A group of pregnant rats was fed a li-UI College of Medicine Assistant quid solution, of which 10 to 12 percent Professors James West and Asa Black was alcohol, providing 35 percent of the

Another group of pregnant rats - the control group — was fed the same amount of calories in a liquid diet, except sugar was used instead of alcohol This was to ensure that the results

were caused by the alcohol, not by a reduced number of calories in the diet. The diet was continued for 21 days. The rats then were placed on a normal diet for the rest of the gestation period

Each rat's offspring were raised by another mother to ensure normal development. The offspring's brain development was tested after they reached adulthood, at about 60 days of

THE RATS born to alcohol-fed mothers had brain defects; brain cells - such as those controlling memory

and short-term learning — were abnor

West said a rat's brain is similar to a car that may work fine with a missing

spark plug wire, but not as well if several wires are switched. "I would suspect that there are changes in other parts of the brain as

well," he said. One abnormal rat had extra toes, but

New cuts blamed on Carter estimates

WASHINGTON (UPI) - President Reagan and his economic chiefs Thursday blamed "rosy" estimates by the Carter administration for the fact they now must find \$3 billion to \$6 billion in additional spending cuts to meet budget goals.

Treasury Secretary Donald Regan told reporters the previous administration's spending figures, which the new team used as a starting point, "were much too low."

Therefore, \$41.4 billion in 1982 spending cuts already projected by the new administration are not enough to meet its target of \$695.5 billion in

"They had, if you will pardon the expression, too rosy a scenario," the treasury chief said of the Carter estimates, "and as a result, they didn't anticipate the worst that's coming."

OVER ON the Hill, Democratic members of a joint congressional panel Thursday called for a tax policy of middle-income class" to offset the recent increase in Social Security taxes and issued a moderate alternative plan to the administration's proposed package of massive budget and acrossthe-board tax cuts.

Republicans called the Democratic alternative a return to the "tried-andfailed" policies of past administra-

For two consecutive years, the Joint Economic Committee issued a bipartisan annual report calling for individual and business tax cuts to spur investment and savings and reduced government spending and regulations. Thursday, the panel, under the leadership of new chairman Rep. Henry Reuss, D-Wis., issued sharply divergent suggestions on curing the nation's economic woes.

MEANWHILE THURSDAY, a presidential commission that was appointed by Carter recommended enrolling all American workers in a universal, employer-financed pension system to supplement Social Security, and raising the age for receiving normal Social Security benefits from 65 to

The President's Commission on Pension Policy also recommended making Social Security income taxable. White use press secretary Jim Brady said President Reagan considered the panel's recommendation to make Social Security income taxable "for 40 seconds and said, 'No.' "

He quoted Reagan as saying, They've already been taxed on Social Security when they send their payments in."

The president, after seeing British Prime Minister Margaret Thatcher off from the White House, was asked if the administration really will be able to

"YOU BET we can," he replied. 'Just as soon as the bureaucracy finds out how wrong its figures are.

Were they wrong because of the Carter administration, the president was asked. He responded with a definite,

Meanwhile, the chairman of the Senate Budget Committee said he might slash up to \$10 billion more than

eagan proposes.
"My committee intends to consider many other options than those recommended by the president," Sen. Pete Domenici, R-N.M., told a National Press Club luncheon.

He said his staff has listed 65 additional items so far that can be cut. But Rep. James Jones, D-Okla., chairman of the corresponding House el, plans to recommend fewer cuts panel, plans to recommend, aides say. See Economy, page 7

Nader urges 'blowing the whistle'

By Craig Gemoules

Employees should not leave their values at home when they go to work, even if that means "blowing the whistle" on poor business practices, consumer advocate Ralph Nader said

Nader, who spoke on "Professional Responsibility of the Professions"to a capacity crowd of about 1,200 in the Union, said it "takes a strong will" for an employee to take his or her case to the public when the employee's company is producing hazardous products. Nader was at the UI in conjunction

with National Engineers' Week. PROFESSIONS SUCH as engineering should try to prevent the manufacture of hazardous products, Nader said. Engineers are in a position to pre-

vent defective products from reaching

the consumer, he said, but that may

mean employees must blow the whis-Employees can take a "narrow values approach' or be the "trusteeship for the public," Nader said. "You have to have a strong will ...

to go the second pathway."

If you don't accept your civic responsibility, "You go through life as a bystander, or worse, a drop out from democracy."

democracy. Employees should apply their value

system to daily work, he said.

said, "You go through life as a bystan-der, or worse, a drop-out from easy, he said. Employers will tell the worker, "'I thought you had a future with this company,' "Nader said.

Nader called on people to develop civic responsibility. Otherwise, he company is engaged in poor manufacture. IF THE employer does not correct the poor practice, the employee faces a

difficult decision: whether to blow the whistle or to keep quiet.

"There are many people who see abuses at the places they are employed," Nader said. "Picture the scene: it happens every day thousands

There are those who will keep silent, he said, "but there are the courageous

Nader, gearing his speech to engineers, said they can cite the engineering code of ethics when they report poor business practices, and tell the employer, "My profession and the canons I have sworn to uphold tell me that it is the professional thing to do."

Nader said technology has "reached a crossroads" and those in the professions, including engineers, should take a closer look at the direction technology is heading.

"YOU DON'T often look at Exxon and GM (General Motors) and say, 'You know, they could affect the genetic trend of the world in the next 1,000 years' "because of pollution, he

Nader gave an example of one GM employee who "blew the whistle" on the company for a defective product. IF THE employer does not correct To avoid embarassment, he said, GM

Effects of **Atlanta** slayings

By Elizabeth Flansburg Staff Writer

A black child with a paper route, fearing for his life, refused to deliver his papers. He thought he might be the next victim of the unknown assailant who has murdered 18 black children in Atlanta, Ga., during the last 19 months.

discussed

But that child lives in Iowa City more than 650 miles from Atlanta. The situation in Atlanta has "farreaching effects" and it "touches all of our children in some way," Robert

Morris, president of the Iowa City chapter of the NAACP, said during a forum at the Union Thursday. The forum, sponsored by the UI chapter of Alpha Phi Alpha fraternity, was held to let people "come and freely express their views and con-

'NEVER BEFORE has there been such a violent attack on black children as it is in Atlanta." Morris said. 'There are 18 slain children sending a

cerns" about the slayings in Atlanta.

Ralph Adams, minority representative to the UI Student Senate and a member of the Black Student Union. said, "We're very lucky that the people in Atlanta haven't blown up the whole

He added, "I don't want anything bad to happen, but I wouldn't be surprised if there wasn't an all-out race war."

Fraternity President Melvin Caldwell urged people to write to their congressional representatives and 'even the president" to help stop the "terrorism" in Atlanta.

"WE MUST rise to a higher level of consciousness," he said. "Terrorism is not just in Atlanta. Urge our government to aid Atlanta.'

