## UI health workers fear risk of AIDS

By Becky Snyder  
Special to The Daily Iowan

Some UI health care professionals are apprehensive about working with Acquired Immune Deficiency Syndrome (AIDS) patients although a UI epidemiologist says there is little evidence that workers are at a risk.

"There is a certain degree of apprehension among health care workers, some of which is legitimate and some of which is hysteria," said Dr. Michael Massanari, associate epidemiologist for the UI Hospitals.

"One needs to be cautious, but although the risk seems to be very high, we don't have evidence that the health care worker is at a risk," Massanari said.

AIDS is an often fatal, cancer-like disease, which primarily affects homosexual men, hemophiliacs and Haitians. Massanari said there has been only one "confirmed" case of AIDS at the UI Hospitals.

Recently UI pathologist Earl Rose refused to perform an autopsy on the body of an AIDS victim. Several other hospital personnel have refused contact with an AIDS patient, or expressed concern about the risk involved.

Nadine Stark, a clinical lab technologist, said she "chose not to go into the room" of an AIDS patient when asked to assist in a bone marrow biopsy.

Stark said she waited outside the room while doctors took the bone marrow from the patient. Stark then took the specimen back to the laboratory for tests.

"I said, 'I'm just scared and I'd rather not go in if you don't mind,'" Stark said. "The doctors were very understanding."

Stark said that she would be willing to enter the room of an AIDS patient in the future. "I think I would go," she said, "because they know more about it (AIDS) now."

However, some of the other workers who have had contact with AIDS patients say that they might refuse to work with them in the future.

Head phlebotomist Trudy Westfield, who is responsible for the people who draw blood from patients, said she has mixed feelings about drawing blood from AIDS patients.

## Face the music

Ann Carr concentrates on instructions from her teacher during her violin lesson at The Precuil School of Music in Iowa City Tuesday afternoon. Ann, an 8-year-old third-grader from North Liberty, is in her fifth year of lessons at the school. Doris Precuil founded the school in 1958. It now has about 300 students.

The Daily Iowan/Jeff Cook

## 2 Marines are killed in Lebanon

### Christian villagers massacred

BEIRUT, Lebanon (UPI) — A new massacre of Christian villagers was reported Tuesday as the army and Druze Moslem militias both claimed victories in an escalating civil war that left two U.S. Marines dead and three others wounded.

The Marines were killed Monday when a rocket apparently fired by Druze Moslem militiamen exploded in a Marine bunker about 4 a.m. Lebanon time.

Altogether, five Marines have been killed since the Marines went to Beirut last fall after the Israeli invasion as part of the multinational peacekeeping force.

With shelling apparently aimed at their positions, the Marines fired back with machine guns, mortars, artillery and tanks, their commander said. Six Italian peacekeepers also were wounded, one seriously, their command reported.

The Druze massacre of Christians in the town of Bhamdoun, 12 miles east of Beirut, was in revenge for a reported massacre of at least 40 Druze Monday in the Shouf mountain village of Kfar Matta, government sources said.

### U.S. sends a warning to Syria

WASHINGTON (UPI) — The White House served notice Tuesday that Syria should view the movement of 2,000 more Marines to waters off Lebanon as a warning to stop fomenting sectarian violence.

At the same time, presidential spokesman Larry Speakes said President Reagan plans "no change whatsoever" in the status of the 1200-member Marine peacekeeping contingent now in Lebanon despite the deaths of two more American soldiers.

The spokesman said the new Marine task force is an addition to an existing 600-Marine fleet that has provided support to U.S. troops ashore in response to recent Shiite and Druze attacks.

"I think the Syrians should know that we do have considerable firepower offshore and they should be circumspect in their own active involvement in instigating any violence in the area," he said.

The 31st Marine Amphibious Unit left Friday for Lebanon aboard three naval transport ships from Kenya, where it was conducting a port visit. The trip is expected to take a week.

Thousands of refugees were reported fleeing the violence that has wracked the Shouf mountains since Israel withdrew from the region around Beirut Sunday, sparking battles between the Druze, the army and Christian militias.

A government spokesman said the army was intent on taking control of the strategic Beirut-Damascus highway all the way to

AT LEAST 26 people were killed and 57 others were wounded, according to a compilation of official police reports. The casualties brought the death toll in the last three days to 76 dead and 212 wounded.

THE LATEST turn of events, which brought the death toll to five for the Marines sent to Lebanon last year, again raised questions about the U.S. role and Reagan's adherence to the War Powers Resolution.

Under one section of the War Powers Resolution, congressional approval is needed to keep American troops in an area of hostilities or imminent hostilities longer than 90 days.

"No one should mistake our determination to continue in this just cause," Speakes said. He said the presidential decision has "congressional support at the highest levels."

## School board choices are limited

By Carlos Trevino  
Staff Writer

A "Meet the Candidates" session was held at West High School Tuesday night to give Iowa City School District board candidates Thomas Halliburton, Patrick Lumsden and Ellen Widiss — who announced her write-in candidacy Saturday — an opportunity to gain public exposure.

That exposure, however, saw the candidates give only "general answers" to questions from the panel, according to Carolyn Smith of the Districtwide Parents Organization, which sponsored the event. The panel consisted of a local school administrator, a teacher, a member of the parents organization and two students.

Smith also said it was a disadvantage "only having three candidates" running for the two board vacancies.

"It's evident with only two candidates, and one write-in candidate, it's quite a surprise to everyone that there is a limited choice," Smith said. "I think we're just now learning about them."

Smith said the questions the candidates received from the panel were "new to them, and I'm not sure they've had enough exposure to the public to get an idea of how to react."

"This is why we wanted this forum — to introduce them to the voters," said Smith.

ONE MAJOR QUESTION of the evening from the five-member panel included how each candidate would handle Gov. Terry Branstad's 2.8 percent across-the-board budget cut, which will affect school budgets across the state.

Each candidate said an education lobby should ask Branstad and the Iowa Legislature to make selective cuts to reduce the projected state shortfall as opposed to the across-the-board cut.

Halliburton called Branstad's cut "harsh and untimely," and said it came at the "worst time, when education is a popular topic."

Widiss said the lobby was a good idea, as area legislators have already said they are in favor of selective budget cuts. Therefore, the district

should become part of a "statewide lobby," she said.

Another upcoming financial question directed to candidates concerned the 67.5 cent fund, a special tax levy on property that could be placed on the November 1984 ballot.

THE TRIO EXPLAINED the levy fund could only be used for the district's physical plant needs, but would "free other funds for salaries and supplies, or whatever is needed," Widiss said.

Widiss said she hoped the district voters would approve the levy, while Lumsden said he "would be in favor of putting it on the ballot." In an earlier interview with The Daily Iowan Halliburton said he would not seek an increase in the tax levy.

In reference to President Reagan's national commission report on education, board members varied in their answers.

Widiss said that as a newly announced candidate she was not familiar with the report. "I will go home and read the report — if I get elected."

She then asked, "Will we get the money to do the job?" referring to the report's recommendations.

In a related question, Widiss said she was not for raising general education requirements "if it would raise the drop-out rate," explaining that some students are highly motivated while others would not have "the same abilities."

Both Halliburton and Lumsden said they were for requiring classes in foreign languages and computer sciences because there is "an importance to our youths needing to get involved in (these) areas," Lumsden said.

In answering questions on teacher's salaries and class sizes, Halliburton said that he was for "keeping teachers happy ... raising the minimum salary level."

Widiss said the district budget would determine teachers' workloads and salaries, although "it would be nice to see class sizes lowered," while Lumsden stated, "I can't really say where we'll be ... when (contract) bargaining comes around."

## Women's clinic has many services

By Robyn Griggs  
Staff Writer

The Emma Goldman Clinic for Women provides a wide range of services for women, from abortions to positive experience pregnancy clinics. Yet the staff believes that how these services are performed sets their clinic apart from others.

"First of all, we're a feminist clinic, and how we translate that philosophy into the provision of services is that we work to expand and support women's services, particularly in the reproductive services," said Rebecca Arbogast,

This story is the second in a three-part series on the Emma Goldman Clinic for Women, which is celebrating its tenth anniversary this week.

clinic community relations coordinator.

"We also have an emphasis on preventive health care, which is different than traditional medical service, which is more crisis-oriented," she said.

The clinic emphasizes a "participatory approach" to its services

and a concern for patients' rights.

