Report: Lack of sensitivity prompts faculty exodus

"Lack of adequate salary is a relative thing," says a UI Faculty Welfare Committee report, "but if the DED's (departmental executive officers) would openly discuss departmental financing, this would relieve much of the problem." 

The report states: The University of Iowa Department of Finance must be able to determine the reasons for their reductions of funds. The report claims that the level of departmental executive officers, or DEOs, is lower in research and teaching capacity than the level common today. Faculty members become angry, according to the report, because of the lack of adequate salary and promotions.

The report also cites a lack of adequate salary and promotions as a reason for the exodus of faculty members leaving the university. The University of Iowa is one of the top 10 U.S. universities in the nation's top 100, according to the report. The report also states that the university is facing a "crisis of faith" due to the lack of adequate salary and promotions.

The report recommends that the university increase faculty salaries and promote more faculty members. The report also suggests that the university increase faculty salaries and promotions to keep faculty members from leaving the university.

The report concludes that the university is facing a "crisis of faith" due to the lack of adequate salary and promotions. The report suggests that the university increase faculty salaries and promotions to keep faculty members from leaving the university.

U.S. Navy conducts maneuvers to halt Nicaraguan arms running

WASHINGTON (UPI) - The U.S. Navy has conducted maneuvers to halt Nicaraguan arms running.

The maneuvers, the Navy said, were to protect the people and property of the United States, which is the only legal U.S. arms supplier to Nicaragua.

The Navy has conducted similar maneuvers in the past to stop Nicaraguan arms running.

China stresses Soviet ties

China is seeking to strengthen its ties with the Soviet Union, President Xi Jinping said during a visit to Moscow last week. The two countries have been increasing cooperation in various fields, including economics, security, and diplomacy.

In a speech to the Russian parliament, President Xi said that China and the Soviet Union share similar social systems and national interests. He added that the two countries should continue to work together to promote the principles of equality and mutual interest in their relationship.

The visit to Moscow was President Xi's first foreign trip since his assumption of the presidency in 2013. The trip is seen as a sign of the growing importance of China's relationship with the Soviet Union.

London: Libya 'abused' status

The British government on Wednesday formally recognized Libya as an 'abused' status, following a request from the Libyan government. The status will allow the Libyan government to have greater control over its own internal affairs.

In a statement, the British government said that the Libyan government has made significant progress in recent years in addressing the abuses committed against its citizens. The government added that it would continue to work closely with the Libyan government to support its efforts to promote human rights and democracy.

Kennedy found dead in hotel

John F. Kennedy, the 35th president of the United States, was found dead in his hotel room on November 22, 1963.初步调查显示，他可能死于心脏病发作。但这一结论并未得到公众的普遍接受，各种阴谋论和真相揭示继续引发争议。

民权运动

民权运动是20世纪中期美国黑人争取平等权利的社会运动。民权运动的领袖们在1955年的“自由骑”活动中，通过非暴力抗议和示威来推动民权法案的通过。该运动导致了种族隔离制度的结束，并在一定程度上提高了黑人的社会地位。

民权法案

民权法案是美国历史上最重要的法律之一，它旨在消除种族歧视和社会排斥。法案于1964年7月2日由林登·约翰逊签署，标志着民权运动的高潮。法案包括禁止种族歧视在内的多种条款，旨在为所有美国人提供平等的权利。

民权法案的实施

民权法案的实施是一个长期的过程，涉及法院的裁决、政府的行动和民间组织的努力。法案的实施也带来了成功的案例，如布朗诉教育委员会案，这是1954年的一个 landmark case，它推翻了种族隔离制度。

民权法案的影响

民权法案对美国社会产生了深远的影响。它不仅促进了民权运动的发展，还推动了美国社会的多样性。法案的实施也标志着美国社会进入了新的阶段，即种族隔离制度的结束和种族平等的实现。

民权法案的未来

民权法案的未来仍然是充满挑战的。尽管已经取得了许多成就，但种族平等和促进多元文化仍然面临着诸多困难。美国社会需要继续努力，推动民权法案的进一步实施，以实现真正的平等和繁荣。

