Hurricane's wake

A slight, appropriately named Hurricane, from and deadly assault of robust waves during a beachfront that itLake Michigan Sunday and continued Monday. Winds climbed at 20 miles per hour were swept away up to eight feet.

Financial aid cuts criticized in D.C.

Westminster, Colo. (AP) — Proposed administration cuts in student aid would devastate a large portion of the middle-class innovation students from the programs and reduce the aid available to lower-income students, college presidents said today.

The proposed cuts, which would result in 2,000 state residents receiving only a small amount of support from the federal government, would cause major reductions in the amount of aid available to students. The assistance is proposed in specific recognition of the federal government's role in helping students attend college, according to the presidents.

President John Dinner, representing all educational institutions, said, "It is a matter of unclear importance, and the proposed cuts would result in a substantial reduction in the amount of aid available to students.

Another official said the proposed cuts would result in a substantial reduction in the amount of aid available to students.

The Iowa Abortion Rights Action League shift to statewide focus

By Jeffery Riehle

The Iowa Abortion Rights Action League has decided to closen the regional offices and shift its focus to a statewide organization, which can be proposed to support preventive legislation.

Karen Kager, the Des Moines-based league's executive director, said: "We can make a bigger impact with statewide efforts."

The league will now form choosing candidates to support in the 1984 state election in an effort to make the group more politically active.

Jan Schieffer, former executive director of IARAL, said: "We are not against candidates, but we are working for them. We are not targeting for a defeat.

Pam Douglas, office assistant for the National Abortion Rights Action League in Washington D.C., said there are 80 state chapters that are working to keep the league alive.

IARAL, which began as an organization in 1971, has approximately 80,000 members. Douglas said: "Completely opposite people are joining in great numbers because of the election. People become more aware and start asking questions."

Kager said last fall's election, which saw many pro-choice candidates defeated, was sensational. "Our candidates at the state level were great assets in the campaign. People focused on that and it is not always remembered that we had candidates who were successful,"

Kager said about 40 percent of the population is pro-choice, but there's a political action."

She said IARAL is not trying to sway people in the pro-choice philosophy because a majority are already pro-choice. "We are trying to get them to believe that we are not going to work for pro-choice people and vice versa."

KAPLAN said IARAL, which was formed in January 1971, has grown to 20 offices in a dozen states. Kaplan said: "We are not going to work for pro-choice people and vice versa."

IARAL is funded by contributions, grants from foundations, a $50 to $100 charged each member and fund raising feasibility, Kaplan said.

The Abortion Rights Action League was organized at the UI last year, but it dissolved after the election because people were "burned out," said Carmen Jacobson, director. Approximately 35 to 40 members are working to re-establish the student organization.

"We need to see a nationwide movement in the future for service organizations," said Jacobson. "We will do our best to work in the pro-choice movement.

"The only way to stop any legislation is in political action," Adams said. "We will do our best to work in the pro-choice movement.

We want to get the pro-choice involved and support us."

Kager said "realistically the issue is an issue that has been around for so long."

"We have an unknown impact, an impact," Adams said.

"The issue is very sensitive and that the negative choice side is in the verge of eliminating people things," Adams said. People are getting more interested and more active.

"There has been a lot of interest in the issue of abortion, and that's a good thing."

"There will be a lot of interest in it until it's been in personal form and out of politics."
UI worker safety

Resolution of several minor issues in the UI Chemistry-Biology Building once used to store hazardous chemicals was stopped recently. The safety officer complaints that staff are the oldest employees and are not exposed to the dangers posed by hazardous chemicals. To reduce the danger, the older workers are being reassigned to less hazardous duties.

The UI Environmental Health Service stored hazardous chemicals in the building until July 1981. The Physical Plant staff was not warned of the potential danger until several employees complained. The staff was not warned of the danger until the end of the semester, when questions about the effectiveness of the safety officers raised concerns.

Paul Korb, the chemistry's temporary assistant, said that the SPOT form offered students "a cure to these questions." The committee recommended that the UI Environmental Health Service's staff be warned before the Physical Plant staff warned the workers about the dangers.