"The philosophy behind that is that we (women) are in the best position to decide what to do. I think the emphasis on patients' rights comes from a long history of patients going into doctors' offices feeling so powerless," Arbogast said.

"They didn't feel like it was acceptable that they pursue information. What happens then is that you don't get the best health care," she said.

The clinic provides patients with the results of all tests administered to them, access to their files and information on all options.

"We have a patient advocacy system in which a staff woman will accompany the client through her stay here," she said. "This way we can make sure the client gets all her questions answered and make sure she is comfortable and gets the best care possible."

ARBOGAST SAID the clinic's services are not necessarily less expensive than a private physician's office, but a woman receives more for her money.

"For example, for a yearly exam a woman would be here for a little more

Continued from Page 1

the key town of Bhamdoun, whether by force or through negotiation with the Druze.

But the Christian Phalange, the military wing of the party of President Amin Gemayel, admitted defeat in the battle with Druze forces for Bhamdoun.

Israel, which had warned Syria not to increase its power in the Shouf through the use of its Druze allies, said it would not intervene in the fighting unless Syrian troops became directly involved.

Israel pulled out of the Shouf Mountains Sunday, moving back to the Awali River. Immediately, Christians and Druze began battling for the Shouf, with the Druze gaining the upper hand and besieging Bhamdoun on the Beirut-Damascus highway.

Defense Minister Moshe Arens said Israel may stage another partial withdrawal in Lebanon even if Syria does not pull its forces out of the country, according to an interview released Tuesday in the Jerusalem Post.

"If it becomes clear in the next few months after the withdrawal to the Awali River that the Lebanese government takes control of the areas we evacuate, keeps control of it, that the PLO and Syrian forces don't enter the area or take control of it, we will give very serious consideration to continuing to withdraw," he said.

The Marines, caught between the Druze forces on the mountains and the Lebanese army around the south of the capital, again were pounded by artillery shells and rockets that apparently were aimed at the army.

**OF THE THREE** wounded Marines, two were listed as "stabilized and progressing well" and the other suffered only a light wound.

Marine Corps headquarters in Washington identified the slain Marines as Cpl. Pedro J. Valle, 25, of San Juan, Puerto Rico, and Lance Cpl. Randy W. Clark, 19, Minong, Wis.

The latest casualties brought the Marine total since heavy fighting broke out nine days ago to four dead and 24 wounded. The total in the year since the Marines arrived in Beirut stood at five dead and 34 wounded.

Another 2,000 Marines left Friday for the Mediterranean aboard three naval transport ships from Mombasa, Kenya, and are expected to arrive late this week. There are no plans to put those Marines ashore, administration sources said.

"The latest round of firing is attributed to an offensive the Lebanese army has launched to the south and east to occupy the mountains of the Shouf," Marine commander Col. Timothy Geraghty told reporters.

# Soviets admit shooting down jet

United Press International

Moscow admitted Tuesday its warplanes shot down a Korean airliner it said flew over the Soviet Union on an American spying mission. It accused President Reagan of concocting lies about the incident to win support for a new arms race.

Washington, pressing its case against the Soviets in the U.N. Security Council, played recordings of radio communications during the attack indicating the Korean plane did signal recognition of the interceptors.

It said the Soviets should have known the Korean jumbo was a civilian airliner and not a spy plane.

In an official statement read over Moscow television, the Kremlin blamed the entire incident on the United States, called Reagan an "ignoramus" and indicated it would take similar action against any other planes that violated its airspace.

"The entire responsibility for this tragedy rests wholly and fully with the leaders of the United States of America," the Soviet government said of the downing of the Korean Air Lines Boeing 747 with the apparent loss of 269 lives north of Japan early Thursday.

"The intruder plane did not obey the command to fly to a Soviet airfield and tried to evade pursuit," the government said.

"The interceptor fighter plane of the

anti-aircraft defenses fulfilled the order of the command post to stop the flight."

**THE KOREAN** plane had been directed "into Soviet air space to carry out its spying mission. It was flying without navigation lights, at the height of night, in conditions of bad visibility and was not answering the signals," Moscow said.

"The assertions of the United States president that Soviet pilots knew that it was a civilian aircraft are not in keeping with reality."

The Soviet statement indicated Moscow's fighter planes would take similar action if other planes intruded into its airspace.

"We will continue to act in keeping with our legislation, which is fully in accord with international regulations. It is the sovereign right of every state to protect its borders, in particular, its airspace," the statement said.

Saying Reagan's version of the incident was false, the Soviet statement said, "the U.S. president makes himself out as an ignoramus..."

In Washington, the State Department responded to the Soviet statement by saying, "The world community still needs straight answers. We are tired of lies and half-truths." It went on to demand a Soviet apology for the incident, reparations for the victims' families and cooperation in investigating the

tragedy and recovering its victims.

**U.S. AMBASSADOR** to the United Nations Jeane Kirkpatrick told the Security Council two missiles were used to destroy the Korean airliner during its flight from New York to Seoul, via Anchorage.

Then she played tape recordings of the Soviet fighter pilot's voice speaking to his ground control as he shot down the Korean plane.

In the most dramatic exchange, the pilot was heard to say the "target" was decreasing speed and that he was increasing the speed of the interceptor jet.

Then, in quick succession: "Missile warheads locked on ... I have executed the launch ... the target is destroyed ... I am breaking off the attack ... what are my instructions?"

The Soviet statement said the downed plane was flying without navigation lights, but the tapes played at the Security Council carried the voice of the Soviet pilot describing how the 747's lights were lit.

"The A.N.O (air navigational lights) are burning. The strobe (light) is flashing," the Russian pilot was quoted as saying moments before shooting down the airliner.

Soviet U.N. Ambassador Oleg Troyanovsky sat silently as the tape recording was played, but later accused the United States of using the

plane incident in an anti-Soviet propaganda campaign.

"It is well known that in the job of propaganda, the United States has no equal," Troyanovsky said.

**IN WASHINGTON**, White House spokesman Larry Speakes said the Korean airliner may have been over international waters when it was shot down.

"The plane was very close if not out of Soviet airspace" when it was hit, Speakes told reporters. "It very well may have been over international waters when it was hit."

Before admitting they shot down the Korean plane, the Soviets issued a bitter personal attack on Reagan less than 12 hours after the president demanded in a nationally televised address that Moscow tell the truth about the incident.

Radio Moscow countered Tuesday by describing Reagan's speech Monday as hateful, aggressive and designed to win congressional approval for his arms program.

"The U.S. president made bitter, slanderous attacks against the Soviet Union in a bid to arouse an outburst of anti-Soviet sentiment in the American nation," Moscow radio said, noting that Reagan used his appearance to make a pitch for new arms.

# AIDS

Continued from Page 1

"We're not talking about a disease that can debilitate, but something you can die of. I'm not sure we're paid enough to take the risk," she said.

Willie Fisher, another phlebotomist at the UI Hospitals, has drawn blood from an AIDS patient. "He was a young guy, and I sympathized with him, but I was shaky — I felt inhibited. I was thinking 'you could die from this.'"

Because AIDS is thought to be transmitted in the blood, health personnel who work with the blood and secretions of the patients are at risk.

**AS A CLINICAL** technologist, Joelen Atkins performs laboratory tests on blood samples from hospital patients. "At first," Atkins said, "they didn't mark AIDS samples any differently — that was kind of distressing. It seems like we're not very organized for handling AIDS yet."

The UI Hospitals' policies concerning treatment of AIDS patients and AIDS specimens are the same as those for hepatitis, Massanari said. Health professionals are told to "avoid exposure to the blood and secretion products of the patients."

Massanari also said the AIDS patients are kept in isolation and personnel entering the room must wear gowns and gloves. All equipment used on the patient is either sterilized or disposable.

However, this does not always eliminate worker apprehension. "When it first came up, they said to treat it as hepatitis, but there's not much comparison," Fisher said. "If you get stuck by a needle from a hepatitis patient, you can be inoculated."

"But there's no inoculation for AIDS," she said. "At four dollars an hour is that risk worth it?"

# Clinic

Continued from Page 1

than an hour, and in a doctor's office that stay is about ten minutes. What happens is more question and answer sessions than they wouldn't receive elsewhere," she said.

The clinic continues to offer new services, Arbogast said. "Probably one of our most exciting expansions is the donor insemination project that just opened this month."

