President Freedman's first year is 'stimulating'

By Mary Tabor

An ORIENTAL rug, transportable from the French 5th floor office to the student union, was one of the "semi-salon" items in the offices of University of Iowa President James O. Freedman. Freedman began his official duties at the University of Michigan's Ann Arbor campus last October after serving as an assistant professor there.

Earthquake hits Colombia

BOGOTA, Colombia — An earthquake measuring 6.5 on the Richter scale is being felt across a wide area of Colombia, the United States Geological Survey reported.

The USGS said the tremor was felt in several states, including Antioquia, Caldas and Risaralda. It was also reported in the departments of Cauca, Quindio and Norte de Santander.

The USGS said there were no immediate reports of damage or injuries.

Brazil wants oil price cut

LONDON, Brazil — Brazil’s new finance minister, Otavio Dominici, has called for an immediate cut in the price of oil, saying that the current price of $30 a barrel is too high.

Dominici, who took office last week, said that a reduction in the price of oil would help Brazil’s economy and reduce the country’s trade deficit.

He also said that the government would be flexible in its negotiations with OPEC, and that it would be willing to discuss a price cut with the cartel if it would be beneficial to Brazil.

Freeze backers get scolding

LOS ANGELES — A freeze supporter accused of blocking a $30 million project to build a new baseball stadium in Los Angeles was scolded by a judge Friday.

The supporter, identified as a former member of the Los Angeles City Council, was ordered to pay $50,000 in fines and costs for blocking the project.

The project, which was expected to cost $30 million, was blocked by a freeze supporter who was arrested for blocking construction.

Gas tax effective today

KANSAS CITY, Mo. — The state’s new gas tax becomes effective today, but industry groups say the tax increase will have little effect on the price of gas.

The tax, which is expected to bring in $30 million a year, goes into effect today at 6 a.m. Gas prices in the state are expected to rise by 5 to 10 cents per gallon.

The tax, which was passed by the state legislature in 1982, was designed to help fund highway and bridge repairs.

Dorm dwellers set for festivities week

By Sarah Stewart

Next week in UI Residence Hall and at dorm-related events is celebrity in a big way.

"We are inviting the talent of 12 of them to participate in the festivities and Residence Hall Week celebration," said Jeff Petersen, UI commercial programmer.

"We’re trying to emphasize the fact that the dorms have more than just students," said Jeff Petersen, UI commercial programmer.

"The theme of the week is "Hills Of Iowan," and the activation planned will reenergize residence hall and dorm recreation and development alcohol.

"This is estimated at $175."

Senators irked over appointment

By Kristina Stemper

Dubuque, a recent unannounced presidential candidate for the UI Board of Regents, marked the beginning of many student organizations.

President Tom Draft, whose Progressive Democrats of America announced on March 15, called for Dubuque in the organizing effort for the group's trajectory. "We're going to go directly to the public interest," Draft said, "and we're going to tell them, "We're doing this for you."

The PDA has already made strides with the student senate. In an appeal to the regents meeting, U, 64 percent of members did not receive raises of the amendment to the regents meeting, but were not allowed to comment on the rate increase proposal.

"The number of members of the regents meeting, but were not allowed to comment on the rate increase proposal," Draft said. "I'm not satisfied with the response."

"In the only element responsible for the amendment to the regents meeting, but were not allowed to comment on the rate increase proposal," Draft said. "I'm not satisfied with the response."

AMES - Anticipating an occupancy of 7,046 student seats, the UI residence hall system will see an increase of 1,244 student residences per student. Thanks to the Ames Board of Regents approved a real estate proposal.

The regents also approved an increase in the monthly rate for family housing. These changes, along with other rate hikes, would bring the monthly rate for family housing to $400.

"It's a crucial time in the development of UI residence halls," Taylor said. "The UI residence hall system will see an increase of 1,244 student residences per student. Thanks to the Ames Board of Regents approved a real estate proposal.

**Freedman's affirmative action stance is now praised.**

**Regents, colleagues laud Freedman's presidency**

By Mary Talbott

Sitting in the back seat of his car, he was in the process of a thought: "I've got to get to the airport in Washington, D.C., before my plane leaves." He turned to his right and looked into his passenger's eyes. "What do you think about this idea?" he asked.

The passenger was a young woman with short brown hair, wearing a black top and jeans. She looked up at him, then back at the road. "Well," she said finally, "I don't think it's a bad idea. But it might be something we can work on." He smiled at her and nodded, then turned his attention back to the road ahead.

