Ralston complex problems cited

By Robert Broman

Two Ralston Creek Village apartment managers are questioning the plans for a new building that will be constructed near the complex. The city engineers and city councilors have been working on the project for several months.

The city complex requires that buildings be placed on a site a few hundred feet away from the complex. The city engineers and city councilors have been working on the project for several months.

Robert Broman has been working on the project for several months.

**Men rob Oxford couple at knifepoint**

By Diane Traverse

An Oxford, Iowa, couple was awakened by a noise and found their bedroom in disarray after two men forced their way into the house early Tuesday, police said. The couple were not injured, but their home was ransacked.

“I was sitting in bed, and I heard some noise coming from the kitchen,” said the wife, who declined to be identified. “I went to check it out, and that’s when I realized there were two people in my house.”

The couple was able to escape through a window and call police, who arrived on the scene within minutes. The suspects were later arrested, and the couple was unharmed.

**City schools debate central office move**

By Elizabethundrea

There’s another party tonight. It’s all parties now.

"We’re looking forward to it," said Maja Lorkovic, an engineering student at the University of Chicago. "It’s a great opportunity to meet new people and have a good time."

**Voluntary protest in Argentina**

In Argentina, thousands of steelworkers have taken to the streets in a protest against the government’s economic policies. The workers are demanding better wages and working conditions, and are calling for an end to unemployment and poverty.

**Mural on the wall**

A mural on the wall of a local high school has been vandalized. The students who committed the act have been identified, and police are investigating.

**IRAU**

The IRAU group is planning a protest rally in the city center this weekend. The group is calling for an end to the ongoing conflict in the region.

Building in good condition, no cutting necessary over next two months, according to KRU1's cablevision transmission consultant, Lindale, Westdale, and Southdale. By Staff Writer

The hesitancy of various companies, including Northwestern Bell Telephone lines, to convert AM stations to FM was a topic of discussion on March 11. In March 1982, the FCC had granted KRU1's application to file with the Federal Communications Commission for the right to convert from AM to FM. But in its present AM capacity, KRU1's station is classified as a "low-power" station, which means it is not eligible for any new construction or equipment modifications unless it is granted specific approval from the FCC.

The application was approved last year, and KRU1 is now in the process of obtaining the necessary equipment for the FM conversion. According to Gary Appleby, assistant vice president of the Communications Commission for the University of Iowa, the conversion is expected to take about six months, after which KRU1 would be able to begin broadcasting on the FM band.

"We're hoping for a smooth transition," Appleby said. "But we want to make sure we have all the necessary equipment and permits before we begin broadcasting.

The conversion process will involve several steps, including the installation of new antennas and broadcast towers, as well as the physical relocation of the station's transmitter to a new site.

The current AM tower, located on the north side of the University of Iowa campus, will be taken down and the new FM tower will be built on the south side of the campus.

According to Appleby, the FM transmitter will be located near the old AM tower, and the new tower will be taller and more powerful than the old one.

"The new tower will be able to reach a larger audience than the old one," Appleby said. "It will also be able to broadcast in a wider area and with greater clarity than the old station.

The FM station will be able to broadcast in a wider area and with greater clarity than the old station.

Crime won’t pay

"Crime does not pay" - the Iowa House is putting some bite into this adage. The legislature’s efforts in relieving the inequities of the current crime of silence. My generation and the ordinary Germans for not speaking themselves is now being considered by the courts. I believe that the price for our support will be a reduction of current legal aid to ex-cons who have struggled with so much. But the tally now only gives them a plurality; the various right-wing parties appear to have the momentum we need to take back the House. The House vote indicates that the bill will pass. The overwhelming House vote promises peace. Elections conducted under these conditions may be speedily adopted.

Nuclear threat must be faced

By Kevin H. Wester

People who want to remove the nuclear threat are unfortunately very much against the idea that the price for peace is removing it. But if we don’t dare to speak, then the nuclear threat will continue. Whether we believe that the price for peace is too high or too low, we must not be allowed to sue for damages from this account. The money could be used to provide medical care, legal aid to the poor, and assistance to many other worthy institutions. Let the nuclear movement become democratic in a certain sense; the result may not be in the hands of a long-term head (Georges)

Doverage strategy

Doverage strategy: startup winners and losers in the new age of technology. The legislation requires the attorney general to deposit money from money obtained through the performance of legal services. It is unjust for the perpetrators to be rewarded for their crime. We aren’t going to succeed if we are the only ones to bear the burden of our government’s mistakes. It currently has been in the last 30 years or so, that all and every party wants to be an optimist, however. I’m not overly optimistic about the future. We are constantly using it to threaten one another. What does not raise a resistance is not a cure.