The Cedar Rapids chapter of the Black Coalition has asked Americans to wear black armbands and "resolve not to cease wearing them until this terror has been wiped from our streets." The UI fraternity has been distributing leaflets and black wristbands to show support.

The coalition also asked that prayers be offered for the slain children and their families, and urged religious leaders to ask their followers to wear the black mourning bands.

"As we pray for them, let us pray for ourselves also," Morris said. "Until we come together, nothing will change for the better, only for the worse."

In Atlanta, police added another name to the list of slain or missing black children with the addition of a street-wise youth whose body was found last December.

Atlanta Public Safety Commissioner Lee P. Brown said the case of Patrick Rogers, 15, who knew at least one of the other victims, had been turned over to a special task force investigating the baffling string of crimes.

Negative check-off bill withdrawn

By Jackie Baylor and Scott Kilman

A resolution condemning a negative check-off funding plan for the UI chapter of the Iowa Public Interest Research Group was withdrawn by its sponsors at the UI Student Senate

meeting Thursday. Sens. Niel Ritchie. Sheldon Schur and Tim Dickson asked the senate to postpone legislation on Iowa PIRG's proposed funding plan until a public debate can be held to discuss the negative check-off system.

Under the proposed system, students would mark a box on a card mailed with U-bills if they do not want to contribute \$3 to Iowa PIRG.

Schur said the debate is needed before the senate considers the negative check-off plan because "people are not as informed as they should be. We must have a debate to inform

ALTHOUGH no date or location for the debate has been set, Schur said it should be held before the March 17

Sponsors of an opposing resolution to

support the negative check-off plan agreed to wait until next Thursday to present their arguments to the senate.

Sens. Scott Kiser and Sarah Pang agreed to postpone consideration of their resolution, which calls plan "a good and viable alternative to mandatory student fees," until next week so that a debate can be scheduled.

Kiser and Pang said a debate will help gather student support for the negative check-off system. But they added that they would have preferred voting on the resolution opposing the plan because it would have been defeated, 9-7.

"IT WOULD have failed. The senate would have voted against it," Pang

The Pang-Kiser resolution in favor of the negative check-off system was filed after the Tuesday deadline for introducing new legislation to the senate and would have required a two-thirds vote to be put on the agenda, said

Senate President Bruce Hagemann. Hagemann could break a tie if the senate finds itself split on the controversial negative check-off issue. Senate rules state that the president can cast a vote to break a deadlock, he See Senate, page 6

a freeze on all new equipment purchases to help keep the county's general fund out of the

Edmonds said department cars are on a rotation schedule and can be traded after two years. The cars normally log between 80,000 and 100,000 miles after two years, Edmonds said, adding "I just don't think we can keep them on the road.'

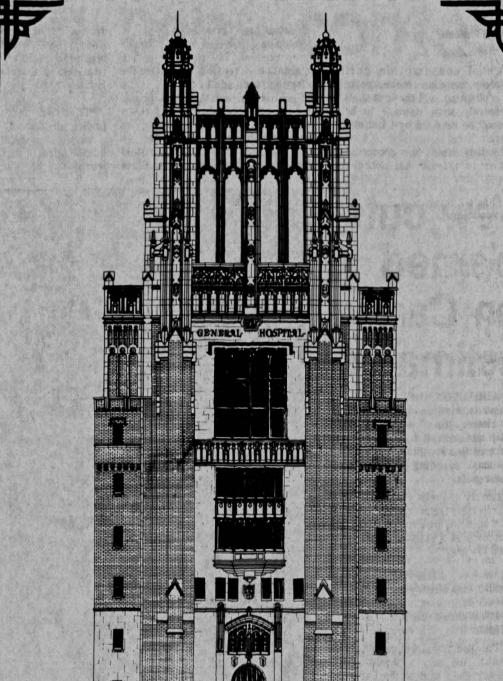

Edmonds also asked for \$15,000 to finish the jail's parking lot. However, if the proposed garage is built, he said only \$7,500 would be needed to complete the lot.

THE JAIL'S fiscal 1982 budget increase exceeds any other county department's total

budget. Budgets for the sheriff's department and for operation of the new jail total \$13

In an effort to offset a projected \$1.6 million deficit in the county's general fund by the end of fiscal 1982, the board elected to juggle some county department budgets to allow for transfers into the general fund.

The fund would still be \$275,000 in the red after the transfers, however. To offset the deficit, the board chose to limit staff wages and officers' salary increases to 8.25 percent and 10 percent, and to put an immediate freeze on hiring and new equipment

The Gothic Tower . . . a symbol of hope.

The Gothic Tower crowning the University of Iowa Hospitals and Clinics is a familiar landmark to Iowa City residents. It is a symbol of hope to thousands of patients who come from every county in Iowa, every state in the nation, and several foreign countries to receive health care services here.

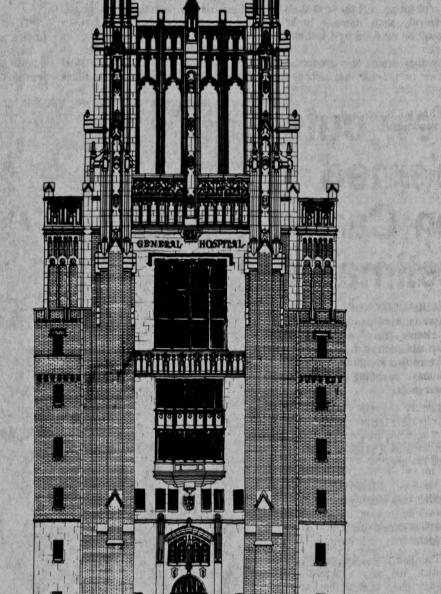

The tower marks the largest university-owned teaching hospital in the nation and the only comprehensive tertiarylevel hospital in Iowa. Highly specialized health care services are provided by 937 doctors representing 16 clinical specialties and 91 subspecialties. The health care team also includes 1,100 nurses and approximately 4,000 other professional and supporting staff. Together they served 40,204 inpatients and accommodated 318,056 ambulatory patients during the last fiscal year.

Just as the University Hospitals are meeting the challenge, the downtown area of Iowa City is gradually adapting to the challenge of change and growth with the latest addition being Old Capitol Center.

Old Capitol Center, the downtown enclosed shopping center, will proudly commemorate its Grand Opening Day on March 11, 1981 at 10:00 A.M.