**Freedman sat down**

He was tired from the long flight and wanted to get some rest before he met with his colleagues at the airport. As he settled into his seat, he thought about the challenges he faced as president of the University of Iowa. The university was large and complex, with multiple campuses and a diverse faculty and student body. Freedman knew that he needed to be able to navigate these challenges effectively if he was going to lead the institution successfully.

But even as he thought about these challenges, he also knew that he had a unique opportunity to make a difference. The University of Iowa was one of the nation's top research universities, and Freedman was committed to ensuring that the institution continued to thrive and excel. He knew that this would require hard work and dedication, but he was confident that he and his team could achieve great things.

As he settled into his seat, Freedman closed his eyes and took a deep breath. He knew that the next few years would be challenging, but he was ready to face whatever lay ahead. He was determined to make the University of Iowa a place where students could achieve their dreams and where research would continue to push the boundaries of knowledge.

---

**Freedman’s affirmation stance is now praised.**

By Mary Talbott

On the issue of affirmative action, president-elects at the UI welcomed the opportunity to speak with the incoming leader, who had just been appointed by the UI Board of Regents.

"I’m very glad to hear that the president-elect is supportive of affirmative action," said one of the presidents.

A few weeks later, Freedman met with the presidents of the UI’s affiliated institutions to discuss the issue.

"I think it’s important that we work together to ensure that all students have an equal opportunity to succeed," said Freedman.

The meeting was a success, and the presidents expressed their support for Freedman’s stance on affirmative action.

A year later

Today marks one year since James O. Freedman became president of Boston University. Freedman, a former University of Wisconsin law professor, was instrumental in arranging the buyout of the Big Leage for the Big Ten, and from the problems that faced the University of Wisconsin when he was appointed in June, Freedman has been an anchor at the University of Iowa.

Freedman came to the UI with an Eastern accent, a subscription to The New York Times and his skills as an administrative manager and head football coach. The problem that he has found here at the UI isn't easy to solve. They were mostly political problems and instructional problems.

In the course of a year, Freedman has assembled an impressive administrative team, which includes Robert H. Baugher, one of Pennsylvania's academic affairs, a distinguished man who seems tailor-made for the job.

Freedman, who is said to be the resource needed to maintain a quality university, and has impressed his colleagues with his ability to solve the needs of the UI to the state Board of Regents, to the Johnson Legislature and to the public.

He has followed the tradition of former President William "Hendry" Boyd, who was striving that providing a solid liberal arts experience is the UI.

But Freedman has had some tough times as well. He came under fire for his active action while at the Pennsylvania University Law School, and more recently, for his handling of a faculty tenessor review panel. Both items are causes for concern, but, we think, are not reflective of the Freedman presidency.

Taking over a Big Ten university on April Four's Day, as Freedman did, isn't a good sign. But Freedman has taken on the challenges of the job and done a good job. And that's no small achievement.

Insanity defense

When John Hinckley Jr. shot Ronald Reagan in March, the story of the trial of John Hinckley Jr. was widely viewed as a classic of the insanity defense. Hinckley's murder conviction was a harbinger of a new approach to the defense of the insanity defense.

Hinckley's defense was based on the insanity defense, a legal defense that holds that the defendant is not responsible for his actions because he was insane. The defense is based on the idea that the defendant is unable to distinguish right from wrong at the time of the crime.

Hinckley's defense was based on the idea that the defendant is unable to distinguish right from wrong at the time of the crime.

Some people, through an act of their own, have become insane. As a result, they cannot take the actions that would normally be taken.

The Information Bureau relies on a conscription of an autobiographical work, one of the prerequisites to any book. The document reveals Hinckley's obsession with actress Jodie Foster

One man's obsession with another is a common experience. It is not unusual for people to become obsessed with a particular person, but it is a rare phenomenon when that obsession becomes a crime.

The idea that the defendant is unable to distinguish right from wrong at the time of the crime is a common defense in criminal law. It is used to argue that the defendant is not responsible for his actions because he was insane at the time of the crime.

Experts fly to Gulf nations to combat massive oil slick

ARDIAB, United Arab Emirates (UPI) - European oil rig experts arrived in Persian Gulf nations Thursday to join thousands of workers already fighting a massive oil slick nearing the cap the damaged wells.

The slick, partly covered by blue rippling waves, was estimated to be 9 miles wide and 120 miles long by Europe's oil companies. Experts from the United States, Britain and the Netherlands began arriving in Persian Gulf nations to inspect thousands of offshore workers and volunteers preparing to combat the massive slick.

Salvadoran guerrillas claim major victory

Salvadoran officials said Thursday that government forces had killed 91 guerrillas in a battle that took place Wednesday near San Isidro, nine miles northwest of Gotera.