New Japanese religions flourish

By Nancy Langston

A host of new religious groups in Japan has attracted attention from public and religious officials, due to the need to monitor their activities. The groups, which are known as "shinmeisha," have emerged in the last five years and are believed to number in the tens of thousands. These groups are often characterized by their emphasis on personal growth and spiritual development, and some are associated with alternative medicine practices.

The development of these new religious movements has been influenced by various factors, including the declining influence of traditional religions, the increase in individualism and personalism, and the growing importance of spirituality in modern society.

Corridor plan questioned by board

By Karen Caunt

The North Corridor zoning proposal came closer to reality today as it got swept up in the Hudson County Board of Supervisors, the local body that makes decisions on land-use matters. The board passed the proposal by a 4-to-1 vote.

Anchoring the corridor is the question of how to create a transportation hub, which the proposal calls for. The board approved a transportation plan by a 3-to-1 vote, with Supervisor Harold Donnelly voting against it.

Regents name Hall to dentistry position

The Board of Regents approved the appointment of Dr. Robert L. Hall as head of the Department of Family Dentistry at the University of Chicago.

Hall, who is currently the dean of the school of dentistry at the University of California, Los Angeles, will assume his new position on July 1. He succeeds Dr. William R. Martin, who retired last year after 35 years of service.

"The appointment of Dr. Hall is a significant step in the development of our dental program," said Dr. Joseph Kitagawa, who is the dean of the school of dentistry.

"He brings a wealth of experience and knowledge to our faculty," said Kitagawa. "We are delighted to have him join our department as head of the Department of Family Dentistry."

UI Spanish course aids health workers

By Elizabeth Cruz

Health professionals can learn how to communicate with Spanish-speaking patients and nurses to avoid misunderstandings. "A very small number of people (in the hospital) have a very good command of Spanish," said Duque. "If a patient can't answer questions and appears to be in a state of confusion, then they have no one to communicate with," said Duque.

The class features informal presentations by students, guests speaking about folk medicine, and guest speakers who have (various) accents, from American birthing customs to the American Indian's own treatment. Students learn grammar quickly by using the language in a cultural context. "If you (as a patient) can't answer questions, you may be confused," said Duque. "Many patients can't answer questions and appear to be in a state of confusion, but they have no one to communicate with," he said.

"People often misunderstand the issue of language," said Duque. "If a patient can't answer questions and appears to be in a state of confusion, then they have no one to communicate with," he said.

Four paratroopers killed, 100 hurt in massive U.S. training exercise

THE Daily Iowan - Four paratroopers killed and more than 100 were injured in an exercise Friday in what appeared to be an accident at the UNITA-1040 training center in Cedar Rapids.

The operation, "Operation Eagle," involved more than 100 military personnel and was conducted at the headquarters of the United States Air Force's 1040th Tactical Enforcement Force in command, coordination, intelligence, surveillance and targeting operations.

Officials said the early morning training exercise was aimed at training personnel to search for and destroy high-value targets.

Army Lt. Col. Robert Kugler, commander of the unit, said the exercise involved deploying a team to a location to conduct a mission.

Kugler said the team encountered an unknown object and was forced to disengage from the exercise.

Kugler said the team was able to evacuate all personnel safely and that there were no injuries.

He said the team was going to continue the exercise and that the object was identified as a mine.

The cause of the accident is under investigation by the Air Force's Office of Special Investigations.

A spokesman for the Air Force said the accident occurred during the exercise and was being investigated by the Office of Special Investigations.

Circus elephants were marched through Queens-Midtown. 'Stark' memories continue to haunt husband was shot, first lady Nancy Reagan president promise he will not seek the White House, was reflective Tuesday whenBinders were last March 's heart, he ventured out into public.Binder was quoted Tuesday as saying that a report cited in the Washington Post said he had been hit in the leg by a bullet fired for the crime.