In response to calls from Midwestern women who wished to become pregnant but could not find a service to accommodate them, the clinic spent months doing extensive research and put together the insemination clinic.

So far two women have taken advantage of the service, which Arbogast said is "technically really easy" and "wonderfully consistent with the feminist philosophy we have of expanding women's services."

But it is abortion that Arbogast said is probably the clinic's most widely-known service. It is administered to women in the first trimester of pregnancy at a cost of \$260.

The patient, typically at the clinic for about 2½ hours, is encouraged to bring along friends or relatives for moral support.

An information session for family members dealing with guilt feelings and how to help the woman take care of her body following the abortion is also offered.

"I think women come away feeling like they've regained some power over their lives, and probably that's what's most appreciated," Arbogast said.

**ABOUT TWO-THIRDS** of the women administered abortions by the clinic are from outside the Iowa City area. "Contrary to the popular notion, they are not promiscuous college coeds," Arbogast said.

The "flip side" of the abortion service is the prenatal program offered by the clinic. Early and late pregnancy classes place an emphasis on

"providing education that will allow her (the mother) to prepare for birthing so as to get the most out of her pregnancy," Arbogast said.

The classes offer information on anatomy, nutrition, relaxation and discuss feelings about pregnancy, including physical and lifestyle changes. A prenatal consultation is available at a cost of \$15; prenatal classes are \$35.

The clinic also offers a "well woman gynecology clinic," including preventive health check-ups, yearly exams, pap smears, and birth control alternatives.

"Probably one of the most noteworthy things about the gynecology clinic is that the woman learns to do a self-cervical exam," Arbogast said.

"For so many people it is the first time they have had an exam that has allowed them any dignity. I don't know how many comments I've heard from women who walk out and feel so much better about their bodies than they did when they walked in because it's not so shrouded in mystery."

This knowledge will help a woman spot infection or become aware of a pregnancy earlier and "is essential if she is going to be using any barrier method of birth control," Arbogast said.

**ONE SUCH BARRIER** method is a cervical cap, classified as an experimental method of birth control. The clinic will fit this device at a cost of \$50.

Although the caps are an "old, old method" of birth control, according to Arbogast, "we began importing the caps from England around 1978 and were one of two clinics in the country who began doing so. We get requests for that from all over the country and other countries, as well. We're hoping that in the future they'll become more widely available."

# Balmer decides not to run again for city council

By Carlos Trevino  
Staff Writer

During his eight years as an Iowa City Councilor, John Balmer's family has increased by four children and his work load at Plumbers Supply Co. has become more demanding.

Those two factors, along with his belief that "it's good to have a turnover, a change, on the council," prompted Balmer to announce Tuesday that he will not seek re-election in November.

In Coralville Tuesday, the first day for filing petitions, Mayor Michael Kattchee said he will seek a third term because "there are things which need to be done and I've decided I'd like to be involved with them."

Kattchee is approaching his sixth year as mayor of Coralville, a city that has seen a boom in apartment and commercial development.

Balmer, who served as Iowa City's mayor for two years prior to Neuhauser's term, said "I think there are several reasons why I'm not running, but the main ones are business duties and the needs of my family."

"I'd like to commit more time to my family than I have over the past eight years as a councilor. Besides, I think that any public official who has served for any length of time should allow others to have a chance to serve," he said.

Iowa City Mayor Mary Neuhauser said Tuesday she could understand why Balmer will not seek another term on the council, saying "his kids are growing up and he wants to spend more time with them ... I have to admire him for that."

Neuhauser said she and Balmer sometimes found themselves at opposite ends of issues, but "we agreed more than we disagreed on issues ... John is an exceptionally fine councilor. He has always been well informed and we could always rely on him to come up with (committee) reports," she said. "He has been extremely helpful to me and very helpful in explaining council activity to the business community."

Balmer currently serves on the council's Waste-Water Treatment committee, Legislative committee, Tourism committee, and is chairman of the

Johnson County Council of Governments.

"I think very few people are aware of the work he does behind the scenes with committees he's given time to," Neuhauser said. "I think his not running will be a great loss to Iowa City."

Balmer said that time commitments became a larger problem — an unavoidable one — in the past two years of what could be his final term as a city councilor.

"There are so many committees, and they've been formed to accomplish important projects," Balmer said. "It (time demands) has all increased significantly."

Balmer said the council has been a large part of his life for the past several years, and he would miss working with other councilors and city staff but said "there will be life after the city council."

"I'll miss the other councilors and helping to make policy for the future of Iowa City. Other things I have planned won't be high-profile items, but I'll fill my time," he said.

Balmer said serving on the council taught him "to listen to other points of

view, and I realized that there are other councilors who work within the group, and no one councilor controls the others."

Kattchee, announcing his candidacy with no reservations, said he wants to "try and do a decent job with what available funds we have now ... and that's always been a problem."

Kattchee cited increased traffic and an increased need for public transit as two main issues which need to be confronted by the Coralville city government.

"There are problems like that we have to face up to," Kattchee said. "And the problems happen since we've had a spurt of development here."

Kattchee, who was a full-time UI student last spring when he gained his certification as a secondary teacher in math and physics, said "I simply would like to continue the job presently being done here."

In addition to Kattchee, the terms of two other Coralville officials, Councilors Robert Dvorsky and Harry Ehnson, expire January 1.

Neither has filed for re-election at this time.

"I'd like to commit more time to my family than I have over the past eight years as a councilor," John Balmer says of his decision not to run again.

John Balmer

announced their candidacies for the two available at-large council seats.

"Things are going extremely well in Iowa City," Neuhauser said. "I'd hope we get a broad arena of candidates ... It would say something about Iowa City if we didn't."

## Copping out

The bad news has been known for awhile; the Iowa budget is out of balance. What wasn't certain until last Friday was how it was going to be balanced: by calling the legislature back for a special session to make selective cuts, or by an across-the-board cut by Gov. Terry Branstad.

Neither alternative was attractive, but Branstad chose the worst of the evils. On the surface his decision to make across-the-board cuts seems fair, but it isn't. While all programs in the budget are important, they are not equally important. Branstad refused to make the hard choices of deciding which were most important.

In refusing to make the difficult choices he ended up cutting money for education along with everything else. This despite the fact that a recent Iowa Poll indicated a sizeable majority of Iowans would pay higher taxes to improve education and despite the fact that the real salaries of teachers, for example, have declined about 15 percent over the last decade. Nationwide that decline has been around 12 percent.

University faculty in the state have also fallen far behind, having started behind, and they will get no raise this year. Now other programs and needs will be cut, including nearly \$6 million from the UI. Such cuts, combined with falling pay for faculty and rising enrollment, make it even less likely that the state universities will ever catch up. And the cuts violate Branstad campaign rhetoric. He promised not only to cut education funding, but to seek ways to increase it.

Even more important, such cuts are stupid. Stupid in their own right and stupid when calculated into Branstad's own plans for the state. The cuts are stupid because the hard, painful fact is that quality education costs money. Teachers have to be paid as professionals, not as janitors or baby sitters, and they are not — not at the elementary, secondary or college level. Schools need equipment; they need books for the libraries, lab equipment, computers and so on.

And Branstad's plan for the future of the state includes trying to lure more so-called high tech industry and information processing to the state. To do that the state must have quality schools to provide educated workers. Moreover, to keep the quality teachers, at all levels, who would attract new future-oriented businesses, salaries must be raised. And every year that faculty at the universities go without raises they are in effect suffering pay cuts.

Despite all this, within the first year of office Branstad has taken steps that he said he would not and has undercut his own plans to revitalize the state. In seeking to avoid the hard choices, Branstad has copped out.

Linda Schuppener  
Staff Writer

Terry Branstad during his successful gubernatorial campaign.

## Time to clean up

Last December, the Environmental Protection Agency replaced its list of 160 of the most dangerous hazardous waste sites around the country with a priority list of 418 national hazardous waste sites to be cleaned up under the \$1.6 billion Superfund toxic waste law.

At that time, then-EPA administrator Anne Gorsuch Burford described the 418 sites as "ticking time bombs." Among those on the list of 418 were three Iowa sites: Aldex Corporation of Council Bluffs, Dico of Des Moines and the Labounty site of Charles City.