Doctor says it took over 20 years for experts to find AIDS viruses

By Dan Sentel

"AIDS was recognized quickly because of the high death rate and the fact that it was so contagious," said Dr. Max Cooper, who has spent 18 years searching for bacteria that cause AIDS. "But it took at least 20 years for experts to find the virus that causes AIDS." Cooper, who teaches at the University of Iowa, was named the first chair of Immunobiology, a new department in the College of Liberal Arts. Tuttle said this was one of the most important appointments he made, "because it is part of the University's commitment to research in immunology and AIDS." Cooper's research has centered around the discovery of the virus that causes AIDS. "In the last few years, the number of people who have been diagnosed with AIDS has increased dramatically," said Tuttle. "In 1981, there were only 500 reported cases of AIDS. By the end of 1990, there were over 180,000 reported cases of AIDS." Cooper said the first step in leading to prevention of AIDS is to find a cure for the disease. "There are many different ways to approach this problem," said Cooper. "One way is to find a cure for the disease and prevent it from spreading." The results of his discoveries have also been used to develop new therapies for individuals who have already been diagnosed with AIDS. "We have developed a new therapy that can help people who have been diagnosed with AIDS," said Cooper. "This therapy is based on the discovery of the virus that causes AIDS." Cooper said the discovery of the virus that causes AIDS is important in developing ways to prevent the disease. "If we can find a cure for the disease, we can prevent it from spreading," said Cooper. "This is the first step in preventing the spread of AIDS." Cooper said the results of his discoveries have also been used to develop new therapies for individuals who have already been diagnosed with AIDS. "We have developed a new therapy that can help people who have been diagnosed with AIDS," said Cooper. "This therapy is based on the discovery of the virus that causes AIDS." New drunken driving law unlikely

George W. Trumund   Iow. Capitol

Efforts are being made in the Iowa legislature to pass a bill that would increase the allowable blood-alcohol level for motorists. Several Iowa business groups are encouraging lawmakers to pass the bill, while the Iowa Retailer's Association is opposed to the proposal. The bill, which was introduced by Rep. John McDonald, R-Coralville, would raise the legal limit for drivers from 0.08 to 0.10 percent. The current limit is the lowest in the nation, and the proposal has been opposed by many motorists who argue that it is too strict. The bill is expected to be voted on in the coming weeks.

Administrators set $8.5 million limit on cost of Union remodeling plans

By Dean Unwin
It was the site plan for remodeling the Union that was decided upon by the USO board as the best alternative solution. The USO board decided to move forward with the project, and a site plan was presented to the architects and engineers at a recent meeting. The site plan includes a "large" increase in the building's capacity.

KENDALL said the site plan consists of four primary features that are being implemented:

1. A new building for student services.
3. A new building for student housing.

These features were selected based on input from a large number of students and faculty members. The site plan was designed to provide more space for student services, recreation, housing, and dining.

GRANT said the university has agreed to fund the project, and the site plan has been approved by the USO board. The university is committed to providing the necessary funds to support the site plan.

**Terror, America**

Last week the administration of Reagan had signed National Security Letter 289, which was intended to establish a national computer network for the exchange of information on terrorism. The network is intended to be used as a means of sharing information on terrorist activities, but it is also intended to be used to monitor and control political expression, free expression, and political activism.

**BIBLIOGRAPHIES**

Terror, American-style

Last week the administration revealed that in April President Reagan had signed National Security Directive 125, which expands certain powers of the federal government, particularly state-sponsored terrorism. The directive includes such dangerous powers as increased intelligence gathering and sharing, but also included approval for some measures that would conflict with past U.S. policy, such as postponing strikes against terrorists and military reprisals.

It is obvious now that national security policies ought to be part of U.S. solutions except as a last resort and in extraordinary situations, and that the government must not use the same means to protect itself as to destroy others. Violent means are not an option for governments, and would violate U.S. principles. They would only be used to escape one's own responsibilities.

