Reagan says America is 'standing tall'

WASHINGTON (UPI) - President Ronald Reagan said Wednesday America is back — standing tall — and said Congress has elected a continued commitment to the nation's economic and military strength.

"We will not fail," he said. "We will not retreat. Americans will not be held hostage by the new policies of theDED."

In the third State of the Union message delivered to both chambers of Congress and a national television audience, Reagan said America has "the strength of the past — and the wisdom of the past — and I believe it is time to exercise America's freedom and strength to the full extent and the maximum extent that we can within our means and within our ability to conduct a policy of peaceful, economic and scientific strongpoint in the world."

"It is time to turn more aggressively for the future America that we want and the America we need and the America we must have," he said. "We can achieve our nation's greatness. We can strengthen our nation's greatness.

"Let us make this our business. Let us make this our concern. Let us make this our cause. Let us make this our lifestyle."...

Supervisors mull next move after refusal of Sabin offer

By Christopher Wash

City Councilman Larry Myers said yesterday that the Johnson County Board of Supervisors is split on whether to made an offer to rehire Sabin Electric, the company that sold the city a half-million dollars in Tilt technology, for maintenance work on the school building Tuesday night. The Johnson County Board of Supervisors, meeting Tuesday night, voted to accept Sabin Electric's offer to rehire the company, which is one of the lowest bidders in the county. Myers said that the offer was rejected by the Johnson County Board of Supervisors, meeting Tuesday night, at a meeting held at the Johnson County Courthouse in Coralville.

Supervisor Betty Okenfels said she were opposed to the decision and that the county should have offered the Tilt technology to a different company. She said that she was disappointed with the city's decision to accept the offer from Sabin Electric, and that she was concerned about the city's handling of the General Services Administration, which is responsible for managing the county's building projects.

City manager denies ignoring Eaton's claims of harassment

By Patricia Roche

The city has received a complaint from a city employee, Michael Thomas Algreen, alleging that he was not given proper supervision while working on a city project, which resulted in a broken pipe. The city manager said that there was no evidence to support the claim and that the city was investigating the matter.

In aide to UI is improved

Kidney care at UI is improved

A new procedure called DST (donor specific tolerance) is currently being used at the Kidney Center, where Dr. Jeff Hunninghake, noted transplant specialist, uses it to prepare patients before transplanting.

"We are preparing more patients for successful transplants," Hunninghake said. "DST is a new approach to improving transplant outcomes."

The procedure involves drugs that suppress the immune system so that the transplant will survive without rejection.

Huntinghake said the procedure involves taking patients who have rejected their organ transplants and then treating them with immunosuppressive drugs.

If the patient's immune system is suppressed enough, the patient will be able to receive a new organ from a different source without rejecting it.

Huntinghake said the procedure has been used successfully in a number of patients at the Kidney Center, including cases of heart and kidney transplants.

"We are hoping to use this procedure to prepare patients for successful transplants," he said.

Newveh vehicle long law

By Bill Barber

Overspeeded buses have prompted Coralville officials to study the possibility of seeking an increase to the current speed limit on the Corridor.

The city of Coralville has received two letters from apartment complexes near the bus route, indicating that noise from the buses has become a problem. One letter, from a complex in southeast Coralville, stated that the buses were too loud and that the noise had been disruptive to the residents. The other letter, from a complex in northwest Coralville, complained about the buses being too loud and that they were also contributing to a spike in break-ins.

The city council will discuss the issue at its next meeting, and members are expected to vote on whether or not to approve the request for a speed limit increase. If approved, the change would take effect in the spring.

The current speed limit on the Corridor is 40 mph, but some residents have been concerned about the noise and traffic generated by the buses. Coralville officials are considering raising the limit to 45 mph or 50 mph.

The city also plans to conduct a study of the impact of the buses on the community. This study will help determine whether or not the speed limit increase is necessary and will also provide information on how the buses are affecting the neighborhood.

Local roundup

Carville to decide on cable rate hike

The Corville City Council will decide next month whether to increase the basic cable television service.

CableTV fees will be increased by 25 percent for all customers in the city, including those who pay monthly and those who pay by the quarter. The city will also consider raising the rate to 50 percent of the current fee.

The increase is needed to cover the cost of providing the service, and the city council is looking for ways to increase revenue. The proposed rate increase is expected to bring in $50,000 per year.

On Dec. 22, the city's Broadband Development Corporation voted unanimously to recommend the rate increase to the city council.

More 1983 fires cause less damage

The Iowa City Fire Department responded to a number of fires in 1983, but the cost of damage due to fires dropped by 50 percent compared to 1982.

Fires caused $62,000 in damage in 1983, down from $124,000 in 1982. The cost of water and other firefighting activities also dropped 40 percent.

In 1983, the city's Broadband Development Corporation voted unanimously to recommend the rate increase to the city council.

UI officials concerned over paper leak

UI officials are upset by the leak that is causing fans to find paper on the computer network. The leak is occurring regularly on one of the computers in the Illini Union.

The problem has been ongoing for several weeks, and the university is not sure if the leak is due to a structural problem or a malfunction in the computer equipment.

UI officials say they are working with the university's computer services department to find the source of the leak and to correct the problem.

The leak has caused some disruption on the network, but UI officials say they are confident that they can fix the problem.

200,000 Brazilians protest military rule

Iowa City, Iowa

200,000 Brazilians protested military rule in May by taking part in a nationwide day rejected demands by the political leadership.

The protest was led by the Brazilian Socialist Party (PSB) and the Workers' Party (PT), which have been calling for the end of military rule. The demonstration was held in more than 50 cities across Brazil, with an estimated total of 200,000 people participating.

