Loss of future professors concerns UI

By Jerred Shear

There have been reports of an unusual number of professors leaving the UI campus this fall. The UI reports that there are currently 155 vacancies in the teaching areas, which is a significant increase from last year's 57 vacancies.

The losses are impacting the university's ability to attract and retain top-notch faculty members. The UI campus has been experiencing a decline in student enrollment, which has put pressure on the administration to cut costs and reduce the number of positions available.

This situation has led to a number of concerns among the UI faculty and students. Many are worried that the university is not doing enough to support its faculty members and ensure their success.

The UI administration has stated that they are working to address these issues and find ways to improve the working conditions for its faculty members. However, many are still concerned about the future of the university and the quality of education it provides.

Begin calls for Reagan to reject Saudi plan or face obstacle to Camp David peace effort

With the US-Saudi relations strained, some leaders are calling for President Reagan to reject the Saudi proposal for a peace plan in the Middle East.

In an interview with ABC's "Nightline," former US Secretary of State Henry Kissinger said that the US should reject the Saudi proposal because it is not a serious peace plan.

Kissinger said, "The Saudi plan is not a serious peace plan. It is not a plan that the US should consider seriously."

The US administration is facing pressure from several countries, including Saudi Arabia, to sign a peace treaty with Israel. However, some leaders are concerned that the Saudi proposal is not a serious peace plan and could lead to a military conflict in the region.

Hard childhood sparks Hoyles's career

By Rochelle Beerman

Corrie Hoyles grew up in a poor family in rural Illinois. Her parents were farmers, and she had to help them with the chores and take care of her younger siblings.

Hoyles said, "I learned to work from a young age, and I was always responsible for helping out around the house."

As a child, Hoyles was often Alone, and she had to be creative to find ways to entertain herself. She spent a lot of time reading books and studying.

Hoyles said, "I always knew I wanted to become a teacher, and I worked hard to get into college."

Hoyles went on to become a successful teacher and later became a principal. She now lives in a small town in Illinois and enjoys spending time with her grandchildren.

Erdahl: Veera's expenses twice his

By Michael Low

Iowa City Council candidate candidate Tom Erdahl has said that Veera has spent much more on his campaign than he has. Erdahl said that Veera should release his financial statements to the public.

Veera rejected Erdahl's call, saying that the campaign finances are confidential information and should not be disclosed to the public.

Erdahl said, "I think Veera should release his financial statements to the public. The voters have a right to know how much he is spending on his campaign."

Veera said, "The campaign finances are confidential information and should not be disclosed to the public. I think the voters should trust me to spend my money wisely."

---

In another display of Israeli determination, Menechem Begin In a September speech to the UN General Assembly, Begin called for the establishment of a Palestinian state, "which we have seen in the Camp David agreements," he said.

Begin added, "We must achieve a comprehensive peace settlement with all the Arab states, including Syria and Jordan."

Begin's speech was met with mixed reactions, with some leaders praising his courage and others criticizing his approach.

The fishing boats were reported to have left the harbor early Monday morning, the US coast guard said.

Residents of the coastal districts of India along the Arabian Sea have been advised to prepare for a possible storm, according to a government official.

The official said, "The US coast guard has reported that fishing boats carrying more than 1,300 fishermen were seen leaving the harbor in the Arabian Sea."

The Indian government has advised local residents to stay alert and be prepared for any possible consequences.

Whistle stop

by John McCl

Letters

Dear Editor:

In response to Michael Barnes' defense of governors because they have the authority to shut state government down, I would like to make the following comments.

The Iowa Legislature is the branch of government created by the people of Iowa to create laws that apply to all its citizens. The governor has the authority to veto bills passed by the legislature, but the legislature cannot override the governor's veto.

We, the citizens of Iowa, have the right to have our voices heard in the government. The governor has a responsibility to represent us and be accountable to us. If the governor is not fulfilling that responsibility, we have the right to elect a new governor who will.

Sincerely,

[Signature]

Soil erosion plan

Agriculture Secretary John Block has just announced a new conservation program to combat soil erosion. He was required to do so by the 1990 Farm Bill, which was passed in 1989. The program is designed to help farmers reduce soil erosion by adopting conservation practices such as terracing, contour cropping, and cover cropping.

The program will provide financial assistance to farmers who implement conservation practices. Farmers who adopt these practices will receive payments based on the amount of soil conservation achieved.

A couple of years ago, the federal government introduced a similar program, but it did not provide enough funding. This new program will provide much-needed funding to help farmers reduce soil erosion.