In most newspapers, military reprisals are not part of U.S. policies. It is obvious now that national security policies ought to be part of U.S. solutions except as a last resort and in extraordinary situations, and that the government must not use the same means to protect itself as to destroy others. Violent means are not an option for governments, and would violate U.S. principles. They would only be used to escape one's own responsibilities.

Denying illegality, Mondale orders end to independent delegate panels

United Press International

WASHINGTON - The order issued Wednesday to the 30 independent delegate committees by Vice President Walter F. Mondale did not end the fight over the constitutional legality of such panels.

Mondale said there was nothing illegal about the committees, but that they must be abolished because, he said, they are diverting attention from the crucial issues of the campaign.

The former vice president acted after the Washington Post revealed that "patterns of apparent coordination" between the independently funded delegate committees and the national Mondale campaign might have violated the Constitution.

Independent delegate committees are legal under the election laws, but they are not allowed to coordinate activities with the candidate's campaign. The Federal Election Commission, however, has never ruled on the question of whether such committees may engage in activities other than soliciting contributions, as long as such efforts are made "on behalf of" the candidate's campaign.

Panel denies cleanup delay

WASHINGTON (ULPI) - The Reagan administration is understanding the cost of cleaning up the nation's worst toxic waste dumps to stall extension of the Superfund law by a year, sources said Wednesday.

The sources said the Commerce Department's Office of Management and Budget had agreed to extend the deadline for the cleanup of hazardous waste dumps.

The sources said the Washington Post had received a memo from the Commerce Department's Office of Management and Budget indicating that the extension was under consideration.

The Superfund law, which expires at the end of 1985, will be extended for one year, the sources said.

The move is expected to be welcomed by environmentalists, who have been pushing for a longer extension of the law.

The Superfund law, which was enacted in 1980, provides for the cleanup of hazardous waste sites in the United States.

The law requires that the government pay for the cleanup of hazardous waste sites, and that the private sector be held accountable for the cleanup of hazardous waste sites.

If the Superfund law is not extended, the government will have to pay for the cleanup of hazardous waste sites, and the private sector will be held accountable for the cleanup of hazardous waste sites.

Mondale orders end to independent delegate panels

WASHINGTON (ULPI) - Vice President Walter F. Mondale ordered Thursday that the independent panel on delegate selection for the Democratic national convention be dissolved, acting on a recommendation by the special task force that reviewed the panels.

The task force, appointed by Mondale, looked into the legality of the panels and found they were violating the Constitution.

Mondale said he had discussed the matter with the delegations and had decided to order the panels dissolved because they were "constituting a threat to the democratic process of the party."

The Drake Relays, held in Des Moines, Iowa, attracts top athletes from across the country, including Olympic hopefuls and returning champions.
Having her work cut out for her, winning their events and possibly qualifying for the Olympic, but if I were to set one, I'd have to say I want to be a New National Holder."

Duckett, a three-time Iowa high school champion in the event, has thrown a season-best 155-J,2 and 5,000 metres.

"I trained all winter to return to the track for the outdoor season. Today is a great day to return to competition," Duckett said.

Duckett, who has missed much of the outdoor season, said she is looking forward to the meet.

"I want to do better than that," Duckett said. "First place in the 6,000 would have been great, but I'm just not sure who is going to be there."

Jo Springs, defending Drake Relays champion in the 800, said she would like to place higher than that.

If Duckett and Springs are there, a new national record might be set.

"I'm not sure what will be the case," Duckett said. "I think there are a lot of people who want to do it."

"I think the goal for Brenda Calhoun is to beat the record," Duckett said. "I think the goal for Mary Hassard is to beat the record too."
Top Iowa gymnasts win awards

By Lowell Kellogg, riding in the "Little 500" bike race, an annual event won by the University of Iowa student-athletes, is set for the second weekend in May.

STUDEBAKER, a staple of the University of Iowa basketball team for years, will be starting his junior racing season and he rode in the Big Ten cycling tour last year. In his first race as a senior April 8 in Lincoln, Neb., Kellogg came home with $2,000 in his pockets.

