Regents may help housing facility

By Jane Turner

Construction plans for an Urgent Ronald McDonald House will get the green light Thursday if the State Board of Regents approves a $3.2 million expansion of UI's Children's Hospital and Radio.

The house would provide temporary, temporary accommodations for the families of children treated at both Children's and Radio.

Regents Executive Secretary R. Wayne Beeler has recommended that the board approve the proposal noting in a memorandum to the board that facilities for the families are "below standard."...
Walesa may sue for his job
WARSAW, Poland - Lech Walesa, former head of the Solidarity union, has demanded that be given his job back by the government's new Solidarity deputy, which he was fired from. Walesa has been called a radical communist by the government.

PLANT LEAKS PROTECTIVE GRID
- "The nation's nuclear reactor plants are being protected by a new system that provides a protective shield around the reactors," a customs official said.

CALIFORNIA COURT AVOIDS PRAYER ISSUE
- The California Supreme Court has avoided a case that would have decided whether or not the state's Constitution allows for the use of prayer in public schools.

BOWL MEET POSTPONED
- "The University of Iowa will not be able to host the bowl meet this weekend due to a scheduling conflict," the school's athletic director said.

SUCCESS STORY TOLD OF COCAINE USE
- "The use of cocaine has been a problem in the South Florida area for many years," a report said.

LOOKING FOR A JOB
- "The Daily Iowan is looking for hardworking, dedicated people to fill key positions on the newspaper. We are offering a competitive salary and benefits package, as well as the opportunity to grow in the field of journalism."
City will investigate policeman's conduct

By Paul Bowman

Coralville Police Officer Donald Dreckman is again the subject of an investigation, this time to determine whether he maintained a black dye on his hair when he was a high school student.

Marvin Mab, a UI student, and Dreckman allegedly rear-ended a car and fled the scene.

Dreckman claimed he didn't know the engine of the car behind him was running.

When contacted Monday, Dreckman said he had no comment on the incident.

The course "Chinese Calligraphy & Painting: Traditional Techniques" is offered on Monday evenings at 7:30. The course begins Monday, January 15. The course is designed for the new building has not been destroyed in the fire.

The course "Chinese Theatre" meets once a week on Tuesday evenings at 7:30. The course begins Tuesday, January 15. The course is designed for the new building has not been destroyed in the fire.

Bible is inspirational, not factual

By Roger Hite

R ECENTLY, THERE has been a great debate between evolutionists and creationists about whether the Bible should be taught as a science textbook in school. To clarify this, we must ask: can the Bible be taught as a science textbook? If so, what should be taught? Many people believe that the Bible is not a science textbook, but rather a religious one.

The THEBukAL SCIENCE Board of Regents (1953-1967) concluded that the Bible should be taught as a science textbook. However, this does not necessarily mean that the Bible should be taught in the same way as a science textbook. In reality, the Bible should be taught as a religious textbook, with a focus on its spiritual and moral teachings.

The Bible contains a number of stories and teachings that are not based on scientific evidence. These stories and teachings are meant to inspire and guide people in their daily lives. For example, the stories of Adam and Eve, Noah, and Moses all have spiritual meanings that are not based on scientific evidence.

In summary, the Bible is not a science textbook, but rather a religious one. It should be taught as a religious textbook, with a focus on its spiritual and moral teachings.

A human mind of computer homes

WE WERE marvelling at the advantages of our computer this last week when a friend intro-duced the idea of a "Chat from T3:A11." He made a good point: why not use our existing educational resources?

We have heard a lot about how computers are changing our lives. In fact, many believe that computers will revolutionize the way we live. This is why it is important for us to communicate through computers.

However, we are not sure if we understand this concept. For example, we know that computers can be used to make a long-term borne of, will not only go to change the way we live, but also the way we think.

ACCORDING TO THE Fowler's, his party was made up of 25 young people gathered around the computer in the library. We were all excited to see what was going on.

Let's see one of the main advantages of computers: they can help us with our schoolwork. For example, if you are having trouble with your English homework, you can ask a friend or classmate to help you.

Therefore, the computer is a powerful tool that can help us in many ways. For example, you can use it to study for your exams, or to make a project.

Glen & Schener

Relationships have from the computer, however, are not always positive. For example, some people have become too dependent on the computer.

From the above-mentioned reasons, we argue against chat and instant messaging. However, there is a need for more research on this topic.

In conclusion, the computer is a powerful tool that can help us in many ways. However, we must use it wisely and not become too dependent on it.

Could you think of other ways of using computer? What do you think? Do you think the computer has changed your life?

Register, or else

You might notice something new on your financial aid forms this year. In addition to asking how much money a student has and the dependents and what jobs parents do, financial aid officers are now asking if a student has been registered for the draft.

Starting in June, eligible students must be registered before they can receive financial aid. However, they can be registered even if they are exchange students or attending a college's administrative offices to make this determination.