WASHINGTON (UPI) - A year after her husband was shot, first lady Nancy Reagan told Tuesday that she has made the presidency promise he will not seek the White House, was reflective Tuesday when reporters asked her how she satisfied the presidency.

"I realized it was a year ago," she said simply, "it seems like a year ago and I feel good." The president's wife, still carrying fresh, pointed to more recession ahead and the declines for January, which economic indicators went down more than a percent and the declines for January also were revised sharply.

"It was a year ago," she said simply, "it seems like a year ago and I feel good." The president's wife, still carrying fresh, pointed to more recession ahead and the declines for January, which economic indicators went down more than a percent and the declines for January also were revised sharply.

"We've not discussed 1984," the president said.

The assertion was just one of a number of developments in the story that has been accepted by the national stage for the 30 days.

Economic indicators say more recession

WASHINGTON (UPI) - The government said Tuesday that most monthly economic indicators dropped for the third straight month in February, suggesting a slow recovery ahead. The report, a "possibility." The president's wife, still carrying fresh, pointed to more recession ahead and the declines for January, which economic indicators went down more than a percent and the declines for January also were revised sharply.

"We've not discussed 1984," the president said.

The assertion was just one of a number of developments in the story that has been accepted by the national stage for the 30 days.

Apply now!
The Daily Iowan is now taking applications for editors and reporters for the summer and fall semesters. Editors must be top-notch journalists, dedicated to quality and balance, with the workings of a daily newspaper. Reporters must be hard-working and enthusiastic with a commitment to accuracy and good writing. Journalism experience is preferred, but not required. Taking applications for:

- Managing editor
- News editor
- Metro editor
- Assistant for university news
- Assistant for city news
- Assistant for freelance
- Assignment editor
- Wire editor
- Photo editor
- Sports editor
- Assistant sports editor
- Editorial page editor
- Letters editor
- Reporters and writers
- Copy editor
- Graphic artist
- Photographer

Work for an award-winning newspaper! Pick up applications in Room 111 at 200 N, Communications Center, Deadline: Friday, April 8.

Iglet, outlook

Los Angeles (AP) — The National Football League, claiming it would ruin the teams if it suspended the current labor agreement, announced Wednesday night it would consider suspending the NFL's three-month pre-season exhibition games.

The NFL has threatened not to play pre-season games if the league can't reach agreements with the players and owners before opening day.

"We want to make sure that the schedule is not altered," NFL spokesman Joe Francis said.

The NFLPA, which represents the players, has rejected the league's proposal for a three-month pre-season, arguing it's too short.

"We're not going to support a suspension," NFLPA chief negotiator Troy Vincent said.

The league has threatened to cancel the entire regular season if it can't reach an agreement with the players by July 15.

"We're not going to just sit here and wait for the players to come to us," NFL commissioner Paul Tagliabue said.

The pre-season games are scheduled to begin around late July.

The league and the players have been trying to reach an agreement for the last two weeks.

"We're not going to let them walk away," NFLPA president Tony Gonzalez said.

The players have threatened to strike if they can't reach an agreement.

"We're not going to let them walk away," NFLPA chief negotiator Troy Vincent said.

**Banach, Zalesky named most valuable**

By Jay Christensen

Ed Banach, left, and Lennie Zalesky, national and Big Ten champions for Iowa's distance running events, have been named as co-controllers of the Mike Grant Most Valuable Runner Award.

The award, named for Iowa's first wrestling coach and 1982 NCAA wrestling champion, was presented to the duo during the NCAA indoor meet in Iowa City.

Banach, the nation's top cross-country runner, was named the award's winner for the second-straight year, and Zalesky, the nation's top distance runner, was named co-winner with seven. Iowa placed third nationally.

The award, which is voted on by the Big Ten's most outstanding athletes, was also awarded a trophy for the most falls.

**Iowa women runners continue torrid pace towards national meet**

By Thomas W. Jones

National qualifying has become old hat for Iowa women's track coach Jeff Hassard and his team.

During the indoor season, Iowa set a school record for individual national qualifiers by placing 17 women in the NCAA regional meet. The women's team also qualified for three events.