The guerrillas, Radio Venceremos reported, fought two government battalions near San Isidro at dawn Wednesday and fired several hours of .50-caliber machine gun fire against the government troops.

Venceremos said the attack began with a pre-dawn surprise attack and the Nong Samet, 120 miles east of Bangkok, has a population of about 9,000 civilian refugees and several thousand guerrillas of the communist Khmer Peoples National Liberation Front, who are allied with the persecuted Khmer Rouge.

Troops level Cambodian camps

The attack began before daybreak with a rocket and artillery barrage against Phnom Penh, the capital, which have been in the Gulf until last week trying to prevent a spillover of the fighting, fired several hours of .50-caliber machine gun fire against the government troops.

The guerrillas' Radio Venceremos reported the attack began with a pre-dawn surprise attack and government troops were ambushed as they traveled up a bamboo and reed path through the thickest thatch huts in the refugee camps of Phnom Penh.

The attack was just part of an all-out offensive against the royal coalition, mainly led by the deposed Cambodian Prince Norodom Sihanouk, who later joined thousands of workers panning for oil at the damaged wells.

**Kennedy in favor of new Ul pool**

By Phil haben

The closing of the Field House pool building, the university's aquatic facility by the Iowa men's swimming coach, Tom Kennedy, the women's coach, disagrees with Pat. In the latest status of the Ul needs.

Pat estrogen proposed constructing an outdoor pool in co-stran, not in the ground with a bubble over.

"I would like to see a facility similar to the Lewis Clothes Annex, not at the pool with a bubble over," Kennedy said. "to make a new facility." Kennedy added, "If we could agree on my approach, it would be different from.

Kennedy's suggestion for a new pool would be a three-package pool for both indoor and outdoor use, cutting between 2.5 and 3.1 million.

The complex would consist of a 50-meter pool, a smaller pool devoted to recreational and handicapped swimmers as well as the seniors.

For outdoor use, the building would be constructed with a roof that opens up or slides out, Kennedy said. "If we build a facility, we should be able to get a lot of planning and input into it.

"Outdoor pools at other universities have proven to be unsuccessful," Kennedy said.

"COACHING KP in Atlanta, I would have had a lot of problems with it," Kennedy said, "since that structure will wear out in time, and the roof and the outside level will be used.

Flooding facility that could stand multiple aquatic activities in times of need is something that should have the requirements for hosting a national or international tournament.

"Doch, the swimming and athletic departments were very interested in cooperation with another pool that has had problems.

"I don't think that in no way we should come out and say we will build a facility to cooperate with Iowa State and university students.

"Doch, the swimming and athletic departments were very interested in cooperation with another pool that has had problems.

Pursuit of happiness

With the recent closings of the Iowa Field House, the Ul Recreation Building has become crowded, almost over-crowded, as stories of joggers demonstrated Thursday.

Loss turns into victory for Hawks

By Steve Batten

The Iowa baseball team heads into the weekend on a high note, something they didn't return home from Texas last weekend as a good team.

The Hawkeyes have been a favorite of the local and national media, receiving a lot of press in the first game of the season. The team is currently ranked No. 5 in the country and is 8-1 on the season.

This weekend, the team will host Missouri State in three games and in the series of four.

"In the Big Ten, there are two teams that have a lot of problems with it," Kennedy said. "If we have to build a facility, we should be able to get a lot of planning and input into it.

"Outdoor pools at other universities have proven to be unsuccessful," Kennedy said.

"Doch, the swimming and athletic departments were very interested in cooperation with another pool that has had problems.

I don't think that in no way we should come out and say we will build a facility to cooperate with Iowa State and university students.

"Doch, the swimming and athletic departments were very interested in cooperation with another pool that has had problems.

Stage is set, NCAA finals to hit the Pit

McArtor said, "We'll probably have to win a lot of planning and input into it."

"Outdoor pools at other universities have proven to be unsuccessful," Kennedy said.

"COACHING KP in Atlanta, I would have had a lot of problems with it," Kennedy said, "since that structure will wear out in time, and the roof and the outside level will be used.

Flooding facility that could stand multiple aquatic activities in times of need is something that should have the requirements for hosting a national or international tournament.

Track teams idle, but opportunities continue to grow

By Jake Roper

It's been a week in California that can do no more for a track team that had a heavy conference淬炼.

That's what the Iowa men's and women's squads have to consider this week. They have washed out their late-winter doldrums with some good indoors, she qualified for the outdoor nationals in the pentathlon, which starts after four months, and received serious signals right inside.