So comes the EPA's decision last week to trim its target to 133 toxic waste dumps for cleanup action under the Superfund law. Missing from the newest target list are the three Iowa sites. The reason, according to Ron Kopa, director of Iowa's hazardous waste program, is that "we didn't identify any needing attention from that of the Superfund."

Nearly three years after Congress authorized the five-year cleanup under the Comprehensive Environmental Assistance Act of 1980, the EPA has changed its mind again and issued yet another national priority list.

The running Superfund stall makes one wonder whether EPA has its priorities straight at all. If, as former Superfund administrator Rita Lavelle said last year, the name of the game is to get the sites cleaned up, the EPA's continual shifting of priorities may very well result in reaching the game's five-year deadline with fewer than a dozen sites seeing cleanup action.

As it stands, most of the \$1.6 billion appropriated for the national clean up sits idle while chemical disaster sites around the country continue to spread their often unidentified poisons. At the present rate of action, it is likely 1985 will come and Congress' funding of the cleanup of the nation's toxic dumps through Superfund will have been for nothing.

The law requires more. The EPA's targeting and retargeting of the nation's most dangerous dump sites was three years past due. The cleanup must begin now.

## Whom do you trust, Comrade?

Today's column features an interview with Comrade Colonel Stiwanto Berieyou, Soviet Commissar of Cultural Exchanges, International Brotherhood and Air Defense.

**DI:** COLONEL, the world has recently been appalled by the fate of Korean Air Lines Flight 7. How could the Soviet Union shoot down a passenger plane carrying 269 men, women and children?

**Berieyou:** Actually are number of ways. Perhaps we could have used Sam anti-aircraft surface to air missiles, or conventional air-to-air missiles. However, in this instance was decided that heat seeking missiles were most reliable.

**DI:** We were asking how this act was morally possible, not technically feasible.

**Berieyou:** As was reported by reliable state-run news agency Tass on the third day — after initial early also reliable reports by Tass that: 1) unidentified plane flying through Soviet air space subsequently flew too close to sun and wings melted; 2) surprisingly, after Soviet authorities notified pilot of still unidentified plane that he make a wrong turn somewhere, he choose to crash plane in ocean rather than be subject to ridicule in international pilot's lounges around world; 3) at the approximate time a Soviet pilot fired a harmless warning flare in the general vicinity of the still unidentified plane, natural turbulence caused its fuselage to become separated from its engines — that 4) hey, maybe Soviet pilot bravely shot down foreign spy plane invading Soviet air space.

**DI:** How was it possible for Soviet air defense personnel to mistake a Boeing 747 passenger plane for a spy plane, considering that you evidently tracked the flight for two-and-a-half hours while it took no evasive action and a Soviet fighter passed close to the craft?

**Berieyou:** Perhaps the in-flight movie distracted the fighter pilot from noticing that all the cameras he saw were hanging around the necks of Japanese tourists.

**DI:** Was any warning given before the missile was fired?

**Berieyou:** Certainly. We are a peace-

United Nations delegates react to revelations contained in an exclusive DI interview.

## Hoyt Olsen

loving nation that would go to any extremes to avoid forcibly taking human life.

**DI:** Why doesn't this include equipping Soviet fighters with radios that can operate on the internationally recognized frequencies used by commercial flights?

**Berieyou:** Our pilots prefer to have unlisted numbers so they cannot be bothered by obscene callers, such as air traffic controllers at the airports of decadent Western nations our pilots might otherwise inadvertently land at and stay in by mistake.

**DI:** Given this circumstance, how was any warning transmitted?

**BERIEYOU:** Our pilots shouted at the top of their lungs and waved their arms repeatedly. When the trespassing plane refused to slow down and pull over to the side of the jet stream, we had no choice but to fire.

**DI:** Couldn't this act be interpreted as representative of a broader range of Soviet policy? What can be made of a nation that supplies training and finances to international terrorists, whose policy of spreading misinformation extends to sending notices to its own citizens that certain passages of old government-published histories are now inoperable and should be cut out and replaced with new ones, whose leader was the former chief of the most feared secret police in the world, a government that has

been responsible for the deaths of millions of its own citizens, has crushed popular liberalizing movements in Eastern Europe with tanks or threats of using them, has accused the U.S. of racism while discriminating against its own extensive Asian population, whose puppet Bulgaria is implicated in the attempted assassination of a Polish pope seeking reforms in his homeland...

**Berieyou:** Your question reflects sympathy with the hostile attitude of your president towards Mother Russia. With whom are you going to trust? An ex-cowboy actor, or us Mother Russians always willing to let you Americans sample our famous Bolshoi?

Olsen is a UI graduate student. His column appears every Wednesday.

## Letters

### Jaded prophecy

**To the editor:**  
Linda Schuppener should be commended for having the journalistic courage to temper her "Military prophecy" editorial criticizing U.S. Central American policy by putting forth a positive alternative (DI, Sept. 1). Unfortunately, this alternative is steeped in the naive of peacenik philosophy.

It sounds good: We make a deal with the Nicaraguans to stop supporting the rebels who are fighting their government if they will agree to stop sending any arms to rebels in El Salvador. But the Nicaraguans deny sending any arms to Salvadoran rebels, blatantly lying in the face of overwhelming evidence.

Why would they agree to stop doing something they claim they aren't doing? If they would agree to stop arms shipments, their promise wouldn't be worth the paper it was printed on — the smuggling would continue. As for our part of the deal, Schuppener suggests we "assist the Hondurans in driving them (Nicaraguan rebels) out of

Honduras ...." She certainly couldn't have been advocating increased military intervention in the area by recommending that we "drive" the rebels out.

Perhaps she was suggesting a barrage on long-range spitwads. Or maybe she meant for the CIA to sneak in and put itching powder in their bed rolls.

I think a slip of the pen has revealed Schuppener's true opinion: Military force is permissible if it is used to support a fledgling socialist government, but not to support a capitalist one.

**Wes Schlenker**

### Moves toward war

**To the editor:**  
The Soviet Union, in an act of aggression, shot down a jumbo jet en route from New York to Seoul, South Korea. This act of aggression shows clearly that the drive toward war presently underway internationally is being fueled by the Soviets as well as by the U.S. government. The motives

of the Soviets are unknown at this time — the incident may even have been an accident. But incidents of this nature are inevitable when the two superpowers are locked in a game of chicken, when the attitude is one of "shoot first and ask questions later." The table could easily have been turned, with the United States shooting down a civilian liner of a Soviet puppet regime.

The Reagan administration will no doubt use this as an excuse to move forward the war drive here; we oppose any effort to retaliate or get even on the part of the U.S. government. The lesson in this is to oppose moves toward war on the parts of both superpowers.

**Joe Isobaker**  
for New Wave

### Free the market

**To the editor:**  
Renters in Iowa City have two problems right now. One is that rent is very high, and the other is that there is a housing shortage. Simple economics provide a solution to these problems.

The supply of housing will increase until the profit obtained by the landlords goes down to a reasonable level. Because the planning and construction of apartments takes time, there is naturally a delay between the appearance of the shortage and the time at which an adequate supply of housing (and reasonable rents) exists. Attempts to create a price ceiling will inevitably worsen the shortage situation by failing to provide natural financial incentive to build new units.

Another disadvantage of price ceilings is the problem of determining fair profit for the landlords. This process would be costly to taxpayers, unfair to certain landlords and an unnecessary increase in the bureaucracy. The problem would be solved much more easily, effectively, and at a lower cost through the natural market forces.

Admittedly, the housing situation in Iowa City right now creates hardships for a good number of students, who are justified in showing concern, but the fact remains that free enterprise provides the best solution to the problem.  
**Judson V. Spittler**

Coach Jerry Hassard's distance runners are not planning on any meets outside of the country this fall, but one of their main goals for the season is a spot in the NCAA National Championships on Nov. 21, in Bethlehem, Pa.  
"Our focus for the season is the Big

10 and nationals... we gear our scheduling and training around those meets," Hassard said.

The Iowa coach added that, "we're trying to take a low key approach for development right now, but we would like to encourage the team to think about nationals. I feel we have the potential to compete well at a national level."

HASSARD HAS good reason to be excited about the season ahead. The Hawkeyes return their top eight runners from last year's Big Ten cham-

pion squad, seniors Nan Doak and Jodi Hershberger, juniors Jenny Spangler, Anne Dobrowolski, Mary Beth See, Kristin Winjum and Lynn Gnage and sophomore Lynne Davis.