**Islanders are searching for rally against young, powerful Canadians**

The defending champion Philadelphia Flyers have scheduled a one-game series, "a one-game series," Dawkins said. According to the Philadelphia Inquirer, the Flyers have scheduled a one-game series to qualify for a spot on the Stanley Cup. The Flyers will host the Montreal Canadiens, who lost to the Islanders in the previous series. The Islanders have already qualified for the playoffs, and the Flyers will host the Canadiens in a one-game series to determine who will advance to the next round.

**Cardinals' pitching beats Cubs, 7-5**

**New York City** — One comes from Queens, the other from Brooklyn, but the Mets share the same city and the same stadium. The Mets also share something else: they are both bad. But it is also true that they are both in the same league, the same division, and the same division schedule.

The Mets are the Mets, and the Cubs are the Cubs, but there is a reason why the Cubs are better than the Mets. The Mets have never won a World Series championship, while the Cubs have won three.

**Rookies seek lasting impression**

One of the most exciting things about baseball is the potential for rookies to make an impact. In 1984, there were several rookies who did just that. Perhaps the most famous of these rookies was Don Mattingly, who went on to become one of the best hitters in the majors. But there were others, like Todd Zeke, who also made their mark.

Shatner breaks his Captain Kirk image

IOWA CITY, IOWA — Irate
question. Who is the only con-
scious person who can inter-
vene in a movie scene? Irate
question. Why is Irene Dunne
and Jonathan Robards and
Claudia Cardinale galavanting
around Monument Valley?

Cardinale may have been
bored with her music during
Shatner's performance. He
spent three days at each end
of the movie playing to a liv-
ing.

Vegas boss says hotels slowing up strike talks

Las Vegas, Nev. (UPI) - The head of the International Hotel and Restaurant Employees Union said he was not impressed with the first strike talks.

The slow talks by 50,000 strippers include labor's organization and hotel operators in seeking a new union contract for the Resorts Strip.

"The tone and the manner of the discussions have been both, but I don't see a lot of progress," he said. "I think that is because it's a lot of personalities that have been involved here, but I don't see a lot of progress." The hotel operators declined to comment.

"But there is no way to us who are in the hotel business that we are not going to get a contract," he said. "We are not going to continue to lose business to the casinos in the future." The hotel operators declined to comment.

Hungary gets break-dance fever

Budapest, Hungary (UPI) - Break-dancing, once popular among young people in the streets of New York and other big American cities, is now spreading to the streets of Hungary.

The sport was first played at the Metropolitan Opera House in New York City. Now, according to an article in the Budapest Pesti Hirlap, the sport is now popular among young people in Hungary.

The sport involves two people who dance in opposite directions, with one person picking up another and then the two people dancing in opposite directions. The sport is now popular among young people in Hungary.

Pink Floyd guitarist falls flat on 'Face'

By Alex Wilding-White

Staff Writer

In the wake of the demise of Pink Floyd, whom Gilmour had been involved with for 14 years, it's easy to understand that finding his own musical identity might be a particularly difficult and drawn-out process.

In the New Order of the world, Pink Floyd, whom Gilmour had been involved with for 14 years, it's easy to understand that finding his own musical identity might be a particularly difficult and drawn-out process.

David Gilmour, formerly guitarist for Pink Floyd, has released his second solo album. About Face. His new recording is uneven as it displays Gilmour's technical virtuosity overplayed by insubstantial musical ideas.

Gilmour, who was known for his ability to blend his unique guitar style with precision and control over the artistic environment, has left his bandmates behind. But as David Gilmour continues to develop his own musical identity, this second solo album falls flat farther and farther into the background.

SADLY, ABOUT FACE is a hodgepodge of people unable to help or even move the songs forward. The power of the words, the strength from the feelings that always were there, but are now lost, is the background, the lyrics that just stand there.

The songs end up as an attempt to smooth out the little too much, the view of life as seen through a different filter. Or, the words, the strength from the feelings that always were there, but are now lost, is the background, the lyrics that just stand there.

The songs end up as an attempt to smooth out the little too much, the view of life as seen through a different filter. Or, the words, the strength from the feelings that always were there, but are now lost, is the background, the lyrics that just stand there.
