Parents trust preschool environment

by Stephanie Norman

Chang says the recent increase in the number of children attending preschool programs is a positive development in the community. However, she also expresses concern about the quality of some preschools.

"The increase has been impressive," Chang said. "However, we need to be careful about the quality of the programs. Not all preschools are created equal."

Chang said she believes that parents should do their research and ask questions about the curriculum, the teachers, and the facilities before enrolling their children in a preschool. She also emphasized the importance of visiting the preschool before making a decision.

Despite the concerns, Chang expressed optimism about the future of preschool programs in the community. She said she believed that with proper oversight and regulation, preschools could continue to provide a valuable service for young children.

Weather

A high in the 80s — plenty to be a bright and partly cloudy day. Low tonight should be around 55.

Overexposed

French President Francois Mitterrand, who is meeting with the Soviet leader today, said on French television that Soviet ways are brought back to life in this country.

Don't leave

Wierden leaves his mark in this community.

Dr. Phillip Minnig, a former State Medical Board member, is seeking to return to his position. He said he will fight for the position and work to improve the medical system.

Talks lead to hard line on Khadafy

By Robert Shuman

The United States and Libya reached an agreement this weekend on a range of issues, including the release of American hostages. The talks were held in Washington, D.C., and were attended by representatives from both countries.

President George Bush and Libyan leader Muammar Gaddafi held discussions over the weekend, and both leaders agreed to a number of concessions. The United States has agreed to drop all charges against Libya, and Libya has agreed to provide compensation to the families of the American hostages.

The talks were described as "tough but productive." Both leaders expressed optimism about the prospects for a lasting resolution to the conflict.

Grinnell trustees reneged on divestment, says group

by Rob Thomas

A newly formed group of Grinnell College alumni is calling for the university to divest from companies doing business with South Africa. The group, known as the "Grinnell Alumni for Peace," is demanding that the university take action to address the apartheid regime.

"We believe that Grinnell should lead the way in divesting from companies that support apartheid," said John Williams, a representative of the group. "We urge the university to take a strong stand on this issue.

The group is demanding that Grinnell divest from companies such as Nissan, which has a plant in South Africa, and Toyota, which has a dealership in the city. The group is also calling for a boycott of companies that do business with South Africa, such as South African Airways.

The group is seeking support from other alumni and students, and is considering legal action if the university fails to respond to its demands.
Blackout in Iowa. Doonesbury

Briefly

By Brian Lee

Staff Writer

Outdoor radio was put on hold Monday night when the Iowa City City Council voted unanimously to remove the radio broadcast on the Iowa City Downtown Mall.

In an 8-0 vote, the council members voted to ban the radio broadcast on the public walk space on Tuesday night.

Several members of the council said they were concerned the radio might disturb businesses on the plaza.

"It's not like it's a radio show," said Councilman Tim Smith. 

"It's just a radio broadcast," said Councilman Dan Kroeze. 

"If we continue to have this disturbance on the plaza," said Councilman Ed McNally. 

"I'm in favor of giving people an opportunity to listen to music," said Kroeze. But McNally said he would vote against the broadcast because it would disturb businesses on the plaza.

"It seems like a reasonable compromise to me," said Smith. 

"It seems to be a reasonable compromise," said Kroeze. 

"It seems like a reasonable compromise," said McNally. 

"I'm in favor of giving people an opportunity to listen to music," said Smith. But McNally said he would vote against the broadcast because it would disturb businesses on the plaza.

"It seems like a reasonable compromise to me," said Kroeze.

The leaders of the West's seven major industrialized nations wrote up an important part of the agenda in Tokyo Monday by issuing a statement on terrorism that left U.S. officials enraged.

In the minds of people like President Ronald Reagan and Secretary of State George Shultz, the stakes in the group's communique achieve the long-sought goals of Allied cooperation against terrorism, particularly the "diplomatic, political and economic sanctions of Libya."

The agreement the summit leaders arrived at, however, was more dramatic than American delegates would have hoped. Furthermore, the unity and consensus U.S. officials speak of appears to be more pronounced in their imagination than in reality.