Iowa has also brought in three fine freshmen to go along with a recuperated Jenny Hayden, who was among the top runners last year before missing most of the season with injury problems.

New recruits for the Hawkeyes are Janet Wodek, Sherri Suppelsa and Missy Book. Hassard feels that Wodek,

a standout from Gurnee, Ill., is "the most promising" of the freshmen.

"I'm very optimistic right now because a good portion of our people did quality training over the summer and that, along with Hayden and our new additions, makes me feel at this point that the season has a lot of promise," Hassard said.

THE HAWKEYES were busy running in the streets, in road races and even in marathons this summer as they prepared for the upcoming year, and Hassard said because of this "some of

our athletes are on an accelerated training program already."

Among those who worked the hardest during the summer months were the Hawkeyes' top returners.  
Spangler, a junior from Rockford, Ill., experimented with running in a marathon this summer and ended up setting a world record.

The distance runner turned in a time of two hours, 33 minutes and 51 seconds at the Grandma's Marathon in Duluth, Minn., and the time turned out to be a world record for runners in the 19-year-old age group.  
See Hawkeyes, page 5B

Fifth-seeded Pam Shriver prepares to return a shot against third-seeded Andrea Jaeger during their quarterfinal match at the U.S. Open Tennis Championships Tuesday afternoon in New York. Shriver upset Jaeger, 7-6, 6-3, to advance to the semifinal round on Friday.

## Favorites cruise to Open wins

NEW YORK (UPI) — Martina Navratilova and Ivan Lendl, big favorites to give the U.S. Open a Czechoslovakian flavor, continued to romp through the field Tuesday with straight sets victories.

Working quickly and efficiently on another steamy, simmering afternoon, Navratilova swept through the first seven games to beat West German Sylvia Hanika, 6-0, 6-3, in 48 minutes to reach the semifinals, while Lendl worked his way into the quarterfinals with a methodical 6-2, 6-4, 6-1 thumping of Johan Kriek.

Both Lendl, a Czechoslovakian, and Navratilova, who defected from that country and now lives in Dallas, Texas, have reached this point in the championship without dropping a set, and both have strong emotional reasons for wanting to win the U.S. crown.

ALSO REACHING the men's quarterfinals were No. 4 Yannick Noah, who entertained the crowd and dismayed his opponent with a back-stepping, between-the-legs shot, and No. 9 Jimmy Arias, who had to douse himself repeatedly with cups of

water to fight off the heat.  
Noah put an end to the dream run of 16-year-old amateur Aaron Krickstein, 6-3, 7-6, 6-3, and Arias, who said he was feeling the effects of the heat in the very first game, used his improvised shower to help him overcome Joachim Nystrom of Sweden, 3-6, 6-3, 3-6, 6-0, 6-0.

Pam Shriver, who knocked Navratilova out of last year's Open, qualified for another meeting with her good friend and doubles partner by beating No. 3 seed Andrea Jaeger, 7-6 (7-2), 6-3.

"SHE DOESN'T have very good memories of me here," the fifth-seeded Shriver said of Navratilova, adding of their involvement in doubles, "It can be a little awkward at times, but we're both professionals and we know the business. Actually, you want to play real well in the doubles, then maybe she'll think you're playing great and be real scared."

Navratilova, who has won 154 matches and lost only four since the start of 1982, but still is looking for her first U.S. Open title, responded by saying, "Maybe I'll hit her from behind or something,

take a little cheap shot. I'm confident. I've played her three times lately and beaten her in straight sets. I'll take it as just another match."

IN THE MEN'S quarterfinals, Lendl will meet the survivor of Tuesday night's match between Mats Wilander and Andres Gomez. In the other quarterfinals, it will be Noah against Arias, Jimmy Connors against Eliot Teltcher and Bill Scanlon against Mark Dickson.

Noah pulled off the shot of the tournament on the fourth point of the tie-breaker when Krickstein sent a deep crosscourt lob that Noah thought would go long. Once he realized it would be good, the French Open champion sprinted quickly and, with his back to the net, hit the ball between his legs.

Lendl, anxious to put an end to all the questions about his inability to win a Grand Slam event, never lost his serve against Kriek and required only one hour, 27 minutes to get himself out of the sun. Kriek had a chance to get back into the match when he had break point in the 10th game of the second set, but Lendl held to claim a two-set advantage.

## 'Mysterious' ISU squad bothers Fry

By Thomas W. Jargo  
Assistant Sports Editor

Members of the Iowa football coaching staff have been playing detective the past few weeks.

As the Hawkeyes prepare for their season opener with Iowa State in Ames on Saturday, Coach Hayden Fry and his staff have been trying to figure out the offensive and defensive philosophies of first-year Cyclone Coach Jim Criner.

"The biggest mystery that we have is the uncertainty of what Coach Criner and his staff are going to do," Fry said Tuesday at his weekly press conference.

Criner came from Boise State to take over the Iowa State program after former Cyclone mentor Donnie Duncan resigned at the end of last season to enter private business. A new Cyclone coaching staff is Fry's biggest concern.

"IT'S SCARY NOT knowing what they're going to do offensively and defensively because they have a new staff," Fry said. "The preparation has been difficult because we have to be ready for anything."

Fry said the preparation for Iowa State has been wide open, covering as many different formations as possible. "I don't feel good about it," the fifth-year coach said. "We're never really sharp at anything because we work on so many different things. We don't get enough repetition to look sharp in the execution."

The Iowa coaching staff should know more about their intrastate rival when halftime of the game rolls around, according to Fry. "We should know more of what they are concentrating on, but I might not like the results by then," he said.

IN OTHER NEWS around the Iowa football camp, sophomore wingback/running back Ronnie Harmon will play against the Cyclones, Fry said. Last year, Harmon was the No. 1 wingback on Iowa's Peach Bowl squad, but this spring, he requested to move to running back.

At the beginning of fall practice, Harmon was listed at the No. 4 running back behind Owen Gill, Eddie Phillips and Paul McCarty.

Fry, who had considered redshirting the talented sophomore, said, "Ronnie will play and he may play several positions."  
See Fry, page 5B

## Criner's Cyclones 'need game'

AMES, Iowa (UPI) — Iowa State football coach Jim Criner Tuesday confided he would welcome another week's preparation for Saturday's home opener against Iowa, but said the intrastate battle could be the best thing for his players.

"As a coach, I'd love to have another week," Criner said at Tuesday's news conference. "But to be honest with you, the players need to play a game, even if we would be playing the School for the Blind — they need a ballgame."

"You can only hit yourself so long and pretty soon, if you don't play a ballgame, you're going to start getting stale," the first-year Cyclone coach said. "And we've backed way off contact. I'm more concerned about having them healthy and hungry come Saturday."

FACING AN experienced and nationally rated Hawkeye team that has fallen victim to the Cyclones for three straight years, Criner continued to play down the importance of Saturday's regionally televised intrastate game.

"My concern is that we go out and play as good as we possibly can and make a lot of progress toward being the type of football team that we want to be — a team that is competitive in the Big Eight Conference," Criner said.

"Our ability to play with poise and confidence and play hard for four quarters is what I'm looking for out of our football team. And that's more important to us right now than who we play."

Criner said Iowa has a potent offense.

CHICAGO — During his first team meeting last December, new Michigan State football Coach George Perles walked up to two-time all-Big Ten linebacker Carl Banks and told the consensus preseason All-American what he was doing wrong on the field.

"I knew right then, there was a change coming," said Banks, who at 6-foot-6, 230 pounds is appropriately labeled the best gridiron athlete in the Big Ten this year.

Indeed, a change was coming. Perles didn't turn down a \$200,000-a-year head coaching job with the Philadelphia Stars of the United States Football League to take over the Spartans, only to watch a talented grid team suffer through another disappointing 2-9 season.

MICHIGAN STATE DID field a talented squad last year under former Coach Muddy Waters, but a combina-

tion of a tough schedule, lackadaisical play and a defeatist attitude spelled doom for the Spartans and Waters. The Spartans lost their first seven games and Waters lost his job.

Perles, a former player and assistant coach at Michigan State, returns to East Lansing, Mich., after serving 10

years as an assistant coach with the NFL's Pittsburgh Steelers. Perles, whose base salary of \$95,000 is the highest in the league, officially took the Spartan job on Dec. 3, 1982.