Sincerely,

New Wave's actions defended

New Wave is an organization that has been criticized for its actions. However, I believe that the organization is doing important work.

New Wave is a non-profit organization that promotes social justice and environmental awareness. They have organized protests against corporations and governments that they believe are engaging in unethical or environmentally destructive practices.

New Wave's actions are not without controversy, but I believe that they are necessary to bring attention to important issues. Their actions are driven by a commitment to social and environmental justice.

I urge everyone to learn more about New Wave and consider supporting their work.

Sincerely,

Negotiation, not arms race, seen as world peace route

By Mark Wood

The test to global security in political and military terms is not an arms race but an arms negotiation among political leaders, according to the president of McGovern.

"I who elect them," the political, not judicial, to make the chairmen's affect the direct. of public

BROWN TO U. NOT REELECT '60 (86)HUNTID AS COMMISSIONER, MEMBER

America's political leaders are likely to face this test in the coming years, as the world's major powers seek to maintain their dominance and influence in the global arena.

"The trend of the world," said the President, "is toward a more vigorous international community, where nations work together to address the challenges of our time." He went on to say that, "By working together, we can achieve peace and stability in the world, and ensure a better future for all of us."
Realism given to small-town life

By Casey Wright

The key to the New York proclama-
tions is impetuous and clever direct by Vivien Mazel. This is the core of the new sere, and its results are not unexpected. The plot is driven by a series of events that occur in a small town, and the characters are well-developed. The story is a realistic portrayal of small-town life, with its problems and challenges. The characters are believable, and their actions are driven by realistic motives.

I took out loans after she received her degree. Conducting a human relations generation are understandable. While a participant asked how she and the businesses are hit harder than most. She said, "Hoyle said."

Field crews reported slower growth. Measurements made on the new volcano's latest non-explosive eruption have decreased, though it is still somewhat above background level, due to ongoing activity. Hoyle says, "I think our hearts were in the right place."
Hawks 16th at Lady Tar Heel golf tournament

By Mike Kant

The Iowa women's golf team just missed reaching the final for this weekend's 16th Lady Tar Heel Classic at Chapel Hill, N.C. The Hawkeyes had 11th place at 306, one stroke short of qualifing for the final.

Tuesdays, the Hawkeyes finished third at the Top of the World tournament at Idaho Falls, Idaho. Despite the Top 10 finish, the Hawkeyes did not qualify for the NCAA tournament.

It was the first time in six years, the Hawkeyes did not qualify for the NCAA tournament.

The Hawkeyes finished 11th out of 12 teams.

In the final round, the Hawkeyes were tied for 15th place at 12-over-par 290. Iowa finished 11th at 11-over-par 292.

The Hawkeyes finished 11th out of 12 teams.

The team was represented by four players: Jaime Keating, Alyssa Saba, Sarah Krueger and Amanda Gross.

On the line

To only the Iowa State football fans is there a 5-2 record, but also this record has been the best in Iowa State football since the 1957-58 season. The Hawkeyes have again gone into the West division, and this year's schedule is a good test for the Hawkeyes. The schedule is a good test for the Hawkeyes to see how far they have improved in putting this schedule together.

Saturday's winners

1. Iowa State 21, Nebraska 14
2. Iowa State 14, Nebraska 10
3. Iowa State 28, Nebraska 10
4. Iowa State 17, Nebraska 10
5. Iowa State 21, Nebraska 14

Illinois defense controls Hawkeyes' sputtering offense

By Howard HHI

CHAMPAIGN, III. — Illinois used a strong defensive effort, the pass protection of quarterback Tony Eason, and a little help from the touchdown zone for its first touchdown. The Illini defense controlled the game, and that's to hold a fine Iowa team to its lowest scoring output of the season. The Illini dominated the game where we had the opportunity to. You have to be where we are right now, and that's to hold a fine Iowa team to its lowest scoring output of the season.

Iowa's Ron Ferrari jumps victoriously into the air after his tackle of Iowa's Pete Gates forced a fumble resulting in an Illinois touchdown.

Illinois deals Hawkeyes another loss

John Landis Howls over Hollywood
...& His Werewolf in London

BY JACOBA ATLAS

Universal Studios casts new tale of terror in their howl to laughter. The new Howls over Hollywood has its paws firmly on the ramparts of the studio, with a howling cast of characters that seems to have been borrowed from the pages of a classic horror novel.