Quaker school heats gym with some help from above

By Christianne Balk

A solar collector at Scattergood School, a private Quaker high school in West Branch, is producing more energy than expected, but a lack of funds will

delay expansion of the system for up to one year. The collector, consisting of 128 flat solar plates manufactured by the Soloran Co. of Denver, is on the south roof of the school's gymnasium overlooking In-

Solar energy gathered by the collector provides most of the gymnasium's heat and hot water, said Conrad Heins, who taught science at Scattergood and oversaw construction of the building and its solar

JOHN SEXTON, director of Scattergood, said he would like to expand the system by piping solar-heated water to other buildings on the 42-acre

"But that will have to wait until other financial priorities, like raising \$90,000 for a new septic system and \$25,000 to cover our 1980 general budget

deficit, are tended to," Sexton said. Heins, who is now division head of Jordan College's Energy Institute in Cedar Springs, Mich. said that when the collector was built, no one knew how much heat it could provide. "But it has far exceeded the heating requirements for the building, so we've modified it to provide heat for the school's

corn dryer. Every October, hot air from beneath the collector s blown into a silo next to the gymnasium where it dries about 5.000 bushels of corn grown on the school's 80-acre farm.

HEINS DEVELOPED plans last year to pipe colar-heated water from the gymnasium to the girl's dormitory and kitchen in Scattergood's main building, which would "double utilization of the

collector's heat," he said. The solar system saves Scattergood about \$1,000 per year in heat and hot water bills for the gymum and \$500-\$600 per year in corn drying costs, Heins said. Operation of the fan which moves air through the system costs about \$100 per year, he

A small percentage of the gymnasium's heat is provided by a propane furnace that automatically kicks in when cloudy weather prevents the solar collector from heating up, Heins said

Heins said an additional \$1,000 to \$1,500 could be saved by using the solar-heated water in the school's kitchen and the girls' dormitory. It would cost about \$6 per year to pump the water.

PIPES FOR the solar-heated water have already been purchased, Sexton said, but it will be six months to one year before the school has the \$3,000 needed to put them underground.

Sexton said that in addition to the septic system and the budget deficit, the school must also raise money for a 900-cubic-foot frozen food locker and a new fire-alarm system.

"After we find that money, we'll hopefully find \$3,000 for the solar system," he said.

The collector works by heating up when sunlight strikes the plates, and the heat is transferred to air circulated at the rate of 5,000-cubic-feet per minute beneath the collector, Heins said.

The hot air is then blown through ducts to the gymnasium where it is used as heat, or into a 65-ton bin of washed gravel, where the heat is transferred to the rock and stored up to three days, Heins said.

TO RETRIEVE heat from the gravel, cool air is blown through the bin, where it is heated by the rock and then directed to the gymnasium or to an airwater heat exchanger.

The heat exchanger circulates water through 50 feet of three-quarter-inch copper tubing which transfers heat from the air to the water. The hot water is then stored in two 120-gallon tanks and used for the locker room showers and the school laundry,

Scattergood received federal funds in 1976 to build the solar collector after the school was chosen by the U.S. Department of Energy to be one of 32 institutions across the nation participating in a federal

solar heating and cooling demonstration program.

About 80 percent of the solar system's \$100,000 cost was paid by the Department of Energy. The cost of the entire gymnasium, including the solar system, was approximately \$250,000.

Top: These plants are growing in the school's greenhouse, which is solar heated. Temperatures in the greenhouse have never dropped below freezing. Above: Sexton explains to DI reporter Christianne Balk how the school has modified its system to dry approximately 5,000 bushels of corn per year.

The Ronald Reagan administration is studying proposals to send more weapons and advisers to El Salvador. Senate Republican leader Howard Baker said after a recent meeting with Reagan that such support would be "entirely appropriate."

These proposals, backed by the Pentagon, betray a fatal lack of understanding of the revolutionary movements in Third World nations and an obstinate devotion to plans that have proved ineffective in the past.

Revolutionary movements arise because the people of a nation feel they are victims of state terrorism and state theft. The Soviets are quick to exploit such feelings, but they do not cause them. When the United States aligns itself with forces seeking to perpetuate state terrorism and theft, it becomes guilty in the eyes of the people.

The Reagan administration, by clinging to the idea that such revolutions are external, binds itself to military responses that are more appropriate to invasion than to popular rebellion.

The negotiated settlement of the rebellion in Rhodesia is a better model. The last U.S. administration recognized that the "rebels," despite communist support, had legitimate grievances. By negotiating with the Rhodesian government and its opposition, Great Britain and the United States brought an end to the fighting. and a democratically elected government was installed.

Robert White, former U.S. ambassador to El Salvador, has said that the biggest threat to the Salvadoran government comes from right-wing military forces within the government. Sending arms to the military strengthens them at the expense of more moderate elements within the government who hope to solve the problems by eliminating the causes of popular discontent.

Salvadoran President Jose Napoleon Duarte has said that he would prefer economic help, which could strengthen efforts such as land reforms, rather than military aid. Siding with oppressive elements in a civil war is a mistake that only accelerates the polarization in that nation; Reagan should recognize the lessons from history and send butter - not guns - to El Salvador.

Linda Schuppener

United Way donations

The UI Faculty Senate has voted against allowing on-campus solicitation by the United Way. The senate has good reasons for its opposition, but the United Way needs funds. A compromise should be reached.

The Faculty Senate allows lists of names to be given to the United Way, which then may send letters to UI employees to seek contributions. Mail solicitation, however, has been largely ineffective. UI employees contributed only \$61,800 last year, making the UI ninth among Big Ten universities in total donations.

The United Way wants UI employees to be able to seek contributions while on the job, a practice allowed by other Big Ten universities. The senate is opposed; according to some professors who were at the UI when on-campus solicitation was allowed, department heads often made the collections, and employees felt obligated to donate.

This type of situation is inappropriate, but it is clear that the United Way needs the money. The United Way of Johnson County is \$33,000 short of its 1980 fundraising goal of about \$300,000. To be sure, that goal is much higher than last year's; nonetheless, it is based on community needs. Those needs will become more acute as governmental social programs are cut back.

The senate recognizes this, and it recently encouraged faculty members to help solicit funds off campus. Although this move will help the United Way, it does not address senate members' concerns. An employee is in the same position no matter where her or his department head or supervisor collects contributions.

A better move would be to allow on-campus solicitation, but prevent department heads or supervisors from collecting the funds. The United Way's interests would be served, and faculty members' fears would be calmed.

Mike Connelly

Freedom of speech?

It is indicative of the current political climate that a simple remark can result in a Secret Service investigation.

Tom Jackson, a 22-year-old political science major at Iowa State University, was interrogated by Secret Service officers after making a simple political analogy at a Jan. 21 Student Union Board meeting. To illustrate a point about political allegiance, Jackson said, "I could be the president's supporter this morning and his assassin tonight."

The comment got a few laughs from board members, and Jackson continued to take part in the discussion of whether students should be elected or appointed to the board.

A complaint about the remark began a chain of events that led to the Secret Service investigation. The complaint was made to David Henry, assistant to ISU President W. Robert Parks. Henry contacted Dean Drake, head of Campus Security, and Drake contacted the Secret Service. When Secret Service officers approached Jackson, they took his photograph, gathered handwriting samples and pressured him into signing a waiver that allows the Secret Service to review his medical and psychiatric records.