UI is working to prevent further problems by contacting hazardous chemicals. This incident serves as a lesson that any hazardous chemicals should be closely monitored to avoid further problems.

Jeff Barsa

Teacher evaluations

A recent review of the UI Evaluation and Examination Service produced a report on teacher evaluations. The report concluded that the service questions are too general and should be supplemented with more specific questions.

The report stated that the service questions are too general and should be improved by supplementing them with more specific questions. The report stated that the service questions are too general and should be supplemented with more specific questions.

Randy Schofield

The budget battle

When the House passed President Reagan's non-binding budget plan last week, it also forced the Senate to vote. The proposal included provisions to allow a student to take only practical electives. This proposal was defeated by a vote of 14-13.

The Senate voted to defeat the proposal, which would have allowed a student to take only practical electives. This proposal was defeated by a vote of 14-13.

Linda Schuppaner

Human life legislation endangers basic rights of men and women

By Pauline Kint

"Should the proposed human life statute become law, it will have devastating and far-reaching effects not only on the freedom of women to choose abortion, but on the chosen women and men who may have in the area of birth-control and methods and sexual lifestyles, as well as on their right to their own personal, moral and religious beliefs in these matters."

Should these options be removed from the list of "non-essential" courses? are not only a valid alternative, but are not only a valid alternative, but are not only a valid alternative.

The question is whether a student who is not a citizen of the United States should be allowed to make decisions about his or her own body. This is a fundamental question that should be decided by the student and not by the government.

The president's position is that all human life is entitled to protection. The question is whether a student who is not a citizen of the United States should be allowed to make decisions about his or her own body. This is a fundamental question that should be decided by the student and not by the government.

By Gary Trudeau

Guest opinion

On April 11, the congressional sub-committee on the proposed human life statute heard testimony. It was pointed out that abortion is legal in most states. This is a fundamental question that should be decided by the student and not by the government.

The question is whether a student who is not a citizen of the United States should be allowed to make decisions about his or her own body. This is a fundamental question that should be decided by the student and not by the government.

**Letters**

**To the editor:**

I am writing in reference to an article that appeared in the Des Moines Register on March 18. The article deals with the question of funding for Central America.

The author of the article, Dr. Larry J. Crabb, suggests that Central America is in need of more funds due to the recent conflict in the region. However, I believe that this is a shortsighted view.

As someone who has worked closely with Central American communities, I can attest to the fact that the people there are not seeking more aid. They are simply trying to make ends meet in the face of economic hardship.

I urge readers to consider the fact that Central America is not a wealthy region, and that the people there are not looking for more handouts. Instead, they are working hard to rebuild their communities and support their families.

Sincerely yours,

[Name]

**Soul Search**

In reference to a news article appearing in the Des Moines Register on March 18, I was interested to learn that the policy has not been consistent in the past.

The article states that there has been a lack of accountability in the past, and that the current administration is committed to change.

I believe that this is an important step forward, and that it is crucial that we continue to hold our leaders accountable.

Sincerely yours,

Couple charged in neglect case

By Bob Franklin

As Iowa City's water was changed Monday with two months of "water quality of a minor effect," doctors and dentists wonder how they can provide the proper care to their young patients without a water source to provide medicinal care for their medicines.

Tests by doctors and dentists have shown a much higher level of tooth decay, association with the water plant. Variations from one day to another, and animal material sent into the river make their effectiveness more questionable.

More chlorine is used to bring the bacteria "electric shock." The Iowa is only about a yard away. The Iowa is only about 100 miles long, but its water is pumped into cement tanks past Iowa City in one day if the supplies are needed. The same is true of a similar event occurs in real life.

The more water the river contains, the more likely it is to carry bacteria. The Iowa is not considered a "clean" river, but it is a "clean" one in a small part of the state. In the western part of the state, the water is much cleaner, more sanitary.

Inside the city water plant, the water is put into a large area where bacteria and other microorganisms are removed. After all of the impurities are removed, the water is put into a series of tanks to take out any dirt or matter that might cause a disease.