"When we came there in December, we figured that — before we could do

anything — we had to work these men through a winter conditioning program; not so much concerned with their conditioning, but with their attitude," Perles said. "It's a tremendous disadvantage to go through a season thinking you don't have a chance to win."

PERLES' NEW WINTER conditioning program began bright and early one January morning, according to all-Big Ten offensive guard Randy Lark. From 8 a.m. until 9 a.m. every day, Spartan players ran 20, 110-yard sprints and topped off the hour with a mile and a half run, the 6-1, 250-pound lineman said.

Every Monday, Wednesday and Friday from noon until 6 p.m., they worked out in the weight room. On Tuesdays and Thursdays, they had to go through a "strenuous" agility drill which included lifting weights. "It was a matter of confidence and discipline; demanding something from us," Lark said.

"We were hard and demanding for a purpose," Perles said. "We thought this kind of program would give us the opportunity to find out what these young men are made of."

And although both Banks and Lark were recruited by Waters and played for him three years, they agree a coaching change was the best thing to

happen at Michigan State. The team's attitude has improved tremendously, Lark said.

"IT WAS NOT like under Muddy," he said. "Muddy somewhat let us roam free. He never demanded that much from us. It was a shock even to the good players on how much conditioning we had to do. When I say we ran from 8-9 in the morning, I mean we ran the whole hour."

"It brought out our potential," he said. "It's really helped the heavy-set guys. We were tired late in the season last year and made a lot of mental mistakes. But we're way ahead of last year. I'm in the best shape I've ever been in my life."

Banks agrees, saying, "With Muddy, it (the atmosphere) was more loose. Some of us needed a firm hand. There were a lot of individual goals on the team. The first thing he (Perles) did was to mold everybody's attitude, toward the same goal... no more individual goals."

**Mistakes, big plays doomed Redskins**

WASHINGTON (UPI) — Monday night's 31-30 loss to the Dallas Cowboys looked no better Tuesday to the Washington Redskins, but the outlook for the long haul wasn't completely bleak.

The Cowboys used big plays — Danny White's touchdown passes of 75 and 51 yards to Tony Hill in the third quarter — to get back into the game and capitalized on Redskins' mistakes.

"We played good enough to win, but we made enough mistakes to lose," said defensive coordinator Richie Petitbon after Washington couldn't make a 23-3 halftime lead stand up.

"When you play Dallas, you expect some big plays. They got 206 yards on three plays that became two touchdowns and a field goal. Like most games you lose, take away the three plays and we win, big."

TONY DORSETT ran 77 yards to set up the Cowboys' only first-half points, Rafael Septien's 26-yard field goal.

"We had some guys get cut off at the line," Petitbon said. "(Safety Mark) Murphy had a good angle and Dorsett just ran by him. (Ron) Springs put a good block on (safety Curtis) Jordan."

White hit Hill behind cornerback Vernon Dean on the 75-yard play amid confusion in the Washington secondary over changing the coverage.

"We tried to audible out of the coverage we were in and not everyone got the call," Petitbon said. "It was our fault, with the motion Dallas showed and the noise in the stadium, we should have played the huddle call."

ON THE 51-YARD, White-to-Hill touchdown pass, cornerback Anthony Washington was in position but misplayed the ball. Washington was picked up from the Pittsburgh Steelers midway through training camp to

Washington's Mike Nelms, No. 21, takes to the air for yardage through the Dallas defenders during first quarter action of the Cowboys' 31-30 comeback win over the Redskins in Monday Night Football action.

shore up the Redskins' thin ranks at cornerback.

"Anthony had good position, but he didn't play the ball well," Petitbon said. "We should have had a safety back there helping, but Jordan didn't go to the right place."

Petitbon was also unhappy at a personal foul call against linebacker Mel Kaufman for spearing White. The penalty kept alive the Cowboys' drive

for the go-ahead touchdown in the fourth quarter.

"Mel didn't hit White," Petitbon said. "The official who made the call was on the opposite side of the play and probably threw the flag because he saw (defensive end Dexter) Manley's feet go up in the air as he went over the pileup."

"IF IT HAD been anyone but a quar-

terback, there's no way they made the call. They have to remember that when the quarterback scrambles, he's a ball carrier. I'm all for protecting the quarterback when he stays back where he belongs."

Wide receiver Mark McGrath suffered a shoulder separation Monday night and is questionable for Sunday's game in Philadelphia against the Eagles.

**Cosell's 'little' slip causes big trouble**

ATLANTA (UPI) — The head of the Southern Christian Leadership Conference demanded an apology Tuesday from Howard Cosell and ABC Sports for Cosell's reference to a black football player as "that little monkey."

The Rev. Joseph Lowery said Cosell's remark about Washington wide receiver Alvin Garrett during the Dallas Cowboys-Redskins game Monday night was "a symptom" of the lack of blacks in management and production positions in the National Football League and the major television networks.

When asked about the incident Tuesday, Cosell said, "I have absolutely no comment."

A network spokesman in New York said, "It is an unfortunate remark but it was obvious Howard was using it as a compliment to how great Garrett is, and was referring to his great mobility."

LOWERY SAID he was not impressed by the addition of O.J. Simpson, a black former football player, to the ABC broadcast team for part of the Monday night games.

"Without black performers, I doubt Monday night football would be so exciting," said Lowery at a news conference. "It was a slip that reflects an attitude that has spread throughout broadcasting and the league itself."

In the replay of a long gain by Garrett, Cosell excitedly said Washington Coach Joe Gibbs "wanted to get this kid, and that little monkey gets loose, doesn't he?"

Later in the broadcast, notified by reporters in the press box that some stations had received complaining calls, Cosell denied on the air having said it and added, "No man respects Alvin Garrett more than I do."

Garrett is a 5-foot-7, 178-pound member of the Redskins' group of diminutive receivers dubbed "Smurfs" by local media.

LOWERY, CALLING the remark "unfortunate and offensive," said in a telegram to ABC News President Rooney Arledge and network President Jim Duffy that it "gives occasion not only to ask for an apology, but to point out the disparity between blacks on the

"No man respects Alvin Garrett more than I do," says ABC-TV football commentator Howard Cosell.

playing field and the absence of blacks as fulltime members of the crew that broadcasts the event, seen weekly by millions of television viewers."

Lowery said he had tried unsuccessfully to call Cosell directly to complain.

"Numerous blacks on the field provide consistent enrichment of the telecast by their stellar performance," Lowery said. "We urge the addition of blacks to the fulltime weekly telecast crew and staff."

He said Cosell would have been "more sensitive" if he was accustomed to working among blacks in network sports presentations. Lowery said the NFL shared a racist attitude, pointing out there are no black head coaches or general managers and few black assistant coaches.

Newcomers lead Hawkeyes to easy 9-0 win over Bees

By Mike Condon, Assistant Sports Editor

When a NCAA Division I tennis team meets an NIAA school on the court, a rout is usually the result.

The Iowa-St. Ambrose match on Tuesday was no exception as the Hawkeyes walked to a 9-0 win in women's tennis on the Kinnick Stadium Courts.

Iowa Coach Cathy Ballard experimented with her line-up, holding some players out of the meet in favor of challenge matches to determine a line-up for Saturday's tilt at Iowa State.

One of the players benefitting from the line-up change was walk-on junior Juli Weinstiene who combined with Kim Ruuttila for a 6-2, 6-3 doubles win over LeAnne Martin and Michelle Menster.

She then went out for her No. 6 singles match (both squads agreed to play doubles first) and dismantled Karen Black 6-0, 6-1.

WEINSTIENE IS a transfer from Vanderbilt University where she was not a member of the tennis team. In fact, her matches on Tuesday was her first competition in three years.

"I just loved it," she said following the match. "It has always been a dream of mine to play collegiate tennis. Playing for Iowa is a fabulous opportunity for me."

Ballard was happy to see Weinstiene play so well. "I was glad to see Juli playing so well today," Ballard said. "She was keeping the ball very deep against her opponent and not too many of our players

were doing that." Although St. Ambrose was obviously overmatched, Ballard was not entirely pleased with the way some of the Hawkeyes played.

"We came out very lethargically," she said. "We took a matter-of-fact attitude out there and that happens when you play a team like St. Ambrose. Part of that may have been my fault but we haven't had much practice time and that may have had something to do with it."

One player who pleased the Iowa coach was Iowa City's Michele Conlon. "Michele demonstrated today that she was ready to play," Ballard said. "She was aggressive and took the play right to her opponent."