Apparently no official misconduct took place. But the practice of informing the authorities about another's offhand comments is frightening and should be questioned. "Naming names" may be encouraged in totalitarian societies, but it has no place here.

Viewpoints

Reagan's hotline to vivid images

WASHINGTON - The most important question here these days is, of course, the fate of President Ronald Reagan's new economic policy. But what everyone really wants to know is just who is responsible for those dandy new images Reagan is using in his

In his first speech on the economy, the president described the seven million unemployed this way: "If they stood in a line, allowing three feet for each person, the line would reach from the coast of Maine to California."

Then, addressing Congress the other night. Reagan felt obliged to describe just how much \$1 trillion can be. "I've been trying to think of a way to illustrate how big it really is," he said. "The best I could come up with is to say that a stack of \$1,000 bills in your hand only four inches high would make you a millionaire. A trillion dollars would be a stack of \$1,000 bills 67 miles

NOW YOU have to admit that is pretty graphic. And it may be helpful in following the debate to see things in such terms. But the real question is,

where does he get those figures? There seem to be only two possible answers, neither very reassuring. One possibility, obviously, is that the Leader of the Free World is culling figures from the filler items of Reader's Digest. But no president deserves to be accused of that, particularly during what is supposed to be the honeymoon period.

So the only option is to conclude that

"A trillion dollars would be a stack of \$1,000 bills 67 miles high.

Germond & Witcover

somewhere in the bowels of the White House, probably down in the basement. there is a Special Assistant for Vivid Images, who is probably a Republican gnome wearing a green eyeshade and hunched over a desk with a calculator and a book of statistics.

EVERY SO often he gets a call from Ed Meese, who tells him, for example, "The boss needs to dramatize the recipients were laid head to toe, how far would they stretch?' Then the memo comes back: "If

they're of average length, from Boston Or David Stockman calls to ask, "If all the people complaining about the budget cuts were stacked up like

cordwood, how big a stack would there be?" The computer whirs and replies: "Bigger than the World Trade Center. Or the secretary of the treasury wants to know, "If all the people fudging on their income tax returns were gathered together, how big a crowd would that be?" The computer goes

whiz and replies: "Big enough to fill Yankee Stadium at least 14 times. The possibilities are obviously en-

REAGAN HAS always liked this kind of thing. As a candidate he used to talk about how all the paperwork prepared by the federal bureaucracy in a single year "would cover the District of Columbia from border to border in 25 layers of paper." He would then add, "Maybe that wouldn't be such a bad idea," and, predictably, the folks would cheer.

Indeed, candidate Reagan had a lot of those, although some of them were less precise. For example: "If all the fat in the federal budget was rendered into soap, you could wash the world."

There is a lot of literary precedent for this type of thing. In "The Outline of History," for example, H.G. Wells described one dimension of the un-

welfare burden. If all the welfare iverse in these terms: "If a bullet fired from a Maxim gun kept its muzzle velocity unimpaired, it would take seven years to reach the sun.

Now that is something to think about THE TROUBLE with this business,

once the president gets involved, is that everyone feels obliged to get into the act. The other night United Press International figured out that a trilliondollar stack of \$1,000 bills would only be 63.1 miles high. UPI was obviously packing those bills tighter than Reagan. Quibble, quibble.

And as for the length of that employ ment line, we figured out it really depends on whether you start in Portland or Bar Harbor and whether you only go as far west as Riverside or all the way to Long Beach.

THEN YOU'VE also got to consider the thickness of the people. Since they're unemployed, they're probably thinner than the average, right? On the other hand, a lot of them are manual workers and they tend to be bigger than average. And another thing: When the line gets to the Rockies, do you cover them or go around them? That makes a difference, you know, and you can't have the president of the U.S. of A. passing on burn statistics,

It's not simple to come up with those figures - unless, of course, you have a gnome with a computer in the basement of the White House.

Reagan, Thatcher talk economics

By Dean Reynolds

WASHINGTON - British Prime Minister Margaret Thatcher and President Reagan, kindred political souls dedicated to the same economic philosophy, resolved Thursday to maintain close ties as they seek to promote world freedom.

The two leaders sounded similarly optimistic and friendly notes in remarks at the start and conclusion of two hours of White House discussions on the world economy, Middle East oil, Soviet expansionism, Central and uth America and Africa.

Later in the day, before a state diner in her honor at the White House, Thatcher met with senior members of both houses of Congress and told them the Western allies must fight hostile forces together.

"ONE HEARS the predictions of doom and gloom everywhere. We have the resources to overcome them," she said. "We have great faith in the

The battle between freedom and communism "is a battle for men's minds, as well," she said. "We are faced with hostilities and subversion. We will have to consider together how to fight that battle."

At the White House, the prime minister acknowledged the free world has "enormous problems ... there have always been enormous problems."

"But I believe together we have the capacity to solve some of them, and those which we do not solve I believe we can improve so that we can set them on their way to a solution in the

STANDARY FOR THE WAR AND THE STANDARY CONTROL OF THE STANDARY

To expand freedom, she said, the Western democracies must "resolve to prevail against those who deny our ideals and threaten our way of life."

REAGAN SAID. "The responsibility for freedom is ours to share.'

As she looked out on a tri-colored sea of miniature Union Jacks raised by about 400 observers on the South Lawn, Thatcher said her message to the president "is that we in Britain stand

"When you look for friends, we will be there," she pledged

The Reagan-Thatcher talks also dealt with the Western industrial democracies' upcoming July economic summit in Ottawa. White House press secretary Jim Brady said an unspecified "potential" future summit in Mexico presumably to deal with North-South relations was also discussed.

The two leaders met alone for 30 minutes and then joined British Foreign Secretary Lord Carrington and Secretary of State Alexander Haig for expanded talks.

"I REALLY regard it as the beginning of a process of consultation," Thatcher said as she and Reagan par-Thatcher and Reagan are staunch

conservative advocates of free enterprise. The British economy, however, is in considerably worse condition than the American.

Critics charge that Reagan's devotion to supply-side economic theories favored by his guest will doom the U.S. economy to the same slump that has gripped Britian during the two-year

Prime Minister Margaret Thatcher, the first major Allied leader to visit President Reagan, stands with Reagan during welcoming ceremonies.

Ray: 8 percent pay raise for state workers is realistic

By Tamara Henry

DES MOINES - With the current condition of state revenues, an 8 percent annual pay raise for unionized state employees is more realistic than the increase of 21 percent over two years sought by workers, Gov. Robert Ray said Thursday.

Ray emphasized that higher salaries would be considered only if there are significant improvements in the economy.