The PSB has been critical of the government's handling of the economy, which has been marked by some of the worst economic indicators in recent years. The government has been criticized for its cuts in social programs, including education and health care, and its failure to address the growing inequality in the country.

The PT has also been critical of the government, particularly its handling of the economy. The party has been calling for the implementation of a more progressive economic agenda, including the nationalization of key industries and the protection of workers' rights.

The demonstration was peaceful, with no reports of violence or arrests.

Steel industry hardest hit in end-of-year buying slowdown

WASHINGTON (AP) - Iron and steel workers would have you believe the recent slowdown in orders was caused by something other than the flood of new orders from automobiles and appliances that the industry has faced.

But while some economists may still believe there is a recession in the industry, they are better educated on the first annual gain of domestically produced steel than the auto industry.

Robert Greiner, chairman of the US Steel Corp., said early this week that the auto industry, which buys more than half of the nation's steel output, was in a deepening recession.

"This report should do more than raise an eyebrow slightly. If it is still part of an overall growing trend," Greiner said, "the industry will be in a state of recession and could face a slower pace of growth in the future."

"We are in a recession in the steel industry," Huffman, chairman of the US Steel Corp., said.

"A lot of the weakness is in the steel industry," Huffman, chairman of the US Steel Corp., said. "The US steel industry is not yet fully in a recession."

As expected, the December report showed 1975's annual gain in durable goods orders was a revised 3.4 percent. The report, which showed that orders increased 0.3 percent in December, is a disturbing suggestion that the US economy is slowing down.

WASHINGTON (AP) - The steel industry is not yet in a recession, Huffman, chairman of the US Steel Corp., said.

"A lot of the weakness is in the steel industry," Huffman, chairman of the US Steel Corp., said. "The US steel industry is not yet fully in a recession."

**Iowa cagers dwell on OSU’s Campbell**

**Ohio St. vs. Iowa**

BY STEVE BARTON

Most people still remember Iowa’s basketball game at Ohio State last year. Many more people are likely to remember Ohio State’s 59-58 win over Iowa on the road.

Conversation in Iowa about the game last year has been joined by women, as the State women’s basketball team has suggested the possibility of adding women’s basketball to the slate of community services in the Division of Student Life and Student Services, said Fred R. Linn, director of that division.

"We’re估计 there need to be at least six more women’s basketball teams in Iowa," Linn said. "Iowa is spending more than $400,000 on its men’s basketball teams, but we’re not spending that much on women’s basketball."

"We’re considering it," Linn added. "We’re going to look at the possibility of offering a women’s basketball team in the near future."

**China will compete in Olympics**

LOUISVILLE (AP) - China will compete in the Olympics for the first time, sending about 150 athletes and coaches to the 1984 Los Angeles Games, sending the message that it is ready to take its place among the nations of the world.

The Games will begin July 28 with the opening ceremony in Los Angeles, site of the 1932 Olympics, and will continue through Aug. 13.

A spokesman for the Los Angeles Olympic Organizing Committee and a China Olympic Committee representative confirmed the plans.

China has made efforts to prepare for the Olympics in recent years, and the country has been making strides in sports development. In 1982, China hosted the Asian Games, a major international multi-sport event.

Dub poets offer a reggae art form to Jamaica's poor

By Scott Lay

The Daily Iowan

DUB POETS is not traditional reggae performers, but a group of poets who spread their message through dub poetry. The group consists of four poets and a sound system.

The group uses the power of reggae music to express their message. They believe that music is a powerful tool for communication and that it can bring about social change.

Their goal is to reach out to the poor and marginalized communities in Jamaica and share their message of hope and inspiration. They often perform at various events and venues, including schools, community centers, and outdoor gatherings.

The group encourages listeners to come together and support each other. They believe that unity and solidarity are key to overcoming the challenges faced by many people in Jamaica.

Despite facing opposition from some quarters, the group continues to perform and spread their message. They have received support from many people who see the value in their work.

The group emphasizes the importance of education and advocates for social justice. They believe that knowledge is the key to overcoming poverty and inequality.

Their performances often include spoken word and reggae music, and they encourage their audiences to participate and engage with the message.

The group also works with local organizations to provide resources and support to communities in need. They believe in the power of collective action and collaboration to bring about positive change.

In conclusion, DUB POETS is a group of poets who use the power of reggae music to share their message of hope and inspiration. They work to reach out to marginalized communities in Jamaica and encourage unity, solidarity, and social justice.

The Daily Iowan

A new art program for children is helping to improve their skills in the arts. The program, called DASH (Diversity in Artistic and Social Harmony), is designed to provide children with an introduction to various art forms and techniques.

The program is led by a group of artists who are passionate about teaching children about the importance of art in their lives. They believe that art is a powerful tool for self-expression and personal growth.

The program includes a variety of activities, such as painting, drawing, sculpture, and music. Each week, children have the opportunity to explore different art forms and learn new techniques.

The program is designed for children of all ages and skill levels. It is open to children who are interested in art and want to improve their skills.

The program is supported by local businesses and organizations, who have provided donations and resources to help make it possible.

The program is already having a positive impact on the children who participate. Many of them have shown a newfound interest in art and are expressing themselves more creatively.

The program is looking to expand its reach and reach out to more children in the community. They are currently seeking additional funding and support to continue their work.

In conclusion, DASH is a new art program for children that is helping to improve their skills in the arts. It is led by a group of artists who are passionate about teaching children about the importance of art in their lives. The program is designed for children of all ages and skill levels and is seeking additional funding and support to continue its work.