Other colleges are not required to register students, but others are. For example, the University of California, Berkeley, requires all students to register for the draft. This is because the university believes that students should be prepared for any emergency.

The draft registration is not a new concept. In fact, it has been around for many years. However, the current focus of the draft registration is on whether students are registered for the draft. This is because the university wants to ensure that students are prepared for any emergency.

Newcomer's view

I am a new student to Iowa City, having left my home in Chicago recently. I have always enjoyed the city, but there is one thing I do not like: the weather.

Maybe, my own home in Chicago, but I like Iowa City. Iowa City has a lot of beauty, and I think it is a great place to be.

I have been in Iowa City for two weeks now, and I have already made some friends. I have met a lot of nice people, and I think it is a great place to be.

Supervisors to consider changing refugee home into IC youth house

By Mike Haffers

A proposal to change Iowa City's Youth Home into a refugee home is part of the big project to reorganize youth programs that the Johnson County Board of Supervisors is considering. The change would be expected to be made by the end of April.

The current home, located in the Johnson County Courthouse, is not considered capable of housing the refugee population, and the county must find other facilities to house the refugees.

The proposal was made by the Johnson County Department of Social Services, which is responsible for the homeless population in the county.

The department has been working with refugee agencies to find a suitable facility for the refugees, and the proposal is part of the larger project to reorganize youth programs.

The project is expected to be completed by the end of April, and the new facility is expected to be in use by the end of May.

Water test for gas leak in Hills

By Terry Przybylek

The city of Hills is testing for gas leaks in the community after a leak was discovered in a water main.

The leak was discovered during a water main replacement project in the area. The city has been monitoring the area for several weeks and has found no signs of gas leakage.

The city is testing for gas leaks in the area to ensure the safety of the community.

The city has been working with the public to inform them of the gas leak and to inform them of the steps that are being taken to ensure the safety of the community.

Black

The case, known as "In re: A, Inc.," involved a monetary damage claim against a company.

The case went to trial in May, and the jury awarded the plaintiff $1.2 million in damages.

The company appealed the verdict, and the case was heard by the Iowa Supreme Court.

The court ruled in favor of the plaintiff, awarding them $1.2 million in damages.

Military

American forces are directly involved in the conflict in Afghanistan, which is a war against terrorism.

The conflict began in 2001, when the United States and its allies launched an attack on the Taliban regime in Afghanistan.

The conflict is ongoing and is being fought with the support of international forces.

Iowa still everywhere.

The Peach Bowl.

By T. Johnson

Patients, Iowa fans turn Atlanta into one big celebration

ATLANTA—A few hours prior to Iowa's New Year's Eve victory at the Peach Bowl, the entire team had a celebration at the regal Regency Hotel, where the UI men stayed while playing in this major southern football event.

According to UI coach Hayden Fry, it was the most exciting week in recent memory for the Hawk fans.

"...we don't want any of those ballet-type movies." -Hayden Fry

By Merewyn Holman

The Hawkeyes ended the season in Atlanta, Georgia, but it was the Georgia fans who were the ones arriving for the New Year's Eve party at the Regency Hotel.

"There was also a thriving market in pseudo-drugs, like hash, and the cocaine money was down the drain. But it was the hash that got them into trouble. For a while we had to sell them a lot more, for the hash as collateral, and go to make the buy." -Fry

At the hotel, the UI Hawks were entertained until the wee hours of the morning. They were then whisked away to the ball, where they were treated like royalty.

"It was an interesting week in Atlanta. The Hawkeyes were a viscous threat. This week, however, they were not the only ones doing the fighting. The Southern accents could be heard, the UI fans were in full swing, and the Hawks were looking forward to a great party." -Staff Writer

Winos, moonies turn into Hawk fans for a weekend

By T. Johnson

The Iowa-Maryland game was the first of the season to be played in the south. The Hawkeyes arrived in Atlanta last week, and the team stayed at the Marietta Hotel, where the band and football team were housed. Iowa fans turned the hotel into a mayor party of musical numbers, and the hotel was transformed into a large party.

"The_smoothest sound and the sweetest melody I have ever heard is the sound of the Iowa fans. They are a bunch of good people, and I enjoyed talking with them." -Fry

The Sunday after the game, the Hawkeyes were off to the Peach Bowl, where they faced the Volunteers of Tennessee. The game was a close one, and Iowa fans were thrilled with the victory.

"We're going to play a lot better than we did in the Peach Bowl. We're going to play a lot better than we did in the Rose Bowl. We're going to play a lot better than we did in the Orange Bowl." -Fry

On the road with Hayden Fry

The Hawkeye band arrived in Atlanta on New Year's Eve, and the UI fans were thrilled to see their team playing on national television.