The Iowa State match will start at 9:30 a.m. Saturday at the Southwest Tennis Complex in Ames. Ballard said she would announce her line-up later this week.

Lakers set to sign Jabbar

LOS ANGELES (UPI) - Kareem Abdul-Jabbar's agent said Tuesday the free-agent center had "basically" agreed to a two-year contract with the Los Angeles Lakers.

The details were yet to be ironed out, but Tom Collins said, "Basically, it's done. The negotiations between (Lakers Owner) Jerry Buss and myself are over. It's been turned over to the attorneys."

A spokesman for the Lakers said, "As far as I know, everything's going real well, but I don't think anything is imminent."

That deal would make Abdul-Jabbar the third-highest paid player in the league behind Philadelphia's Moses Malone and Lakers teammate Magic Johnson.

Abdul-Jabbar, 36, played out his option with the Lakers last season. A handful of teams, including the Chicago Bulls and Atlanta Hawks, sought his services, but all comers apparently stepped out of the bidding when Buss insisted he would match any offers.

The center entered the negotiations seeking \$2 million per season, with all the cash up front. The Lakers reportedly had offered \$1.4 million, with much of the money deferred.

tions. We're happy he's going to play, but how much, we don't know."

Fry was asked whether he or Harmon made the final decision not to redshirt. "It was a meeting of the minds. It was his decision... after I gave him my mind," Fry said with a smile.

GILL AND PHILLIPS have been fighting a steady war against each other for the No. 1 running back spot, and for the time being, Gill has won the first battle. The junior from Brooklyn, N.Y., will start ahead of Phillips this Saturday, but Fry said both could "divide time in the course of the game."

"Both looked better than ever in fall practice," he said. "Gill won the No. 1 spot because of his performance in the Peach Bowl and the spring game. Eddie hasn't had much of an opportunity to beat him out of the spot."

Finding a No. 2 punter to back-up Tommy Nichol remains a major concern for Fry. "Because Tommy has played and been around, he's No. 1," Fry said. "But we're not satisfied with the kicking game. It still concerns us." Fry said there are "a lot of warm bodies" vying for job of back-up punter.

Without naming anyone in par-

Hayden Fry

ticular, Fry said as many as 12 freshmen could make the weekend trip to Ames. "We are more impressed with this freshmen group than any freshmen group we've ever had," he said. "They have performed better as a unit than any we've had in the past. Some freshmen will not only play, but they will help us."

Spartans

Continued from page 1E

dividuals, it's a team now. It's put us in great shape."

THE SPARTANS MAY be in great shape physically, but they have a long way to go in order to improve on last year's ninth-place finish in the Big Ten.

Banks and Lark are two of only eight starters returning from last year's ballclub, and they will be counted upon heavily to raise the Spartans out of the conference's second division, Perles said.

"Banks has the height, weight, speed, dedication and attitude to do anything he wants in the game of football," said Perles, who likens Banks to Steeler linebacker Robin Cole. "If he plays as well as he can play, does the things as well as he can do, there's no telling where he's going to go in the game of football. We're glad to have him on defense."

"On offense, we'll rally around Lark."

He's very similar to the kind of offensive linemen we had at Pittsburgh. In Pittsburgh, sometimes we sacrificed an inch, a few pounds, but we never sacrificed with smarts, with quickness and with attitude. He should have an outstanding year."

The offensive and defensive lines are currently the weakest spots for Michigan State. Lark and center Ken Stockwell anchor an inexperienced offensive line, which lost three starters from last year.

PERLES HAS HAD to revamp his entire five-man defensive front, in which four starters graduated and Banks moved from defensive end to outside linebacker. "We'll have to count on some young people helping us, at least at depth in our defensive and offensive lines," Perles said.

Perles has had to make considerable

changes at running back, and he went looking in the junior college ranks to find them. Perles, who prefers not to recruit out of junior colleges, signed three transfers at running back. "It's good business," he said. "I'm not interested in having a lot of junior college transfers on our team. We like to groom our own."

"But I could bring in three transfers or nothing. We did have a need at offensive back, so we brought in three running backs. They have great speed, but not great size."

Sophomore Dave Yarema will replace the departed John Leister at quarterback for the Spartans. "He's a smart guy," Perles said. "All he needs is experience."

TWO SENIORS, split end Daryl Turner and tight end Tom Robinson, return to lead the receivers in chase of

Yarema's aeriels.

"Ideally, we would like to throw the ball half the time and run the ball half the time," Perles adds. "But I don't know if we can do that. One thing we don't want to do is turn the ball over, so we may have play it a little closer to the vest."

Michigan State's defense will switch to a 4-3, and it could have a passion for the blitz. "We'll have an aggressive, tough mean defense," Perles said.

Possibly the strongest part of the Spartan football team is the kicking game, with junior Ralf Mojsiejenko handling both the punting and place-kicking duties.

Mojsiejenko has averaged 43.3 yards a kick in two years as the Spartans' punter. Last year was Mojsiejenko first as a place-kicker and he responded by hitting all 18 of his extra point attempts and 14-20 field goal attempts.

Hawkeyes

Continued from page 1B

old age division, according to Runners World Magazine.

SPANGLER'S performance has enabled her to qualify for the Olympic marathon trials which will be held next May in Olympia, Wash.

"Jenny's emphasis in training this fall will be on cross country," Hassard said, "but it may be possible for her to kill two birds with one stone and train for both."

Another top returner who was busy this summer was Doak, who finished second at the NCAA district meet and tenth at the NCAA national race last fall. "Nan has never ran roads or trained like this before," Hassard said, adding, "She's gearing up for her senior season."

Hershberger is also entering her final year and Hassard says the Iowa City native "ran 70 miles a week the last 13 weeks of the summer."

THE IOWA COACH said there's good reason for all of the hard work put in by his runners this summer. "Each year we start from scratch," he said. "It's important for everybody to prove themselves and not be concerned about what they've done in the past."

Iowa should once again be a strong contender to defend its conference

1983 Iowa women's cross country schedule

- Sept. 10 - Iowa Open
- Sept. 17 - at Illinois State Invitational
- Sept. 24 - Iowa Open
- Oct. 1 - at Illinois Invitational
- Oct. 15 - at Michigan State Invitational
- Oct. 22 - at Western Illinois Invitational
- Nov. 5 - at Big Ten Championships at Michigan State
- Nov. 12 - at NCAA District IV Championships
- Nov. 21 - at NCAA National Championship
- Nov. 27 - at TAC National Championships (tentative)

championship, which will be held at Michigan State this year on Nov. 5. But Hassard points out there will be some tremendous competition.

"It's difficult to tell right now which teams will be the toughest, but we're concerned with the strength of Wisconsin and Michigan and some of the more progressive programs like Indiana, Illinois, Minnesota and Michigan State, all have either had tradition or are improving steadily," Hassard said.

Iowa's coach doesn't even consider his defending champions to be the favorites to gain the conference crown. "I look at Wisconsin and Michigan as favorites," Hassard said. "They ran as well, if not better, than us last year and both teams beat us at the NCAA districts while we won the conference by only a minimal amount on our home course."

Criner

Continued from page 1B

offensive attack in quarterback Chuck Long and running backs Owen Gill, Norm Granger and Eddie Phillips, as well as a highly regarded and experienced defense.

THE CYCLONE defense must offset the Hawkeyes' game plan to continue the ISU winning streak, he said.

"We cannot allow a veteran team like Iowa to lay their ears back and come after us because we have not had the background to handle that — our players haven't," Criner said. "And so, we've got to keep them off balance and most certainly that will be something that we will be trying hard to do."

The Iowa State coach says he plans to "spread" his offense.

Criner said the Cyclones' strong point is their ability to throw the football — an aerial attack led by senior quarterback David Archer — and its weakest point is inexperience.

Finally, Criner said, the Cyclones will change their method of signaling — opting to relay plays via

Jim Criner

signals from the sidelines rather than alternating wide receivers in and out with play assignments.

Big Ten football fortunes against non-conference foes could change

CHICAGO (UPI) — Only one time in the last 30 years have Big Ten Conference teams won fewer non-league football games than they did during the 1982 season.

The conference posted a disappointing 11-16 record against outside foes last year, marking the fewest wins outside the conference since the league went 9-17 in 1971. You would have to go back to 1952 to find a worse year in the league's history. That season, the Big Ten went 8-14-2.