The key declaration on terrorism programs an armistice but to nations that sponsor terrorism, restrictions on exports and a boycott against some enterprises which violate pollution control laws, for example.

The communique achieves the long-sought consensus agreement the summit leaders arrived at, however, was more dramatic than American delegates would have hoped. Furthermore, the unity and consensus U.S. officials speak of appears to be more pronounced in their imagination than in reality.

Locals can’t ‘duck’ birds’ spring ritual

By Sylvia Schuster

There have been local reports of birds nesting near or even over a popular intersection in Iowa City, so why are the birds doing this? The answers may be found in the Iowa City area.

“I’ve heard of nesting near a popular intersection before,” said Beverly Horton, supervisor of the Iowa City Public Library. “The birds seem to be attracted to the noise and movement of the cars and people.”

The birds are nesting near the intersection of 12th and University Avenues, where a lot of foot traffic occurs.

But Horton also noticed that the birds are nesting in other areas of the city as well, including near a local park and along the river.

“It’s not just one area,” Horton said. “The birds are nesting all over the city.”

Karen Kinkor, a resident of Iowa City, also noticed the birds nesting in her neighborhood.

“I’ve seen them nesting in my yard,” Kinkor said. “It’s not unusual for birds to nest near human habitation, especially if there are food sources nearby.”

In addition to nesting, the birds are also eating a lot of food, including insects and seeds.

“I’ve seen them eating a lot of insects,” Horton said. “They seem to be thriving in this area.”

In fact, the birds are so abundant that they are causing problems for local residents.

“Some people have complained about the birds eating their food,” Horton said. “But I think it’s important to remember that these birds are an important part of the ecosystem.”

The Iowa City Parks and Recreation Department is currently working to control the bird population.

“We are monitoring the situation and will take action if necessary,” said a spokesperson for the department.

In the meantime, local residents are encouraged to use bird feeders and other bird-friendly practices to help support the local bird population.
Trains collide in Portuguese disaster

POVIDA SVIA, near Porto- 
apal (UPI) — A speeding express train slammed into a stationary commuter train packed with students Monday in a Lisbon suburb, killing at least 13 people, injuring 60 others and trapping some 200 passengers on the derailed cars.

The express train moved south from the town seconds before the collision, railroad officials said, adding that the commuter train was northbound and was not moving.

Authorities said the casualty figures were based on reports from hospital officials, who said that 60 others were injured, some seriously, in the accident.

"I heard a loud bang, then felt the train jolt," said a commuter who was on the train at the time. "The car was shaking, and I felt the train stopped."

The express train engineer tried to stop the train, but it careened into the stationary commuter train, which was packed with students.

"I think the train was moving at about 100 km per hour," said a police official, who asked not to be identified.

"I heard the train skid and then feel the train jolt," said a witness who was standing near the tracks.

The express train was carrying about 200 passengers, of whom about 80 were students. The commuter train was packed with about 600 passengers, including students.

The accident occurred at about 9 a.m. on the outskirts of Lisbon, as the express train was returning to the city from the south after a short trip.

"I heard the train skid and then feel the train jolt," said a witness who was standing near the tracks.

Pravda publishes Chernobyl details

WASHINGTON (UPI) - The Soviet newspaper Pravda last Thursday carried details of the accident at the Chernobyl reactor, saying a fire had been put out but another was still burning 30 feet into the plant. The newspaper, a mouthpiece of the Soviet government, also reported that radiation levels around the reactor were high.

The newspaper said that the senator from Oregon, Robert Packwood, had been stopped at the airport on his way to Kiev because of the accident. Packwood is a member of the Senate Foreign Relations Committee.

Pravda said the area around the reactor was a "hot zone," and that it was impossible to say when the fire would be put out. The newspaper said that radiation levels inside the reactor were also high.

The newspaper also said that the Ukrainian government had been "very cautious" in its statements about the accident, and that it had been reluctant to release information about the radiation levels in the surrounding area.

The newspaper said that the accident had occurred at the Chernobyl nuclear power plant, which is located near the city of Chernobyl, in the Ukraine.