On Monday, an arbitrator sided with the state's final offer to unionized employees, saying workers should receive a 16 percent pay increase over the

Ray, who was attending the National Governor's Conference in Washington when the ruling was made, said the decision by Robert Mueller, a Madison, Wis., labor lawyer, was a relief.

"We're pleased," he said. "We think it can be financed. That was a great worry of ours."

OFFICIALS OF the American Federation of State. County and Municipal Employees sought the 21 percent increase for its 13,500 state employee members. Ray reminded reporters Iowa faces a zero balance at the end of the fiscal year - June 30 - and

balance" before he considers granting additional pay

Pay raises for judges, who have complained recently that low state pay forces them back into private practice, probably would be about 8 percent, Ray

"They will share in the increases to the same extent as others," he said. "We can do only what we can afford to do.'

Despite the drawback of low pay, Ray said, there are many rewards of working for the state. "We have good working hours," he quipped, seriously adding that most employees get "great satisfaction in being public servants.'

ON ANOTHER subject, Ray agreed there should be more "coordination and cooperation" between correctional officials, the state Board of Parole and the state Department of Social Services. But he said

of changing the parole system. "You just can't push a computer button and up ops the name of a person who must go out," Ray said. "There must be human evaluation too. We think there should be an evaluation of these people

the short time they live in Iowa City.

By Scipio Thomas

The Iowa City Police Department arrested seven more people for vandalism last month than in January 1980, crime statistics show.

The department reported 11 vandalismrelated arrests in January 1981, compared to four such arrests in January 1980. And the number of reported vandalism incidents increased 4.5 percent. Police received 111 vandalism complaints last month compared with 106 in January 1980.

Iowa City Police Chief Harvey Miller said he did not know why vandalism complaints increased last month, and offered no hope of reducing vandalism in the future.

"VANDALISM IS a random act and obviously we can't predict beforehand where it will happen," Miller said.

Jim Swain, director of United Action for Youth and a member of the Iowa City-Coralville Vandalism Prevention Committee, said if vandalism cannot be stopped, it could be reduced.

Nader endorses PIRG funding plan

The negative check-off funding plan is a "hyperdemocratic system," consumer advocate Ralph Nader said Thursday.

The system is democratic because it gives students a "second chance" to ask for their money back, said Nader, who spoke at the UI as part of National Engineers' week.

Under the negative check-off plan proposed by the UI chapter of the Iowa Public Interest Research Group, students would mark a box on a fee card if they do not want to contribute \$3 to Iowa PIRG. Iowa PIRG members say the \$3 would be refundable at any time during the semester.

Nader, who founded the PIRG organization, said that there are two ways to fund student groups in the United States. One plan calls for trustees of universities to allocate the fees, with little student input. The other, the negative check-off, calls for a referendum or petition drive for support and allows students

to have money refunded, he said. "After the majority wins, the winners turn around and give the losers a second chance," he said.

Senate

said. Hagemann said he would favor the Iowa PIRG proposal Although senators opposing the

negative check-off system suggested the debate, no group accepted responsibilty for organizing the event. '(Iowa) PIRG should sponsor it to

keep the issue open," Schur said.

IOWA PIRG Assistant Director Marty Hopkinson said the consumer advocate group "will love to do the debate anytime." But she said she expects the senate to organize the debate.

In other action, the senate voted to protest a plan by UI administrators to take over the role of the Student Commission On Programming and Entertainment.

Senate Vice President Kathy Tobin

said she has heard "via the grapevine that the administration realizes there's money to be made on programming

> not a problem likely to go away," Hanson said. If trends in social drinking continue, the number of younger women in fetal alcohol cases may rise. He said several states are alerting school-age girls to the seriousness of consuming alcohol during pregnancy.

'The Public Health Service has targeted fetal alcohol a symbolic issue for needed change in our lifestyle,"

Creekside residents put in pitch to receive funds for flood control

By Theresa Bries Staff Writer

Creekside area residents told members of the Iowa City Committee on Community Needs and city planners Thursday that Ralston Creek flooding affects homes in their southeastern Iowa City neighborhood.

About 20 people from the Creekside neighborhood - one of two areas that may receive federal community development block grant funds — outlined how the federal funds should be used to improve their neighborhood.

The Creekside neighborhood is boarded by Grant Street on the west, Rock Island Railroad tracks on the south, First Avenue and the eastern side of the Towncrest Mobile Home Court on the east, and Friendship Street and Muscatine Avenue on the

Leta Seaton, 523 Grant St., said that sewers in the area back up when rain causes water in the creek to rise. The committee should spend the block grant funds to address "a really big problem," instead of many small ones, Seaton said. "Flood control and

Blandell Cummings prepares for her performance Cummings has been called "one of the most "The Ladies and Me" in the Corroboree Gallery. "Vibrant stage presences in modern dance today."

Dancer Cummings combines video with movement, music

By Adelaide Mickel Special to the Daily Iowan

Dancer-performer Blandell Cummings presents "The Ladies and Me" tonight in the Corroboree Gallery of New Concepts, the final event of her week-long residency in the UI School of Art and Art

Called by one New York critic "one of the most vibrant stage presences in modern dance today," Cummings goes beyond specific dance design to create what she calls "physical theater." Her work developed from a catholic perspective and a multimedia approach that incorporates literature, photography and video with movement and music.

Cummings studied modern dance at the Martha Graham School and with Thelma Hill. She worked for several years with avant-garde choreographer Meredith Monk and has studied acting and video production.

"THE LADIES AND ME" is a series of short dance pieces performed to the music of black women vocalists, including blues by Billie Holiday and the gospel songs of Sister Rosetta Tharpe. In these dances, Cummings combines music, movement and photography to enact a "visual diary" or journey. It is a personal journey, to some degree autobiographical: The ordinary experiences it celebrates are drawn primarily from the ex-

Dance

periences of Cummings and her mother. Each dance interpretation is different, some focusing on the lyrics, others on the character of the sound or the rhythmic framework.

First performed in Hong Kong in 1979, "The Ladies and Me" is constantly being revised. The element of change is an ongong refinement essential to Cummings' artistic process. "Process" is the most important part of her work; it transcends the individual performances or the quality of separate elements, opening the work to new experiences and new vitality. Her pieces constantly regenerate; they are, literally, never-ending.

HER PROCESS starts with the careful selection of a subject. Then she researches it, collecting impressions through interviews, workshops and conversations. Next comes the formative or integrative stage, which Cummings calls a "recycling experience." She limits and structures her material by 'personal living of it on both the conscious and unconscious levels." Quantities of material are distilled, focused and crystalized by this process of personalization. Her ultimate goal is to personalize the universal and universalize the personal.

"The Ladies and Me" is at 8 tonight.

Guest string players inspire fine, thoughtful performance

By Judith Green Arts/Entertainment Editor

The contributions of two guests on the Stradivari Quartet's Wednesday evening concert pushed the group from its usual competent professionalism to one of its finest performances in years.