This year, the chances of the league improving dramatically on the number of wins is somewhat reduced because the entire conference is playing fewer non-league games.

For the first time, the league has adopted a round-robin schedule by which every team plays every other team in a conference game.

**IN RECENT** years, the league has opened with a conference game and then dipped into the non-conference wars. All teams open with two non-league games this year then nine weeks of conference competition.

It is much the same way in future years except Northwestern opens early at Illinois in 1984. The next two years non-league games will again precede the conference wars.

Michigan Coach Bo Schembechler said that was the reason the league fared so poorly last year.

"You gear yourself up for that first game anyway, and if it's a conference game and you have just seven conference games, you really put everything you have into that," Schembechler said. "Then the next week you don't have a league game and you tend to let up a little."

**OHIO STATE** Coach Earle Bruce, whose team lost three in a row early in the 1982 season, agrees.

"The first league game is always the

most important. If you have to point to something, you point to that. If you have anything after that outside of the league that is bound to be a letdown," Bruce says.

Schembechler also says the league's athletic directors, including his own, are determined to schedule the top teams. He says the league would rather play teams in the top 20 that would prepare them for the conference season than schedule softies.

"Don (athletic director Canham) wants to keep scheduling Penn State and Notre Dame," Schembechler said with a grin. "If he does, I guess I won't be here to coach the games."

**THIS SEASON**, the league again has its share of toughies in the first two weeks. Illinois visits Missouri, Purdue hosts Notre Dame, Northwestern visits Washington and Michigan travels to Washington State.

The coaches are predicting tough times.

"We're going into Missouri without a proven quarterback, that won't be easy," said Illinois Coach Mike White.

"Washington State has one of its best teams in years and we've got to go out there," Schembechler said.

The following week, Iowa must travel to Penn State, Michigan State is at Notre

Dame, Michigan visits Washington, Ohio state is at Oklahoma, Missouri is at Wisconsin, Nebraska travels to Minnesota and Miami hosts Purdue.

**CRITICS HAVE** suggested the Big Ten's decision to abandon its rushing and defense-oriented approach and go to the passing game has hurt its non-conference records. Others charge the scholarship limitations have caused the rest of the country to finally catch up with the Big Ten.

"The scholarship limitations are a factor. I don't think Big Ten football has slid one bit," White said. "I think they are playing better ball everywhere else, too, but Big Ten football is still the best."

Even if the non-conference slate is tough again, the league's coaches are hailing the nine-game league schedule. It was a quirk that prevented Ohio State from going to the Rose Bowl last year because the Buckeyes and Iowa played one fewer game than the rest of the league.

"I CAN'T speak for decisions made 12 years ago. It's over. I'm just glad that we're going to determine the champion the right way for the first time. Everyone ought to play everyone," Bruce said.

"We're looking forward to playing Ohio State. We haven't played them because of the one fewer league game and we're anxious for it," said Iowa Coach Hayden Fry.

The nine-game schedule is the most rigorous conference schedule in the nation, according to Northwestern's Dennis Green.

"It's like the basketball schedule in the Big Ten. When you have to play nine games against the talents in this league it's brutal," he said. "The thing you have to understand is that there is so much size and strength in this league that you are going to get battered and beaten. If you had to play a non-league game after a league game, you're in trouble because things are so rugged here."

On the line

Top 'o the morning to you.

It's Irish week here at **The Daily Iowan** and just like our On the Line contest sponsor, Fitzpatrick's, we're hoping for all the best to you and yours.

Fitzpatrick's, a nifty little Irish pub on South Gilbert, will be providing an eight-gallon keg to the winner of this week's On the Line contest.

A few of you struggled in Tuesday morning with your On the Line ballots, and sure enough, a couple of you have already been disqualified for not following the rules. Because of that, the sports staff has already had the honor of firing a couple of your ballots into the circular fire, just like a 20-foot Steve Carfino jumper from the top of the key.

Now let's face it, it isn't that difficult. All

you have to do is follow the rules. Simply circle the names of the winners in the nine games on the top portion of the ballot. Then, pick the winner of the tiebreaker in the same manner and predict the final score of the battle between Iowa and Iowa State. If you believe any game will end in a tie, circle both teams.

**COMPLETE THE BALLOT** by signing your name and phone number on the bottom of the ballot and returning it to the DI office, Room 111 of the Communications Center by noon on Thursday.

No DI employees are eligible and according to Iowa law, those of you who are under 19 are ineligible, just as it should be.

In case of ties, the DI tallymaster will make a decision based on the final scores in the tiebreaker. If a tie still exists, the win-

ners name will be drawn from Wire Editor Nanette Secor's blue bonnet, and were not talking butter. The rule of the tally master is final.

This week's winners

- Illinois at Missouri
- Duke at Indiana
- Washington State at Michigan
- Colorado at Michigan State
- Minnesota at Rice
- Washington at Northwestern
- Oregon at Ohio State
- Notre Dame at Purdue
- Northern Illinois at Wisconsin

Boyle survives cuts by Rockets

HOUSTON (UPI) — The Houston Rockets released free agent guards and former collegiate stalwarts Jimmy Black and Lynden Rose Tuesday along with four draft choices.

Four free agents, including former Iowa cager Kevin Boyle, were kept by the club. He will be among a group of 19 players who will attend preseason camp later this month.

Six draft choices asked to attend are 7-4 center Ralph Sampson of Virginia, the Rockets' \$1-million-a-year rookie; Rodney McCray of Louisville; Craig Ehlo, who played for Iowa Coach George Raveling at Washington State; Darrell Browder of Texas Christian; Jim Stack of Northwestern and Darrell Johnson of San Jose State.

Besides Boyle, other free agents retained by the Rockets include Keith Hilliard of Southwest Missouri, Randy Martell of Houston Baptist and Brent Johnson of East Tennessee State.

**ALSO CUT** one week after a Rockets' rookie camp were fifth-round choice Chuck Barnett of Oklahoma, Brian

Kellerman of Idaho (seventh round), Jeff Bolding of Arkansas State (eighth round) and James Campbell of Oklahoma City (ninth round).

Dream Psychology

**JOEL GOODSON** about his dream — "The same." Joel noticed he had opened a door of his house, so he investigate. He finds a beautiful woman in a shower. She invites him naturally, isn't one to refuse. She reaches the shower, and by the time she reaches the shower, he finds the testing room for his SA's. It has two minutes left to fill. His future is ruined.

This is the opening sequence of *Business*, a piece of Americana, and one of the best years so far. Writer/director Brickman has managed to get the confines of commercial yet stamp an impressive mark on the screen. This

**Trans dilemma defies solution**

By Carlos Trevino  
Staff Writer

Iowa City Transit Larry McGonagle said today the city's transit department will ask the Iowa City Council to close off a section of Washington Street west of Clinton Street in order to relieve traffic congestion for area buses.

McGonagle said the transit department is currently in the process of a major interchange as a traffic interchange on Washington Street between Old Capitol Mall and Trestle, is "very congested" with auto traffic going eastbound. "A transit interchange recently completed by the transit department city council would keep the interchange open for vehicle traffic," he said. "It would only transport congestion to other areas of the city," Mayor Mary M. Meehan said.

JOHN LUNDELL, the County Council of Government transit planner, said drivers have complained near accidents with "the interchange was designed for buses, and traffic."

Lundell and McGonagle they could understand council has not close interchange to cars explaining "there is really no good or we'd have done it a long ago."

Lundell said during urban renewal program early 1970's "Clinton Street being torn up, so Washington Street was opened to traffic flow. It was supposed to be just an interchange."

But Neuhouser said she voted against an amendment to create a "bus interchange" on Washington Street.

"If we closed that interchange it would make access downtown area very difficult," she said. "Besides, we mean we'd stop bicyclists entering the interchange."

Neuhouser said she drivers have complained the potential for accidents, "the statistics we did not justify closing it. I think it would be a better alternative to have pedestrian crossing on Burlington Street instead."

PHIL NYCHAY, a transit driver and president of American Federation of Iowa County, and Municipal employees union, said "I think the interchange should be accessible to the three lanes, Iowa City, Coralville, and the Campus line."

"We just want to prevent accidents, and I think that can be accomplished by just professional drivers in the area," he said. "As for your fit enough to ride a bicycle can walk it across."