"...we don't want any of those ballet-type movies." -Hayden Fry
The sideline scene was part of the show, too

By T. Johnson

ATLANTA - A sight on the heels of game time was a garishly adorned table at the Peach Bowl press conference, with students, coaches and players of both teams, officials from the schools, Lions Club dignitaries and Iowans acting as if they were seated at a table set and ready to receive their guests. In fact, they were gathered on a stage, and the one thing they were trying to do was make good use of their champagne glasses and four-course meal. The players were seated on a stage, and the one thing they were trying to do was make good use of their champagne glasses and four-course meal. The players were seated on a stage, and the one thing they were trying to do was make good use of their champagne glasses and four-course meal.

Museum shows monastery plan

By Ronnie Richardson

Five months ago one of the local department stores lost its most popular employee. That's why it's a bit surprising to hear the stories about the unique nature of this particular employee's leaving.

The employee in question was a man who had been a fixture in the store for many years. He was known for his friendly demeanor and his love of the customers. He was always willing to help anyone who needed it, and his presence was a comfort to many.

But as much as the store misses him, the man himself is even more devastated. He spent many years working at the store, and he took great pride in his job. He was more than just a employee to him; he was a part of the family.

The store has tried to fill the void left by his departure, but no one has been able to replace him. The customers are still asking for his help, and the store is struggling to meet their needs.

It's a bittersweet moment for everyone involved, but the memory of his contribution will live on for years to come. He was a true friend to many, and his legacy will continue to inspire others to be kind and helpful to those around them.

**Morality plays' echoes sound in new Shaw novel**

By James Kacina

Special to The Daily Iowa

According to Lawrence B. Turcotte, now at the University of Arizona, his work on Thomas Middleton has shown that despite the differences between the Elizabethan era and the 20th century, the nature of morality plays' echoes can be found in both. Turcotte's work has been supported by a grant from the National Endowment for the Arts.

Turcotte's research, which has been published in several academic journals, has focused on the ways in which modern interpretations of morality plays can illuminate the contemporary world. His work has been praised for its interdisciplinary approach, which combines elements of literature, philosophy, and social science.

Turcotte's latest book, "Echoes of the Past," explores the ways in which morality plays continue to resonate in the 21st century. The book includes essays on a range of topics, including the role of morality plays in contemporary politics and the ways in which they can be used to address issues of social justice.

**Books**

... continues his work on the Elizabethan theater, where he has focused on the ways in which morality plays were used to address social problems. His book "Echoes of the Past" has been praised for its innovative approach to interpreting these plays.

British TV viewers bristle at new breakfast program

LONDON (AP) - Sleepy Britons got their first taste of morning television last week, an innovation that seems to have caught on with the public quickly. The new program, called "Breakfast TV," has been described as a "cross between a news program and a morning show." It has been well-received by viewers, who have praised its upbeat tone and its focus on positive stories.

Newcomers Greene, Speer "just superb" as Hawks claim second in five team meet

By Steve Batterson
Assistant Sports Editor

Two newcomers helped lead the Iowa women's gymnastics team to a second place finish in a five team meet at San Francisco Friday night.

"A.J. (Greene) and Christy (Speer) just did a great job," said head Coach Diane Chapela.

"They did better than the girls on the other teams who had been working all year," she added.

Greene, a freshman from Mississippi, subbed in for the floor routine during the meet and was placed in the event for the first time.

"I was really very pleased with both of them," Chapela said.

While neither of the gymnasts placed, they were really very pleased with what they had done.

Chapela said, "I was really very pleased with what they had done.

"They didn't have much snow. An excess of white stuff isn't too much snow. Actually, there wasn't too much snow. There were only five or six privately owned ice boats by club members, and there are also five or six sailing on soft lake ice. There are also five or six sailing on soft lake ice.

"We didn't get much wind, but there was enough to keep the ice boats going.

"We had a good day racing," Chapela said.

Everyone liked their races very well. On the hunt, the jumping wasn't too bad. They were doing a good job. They were doing a good job. They were doing a good job.

"We had a good day racing," Chapela said.

"They were doing a good job. They were doing a good job. They were doing a good job.

Chapela said, "I was really very pleased with what they had done.

"They didn't have much snow. An excess of white stuff isn't too much snow. Actually, there wasn't too much snow. There were only five or six privately owned ice boats by club members, and there are also five or six sailing on soft lake ice.

No comment by NFL office on 'fix' charges

NEW YORK (UPI) - National Football League officials viewed the first-time Monday Night Football regular season game in the late 1980s favorably.

"We have no immediate complaints," Jim Jones, NFL public relations director, said.

But the officials will come under fire if they have a chance to do so.

The league has a policy of not commenting on officiating for fear of appearing to be fixiters.

"We have nothing to gain by commenting," Jones said.

"We have nothing to lose."
Hassard features youthful runners

By Steve Riley

While none track coaches believe youth is a substitute for winning, Iowa's Jerry Hassard has long argued the opposite.