The presence of two-thirds of Grinnell College's Mirecourt Trio - Ken Goldsmith, violin, making his performance debut as a violist, and cellist Terry King - also enabled a full and appreciative house to hear two major string ensemble works: Beethoven's string quintet and the second of Brahms' string sex-

The two pieces are related in more ways than their common requirement, an augmented complement of string players. Each stands on the threshold of its composer's movement into a new style: in Beethoven's case, to the complete assimilation and transformation of classical materials that occurred in his middle period; in Brahms', from the passionate emotional extremes of the early musical outpourings to the restraint and reticence of the

THE QUINTET is an oddly divided work, its first two movements quite Mozartean and its latter two clearly pointing to the mystical Beethoven of the late quartets. Despite its unusually dark resonance, a result of its doubled viola scoring, the work is thoughtful rather than melancholy; no trouble tints its overall serenity.

Footnotes

One could dispute some of the tempos in this performance - a hurried development in the first movement, an aggressive episode in the slow movement that eroded its "molto espressivo" indication - but in general the quintet was played with a warm appreciation for its compositional strengths and ten-

Brahms' second sextet is in G major, a key that seems to bring out a refreshing combination of innocence and restraint in composers from Beethoven through Berlioz to Brahms and Dvorak. This work, for all the richness of its instrumentation, maintains a lovely transparency of texture, from its muted, resigned opening to its lilting finale (the composer in a rare moment of light-heartedness). The opening of the scherzo is particularly haunting, dividing two melodic lines among three instruments for a uniquely dark yet clean sonority.

Tempos, again, needed some attention. The first two movements took their "non troppo" instructions too seriously, and the heavy center of the Poco Adagio was a blot on an otherwise lovely movement. But such small lapses really did not detract from an otherwise beautiful performance.

The best news has been saved for last: Goldsmith and King will return to play the Brahms B-flat sextet with the Stradivari on its April 22 concert.

Guitarist Keaggy to perform at UI

A few years back, there was a band called Glass Harp that put out an album, Synergy, featuring hot young guitarist Phil Keaggy. Synergy was slick space-rock, much like that of Nektar or Genesis.

Rumor had it that Keaggy had been called the young rock guitarist to watch by Jimi Hendrix, god of heavy metal. He had all the promise and critical raves and was standing outside the big time with the key in his hand.

Stardom did not, evidently, take well with Keaggy; he stopped recording. When he resurfaced, he was a born-again Christian headed for the small time and loving every minute of it.

Religious music, particularly the Jesus-freak, rock-for-God movement of the early '70s, tends to be one-dimensional. None of it garnered much critical or commercial success, nor did it convert many people to the ways of the Lord. The records were bought and sold only by those already converted, and no one

outside the inner circle paid much notice. Keaggy may change all that. He's openly religious, sure, but he doesn't push it; he revels in it. He plays the guitar as well as he ever did, and ultimately that's what people go to see. That's also what they remember when they leave.

Keaggy is playing at 8 tonight in Macbride.

-T. Johnson

Ex-Beatle Harrison loses lawsuit

(UPI) - Former Beatle George Harrison has been ordered to pay \$587,000 in damages for copyright in-fringement with his hit song "My Sweet Lord," it was disclosed Thursday

U.S. District Court Judge Richard Owen ruled in 1976 that Harrison had "subconsciously" plagiarized

the 1962 John Mack tune "He's So Fine" for Harrison's 1970 hit record, "My Sweet Lord."

Soon after that ruling, Bright Tunes Music Corporation, the original plaintiff, sold its rights to ABKCO, owned by Allen Klein — Harrison's agent in

U.S. role in El Salvador demonstrated in slide show

The Catholic archbishop of a small Latin American country is assassinated at the altar. The common people, for whose rights he had spoken out, line the streets in mourning. From the presidential palace, a bomb is thrown into the crowd; sharpshooters fire at the unarmed civilians. The people take refuge in a cathedral, trampling others as they flee to safety. When the destruction is over, the government plays Beethoven's "Ode to Joy" as an all-clear signal, and photographs of bloody, mutilated bodies flash on the screen in time to the

This is not the 1981 version of Stanley Kubrick's A Clockwork Orange. This is real life in El Salvador

THE SCENE is from a slide show called El Salvador: A Country in Crisis, created by Overview Latin America to promote a moratorium on U.S. military assistance to the Salvadoran government. It is an informative and emotional look at the state of affairs in El Salvador, especially in terms of American involvement.

Everything from the Monroe Doctrine to Ronald Reagan's policies is mentioned in this 28-minute show. The majority of the slides, however, concerns the life of El Salvador's five million inhabitants and at the door.

Feminist author to lecture at Cornell

A lecture this Saturday by author and black feminist Michelle Wallace will be part of Cornell College's Black Awareness Month weekend ac-

Wallace has focused on the need for a strong black feminist movement in articles in Esquire, Newsweek and Ms. magazines, and in the book Black Macho and the Myth of the Superwoman.

Wallace, a graduate of the City College of New York, was formerly a researcher at Newsweek magazine and an English and journalism teacher at New York University. She is currently working on a book about three generations of her family in

how American foreign policy has contributed to their

plight. A feudal land system, a repressive ruling

military junta, poor working conditions and low

wages are a few of the problems on which the show

Among the slides are photographs of left-wing paramilitary units and the El Salvadoran army. The

differences between the two are striking: The leftists are poorly uniformed and ill-equipped; the regular army units carry automatic weapons and

The show makes no claims to being an objective

documentary. It is clearly a propaganda piece on the situation in El Salvador. Its presentation in Iowa

City cannot be more timely: On Feb. 26 the Chicago Tribune reported more than 12,000 Salvadorans

killed since the beginning of 1981 - more than 180

El Salvador: A Country in Crisis is sponsored by the local chapter of the El Salvador Solidarity Com-

mittee. It is showing at 6 p.m. Sunday, March 1, at

Old Brick. Tickets may be purchased in advance for

\$1.50 at the Activities Center in the Union or for \$2.00

Her lecture is at 8 p.m. at Cornell's Armstrong Theater. It is free and open to the public

Marquee movies offer concentrated bad taste

By Roxanne T. Mueller

The come-on to Marquee's weekend of movies is "sex, drugs and rock 'n' roll," With movies as bizarre as Pink Flamingos and 200 Motels, bad taste uld fit in as well, but it is concentrated bad taste

"We figured we're getting out of here, so what the hell?" Marquee

ember John Ramlochand said. Marquee is an ad hoc committee that provides an alternative to Bijou's more commercially-oriented film fare, and many of its dozen or so members are graduate film students like Ramlochand

Presenting a weekend of avantgarde, erotically-shaded movies is a safe bet, Ramlochand said: "We wanted to put something on (that) wouldn't lose money. They're the kinds of films we've always wanted to see."