The story unfolds with a twist that is both surprising and satisfying. The howling takes place in the heart of the studio, where the new production is in full swing. The cast and crew are consumed by their work, oblivious to the howling that surrounds them.

But the howling is not just any howling. It is the howling of a creature that has been sleeping in the middle of the studio for years. The creature is a werewolf, and it is about to be unleashed on the world.

The howling is the voice of the werewolf, a creature that has been waiting for the right moment to strike. The howling is the signal that the werewolf is ready to take its place in the world, with a howl that is both terrifying and captivating.

The howling is the sound of the werewolf, a creature that is both feared and revered. The howling is the voice of the werewolf, a creature that is both misunderstood and feared.

The howling is the call of the werewolf, a creature that is both powerful and vulnerable. The howling is the sound of the werewolf, a creature that is both feared and loved.

The howling is the voice of the werewolf, a creature that is both powerful and vulnerable. The howling is the sound of the werewolf, a creature that is both feared and loved.
Clare Hynde and Jimi Hendrix: the Lead

The Pretenders: Only Make Believe?
or Hynde in Plain Sight

by Bill Lamb

The Pretenders, an English rock band, was originally formed by Chrissie Hynde, who was one of the band's lead vocalists. The Pretenders have been a successful band since their formation in 1975, and are perhaps best known for their hit song 'I'll Stand by You'.

Hynde was born in London in 1953 and was raised on a diet of American pop music. She attended art school and later moved to London to pursue a career in music. She formed the Pretenders in 1975 with bassist James Honeyman-Scott and drummer Martin Chambers.

The Pretenders were influenced by the punk rock movement of the 1970s, and their music is characterized by its raw energy and social commentary. Their first album, ' Pretenders', was released in 1979 and included hits such as 'All the Way to Paris' and 'Valerie'.

Hynde's vocal style has been described as powerful and emotive, and her lyrics often address issues such as love, loss, and social injustice. She has been praised for her ability to connect with audiences through her music and has been a prominent figure in the British music scene for over four decades.

In 1980, the Pretenders released their second album, ' Pretenders II', which included the hit single 'I'll Stand by You'. The album was a commercial success and helped to cement the band's place in the rock and roll pantheon.

Hynde and the Pretenders have continued to release music and tour extensively over the years, and have remained a popular and influential band in the rock and roll genre. Their music has been praised for its raw energy and emotional depth, and they continue to be a beloved and respected band in the UK and around the world.
It was a pipe dream only a few short years ago. A computer you could carry around in your pocket, so you could run programs at home or while traveling; a computer small enough both for your pocket and your pocketbook.

Herein, the pipe dream made real: the Sharp PC-1211 Pocket Computer.

- Not a fancy pocket calculator. A computer with 1.9K RAM memory. Programmed conventionally through the keyboard. Or, using an optional cassette interface, able to load and unload programs using almost any cassette recorder around.

You can even hook up the PC-1211 to a printer (optional) and print out the program listing itself.

**BASIC SPOKEN HERE.**

The PC-1211 Pocket Computer has a dot matrix display that scrolls right or left, handling up to 24 alphanumeric characters.

This allows the program to display instructions asking for data, as well as any other prompting the program requires. It also allows you to look at the program listing, line by line.

If you don't know BASIC, the PC-1211 is a good way to learn. There are 22 statements and 12 commands at your disposal, which comes pretty close to the flexibility of a conventional size microcomputer. It will run programs of as many as 30 or 40 lines. That's a remarkable degree of sophistication to be carrying around in your pocket.

**WILL WON'TS NEVER CEASE?**

The Sharp Pocket Computer even has some features that the big ones don't have, such as reservable keys. Commonly used commands, statements, mathematical functions, almost anything can be assigned to these keys.

If you don't want to keep spelling out the statement PRINT, for example, you simply assign it to, say, letter "A."

Thereafter you press one key instead of five. Mathematical functions like COS can be assigned. Or A= B= Or RUN. And so on.

The PC-1211 has many more fascinating features. It's more than a fantastic tool. It's an intellectual adventure.

Go to your local Sharp dealer and fool around with one. You'll see that we haven't exaggerated in the least about the Sharp PC-1211 Pocket Computer.
Carry Camera At All Times? You’re No Twit

A few years ago, a citizen who always carried a camera would get tossed as a social embarrassment. Everyone made fun of the amateur photographer. Carrying a camera had a great time of it.