The accident at the Chernobyl plant on Tuesday was the worst nuclear disaster in history, and has caused widespread concern around the world.

The newspaper said that the accident had caused a "radioactive cloud" that had spread as far as the United States.

Bangles get manic tonight at Hancher

By Alaniggs

A T THE beginning of this year, the Bangles and the Loosecars, two1 popular fairly bands on the East Coast, were playing the open-air market in their area. For the Bangles, it was their first open-air gig, and for the Loosecars, it was their last one. The Loosecars splintered in a few months, but the Bangles have continued to be a popular band, and their appearance tonight at the Hancher Auditorium in Iowa City should be a highlight of their tour.

The Bangles are an all-female pop group specializing in 1970's pop tunes. They were discovered with the help of the Bangles' commercial producer, David Kahne, who helped power the LP "Different Light". The album helped four consecutive albums, and the group has brought the group national attention, including features in Rolling Stone and other magazines.

The Bangles were formed five years ago by Hoffs, guitarist Vicki Peterson, and her sister, vocalist Mary Ann Kaff. The group was named after a Czechoslovakian band, and they have been successful ever since.

In 1984, they released their debut album, "If You Love Him". Their second album, "All Over You", followed in 1985. Their third album, "007 or 008", came out in 1986. The group's latest album, "Harmony", was released in 1987. The album was produced by Michel Bisceglia, who is also the group's producer for the upcoming tour.

The Bangles' commercial breakthrough came in 1986 when they released the single "Manic Monday". The song became a hit and was featured in the movie "Can't Buy Me Love". Since then, the Bangles have continued to release successful albums and singles.

The group's success has been due in part to their unique sound, which combines elements of rock, pop, and R&B. Their live performances are energetic and filled with audience participation, with the band often inviting audience members to participate in their songs.

The Bangles, an up-and-coming band from California, will perform an all-night show with the Hancher Auditorium opening the show.

The Bangles' two-hit singles on the independent Big Time Records label. (The group's 1986 debut, "Manic Monday", has also included the U.S. alternative channel. It has been the most successful album of the band's career and has helped them build a following.

Tonight, the Bangles will perform an all-night show with the Hancher Auditorium opening the show. The show will feature the Bangles' biggest hits, including "Manic Monday" and "8th Street". The performance will be followed by an after-party where fans can meet the band and purchase merchandise.

The Hancher Auditorium is located at 1000 Lowry St., Iowa City, IA 52242. For more information, call 712-339-2211.

**Braves extend Reds' losing streak**

**CINCINNATI (UPI) — Bob Horford's two-run homer in the 15th inning Monday night to offset a pair of homers by the Reds, as the Atlanta Braves defeated Cincinnati 7-5.

"I'm just glad to be on the field," Horford said. "I've been out for a while with a knee injury, so it's good to be back." The Braves (86-69) won for the 13th straight game, improving their lead to 9 1/2 games over the second-place Cardinals. The Reds (82-72) are 8 1/2 games behind.

"We have a lot of confidence right now," Horford said. "We're playing good baseball, and we're just trying to keep it going." The victory was the Braves' 10th in a row at home, and they have won 16 of their last 17 games overall.

"It's good to see everyone healthy," Horford said. "We're all working hard to get back on the field, and it's great to see everyone contributing." The Braves' hot streak has put them in contention for the National League East title, and they are now just three games behind the Philadelphia Phillies (90-67) for the top spot.

"We're just trying to keep it rolling," Horford said. "We're doing everything we can to prepare for the rest of the season, and we're just trying to keep our eyes on the prize." The Braves have a tough stretch of games ahead, with six straight against the Pittsburgh Pirates and St. Louis Cardinals to close out the month.

"It's good to have everyone healthy," Horford said. "We're just trying to keep it going and see where we end up at the end of the season." The Braves currently sit in second place in the National League East, just a game behind the Philadelphia Phillies.

"The team is playing well, and we're just trying to keep it going," Horford said. "We're all working hard to get back on the field, and it's great to see everyone contributing." The Braves have won 16 of their last 17 games overall, and they have a chance to take over first place in the National League East with a strong finish.