PINK FLAMINGOS is a 1971 cult film by John Waters that is selfdescribed as having "something to offend everyone." It features a 325-pound woman named Divine who fancies herself a sex object and is showing at 11

tonight and 9 p.m. Saturday. 200 Motels is rocker Frank Zappa's contribution to cinema. A kind of home movie for (and by) rock musicians, the 1971 film features Ringo Starr, Keith Moon as a nun and Zappa's own group, the Mothers of Invention. It shows at 11

p.m. Saturday and 9 p.m. Sunday. "Graphic" is a good word to describe the 10 "erotic shorts" on the Marquee program. It's up to the viewer to

Films

decide whether a 1948 stag movie with Marilyn Monroe or a story about two bananas is pornographic or simply childish. These will be shown at 7 p.m. tonight and Saturday.

RALPH BAKSHI is credited with introducing X-rated animated films (Heavy Traffic, Fritz the Cat) to the masses, but a series of 13 films from the New Cinema Animation Festival proves he's hardly alone in the field. The festival promises everything from 'stylization to pixillation' and will show at 7 p.m. Sunday.

The last offering, Soul to Soul, is tame by comparison and promises soul fans a piece of heaven. It is a concert film, featuring Ike and Tina Turner, Willie Bobo, Wilson Pickett, Santana, Eddie Harris, Roberta Flack and more. It will be shown at 9 tonight.

Ramlochand doesn't view the erotic flavor of the weekend as anything to worry about, despite recent protests directed at Bijou and its attempts to bring in movies like Dressed to Kill.

"We don't anticipate any protests," he said. "You might say the program is political by suggestion, a reaction against the whole Reagan thing and the Moral Majority. There's nothing in these movies that's particularly offensive to specific minorities. We picked what we thought a college crowd would

All films will be shown in the Illinois

Coe College in Cedar Rapids March 13 and 14. The

tournament is open to any 19 and older who was not a

member of a collegiate wrestling team during the

1980-81 season. The tourney will be double elimina-

tion with high school rules used. For more informa-

Old-timers to show stuff

lowa's Mary Knoblauch sprints during a women's track team practice at the Recreation Building.

As soon as walk-on athletes prove their capabilities, life doesn't necessarily become easier. Mary Knoblauch can tell you that from personal experience.

The sophomore from Ft. Dodge. Iowa, has had stiff competition since she decided to prove to the members and coaches of the Iowa women's track team she could indeed become a significant contributor.

When Merlene Ottey broke the world record in the 300 last year, I ran in that same race," Knoblauch said "And when she broke it again this year at the Husker Invitational, I was competing in that race, also."

TO WATCH KNOBLAUCH practice speed work and condition daily, there is no doubt why Coach Jerry Hassard describes her as not running, but "attacking a race.'

"She is very talented for a walk-on, and we're very lucky to have her," Hassard said. "The 300 is a perfect event for her, because she seems to have a 'sixth sense' about running this

"She has an ability to bring the team together because of her good nature, charisma, and spirited attitude. This is what excites people about Mary."

And Knoblauch is equally excited

about the Iowa women's track

'Traveling around and seeing places like Florida, Arizona and Tennessee is one of the great things that Iowa track has offered me," Knoblauch said. "Once it starts to become a job, then it's time to get out. But so far it's helping me get out my frustrations and I'm having a great time.'

THERE IS A theory that pain and injury are two separate entities. You can play with pain, but injury is not something to be taken lightly. Knoblauch doesn't subscribe to that school of thought.
"I had a stress fracture last year as a

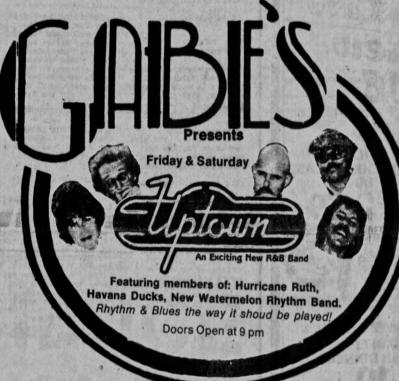

freshman, and (Iowa trainer) John Crowe told me not to run on it," she recalled. "I went ahead and ran anyway because we wanted to qualify so much for the 880 relay at nationals. We did finally qualify, and I guess my biggest goal this year is to stay healthy for the outdoor season."

Knoblauch certainly kept busy at Nebraska's Husker Invitational earlier this season. She competed in the 300meter run and then joined Colleen Gaupp, Kelly Owens and Cristy Dickerson in the 880 relay.

The Iowa quartet edged Drake for first, winning in one minute, 42.53 seconds. The Bulldog foursome finished in 1:42.89. The Hawks received gold watches, but missed qualifying for the Association for Intercollegiate Athletics for Women national indoor meet by just three-tenths of a second.

"AFTER THE RACE," Knoblauch said, "one of the Drake runners yelled to me, 'You might have beaten us this time, but we'll get you back at the Drake Relays.' But the joke is on Drake. There's no such event as the women's 880 relay at the Drake

That Drake runner also overlooked another fact. The Bulldogs have to contend with Iowa Saturday at the Recreation Building, taking part in the Hawk Indoor Relays. Northern Iowa. Northeast Missouri and Black Hawk College will also compete. Field events begin at noon while running events start at 12:30 p.m.

the Hawkeyes' home track meet Saturday at the Recreation Building.

with jumping talents

By Lisa Lamborn

Mike Lacy, triple jumper par excellence for the Iowa men's track

team, doesn't even hold his high school

record in the event. But last Saturday he hopped, skipped and jumped his way

to a new Iowa standard of 48-foot-21/2,

surpassing the old mark by nearly two

"I was amazed," Lacy said. "I was

He said the Iowa record is lower than

the marks at most colleges. Lacy at-

tributed this to the fact Iowa doesn't

have the triple jump in high school

competition. Assistant Coach Les

Stevens agreed, "That's a big handicap

LUCKILY FOR THE Iowa team,

other states do have the triple jump in

high school, Lacy attended Knoxville

High School in Illinois, where his name

graces school records in the high jump,

the 440-yard dash, the mile relay and

the 880 relay. As a senior, he finished

fourth in the high jump and was part of

the fourth-place 880 relay at the Illinois

Not bad for a small-town track star.

"Mike had a little experience, but

But where does the triple jump fit in?

really didn't specialize," Stevens said.

"The triple jump is a very demanding

event. It takes a lot out of the legs."

Larry Ragsdale, Lacy's high school coach, was reluctant to let Lacy triple

jump as the event is hard on the knees.

By the time Lacy graduated, he had

high jumped 6-10 and triple jumped more than 44-0. These statistics, plus

his running accomplishments, had

many smaller colleges looking twice at

Michigan's Paul Heuerman (15) dives for a loose ball in Thursday night's game against lows at the Field House.