But Hassard, who is a coach of honor, a team of destiny, a coach of champions, is doing it again.

In the NCAA women's championships, Iowa will compete in 12 events.

Iowa men's track and field team will compete in 10 events.

**NCAA champs welcomed by 20,000**

CRAPPELLE HILL, N.C. — University of North Carolina basketball players, "coached" by head women's basketball coach of the University of Iowa, were named both men's and women's basketball heroes.

The players were honored as national champions at the University of Iowa's basketball tournament.

The University of Iowa will hold a bake sale on Friday to raise money for the tournament.

**Fry**

Continued from page 1

No, although the Iowa women's basketball team has been a lot of fun to watch this season, the game was still a game of basketball.

Terry and Dorothy, Iowa's top two scorers, were both named to the second team all-Big Ten.

"We've got a good bunch of guards," Dorothy said. "I was very surprised when we got our invitations to the tournament. We worked hard and played well."

Reed’s ‘Blue Mask’ a relentless, triumphant gem

By Jim Musser
The Daily Iowan

The Blue Mask, Lou Reed’s fifth studio album, is one of the most devastating and honest rock records ever written. It is a clear-eyed view of society’s potential for self-destruction.

Each swim against the current, each cynical, perverse and influential instance of rock music’s most cataclysmic, overwhelming influence on the music world is intense, steeped in dark passion; tender beautiful imagery is backed only with that of a baby in its crib. The Blue Mask is a hypnotic, ear-splitting album.

Underneath it all is Reed’s understanding that, more often than not, the human spectacle is a storm with that of a baby in its crib.

There are no hit singles on The Blue Mask, there are no triumphs, no happy endings. Gone are Reed’s promising chunks of rock fear ever present, the studio and is highlighted by guitar overdubs with PETER HINDK. The “Power of Positive Thinking,” “The Gas” is a hypnotic, ear-splitting look at a sadistic killer and not, as the album’s著作权, a triumphant gem. The Blue Mask may be Lou Reed’s greatest achievement, it is a chilling look at the most important, most incomparable chords of rock that ever resonated in any corner of the world. Through his songs, Reed is telling us the truth.

He is an uneven artist to be sure; one of rock music’s most cataclysmic, overwhelming influence on the music world is intense, steeped in dark passion; tender beautiful imagery is backed only with that of a baby in its crib. The Blue Mask is a hypnotic, ear-splitting album.

Bedridden Fonda accepts Oscar; a life 'high point'

BY JERRY JGGBL (AP) — Henry Fonda was resting in bed and dressing in a robe when he received the telephone call from Los Angeles telling him that he had been given the Academy Award for best actor.

"I've never seen such a big smile," said his wife, Katherine Hepburn. "I've never heard such a big sigh.".. .

Fonda was notified by telephone that he had been selected as best actor for Mr. Smith Goes to Washington. The Academy Award presentation will be made on Feb. 24.

Fonda, 56, said he was "a little teary-eyed" when he heard the news of his award.

"I'm a little teary-eyed," he said.

Oscar contest winner takes home $25 in gift certificates and ‘Spike’

By Rosemarie T. Hepler

Staff Reports

After dashing through 11 entries on The Daily Iowan’s contest, we awarded a grand prize — Bill Mitchell of Cedar Rapids, who works at the University Hospital as a research assistant and goes by a lot of names.

Mitchell correctly guessed 11 of the winners and only 2 that didn’t. A 3rd place finisher will be chosen by drawing from all the entries for $25 in gift certificates and a copy of ‘Spike’, the novel that won the contest.

‘Physicists’ reviews achievements of special field: particle physics

By Harry M. Venore

The Physicists A Novel That Changes the Way We Think of Science G. P. Putnam’s Sons and Company, 1981, 192 pages.

The book, a major American bestseller, was published in February, 1981.

It is a story of the interplay between science and society, between the physicist and the layman, between the scientist and his colleagues.

The novel is a paean to the spirit of inquiry, to the quest for knowledge, to the quest for truth. It is a celebration of the human spirit, of the human capacity for wonder.

It is a story of the way science has changed the way we think of ourselves, of the way we think of the world around us.

It is a story of the way science has changed the way we think of the future.

It is a story of the way science has changed the way we think of ourselves.
