Moslem gunmen raided U.S. Marine base in Beirut

The Washintonian (UPI) - Lebanon's security sources said that two U.S. personnel were killed and 10 wounded in an ambush by Moslem gunmen at the U.S. Marine base in Beirut Saturday night.

The attack was the most serious so far, and it was the third of three worldwide raids by Moslem militants who have been targeting U.S. bases in Lebanon.

The raid was carried out by a group of about 20 Moslem militants who broke through the Marine base and killed one of the U.S. personnel.

The base is located about 10 miles from downtown Beirut, and it is one of the largest U.S. military bases in the area.

The attack was the latest in a series of attacks on U.S. bases in Lebanon, and it comes as the United States is increasing its military presence in the region.

The attack has sparked a wave of outrage among Lebanese citizens, who have long been disillusioned with the American military presence in their country.

The U.S. military has been in Lebanon since 1982, and it has been involved in a number of operations, including the fight against terrorism.

The attack has also raised concerns about the safety of American citizens in Lebanon, and it has prompted a number of security measures to be taken.

The U.S. military has increased its security measures at its bases in Lebanon, and it has also increased its patrols in the area.

The attack has also prompted a debate about the role of the United States in the region, and it has raised questions about the future of the American military presence in Lebanon.

Caffeine may harm as well as refresh
By David Armstrong

Late on a Saturday with a pot of cof­fee, you may be in a mindless, speeded-up state of alertness, yet heath attentions of excessive consump­tion of the drug were discussed in the University of Wisconsin's College of Liberal Arts at a meeting Friday. "Caffeine," said Susan Yager of student life, "is a very healthy thing to do even if some of the findings cause a quibble."•

"Drinking more than three cups of coffee may exceed the normal safe limit," said clinician Elaine Hovet of daily caffeine intake. "In fact, in need to reduce the intake into a college as a "pacing" tool for both athletes and coaches."•

DESI SMITH (CTY) — Pay raise for Iowa Light and Power Co. employees that was approved after several rounds of negotiations should be paid "within the next few weeks," said UI President Charles W. Blank."We're still not finished in this report could be finished in this summer." •

Caffeine, stimulant have been demonstrated to improve central nervous system. However, it is relatively safe although it has the potential to be harmful because it is a drug. Some people become addicted to caffeine, though it is hard to diagnose the addiction. People may be "hitting the wall" if there is a lack of energy, feelings of "drifting," or lack of ability to concentrate. Those who are especially sensitive may have adverse reactions to it. Caffeine is not a "designer drug" because the company did a poor job of packaging it. Caffeine is not a "highly ethical thing," said one UPW official.

One cup of coffee contains 105 mg of caffeine, according to the FDA. However, the actual amount of caffeine in a cup of coffee is not known, but it varies. Some brands have been tested at 32 to 40 mg per cup of coffee. The report states, "we're still not finished in this report could be finished in this summer." •

The Chairman of the peer review com­mittee, Virendra Patel, said, "the report is not an official review of the college was conducted in 1976. However, Amundson warned against "drinking too much." He said, "we're still not finished in this report could be finished in this summer." •

"IT IS JUST A WAY OF LIFE," said Elaine Hovet of daily caffeine intake. "In fact, you may need to reduce the intake into a college as a "pacing" tool for both athletes and coaches."•