The water becomes pure, it is put into the city plant, and then it is taken to the city's schools, hospitals, and homes.

The couple charged were given additional treatment for tetanus, and have been given two doses of tetanus toxoid. Their handling of the injured man is considered by some as an "experience in emergency treatment." They are being charged with a second-degree burglary for taking away a gas barrel owned by a Lone Tree, Iowa, man.

According to court records, Rodney Rogers was charged with a second-degree burglary for taking away a gas barrel owned by a Lone Tree, Iowa, man. Harlem dance group's second night exciting but unnecessarily flashy

By Judi Green

The Director of Harlem's second night of an exciting evening in its second year. The program opened several steps closer to the form of the first, with a full-length ballet, "Nordisk," dedicated to the composer of the first American work to be selected for the inaugural performance. The work was accomplished with a sense of majesty, with an orchestra, and the dancers achieved an electric pace. The work was a triumph in every sense, and the audience was left with a sense of awe.

In an interview following the performance, the Director expressed his delight with the results, and his high regard for the collaboration between the dance company and the music composer. He spoke of the need for more such collaborations, and of the potential for growth in the field of dance composition.

The audience was thrilled with the performance, and the Director was gratified by the response. He expressed hope for the future, and a belief in the transformative power of dance.
Looking at win/no-record maps it was
possible the most accurate way to
determine how well a particular team
has done but year and veteran are
adding even more detail to the mix. In

Game Five of ‘ugly’ NBA finals tonight

By Peter May
United Press International

BOSTON — Celtic Coach Bill Fitch isn’t declaring World War III but he is warning his teams that this game is a battle to the death... the outcome, he said, will hinge on one thing: which team can outplay the other.

Fitch said Monday in his major concern is the 51 points the Chicago Bulls scored in the fifth quarter of Game Four. "It’s the first time I have ever had to prepare for a game for the 51 points the Bulls scored in the fourth quarter. It’s a matter of something we have to take care of."

The Celtics, of course, are a team that has been through a lot, but they have not faced a team that has scored 51 points in the last 15 minutes. It was the biggest mismatch since Moses met Goliath, and here we are."

"This is David against Goliath, and we’re going to have to give them a taste of the medicine. We’re going to have to give them a taste of what we’ve been through."

Coach Bill Fitch on hi.

"They have a big son-of-a-guns coming over my back all the time. It’s hot enough to melt the sidewalk."

While the Celtics are hoping to win the championship series, they are not looking for a repeat of last year’s final. "They didn’t want to own us last year, but they are not going to own us this year," Fitch said.

"The Celtics’ defense is the key to this series. We have to stop them from scoring as many points as they did in the fourth quarter."

Boston is well-rested after the Boston Bruins’ seventh straight game on the road. "The Boston Bruins’ seventh straight game on the road is nice, but we have to be prepared for a tough game," Fitch said.

"It’s the first time I have ever had to prepare for a game for the 51 points the Bulls scored in the fourth quarter. It’s a matter of something we have to take care of."

The Celtics, of course, are a team that has been through a lot, but they have not faced a team that has scored 51 points in the last 15 minutes. It was the biggest mismatch since Moses met Goliath, and here we are."

"This is David against Goliath, and we’re going to have to give them a taste of the medicine. We’re going to have to give them a taste of what we’ve been through."

Coach Bill Fitch on hi.

"They have a big son-of-a-guns coming over my back all the time. It’s hot enough to melt the sidewalk."

While the Celtics are hoping to win the championship series, they are not looking for a repeat of last year’s final. "They didn’t want to own us last year, but they are not going to own us this year," Fitch said.

"The Celtics’ defense is the key to this series. We have to stop them from scoring as many points as they did in the fourth quarter."

Boston is well-rested after the Boston Bruins’ seventh straight game on the road. "The Boston Bruins’ seventh straight game on the road is nice, but we have to be prepared for a tough game," Fitch said.

"The Boston Bruins’ seventh straight game on the road is nice, but we have to be prepared for a tough game," Fitch said.
