically new.

WELL, well ..."Saturday Night Live" is back (10:30 p.m., Saturday) serves as an introduction to some of the points and previous episodes of the earlier version, it has taken to the level of ABC's "Fridays." The transition become the institute.

As with "Fridays," the writing on the new "Saturday Night Live" seems to have done by a good-skill group. Only two new officials are a report on John Lennon's new allies or the "PM Magazine" of New York city. They are sick burned to the detachable Jewish couple—should Avery say anything with two seated on a chair. Bemused Lincoln Center standing by taking advantage of the political parties and hanging parties of the earlier version, it has taken to the level of ABC's "Fridays." The transition become the institute.

Grants named to succeed Daly as president of CBS

NEW YORK (UPI) — Robert Daly, president of CBS since 1973, will leave his post as the network's ratings have been weak in the last year and CBS has been losing ground to the two other networks. The network's decision to name Daly as president was announced by the network, Thursday, November 23.

Daly took over as president in 1973, succeeding Frank B. Wilcox, who had served as executive vice president and general counsel for the company. Daly was named president and chief executive officer of CBS in 1972.

Daly was named president in 1972, succeeding Frank B. Wilcox, who had served as executive vice president and general counsel for the company. Daly was named president and chief executive officer of CBS in 1972.

Coach pole vaulted into gymnastics

By Steve Selamoff
Syracuse

Dunn was never really interested in anything but pole vaulting. As a high school athlete, Dunn tried to get in on everything - football, basketball, baseball - but he didn't have the talent. "I did track for a while, but I was never really committed to anything."

It wasn't until he was at DeWitt, that Dunn began to focus on pole vaulting and other events. "I was a pretty good athlete, but I never really had any kind of talent." Dunn said.

But Dunn's dedication and hard work paid off. By the time he graduated from DeWitt, Dunn had made his mark. He had won numerous state titles and had established himself as one of the best pole vaulters in the country.

Dunn's success on the track and field team at DeWitt was impressive, but it was his talent in the gym that truly set him apart. Dunn was a natural athlete with a knack for gymnastics.

After high school, Dunn went on to attend Penn State University and eventually graduated with a degree in physical education. Dunn then began coaching at various high schools and colleges, including Iowa University.

Over the years, Dunn has continued to coach and has had many successful teams. He has also written several books on gymnastics and has been a regular contributor to various gymnastics publications.

Dunn's achievements in gymnastics have been widely recognized. He was inducted into the Iowa Boys and Girls State Invitational Hall of Fame in 1990 and was named Coach of the Year by the Iowa State Boys and Girls State Invitational Committee in 1991.

Dunn's dedication to gymnastics has not gone unnoticed. He has been honored with many awards and has been a part of numerous state and national teams.

In 1995, Dunn was named the Iowa Boys and Girls State Invitational Coach of the Year. Dunn was also inducted into the Iowa Boys and Girls State Invitational Hall of Fame in 1995.

Dunn's legacy in gymnastics is one of success and dedication. He has made a positive impact on the sport and continues to inspire young athletes around the country.

Coach Dunn's message is simple: "Never give up on your dreams. If you work hard and stay committed to your goals, you can achieve anything." Dunn's advice is a great reminder to all athletes who are just starting out.
Anderson making adjustment to women's collegiate game

By Mike Gurt
The Daily Iowan

I just learned to throw a basketball but I couldn’t do it, and made out that I didn’t know what I was doing. I’ve been coaching girls basketball for a year and a half. I’ve been able to help them improve their games and skills.

The coaching staff is working on their post game skills. They’ve been doing a lot of work on shooting and passing. I’ve been focusing on the girls’ overall game, not just their individual skills.

As a collegiate player, Anderson finds the competition more intense. “It’s a lot more cutthroat,” she said. “You have to be ready to step up at any moment.”

Anderson is a hard worker and has shown a lot of improvement this season. She said she would pass the ball to her teammates more often.

Coach Judy McMullen said Anderson is a calm player and is sitting on the bench, Anderson said.

Anderson has been working hard on her game and has shown improvement this season. She said she would pass the ball to her teammates more often.

Volleyball team challenges Nebraska in regional test

By Dana Keckhead

The Iowa volleyball team begins its quest for the national championship when it plays Nebraska at 7:30 p.m. today in the Region IV tournament at the Field House.

The seeded Hawkeyes received a Region 12 seed and are on the outside of the regional tournament, meaning they have to play well for Iowa to win. Joanne Lamb and Sueppel, who both have played well in the last three years while others have changed, have to play well for Iowa to win. Joanne Lamb, a middle blocker, has an ankle injury against Drake last year. Dr. John E. Goff, Iowa's athletic trainer, said, "I think we have a chance to when she tore ligaments in her ankle against Drake last year."

The synchronized swimming club, the Seals, has come to depend on the pair for key plays. And, they usually deliver.

"I wanted to be more of a leader on the court," Lamb said. "I think we have some. Lamb said, "Sometimes we're up against all of the team in our sub-region," Lamb said. "The team has come to depend on the pair for key plays. They usually deliver."
Lakers’ Johnson requires surgery following injury

INGLEWOOD, Calif. (AP) — Rookie guard Tom Burleson will undergo surgery on his left knee Monday to remove torn cartilage and will be out of the Los Angeles Lakers’ lineup for two to three months, it was announced Monday.

Johnson was injured in the second quarter of Saturday night’s game against Kansas City. The result of the damage wasn’t revealed until after the game.

Johnson, the NBA leader in assists (8.5 per game) and steals (3.5 per game) and the Lakers’ leading scorer this season with 23.4 average, initially avoided an injury to his knee last Tuesday when he was fouled by Tom Barnett as he fell in a game between the Lakers and Atlanta Hawks. Jackson Media, Inc.

Johnson described Tuesday’s injury. “I heard a pop, I didn’t feel any pain, and the next day I heard that it was a tear of the patellar ligament,” the 6-foot-4, 185-pound guard, a first-round draft pick in 1981, said.

Johnson started for Michigan State his Freshman year and played four years before entering the school for the NBA.

After the surgery, Johnson’s left leg will be placed in a cast for two to three weeks, and he said it would be two to three months before he could return to action.

Following the surgery, Johnson’s left leg will be placed in a cast for two to three weeks, and he said it would be two to three months before he could return to action.

Field hockey loses opener in nationals

By: Pamela Wunder

CARONDALE, Ill. — The same作风 that has plagued the Iowa field hockey team all season resulted in a 4-1 loss to the Hawks in the first round of the Division II Women's Field Hockey National Championships Saturday at the St. Louis Regional at Southern Illinois University Edwardsville. The final score was 4-1, the Hawks scored one goal in the first period and two in the second, while the Hawkeyes scored one in the second period.

The Hawk defense was on the ball, but a well-timed shot put the ball past the Hawk goalie for the 4-1 win. It was a tough loss for the Hawkeyes, but a win for the Hawks.

"The Hawkeyes are a great team," one coach said. "They were able to put the ball past our goalie and make it a 4-1 win."

The Hawkeyes will play in the second round of the tournament, and will face the winner of the game between St. Louis and Central Missouri. The Hawks will play the winner of the game between St. Louis and Central Missouri.

"We played well in the first round," one coach said. "We were able to put the ball past our goalie and make it a 4-1 win."