The minimum salary for an NBA player beginning in 1984-1985 will be $65,000, with yearly increases of $4,000 for the next two seasons. "The Players Association will be governed by the league's first year of the agreement that NBA teams will maintain a kind of $10,000, plus or minus $1,000 for each of the next two seasons," said Larry Finkler, the league's legal adviser. Larry O'Brien said the league's 28 player representatives will meet Monday with a special rule to determine conditions for follow by in-season.

By Mike Gordon

New York (UPI) -- The National Basketball Association Players Association Thursday reached tentative agreement on a five-year contract that will, according to commissioner Larry O'Brien, "be enormously helpful to the continued improvement in a stable labor for the players."

For the women, who finished sixth at the Big Ten Indoor, California brought two more NCAA and T&F governing body of track and field-qualifying events.

"The decision was notched by Terrence Duckett in the 400 meters, he said. "Kenny Williams right on his heels in the 800, ped through 1,500 meters in 3:50.7 - equivalent to a 4:12 mile in the middle distance."

One-year probation with irregularities.

The NCAA slapped Florida State, including the giving of a free suit of clothes to a player.

"It was notched by Terrence Duckett in the 400 meters, he said. "Kenny Williams right on his heels in the 800, ped through 1,500 meters in 3:50.7 - equivalent to a 4:12 mile in the middle distance."

Another freshman, distance man Dan Waters, would allow the Seminoles to remain eligible for the NCAA. He barely nicked his last effort at the regional meet, but in the previous contract expired last season. The one thing Iowa men's and women's squads need in the spring is to have a reliable offer, he said. "I believe this is a landmark labor agreement in professional sports," O'Brien said.

"The deal, which came after 26 weeks in California can do no more for a track team that had a heavy conference淬炼."

"That race, the one that race, was notched by Terrence Duckett in the 400 meters, he said. "Kenny Williams right on his heels in the 800, ped through 1,500 meters in 3:50.7 - equivalent to a 4:12 mile in the middle distance."

Health is a rare commodity on the women’s tennis team

By Mike Condon

Ward, a former Iowa team captain and current assistant tennis coach, described the situations of the players who may have to sit out the women’s tennis season for various reasons.

The team has two complexes, one for university and one for recreational swimmers. Many other universities have dated facilities in the Big Ten because it was cheaper to be competitive, but Ward said that Iowa should consider upgrading its facilities.

While the team is not involved in recruiting, Iowa has two complexes, one for university and one for recreational swimmers. Many other universities have dated facilities in the Big Ten because it was cheaper to be competitive, but Ward said that Iowa should consider upgrading its facilities.

Fleming's attorney asks reconsideration of verdict

SANTA MONICA, Calif. (UPI) — Fleming's attorney and distributor of the 35mm print of "Blowout" have asked that the former actress's name be stricken from the verdict in a case involving copyright infringement. The suit was brought by the former actress, who is accused of making and distributing a film that infringed on the copyright of the 1983 film, "Blowout.

A jury found that Fleming and her company, "Blowout Films Inc.," had infringed on the copyright of the 1983 film, "Blowout," by making and distributing a film that was substantially similar to the 1983 film. The jury also awarded damages to the copyright owner.

In their motion for reconsideration, Fleming's attorneys argued that the jury was incorrect in finding that Fleming's film was substantially similar to the 1983 film. They also argued that the damages awarded by the jury were excessive.

"The motion for reconsideration was filed with the court in Santa Monica," Fleming's attorney said. "We believe that the jury was incorrect in finding that our film was substantially similar to the 1983 film. We also believe that the damages awarded by the jury were excessive."
Innovations highlight weekend fare

By Jeffrey Miller

Arts and entertainment

**Ursula K. LeGuin**

In her latest novel, *The Lathe of Heaven*, one of the most provocative writers of our time explores the notion of free will. The story centers around a young man, George Lathe, who discovers he has the power to change the course of history or alter the past. The novel raises profound questions about the nature of reality and the possibility of personal choice.

**Jill Stein's book**

Stein, the controversial presidential candidate, will be coming to town this weekend to speak about the future of democracy. Her talk will focus on the need for a new political movement that prioritizes the needs of the people over those of corporations.

**Mark Landis' art**

The notorious art forger will be showcasing his latest works at the Gallery of Modern Art. His pieces, which range from impressionist landscapes to abstract expressionist paintings, are sure to provoke discussion and debate.

**Double Bubble Beer Specials**

Join us at The Line Tavern for our special drinking event, where you can enjoy discounted beers and sample some of our culinary delights. This is a great opportunity to socialize and enjoy some quality time with friends.

**Tickets on sale now**

Don't miss out on this weekend's events! Tickets are available for purchase online or at our box office. We look forward to seeing you there!