It’s changing fast. More and more serious photographers on campus and off carry a camera at all times because they realize that ideal pictures taking possibilities don’t just occur at the rare instances you might decide to take pictures on vacation. You can never tell when you’ll see something worth capturing. With your still camera close at hand, you can grab it quickly.

But you don’t have to be a serious photographer to enjoy the occasional turn of events. Every campus has a few photographers on campus and off who love it. They don’t even need a black and white film camera. Even a few colored slides can add color to your photography.

So if you really want to preserve those precious memories, with your still camera closed up in its case. In every class, every activity, every sporting event. And you’re not even going to waste it if you see something that you think you might want in a picture.

A camera on a tripod or other support. When traveling around campus, if you don’t think you’ll be taking pictures, you can put the camera in your case and carry the strap across your chest. It’s easier than stuffing the camera in your pocket.

With adjustable cameras, typical settings are 400-speed films (either color or black-and-white) 1/20 sec. at f/8 or f/4. A zoom lens allows you to use a whole range of filters and strong lenses for the camera. You can always get a good picture in the color film.

Exposure? No! With the Editors Of Modern Photography Magazine

Looking For Action? Don’t Forget A Camera!

What with freshmen settling around the campus, sleepy-eyed seniors trying to make it to 9 A.M. class on Monday morning before the last hangover of the weekend is over, there are plenty of opportunities for shooting spectator sports such as football, basketball, or tennis. If you have a fast-action finger, you can be a lot of fun. But if you’re not sure what you’re doing, you may have a lot of pictures to shoot. You’ll probably get a lot of pictures of players on the court, but you may also have a lot of pictures of players on the court.

To make sure you get a better shot, you may have a little more fun with the camera. If you have a fast-action finger, you can be a lot of fun. But if you’re not sure what you’re doing, you may have a lot of pictures to shoot. You’ll probably get a lot of pictures of players on the court, but you may also have a lot of pictures of players on the court.

But many more advanced cameras today do allow you to vary your exposure, either by using a different film, adjusting the lens, or using a combination of the two methods. You can have a fast-action finger, you can be a lot of fun. But if you’re not sure what you’re doing, you may have a lot of pictures to shoot. You’ll probably get a lot of pictures of players on the court, but you may also have a lot of pictures of players on the court.

Win $100 For Best Shot

If you’re a scholar, you probably spend a lot of time in your study. But it’s possible to have a camera on a tripod or other support. When traveling around campus, if you don’t think you’ll be taking pictures, you can put the camera in your case and carry the strap across your chest. It’s easier than stuffing the camera in your pocket.

What Type Of Camera Do You Need????

Pocket 110 camera? Instant-picture camera? 35mm single-lens reflex camera? 35mm automatic EM camera? What camera is best for you?

You need a camera to record your memorable moments. But how do you go about picking one? There are many considerations. You need to ensure that the camera you select will be good. It must be able to deliver what you want, and that you will want. Is a compact pocket camera or a fully automatic EM enough for you?

To help you in the right direction you need to know what you need to do and what you want to achieve. But first, you need to know the proper choice.

Head you in the right direction.

You will want to have a print made. Whether you use a copy center, a small business, or a large commercial shop, you will want to be sure that the print will be of the correct size and that it will be a good snapshot. For a few hours? The answer is to copy it or print it on your own printer. You will find that you can do a much better job than the professionals.

Closeups And Copying: School Aids

...-as simple as 18 or 24 ft., which may be enough for copying and close-up work. Other cameras have 16 mm, which is usually 100 mm, and the 35mm SLR. Close-up lenses are by far the simplest equipment you can use for copying and close-up work. These lenses are available in a wide range of focal lengths and are extremely versatile and convenient to use. With a 35mm SLR, you can use a wide variety of lenses, including macro, wide-angle, normal, and telephoto lenses. With a 110 camera, you can use a wide-angle, normal, and wide telephoto lenses for copying and close-up work. With a 200mm film camera, you can use a wide-angle, normal, and wide telephoto lenses for copying and close-up work. With a 35mm SLR, you can use a wide-angle, normal, and wide telephoto lenses for copying and close-up work.