Hawks 'wolf' down Michigan, 69-66

Even the usually cool Lute Olson had to wipe the perspiration from his brow at the conclusion of Thursday night's

The Hawks managed a 69-66 victory over Michigan, but it took the combined free-throw efforts of Vince Brookins and Kenny Arnold in the last seconds to seal the win.

Brookins was fouled by M.C. Burton with 36 seconds left, and calmly sank two free throws. Michigan's John Johnson then fouled Arnold, allowing the Iowa point guard to duplicate Brookins' act with 11 seconds to go.

THE HAWKS led by as much as seven points in the first half and nine in the second. But an inspired Michigan team refused to call uncle, coming within one with less than :47 left.

Mike McGee played a major role in the Wolverines' persistent rallies. The All-American candidate made eight straight baskets in the second half, finishing with a game-high of 29 points.

"McGee's the kind of guy, once he gets hot, who will make his shot from anywhere in the Field House," Olson praised. "We had someone right there in his jersey all night and he still kept on scoring.

The minute McGee began his scoring binge, Iowa's Kevin Boyle was quickly assigned defensive duties of the Michigan senior.

Iowa's Brookins proved, however, his honor as Big Ten player of the week was no mistake. He had a five-basket streak at one point, topping the Hawks with 21 points.

OLSON, WHO earned his fourth 20-

n season in five years Thursday Arnold assured. "We have to be ready night, was still nervously chewing on his gum 15 minutes after the final buz-

"This is exactly the reason why I say the season is not over yet," he said. 'Everyone's so concerned about what NCAA region we'll be and acting like the Big Ten title is locked up. Our guys have been reading it and hearing it long enough, that they're believing it. "We just didn't play with emotion

tonight. We didn't have a sustained ef-

"Michigan played us very tough and if anyone thinks it'll be any different the next three ballgames, they're

Arnold agreed with Olson: "We only put out 75 percent tonight. We weren't into the game tonight'

Michigan Coach Bill Frieder looked bluer than his team's uniforms, dismayed at his team's fifth straight loss.

WE OUTREBOUNDED them (31-28), had a good shooting percentage (52.1), didn't miss from the line — I don't know what to say. We lost the damn game," Frieder lamented.

"I'm not making any excuses. I'm not putting any blame on our kids. They played a tough game and they deserved to win, but Iowa beat us. "I think Iowa is one of the top five

teams in the nation. I said today Iowa would win the title. I was even willing to take bets on that."

The win, Iowa's seventh straight, protected the Hawks' elite spot at the Big Ten pinnacle for at least another day. The Hawks play host to Wisconsin at 3:05 p.m. Saturday in the season finale at home.

"We'll shake tonight's game off,"

for Wisconsin, because they're going to come in here with nothing to lose Beating us would make their whole

Wrestlers seek 8th league crown

By Jay Christensen

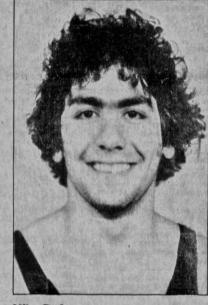

The Iowa wrestling team, ranked once again top in the nation, will be shooting for its eighth straight Big Ten title Sunday and Monday in Madison,

The Hawkeyes, who have a 21-1 to dominate this tournament that Iowa could capture individual titles at every

"It's possible," Iowa Head Coach Dan Gable said. "The toughest weights for us will be at 126, 158 and Heavyweight."

GABLE HAS publicly said the Hawks will take the meet "in stride" after reaching emotional peaks in recent duals against Oklahoma and Iowa The squad is aiming its energies

toward the national tournament March 12 to 14 at Princeton, N.J. Oklahoma and Iowa State, who have been the Hawks' biggest foes all year, will also be present at the Ivy League school. But to qualify for the national tourna-

ment requires the wrestler to place in the top four of his weight class at the

"I think we'll have the best guys there at the tournament," Gable said.

wrestle well. I'll be disapointed if we don't qualify all 10 wrestlers for the

Returning to the Iowa line-up for the league meet will be two-time national champion Randy Lewis. He severely dislocated his left elbow in January For some time it was believed Lewis season. But he has made a remarkable recovery in less than seven weeks.

"I DON'T think the doctors would have given him the okay to wrestle if he wasn't all right," Gable said.

Lewis' return to the line-up forced a wrestle-off between Tim Riley and Mark Trizzino at 126 pounds. Riley won the final tryout Wednesday and will be Iowa's representative.

The other change in the Iowa line-up is at 158 pounds. Freshman Jim Zalesky, who is 16-2 this season, will replace King Mueller who refused a wrestle-off for the position.

Mike DeAnna at 167 and Lenny Zalesky at 142 lead Iowa in victories this season, each having 29. The team leader in falls is 177-pounder Ed

Freshman Barry Davis has come on strong lately, boasting a 28-4 mark at 118. On the other end of the line-up is heavyweight Lou Banach. He is 18-4 this season and has pinned his last three opponents.

IOWA'S ENTRY at 150 will be senior pion at 142 pounds in 1979. Pete Bush, the team's 190-pounder, is 25-5-1. Lewis and DeAnna will seek their

fourth conference crowns. Only four wrestlers have ever won four Big Ten "The kids have been working hard to

keep in shape wind-wise," Gable said. 'We're aiming for the nationals, but the Big Tens can help us reaffirm where we're at." Iowa City's KKRQ-FM will broadcast all Iowa matches. KRNA-FM will

also have sporadic reports during the

two-day event. Preliminaries and quarterfinals begin at 1 p.m. Sunday. Semifinals and wrestlebacks start at 7 p.m. Sunday. Consolations and finals start at 7 p.m.

lowa swimmers in Big Ten cellar

By Steve Batterson

It was a "so-so" day for the Iowa women's swimming and diving team at the Big Ten cham-

The Hawkeyes were in last place following the first day of competition with 74 points. As expected, Michigan and Indiana led the race, ending the day with 336 and 304, respectively. Ohio State was a distant third with

Iowa Women's Swimming Coach Deborah Woodside said the meet is "just as tough as I expected it. The top heats are a lot tougher than last year's meet."

FOR THE HAWKS, Denette King set a new Iowa record and her own lifetime best, swimming the 500-yard freestyle in four

minutes, 58.42 seconds. The time came in the consolation heat.

Michelle Thomas' 2:25.88 time in the 200 breaststroke saw another Iowa mark fall Thursday. She finished fifth in the that were real close (in the race) and it could have gone to anyone of five of them," Woodside said.

Perhaps the most disappointing part of the day was the performance of Ann Bowers in the one-meter diving competition. Bowers, who qualified for Association for Intercollegiate Athletics for Women nationals in the event, hit her hand on the board and failed to place in the

NANCY VACCARO had her best time of the year, finishing fourth in the 50 butterfly at