Instant Camera

If you want to record your memories, an instant camera will deliver the goods. Cameras tend to be bulky, heavy, or expensive. But if you need to copy and close-up work, there is a simple solution. These cameras are ideal for making prints of your favorite memories. They can be used with any camera, except a 35mm SLR. Close-up lenses are available in a wide range of focal lengths and are extremely versatile and convenient to use. With a 35mm SLR, you can use a wide variety of lenses, including macro, wide-angle, normal, and wide telephoto lenses for copying and close-up work. With a 110 camera, you can use a wide-angle, normal, and wide telephoto lenses for copying and close-up work. With a 200mm film camera, you can use a wide-angle, normal, and wide telephoto lenses for copying and close-up work. With a 35mm SLR, you can use a wide variety of lenses, including macro, wide-angle, normal, and wide telephoto lenses for copying and close-up work.

Underwater/All-Weather Camera

Specially designed to withstand water and atmospheric conditions, these cameras are ideal for athletes, photographers, and backpackers, when extremely rugged equipment is needed. Underwater cameras are very inexpensive, much more expensive, much more versatile, and are available with interchangeable lenses. A good snapshot camera, however, will want to offer interchangeable lenses. Good snapshot camera, however, will want to offer interchangeable lenses.

The only reason to buy a lesser camera is to take lesser pictures.

The F3. Choice of the pros.

The EM. For full manual control.

The FE. An automatic you can grow with.

The FM. As easy to afford as it is to use.

Nikon cameras have unquestionably been the most professional photographers' choice, taking more award winning photos than any other camera in the world.

For that reason, a lot of people think a Nikon is too much camera for them.

But it really isn't. Nikon makes a full line of cameras, with a full range of features, in a full range of prices. One of them is designed for you.

Whether you choose our professional automatic F3; our versatile, automatic FE; the fully manual metered FM; or the affordable automatic EM, you'll be getting a Nikon. A camera subjected to an exacting system of design, manufacture and quality control.
Muck On Your Lens? It Isn't Always Easy To Remove

Resists seem to attract dirt magically. Every time you even lift your camera to your eye, you can feel the great draught on the lens. Find the source and wipe them off. If your camera has a removable lens, first take it off. Then use a brush to remove the dust and debris. Finally, use a cloth to wipe the lens clean. If you have a non-focusing or automatic camera, you should always use a brush to remove the dust. Don't use compressed air, as it can damage the lens.

Holding Steady And How?????

Whether you're taking a simple picture or a complex one, the first step is to hold the camera steady. This can be done by using a tripod or by supporting the camera with your hand. When using a tripod, make sure it is level and the legs are securely tightened. When using your hand, hold the camera with both hands, with your elbows close to your body. This will give you a stable base to work from.

With a 110 pocket camera, group shots can be accomplished by using a flash, or by using a flash and a second flash. Hold the flashes in your hands and aim them at each other. This will create a soft, even light. You can also use a flash and a second flash to create a three-point lighting effect.

Easy Ways To Better Pictures

Move the camera up and down to capture the best possible shots. Don't be afraid to experiment with different angles and perspectives. Keep backgrounds simple: Unless you're trying to create a sense of depth, keep your backgrounds simple.

Keep your finger behind the lens. That will help to keep your camera steady. The magazine suggests that you use a flash and a second flash to create a three-point lighting effect. This will help to create a soft, even light.

Easy Ways To Better Pictures

Move up and down to capture the best possible shots. Don't be afraid to experiment with different angles and perspectives. Keep backgrounds simple: Unless you're trying to create a sense of depth, keep your backgrounds simple.
Trick Filters Can Put a Kick In Your Shots

Get the photo looks? All the usual camera settings may still be there, but now, in addition, there are some new tricks to play around with. Filters are one way to add a creative twist to your photographs, and the effects they produce can range from subtle enhancements to dramatic transformations. Here are five tips to help you get the most out of your filters:

1. Polarizing Filters: These filters reduce glare and reflections, making skies appear bluer and water surfaces appear smoother. They are particularly effective on plastic dome skylights and other reflective surfaces.

2. Graduated Filters: These filters fade from dark to light, allowing you to control the exposure in different parts of the frame. For example, you can use a graduated filter to darken the sky while keeping the foreground in focus.

3. Color Filters: These filters add a color cast to your photos, such as a golden hue in the early morning or a blue tint in the late afternoon. They can be used to enhance the mood of your photos.

4. Neutral Density Filters: These filters reduce the amount of light entering the lens, allowing you to use longer shutter speeds or smaller aperture settings. They are particularly useful in bright conditions.

5. Special Effect Filters: These filters create unique effects, such as starbursts, fish-eye images, or kaleidoscopic patterns. They can add a playful and whimsical touch to your photos.

Remember, filters are just one tool in your creative photography kit, and they should be used to enhance your vision rather than overpower it. Happy shooting!
